Annex D

Implementation Programme of Mitigation Measures

## ANNEX D IMPLEMENTATION SCHEDULE

| EIA<br>Reference | EM&A<br>Manual<br>Reference | Environmental Protection Measures  | Location /<br>Timing                      | Implementation<br>Agent | Relevant<br>Standard or<br>Requirement                                     | In<br>D | olementation<br>Schedule<br>C O | Maintenance<br>Agency | Implementation<br>Status |
|------------------|-----------------------------|--|---|-------------------------|--|---------|---------------------------------|-----------------------|--------------------------|
| Water Qua        | lity                        |  |   |                         | •  |         |                                 |                       |                          |
| 6.7              | 6.8.1                       | There should be no access to the shore or<br>working from land within the Marine<br>Park. No marine anchors shall be used<br>within the Marine Park. | Marine Park /<br>Pipeline<br>Dredging     | Contractor              | TMEIA  |         | Y                               | N/A                   | Completed                |
| 6.7              | 6.8.1                       | No hydraulic dredging within Marine<br>Park.   | Marine Park /<br>Pipeline<br>Dredging     | Contractor              | TMEIA  |         | Y                               | N/A                   | Completed                |
| 6.7              | 6.8.1                       | Dredging for pipeline trench should be<br>timed to coincide with maintenance<br>dredging for Sha Chau AFRF marine<br>access channel if relevant.     | Sha Chau ARFR<br>Marine access<br>channel | Airport<br>Authority    | TMEIA  |         | Y                               | N/A                   | Completed                |
| 6.4              |                             | The work rate for dredging should not exceed 4,000 m <sup>3</sup> /hr for the TSHD and 7,000 m <sup>3</sup> /day for the grab dredger.               | Marine Park /<br>Pipeline<br>Dredging     | Contractor              | TMEIA  |         | Y                               | N/A                   | Completed                |
| 6.7              | 6.8.1                       | Standard good dredging practice<br>measures shall be written in the<br>dredging contract.  | Marine Park /<br>Pipeline<br>Dredging     | Franchisee              | TMEIA  |         | Y                               | N/A                   | Completed                |
| 6.7              | 6.8.1                       | Use of Lean Material Overboard (LMOB) systems shall be prohibited. No mud overflow is to be permitted for dredging using TSHD.                       | Dredged areas/<br>Pipeline<br>Dredging    | Contractor              | TMEIA Marine<br>Fill Committee<br>Guidelines.<br>DASO permit<br>conditions |         | Y                               | N/A                   | Not applicable           |
| 6.7              | 6.8.1                       | Mechanical grabs shall be designed and<br>maintained to avoid spillage and should<br>seal tightly while being lifted.                                | Dredged areas/<br>Pipeline<br>Dredging    | Contractor              | TMEIA Marine<br>Fill Committee<br>Guidelines.<br>DASO permit<br>conditions |         | Y                               | N/A                   | Completed                |
| 6.7              | 6.8.1                       | Barges and hopper dredgers shall have<br>tight fittings seals to their bottom<br>openings to prevent leakage of material.                            | Dredged areas/<br>Pipeline<br>Dredging    | Contractor              | TMEIA Marine<br>Fill Committee<br>Guidelines.<br>DASO permit<br>conditions |         | Y                               | N/A                   | Completed                |

| EIA<br>Reference | EM&A<br>Manual<br>Reference | Environmental Protection Measures  | Location /<br>Timing                   | Implementation<br>Agent | Relevant<br>Standard or<br>Requirement                                     | In<br>D | nplementation<br>Schedule<br>C O | Maintenance<br>Agency | Implementation<br>Status |
|------------------|-----------------------------|--|--|-------------------------|--|---------|----------------------------------|-----------------------|--------------------------|
| 6.7              | 6.8.1                       | Any pipe leakages shall be repaired<br>quickly. Plant should not be operated<br>with leaking pipes   | Dredged areas/<br>Pipeline<br>Dredging | Contractor              | TMEIA Marine<br>Fill Committee<br>Guidelines.<br>DASO permit<br>conditions |         | Y                                | N/A                   | Not applicable           |
| 6.7              | 6.8.1                       | Loading of barges and hoppers shall be<br>controlled to prevent splashing of<br>dredged material to the surrounding<br>water. Barges or hoppers shall not be<br>filled to a level which will cause<br>overflow of materials or pollution of<br>water during loading or transportation. | Dredged areas/<br>Pipeline<br>Dredging | Contractor              | TMEIA Marine<br>Fill Committee<br>Guidelines.<br>DASO permit<br>conditions |         | Y                                | N/A                   | Completed                |
| 6.7              | 6.8.1                       | Excess material shall be cleaned from the decks and exposed fittings of barges and hopper dredgers before the vessel is moved.   | Dredged areas/<br>Pipeline<br>Dredging | Contractor              | TMEIA Marine<br>Fill Committee<br>Guidelines.<br>DASO permit<br>conditions |         | Y                                | N/A                   | Completed                |
| 6.7              | 6.8.1                       | Adequate freeboard shall be maintained<br>on barges to reduce the likelihood of<br>decks being washed by wave action.  | Dredged areas/<br>Pipeline<br>Dredging | Contractor              | TMEIA Marine<br>Fill Committee<br>Guidelines.<br>DASO permit<br>conditions |         | Y                                | N/A                   | Completed                |
| 6.7              | 6.8.1                       | All vessels shall be sized such that<br>adequate clearance is maintained<br>between vessels and the sea bed at all<br>states of the tide to ensure that undue<br>turbidity is not generated by turbulence<br>from vessel movement or propeller<br>wash.                                | Dredged areas/<br>Pipeline<br>Dredging | Contractor              | TMEIA Marine<br>Fill Committee<br>Guidelines.<br>DASO permit<br>conditions |         | Y                                | N/A                   | Completed                |
| 6.7              | 6.8.1                       | The works shall not cause foam, oil,<br>grease, letter or other objectionable<br>matter to be present in the water within<br>and adjacent to the works site.   | Dredged areas/<br>Pipeline<br>Dredging | Contractor              | TMEIA Marine<br>Fill Committee<br>Guidelines.<br>DASO permit<br>conditions |         | Y                                | N/A                   | Completed                |
