EXECUTIVE SUMMARY

This is the Environmental Monitoring and Audit (EM&A) Monthly Report - Dec 2007 for Contract No. CV/2004/01, Work Order No. N1/113/04 – Construction of Peng Chau Helipad. This report presents the environmental monitoring findings and information recorded during the period 1st to 31st Dec 2007.

Construction Activities for the Reported Period

During this reporting period, the principal work activities at Peng Chau Helipad included:

- Concreting of the EVA Road
- · Installation of parapet rail
- Road marking

Noise Monitoring

Monitoring of construction noise was carried out at the monitoring station M1 on 4 occasions. There was no exceedance reported during the reported period.

Waste Management

No inert C&D material was disposed nor non-inert C&D material was disposed of at Peng Chau Outlying Island Transfer Facilities. No waste was transported offsite in this reported period.

Complaints, Notifications of Summons and Successful Prosecutions

No complaint, notification of prosecutions or summons was received in this reporting period.

Site Inspections and Audit

4 site inspections were conducted by the Environmental Team (ET) in this reported period. Major observations by the ET, actions by the Contractor and outcome are summarized in the following table.

Item	Date	Observations	Action taken by Contractor	Outcome
Note	Over the month	The silt curtains were opened. (Sea wall has been finished and no marine work was observed.)	-	-
1	5-Dec	Stockpiles of dusty material were found on site and near public road.	Cover the stockpile with impervious sheeting to prevent air emission	No action taken as observed on 12 Dec
2	5-Dec	Dusty materials were found around the gate and public road and there is no protection on the drainage openings at the site gate.	Provided hard cover over the drainage opening at the site gate and implement regular water spraying and road clean-up to avoid dusty materials escaping onto the public road or muddy water running into drainage	
3	5-Dec	Site portion next to the road was still exposed and there had not any covering. The exposed ground should be covered with hard paving to prevent air emission.	Provide hydroseeding or cover with temporary sheeting as appropriate	No action taken as observed on 12 Dec
4	5-Dec	No hoarding can be removed prior to the major stabilization of the exposed ground.	Re-erect site hoarding along the exposed ground portion	No action taken as observed on 12 Dec
5	12-Dec	No hoarding can be removed prior to the major stabilization of the exposed ground.	Re-erect site hoarding along the exposed ground portion	No action taken as observed on 20 Dec
6	12-Dec	Stockpiles of dusty material were found on site and near public road.

1 INTRODUCTION

1.1 SCOPE OF THE REPORT

Lam Laboratories Limited (LAM) has been appointed to work as the Environmental Team (ET) to implement the Environmental Monitoring and Audit (EM&A) programme for CEDD Contract No. CV/2004/01, Work Order No. N1/113/04 – Construction of Peng Chau Helipad.

This report presents the environmental monitoring and auditing work carried out in accordance to the "Environmental Mitigation, Monitoring and Audit Requirements" under Particular Specification Section 29 during the period 1st to 31st Dec 2007.

1.2 STRUCTURE OF THE REPORT

Section 1 *Introduction* – details the scope and structure of the report.

Section 2 Project Background – summarizes background and scope of the project, site description, project organization and contact details of key personnel during the reporting period.

Section 3 *Implementation Status* – summarizes the status of valid Environmental Permits / Licenses during the reporting period.

Section 4 *Monitoring Requirements* – summarizes all monitoring parameters, monitoring methodology and equipment, monitoring locations, monitoring frequency, criteria and respective event and action plan and monitoring programmes.

Section 5 Monitoring Results – summarizes the monitoring results obtained in the reporting period.

Section 6 Compliance Audit – summarizes the auditing of monitoring results, all exceedances environmental parameters.

Section 7 Site Inspection – summarizes the findings of weekly site inspections undertaken within the reporting period, with a review of any relevant follow-up actions within the reporting period.

2 PROJECT BACKGROUND

2.1 SCOPE OF THE PROJECT AND SITE DESCRIPTION

The works mainly comprise of construction of a helipad and a vehicular access for serving the helipad at Peng Chau and the associated installations, lighting and drainage. The construction period is around 9 months for the entire works.

The site layout plan is shown in *Figure 2.1*.

2.2 PROJECT ORGANIZATION AND CONTACT PERSONNEL

Civil Engineering Office of Civil Engineering and Development Department is the overall project controller. For the construction phase of CV/2004/01, Project Engineer, Independent Environmental Checker, Contractor, Environmental Team are appointed to manage and control environmental issues.

Key personnel and contact particulars are summarized in *Table 2.2*:

2.3 CONSTRUCTION PROGRAMME AND WORKS

Construction works carried out at Peng Chau Helipad during this reporting period were:

- · Concreting of the EVA Road
- Installation of parapet rail
- Road marking

CEDD Contract No.: CV/2004/01 Work Order No. N1/113/04 Construction of Peng Chau Helipad

3 IMPLEMENTATION REQUIREMENTS

3.1 STATUS OF REGULATORY COMPLIANCE

A summary of the current status on licences and/or permits on environmental protection pertinent to the Project is shown in *Table 3.1*.

Table 3.1 Cumulative Summary of Valid Licences and Permits

Permits and/or Licences	Reference No.	Issued Date	Valid Period	Status

CEDD Contract No.: CV/2004/01 Work Order No. N1/113/04 Construction of Peng Chau Helipad

4 MONITORING REQUIREMENTS

Location of environmental monitoring station is referred in Figure 4.1.

4.1 NOISE MONITORING

The project has 1 noise monitoring station, namely M1. Details of the noise monitoring station are summarized in *Table 4.1*.

Table 4.1 Noise Monitoring Station

Station	HK Metric Grid (Easting / Northing)	Description
M1	821 682.865E / 816 689.353N	Ground Level outside Block D of Sea Crest Villa

Monitoring Methodology

Monitoring was carried out in accordance to procedures recommended in the contractual EM&A requirement Manual for the monitoring of construction noise. Measurements shall be recorded to the nearest 0.1dB. Weather conditions, including a measurement of wind speed, should be recorded for the measurement. Where the steady wind speed exceeds 5 m/s, or gusts are above 10 m/s, or in the presence of fog or rain, measurements should be treated as invalid, and repeated in more appropriate conditions.

This noise meter was programmed to measure A-weighted equivalent continuous sound pressure level at 30-minute intervals. Acoustic information measured by the noise meter over 30-minute period were recorded. Additional supplementary acoustical data in terms of L_{10} and L_{90} were also recorded for reference and auditing.

Lam Laboratories Limited

CEDD Contract No.: CV/2004/01 Work Order No. N1/113/04 Construction of Peng Chau Helipad

Monitoring Equipment and Calibration Details

The noise levels were determined using ONO SOKKI sound level meter model LA-5110. The meter complies with the International Electrotechnical Commission Publication (IEC) 651:1979 (Type 1) and 804:1985 (Type 1) specifications as referred to in the Technical Memorandum issued under the Noise Control Ordinance (NCO).

ONO SOKKI sound level calibrator model SC-2110 was used for the on-site calibration of the meter. This calibrator complies with the IEC Publication 942 (1988) Class1 and ANSI S1.40 – 1984. Noise measurements were only accepted to be valid if the calibration levels from before and after the measurement agree to within 1.0dB. The sound level meter and calibrator are calibrated annually by a HOKLAS laboratory.

Wind speeds were measured by a portable digital anemometer, Dwyer PWM1 with direction being determined with a compass.

Calibration certificates are respectively presented in **Appendix A**.

4.2

MONITORING PARAMETERS AND FREQUENCY

Noise monitoring programme has been scheduled according to the requirements stipulated in the EM&A Manual produced for the Project summarized in *Table 4.2*.

Table 4.2 Environmental Monitoring Parameters and Frequencies

Station(s)	Parameter	Frequency
M1 Note 1	L _{Aeq} (30 min), L ₉₀ & L ₁₀	Once per week between 0700-1900 hours on normal weekdays
L _{Aeq} (5 min), L ₉₀ & L ₁₀ time outside 0700-1900		3 time slot whenever works is conducted during the time outside 0700-1900 hours of normal weekdays or anytime on any public holiday or Sunday

Note 1: Façade measurement

4.3 NOISE CRITERIA

Noise criteria were determined during the baseline monitoring prior to the commencement of the construction of the project for the purpose of impact monitoring. Action and limit levels for noise impact monitoring upon the commencement of work are summarized in *Table 4.3*.

Table 4.3 Action and Limit Levels for Noise

Time Period	Action Level	Limit Level
07:00 – 19:00 hours on normal weekdays	When one documented complaint is received from	75 dB(A) ^{Note 1}
0700 – 2300 hours on public holidays including Sundays and 1900 – 2300 hours on all days	any one of the sensitive receivers	70 dB(A) ^{Note 2}
2300 – 0700 hours on all days		55 dB(A) ^{Note 2}

Note:

- No school is presence in the vicinity of M1 and thus no examination noise level is applied.
- 2. Area Sensitivity Rating of C is selected due to the presence of non-construction noise due to traffic recorded during the baseline measurements.

Should non-compliance of the noise quality criteria occurs, Event and Action Plans detailed in *Appendix B* shall be followed accordingly.

9 CONCLUSION

The EM&A programme was carried out in accordance with the EM&A Manual requirements, minor alterations to the programme proposed in the previous EM&A Report were made in response to changing circumstances. The proposed monitoring schedule for the coming month can be referred in *Appendix D*.

No exceedance was reported in routine environmental monitoring due to the construction operation of CV/2004/01. Such results indicate that the construction operation of CV/2004/01 was performed acceptable against the noise limits. However, the Contractor was reminded to ensure prompt response towards the environmental observations identified during the weekly inspection.

The scheduled construction activities and the recommended mitigation measures for the coming month are listed in *Table 9*.

Item Tested

Description : Sound Level Calibrator (EL 078)

Manufacturer: ONO SOKKI

Model: SC-2110

Serial No.

: 00393

Test Conditions

Date of Test: 25-May-07

Supply Voltage : -

Ambient Temperature:

(23 ± 3)°C

Relative Humidity: (50 ± 25) %

Test Specifications

Calibration check.

Calibration procedure:

F21, Z02.

Test Results

All results were within the IEC 942 Class 2 specification.

The results are shown in the attached page(s).

Main Test equipment used:

Equipment No.	<u>Description</u>	Cert. No.	<u>Due Date</u>	Traceable to
S014	Spectrum Analyzer	62914	7-Jul-07	NIM-PRC & SCL-HKSAR
S024	Sound Level Calibrator	62691	19-Jul-07	NIM-PRC & SCL-HKSAR
S041	Universal Counter	63839	22-Aug-07	SCL-HKSAR

The values given in this Calibration Certificate only relate to the values measured at the time of the test and any uncertainties quoted will not include allowance for the equipment long term drift, variations with environmental changes, vibration and shock during transportation, overloading, mis-handling, or the capability of any other laboratory to repeat the measurement. Hong Kong Calibration Ltd. shall not be liable for any loss or damage resulting from the use of the equipment.

The test equipment used for calibration are traceable to International System of Units (SI). The test results apply to the above Unit-Under-Test only

Event and Action Plan

APPENDIX 5.1 – Event / Action Plan for Construction Noise

Event	ACTION							
	ET Leader	IC (E)	ER	Contractor				
Action Level	Notify IC(E) and Contractor Carry out investigation Report the results of investigation to the IC(E) and Contractor Discuss with the Contractor and formulate remedial measures Increase monitoring frequency to check mitigation effectiveness	Review the analysed results submitted by the ET Review the proposed remedial measures by the Contractor and advise the ER accordingly Supervise the implementation of remedial measures	Confirm receipt of notification of failure in writing Notify Contractor Require Contractor to propose remedial measures for the analysed noise problem Ensure remedial measures are properly implemented	Submit noise mitigation proposal to IC(E) Implement noise mitigation proposals				
Limit Level	 Notify IC(E), ER, EPD and Contractor Identify source Repeat measurement to confirm findings Increase monitoring frequency Carry out analysis of Contractor's working procedures to determine possible mitigation to be implemented Inform IE(E), ER and EPD the causes & actions taken for the exceedances Assess effectiveness of Contractor's remedial actions and keep IC(E), EPD and ER informed of the results If exceedance stops, cease additional monitoring 	Discuss amongst ER, ET, and Contractor on the potential remedial actions Review Contractor's remedial actions whenever necessary to assure their the ER accordingly Supervise the implementation of remedial measures	Confirm receipt of notification of failure in writing Notify Contractor Require Contractor to propose remedial measures for the analysed noise problem Ensure remedial measures are properly implemented If exceedance continues, consider what portion of the work is responsible and instruct the Contractor to stop that portion of work until the exceedance is abated	Take immediate action to avoid further exceedance Submit proposal for remedial actions to IC(E) within 3 working days of notification Implement the agreed proposals Resubmit proposals if problem still not under control Stop the relevant portion of works as determined by the ER until the exceedance is abated
