Re: Application of WPCO Licence for Recharge Wells at KSL KDB 200
Construction Site

KCRC Capital Projects Division
Document ID Barcode No.

0000169062

We refer to EPD's correspondence dated 25 September 2007 on the captioned subject.

Groundwater recharge at KDB200 has been on-going since August 2006, under WPCO Licence RE/0042/217/1, in accordance with the Groundwater Working Plan (GWWP) approved in Aug 2006.

In May 2007, a revised GWWP was submitted to EPD and was subsequently approved and deposited on the EIAO Register on 20 June 2007. In the revised plan, more wells were planned for the groundwater recharging system.

The implementation of the revised GWWP has since been reconsidered. There is now no immediate plan to adopt the GWWP (May 2007). Recharging of groundwater will remain at discharge point "R" only, and follow the GWWP approved in Aug 2006.

If you have any queries, please do not hesitate to contact our Project Environmental Manager, Mr MK Cheung at 2737-9398.

Yours faithfully,

(Greg Jacques)
Project Director

RECEIVED
25 SEP 2007

Dear Mr. Fung,

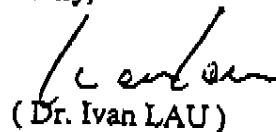

**Water Pollution Control Ordinance (WPCO)
Victoria Harbour (Phase II) Water Control Zone
Application of WPCO Licence for Recharge Wells at KSL KDB200 Construction Site.**

I understand that KCRC has submitted a revised Groundwater Monitoring Working Plan (WP) to Metro Assessment Group of this Department and the revised WP has been deposited on the ELAO (Environmental Impact Assessment Ordinance) Register in accordance with the Environmental Permit Condition 3.9 under ELAO. It is noted from the revised WP that there would be additional recharge wells for the contaminated groundwater at the subject Kowloon Southern Link (KSL) KDB200 construction site.

2. Being the Authority, I granted a WPCO licence (Licence No.: RE/0042/217/1) to your contractor, Link200JV, for the discharge of contaminated groundwater into a SINGLE recharge well "R" on 22 August 2006. As a friendly reminder, if any person is going to operate any additional recharge wells, a new licence or a variation of the existing licence (Licence No.: RE/0042/217/1) must be secured beforehand under WPCO.

3. Similar to the previous WPCO licence application, it would take time to complete the statutory process including fulfilling the requirements of public notification. I should be grateful if you would remind the relevant party to submit the application with proper information to us as early as possible well before the revised WP is implemented. To facilitate the progress of KSL construction works, please do not hesitate to contact me if you have any enquiries.

Yours faithfully,

(Dr. Ivan LAU)
Regional Office (East)

for Director of Environmental Protection

Dear Ivan,

**KCRC Kowloon Southern Link
Contract No. KDB200
West Kowloon Station and Tunnels, Jordan Road to East Tsim Sha Tsui Station
Water Pollution Control Ordinance (WPCO)
Victoria Harbour (Phase II) Water Control Zone
Application of WPCO Licence for Recharge Wells at KSL KDB 200
Construction Site**

Thank you for your letter dated 25 September 2007.

Our Contractor, Link200 JV, had confirmed that the groundwater recharging process currently implemented on site follows the Groundwater Monitoring Working Plan (WP) that has been deposited on the EIAO Register, indicated in EPD's (Metro Assessment Group) letter dated 7 August 2006. Although a revised WP indicating additional recharge wells was deposited on the EIAO Register on 20 June 2007, Link200 JV later confirmed that they would not implement the recharging process under this revised WP. Therefore, one recharge well (R) remains for the dewatering process and a new WPCO licence or a variation of the existing licence (Licence No.: RE/0042/217/1) is not necessary. Moreover, the former WP (ref: EPD's letter dated 7 August 2006) is included in the updated EM&A Manual, which is being submitted to EPD (Metro Assessment Group).
