Attention: Mr. Dennis Leung

Dear Sir/Madam,

**Re: Contract No. CV/2012/07
Development at Anderson Road
Footbridge D and Associated Works Area
Monthly EM&A Report for February 2016**

Reference is made to the Environmental Team's submission of the Monthly EM&A Report for February 2016 received by e-mail on 10 March 2016 for our review and comment.

We are pleased to inform you that we have no adverse comment on the captioned report.

Thank you very much for your attention and please feel free to contact the undersigned should you require further information.

Yours faithfully,

David Yeung
Managing Director

EXECUTIVE SUMMARY

- i. This is the Environmental Monitoring and Audit (EM&A) Monthly Report – [February 2016](#) of “Development at Anderson Road – Footbridge D and Associated Works Area” (Hereafter called “this Project”). The construction works of this project was commenced on 20 July 2013. This is the [32nd](#) month of EM&A report presenting the environmental monitoring findings and information recorded during the period of [1 February 2016 to 29 February 2016](#). The cut-off date of reporting is at the end of each reporting month.

Construction Activities for the Reported Period

- [Construction Tower C \(Portion C2\)](#)
- [Construction of Pier D \(Portion C2\)](#)
- [Construction of tower B \(Portion C2\)](#)
- [Reinstatement works of tower A \(Portion C3\)](#)

Noise Monitoring

- ii. Noise monitoring during daytime was conducted at the stations NM1 and NM2 on a weekly basis in the reporting month. No exceedance was recorded in the reporting month.

Air Quality Monitoring

- iii. Air quality monitoring has been conducted at station AQM1. No exceedance was recorded in the reporting month.

Complaints, Notifications of Summons and Successful Prosecutions

- i. No complaint and notifications of summons or successful prosecutions were recorded in this reporting month.

Site Inspections and Audit

- ii. The Environmental Team (ET) conducted weekly site inspections for Contract no. CV/2012/07 in the reporting month. Major observations and recommendations made during the audit sessions were rectified by the Contractors. No non-conformance was identified during the site inspections.

Future Key Issues

- iii. In coming reporting month, the principal work activities of individual contracts are anticipated as follows:
 - [Construction Tower C \(Portion C2\)](#)
 - [Construction of Pier D \(Portion C2\)](#)

- Construction of tower B (Portion C2)
- Reinstatement works of tower A (Portion C3)
- Footpath construction (Portion A)

Reporting Change

- vii. There are no reporting changes in this Reporting Period.

1. Introduction

1.1 Scope of the Report

- 1.1.1. Lam Environmental Services Limited (LES) has been appointed to work as the Environmental Team (ET) to implement the Environmental Monitoring and Audit (EM&A) programme as stipulated in the EM&A Manual of the approved Environmental Impact Assessment (EIA) Report for Development of Anderson Road.
- 1.1.2. This report presents the environmental monitoring and auditing work carried out in accordance to the Section 1.4 of EM&A Manual and “*Environmental Monitoring and Audit Requirements*” under Particular Specification Section 25.
- 1.1.3. The construction works of this project was commenced on 20 July 2013. This report documents the finding of EM&A works for this Project and during the period of [1 February 2016 to 29 February 2016](#). The cut-off date of reporting is at the end of each reporting month.

1.2 Structure of the Report

Section 1 ***Introduction*** – details the scope and structure of the report.

Section 2 ***Project Background*** – summarizes background and scope of the project, site description, project organization and contact details of key personnel during the reporting period.

Section 3 ***Status of Regulatory Compliance*** – summarizes the status of valid Environmental Permits / Licenses during the reporting period.

Section 4 ***Monitoring Requirements*** – summarizes all monitoring parameters, monitoring methodology and equipment, monitoring locations, monitoring frequency, criteria and respective event and action plan and monitoring programmes.

Section 5 ***Monitoring Results*** – summarizes the monitoring results obtained in the reporting period.

Section 6 ***Compliance Audit*** – summarizes the auditing of monitoring results, all exceedances environmental parameters.

Section 7 ***Cumulative Construction Impact due to the Concurrent Projects*** – summarizes the relevant cumulative construction impact due to the concurrent

activities of the concurrent Projects.

- Section 8** ***Site Inspection*** – summarizes the findings of weekly site inspections undertaken within the reporting period, with a review of any relevant follow-up actions within the reporting period.
- Section 9** ***Complaints, Notification of summons and Prosecution*** – summarizes the cumulative statistics on complaints, notification of summons and prosecution
- Section 10** ***Conclusion***

2. Project Background

2.1 Background

- 2.1.1. The main objective of the project “Development at Anderson Road – Footbridge D and Associated Works Area” (Hereafter called “this Project”) is to construct a footbridge, Footbridge D, and associated lift towers across Shun On Road between the existing Shun Tin Estate and the future development platform.
- 2.1.2. For this project, Tin Wan House (NM1) and Ning Po No.2 College (NM2 and AQM1) are the designated monitoring station during the construction period. Owing to this contract is under the master project and on the other hand, the construction area is vicinity to the monitoring station (On Yat House) ID2 and (Sau Nga House) ID3 of the master project, so that the baseline noise and air quality monitoring will adopt the baseline data from those stations instead of conducting baseline monitoring. All the baseline data are referred to the baseline report from the public domain web site (www.anderson-road.com/main.htm).
- 2.1.3. The construction works of this project was commenced on 20 July 2013. During the construction phase of the project, air quality (dust) and noise impacts from the development site itself and the adjacent Anderson Road Quarry and other nearby construction sites are identified as the major environmental issues of concern. Besides, waste management is also identified in the EIA study as another environmental issue during the construction phase of the project that requires mitigation measures.

2.2 Scope of the Project and Site Description

- 2.2.1. The Project is located mainly near Shun Tin Estate and Ning Po No.2 College, as shown in **Figure 2.1**.
- 2.2.2. The scope of the Project comprises:
- Construction of footbridge and associated lift towers between Shun On Road and future platform at +152mPD and across Shun On Road. In Conjunction with these footbridge works are the associated furniture, drainage system, irrigation system and traffic signs.
 - Construction of drainage system for diversion of an existing stream on the slope adjoining Footbridge D.
 - Site formation and associated slope works for Footbridge D adjacent to Shun On Road.

2.3 Project Organization and Contact Personnel

2.3.1. Civil Engineering and Development Department is the overall project controllers for this project. For the construction phase of the Project, Project Engineer, Contractor(s), Environmental Team and Independent Environmental Checker are appointed to manage and control environmental issues.

2.3.2. The proposed project organization and lines of communication with respect to environmental protection works are shown in **Figure 2.2**. Key personnel and contact particulars are summarized in **Table 2.1**.

Table 2.1 Contact Details of Key Personnel

| Party | Role | Post | Name | Contact No. | Contact Fax |
|------------------------------------|--|---|-----------------|-------------|-------------|
| Ove Arup | Engineer | Chief Resident Engineer | Dennis Leung | 2407 0300 | 2407 8382 |
| | | Resident Engineer | Heidi Fung | 3656 3000 | 3656 1000 |
| Lam-Po Wing Joint Venture | Contractor under Contract no. CV/2012/07 | Project Manager | K.C. Wong | 2318 0281 | 3171 7222 |
| | | Site Agent | T.L. Lo | 2318 0281 | |
| | | Safety Officer | K.W. Lau | 2318 0281 | |
| | | Environmental Officer | K.I. Ip | 2318 0281 | |
| Ramboll Environ Hong Kong Limited | Independent Environmental Checker (IEC) | Independent Environmental Checker (IEC) | Mr. David Yeung | 3465 2888 | 3465 2899 |
| Lam Environmental Services Limited | Environmental Team (ET) | Environmental Team Leader (ETL) | Mr. Derek Lo | 2882 3939 | 2882 3331 |

2.3.3. For Contract no. CV/2012/07, the principal work activities in this reporting month included:

- Construction Tower C (Portion C2)
- Construction of Pier D (Portion C2)
- Construction of tower B (Portion C2)
- Reinstatement works of tower A (Portion C3)

2.3.4. In coming reporting month, the principal work activities of individual contracts are anticipated as follows:

- Construction Tower C (Portion C2)
- Construction of Pier D (Portion C2)
- Construction of tower B (Portion C2)
- Reinstatement works of tower A (Portion C3)
- Footpath construction (Portion A)

3. Status of Regulatory Compliance

3.1 Status of Environmental Licensing and Permitting under the Project

3.1.1. A summary of the current status on licences and/or permits on environmental protection pertinent to the Project is shown in **Table 3.1**.

Table 3.1 Summary of the current status on licences and/or permits on environmental protection pertinent to the Project

| Permits and/or Licences | Reference No. | Issued Date | Valid Period/ Expiry Date | Status |
|---|----------------------|--------------------|----------------------------------|---------------|
| Discharge Licence | WT00015447-2013 | 27 March 2013 | 31 March 2018 | Valid |
| Billing Account under Waste Disposal Ordinance | 7017083 | 15 March 2013 | N/A | Valid |
| The Air Pollution Control (Construction Dust) Regulation | 355705 | 14 February 2013 | N/A | Valid |
| Form A – Application for Water Pollution Control Licence | 355706 | 14 February 2013 | N/A | Valid |
| Application for Registration as a Chemical Waste Producer | WPN5213-292-L2825-01 | 28 November 2013 | N/A | Valid |

4. Monitoring Requirements

4.1 Noise Monitoring

NOISE MONITORING STATIONS

4.1.1. The noise monitoring has been undertaken at the designated locations Tin Wan House (NM1) and Ning Po No.2 College (NM2). The detailed information of monitoring stations for the Project are listed and shown in **Table 4.1** and **Figure 4.1**. **Appendix 4.1** shows the established Action/Limit Levels for the monitoring works.

Table 4.1 Noise Monitoring Stations

| Station ID | Monitoring Location |
|------------|-----------------------------|
| NM1 | G/F of Tin Wan House |
| NM2 | G/F of Ning Po No.2 College |

NOISE MONITORING PARAMETERS, FREQUENCY AND DURATION

4.1.2. The construction noise level shall be measured in terms of the A-weighted equivalent continuous sound pressure level (L_{eq}). $L_{eq(30\text{ minutes})}$ shall be used as the monitoring parameter for the time period between 0700 and 1900 hours on normal weekdays. For all other time periods, $L_{eq(5\text{ minutes})}$ shall be employed for comparison with the Noise Control Ordinance (NCO) criteria. Supplementary information for data auditing, statistical results such as L10 and L90 shall also be obtained for reference.

4.1.3. Noise monitoring shall be carried out at all the designated monitoring stations. The monitoring frequency shall depend on the scale of the construction activities. The following is an initial guide on the regular monitoring frequency for each station on a weekly basis when noise generating activities are underway:

- one set of measurements between 0700 and 1900 hours on normal weekdays.

4.1.4. If construction works are extended to include works during the hours of 1900 – 0700 as well as public holidays and Sundays, additional weekly impact monitoring shall be carried out during respective restricted hours periods. Applicable permits under NCO shall be obtained by the Contractor.

MONITORING EQUIPMENT

4.1.5. As referred to in the Technical Memorandum (TM) issued under the NCO, sound level meters in compliance with the International Electrotechnical Commission Publications 651: 1979 (Type 1) and 804: 1985 (Type 1) specifications shall be used for carrying out the noise monitoring. Immediately prior to and following each noise measurement the accuracy of the sound level meter shall be checked using an acoustic calibrator generating a known sound

pressure level at a known frequency. Measurements may be accepted as valid only if the calibration level from before and after the noise measurement agree to within 1.0 dB.

- 4.1.6. Noise measurements shall not be made in fog, rain, wind with a steady speed exceeding 5 m/s or wind with gusts exceeding 10 m/s. The wind speed shall be checked with a portable wind speed meter capable of measuring the wind speed in m/s.

4.2 Air Monitoring

AIR QUALITY MONITORING STATIONS

- 4.2.1. The air monitoring has been conducted at the designated location Ning Po No.2 College (AQM1). The air monitoring stations for the Project are listed and shown in **Table 4.2** and **Figure 4.1**. **Appendix 4.1** shows the established Action/Limit Levels for the monitoring works.

Table 4.2 Air Monitoring Station

| Station ID | Monitoring Location |
|------------|----------------------------------|
| AQM1 | Roof Top of Ning Po No.2 College |

AIR MONITORING PARAMETERS, FREQUENCY AND DURATION

- 4.2.2. One-hour and 24-hour TSP levels should be measured to indicate the impacts of construction dust on air quality. The 24-hour TSP levels shall be measured by following the standard high volume sampling method as set out in the Title 40 of the Code of Federal Regulations, Chapter 1 (Part 50), Appendix B.
- 4.2.3. All relevant data including temperature, pressure, weather conditions, elapsed-time meter reading for the start and stop of the sampler, identification and weight of the filter paper, and any other local atmospheric factors affecting or affected by site conditions, etc., shall be recorded down in detail.
- 4.2.4. For regular impact monitoring, the sampling frequency of at least once in every six-days, shall be strictly observed at all the monitoring stations for 24-hour TSP monitoring. For 1-hour TSP monitoring, the sampling frequency of at least three times in every six-days should be undertaken when the highest dust impact occurs.

SAMPLING PROCEDURE AND MONITORING EQUIPMENT

- 4.2.5. High volume samplers (HVSs) in compliance with the following specifications shall be used for carrying out the 1-hour and 24-hour TSP monitoring:
- 0.6 - 1.7 m³ per minute adjustable flow range;
 - equipped with a timing / control device with +/- 5 minutes accuracy for 24 hours operation;
 - installed with elapsed-time meter with +/- 2 minutes accuracy for 24 hours operation;

- capable of providing a minimum exposed area of 406 cm²;
- flow control accuracy: +/- 2.5% deviation over 24-hour sampling period;
- equipped with a shelter to protect the filter and sampler;
- incorporated with an electronic mass flow rate controller or other equivalent devices;
- equipped with a flow recorder for continuous monitoring;
- provided with a peaked roof inlet;
- incorporated with a manometer;
- able to hold and seal the filter paper to the sampler housing at horizontal position;
- easily changeable filter; and
- capable of operating continuously for a 24-hour period.

4.2.6. Initial calibration of dust monitoring equipment shall be conducted upon installation and thereafter at bi-monthly intervals. The transfer standard shall be traceable to the internationally recognized primary standard and be calibrated annually. The calibration data shall be properly documented for future reference by concerned parties such as the IEC. All the data should be converted into standard temperature and pressure equivalents.

LABORATORY MEASUREMENT / ANALYSIS

4.2.7. A clean laboratory with constant temperature and humidity control, and equipped with necessary measuring and conditioning instruments to handle the dust samples collected, shall be available for sample analysis, and equipment calibration and maintenance. The laboratory should be HOKLAS accredited.

4.2.8. If a site laboratory is set up or a non-HOKLAS accredited laboratory is retained for analysis, laboratory equipment shall be provided by the ER in consultation with the IC(E). Measurement performed by the laboratory shall be demonstrated to the satisfaction of the ER and the IC(E). The IC(E) shall conduct regular audit to the measurement performed by the laboratory to ensure the accuracy of measurement results. The ET leader shall provide the ER with one copy of the Title 40 of the Code of Federal Regulations, Chapter 1 (Part 50), and Appendix B for his reference.

4.2.9. Filter paper of size 8" x 10" shall be labelled before sampling. It shall be a clean filter paper with no pinholes, and shall be conditioned in a humidity-controlled chamber for over 24-hours and be pre-weighed before use for the sampling.

4.2.10. After sampling, the filter paper loaded with dust shall be kept in a clean and tightly sealed plastic bag. The filter paper shall then be returned to the laboratory for reconditioning in the humidity controlled chamber followed by accurate weighing by an electronic balance with readout down to 0.1 mg. The balance shall be regularly calibrated against a traceable standard.

4.2.11. All the collected samples shall be kept in a good condition for 6 months prior to disposal.

5. Monitoring Results

5.0.1. The environmental monitoring will be implemented based on the sensitive receivers which would be mostly affected. Overall layout showing the work area, latest status of work commencement and monitoring stations are shown in **Figure 2.1** and **Figure 4.1**.

5.0.2. The environment monitoring schedules for reporting month and coming month are presented in **Appendix 5.1**.

5.1 Noise Monitoring Results

5.1.1. The noise monitoring results for Contract no. CV/2012/07 are summarized in **Table 5.1** below:

Table 5.1 Summary of Noise Monitoring Results at NM1 and NM2

| Date | Time | Location | Leq (dB) | Limit Level |
|-------------|-------|----------|--------------|-------------|
| 2-Feb-16 | 13:08 | NM1 | 66.3 | 75 |
| | 14:16 | NM2 | 64.7 | 65 |
| 12-Feb-16 | 8:22 | NM1 | 67.1 | 75 |
| | 9:31 | NM2 | 64.9 | 65 |
| 18-Feb-16 | 8:43 | NM1 | 68.1 | 75 |
| | 9:52 | NM2 | 64.8 | 65 |
| 24-Feb-16 | 8:31 | NM1 | 67.9 | 75 |
| | 9:40 | NM2 | 64.9 | 65 |
| Limit Level | | | 65 / 70 /75* | |

Note :

- 70dB(A) and 65 dB(A) for schools during normal teaching periods and school examination periods, respectively.

5.1.2. Day time period noise monitoring was conducted at the Tin Wan House (NM1) and Ning Po No.2 College (NM2). In the reporting month, school examination is undertaken at Ning Po No.2 College (NM2) from 1 – 26 February 2016. Therefore, the noise Limited Level during that date would be reduced to 65dB(A).

5.1.3. Noise monitoring results measured in this reporting period are reviewed and summarized. No exceedance was recorded in reporting month. Details of noise monitoring results and graphical presentation can be referred in **Appendix 5.2**.

5.2 Air Monitoring Results

5.2.1. The air monitoring results are summarized in **Table 5.2** and **Table 5.3** below. No exceedance was recorded in the reporting month.

Table 5.2 Summary of Air Monitoring Results at AQM1 - 24 hr TSP Monitoring

| Date | Time | TSP Level, ($\mu\text{g} / \text{m}^3$) |
|---------------------|------|---|
| 1-Feb-16 | 8:00 | 24 |
| 5-Feb-16 | 8:00 | 31 |
| 11-Feb-16 | 8:00 | 113 |
| 17-Feb-16 | 8:00 | 50 |
| 23-Feb-16 | 8:00 | 38 |
| 29-Feb-16 | 8:00 | 158 |
| Action Level | | 200 |
| Limit Level: | | 260 |

Table 5.3 Summary of Air Monitoring Results at AQM1 - 1 hr TSP Monitoring

| Date | Time | TSP Level, ($\mu\text{g} / \text{m}^3$) |
|---------------------|-------|---|
| 2-Feb-16 | 13:00 | 88 |
| 2-Feb-16 | 14:10 | 110 |
| 2-Feb-16 | 15:30 | 81 |
| 6-Feb-16 | 8:05 | 81 |
| 6-Feb-16 | 9:15 | 104 |
| 6-Feb-16 | 10:20 | 98 |
| 12-Feb-16 | 8:10 | 77 |
| 12-Feb-16 | 9:21 | 79 |
| 12-Feb-16 | 11:00 | 70 |
| 18-Feb-16 | 8:20 | 74 |
| 18-Feb-16 | 9:30 | 43 |
| 18-Feb-16 | 10:45 | 51 |
| 24-Feb-16 | 8:40 | 57 |
| 24-Feb-16 | 9:45 | 49 |
| 24-Feb-16 | 10:50 | 25 |
| Action Level | | 197 |
| Limit Level: | | 500 |

5.2.2. Air monitoring results measured in this reporting period are reviewed and summarized. No exceedance was recorded in reporting month. Details of air monitoring results can be referred in [Appendix 5.3](#).

5.3 Waste Monitoring Results

5.3.1. Inert and non-inert C&D waste were disposed of in this reporting month. Details of the waste flow table are summarized in **Table 5.4**.

Table 5.4 Details of Waste Disposal for Contract no. CV/2012/07

| Waste Type | Quantity this month | Cumulative Quantity-to-Date | Disposal / Dumping Grounds |
|--|---------------------|-----------------------------|----------------------------|
| Inert C&D materials disposed, m ³ | 0.00570 | 11.71114 | TKO137 |
| Inert C&D materials recycled, m ³ | 0 | 0 | N/A |
| Non-inert C&D materials disposed, m ³ | 0 | 0 | N/A |
| Non-inert C&D materials recycled, kg | 0 | 34.54 | N/A |
| Chemical waste disposed, kg | 0 | 0 | N/A |
| General refuse, m ³ | 0.00374 | 0.06976 | NENT |

6. Compliance Audit

6.0.1. The Event Action Plan for construction noise, air quality and water quality are presented in [Appendix 6.1.](#)

6.1 Noise Monitoring

6.1.1. No exceedance was recorded in the reporting month.

6.2 Air Monitoring

6.2.1. No exceedance was recorded in the TSP monitoring in the reporting month.

6.3 Review of the Reasons for and the Implications of Non-compliance

6.3.1. There was no non-compliance from the site audits in the reporting period. The observations and recommendations made in each individual site audit session were presented in Section 7.

6.4 Summary of action taken in the event of and follow-up on non-compliance

6.4.1. There was no particular action taken since no project-related non-compliance was recorded from the site audits and environmental monitoring in the reporting period.

7. Environmental Site Audit

7.0.1. According to EM&A Manual stipulation, the regular weekly site inspections on 2, 12, 16 and 23 February 2016 were carried out by ET, IEC, the Contractor and ARUP for Contracts no. CV/2012/07 to ensure the environmental performance. Observations and findings are summarized in **Table 7.1**.

Table 7.1 Summary of Environmental Inspections for Contract no. CV/2012/07

| Date | Observations | Follow-Up |
|-----------------|--|---|
| 2 - Feb - 2016 | R1: Contractor was reminded to keep the site clean and tidy during Chinese New Year holiday. | The findings were rectified before inspection on 12 February 2016 |
| 12 - Feb - 2016 | R1: The catch pit and U-channel at C2 should be cleaned regularly. | The findings were rectified before inspection on 1 March 2016 |
| 16 - Feb - 2016 | No particular finding. | N/A |
| 23 - Feb - 2016 | Contractor was reminded to remove debris in the U-channel regularly. | The findings were rectified before inspection on 1 March 2016 |

8. Complaints, Notification of Summons and Prosecution

- 8.0.1. No complaint and notification of summons or successful prosecutions were recorded in this reporting month.
- 8.0.2. The details of cumulative complaint log and updated summary of complaints are presented in **Appendix 8.1**.
- 8.0.3. Cumulative statistic on complaints and successful prosecutions are summarized in **Table 8.1** and **Table 8.2** respectively.

Table 8.1 Cumulative Statistics on Complaints

| Reporting Period | No. of Complaints |
|------------------------|-------------------|
| February 2016 | 0 |
| Project-to-Date | 1 |

Table 8.2 Cumulative Statistics on Successful Prosecutions

| Environmental Parameters | Cumulative No. Brought Forward | No. of Successful Prosecutions this month (Offence Date) | Cumulative No. Project-to-Date |
|--------------------------|--------------------------------|--|--------------------------------|
| Air | - | 0 | 0 |
| Noise | - | 0 | 0 |
| Waste | - | 0 | 0 |
| Total | - | 0 | 0 |

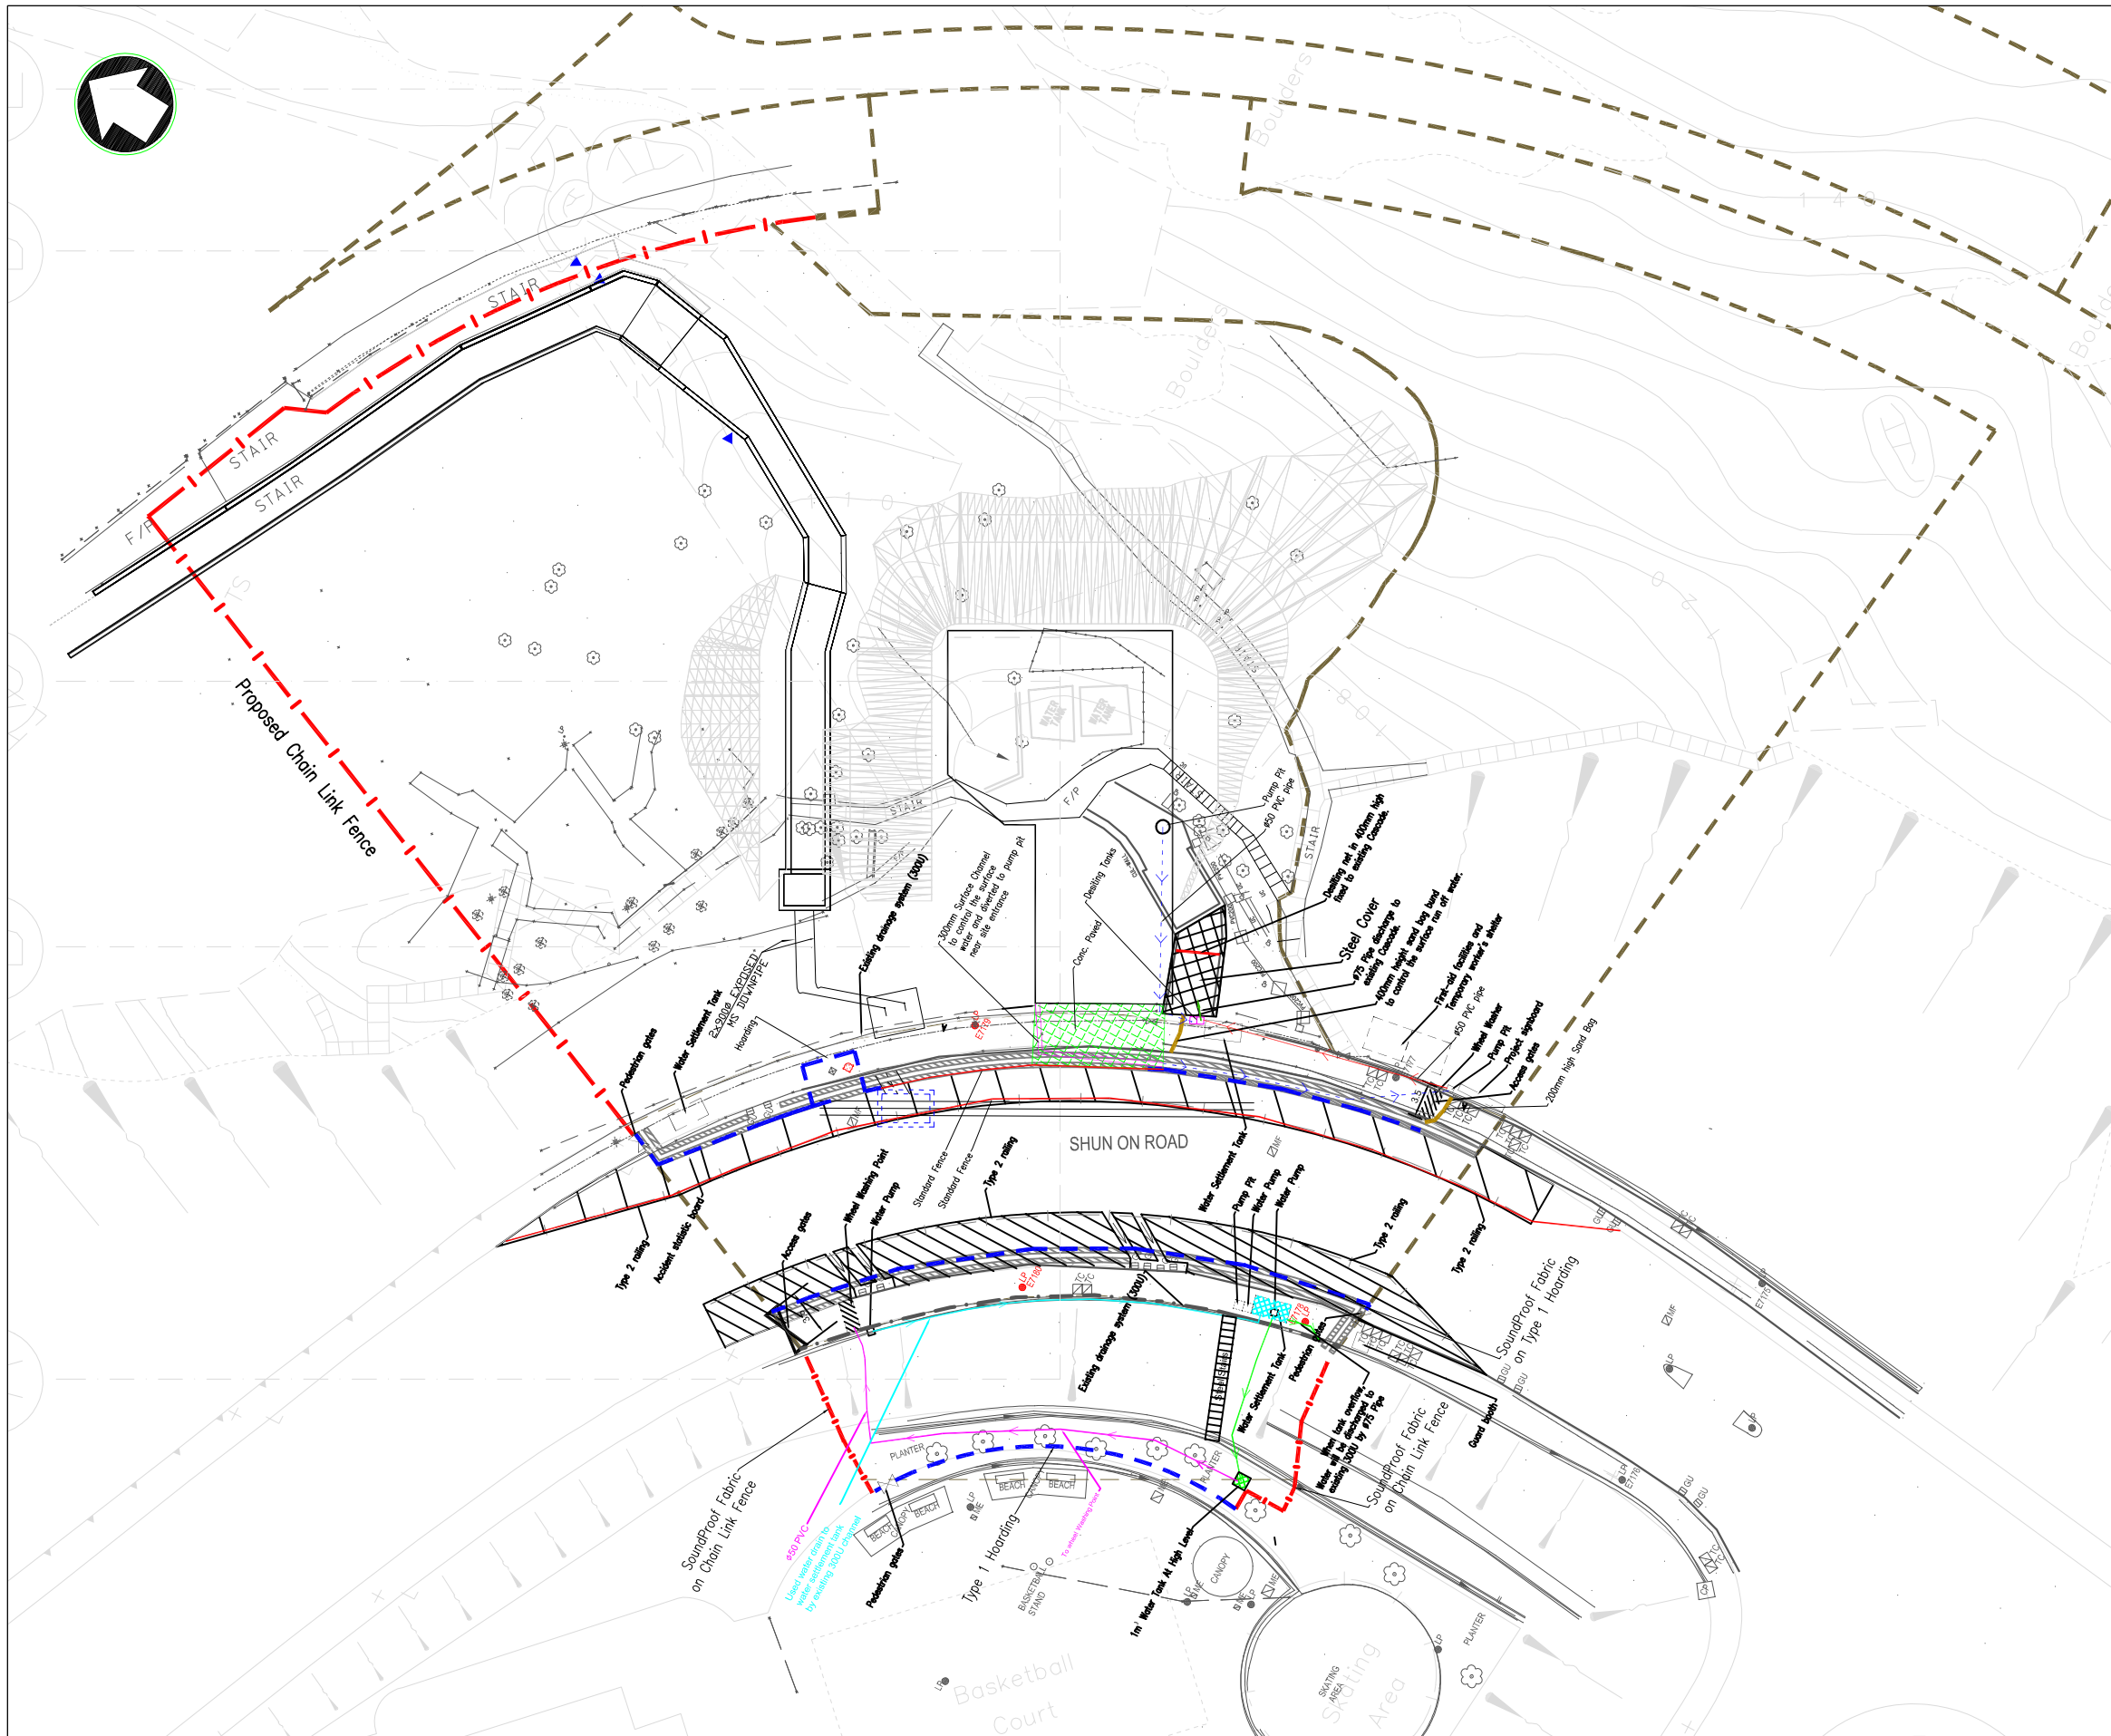

9. Conclusion

- 9.0.1. The EM&A programme was carried out in accordance with the EM&A Manual requirements, minor alterations to the programme proposed were made in response to changing circumstances.
- 9.0.2. No construction air and noise monitoring results that triggered the Limit Level and Action level was recorded. No complaint of air and noise were received by the ARUP and the contractor. Furthermore, no notification of summons or successful prosecution was received in this reporting month.
- 9.0.3. Construction noise should be a key environmental impact during the works. The noise mitigation measures such as use of quiet plants and installation of temporary noise barrier at the construction noise predominate area should be fully implemented as accordance with the EM&A requirement. Moreover, breaking works should be the potential construction dust impact since the construction site located nearby residential area of Shun Tin Estate. It is reminded that mitigation measures for dust should be properly implemented.

Figure 2.1

Project Layout

NOTES:

1. This drawing shall be read in conjunction with Drawing 24711/1052.
2. The location of fencing and hoarding is indicative only. The exact location is approved on site by Engineer.
3. For Detail of Access gate refer to CEDD Standard Drawing No. C1007.
4. Dimensions Are in Meters Unless Otherwise Shown.
5. The surface water inside Portion C3 will be collected by a pump pit and pump into water settlement tank for recycle purpose. In case the water inside the settlement tank is overflow, a $\phi 75$ pipe will discharge the overflow water into existing 300U on slope toe.

Ambient conditions

| | |
|--------------------|--------------|
| Temperature: | 21 ± 1 °C |
| Relative humidity: | 60 ± 10 % |
| Air pressure: | 1010 ± 5 hPa |

Test specifications

- 1, The Sound Level Meter has been calibrated in accordance with the requirements as specified in BS 7580: Part 1: 1997 and the lab calibration procedure SMTP004-CA-152.
- 2, The electrical tests were performed using an electrical signal substituted for the microphone which was removed and replaced by an equivalent capacitance within a tolerance of ±20%.
- 3, The acoustic calibration was performed using an B&K 4226 sound calibrator and corrections was applied for the difference between the free-field and pressure responsiveness of the Sound Level Meter.

Test results

This is to certify that the Sound Level Meter conforms to BS 7580: Part 1: 1997 for the conditions under which the test was performed.

Details of the performed measurements are presented on page 2 of this certificate.

Actual Measurement data are documented on worksheets.

Approved Signatory:

Huang Jian Min/Feng Jun Qi

Date: 13-Mar-2015

Company Chop:

Comments: The results reported in this certificate refer to the condition of the instrument on the date of calibration and carry no implication regarding the long-term stability of the instrument.

CERTIFICATE OF CALIBRATION

(Continuation Page)

Certificate No.: 15CA0312 03 Page 2 of 2

1, Electrical Tests

The electrical tests were performed using an equivalent capacitance substituted for the microphone. The results are given in below with test status and the estimated uncertainties. The "Pass" means the result of the test is inside the tolerances stated in the test specifications. The "-" means the result of test is outside these tolerances.

| Test: | Subtest: | Status: | Expanded Uncertainty (dB) | Coverage Factor |
|-------------------------|--|---------|---------------------------|-----------------|
| Self-generated noise | A | Pass | 0.3 | 2.1 |
| | C | Pass | 0.8 | |
| | Lin | N/A | N/A | |
| Linearity range for Leq | At reference range, Step 5 dB at 4 kHz | Pass | 0.3 | |
| | Reference SPL on all other ranges | Pass | 0.3 | |
| | 2 dB below upper limit of each range | Pass | 0.3 | |
| | 2 dB above lower limit of each range | Pass | 0.3 | |
| | | Pass | 0.3 | |
| Linearity range for SPL | At reference range, Step 5 dB at 4 kHz | Pass | 0.3 | |
| | A | Pass | 0.3 | |
| | C | Pass | 0.3 | |
| Frequency weightings | Lin | N/A | N/A | |
| | Single Burst Fast | Pass | 0.3 | |
| | Single Burst Slow | Pass | 0.3 | |
| Peak response | Single 100µs rectangular pulse | Pass | 0.3 | |
| R.M.S. accuracy | Crest factor of 3 | Pass | 0.3 | |
| Time weighting I | Single burst 5 ms at 2000 Hz | N/A | N/A | |
| | Repeated at frequency of 100 Hz | N/A | N/A | |
| Time averaging | 1 ms burst duty factor 1/10 ³ at 4kHz | Pass | 0.3 | |
| | 1 ms burst duty factor 1/10 ⁴ at 4kHz | Pass | 0.3 | |
| Pulse range | Single burst 10 ms at 4 kHz | Pass | 0.4 | |
| Sound exposure level | Single burst 10 ms at 4 kHz | Pass | 0.4 | |
| Overload indication | SPL | Pass | 0.3 | |
| | Leq | Pass | 0.4 | |

2, Acoustic tests

The complete sound level meter was calibrated on the reference range using a B&K 4226 acoustic calibrator with 1000Hz and SPL 94 dB. The sensitivity of the sound level meter was adjusted. The test result at 125 Hz and 8000 Hz are given in below with test status and the estimated uncertainties.

| Test: | Subtest | Status | Expanded Uncertainty (dB) | Coverage Factor |
|-------------------|------------------------|--------|---------------------------|-----------------|
| Acoustic response | Weighting A at 125 Hz | Pass | 0.3 | |
| | Weighting A at 8000 Hz | Pass | 0.5 | |

3, Response to associated sound calibrator

N/A

The expanded uncertainties have been calculated in accordance with the ISO Publication "Guide to the expression of uncertainty in measurement", and gives an interval estimated to have a level of confidence of 95%. A coverage factor of 2 is assumed unless explicitly stated.

- End -

Calibrated by:
Date: 13-Mar-2015

Checked by:
Date: 13-Mar-2015

The standard(s) and equipment used in the calibration are traceable to national or international recognised standards and are calibrated on a schedule to maintain the required accuracy level.

Test Data for Sound Level Meter

Page 1 of 5

Sound level meter type: SC-20e Serial No. T217501 Date 13-Mar-2015
Microphone type: C-130 Serial No. 12624
Report: 15CA0312 03

SELF GENERATED NOISE TEST

The noise test is performed in the most sensitive range of the SLM with the microphone replaced by an equivalent impedance.

Noise level in A weighting 17.3 dB
Noise level in C weighting 21.6 dB

LINEARITY TEST

The linearity is tested relative to the reference sound pressure level using a continuous sinusoidal signal of frequency 4 kHz. The measurement is made on the reference range for indications at 5 dB intervals starting from the 94 dB reference sound pressure level. And until within 5 dB of the upper and lower limits of the reference range, the measurements shall be made at 1 dB intervals.(SLM set to LEQ/SPL)

| 12590.0 | 94.0 | 87.8 | 85.8 | 3.0 | 6.0 | -2.0 |

TIME WEIGHTING FAST TEST

Time weighting F is tested on the reference range with a single sinusoidal burst of duration 200 ms at a frequency 2000 Hz and an amplitude which produces an indication 4 dB below the upper limit of the primary indicator range when the signal is continuous. (Weight A, Maximum hold)

| Ref. level | Expected level | Actual level | Tolerance(dB) | | Deviation |
|------------|----------------|--------------|---------------|-----|-----------|
| | | | + | - | |
| dB | dB | dB | + | - | dB |
| 86.0 | 85.0 | 85.0 | 1.0 | 1.0 | 0.0 |

TIME WEIGHTING SLOW TEST

Time weighting S is tested on the reference range with a single sinusoidal burst of duration 500 ms at a frequency 2000 Hz and an amplitude which produces an indication 4 dB below the upper limit of the primary indicator range when the signal is continuous. (Weight A, Maximum hold)

| Ref. level | Expected level | Actual level | Tolerance(dB) | | Deviation |
|------------|----------------|--------------|---------------|-----|-----------|
| | | | + | - | |
| dB | dB | dB | + | - | dB |
| 86.0 | 81.9 | 81.9 | 1.0 | 1.0 | 0.0 |

PEAK RESPONSE TEST

The onset time of the peak detector is tested on the reference range by comparing the response to a 100 us rectangular test pulse with the response to a 10 ms reference pulse of the same amplitude. The amplitude of the 10 ms reference pulse is such as to produce an indication 1 dB below the upper limit of the primary indicator range.

Positive polarities: (Weighting C, set the generator signal to single, Lcpmax)

| Ref. level | Response to 10 ms | Response to 100 us | Tolerance | | Deviation |
|------------|-------------------|--------------------|-----------|------|-----------|
| | | | +/- dB | dB | |
| dB | dB | dB | +/- dB | dB | dB |
| 89.0 | 89.0 | 88.5 | 2.0 | -0.5 | -0.5 |

Negative polarities:

| Ref. level | Response to 10 ms | Response to 100 us | Tolerance | | Deviation |
|------------|-------------------|--------------------|-----------|------|-----------|
| | | | +/- dB | dB | |
| dB | dB | dB | +/- dB | dB | dB |
| 89.0 | 89.0 | 88.5 | 2.0 | -0.5 | -0.5 |

RMS ACCURACY TEST

The RMS detector accuracy is tested on the reference range for a crest factor of 3.

Test frequency: 2000 Hz
Amplitude: 2 dB below the upper limit of the primary indicator range.
Burst repetition frequency: 40 Hz
Tone burst signal: 11 cycles of a sine wave of frequency 2000 Hz. (Set to INT)

| | Ref. Level | Expected level | Tone burst signal | Tolerance | Deviation |
|---------------|------------|----------------|-------------------|-----------|-----------|
| Time wighting | dB | dB | indication(dB) | +/- dB | dB |
| Slow | 88.0+6.6 | 88.0 | 88.0 | 0.5 | 0.0 |

Test Data for Sound Level Meter

Page 4 of 5

Sound level meter type: SC-20e Serial No. T217501 Date 13-Mar-2015
Microphone type: C-130 Serial No. 12624
Report: 15CA0312 03

TIME AVERAGING TEST

This test compares the SLM reading for continuous sine signals with readings obtained from a sine tone burst sequence having the same RMS level. The test level is 30 dB below the upper limit of the linearity range and repeated for Type 1 SLM with 40 dB below the upper limit of the linearity.

Frequency of tone burst: 4000 Hz
Duration of tone burst: 1 ms

| Repetition Time | Level of tone burst | Expected Leq | Actual Leq | Tolerance | Deviation | Remarks |
|-----------------|---------------------|--------------|------------|-----------|-----------|--------------|
| msec | dB | dB | dB | +/- dB | dB | |
| 1000 | 100.0 | 100.0 | 99.9 | 1.0 | -0.1 | 60s integ. |
| 10000 | 90.0 | 90.0 | 89.9 | 1.0 | -0.1 | 6min. integ. |

PULSE RANGE AND SOUND EXPOSURE LEVEL TEST

The test tone burst signal is superimposed on a baseline signal corresponding to the lower limit of reference range

Test frequency: 4000 Hz
Integration time: 10 sec

The integrating sound level meter set to Leq:

| Duration | Rms level of tone burst (dB) | Expected | Actual | Tolerance | Deviation |
|----------|------------------------------|----------|--------|-----------|-----------|
| msec | dB | dB | dB | +/- dB | dB |
| 10 | 88.0 | 58.0 | 58.0 | 1.7 | 0.0 |

The integrating sound level meter set to SEL:

| Duration | Rms level of tone burst (dB) | Expected | Actual | Tolerance | Deviation |
|----------|------------------------------|----------|--------|-----------|-----------|
| msec | dB | dB | dB | +/- dB | dB |
| 10.0 | 88.0 | 68.0 | 68.0 | 1.7 | 0.0 |

OVERLOAD INDICATION TEST

For SLM capable of operating in a non-integrating mode.

Test frequency: 2000 Hz
Amplitude: 2 dB below the upper limit of the primary indicator range.
Burst repetition frequency: 40 Hz
Tone burst signal: 11 cycles of a sine wave of frequency 2000 Hz.

| Level at overload (dB) | Level reduced by | Further reduced | Difference | Tolerance | Deviation |
|------------------------|------------------|-----------------|------------|-----------|-----------|
| dB | dB | dB | dB | dB | dB |
| 132.3 | 131.3 | 128.3 | 3.0 | 1.0 | 0.0 |

For integrating SLM, with the instrument indicating Leq.

For integrating SLM, with the instrument indicating Leq and set to the reference range. The test signal as follow
The test tone burst signal is superimposed on a baseline signal corresponding to the lower limit of reference range

Test frequency: 4000 Hz
Integration time: 10 sec
Single burst duration: 1 msec

| Rms level at overload (dB) | Level reduced by | Expected level | Actual level | Tolerance | Deviation |
|----------------------------|------------------|----------------|--------------|-----------|-----------|
| dB | dB | dB | dB | dB | dB |
| | 1 dB | dB | dB | dB | dB |

ACOUSTIC TEST

The acoustic test of the complete SLM is tested at the frequency 125 Hz and 8000 Hz using a B&K type 4226 Multifunction Acoustic Calibrator. The test is performed in A weighting.

| Frequency Hz | Expected level dB | Actual level Measured (dB) | Tolerance (dB) | | Deviation dB |
|-----------------|----------------------|-------------------------------|----------------|-----|-----------------|
| | | | + | - | |
| 1000 | 94.0 | 94.0 | 0.0 | 0.0 | 0.0 |

Ambient conditions

Temperature: 22 ± 1 °C
Relative humidity: 50 ± 10 %
Air pressure: 1010 ± 5 hPa

Test specifications

- 1, The Sound Calibrator has been calibrated in accordance with the requirements as specified in IEC 60942 1997 Annex B and the lab calibration procedure SMTP004-CA-156.
- 2, The calibrator was tested with its axis vertical facing downwards at the specific frequency using insert voltage technique.
- 3, The results are rounded to the nearest 0.01 dB and 0.1 Hz and have not been corrected for variations from a reference pressure of 1013.25 hectoPascals as the maker's information indicates that the instrument is insensitive to pressure changes.

Test results

This is to certify that the sound calibrator conforms to the requirements of annex B of IEC 60942: 1997 for the conditions under which the test was performed. This does not imply that the sound calibrator meets IEC 60942 under any other conditions.

Details of the performed measurements are presented on page 2 of this certificate.

Approved Signatory:

Huang Jian Min/Feng Jun Qi

Date: 05-Dec-2015

Company Chop:

Comments: The results reported in this certificate refer to the condition of the instrument on the date of calibration and carry no implication regarding the long-term stability of the instrument.

| intercept (b) = -0.00041 | | | intercept (b) = -0.00026 | | |
| coefficient (r) = 0.99991 | | | coefficient (r) = 0.99991 | | |
| y axis = SQRT[H2O(Pa/760) (298/Ta)] | | | y axis = SQRT[H2O(Ta/Pa)] | | |

CALCULATIONS

Vstd = Diff. Vol [(Pa-Diff. Hg)/760] (298/Ta)
 Qstd = Vstd/Time

Va = Diff Vol [(Pa-Diff Hg)/Pa]
 Qa = Va/Time

For subsequent flow rate calculations:

Qstd = 1/m{ [SQRT(H2O(Pa/760) (298/Ta))] - b}
 Qa = 1/m{ [SQRT H2O(Ta/Pa)] - b}

Complaint Log

Environmental Complaints Log

| Complaint Log No. | Date of Complaint | Received From and Received By | Location of Complainant | Nature of Complaint | Outcome | Status |
|-------------------|-------------------|---------------------------------------|---|---|--|--------|
| 140813 | 13 Aug 2014 | Resident complained via hotline by RE | The slope opposite to Tin Wan House, Shun Tin Estate, Kowloon | Noise was emanated from the construction site at the slope opposite to Tin Wan House, Shun Tin Estate, Kowloon at around 1620 hrs on 13 Aug 2014 and requested follow up action by relevant department. | <ol style="list-style-type: none">1) RSS notified ET on 15 Aug 20142) ET confirmed with site staff the major noise generating construction activities undertaken at works area at the slope opposite to Tin Wan House including slope works3) After reviewing the noise monitoring data at monitoring stations (NM1 - Tin Wan House and NM2 - Ning Po No.2 College), no limit level exceedances were recorded during routine noise monitoring event on 14 Aug 2014. As similar construction works activities conducted on 13 Aug 2014 was continued across the above monitoring period, the noise emanated from the construction activities under Contract CV/2012/07 was considered to comply with the statutory requirement.4) In addition, weekly environmental site inspection was conducted on 12 Aug 2014 at around 10:00. According to the inspection record, no particular observation regarding noise impact was recorded and the mitigation measures including erection of temporary noise barrier was observed in place. | Closed |
