EXECUTIVE SUMMARY

ES.01. This is the **fifty-first (51st)** monthly Environmental Monitoring and Audit (EM&A) Report for the river improvement works at Upper Tai Po River under Drainage Services Department (DSD) Contract No. DC/2007/06 entitled "River Improvement Works in Upper Lam Tsuen River, She Shan River and Upper Tai Po River" (hereinafter "the Project"). This report concludes the impact monitoring results and findings for the activities undertaken during the period from **1st to 30th November 2012** (hereinafter "the Reporting Period").

ES.02. The Environmental Team (ET) is responsible for the EM&A works required in the EM&A manual. Site inspections were carried out on weekly basis to investigate and audit the equipment and work methodologies with respect to pollution control and environmental mitigation. The weekly inspection records and photos taken were kept.

ENVIRONMENTAL MONITORING AND AUDIT ACTIVITIES

ES.03. Environmental Team had carried out construction noise monitoring on weekly basis and no exceedance was found in the Reporting Period. The noise monitoring results collected in the Reporting Period are presented in ***Section 4***.

ES.04. In the Reporting Period, weekly ecological inspections were carried out on **5th, 12th, 19th and 26th November 2012**.

ES.05. Joint weekly site inspection by the ET, the Contractor, Independent Environmental Checker (IEC) and Engineer's Representative (ER) were undertaken on **7th, 14th, 21st and 27th November 2012**.

ES.06. There was a vibration monitoring carried out at Fan Sin Temple on 14th November 2012 and no exceedance was recorded.

ES.07. Environmental monitoring activities under the EM&A programme in the Reporting Period are summarized in the following table.

Issues	Environmental Monitoring Parameters / Inspection	Occurrences
Construction Noise	$L_{eq30min}$ Daytime	44
Inspection / Audit	Weekly Environmental inspection by the Contractor, ET, ER and IEC	4
Ecological	Ecological Impact Monitoring	0
	Weekly inspection by the Ecologist	4

BREACH OF ACTION AND LIMIT (A/L) LEVELS

ES.08. No noise complaint (which is an Action Level exceedance) was received in the Reporting Period. Also, no Limit Level exceedance of noise monitoring was recorded.

ENVIRONMENTAL COMPLAINT

ES.09. No written or verbal complaint in relation to environmental matters was recorded in the Reporting Period.

NOTIFICATION OF SUMMONS AND SUCCESSFUL PROSECUTION

ES.10. No environmental summons or successful prosecution was recorded in the Reporting Period.

REPORTING CHANGE

ES.11. No reporting change was made in the Reporting Period.

FUTURE KEY ISSUES

ES.12. During dry season, dust control measures to avoid fugitive dust in the construction site should be properly provided and maintained, as appropriate. In addition, water quality mitigation measures such as prevention of muddy water and other water quality pollutants via site surface water runoff into the local stream of Tai Po River should be fully implemented.

ES.13. On the other hand, construction noise will be another key environmental issue. Noise mitigation measures should be implemented in accordance with the EM&A Manual.

ES.14. The Contractor is reminded to provide environmental pollution control measures wherever necessary and keep a good environmental management for site practice.

TABLE OF CONTENTS

LIST OF TABLES

LIST OF APPENDICES

1.0 INTRODUCTION

PROJECT BACKGROUND

1.01 This is the **fifty-first (51st)** monthly Environmental Monitoring and Audit (EM&A) Report for the river improvement works at Upper Tai Po River under Drainage Services Department Contract No. DC/2007/06 entitled "River Improvement Works in Upper Lam Tsuen River, She Shan River and Upper Tai Po River".

1.02 Site layout plan of Upper Tai Po River is shown in ***Appendix A.*** Approximately 0.6km of Upper Tai Po River will be improved to enhance the hydraulic performance of the river. The location of the project site at Upper Tai Po River starts from Ta Tit Yan of Tai Mo Shan, flows from southeast to northeast alongside Wilson Trail, turning nort hward before joining the Lam Tsuen Riv er and then runs towards Tai Po Market. To the east of the river, t here are active and abandoned cultivated lands. Village settlements are mainly located on the west and northeast side of the river bank, where the San Uk Ka and L ai Chi Shan establishment also lie. The construction of the proposed improvement works for Upper Tai Po River has commenced on 15th September 2008 and anticipated to be co mpleted in Decem ber 2012. The improvement works co mprise of the following:

- Re-profiling and realignment of the channel;
- Inclusion of gabions and retaining wall for bank protection whilst providing a natural channel bed; and
- Re-provisioning of footbridges and footpaths along the channel.

1.03 Since 12th July 2012, Action United Environmental Services & Consulting (AUES) has been appointed by Chiu Hing Construction and Trans portation Company Limited (hereinafter "the Contractor") as the Environmental Team replacing Environmental Pioneers & Solutions Limited to implement the EM&A programme and prepare report.

1.04 This report presents the results of the e nvironmental monitoring conducted at Upper Tai Po River in **November 2012**. It includes weekly site inspections to verify the im plementation of the mitigation measures as r ecommended in Environm ental Permit EP-223/2005/A, EM&A M anual, the Particular Specifications of the Contract and the Contractor's Environmental Management Plan (EMP).

REPORT STRUCTURE

1.05 The Monthly Environmental Monitoring and Audit (EM&A) Report is structured into the following sections:-

Section 1	**Introduction**
Section 2	**Construction Progress and Submission**
Section 3	**EM&A Program Requirement for Upper Tai Po River**
Section 4	**Noise Monitoring Results**
Section 5	**Vibration Monitoring Results**
Section 6	**Ecology Monitoring Results**
Section 7	**Site Inspections**
Section 8	**Waste Management**
Section 9	**Environmental Complaint and Non-Compliance**
Section 10	**Implementation Status of Mitigation Measures**
Section 11	**Impact Forecast**
Section 12	**Conclusions and Recommendations**

2.0 CONSTRUCTION PROGRESS AND SUBMISSION

CONSTRUCTION PROGRESS

2.01 The proposed construction sequences are shown in the following:

- Site clearance and preparation works
- Construction of maintenance access which involves construction of retaining walls
- River channel construction and excavation, in volving excavation works, construction of retaining walls and gabion walls
- Construction of additional boulder trap and additional stilling basins with baffle blocks
- Provision of riverbed treatment
- Re-provisioning of footbridges
- Construction of footpaths
- Landscaping works

2.02 The major construction activities undertaken at Upper Tai Po River in the Reporting Period are listed below:-

- Formation of riverbed;
- Construction of dwarf walls;
- Construction of retaining walls;
- Construction of surface drains;
- Construction of footpath;
- Construction of inclined gabion walls;
- Erection of decking for Footbridge;
- Installation of Type II railings; and
- Laying of underground utilities.

2.03 The master and three month rolling construction programs are enclosed in ***Appendix B***.

SUMMARY OF ENVIRONMENTAL SUBMISSIONS

2.04 Summary of the relevant permits, licences, and/or notifications on environmental protection for this Contract in the Reporting Period is presented in ***Table 2-1***.

Table 2-1 Status of Environmental Licenses and Permits

Description	License / Permit No.	Date of Issue	Date of Expiry	Remarks
Environmental Permit	EP-223/2005	31 Aug 2005	N/A	Superseded by EP-223/2005/A
Amended Environmental Permit	EP-223/2005/A	18 Nov 2008	N/A	Issued
Construction Noise Permit	NA	N/A	N/A	N/A
Effluent Discharge License	3678	14 Mar 2008	31 Mar 2013	Issued
Registration as a Chemical Waste Producer	5213-724-C3251-03	19 Dec 2007	N/A	Issued
Billing Account for Disposal of Construction Waste	7006101	N/A	N/A	N/A

3.0 EM&A PROGRAM REQUIREMENT FOR UPPER TAI PO RIVER

3.01 The EM&A requirements set out in the Environmental Permit EP-223/2005/A (hereinafter 'the EP'), and the associated EM&A Manual, are presented in the following sub-sections.

MONITORING PARAMETERS

3.02 According to the EM&A Manual, the monitoring requirements under this Contract are listed in ***Table 3-1***.

Table 3-1 Summary of Monitoring Parameters

Environmental Aspect	Parameters
Construction Noise	• A-weighted equivalent continuous sound pressure level (30min) (hereinafter '$L_{eq(30min)}$' during the normal working hours; and • A-weighted equivalent continuous sound pressure level (15min) (hereinafter '$L_{eq(15min)}$' for construction work during the restricted hours.
*Ecology	Inspection and auditing the proper implementation of mitigation measures stipulated in EIA report and EM&A Manual

*Remarks: *Monitoring as carried out by the Ecologist appointed by the Contractor*

MONITORING LOCATIONS

3.03 Monitoring locations have been proposed in EM&A Manual. Graphic plot is shown in ***Appendix C*** and summarized in ***Table 3-2***.

Table 3-2 Designated Monitoring Locations of the EM&A Programme

Aspect	Location ID	Address
Construction Noise	UTP1	54B, Sheung Wun Yiu
	UTP2	Village House in Lai Chi Shan
	UTP3	Village House near Upper Tai Po River
	UTP4	Village House near Upper Tai Po River
	UTP5	Village House near Upper Tai Po River
	UTP6	Village House near Upper Tai Po River
	UTP7	Village House near Upper Tai Po River
	UTP8	Village House near Upper Tai Po River
	UTP9	49A, Pun Shan Chau
	UTP10	Village House near the proposed access road
	UTP11	49G, San Uk Ka
Ecology	As within and adjacent to Upper Tai Po River of construction works areas	

MONITORING FREQUENCY

3.04 The monitoring frequency and duration as specified in EM&A Manual are summarized below.

Construction Noise

Frequency: Once a week during 0700-1900 on normal weekdays for $L_{eq(30min)}$
If construction work is undertaken at restricted hour, the frequency of construction noise monitoring will comply with the requirements stipulated in the related Construction Noise Permit issued by EPD.

Duration: Throughout the construction period when major construction activities are undertaken

Ecology

Frequency: Weekly site inspection and bi-annual monitoring

Duration: Throughout the construction period when the major construction activities are undertaken

MONITORING EQUIPMENT

Noise Monitoring

3.05 Sound level meter in compliance with *International Electrotechnical Commission Publications 651: 1979 (Type 1) and 804: 1985 (Type 1)* specifications shall be used for noise monitoring. The sound level meter shall be checked with an acoustic calibrator. The wind speed shall be checked with a portable wind speed meter, which is capable to measure wind speed in m/s.

Table 3-3 Monitoring Equipment Used in EM&A Program

Equipment	Model
Construction Noise	
Integrating Sound Level Meter	Bruel & Kjaer Type 2238 or Rion NL-31
Calibrator	Bruel & Kjaer Type 4231
Portable Wind Speed Indicator	Testo Anemometer

MONITORING METHODOLOGY

Noise Monitoring

3.06 Noise measurements are taken in terms of the A-weighted equivalent sound pressure level (L_{eq}) measured in decibels (dB). Supplementary statistical results (L_{10} and L_{90}) are also obtained for reference.

3.07 Sound level meters as listed in ***Table 3-3*** comply with *International Electrotechnical Commission Publications 651: 1979 (Type 1) and 804: 1985 (Type 1)* specifications, as recommended in Technical Memorandum (TM) issued under the *Noise Control Ordinance (NCO)*.

3.08 During the monitoring, all noise measurements are performed with the meter set to FAST response and on the A-weighted equivalent continuous sound pressure level (L_{eq}). $L_{eq(30min)}$ in six consecutive $L_{eq(5min)}$ measurements is used as the monitoring parameter for the time period between 0700-1900 hours on weekdays. $L_{eq(15min)}$ in three consecutive $L_{eq(5min)}$ measurements is used as monitoring parameter for other time periods (e.g. during restricted hours), if necessary.

3.09 During the course of measurement, the sound level meter is mounted on a tripod with a height of 1.2m above ground and placed at the assessment point and oriented such that the microphone is pointed to the site with the microphone facing perpendicular to the line of sight. The windshield is fitted for all measurements. The assessment point is normally set as free-field situation for the measurement.

3.10 Prior to noise measurement, the accuracy of the sound level meter is checked by an acoustic calibrator which generates a known sound pressure level at a known frequency. The checking is performed before and after noise measurement.

DATA MANAGEMENT AND DATA QA/QC CONTROL

3.11 The impact monitoring data are handled by the ET's systematic data recording and management, which complies with in-house Quality Management System. Standard Field Data Sheets (FDS) are used in the impact monitoring program.

3.12 The monitoring data recorded in the noise meter are downloaded directly from the equipment at the end of each monitoring day. The downloaded monitoring data are input into a computerized database properly maintained by the ET.

OTHERS MONITORING IMPLEMENTATION FOR THE CONTRACT

Vibration

3.13 Vibration monitoring will be carried out when piling works take place in Upper Tai Po River.

DETERMINATION OF ACTION/LIMIT (A/L) LEVELS

3.14 The established performance criteria for construction noise, namely Action and Limit levels are used for the Project is listed in ***Table 3-4***.

Table 3-4 Action and Limit Levels for Construction Noise

Location	Time Period	Action Level	Limit Level
UTP1, UTP2, UTP3, UTP4, UTP5, UTP6, UTP7, UTP8, UTP9, UTP10, UTP11	Daytime 0700 – 1900 hrs on normal weekdays	When one documented complaint is received	75* dB(A)
	1900 – 2300 on all days and 0700 – 2300 on general holidays (including Sundays)		60/65/70 dB(A)**
	2300 – 0700 on all days		45/50/55 dB(A)**

Note: * *Reduces to 70dB(A) for schools and 65dB(A) during the school examination periods.*

** *To be selected based on the Area Sensitivity Rating of A/B/C, and the conditions of the applicable CNP(s) must be followed*

EQUIPMENT CALIBRATION

3.15 The sound level meter and calibrator are calibrated and certified by a laboratory accredited under HOKLAS or any other international accreditation scheme in yearly basis. Valid calibration certificates of the monitoring equipment used for the impact monitoring program in the Reporting Period are attached in ***Appendix D***.

METEOROLOGICAL INFORMATION

3.16 The meteorological information during the construction phase is obtained from Tai Po and Shatin Stations of the Hong Kong Observatory (HKO). The meteorological data during the impact monitoring days are summarized in ***Appendix G***.

4.0 NOISE MONITORING RESULTS

4.01 The monitoring schedule had been issued to relevant parties before each Reporting Period and presented in ***Appendix F***. The works undertaken during the Reporting Period are illustrated in ***Appendix B.*** The monitoring results are presented in the following sub-sections.

RESULT SUMMARY

4.02 In the Reporting Period, the noise monitoring results at the designated locations are presented in ***Tables 4-1 to 4-11*** and the graphical plot is shown in ***Appendix H***.

Table 4-1 Construction Noise Monitoring Results at UTP1

Date	Start Time	1st L_{eq5min}	2nd L_{eq5min}	3rd L_{eq5min}	4th L_{eq5min}	5th L_{eq5min}	6th L_{eq5min}	$L_{eq30min}$	Sound Level Meter ID

29-Nov-12	10:12	53.2	47.9	44.3	47.2	46.3	50.0	49	EQ065
Limit Level in dB(A)								**75**	

Remarks: *The monitoring is undertaken under façade situation. No façade correction is made according to acoustical principles and EPD guidelines.*

Table 4-11 Construction Noise Monitoring Results at UTP11

Date	Start Time	1st L_{eq5min}	2nd L_{eq5min}	3rd L_{eq5min}	4th L_{eq5min}	5th L_{eq5min}	6th L_{eq5min}	$L_{eq30min}$	Corrected $L_{eq30min}$	Sound Level Meter ID
6-Nov-12	9:58	49.7	48.8	53.2	50.6	53.0	49.1	51.1	54	EQ068
12-Nov-12	9:54	51.2	48.6	47.8	46.5	50.5	56.8	51.8	55	EQ010
23-Nov-12	14:00	60.0	50.9	46.2	45.8	46.1	68.1	61.1	64	EQ065
29-Nov-12	9:40	57.1	45.6	44.8	45.0	44.9	58.5	53.5	57	EQ065
Limit Level in dB(A)								**75**		

Remarks: *The monitoring is undertaken under free field situation. A façade correction of +3 dB(A) has been added according to acoustical principles and EPD guidelines*

4.03 A free field noise monitoring is performed only at UTP11, therefore, a façade correction +3 dB(A) is added in accordance with the acoustical principles and EPD guidelines.

4.04 No noise complaint (which is an Action Level exceedance) was received in the Reporting Period. Furthermore, no noise monitoring exceedance was recorded. No Notice of Exceedance (NOE) was issued to notify EPD, IEC, the Contractor and the ER.

4.05 Although all noise measurement results are below 75dB(A), the Contractor is reminded to strictly implement noise mitigation measures as recommended in the EM&A Manual to avoid noise Limit Level exceedance.

5.0 VIBRATION MONITORING RESULTS

5.01 There was a vibration monitoring carried out at Fan Sin T emple on 14th November 2012 and no exceedance was recorded. The vibration monitoring result is shown in ***Appendix J.***

6.0 ECOLOGY MONITORING RESULTS

6.01 Weekly ecological inspections by the Ecol ogist Dr. Mark Shea were carri ed out on **5th, 12th, 19th and 26th November 2012**. Details of findings are summarized in ***Table 6-1***.

Table 6-1 Summary Results of Ecological Site Inspection Findings

Date	Observations	Advice from Ecologist	Action Taken	Closing Date
5th November 2012	No Major findings for this inspection	No Advice is required	No Action is required to be taken	N/A
12th November 2012	No Major findings for this inspection	No Advice is required	No Action is required to be taken	N/A
19th November 2012	No Major findings for this inspection	No Advice is required	No Action is required to be taken	N/A
26th November 2012	No Major findings for this inspection	No Advice is required	No Action is required to be taken	N/A

6.02 Furthermore, the last bi-annual ecological impact monitoring was conducted in July 2012 and the ecological impact monitoring report has been present ed in Monthly EM&A Report August 2012, therefore no ecological impact monitoring report would be submitted in this Reporting Period. The next bi-annual ecological impact monitoring has been arranged to be carried out in January 2013.

7.0 SITE INSPECTION

REGULAR SITE INSPECTION AND AUDITING

7.01 Joint weekly environmental site inspections were carried out by the Contractor, ET, IEC and ER on **7th, 14th, 21st and 27th November 2012.** Also, DSD's representatives attended the site inspection on **27th November 2012**. In the Reporting Period, **6** observations were recorded but no non-compliance was identified.

7.02 Observations for the site inspection and monthly audit within the Reporting Period are summarized in ***Table 7-1***.

Table 7-1 Site Inspection of Observations – Findings and Deficiencies

Date	Findings / Deficiencies	Follow-Up Status
Last Reporting Period	• C&D materials were blocking the existing channel at Upper Tai Po River. The Contractor was reminded to clean up those C&D materials. • Stagnant water cumulated at the site area during rainstorm. The Contractor was reminded to clean all the stagnant water and provide proper mitigation measures to prevent mosquito breeding.	• The C&D material at Upper Tai Po River was removed on 7th November 2012. • Stagnant water was cleared on 7th November 2012.
7th November 2012	• Dry and dusty haul road was observed at Upper Tai Po River. The Contractor was reminded to provide water spraying to minimize dust generation.	• This finding would be rectified on 14 th November 2012.
14th November 2012	• C&D wastes cumulated at Upper Tai Po River were observed. The Contractor was reminded to clean up those C&D wastes. • Chemical container without drip tray was observed at Upper Tai Po River. The Contractor was reminded to provide drip tray for all chemical containers in the site area. • Dry and dusty haul road was observed at Upper Tai Po River. The Contractor was reminded to provide water spraying to minimize dust generation.	• C&D wastes cumulated at Upper Tai Po River were removed on 21 st November 2012. • Chemical container at Upper Tai Po River was removed on 21st November 2012. • Regular water spraying was applied on 21st November 2012.
21th November 2012	• Several empty chemical containers were observed at Tai Po Upper River. The Contractor was reminded to clean up and dispose unused chemical containers as required in Waste Management Plan.	• Empty chemical containers were removed properly on 27th November 2012.
27th November 2012	• Muddy river water was observed during rainstorm at Upper Tai Po River. The Contractor was reminded to provide proper mitigation measures to prevent muddy water directly discharging into the river stream.	• This finding would be rectified in December 2012.

7.03 One deficiency observed during previous site inspections is still outstanding. The status of rectification is presented in ***Table 7-2***.

Table 7-2 Rectification Status of Previous Site Inspection Deficiencies

Inspection Date	Findings / Deficiencies	Status
6th Oct 2011	Noise barriers have not yet been erected by the Contractor along Upper Tai Po River. The Contractor was urged to install noise barriers to minimize the noise impact arisen from construction activities.	Ongoing

7.04 Implementation status of environmental protection and mitigation measures are shown in ***Table 10-1*** of this report.

8.0 WASTE MANAGEMENT

8.01 Waste management is carried out by an on-site Environmental Officer (EO) or an Environmental Supervisor (ES) from time to time.

RECORDS OF WASTE QUANTITIES

8.02 All types of waste arising from the construction works are classified into the following:

- Construction & Demolition (C&D) Material;
- Chemical Waste; and
- General Refuse.

8.03 The quantities of waste for disposal in the Reporting Period are summarized in ***Table 8-1*** and ***8-2*** and the Monthly Summary Waste Flow Table is shown in ***Appendix I***. Whenever possible, materials are reused on-site as far as practicable.

Table 8-1 Summary of Quantities of Inert C&D Materials

Type of Waste	Quantity
C&D Materials (Inert) (in '000m^3)	0
Reused in the Contract (Inert) (in '000m^3)	0
Reused in other Projects (Inert) (in '000m^3)	0
Disposal as Public Fill (Inert) (in '000m^3)	0

Table 8-2 Summary of Quantities of C&D Wastes

Type of Waste	Quantity	Disposal Method
Metal (in '000kg)	0	--
Paper / Cardboard Packing (in '000kg)	0	--
Plastic (in '000kg)	0	--
Chemical Wastes (in '000kg)	0	--
General Refuses (in '000m^3)	0	--

8.04 In the Reporting Period, the C&D wastes would be stockpiled on site until certain quantities are accumulated before disposal to public fill or recycle companies. Therefore, zero cubic meter was reported in Wastes Flow Table – November 2012.

8.05 To control over the site performance on waste management, the Contractor shall ensure that all solid and liquid waste management works are in full compliance with the relevant license/permit requirements, such as the effluent discharge license and the chemical waste producer registration. The Contractor is also reminded to implement the recommended environmental mitigation measures according to the EM&A Manual based on actual site conditions.

9.0 ENVIRONMENTAL COMPLAINT AND NON-COMPLIANCE

ENVIRONMENTAL COMPLAINT, SUMMONS AND PROSECUTION

9.01 No environmental complaint, summons and prosecution was received in the Reporting Period. The statistical summary of environmental complaint, summons and prosecution, is presented in ***Tables 9-1, 9-2*** and ***9-3***.

Table 9-1 Statistical Summary of Environmental Complaint

Complaint Nature	Environmental Complaint Statistics		
	Cumulative (Sep 2008 – Oct 2012)	Frequency (Nov 2012)	Total
Air/Dust	7	0 7	
Noise	5	0 5	
Water	11	0	11
Housekeeping Hygiene	1	0 1	
Chemical Waste	0	0 0	
Overall	**24**	**0**	**24**

Table 9-2 Statistical Summary of Environmental Summons

Complaint Nature	Environmental Summons Statistics		
	Cumulative (Sep 2008 – Oct 2012)	Frequency (Nov 2012)	Total
Air/Dust	0	0 0	
Noise	0	0 0	
Water	0	0 0	
Housekeeping Hygiene	0	0 0	
Chemical Waste	0	0 0	
Overall	**0**	**0**	**0**

Table 9-3 Statistical Summary of Environmental Prosecution

Complaint Nature	Environmental Prosecution Statistics		
	Cumulative (Sep 2008 – Oct 2012)	Frequency (Nov 2012)	Total
Air/Dust	0	0 0	
Noise	0	0 0	
Water	0	0 0	
Housekeeping Hygiene	0	0 0	
Chemical Waste	0	0 0	
Overall	**0**	**0**	**0**

10.0 IMPLEMENTATION STATUS OF MITIGATION MEASURES

10.01 The environmental mitigation measures recommended in EM&A Manual covering the issues of dust, noise and waste and they are summarized as follows:

Noise Mitigation Measures

(a) No percussive piling shall be carried out;
(b) Only well-maintained plant should be operated on-site; and plant shall be serviced regularly during the construction program;
(c) Silencers or mufflers on construction equipment should be utilized and shall be properly maintained during the construction program;
(d) Mobile plant, if any, should be sited as far from Noise Sensitive Receivers (NSRs) as possible;
(e) Machines and plant (such as trucks) that may be in intermittent use should be shut down between work periods or should be throttled down to a minimum;
(f) Plant known to emit noise strongly in one direction should, wherever possible, be orientated so that the noise is directed away from the nearby NSRs;
(g) Materials stockpiled on site and other structures should be effectively utilized, wherever practicable, in screening noise from on-site construction activities;
(h) Use of quieter plants to carry out the construction tasks proposed for the Project;
(i) Use 2.0m high temporary noise barriers as screened the noisy Powered Mechanical Equipments (PMEs) to carry out the river implementation work;
(j) Low Impact Method, such as using PMEs smaller in size.

Dust Mitigation Measures

10.02 Implementation of mitigation measures stipulated in the Air Pollution Control (Construction Dust) Regulation and good site practices include but not limited to the following:

(a) Use of regular watering to reduce dust emissions from exposed site surfaces and unpaved road, with complete coverage, particularly during dry weather;
(b) Use of frequent watering for particularly dusty static construction areas and areas close to Air Sensitive Receivers (ASRs);
(c) Tarpaulin covering of all dusty vehicle loads transported to, from and between site location;
(d) Establishment and use of vehicle wheel and body washing facilities at the exit points of the site;
(e) Routing of vehicles and positioning of construction plant should be at the maximum possible distance from ASRs;
(f) Stockpiled excavated materials should be covered with tarpaulin.

Local Stream Water Quality Mitigation Measures

(a) Excavation works within the site area of Tai Po River shall be carried out in stages and excavation area for each stage shall be limited to section of half width of the channel and less than 100m long at any one time in order to maintain water flow within the river during construction stage;
(b) Land-based plant shall be employed and site run-off shall be directed towards regularly cleaned and maintained silt traps and oil / grease separators to minimize leakage and loss of sediments during excavation;
(c) Large boulders removed from Tai Po River within the Project during excavation shall be re-instated upon completion of works A section of 150m long natural riverbank on the western side of the river channel (Ch0 –Ch150) shall be retained;
(d) The excavation area shall be enclosed with bunds or barriers and dewatered prior to excavation to minimize the impacts upon the downstream of the Tai Po River;
(e) Provide silt trap and oil interceptor to remove oil, lubricants, grease, silt, grit and debris from the wastewater before discharging to the public storm water drainage system;
(f) Provide site toilet facilities;

(g) During rainstorms, exposed slope/soil surfaces shall be covered by a tarpaulin or other means. Other measures that need to be implemented before, during, and after rainstorms as summarized in Professional Persons Environmental Consultative Committee (ProPECC) [PN 1/94] shall be followed.

Waste Mitigation Measures

(a) The Contractor shall observe and comply with the Waste Disposal Ordinance (WDO) and its subsidiary regulations;

(b) The Contractor shall submit to the Engineer for approval a Waste Management Plan with appropriate mitigation measures including allocation of an area for waste segregation and shall ensure that the day-to-day site operations comply with the approved waste management plan;

(c) The Contractor shall minimize the generation of waste from his work. Avoidance and minimization of waste generation can be achieved through changing or improving design and practices, careful planning and good site management;

(d) The reuse and recycling of waste shall be practised as far as possible. The recycling materials shall include paper/cardboard, timber and metal etc;

(e) The Contractor shall ensure that Construction and Demolition (C&D) materials are sorted into public fill (inert portion) and C&D waste (non-inert portion). The public fill which comprises soil, rock, concrete, brick, cement plaster/mortar, inert building debris, aggregates and asphalt shall be reused in earth filling, reclamation or site formation works. The C&D waste which comprises metal, timber, paper, glass, junk and general garbage shall be reused or recycled where possible and, as the last resort, disposal of at landfills;

(f) The Contractor shall record the amount of wastes generated, recycled and disposed of (including the disposal sites). The Contractor shall use a trip ticket system for the disposal of C&D materials to any designated public filling facility and/or landfill;

(g) In order to avoid dust or odour impacts, any vehicles leaving a works area carrying construction waste or public fill shall have their load covered;

(h) To avoid the excessive use of wood, reusable steel shutters shall be used as a preferred alternative to formwork and falsework where possible;

(i) The Contractor shall observe and comply with the Waste Disposal (Chemical Waste) (General) Regulation. The Contractor shall apply for registration as chemical waste producer under the Waste Disposal (Chemical Waste) (General) Regulation when chemical waste is produced. All chemical waste shall be properly stored, labeled, packaged and collected in accordance with the Regulation.

Vibration

(a) Percussive piling is to be replaced by bore-hole piling to minimize vibration impacts to the two identified declared monuments;

(b) Carrying out of vibration monitoring to ensure that vibration associated with the construction works do not exceed the threshold limit otherwise contractor have to review the work method and construction activities have to be slowed down or rescheduled to reduce the impacts;

(c) Close monitoring and measurement on the cracks of the external wall of Fan Sin Temple during construction works will be carried out. Any changes on the cracks will be recorded for the contractor to slow down the construction activities accordingly; and to review the work methods and equipment immediately.

Ecology

(a) Large boulders will be returned to the riverbed following the excavation works;

(b) Construction works from Ch. 0.0m – Ch. 150m would be along one side of the river only;

(c) Approximately 150m of the existing natural riverbank on the western side of the river would be retained;

(d) Excavation works within the river channel should be restricted to an enclosed dewater

section of the river, and would be limited to sections 50-100m long at any one time;

(e) Flows to the area downstream shall be maintained at all times during the construction phase;

(f) Capture survey shall be conducted within the works area at Tai Po River before commencement of works. The captured target species shall be relocated to areas of the watercourse upstream of the watercourse upstream of the Tai Po River;

(g) Temporary noise barriers should be constructed to control noise impacts to habitats and associated wildlife within and adjacent to the proposed works area;

(h) Excavation works shall be carried out by land based plant within enclosed dry section of river channel;

(i) Compensatory planting of trees and other vegetation along the banks of the newly improved drainage channel should be provided to compensate for the loss of riparian vegetation;

(j) Operation phase activities in the improved drainage channel would be limited to periodic channel maintenance such as de-silting.

10.03 Based on the site environmental situation, the Contractor has implemented the required environmental mitigation measures according to the Updated Environmental Monitoring and Audit Manual. In the Reporting Period, environmental mitigation measures had been implemented by the Contractor are summarized in ***Table 10-1***.

Table 10-1 Environmental Mitigation Measures

Issues	Environmental Mitigation Measures
Water Quality	• Wastewater should be appropriately treated by treatment facilities; • Drainage channels should be provided to convey run-off into the treatment facilities; and • Drainage systems should be regularly and adequately maintained.
Air Quality	• Increase watering frequency to reduce dust emissions from all exposed site surface, particularly during dry weather; • Frequent watering for particularly dusty construction areas and areas close to air sensitive receivers; • Cover all excavated or stockpiled dusty materials by impervious sheeting or sprayed with water to maintain the entire surface wet; • Public roads around the site entrance/exit should be kept clean and free from dust; and • Tarpaulin covering of any dusty materials on a vehicle leaving the site.
Noise	• Reduce construction machines as used within the site; • Use of quite plant and working methods; • Scheduling of construction works nearly the NSR; and • Alternative use of plant items within one worksite, where practicable.
Waste and Chemical Management	• Excavated material should be reused on site as far as possible to minimize off-site disposal. Scrap metals or abandoned equipment should be recycled if possible; • Waste arising should be kept to a minimum and be handled, transported and disposed of in a suitable manner; • The Contractor should adopt a trip ticket system for the disposal of C&D materials to any designed public filling facility and/or landfill; and • Chemical waste shall be handled in accordance with the Code of Practice on the Packaging, Handling and Storage of Chemical Wastes.
General	• The site should be generally kept tidy and clean.

11.0 IMPACT FORECAST

CONSTRUCTION ACTIVITIES FOR THE FORTH-COMING MONTH

11.01 Construction activities planned to be carried out next month at Upper Tai Po River is listed as below:-

- Formation of riverbed;
- Construction of dwarf walls;
- Construction of retaining walls;
- Construction of surface drains;
- Construction of footpaths;
- Construction of inclined gabion wall;
- Erection of decking for Footbridge;
- Installation of Type II railings;
- Removal of stockpiled materials;
- Laying of cable ducts for public lighting; and
- Laying of watermains.

KEY ISSUES FOR THE COMING MONTH

11.02 According to construction activities to be carried out in coming month, key issues to be considered include:

- Implementation of dust suppression measures should be conducted at all times;
- Ensure dust suppression measures should be implemented properly;
- Disposal of empty engine oil containers should be undertaken within site area;
- Sediment catch-pits and silt removal facilities should be regularly maintained;
- Management of chemical wastes should be followed;
- Discharge of site effluent to the nearby local stream or storm drainage, stockpiling or disposal of materials, and any dredging or construction area at this area should be prohibited;
- Follow-up of improvement on general waste management issues should be conducted; and
- Implementation of construction noise preventative control measures should be undertaken.

12.0 CONCLUSIONS AND RECOMMENTATIONS

CONCLUSIONS

12.01 This is the **fifty-first (51st)** monthly EM&A report for the Project presenting the monitoring results and inspection findings for the reporting month from **1st to 30th November 2012**.

12.02 No noise complaint (which is an Action Level exceedance) was received in the Reporting Period. In the Reporting Period, a total 55 occurrences of construction noise monitoring was undertaken and all measurement results were below 75dB (A). No Notice of Exceedance (NOE) was therefore issued to notify EPD, IEC, the Contractor and ER.

12.03 There was a vibration monitoring carried out at Fan Sin Temple on 14th November 2012 and no exceedance was recorded.

12.04 Weekly ecological site inspections were performed on **5th, 12th, 19th and 26th November 2012**. According to inspection findings, no advice and action was recommended by the ecologist.

12.05 No documented environmental complaint, notification of summons or successful prosecution was received in the Reporting Period.

12.06 Joint weekly environmental site inspections by the Contractor, ET, IEC and ER were undertaken on **7th, 14th, 21st and 27th November 2012.** In the Reporting Period, **6** observations were recorded but no non-compliance was identified during the site inspections. In the Reporting Period, DSD's representatives attended the site inspection on **27th November 2012**.

RECOMMENDATIONS

12.07 During dry season, dust control measures to avoid fugitive dust in the construction site should be properly provided and maintained, as appropriate. In addition, water quality mitigation measures such as prevention of muddy water and other water quality pollutants via site surface water runoff into the local stream of Tai Po River should be fully implemented.

12.08 On the other hand, construction noise is another key environmental issue during construction works. Noise mitigation measures are reminded to be implemented in accordance with EM&A Manual stipulation. Dust mitigation measures to avoid fugitive dust emissions from loose soil surface or haul road are also reminded to be implemented.

12.09 To control the site performance on waste management, the Contractor shall ensure that all solid and liquid waste management works are fully in compliance with the relevant licence/permit requirements, such as the effluent discharge licence and the chemical waste producer registration. The Contractor is also reminded to implement the recommended environmental mitigation measures according to EM&A Manual.

校正證書

Certificate No. : C122713
證書編號

ITEM TESTED / 送檢項目 (Job No. / 序引編號 : IC12-0960)

Description / 儀器名稱 : Integrating Sound Level Meter (EQ006)
Manufacturer / 製造商 : Bruel & Kjaer
Model No. / 型號 : 2238
Serial No. / 編號 : 2285762
Supplied By / 委託者 : Action-United Environmental Services and Consulting
Unit A, 20/F., Gold King Industrial Building,
35-41 Tai Lin Pai Road, Kwai Chung, N.T.

TEST CONDITIONS / 測試條件

Temperature / 溫度 : (23 ± 2)°C
Relative Humidity / 相對濕度 : (55 ± 20)%
Line Voltage / 電壓 : ---

TEST SPECIFICATIONS / 測試規範

Calibration check

DATE OF TEST / 測試日期 : 7 May 2012

TEST RESULTS / 測試結果

The results apply to the particular unit-under-test only.
All results are within manufacturer's specification.
The results are detailed in the subsequent page(s).

The test equipment used for calibration are traceable to National Standards via :
- The Government of The Hong Kong Special Administrative Region Standard & Calibration Laboratory
- Rohde & Schwarz Laboratory, Germany
- Fluke Precision Measurement Ltd., UK
- Fluke Everett Service Center, USA
- Agilent Technologies, USA

Tested By 測試 : L K Yeung

Certified By 核證 : K C Lee

Date of Issue 簽發日期 : 8 May 2012

Certificate of Calibration
校正證書

Certificate No. : C122713
證書編號

1. The unit-under-test (UUT) was allowed to stabilize in the laboratory for over 12 hours, and switched on to warm up for over 10 minutes before the commencement of the test.

2. Self-calibration using the B & K Acoustic Calibrator 4231, S/N : 2326408 was performed before the test.

3. The results presented are the mean of 3 measurements at each calibration point.

4. Test equipment :

Equipment ID	Description	Certificate No.
CL280	40 MHz Arbitrary Waveform Generator	C120016
CL281	Multifunction Acoustic Calibrator	DC110233

5. Test procedure : MA101N.

6. Results :

6.1 Sound Pressure Level

6.1.1 Reference Sound Pressure Level

UUT Setting				Applied Value		UUT Reading (dB)	IEC 60651 Type 1 Spec. (dB)
Range (dB)	Parameter	Frequency Weighting	Time Weighting	Level (dB)	Freq. (kHz)		
50 - 130	L_{AFP}	A	F	94.00	1	94.1	± 0.7

6.1.2 Linearity

UUT Setting				Applied Value		UUT Reading (dB)
Range (dB)	Parameter	Frequency Weighting	Time Weighting	Level (dB)	Freq. (kHz)	
50 - 130	L_{AFP}	A	F	94.00	1	94.1 (Ref.)
				104.00		104.1
				114.00		114.1

IEC 60651 Type 1 Spec. : ± 0.4 dB per 10 dB step and ± 0.7 dB for overall different.

6.2 Time Weighting

6.2.1 Continuous Signal

UUT Setting				Applied Value		UUT Reading (dB)	IEC 60651 Type 1 Spec. (dB)
Range (dB)	Parameter	Frequency Weighting	Time Weighting	Level (dB)	Freq. (kHz)		
50 - 130	L_{AFP}	A	F	94.00	1	94.1	Ref.
	L_{ASP}		S			94.1	± 0.1
	L_{AIP}		I			94.2	± 0.1

6.2.2 Tone Burst Signal (2 kHz)

UUT Setting				Applied Value		UUT Reading (dB)	IEC 60651 Type 1 Spec. (dB)
Range (dB)	Parameter	Frequency Weighting	Time Weighting	Level (dB)	Burst Duration		
30 - 110	L_{AFP}	A	F	106.0	Continuous	106.0	Ref.
	L_{AFMax}				200 ms	105.0	-1.0 ± 1.0
	L_{ASP}		S		Continuous	106.0	Ref.
	L_{ASMax}				500 ms	102.0	-4.1 ± 1.0

6.3 Frequency Weighting

6.3.1 A-Weighting

UUT Setting				Applied Value		UUT Reading (dB)	IEC 60651 Type 1 Spec. (dB)
Range (dB)	Parameter	Frequency Weighting	Time Weighting	Level (dB)	Freq.		
50 - 130	L_{AFP}	A	F	94.00	31.5 Hz	55.2	-39.4 ± 1.5
					63 Hz	68.0	-26.2 ± 1.5
					125 Hz	77.9	-16.1 ± 1.0
					250 Hz	85.4	-8.6 ± 1.0
					500 Hz	90.8	-3.2 ± 1.0
					1 kHz	94.1	Ref.
					2 kHz	95.3	+1.2 ± 1.0
					4 kHz	95.1	+1.0 ± 1.0
					8 kHz	93.0	-1.1 (+1.5 ; -3.0)
					12.5 kHz	89.9	-4.3 (+3.0 ; -6.0)

6.3.2 C-Weighting

UUT Setting				Applied Value		UUT Reading (dB)	IEC 60651 Type 1 Spec. (dB)
Range (dB)	Parameter	Frequency Weighting	Time Weighting	Level (dB)	Freq.		
50 - 130	L_{CFP}	C	F	94.00	31.5 Hz	91.5	-3.0 ± 1.5
					63 Hz	93.4	-0.8 ± 1.5
					125 Hz	93.9	-0.2 ± 1.0
					250 Hz	94.1	0.0 ± 1.0
					500 Hz	94.1	0.0 ± 1.0
					1 kHz	94.1	Ref.
					2 kHz	93.9	-0.2 ± 1.0
					4 kHz	93.3	-0.8 ± 1.0
					8 kHz	91.0	-3.0 (+1.5 ; -3.0)
					12.5 kHz	87.9	-6.2 (+3.0 ; -6.0)

Certificate of Calibration

6.4 Time Averaging

UUT Setting				Applied Value					UUT Reading (dB)	IEC 60804 Type 1 Spec. (dB)
Range (dB)	Parameter	Frequency Weighting	Integrating Time	Frequency (kHz)	Burst Duration (ms)	Burst Duty Factor	Burst Level (dB)	Equivalent Level (dB)		
30 - 110	L_{Aeq}	A	10 sec.	4	1	1/10	110.0	100	100.0	± 0.5
						$1/10^2$		90	90.0	± 0.5
			60 sec.			$1/10^3$		80	79.4	± 1.0
			5 min.			$1/10^4$		70	69.3	± 1.0

Remarks : - Mfr's Spec. : IEC 60651 Type 1 & IEC 60804 Type 1

- Uncertainties of Applied Value :

94 dB	: 31.5 Hz - 125 Hz	: ± 0.40 dB
	250 Hz - 500 Hz	: ± 0.30 dB
	1 kHz	: ± 0.20 dB
	2 kHz	: ± 0.40 dB
	4 kHz	: ± 0.50 dB
	8 kHz	: ± 0.70 dB
	12.5 kHz	: ± 1.20 dB
104 dB : 1 kHz		: ± 0.10 dB (Ref. 94 dB)
114 dB : 1 kHz		: ± 0.10 dB (Ref. 94 dB)
Burst equivalent level		: ± 0.2 dB (Ref. 110 dB continuous sound level)

- The uncertainties are for a confidence probability of not less than 95 %.

Note :
The values given in this Certificate only relate to the values measured at the time of the test and any uncertainties quoted will not include allowance for the equipment long term drift, variations with environment changes, vibration and shock during transportation, overloading, mis-handling, or the capability of any other laboratory to repeat the measurement. Sun Creation Engineering Limited shall not be liable for any loss or damage resulting from the use of the equipment.

Equipment ID	Description	Certificate No.
CL280	40 MHz Arbitrary Waveform Generator	C120016
CL281	Multifunction Acoustic Calibrator	DC110233

5. Test procedure : MA101N.

6. Results :

6.1 Sound Pressure Level

6.1.1 Reference Sound Pressure Level

6.1.1.1 Before Self-calibration

UUT Setting				Applied Value		UUT Reading (dB)
Range (dB)	Parameter	Frequency Weighting	Time Weighting	Level (dB)	Freq. (kHz)	
50 - 130	L_{AFP}	A	F	94.00	1	94.3

6.1.1.2 After Self-calibration

UUT Setting				Applied Value		UUT Reading (dB)	IEC 60651 Type 1 Spec. (dB)
Range (dB)	Parameter	Frequency Weighting	Time Weighting	Level (dB)	Freq. (kHz)		
50 - 130	L_{AFP}	A	F	94.00	1	94.1	± 0.7

6.1.2 Linearity

UUT Setting				Applied Value		UUT Reading (dB)
Range (dB)	Parameter	Frequency Weighting	Time Weighting	Level (dB)	Freq. (kHz)	
50 - 130	L_{AFP}	A	F	94.00	1	94.1 (Ref.)
				104.00		104.1
				114.00		114.1

IEC 60651 Type 1 Spec. : ± 0.4 dB per 10 dB step and ± 0.7 dB for overall different.

6.3.2 C-Weighting

UUT Setting				Applied Value		UUT Reading (dB)	IEC 60651 Type 1 Spec. (dB)
Range (dB)	Parameter	Frequency Weighting	Time Weighting	Level (dB)	Freq.		
50 - 130	L_{CFP}	C	F	94.00	31.5 Hz	91.3	-3.0 ± 1.5
					63 Hz	93.3	-0.8 ± 1.5
					125 Hz	93.9	-0.2 ± 1.0
					250 Hz	94.0	0.0 ± 1.0
					500 Hz	94.1	0.0 ± 1.0
					1 kHz	94.1	Ref.
					2 kHz	93.9	-0.2 ± 1.0
					4 kHz	93.2	-0.8 ± 1.0
					8 kHz	91.1	-3.0 (+1.5 ; -3.0)
					12.5 kHz	88.0	-6.2 (+3.0 ; -6.0)

6.4 Time Averaging

UUT Setting				Applied Value					UUT Reading (dB)	IEC 60804 Type 1 Spec. (dB)
Range (dB)	Parameter	Frequency Weighting	Integrating Time	Frequency (kHz)	Burst Duration (ms)	Burst Duty Factor	Burst Level (dB)	Equivalent Level (dB)		
30 - 110	L_{Aeq}	A	10 sec.	4	1	1/10	110.0	100	99.9	± 0.5
						$1/10^2$		90	89.7	± 0.5
			60 sec.			$1/10^3$		80	79.7	± 1.0
			5 min.			$1/10^4$		70	69.7	± 1.0

Remarks : - Mfr's Spec. : IEC 60651 Type 1 & IEC 60804 Type 1

- Uncertainties of Applied Value :

94 dB	: 31.5 Hz - 125 Hz	: ± 0.35 dB
	250 Hz - 500 Hz	: ± 0.30 dB
	1 kHz	: ± 0.20 dB
	2 kHz - 4 kHz	: ± 0.35 dB
	8 kHz	: ± 0.45 dB
	12.5 kHz	: ± 0.70 dB
104 dB : 1 kHz		: ± 0.10 dB (Ref. 94 dB)
114 dB : 1 kHz		: ± 0.10 dB (Ref. 94 dB)
Burst equivalent level		: ± 0.2 dB (Ref. 110 dB continuous sound level)

- The uncertainties are for a confidence probability of not less than 95 %.

Note :
The values given in this Certificate only relate to the values measured at the time of the test and any uncertainties quoted will not include allowance for the equipment long term drift, variations with environment changes, vibration and shock during transportation, overloading, mis-handling, or the capability of any other laboratory to repeat the measurement. Sun Creation Engineering Limited shall not be liable for any loss or damage resulting from the use of the equipment.

Certificate of Calibration
校正證書

Certificate No. : C122418
證書編號

1. The unit-under-test (UUT) was allowed to stabilize in the laboratory for over 12 hours, and switched on to warm up for over 10 minutes before the commencement of the test.

2. Self-calibration using the internal standard (After Adjustment) was performed before the test form 6.1.1.2 to 6.4.

3. The results presented are the mean of 3 measurements at each calibration point.

4. Test equipment :

Equipment ID	Description	Certificate No.
CL280	40 MHz Arbitrary Waveform Generator	C120016
CL281	Multifunction Acoustic Calibrator	DC110233

5. Test procedure : MA101N.

6. Results :

6.1 Sound Pressure Level

6.1.1 Reference Sound Pressure Level

6.1.1.1 Before Adjustment

UUT Setting				Applied Value		UUT Reading (dB)	IEC 60651 Type 1 Spec. (dB)
Range (dB)	Mode	Frequency Weighting	Time Weighting	Level (dB)	Freq. (kHz)		
30 - 120	L_A	A	Fast	94.00	1	* 92.9	± 0.7

* Out of Mfr's Spec.

6.1.1.2 After Adjustment

UUT Setting				Applied Value		UUT Reading (dB)	IEC 60651 Type 1 Spec. (dB)
Range (dB)	Mode	Frequency Weighting	Time Weighting	Level (dB)	Freq. (kHz)		
30 - 120	L_A	A	Fast	94.00	1	94.0	± 0.7

6.1.2 Linearity

UUT Setting				Applied Value		UUT Reading (dB)
Range (dB)	Mode	Frequency Weighting	Time Weighting	Level (dB)	Freq. (kHz)	
30 - 120	L_A	A	Fast	94.00	1	94.0 (Ref.)
				104.00		104.0
				114.00		114.0

IEC 60651 Type 1 Spec. : ± 0.4 dB per 10 dB step and ± 0.7 dB for overall different.

Appendix E

Event and Action Plan

Event Action Plan for Construction Noise

EVENT	ACTION			
	ET Leader	IEC	ER	Contractor
Action Level	1. Notify IEC and Contractor 2. Carry out investigation. 3. Report the results of investigation to the IEC, ER and Contractor. 4. Discuss with the Contractor and formulate remedial measures 5. Increase monitoring frequency to check mitigation effectiveness.	1. Review the analyzed results submitted by the ET. 2. Review the proposed remedial measures by the Contractor and advise the ER accordingly 3. Supervise the implementation of remedial measures	1. Confirm receipt of notification of failure in writing 2. Notify Contractor 3. Require Contractor to propose 'remedial measures for the analyzed noise problem 4. Check remedial measures are properly implemented.	1. Submit noise mitigation proposals to IEC 2. Implement noise mitigation proposals
Limit Level	1. Notify IEC, ER, EPD and Contractor 2. Identify source. 3. Repeat measurements to confirm findings 4. Increase monitoring frequency. 5. Carry out an alysis of Contractor's working procedures to determine possible mitigation to be implemented 6. Inform IEC, ER and EPD the c auses and actions taken for the exceedances 7. Assess effectiveness of Contractor's remedial actions and k eep IEC, EPD and ER informed of the results 8. If exceedance stops, cease additional monitoring.	1. Discuss amongst ER , ET, and Contractor on the po tential remedial actions 2. Review Contractor's' remedial actions whenever necessary to assure their effectiveness and advise the ER accordingly 3. Supervise the implementation of remedial measures	1. Confirm receipt of notification of failure in writing 2. Notify Contractor 3. Require Contractor to propose remedial measures for the analyzed noise problem 4. Check remedial measures properly implemented. 5. If exceedance continues, consider what portion of the work is responsible and instruct the Contractor to stop that portion of work until the exceedance is abated	1. Take immediate action to avoid further exceedance 2. Submit proposals for remedial actions to IEC within 3 working days of notification 3. Implement the agreed proposals 4. Resubmit proposals if problem still not under control 5. Stop the relevant portion of works as determined by the ER until the exceedance is abated

Event Action Plan for Ecology

Event	Action			
	ET	ER	IEC	Contractor
Non-conformity on one occasion	1. Identify Source 2. Inform the IEC and the ER; 3. Discuss remedial actions with the IEC, the ER and the Contractor 4. Monitor remedial actions until rectification has been completed	1. Check report 2. Check the Contractor's working method 3. Discuss with the ET and the Contractor on possible remedial measures, 4. Advise the Contractor on effectiveness of proposed remedial measures 5. Check implementation of remedial measures	1. Ensure Remedial measures are properly implemented	1. Amend working methods 2. Rectify damage and undertake any necessary replacement
Repeated Non conformity	1. Identify Source 2. Inform the IEC and the ER 3. Increase monitoring frequency 4. Discuss remedial actions with the IEC, the ER and the Contractor 5. Monitor remedial actions until rectification has been completed. 6. If exceedance stops, cease additional monitoring	1. Check the Contractor's working method 2. Discuss with the ET and the Contractor on possible remedial measures 3. Advise the Contractor on effectiveness of proposed remedial measures 4. Check implementation of remedial measures	1. Ensure Remedial measures are properly implemented	1. Amend working methods 2. Rectify damage and undertake any necessary replacement

Meteorological Data of Reporting Period

Meteorological Data in Reporting Period

Date		Weather	Total Rainfall (mm)	Tai Po Station		Shatin Station	
				Mean Air Temp. (°C)	Mean Relative Humidity (%)	Wind Speed (km/h)	Wind Direction
1-Nov-12	Thu	Cloudy, sunny periods, dry, moderate northeasterly winds.	0	19.1	61.7	8	N
2-Nov-12	Fri	Sunny periods, cloudy, moderate to fresh easterly winds.	0	21.6	67.5	7.4	N/NE
3-Nov-12	Sat	Cloudy, rain, sunny intervals, moderate easterly winds, fresh offshore at first.	Trace	23.1	63	7.4	N/NE
4-Nov-12	Sun	Cloudy, sunny intervals, moderate north to northeasterly winds	0	23.4	61.2	7.9	N/NE
5-Nov-12	Mon	Cloudy, sunny periods, dry, moderate northeasterly winds.	0	22.9	70	8	N
6-Nov-12	Tue	Fine, dry, cloudy, moderate east to northeasterly winds.	0	23	63.7	7.2	E/NE
7-Nov-12	Wed	Sunny periods, cloudy, moderate to fresh easterly winds.	0	23	74	8.8	E/NE
8-Nov-12	Thu	Cloudy, rain, sunny intervals, moderate easterly winds, fresh offshore at first.	1.9	23.6	80	9.1	E/NE
9-Nov-12	Fri	Fine, dry, cloudy, moderate east to northeasterly winds.	Trace	24.5	86.7	8.7	E/SE
10-Nov-12	Sat	Cloudy, sunny intervals, moderate north to northeasterly winds	0	25.5	75	10.2	E/SE
11-Nov-12	Sun	Cloudy, sunny intervals, moderate north to northeasterly winds	0.3	21.5	65	12.5	N
12-Nov-12	Mon	Fine, cloudy, moderate east to northeasterly winds	1	20.5	69.7	7.5	N
13-Nov-12	Tue	Cloudy, sunny periods, dry, moderate northeasterly winds.	0	23	72.7	7.8	E/NE
14-Nov-12	Wed	Cloudy, sunny periods, dry, moderate northeasterly winds.	0	22.4	73.5	8.9	E
15-Nov-12	Thu	Cloudy, sunny intervals, moderate north to northeasterly winds	Trace	23	76.7	8.1	E/NE
16-Nov-12	Fri	Sunny periods, cloudy, moderate to fresh easterly winds.	Trace	20.7	77.2	8.5	E/NE
17-Nov-12	Sat	Cloudy, sunny periods, dry, moderate northeasterly winds.	3	20.4	77.5	7.9	N/NE
18-Nov-12	Sun	Cloudy, rain, moderate to fresh easterly winds	0.1	18.2	87.5	5.6	N/NE
19-Nov-12	Mon	Cloudy, rain, moderate to fresh easterly winds	0	21.9	76.7	9.5	E
20-Nov-12	Tue	Cloudy, rain, moderate to fresh easterly winds	0.3	21.4	76.5	8.6	E
21-Nov-12	Wed	Cloudy, rain, foggy, light to moderate southerly winds	2.9	22.3	90.5	10.2	E/NE
22-Nov-12	Thu	Cloudy, rain, foggy, moderate to fresh northerly winds	0.4	25	84	9.5	S/SW
23-Nov-12	Fri	Cloudy, rain, moderate east to northeasterly winds, occasionally fresh at first.	17.7	22.2	82	11.4	N
24-Nov-12	Sat	Cloudy, rain, moderate to fresh easterly winds	Trace	18.7	85	9.7	N
25-Nov-12	Sun	Cloudy, rain, foggy, moderate to fresh northerly winds	11.5	20.7	96.2	7.5	N
26-Nov-12	Mon	Cloudy, rain, foggy, moderate to fresh northerly winds	0.6	17.4	83	9.7	N/NW
27-Nov-12	Tue	Cloudy, rain, moderate east to northeasterly winds, occasionally fresh at first.	19.5	15	94.5	7.7	N
28-Nov-12	Wed	Cloudy, overcast, mist, Moderate east to northeasterly winds.	1.1	18.6	89.5	8.2	E/NE
29-Nov-12	Thu	Cloudy, overcast ,rain ,mist ,moderate northeasterly winds.	2.6	18.8	94.7	5.4	N/NE
30-Nov-12	Fri	Cloudy, rain, cool, moderate north to northeasterly winds	1.9	20.2	94.7	9	E/NE
