#### **EXECUTIVE SUMMARY**

#### Introduction

- 1. This is the 5<sup>th</sup> Quarterly Environmental Monitoring and Audit (EM&A) Summary Report prepared by Cinotech Consultants Limited for Development of a Biodiesel Plant at Tseung Kwan O Industrial Estate". This report documents the findings of EM&A Works conducted from June 2010 to August 2010.
- 2. The major site activities undertaken in the reporting quarter included:
  - Structural Steel Works, including material transportation, assembling, welding jointing;
  - General site cleaning and tidying; and
  - Taking measures for preventing mosquito breeding.

#### **Environmental Monitoring and Audit Works**

3. Environmental monitoring and audit works for the Project were performed regularly as stipulated in the EM&A Manual and the results were checked and reviewed. Site audits were conducted once per month. The implementation of the environmental mitigation measures and environmental complaint handling procedures were also checked.

#### **Environmental Licenses and Permits**

4. Licenses/Permits granted to the Project include the Environmental Permit (EP) for the Project, An Environmental Permit No. EP-319/2009 and EP-319/2009/A was issued on 11 March 2009 and 7 April 2009 respectively. Registration of Chemical Waste Producer (WPN-5113-839-C1186-15), Construction Noise Permit (GW-RE0561-09) and Wastewater Discharge License (WT00004508-2009).

#### Key Information in the Reporting Quarter

5. Summary of key information in this reporting quarter is tabulated in Table I.

1

Table I	Summary Table for Key Information in the Reporting Quarter
	Summary fusic for ney mormation in the neporting Quarter

Event	Ev	vent Details	Action Taken	Status	Remark
Event	Number	Nature	Action Taken	Status	Keilläi K
Complaint received	0		N/A	N/A	
Changes to the assumptions and key construction / operation activities recorded	0		N/A	N/A	
Status of submissions under EP	3	Monthly EM&A Report for June, July and August 2010			
Notifications of any summons & prosecutions	0		N/A	N/A	

#### **Future Key Issues**

- 6. Major site activities for the coming month will include:
  - Tank Farm 2A remaining foundation and bund wall construction;
  - Possessing Building structural steelwork, tank installation and painting;
  - Administration Building concrete frame construction;
  - Fat Pad Fabrication concrete frame construction; and
  - Site Investigation for Jetty Construction.
- 7. The future environmental concerns are air quality, waste management and surface runoff from construction works.

#### 1 INTRODUCTION

#### Background

- 1.1 Development of a Biodiesel Plant at Tseung Kwan O Industrial Estate is a Designated Project (hereafter referred to as "the Project") under the Environmental Impact Assessment Ordinance (Cap. 449). A study of environmental impact assessment (EIA) was undertaken to consider the key issues of air quality, noise, water quality, ecological and identify possible mitigation measures associated with the works. An EIA Report was approved by the Environmental Protection Department (EPD) on 26 February 2009.
- 1.2 The project is to construct and operate a 100,000 tonnes per annum biodiesel plant at Tseung Kwan O Industrial Estate. The plant will use a multi-feedstock which consists of waste cooking oil (WCO), oil and grease recovered from grease trap waste (GTW), Palm Fatty Acid Distillate (PFAD) and animal fats. The proposed biodiesel plant not only offers a convenient recycling outlet for GTW and WCO but also converts the oil and grease recovered from these wastes into useful products. The Project also offers a cleaner alternative to diesel fuel to the Hong Kong market. The main processes include the followings:-
  - Construction of feedstock reception and storage facilities, and offices;
  - Construction of a grease trap waste pre-treatment facility (with a designated treatment capacity of about 200,000 tonnes per annum);
  - Construction of a wastewater treatment plant (with a designed treatment capacity of about 170,000 m3 per annum);
  - Installation of biodiesel production and glycerine purification system;
  - Construction of product storage and ancillary facilities;
  - Pretreatment of grease trap waste;
  - Treatment of wastewater generated from feedstock pre-treatment and glycerine dewatering process, and filtrates from dewatering process of sludge treatment;
  - Transesterification of feedstock with alcohol-catalyst; and
  - Purification of biodiesel.
  - 1.3 The general layout of the Project is shown in **Figure 1.1.**
  - 1.4 An Environmental Permit (EP) No. EP-319/2009 and EP-319/2009/A was issued on 11 March 2009 and 7 April 2009 respectively for Development of a Biodiesel Plant at Tseung Kwan O Industrial Estate to ASB Biodiesel (Hong Kong) Limited as the Permit Holder.
  - 1.5 Cinotech Consultants Limited was commissioned by ASB Biodiesel (Hong Kong) Limited to undertake the Environmental Monitoring and Audit (EM&A) works for the Project. China Harbour Engineering Company Limited is the Managing Contractor of the Project. This is the 5<sup>th</sup> Quarterly EM&A Summary Report summarizing the EM&A works for the Project in from June 2010 to August 2010.

#### **Project Organizations**

- 1.6 Different parties with different levels of involvement in the project organization include:
  - Project Proponent ASB Biodiesel (Hong Kong) Limited
  - Contractor China Harbour Engineering Company Limited (CHEC)
  - Environmental Team (ET) Cinotech Consultants Limited
  - Independent Environmental Checker (IEC) Mannings (Asia) Consultants Ltd.
- 1.7 The responsibilities of respective parties are detailed in Section 1.10 of the Final EM&A Manual of the Project. The contact details of the project organisation are shown in Appendix A

#### **Construction Programme**

- 1.8 The construction programme is presented in **Appendix B**. The site activities undertaken in the reporting quarter were:
  - Structural Steel Works, including material transportation, assembling, welding jointing;
  - General site cleaning and tidying; and
  - Taking measures for preventing mosquito breeding.

#### Summary of EM&A Requirements

- 1.9 The EM&A requirements are described in the following sections, including:
  - Environmental mitigation measures, as recommended in the project EIA study final report; and
  - Environmental requirements in contract documents.
- 1.10 The advice on the implementation status of environmental protection and pollution control/mitigation measures is summarized in Section 2 of this report.

#### 2 ENVIRONMENTAL AUDIT

#### **Site Audits**

- 2.1 Site audit was carried out by ET on monthly basis to monitor the timely implementation of proper environmental management practices and mitigation measures in the Project site. The summaries of site audits are attached in **Appendix C**.
- 2.2 Site audits were conducted on 21<sup>st</sup> June 2010, 19<sup>th</sup> July 2010 and 23<sup>rd</sup> August 2010 by ET in the reporting quarter. No non-compliance was observed during the site audits. The observations and recommendations made during the audit sessions are summarized in **Table II**.

 Table II
 Observations and Recommendations of Site Audit

Parameters	Date	<b>Observations and Recommendations</b>	Follow-up
Water Quality	21-06-10	Reminder Improperly stored and labelled chemical containers were observed. The Contractor was reminded to provide proper storage and label for them.	Rectification photo was received from The Contractor on 9/07/2010.

#### Status of Environmental Licensing and Permitting

2.3 All permits/licenses obtained for the Project are summarized in Appendix D

#### **Implementation Status of Environmental Mitigation Measures**

2.4 According to the EIA Study Report, Environmental Permit and the EM&A Manual of the Project, the mitigation measures detailed in the documents are recommended to be implemented during the construction phase. An updated summary of the EMIS is provided in **Appendix E**.

#### **Summary of Complaint and Prosecution**

- 2.5 No environmental related complaint, prosecution or notification of summons was received in the reporting quarter.
- 2.6 There was no environmental complaint, prosecution or notification of summons received since the Project commencement. The Complaint Log is attached in **Appendix F**.

#### **3** CONCLUSIONS AND RECOMMENDATIONS

#### **Key Issues for the Coming Month**

- 3.1 Key issues to be considered in the coming quarter include:
  - Noise from operation of the equipment and machinery on-site;
  - Effluent discharge generated from surface runoff;
  - Dust generated from excavation works and stockpile of dusty materials;
  - Maintenance of de-silting facilities and drainage system, such as U-channels;
  - Storage of chemicals/fuel and chemical waste/waste oil on site;
  - Accumulation of stagnant water in the site areas; and
  - Accumulation of C&D waste and general waste on site.

#### Conclusions

- 3.2 Environmental audit works were conducted in the reporting quarter. Site inspections were conducted on a monthly basis. The results were reviewed and checked.
- 3.3 There was no environmental complaint, prosecution or notification of summons received.

#### Recommendations

3.4 According to the environmental audit performed in the reporting quarter, the following recommendations were made:

#### Water Impact

- To identify any wastewater discharges from site.
- To ensure properly maintenance for de-silting facilities.
- To clear the silt and sediment in the sedimentation tanks.
- To review the capacity of de-silting facilities for discharge.
- To divert all the water generated from construction site to de-silting facilities with enough handling capacity before discharge.
- To avoid accumulation of stagnant and ponding water on site.

#### **Dust Impact**

- To remove fugitive dusty material on the haul road periodically.
- Excavated dusty materials or stockpile of dusty materials should be covered by impervious sheeting, or sprayed with water so as to maintain entire surface wet.

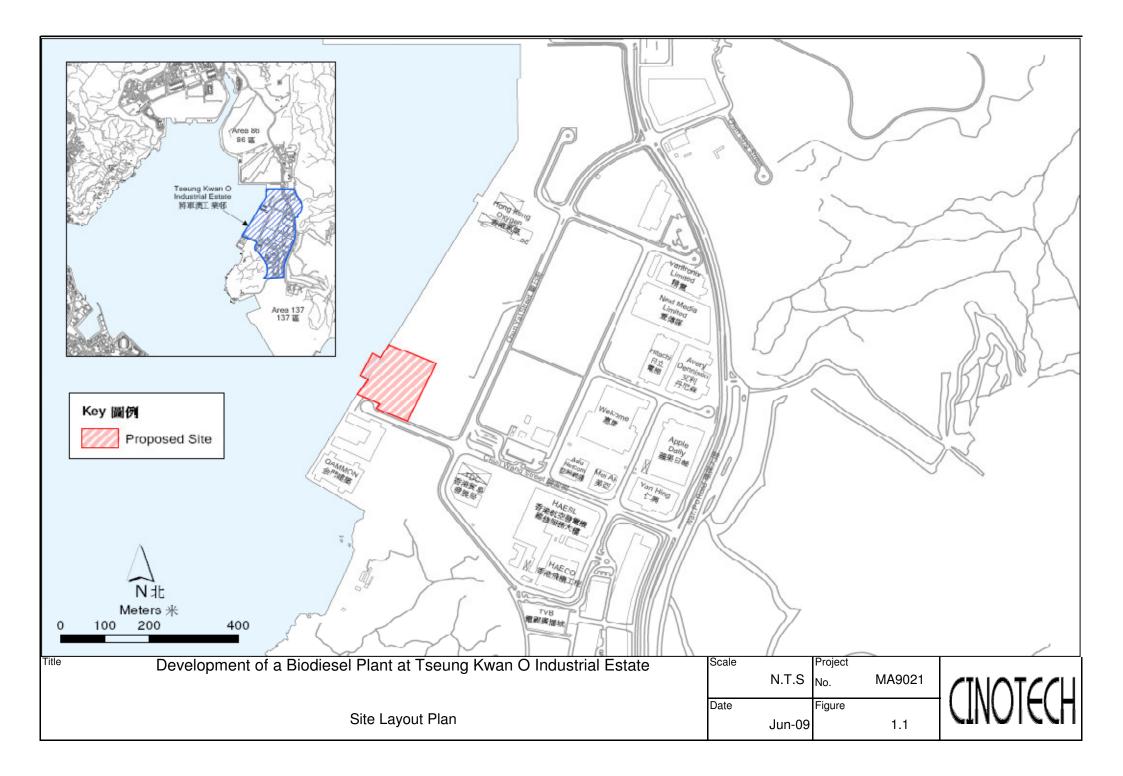

#### Noise Impact

- To space out noisy equipment and position as far away as possible from sensitive receivers.
- To inspect the noise sources inside the site.

#### Waste / Chemical Management

- To provide proper rubbish bins / skips for waste collection.
- To provide proper storage area for oil container on site.
- To avoid and check for any accumulation of waste materials or rubbish on site.
- To avoid any discharge or accidental spillage of chemical waste or oil directly from the equipment.

APPENDIX C SUMMARY OF SITE AUDITS

#### Monthly Site Inspection Record Summary

Inspection Information	
Checklist Reference Number	000621
Date	21 June 2010 (Monday)
Time	15:30 - 16:30

Ref. No.	Non-Compliance	Related Item No.
*	None	-

Ref. No.	Remarks/Observations	Related Item No.
· · ·	A. Water Quality	
	No environmental deficiency was identified during site inspection.	
	B. Air Quality	
	• No environmental deficiency was identified during site inspection.	
	C. Noise	
	• No environmental deficiency was identified during site inspection.	
	D. Waste / Chemical Management	
	Reminder	
000621-R01	• Improperly stored and labeled chemical containers were observed. The	E 2i
	Contractor was reminded to provide proper storage and label for them.	
	E. Permit / Licenses	
	<ul> <li>No environmental deficiency was identified during site inspection.</li> </ul>	
	F. Reminders	
	• No environmental deficiency was identified during site inspection.	
	G. Others	
	• Follow-up on previous audit section (Ref. No.:000524), all environmental	
	deficiencies were improved/rectified by contractor.

APPENDIX D PERMITS AND LICENSES

## Appendix D - Summary of Environmental Licensing and Permit Status

Permit / License No.	Valid	Period	- Details	Status
Fernint / License No.	From	То	Details	Status
Environmental Permit (El	P)	·	·	
EP-319/2009/A	07/04/2009	N/A	Construction and operation of	Valid
			(i) a biochemical plant with a storage capacity of more than 500 tonnes and in which substances are processed and produced;	
			(ii) a storage, transfer and tran- shipment of oil facility with a storage capacity of not less than 1,000 tonnes; and	
			<ul><li>(iii) a dangerous goods godown with a storage capacity exceeding 500 tonnes</li></ul>	
Registration of Chemical Wa	ste Producer			
WPN-5113-839-C1186-15	12/06/2009	-	Spent Lubrication oil.	Valid
Construction Noise Permit (	CNP)	I	11	
GW-RE0561-09	10/12/2009	26/11/2010	Use of Powered Mechanical Equipment during 0000-2400 hours on general holidays (including Sundays), 0000-0700 hours on any day not being a general holiday.	Valid
Wastewater Discharge Licen	se			
WT00004508-2009	07/09/2009	-	-	Valid

APPENDIX E UPDATED ENVIRONMENTAL MITIGATION IMPLEMENTATION SCHEDULE

Types of Impacts	Mitigation Measures	Status
Construction	<ul> <li>Dust control measures such as water spaying on roads and dusty areas, covering of lorries by impervious sheets and controlling of the falling height of fill materials will be implemented;</li> <li>Effective dust screens, sheeting or netting will be provided to enclose the scaffolding from the ground level of the facility during the building construction;</li> <li>All debris and materials will be covered or stored in a sheltered debris collection area;</li> <li>Hoarding from ground level will be provided along the entire length of the site boundary except for a site entrance or exit;</li> </ul>	^ N/A ^
Dust	<ul> <li>Every stockpile of dusty materials will be covered entirely by impermeable sheeting or placed in an area sheltered on the top and the 3 sides;</li> <li>Regular maintenance and checking of the diesel powered mechanical equipment will be adopted to avoid any black smoke emissions and to minimize gaseous emissions.</li> <li>Monthly site audits will be conducted to ensure the implementation of suitable dust control measures and good site practices.</li> </ul>	
Construction Noise	<ul> <li>Only well-maintained plant will be operated on-site and plant will be serviced regularly during the construction program;</li> <li>Silencers or mufflers on construction equipment will be utilized and will be properly maintained during the construction program;</li> <li>Mobile plant, if any, will be sited as far from NSRs as possible;</li> <li>Machines and plant (such as trucks) that may be in intermittent use will be shut down between work periods or will be throttled down to a minimum;</li> <li>Plant known to emit noise strongly in one direction will, wherever possible, be orientated so that the noise is directed away from the nearby NSRs; and</li> <li>Material stockpiles and other structures will be effectively utilised, wherever practicable, in screening noise from onsite construction activities.</li> </ul>	

## Appendix E - Summary of Environmental Mitigation Implementation Schedule (Construction Phase)

Types of Impacts	Mitigation Measures	Status
	<ul> <li><u>Piling Activities</u></li> <li>Silt curtain will be installed around the marine piling area to contain any suspended mud and sediments generated during the piling works. Silt removal facilities such as silt traps or sedimentation facilities will be provided to remove silt particles from groundwater (if pumping is required) to meet the requirements of the TM standard under the WPCO. The design of silt removal facilities will be based on the guidelines provided in ProPECC PN 1/94. All drainage facilities and erosion and sediment control structures will be inspected monthly and maintained to ensure proper and efficient operation at all times and particularly during rainstorms.</li> <li><u>Construction Site Run-off and Drainage</u></li> </ul>	N/A
Water Quality	<ul> <li>Silt removal facilities such as silt traps or sedimentation facilities will be provided to remove silt particles from runoff to meet the requirements of the TM standard under the WPCO. The design of silt removal facilities will be based on the guidelines provided in ProPECC PN 1/94. All drainage facilities and erosion and sediment control structures will be inspected monthly and maintained to ensure proper and efficient operation at all times and particularly during rainstorms.</li> <li>Careful programming of the works to minimise surface excavations for the construction works during the wet season. If excavation of soil cannot be avoided during the wet season, exposed slope surfaces will be covered by a tarpaulin or other</li> </ul>	^
	<ul> <li>excavation of soli calliot be avoided during the wet season, exposed slope surfaces will be covered by a tarpatin of other means. Other measures that need to be implemented before, during, and after rainstorms are summarised in ProPECC PN 1/94.</li> <li>Exposed soil surfaces will be protected by paving or fill material as soon as possible to reduce the potential of soil erosion.</li> <li>Open stockpiles of construction materials or construction wastes on-site of more than 50m3 will be covered with tarpaulin or similar fabric during rainstorms. These materials will not be placed near the seawall area.</li> </ul>	^
	<ul> <li><u>General Construction Activities</u></li> <li>Debris and refuse generated on-site will be collected, handled and disposed of properly to avoid entering the nearby water sensitive receivers (WSRs). Stockpiles of cement and other construction materials will be kept covered when not being used.</li> <li>Oils and fuels will only be used and stored in designated areas which have pollution prevention facilities. All fuel tanks and storage areas will be provided with locks and be sited on sealed areas, within bunds of a capacity equal to 110% of the storage capacity of the largest tank. The bund will be drained of rainwater after a rain event.</li> </ul>	^

Types of Impacts	Mitigation Measures			
	Sewage generated from On-site Workforce			
	<ul> <li>Temporary sanitary facilities, such as portable chemical toilets, will be provided on-site. A specialised contractor will be responsible for regular collection and appropriate disposal of the sewage and maintenance of these facilities.</li> <li>Monthly site inspections will be carried out during construction to ensure that the mitigation measures listed above are properly implemented. The site audit frequency will be increased to weekly intervals during the piling works.</li> </ul>	N/A		
Ecology	• Mitigation measures for minimising water quality impacts are presented in detail above. These measures will be properly implemented and good construction practices will be adopted to minimise potential adverse impacts to marine ecological resources.	^		

Remarks: ^

- Compliance of mitigation measure; X Non-compliance of mitigation measure;
   N/A Not Applicable at this stage; Non-compliance but rectified by the contractor;
   Recommendation was made during site audit but improved/rectified by the contractor;
   # Non-compliance but rectified/improved by the contractor and awaiting IEC's further comment.

APPENDIX F COMPLAINT LOG

#### **APPENDIX F – COMPLAINT LOG**

**Reporting Quarter**: June 2010 to August 2010

Log Ref.	Location	Received Date	Details of Complaint	Investigation/Mitigation Action	Status
N/A	N/A	N/A	N/A	N/A	N/A

**Remarks**: No environmental complaint was received in the reporting quarter.
