# 1 ENVIRONMENTAL SITE AUDIT

## 1.1 BACKGROUND

The construction works of *Renewable Energy Supply on Town Island* (the Project) commenced in March 2011.

To fulfill Condition 2.2 of the Environmental Permit (EP-397/2010) and environmental audit requirements stated in Section 5.7.1 of the approved Project Profile (PP) submitted for direct application of an Environmental Permit under EIA Ordinance (EIAO) (PP-413/2010), monthly environmental site audits should be undertaken to ensure that the mitigation measures recommended in PP are properly implemented.

This is the eighteenth *Monthly Environmental Site Audit Report* presenting the key findings and observations of the site audit conducted on 11 September 2012.

## 1.2 SITE AUDIT FINDINGS AND OBSERVATIONS

The eighteenth monthly environmental site audit was conducted on 11 September 2012. The construction works undertaken during the site audit included superstructure works and installation of photovoltaic panels at both Site 1 and Site 2. All the temporary worksites between Site 1 and Site 2 for cabling works have been reinstated. Two observations have been recorded during the site audit and are described below:

- Chemical drums without drip tray was observed at Site 1 (*Photo 1*). The Contractor was asked to provide drip trays for the chemical drums.

The remedial actions for the environmental deficiencies which were recorded during the previous reporting period have been taken and rectified before the site inspection:

- Stagnant water inside the drip tray under the generator at Site 1 has been removed;
- Construction waste between Site 1 and Site 2 has been removed; and
- General refuse was properly stored at Site 2.

The environmental site audit checklist is appended in *Annex A*.

Photos of the site audit are given in *Annex B*.
