LIST OF APPENDICES

EXECUTIVE SUMMARY

Introduction

1. This is the 3rd Monthly Environmental Monitoring and Audit (EM&A) Report prepared by Cinotech Consultants Limited for CEDD Contract no. CV/2012/01 "Sediment Removal at Yim Tin Tsai (East) Fish Culture Zone". This report documents the findings of EM&A Works conducted in January 2014.

2. The major site activities undertaken in the reporting month included:

- Daily cleaning and weekly tidying;
- Removing seabed sediments;
- Relocation of the outstanding fish raft and anchors;
- Bird and coral monitoring; and
- Water Quality Monitoring.

Environmental Monitoring and Audit Works

3. Environmental monitoring and audit works for the Project were performed regularly as stipulated in the Environmental Monitoring and Audit Requirements in Project Profile and the results were checked and reviewed. The implementation of the environmental mitigation measures, Event Action Plans and environmental complaint handling procedures were also checked.

4. Summary of the events and action taken in the reporting month is tabulated in **Table I**.

Table I Summary Table for Non-compliance Recorded in the Reporting Month

Media/ Nature	No. of Exceedances		Action Taken	Results of action taken	Remarks
	Action Level	Limit Level			
Water Quality					
DO (S+M)	0	0	N/A	N/A	N/A
DO (B)	0	0			
Turbidity	0	0			
SS	0	0			
Copper	0	0			
Zinc	0	0			
Arsenic	0	0			
Lead	0	0			
Coral Quality					
Mortality (%)	0	0	N/A	N/A	N/A
Sediment cover (%)	0	0			
Bleaching (%)	0	0			

* (S), (M) and (B) represent depths of water, such as Surface (1 metre below surface), Middle (mid-water depth) and Bottom (1 metre above seabed).

Water Quality

5. All water quality monitoring was conducted as scheduled in the reporting month. No Action/Limit Level exceedance was recorded.

6. No Action/Limit Level exceedance was recorded at the impact monitoring stations in the reporting month.

Coral Quality

7. All coral quality monitoring was conducted as scheduled in the reporting month. Level of sedimentation, bleaching and mortality on corals were monitored in accordance with the approved Proposal for Coral Monitoring.

8. No Action/Limit Level exceedance was recorded at the impact monitoring stations in the reporting month.

Ardeids & White-bellied Sea Eagles Monitoring

9. Ardeids & White-bellied Sea Eagles monitoring were conducted as scheduled in the reporting month.

Environmental Licenses and Permits

10. Environmental related licenses/permits granted to the Project include the Environmental Permit (EP) for the Project.

Key Information in the Reporting Month

11. Summary of key information in this reporting month is tabulated in **Table II**.

Table II Summary Table for Key Information in the Reporting Month

Event	Event Details		Action Taken	Status	Remark
	Number	Nature			
Complaint received	0	---	N/A	N/A	---
Changes to the assumptions and key construction / operation activities recorded	0	---	N/A	N/A	---
Status of submissions under EP	1	2nd Monthly EM&A Report (EP Condition 2.8)	Submitted to EPD on 13th January 2014	N/A	---
Notifications of any summons & prosecutions	0	---	N/A	N/A	---

Future Key Issues

12. Major site activities for the coming two months will include:

- Daily cleaning and weekly tidying;
- Removing seabed sediments;
- Relocation of the outstanding fish raft and anchors;

- Bird and coral monitoring; and
- Water Quality Monitoring.

13. The future environmental concerns are water quality, coral quality and impacts on ecology.

1. INTRODUCTION

Background

1.1 A priority list for removing sediments at the 26 Fish Culture Zones (FCZs) in Hong Kong (HK) had been prepared by the Agriculture, Fisheries and Conservation Department (AFCD). Civil Engineering and Development Department (CEDD) and AFCD consulted marine culturists' representatives on this list in May 2007. The representatives supported the government to carry out the sediment removal at the top five priority FCZs. Yim Yin Tsai (East) Fish Culture Zone was selected as one of them for improvement to the fish farming environment.

1.2 The works "Sediment Removal at Yim Tin Tsai (East) Fish Culture Zone" under Contract No. CV/2012/01 (hereinafter called the "Project") was awarded to Zhen Hua Engineering Company Limited (hereinafter called the "Contractor") by the Civil Engineering and Development Department (CEDD) of the Hong Kong Special Administrative Region (HKSAR).

1.3 Cinotech Consultants Ltd. (CINOTECH) was employed by the Contractor to serve as the Environmental Team (ET) to undertake the environmental monitoring services for the Project. Dr. Priscilla CHOY of Cinotech Consultants Ltd. was appointed as the ET Leader as per the Condition 2.1 of the EP. This is the 3rd monthly EM&A report summarizing the EM&A works for the Project in January 2014.

Project Organizations

1.4 Different parties with different levels of involvement in the project organization include:

- Project Proponent / Engineer's Representative (ER) – Civil Engineering and Development Department (CEDD)
- Environmental Team (ET) – Cinotech Consultants Ltd.
- Independent Environmental Checker (IEC) – Ove Arup & Partners Hong Kong Ltd.
- Contractor – Zhen Hua Engineering Co., Ltd. (Zhen Hua)

1.5 The Project Organization during Construction Phase is listed in Table 1.1.

Table 1.1 Key Project Contacts

Party	Role	Name	Position	Phone No.	Fax No.
CEDD	Project Proponent	Mr. Walter Wong	Engineer Representative	2762 5584	2762 4015
Cinotech	Environmental Team	Dr. Priscilla Choy	ET Leader	2151 2089	3107 1388
		Ms. Ivy Tam	Project Coordinator and Audit Team Leader	2151 2090	
		Mr. Tang Wing Kwai	Monitoring Team Leader	2151 2073	
Ove Arup	Independent Environmental Checker	Mr. Thomas Chan	Independent Environmental Checker	2268 3093	2268 3950
Zhen Hua	Contractor	Mr. Y F Cho	Senior Project Manager	2727 0128	2512 0427
		Mr. C K Li	Site Agent		

Construction Programme

1.6 The site activities undertaken in the reporting month were:

- Daily cleaning and weekly tidying;
- Removing seabed sediments;
- Relocation of the outstanding fish raft and anchors;
- Bird and coral monitoring; and
- Water Quality Monitoring.

Summary of EM&A Requirements

1.7 The EM&A programme requires construction phase water quality monitoring and coral monitoring as well as environmental site audits. The EM&A requirements are described in the following sections, including:

- All monitoring parameters;
- Action and Limit levels for all environmental parameters;
- Event / Action Plans;
- Environmental mitigation measures, as recommended in the project EIA study final report; and
- Environmental requirements in contract documents.

1.8 As set out in Specific Conditions 2.7 of the EP for this Project, a monitoring programme on ardeids and White-bellied Sea Eagles nesting at Yeung Chau was submitted and approved by the Authority. The monitoring programme will commence when the relocation of fish rafts begins until completion of subsequent relocation of fish raft to the original Fish Culture Zone after dredging.

1.9 The advice on the implementation status of environmental protection and pollution control/mitigation measures is summarized in Section 7 of this report.

1.10 This report presents the monitoring results, observations, locations, equipment, period, methodology and QA/QC procedures of the required monitoring parameters, namely water quality, coral quality and bird counts as well as audit works for the Project in the reporting month.

2. WATER QUALITY

Monitoring Requirements

General

2.1 Impact water quality monitoring shall be conducted three times per week at all the designated monitoring stations during the period of dredging. Monitoring took place two times per monitoring day during mid ebb and mid flood tides at three depths (1 meter from surface, mid depth and 1 meter from the bottom). If the water depth is less than 6m, the mid-depth measurement may be omitted. If the depth is less than 3m, only the mid-depth measurements need to be taken.

2.2 Duplicate *in-situ* measurements (Dissolved oxygen (DO) concentration, DO saturation, turbidity, pH, temperature and salinity) and one water sample at each depth (suspended solids (SS) and metals) shall be monitored in accordance with the requirements set out in the Project Profile.

2.3 For selection of tides for *in-situ* measurement and water sampling, tidal range of individual flood and ebb tides shall not be less than 0.5m.

2.4 Other relevant data shall also be recorded, such as monitoring location / position, time, water depth, sampling depth, tidal stages, weather conditions and any special phenomena or work underway nearby.

2.5 Water quality monitoring shall be conducted in accordance with the approved Proposal for Water Quality Monitoring. Action/Limit Levels for the environmental monitoring works are shown in **Appendix A**.

Monitoring Locations

2.6 The monitoring stations for water quality monitoring are shown in **Figure 2**. **Table 2.1** summarizes the water quality monitoring stations for the Project.

Table 2.1 Water Quality Monitoring Stations

Stations	Marine Water Quality Stations	Coordinates	
		Easting	Northing
F4	Relocation site for Yim Tin Tsai FCZ	840174	833468
F5	Temporary Fish Raft Relocation site for Yim Tin Tsai East FCZ	840303	835819
F6		843004	835347
F7	Existing Yim Tin Tsai FCZ	839720	834870
F8	Existing Yim Tin Tsai East FCZ	840871	835101
G2	Gradient Station	839760	834165
G3	Gradient Station	840637	835503
G4	Gradient Station	842184	835872

Monitoring Equipment

2.7 For in-situ monitoring, a multi-parameter meter (Model YSI 6820 C-M / YSI 6920-M) was used to measure DO, DO saturation, pH, turbidity, salinity and temperature. A sampler was used to collect water samples for laboratory analysis of SS and metal levels.

Dissolved Oxygen (DO) and Temperature Measuring Equipment

2.8 The instrument for measuring dissolved oxygen and temperature was portable and weatherproof complete with cable, sensor, comprehensive operation manuals and use DC power source. It was capable of measuring:

- a dissolved oxygen level in the range of 0-20 mg/L and 0-200% saturation; and
- a temperature of 0-45 degree Celsius.

2.9 It has a membrane electrode with automatic temperature compensation complete with a cable.

2.10 Sufficient stocks of spare electrodes and cables were available for replacement where necessary.

2.11 Salinity compensation was built-in in the DO equipment.

Turbidity

2.12 Turbidity was measured *in situ* by the nephelometric method. The instrument was portable and weatherproof using a DC power source complete with cable, sensor and comprehensive operation manuals. The equipment was capable of measuring turbidity between 0-1000 NTU. The probe cable was not less than 25m in length.

Salinity

2.13 A portable salinometer capable of recording salinity within the range of 0-40 ppt was used for salinity measurements.

pH

2.14 The instrument was consisting of a potentiometer, a glass electrode, a reference electrode and a temperature-compensating device. It was readable to 0.1pH in a range of 0 to 14. Standard buffer solutions of at least pH 7 and pH 10 were used for calibration of the instrument before and after use.

Water Depth Detector

2.15 A portable, battery-operated echo sounder was used for the determination of water depth at each designated monitoring station.

Water Sampler

2.16 A water sampler, consisting of a transparent PVC cylinder of a capacity of not less that two litres which can be effectively sealed with cups at both ends was used. The water sampler should have a positive latching system to keep it open and prevent premature closure until released by a messenger when the sampler was at the selected water depth.

Monitoring Position Equipment

2.17 A hand held Global Positioning System (GPS) was used to ensure that the correction location has been selected prior to sample collection.

Sample Container and Storage

2.18 Following collection, water samples for laboratory analysis were stored in high density polythene bottles, packed in ice (cooled to 4°C without being frozen) and delivered to the HOKLAS accredited laboratory and analyzed as soon as possible after collection. Sufficient volume of samples was collected to achieve the detection limit.

Calibration of In Situ Instruments

2.19 All *in situ* monitoring instruments were checked, calibrated and certified by a laboratory accredited under HOKLAS or other international accreditation scheme before use, and subsequently re-calibrated at 3 monthly intervals throughout all stages of the water quality monitoring.

2.20 For the on-site calibration of field equipment, the BS 1427:1993, "Guide to Field and on-site test methods for the analysis of waters" was observed.

2.21 Before each round of monitoring, a zero check in distilled water was performed with the turbidity probe of YSI 6820-C-M / YSI 6920-M. The probe was then be calibrated with a solution of known NTU.

2.22 Sufficient stocks of spare parts were maintained for replacements when necessary. Backup monitoring equipment was also being made available so that monitoring can proceed uninterrupted even when some equipment is under maintenance, calibration, etc.

2.23 **Table 2.2** summarizes the equipment used in the water quality monitoring program. Copies of the calibration certificates of the equipment are shown in **Appendix L**.

Table 2.2 Water Quality Monitoring Equipment

Equipment	Model and Make	Qty.
Water Sampler	Kahlsico Water-Bottle Model 135DW 150	1
Multi-parameter Water Quality System	YSI 6820-C-M	2
Monitoring Position Equipment	"Magellan" Handheld GPS Model GPS-320	1
Water Depth Detector	Fishfinder 140	1

Monitoring Parameters and Frequency

2.24 Table 2.3 summarizes the monitoring parameters, monitoring period and frequencies of the impact water quality monitoring.

Table 2.3 Impact Water Quality Monitoring Parameters and Frequency

Station	Key Parameters	Frequency Note 1	Depth	No. of samples events
F4 F5 F6 F7 F8 G2 G3 G4	*In-situ*: Dissolved oxygen (DO) concentration, DO saturation, turbidity, pH, temperature and salinity Laboratory Testing: Suspended Solids (SS), Copper (Cu), Lead (Pb), Zinc (Zn) and Arsenic (As)	3 times per week (each series of sampling / measurement should not be less than 36 hours)	• 3 water depths: 1m below water surface, mid-depth and 1m above sea bed. • If the water depth is less than 3m, mid-depth sampling only. • If the water depth is less than 6m, omit mid-depth sampling.	2 per monitoring day (1 for mid-ebb and 1 for mid-flood)

Notes:
1. For selection of tides for *in-situ* measurement and water sampling, tidal range of individual flood and ebb tides should be not less than 0.5m.

2.25 Monitoring location/position, time, water depth, sampling depth, pH, salinity, DO saturation, water temperature, tidal stages, weather conditions and any special phenomena or work underway nearby were recorded.

Monitoring Methodology

2.26 The monitoring stations were accessed using survey boat to within 3 m by the guide of a hand-held Global Positioning System (GPS). The depth of the monitoring location was measured using depth meter in order to determine the sampling depths. Afterwards, the probes of the in-situ measurement equipment was lowered to the predetermined depths (1 m below water surface, mid-depth and 1 m above seabed) and the measurements was carried out accordingly. The in-situ measurements at predetermined depths wascarried out in duplicate. In case the difference in the duplicate in-situ measurement results was larger than 25%, the third set of in-situ measurement would be carried out for result confirmation purpose.

2.27 Water sampler was lowered into the water to the required depths of sampling. Upon reaching the pre-determined depth, a messenger to activate the sampler was then released to travel down the wire. The water sample was sealed within the sampler before retrieving. At each station, water samples for SS and metals at three depths (1 m below water surface, mid-depth and 1 m above seabed) were collected accordingly. Water samples were stored in a cool box and kept at less than 4°C but without frozen and sent to the laboratory as soon as possible.

Laboratory Analytical Methods

2.28 The testing of all parameters were conducted by Wellab Ltd. (HOKLAS Registration No.083) and comprehensive quality assurance and control procedures in place in order to ensure quality and consistency in results. The testing method and limit of reporting are provided in **Table 2.4**.

Table 2.4 Methods for Laboratory Analysis for Water Samples

Parameters (Unit)	Proposed Method	Reporting Limit
SS (mg/L)	APHA 17e 2540 D	0.5 (See Note 1)
Copper (μg/L)	In-house method SOP 076 (ICP-MS)	1
Zinc (μg/L)		2
Arsenic (μg/L)		1
Lead (μg/L)		1

Note:
1) Limit of Reporting is reported as Detection Limit for non-HOKLAS report.
2) The testing for the parameters in the table are HOKLAS accredited

QA/QC Requirements

Decontamination Procedures

2.29 Water sampling equipment used during the course of the monitoring programme was decontaminated by manual washing and rinsed clean seawater/distilled water after each sampling event. All disposal equipment was discarded after sampling.

Sampling Management and Supervision

2.30 Water samples were dispatched to the testing laboratory for analysis as soon as possible after the sampling. All samples were stored in a cool box and kept at less than 4°C but without frozen. All water samples were handled under chain of custody protocols and relinquished to the laboratory representatives at locations specified by the laboratory.

Results and Observation

Results

2.31 The established Action/Limit Levels for the water quality monitoring works for the project based on the baseline water quality monitoring results is presented in **Appendix A.**

2.32 All water quality monitoring was conducted as scheduled in the reporting month. No Action/Limit Level exceedance was recorded. The monitoring data and graphical presentations of water quality monitoring results are shown in **Appendix M and Appendix N** respectively.

2.33 No special phenomena near the monitoring stations were observed which might affect the monitoring results during the monitoring works.

2.34 The laboratory testing report and QC report are provided in **Appendix O and Appendix P respectively**.

Event and Action Plan

2.35 If there is Action / Limit Level exceedance in any parameters of the water quality, the actions in accordance with the Event and Action Plan as shown in **Appendix C** will be carried out.

3. CORAL MONITORING

Monitoring Requirement

3.1 Impact Monitoring Survey is required to determine whether impacts are occurring on the tagged corals during the construction phase. A particular focus of the Impact Monitoring will be the effects of sedimentation, bleaching and mortality on corals.

3.2 All monitoring surveys were conducted by a qualified marine biologist with specialist knowledge of corals and sound experience at identifying corals in the field.

3.3 According to Section 3.3.3 of Annex G – "Environmental Monitoring and Audit Requirements" of the Project Profile, the coral monitoring programme shall comprise a baseline survey (prior to the dredging work), impact monitoring surveys (during the dredging period) and a post-project monitoring survey (after completion all the dredging works). In addition, the corals should be monitored twice a month during the first 2 months of the construction works in accordance with approved Proposal for Coral Monitoring.

Monitoring Locations

3.4 The locations plan of the impact coral monitoring stations is shown in **Figure 3**. The summary for impact coral monitoring stations is shown in **Table 3.1**.

Table 3.1 Summary of Coral Monitoring Stations

Monitoring	Nature of Monitoring Station	Monitoring ID and Location
Impact Monitoring	Impact Coral Monitoring Station	T2 – North of Shuen Wan Typhoon Shelter
		T3 – Southeast of Shuen Wan Typhoon Shelter
	Impact Coral Control Station	Site C –Whitehead Peninsula

Monitoring Frequency and Methodology

3.5 For regular Impact Monitoring Survey, the tagged corals were monitored twice a month during the first 2 months of the construction works. If there is no exceedance recorded, the monitoring frequency will be adjusted to monthly during the rest of the construction phase.

3.6 During the Impact Monitoring Surveys, the health status of each tagged coral colony was recorded, including percentage cover (%) of (1) sedimentation; (2) bleaching and (3) mortality.

3.7 The condition of each tagged coral colony was recorded by taking a photograph from an angle and distance that best represents the entire colony.

3.8 The results of the Impact Monitoring Surveys were reviewed with reference to the findings of the Baseline Monitoring Survey and the data collected from the reference

site (i.e. Site C) during the Impact Monitoring Survey.

Results and Observations

3.9 Impact Coral Monitoring Survey has been conducted at two Impact Sites (Site T2 and T3) at Yam Tin Tsai and one Control Site (Site C) at Whitehead Peninsula which is away (>2km) from the area of construction work on 14 and 28 December 2013.

3.10 The locations of the survey sites are shown in **Figure 3**, and the coordinates of the start and end points and survey conditions are shown in **Table 3.2**.

Table 3.2 Locations and Physical attributes of Sites for Dive Survey (T2, T3 and Site C)

Sites	GPS Coordinates		Depth (m)	Visibility (m)	Substrate type	Weather	Tidal Condition	Sedimentation on Hard Substrate? (mm thickness)
4 January 2014

	End	N 22º26.139' E 114º14.210'						

3.11 All coral quality monitoring was conducted as scheduled in the reporting month. The monitoring coral quality monitoring results including the code, species name, area, percentage of sedimentation level, bleaching and mortality of the tagged coral colonies at each site are summarized in **Appendix D**. The photo records of coral quality surveys for the reporting month are shown in **Appendix E**. The survey team had tried to take photographs of the corals from an angle and distance that best represented the colonies but difficulties sometimes occurred as a result of low water visibility during the surveys.

3.12 Coral monitoring results were evaluated against Action and Limit Levels (**Appendix A**) and summarized in **Table 3.3**. Evaluation based on recorded changes in the percentages of partial mortality, sediment cover, and bleaching of the tagged corals.

Table 3.3 Evaluation of Monitoring Results against Action and Limit Level for Coral Monitoring Surveys.

7th Coral Monitoring Survey on 4 January 2014						
Exceedance / Site	Sedimentation		Bleaching		Mortality	
	Action Level	Limit Level	Action Level	Limit Level	Action Level	Limit Level
Site C	No	No	No	No	No	No
Site T2	No	No	No	No	No	No
Site T3	No	No	No	No	No	No
8th Coral Monitoring Survey on 11 January 2014						
Exceedance / Site	Sedimentation		Bleaching		Mortality	
	Action Level	Limit Level	Action Level	Limit Level	Action Level	Limit Level
Site C	No	No	No	No	No	No
Site T2	No	No	No	No	No	No
Site T3	No	No	No	No	No	No

Note: Definition of Action/Limit levels are listed in Appendix A. "No" indicates NO exceedance.

3.13 Overall, the healthy status of the tagged coral colonies was normal, with usual level of sedimentation. No action/limit level of mortality was exceeded in the monitoring survey conducted in January 2014.

Summary of Coral Monitoring Results

4 January 2014

- Site C (Reference site)

3.14 Sedimentation cover on the coral colonies ranged from 0 to 10%, with thickness ~2 to 4mm. When compared with baseline data in August 2013, increased sedimentation cover was recorded on 9 colonies (C1, C2, C4, C5, C6, C7, C8, C9 and C10) by 5 to 10%. No cover of bleaching or mortality was recorded.

- Site T2

3.15 Sedimentation cover on the coral colonies ranged from 0 to 10%, with thickness ~2mm. When compared with baseline data in August 2013, increased sedimentation cover was recorded on 3 colonies (A4, A7 and A8) by 5%. No cover of bleaching or mortality was recorded.

- Site T3

3.16 Sedimentation cover ranged from 0 to 5%, with thickness ~2mm. When compared with baseline data in August 2013, increased sedimentation cover was recorded on 3 colonies (B4, B5 and B9) by 5%. No cover of bleaching or mortality was recorded.

11 January 2014

- Site C (Reference site)

3.17 Sedimentation cover on the coral colonies ranged from 0 to 10%, with thickness ~2mm. When compared with baseline data in August 2013, increased sedimentation cover was recorded on 9 colonies (C1, C2, C4, C5, C6, C7, C8, C9 and C10) by 5 to 10%. No

cover of bleaching or mortality was recorded.

- Site T2

3.18 Sedimentation cover on the coral colonies ranged from 0 to 10%, with thickness ~2mm. When compared with baseline data in August 2013, increased sedimentation cover was recorded on 4 colonies (A1, A2, A3 and A5) by 5%. No cover of bleaching or mortality was recorded.

- Site T3

3.19 Sedimentation cover ranged from 0 to 5%, with thickness ~2mm. When compared with baseline data in August 2013, increased sedimentation cover was recorded on 4 colonies (B3, B4, B5, B9 and B10) by 5%. No cover of bleaching or mortality was recorded.

3.20 In the monitoring surveys conducted on 4 and 11 January 2014, from both Impact Sites T2 and T3 and the Reference Site C, the change in level of sedimentation on the tagged colonies was less than 15% when compared with the baseline data in Aug 2013. As the sedimentation occurred at all sites including the Reference Site C, the small change in sedimentation was likely a natural fluctuation as a result of tidal current, wave, northeast monsoon, disturbance by wave during low tide period, etc. No increment in level of blenching or partial mortality suggested minor adverse effect was observed.

3.21 The data from both monitoring surveys showed no significant enhancement in sedimentation, bleaching or mortality in both Sites T2 and T3 and the Reference Site C. Hence, no adverse impact by the construction activity on the coral community was observed.

Event and Action Plan

3.22 Upon action level being exceeded, appropriate actions should be taken to review the dredging operation and additional measures such as slowing down, or rescheduling of works should be implemented as necessary, with the agreement from the ET and AFCD. Upon limit level being exceeded, the Contractor shall suspend all works affecting the corals until an effective solution is identified. Once the solution has been identified and agreed by the ET and AFCD, construction works affecting seabed may recommence.

4. ARDEIDS AND WHITE-BELLIES SEA EAGLES MONITORING

Monitoring Requirements

4.1 In accordance with the approved monitoring programme under condition 2.7 of Environmental Permit No. EP-419/2011/A, surveys by counts on ardeids and White-bellied Sea Eagles should be conducted to quantify their existence in vicinity of the proposed dredging area and temporary relocation sites for fish rafts as well as to monitor ardeids and White-bellied Sea Eagles nesting at Yeung Chau. Their nests will be monitored if identified. The survey results enable comparison of their populations before, during and after construction works.

4.2 By comparison and evaluation of the survey results, any impact on the target species could be verified.

Monitoring Routes & Locations

4.3 Transect route with some vantage points is shown in **Figure 4**. There are a total of 9 point count locations. The counting vantage points are selected with at least 500m distance with each other to avoid double-counting. The main focus areas of survey are the location of existing fish rafts before and after dredging works and Yeung Chau, where ardeids were observed in the past records.

Monitoring Frequencies & Durations

4.4 The bird count was conducted at monthly intervals since the relocation of fish rafts begins. The survey would be carried out until completion of subsequent relocation of fish raft to the original Fish Culture Zone after dredging. Counts normally started after sunrise and last for 2-3 hours (normally before 10:00). Bird count should be postponed when it is on inclement weather.

Monitoring Methodology

4.5 The target species were surveyed quantitatively by transect count and point count method covering the survey area. Birds heard or seen within the survey area were identified to species and counted. They were counted directly from vantage points or along the edge of a colony with the use of 10x binoculars or by the naked-eye, depending on the proximity between the surveyor and the colony. It is advisable to travel with a pace of 10 km/hr by small boat for transect method, and point count was last for less than or equal to 10 mins for each station. The quantitatively monitoring results were undertaken by experienced bird watchers. Photographic records were taken when possible.

4.6 Furthermore, during each survey (both transect and point counting), nests of ardeids and White-bellied Sea Eagles were counted by tracking the landing locations of the found species at Yeung Chau. Similar to the method mentioned above, active nests, determined by the presence of incubating adults or chicks, were counted directly from vantage points or along the edge of the colony. If they were invisible due to dense vegetation, their landing locations were recorded and repeated landings around the same

location were considered as one nest.

Results & Observations

4.7 Bird counts were conducted on 13 January 2014. The species and number of birds observed, the nature of construction works within works area conducting during the impact monitoring visit were recorded. Also, weather condition and other noticeable activities occurring within the survey area were recorded. The data sheet showing the results was attached in **Appendix J**. The photographic records were attached in **Appendix K**.

4.8 A total of 46 and 1 individuals of Ardeids and White-bellied Sea Eagle were recorded respectively from the transect count and point count locations in the reporting month (**Table 4.1** refers).

Table 4.1 Number of Ardeids and White-bellied Sea Eagle recorded

Data of Survey	Abundance		Total number of birds	Nest of ardeids and White-Bellied Sea Eagles
	Ardeids	White-bellied Sea Eagle		
13 January 2014	46	1	47	1 (1 nest of White-Bellied Sea Eagles)

5. ENVIRONMENTAL AUDIT

Site Audits

5.1 Site audits were carried out by ET to monitor the timely implementation of proper environmental management practices and mitigation measures in the Project site.

5.2 Site audits were conducted by ET on 2, 10, 16, 23 and 27 January 2014. The details of observations during site audit can refer to **Table 5.2**.

Status of Environmental Licensing and Permitting

5.3 All permits/licenses obtained for the Project are summarized in **Table 5.1**.

Table 5.1 Summary of Environmental Licensing and Permit Status

Permit / License No.	Valid Period		Details	Status
	From	To		
Environmental Permit (EP)				
EP-419/2011/A	30/3/2012	N/A	Sediment Removal at Yim Tin Tsai (East) Fish Culture Zone: (a) A dredging operation within a Fish Culture Zone and relocation of existing fish rafts and setting up of temporary sites for the relocated fish rafts; (b) To remove seabed sediments at the Yim Tin Tsai (East) Fish Culture Zone for a depth of 2m.	Valid

Implementation Status of Environmental Mitigation Measures

5.4 According to the EIA Study Report, Environmental Permit and the Project Profile of the Project, the mitigation measures detailed in the documents are recommended to be implemented during the construction phase. A summary of the EMIS is provided in **Appendix G**.

5.5 During site inspection in the reporting month, no non-conformance was identified. The observations and recommendations made during the audit sessions are summarized in **Table 5.2**. The summaries of site audits are attached in **Appendix H**.

Table 5.2 Observations and Recommendations of Site Audit

Parameters	Date	Observations and Recommendations	Follow-up
--	2/1/2014	No environmental deficiency was identified during the site inspection.	N/A
--	10/1/2014	No environmental deficiency was identified during the site inspection.	N/A
--	16/1/2014	No environmental deficiency was identified during the site inspection.	N/A
Waste / Chemical Management	23/1/2014	Reminder: Properly provide chemical labels to oil drums.	The observation was observed to be improved/rectified by the Contractor during the audit session on 27 Jan 2014.
--	27/1/2014	No environmental deficiency was identified during the site inspection.	N/A

Summary of Exceedances

5.6 No exceedance of monitoring results was recorded in the reporting month. Summary of exceedance is provided in **Appendix F**.

Summary of Complaint and Prosecution

5.7 No environmental related complaint, prosecution or notification of summons was received in the reporting month.

5.8 There was no environmental complaint, prosecution or notification of summons received since the Project commencement. The Complaint Log is attached in **Appendix I**.

6. FUTURE KEY ISSUES

6.1 The major construction activities in the coming month will include:

- Daily cleaning and weekly tidying;
- Removing seabed sediments;
- Relocation of the outstanding fish raft and anchors;
- Bird and coral monitoring; and
- Water Quality Monitoring.

Monitoring Schedule for the Next Month

6.2 The tentative environmental monitoring schedule for the next month is shown in **Appendix B**.

7. CONCLUSIONS

Conclusions

7.1 Environmental monitoring and audit works were conducted in the reporting month. Site inspections were conducted on 2, 10, 16, 23 and 27 January 2014. The results were reviewed and checked.

7.2 No exceedance of monitoring results was recorded in the reporting month.

7.3 There was no environmental complaint, prosecution or notification of summons received.

Recommendations

7.4 According to the environmental audit performed in the reporting month and site activities in coming month , the following recommendations were made:

Dust Impact

- To prohibit any open burning on site.
- To regularly maintain the machinery and vessels on site.

Noise Impact

- To inspect the noise sources inside the site.
- To space out noisy equipment and position the equipment as far away as possible from sensitive receivers.

Water Impact

- To identify any wastewater discharges from site.
- To provide silt curtain surrounding the dredging works.
- To check the holding tank should be fitted with a tight fitting seal.
- To ensure the excavator grab seal is tightly closed.

Waste/Chemical Management

- To check for any accumulation of waste materials or rubbish on site.
- To avoid any discharge or accidental spillage of chemical waste or oil directly from the site.
- To avoid improper handling or storage of oil drum on site.

Ecology

- To provide silt curtain, checked and maintenance throughout the construction period

APPENDIX A
ACTION AND LIMIT LEVELS

Appendix A

Guidelines for Establishment of Action and Limit Levels

Parameter (unit)	Action Level	Limit Level
DO in mg/L (See Note 1)	**For Stations F4 and F7** Surface or Mid-Depth 5 percentile of baseline surface / mid-depth data or <4mg/L Bottom 5 percentile of baseline bottom data or <2mg/L	**For Stations F4 and F7** Surface or Mid-Depth 1 percentile of baseline surface / mid-depth data or <4mg/L Bottom 1 percentile of baseline bottom data or <2mg/L
	For Stations F5, F6, F8 Surface or Mid-Depth 5 percentile of baseline surface / mid-depth data or <4mg/L Bottom 5 percentile of baseline bottom data or <3mg/L	**For Stations F5, F6, F8** Surface or Mid-Depth 1 percentile of baseline surface / mid-depth data or <4mg/L Bottom 1 percentile of baseline bottom data or <3mg/L
Turbidity in NTU (See Note 2)	95 percentile of baseline data	99 percentile of baseline data
SS in mg/L (See Note 2)	95 percentile of baseline data or 10mg/L	99 percentile of baseline data or 10mg/L
Copper in µg/L (See Note 2 and 4)	95 percentile of baseline data or 4.8µg/L	99 percentile of baseline data or 4.8µg/L
Zinc in µg/L (See Note 2 and 4)	95 percentile of baseline data or 40µg/L	99 percentile of baseline data or 40µg/L
Arsenic in µg/L (See Note 2 and 4)	95 percentile of baseline data or 25µg/L	99 percentile of baseline data or 25µg/L

Lead in mg/L (See Note 2 and 4)	95 percentile of baseline data or 25μg/L	99 percentile of baseline data or 25μg/L

Notes:
1. For DO, non-compliance of the water quality limits occurs when monitoring result is lower than the limits.
2. For turbidity, SS and metals, non-compliance of the water quality limits occurs when monitoring result is higher than the limits.
3. All the figures given in the table are used for reference only and EPD may amend the figures whenever it is considered as necessary.
4. Action and limit values of metals are based on the assessment criteria adopted under the water quality impact assessment (refer to Appendix B of Project Profile).

Calculated Action and Limit Levels for Water Quality

Parameter (unit)	Depth	Action Level			Limit Level		
		For Stations F4, F7 and G2	For Stations F5, F6, F8, G3 and G4		For Stations F4, F7 and G2	For Stations F5, F6, F8, G3 and G4	
DO in mg/L (See Note 1 and 4)	Surface	5.4mg/L	4.0mg/L		5.0mg/L	3.8mg/L	
	Middle	4.3mg/L	3.8mg/L		4.0mg/L	3.5mg/L	
	Bottom	2.2mg/L	For Stations F5, G3 2.2mg/L	For Stations F6, F8 and G4 2.8mg/L	1.9mg/L	For Stations F5, G3 1.8mg/L	For Stations F6, F8 and G4 2.4mg/L
Turbidity in NTU (See Note 2 and 4)	Depth-averaged	4.5NTU			4.7NTU		
SS in mg/L (See Note 2 and 4)	Depth-averaged	11.2mg/L			11.9mg/L		
Copper in μg/L (See Note 2 and 4)	Depth-averaged	8.0μg/L			8.4μg/L		
Zinc in μg/L (See Note 2 and 4)	Depth-averaged	22.0μg/L			26.4μg/L		
Arsenic in μg/L (See Note 2 and 4)	Depth-averaged	24.0μg/L			25.5μg/L		
Lead in mg/L (See Note 2 and 4)	Depth-averaged	1.0μg/L			1.0μg/L		

Notes:
1. For DO, non-compliance of the water quality limits occurs when monitoring result is lower than the limits.
2. For turbidity, SS and metals, non-compliance of the water quality limits occurs when monitoring result is higher than the limits.
3. All the figures given in the table are used for reference only and EPD may amend the figures whenever it is considered as necessary.
4. Action and limit values are derived based on baseline water quality monitoring results to show the actual baseline water quality condition.

Action and Limit Level for Coral Monitoring

Parameter	Action Level Definition	Limit Level Definition
Sedimentation	If during Impact Monitoring a 20% increase in the percentage of sediment cover on hard corals occurs at more than 20% of the tagged coral at any one Impact Monitoring Site that is not recorded at the Control Site, then the Action Level is exceeded.	If during the Impact Monitoring a 25% increase in the percentage of sediment cover occurs at more than 20% of the tagged coral at any one Impact Monitoring Site that is not recorded at the Control Site, then the Limit Level is exceeded.
Bleaching	If during Impact Monitoring a 15% increase in the percentage of bleaching (bleached white) on hard corals occurs at more than 20% of the tagged coral at any one Impact Monitoring Site that is not recorded at the Control Site, then the Action Level is exceeded.	If during the Impact Monitoring a 25% increase in the percentage of bleaching (bleached white) occurs at more than 20% of the tagged coral at any one Impact Monitoring Site that is not recorded at the Control Site, then the Limit Level is exceeded.
Mortality	If during Impact Monitoring a 15% increase in the percentage of partial mortality on hard corals occurs at more than 20% of the tagged coral at any one Impact Monitoring Site that is not recorded at the Control Site, then the Action Level is exceeded.	If during the Impact Monitoring a 25% increase in the percentage of partial mortality occurs at more than 20% of the tagged coral at any one Impact Monitoring Site that is not recorded at the Control Site, then the Limit Level is exceeded.

APPENDIX C
EVENT ACTION PLAN FOR WATER QUALITY

Appendix C Event and Action Plan for Water Quality

EVENT	ACTION			
	ET	IEC	ER	CONTRACTOR
Action level being exceeded by one sampling day	1. Repeat in-situ measurement to confirm findings; 2. Identify source(s) of impact; 3. Inform IEC and Contractor; 4. Check monitoring data, all plant, equipment and Contractor's working methods; 5. Discuss mitigation measures with IEC and Contractor; 6. (The above actions should be taken within 1 working day after the exceedance is identified) 7. Repeat measurement on next day of exceedance.	1. Discuss with ET and Contractor on the mitigation measures; 2. Review proposals on mitigation measures submitted by Contractor and advise the ER accordingly; 3. Assess the effectiveness of the implemented mitigation measures. 4. (The above actions should be taken within 1 working day after the exceedance is identified)	1. Discuss with IEC on the proposed mitigation measures; 2. Make agreement on the mitigation measures to be implemented. 3. (The above actions should be taken within 1 working day after the exceedance is identified)	1. Inform the ER and confirm notification of the non-compliance in writing; 2. Rectify unacceptable practice; 3. Check all plant and equipment; 4. Review the working methods and consider additional measures such as slowing down, or rescheduling of works; 5. Discuss with ET and IEC and propose mitigation measures to IEC and ER; 6. Implement the agreed mitigation measures. 7. (The above actions should be taken within 1 working day after the exceedance is identified)
Action level being exceeded by more than one consecutive sampling days	1. Identify source(s) of impact; 2. Inform IEC and Contractor; 3. Check monitoring data, all plant, equipment and Contractor's working methods; 4. Discuss mitigation measures with IEC and Contractor; 5. Ensure mitigation measures are implemented; 6. Prepare to increase the monitoring	1. Discuss with ET and Contractor on the mitigation measures; 2. Review proposals on mitigation measures submitted by Contractor and advise the ER accordingly; 3. Assess the effectiveness of the implemented mitigation	1. Discuss with IEC on the proposed mitigation measures; 2. Make agreement on the mitigation measures to be implemented; 3. Assess the effectiveness of the implemented mitigation measures. 4. (The above actions should	1. Inform the Engineer and confirm notification of the non-compliance in writing; 2. Rectify unacceptable practice; 3. Check all plant and equipment; 4. Review the working methods and consider

APPENDIX F
SUMMARY OF EXCEEDANCE

Exceedance Report

(A) Exceedance Report for Water Quality
(NIL in the reporting period)

(B) Exceedance Report for Coral Monitoring
(NIL in the reporting period)

APPENDIX G
ENVIRONMENTAL MITIGATION IMPLEMENTATION SCHEDULE

Appendix G – Environmental Mitigation and Implementation Schedule

Project Stage / Location	Potential Environmental Impact	Mitigation Measure	Implementation Agent
Construction / Construction Site and along the dredged sediment transportation route	Air quality	(1) The dredged sediment placed on barge will be properly covered as far as practicable. (2) Requirements of the Air Pollution Control (Construction Dust) Regulation, where relevant, will be adhered to during the construction period. (3) Ultra low sulphur diesel fuel should be used for all diesel-operated plants and equipment on-site.	Contractor
Construction / Construction Site	Construction Noise	(1) Only well-maintained plantswill be operated on-site and plants should be serviced regularly during the construction program. (2) Plants will be sited as far away from nearby NSRs as possible.	Contractor
Construction / Construction Site	Water quality impact	(1) Closed grab will be used for dredging to minimize release of fines and contaminants. (2) The maximum production rates as indicated in the approved Project Profile will be adopted for the proposed dredging activities. (3) Silt curtains will be deployed around the dredging operation. (4) Good site practices (as outlined in Section 5.7 above) will be adopted during dredging and during transportation and disposal of dredged sediments. (5) Discharge of sewage effluent into drainage and water environment is not allowed. Appropriate numbers of portable chemical toilets will be provided by a licensed contractor as necessary to serve the construction workers. (6) Collection and removal of floating refuse will be performed at regular intervals on a daily basis at or near the dredging sites. (7) Water quality monitoring will be undertaken before, during and after the dredging works	Contractor

Construction / Construction Site	Waste management	(1) Disposal of dredged sediment will follow the requirements and procedures specified under the ETWB TCW No. 34/2002. (2) All chemical wastes from equipment maintenance will be handled, stored and disposed of in accordance with the requirements of the Waste Disposal (Chemical Waste) Regulation. (3) General refuse will be stored and disposed of separately from general construction waste and chemical waste. The storage bins for general refuse will be provided with lids, which will be kept closed to avoid odour nuisance and wind blown litter. The general refuse would be removed regularly and disposed of to licensed landfills.	Contractor
Construction / Construction Site	Ecological impact	(1) Mitigation measures to control water quality, i.e. constriction of dredging rate, use of closed grab for dredging and deployment of silt curtains, proposed in the water quality impact assessment will be adopted. (2) Standard good site practice and management proposed in the water quality impact assessment, such as tight fitting seals to bottom openings of barges/dredgers, effective site drainage, and provision of chemical toilets will be adopted. (3) Good site practices on noise control proposed in the noise impact assessment will be adopted. (4) The health status of the nearby coral colonies will be regularly monitored during the construction phase	Contractor
Construction / Construction Site	Fisheries impact	(1) Mitigation measures to control water quality, i.e. constriction of dredging rate, use of closed grab for dredging and deployment of silt curtains, proposed in the water quality impact assessment will be adopted. (2) Standard good site practice and management proposed in the water quality impact assessment, such as tight fitting seals to bottom openings of barges/dredgers, effective site drainage, and provision of chemical toilets will be adopted.	Contractor
Construction / Construction Site	Visual impact	(1) All construction plants would be sited as far away from nearby shoreline as possible. (2) All the sediment removal works will be carried out in day time (7:00 to 19:00) to minimize the use of night-time lighting. (3) Lighting will be carefully controlled if required	Contractor

Construction / Construction Site	Cultural heritage impact	Antiquities and Monuments Office should be informed of any discovery of antiquities or supposed antiquities in the course of dredging work at all the Project sites in accordance with the Antiquities and Monuments Ordinance.	Contractor
Construction / Construction Site	Air quality, noise, water quality, ecology, fisheries, visual and cultural heritage	An environmental monitoring and audit programme as recommended in the approved Project Profile should be followed.	Contractor

Remarks: No environmental complaint was received in the reporting month.

Certificate of Calibration

Item for calibration:

Description	: Sonde Environmental Monitoring System
Manufacturer	: YSI
Model No.	: 6820-C-M
Serial No.	: 11J101089
Equipment No.	: W.03.10

Test conditions:

Room Temperature	: 19 degree Celsius
Relative Humidity	: 55%

Test Specifications:

Conductivity & Salinity Sensor, Model: 6560, L/N: 11J100023
1. Conductivity performance check with Potassium Chloride standard solution
2. Salinity performance check with Sodium Chloride standard solution

Dissolved Oxygen Sensor, Model: 6562, L/N: 11J100272
1. Performance check against Winkler titration

Turbidity Sensor, Model: 6136, S/N: 11J100474
1. Calibration check with Formazin standard solution

pH Meter, Model: 6561, L/N: 11H
1. Calibration check with standard pH buffer

Depth Meter
1. Calibration check at 1m water level depth

Methodologies:

1. YSI 6-Series Sonde Environmental Monitoring System Instruction Manual
2. In-house method with reference to APHA and ISO standards

TEST REPORT

Test Report No.:	C/W/131116-1
Date of Issue:	2013-11-16
Date Received:	2013-11-16
Date Tested:	2013-11-16
Date Completed:	2013-11-16
Next Due Date:	2014-02-15
Page:	2 of 2

Results:

1. Conductivity performance check

Specific Conductivity, µS/cm		Correction, µS/cm	Acceptable range
Salinity Meter (C1)	Theoretical Value (C2)	D = C1 - C2	
1420	1420	0	1420 ± 20

2. Salinity Performance check

Salinity, ppt		Correction, ppt	Acceptable range
Instrument Reading	Theoretical Value		
30.0	30.0	0.0	30.0 ± 3

3. Dissolved Oxygen check

Oxygen level in water at 20°C	Dissolved Oxygen, mg O_2/L		Correction, mg O_2/L	Acceptable range
	D.O. Meter	Winkler Titration		
Saturated	9.1	9.1	0.0	± 0.2
Half-saturated	5.6	5.6	0.0	± 0.2
Zero	0.0	0.0	0.0	± 0.2

4. Turbidity check

Turbidity value in solution, NTU	Calibration Value, NTU	Correction, NTU	Acceptable range
0.00	0.00	0.00	0.00 ± 0.05
100	100	0	100 ± 5
1000	1000	0	1000 ± 100

5. pH Meter check

Test Parameters	Performance characteristic	Acceptable range
Liquid junction error ΔpH_j , pH unit	0.01	Less than 0.05
Shift on stirring ΔpH_s , pH unit	0.01	Less than 0.02
Noise ΔpH_n , pH unit	0.00	Less than 0.02

6. Depth Meter check

Instrument Reading, m	Calibration Value, m	Correction, m	Acceptable range
1.0	1.00	0.00	1.00 ± 0.05

TEST REPORT

APPLICANT: **Cinotech Consultants Limited**
Room 1710, Technology Park,
18 On Lai Street,
Shatin, NT, Hong Kong

ATTN: **Mr. W.K. Tang**

Test Report No.:	C/W/131116-2
Date of Issue:	2013-11-16
Date Received:	2013-11-16
Date Tested:	2013-11-16
Date Completed:	2013-11-16
Next Due Date:	2014-02-15
Page:	1 of 2

Certificate of Calibration

Item for calibration:

Description	: Sonde Environmental Monitoring System
Manufacturer	: YSI
Model No.	: 6820-C-M
Serial No.	: 11J101088
Equipment No.	: W.03.11

Test conditions:

Room Temperature	: 19 degree Celsius
Relative Humidity	: 55%

Test Specifications:

Conductivity & Salinity Sensor, Model: 6560, L/N: 11J100023
1. Conductivity performance check with Potassium Chloride standard solution
2. Salinity performance check with Sodium Chloride standard solution
Dissolved Oxygen Sensor, Model: 6562, L/N: 11J100272
1. Performance check against Winkler titration
Turbidity Sensor, Model: 6136, S/N: 11J100474
1. Calibration check with Formazin standard solution
pH Meter, Model: 6561, L/N: 11H
1. Calibration check with standard pH buffer
Depth Meter
1. Calibration check at 1m water level depth

Methodologies:

1. YSI 6-Series Sonde Environmental Monitoring System Instruction Manual
2. In-house method with reference to APHA and ISO standards

PREPARED AND CHECKED BY:
For and On Behalf of **WELLAB Ltd.**

TEST REPORT

Test Report No.:	C/W/131116-2
Date of Issue:	2013-11-16
Date Received:	2013-11-16
Date Tested:	2013-11-16
Date Completed:	2013-11-16
Next Due Date:	2014-02-15

Results:

1. Conductivity performance check

Specific Conductivity, µS/cm		Correction, µS/cm	Acceptable range
Salinity Meter (C1)	Theoretical Value (C2)	D = C1 - C2	
1420	1420	0	1420 ± 20

2. Salinity Performance check

Salinity, ppt		Correction, ppt	Acceptable range
Instrument Reading	Theoretical Value		
30.0	30.0	0.0	30.0 ± 3

3. Dissolved Oxygen check

Oxygen level in water at 20°C	Dissolved Oxygen, mg O_2/L		Correction, mg O_2/L	Acceptable range
	D.O. Meter	Winkler Titration		
Saturated	9.1	9.1	0.0	± 0.2
Half-saturated	5.6	5.6	0.0	± 0.2
Zero	0.0	0.0	0.0	± 0.2

4. Turbidity check

Turbidity value in solution, NTU	Calibration Value, NTU	Correction, NTU	Acceptable range
0.00	0.00	0.00	0.00 ± 0.05
100	100	0	100 ± 5
1000	1000	0	1000 ± 100

5. pH Meter check

Test Parameters	Performance characteristic	Acceptable range
Liquid junction error ΔpH_j , pH unit	0.01	Less than 0.05
Shift on stirring ΔpH_s , pH unit	0.01	Less than 0.02
Noise ΔpH_n , pH unit	0.00	Less than 0.02

6. Depth Meter check

Instrument Reading, m	Calibration Value, m	Correction, m	Acceptable range
1.0	1.00	0.00	1.00 ± 0.05

Turbidity (Depth-averaged) at Mid-Flood Tide

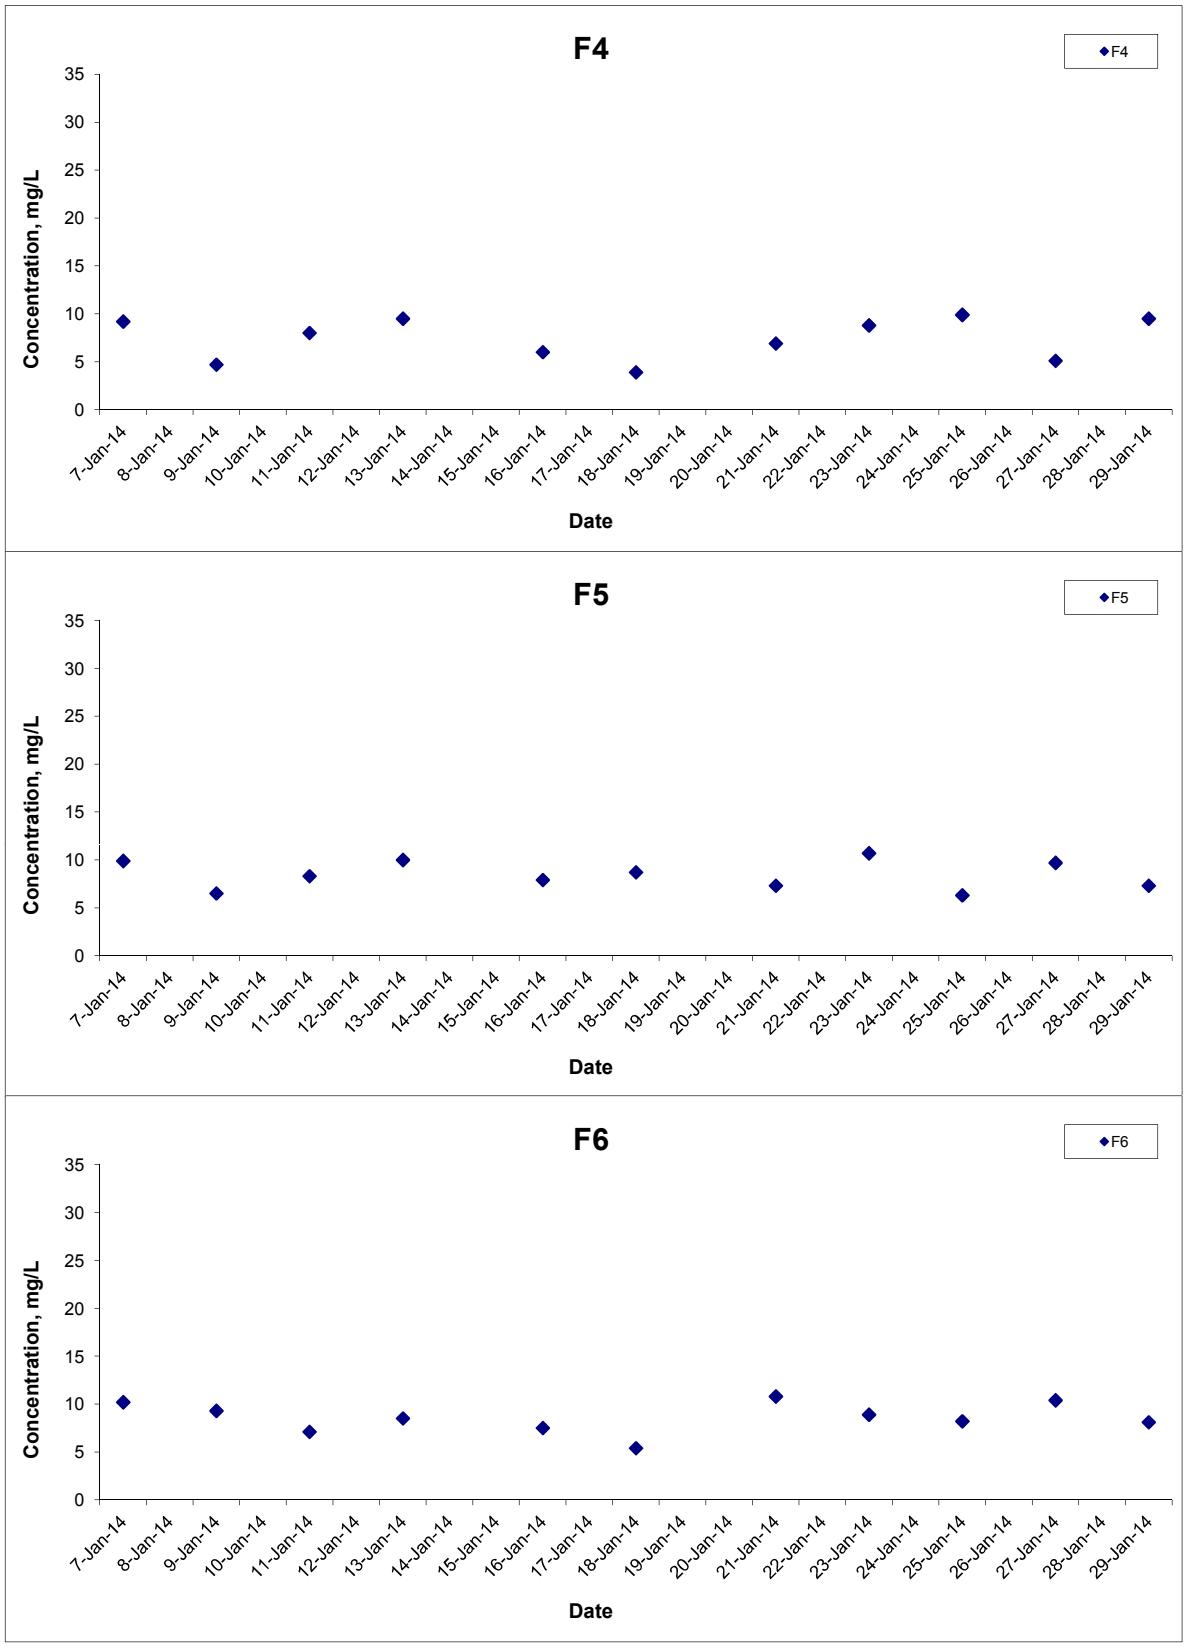
Title	Contract No. CV/2012/01 - Sediment Removal at Yim Tin Tsai (East) Fish Culture Zone Graphical Presentation of Baseline Water Quality Monitoring Results	Scale: N.T.S	Project No.: MA13027	CINOTECH
		Date: Jan 14	Appendix: N	

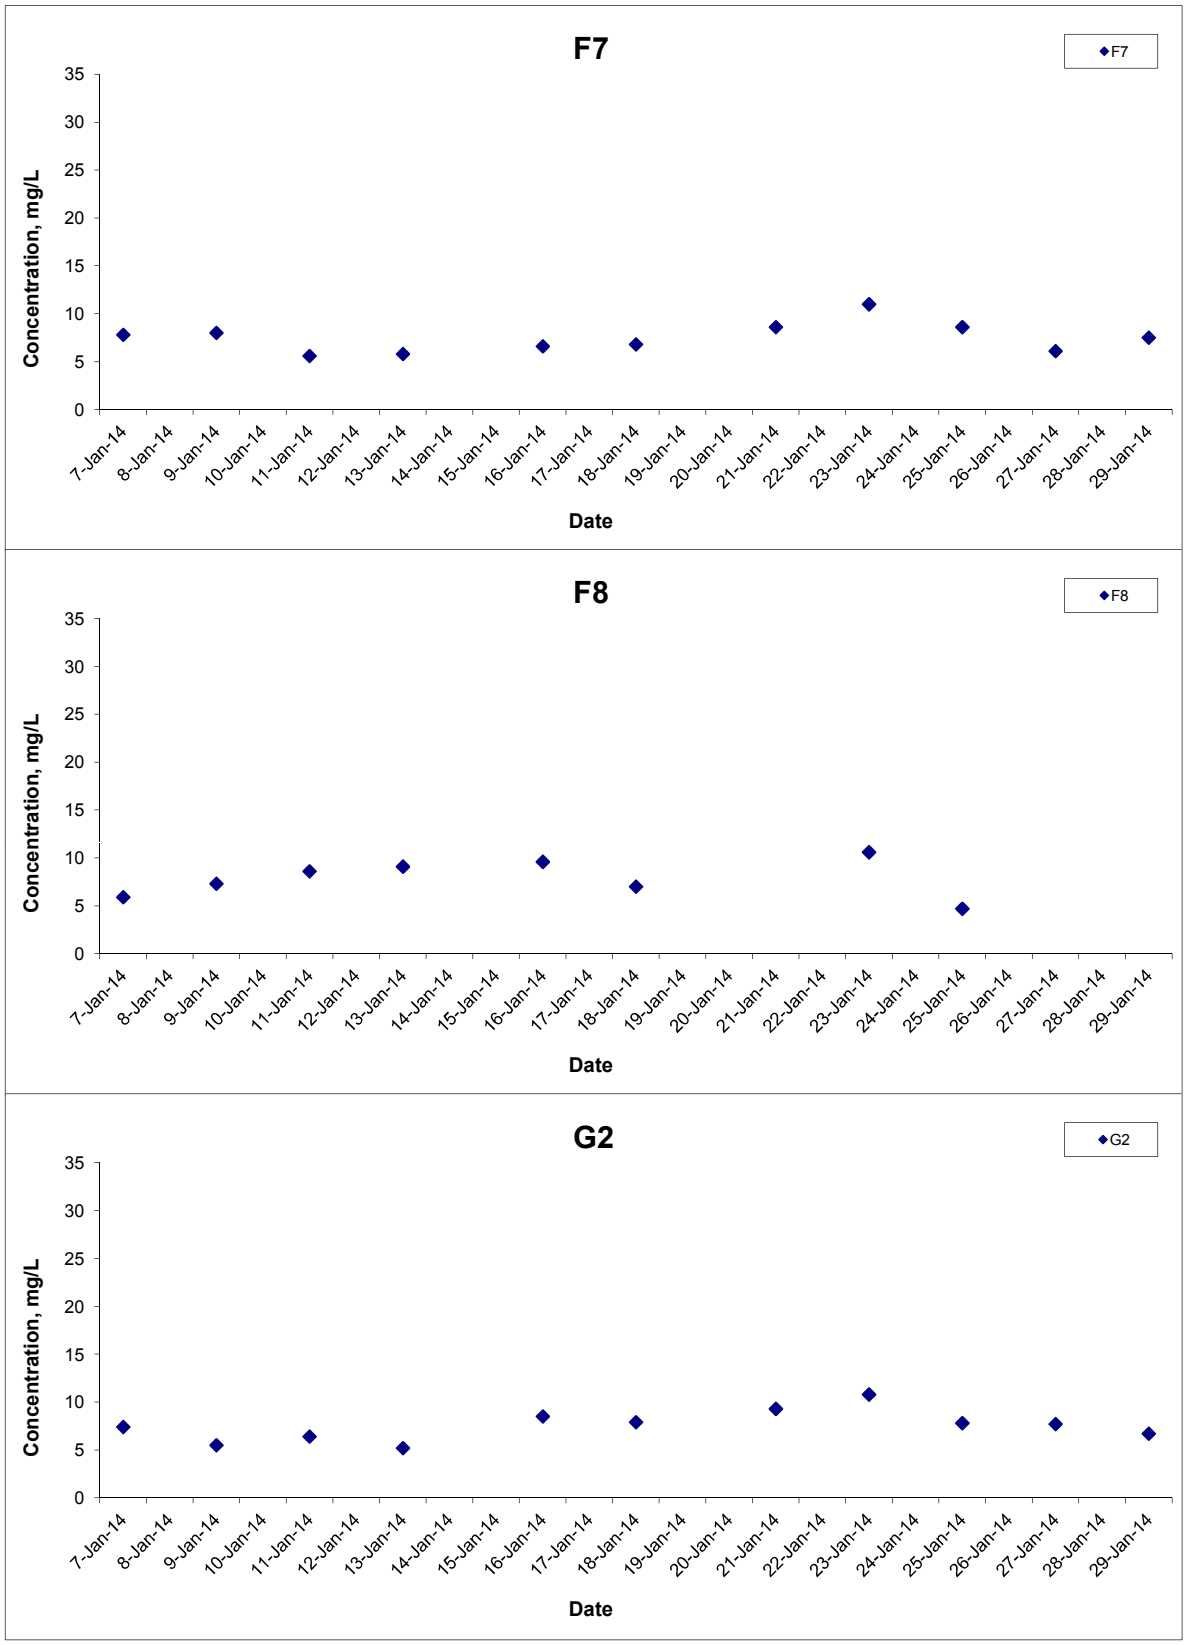
Suspended Solids (Depth-averaged) at Mid-Ebb Tide



Title		Scale	Project No.
Contract No. CV/2012/01 - Sediment Removal at Yim Tin Tsai (East) Fish Culture Zone		N.T.S	MA13027
Graphical Presentation of Baseline Water Quality Monitoring Results		Date: Jan 14	Appendix: N

CINOTECH

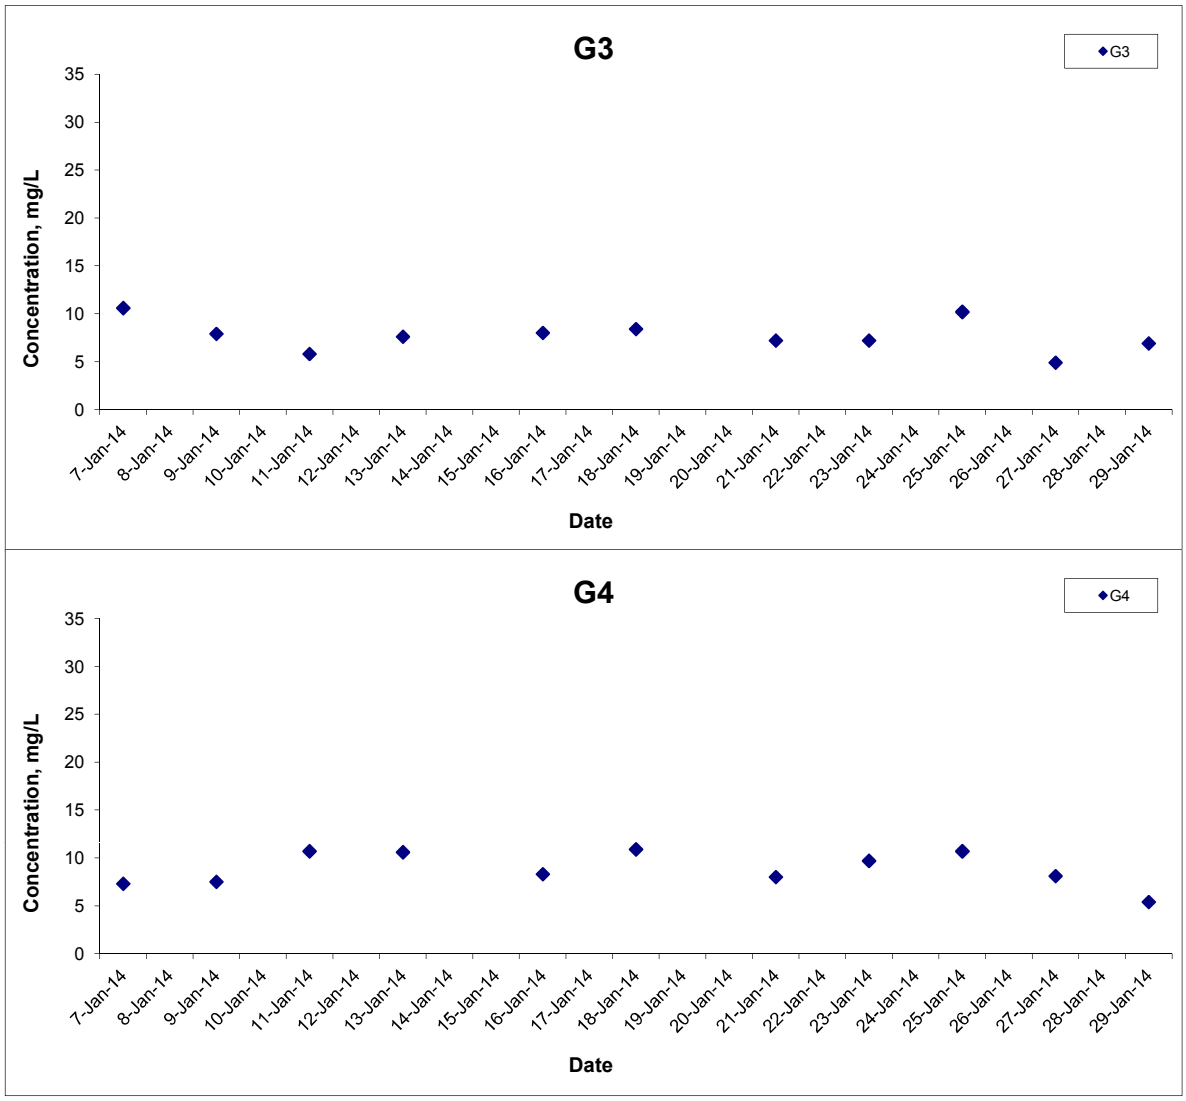
Suspended Solids (Depth-averaged) at Mid-Ebb Tide



Title		Scale	Project No.
Contract No. CV/2012/01 - Sediment Removal at Yim Tin Tsai (East) Fish Culture Zone		N.T.S	MA13027
Graphical Presentation of Baseline Water Quality Monitoring Results		Date: Jan 14	Appendix: N

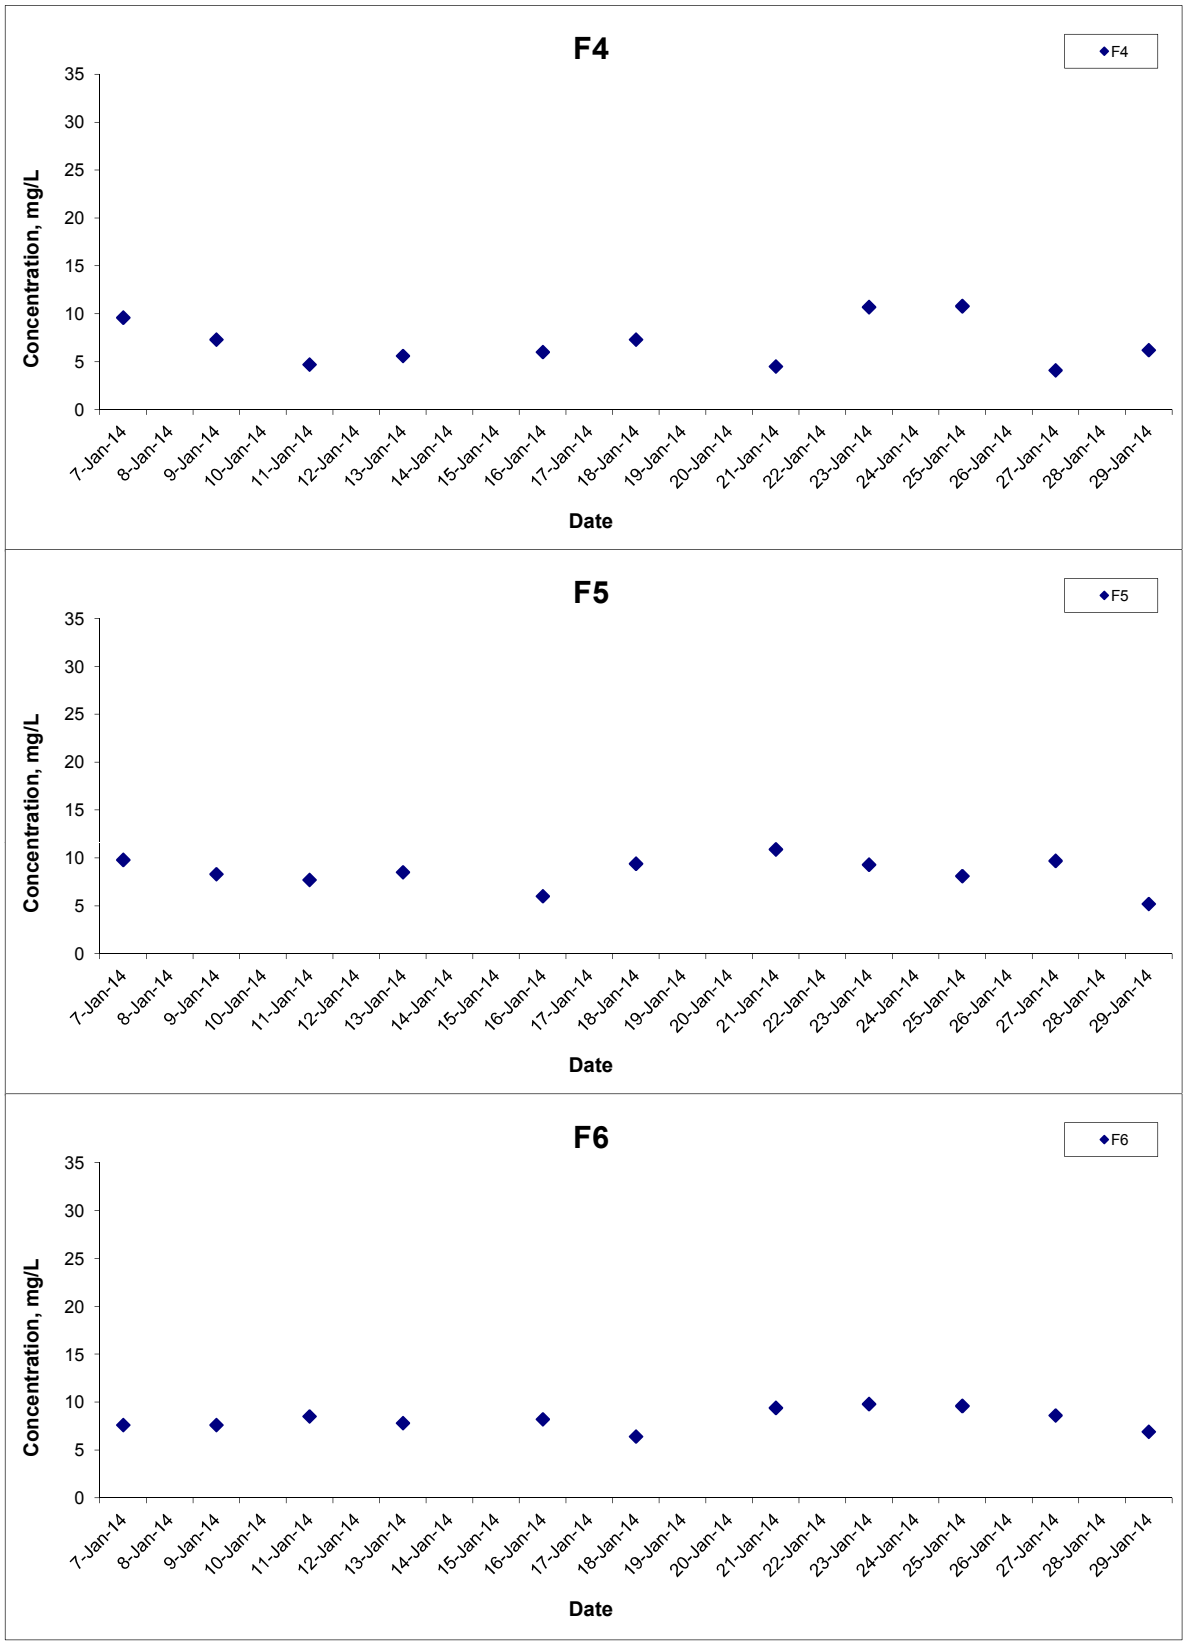
CINOTECH

Suspended Solids (Depth-averaged) at Mid-Ebb Tide



Title	Contract No. CV/2012/01 - Sediment Removal at Yim Tin Tsai (East) Fish Culture Zone Graphical Presentation of Baseline Water Quality Monitoring Results	Scale: N.T.S	Project No.: MA13027	CINOTECH
		Date: Jan 14	Appendix: N	

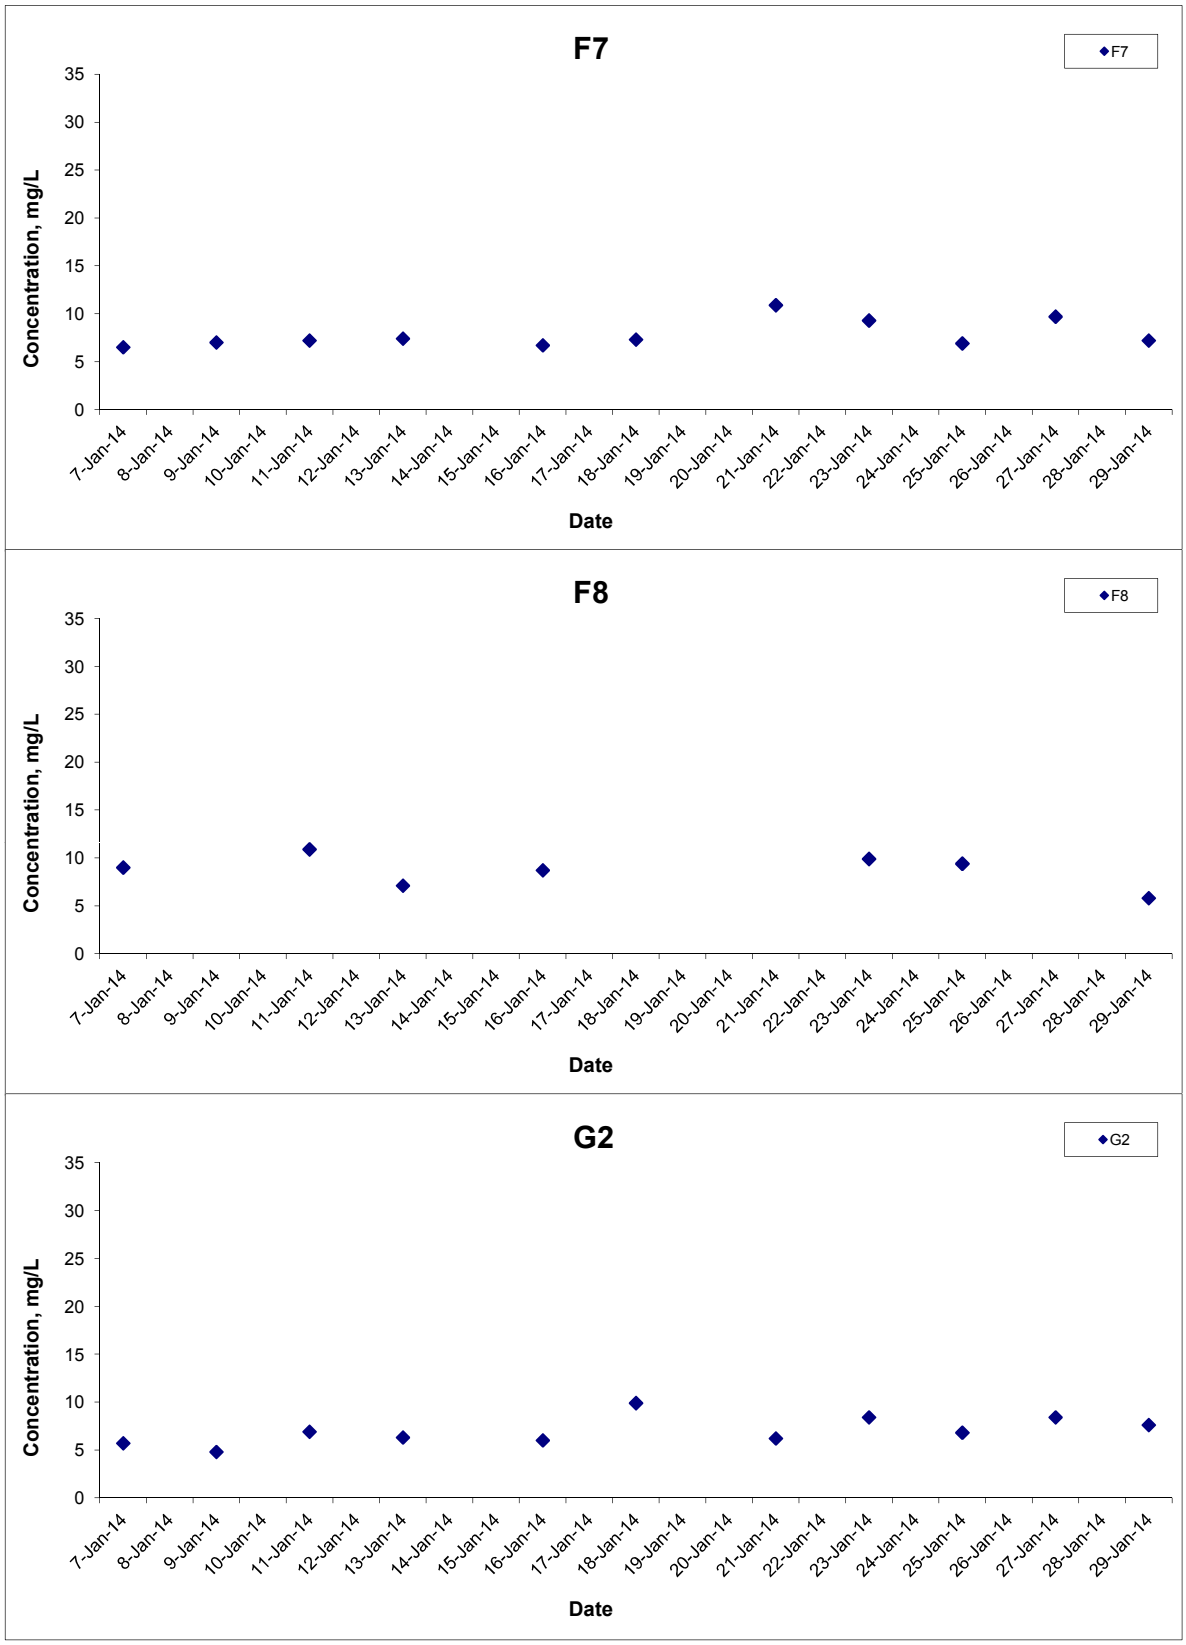
Suspended Solids (Depth-averaged) at Mid-Flood Tide



Title		Scale	Project No.
Contract No. CV/2012/01 - Sediment Removal at Yim Tin Tsai (East) Fish Culture Zone Graphical Presentation of Baseline Water Quality Monitoring Results		N.T.S	MA13027
		Date: Jan 14	Appendix: N

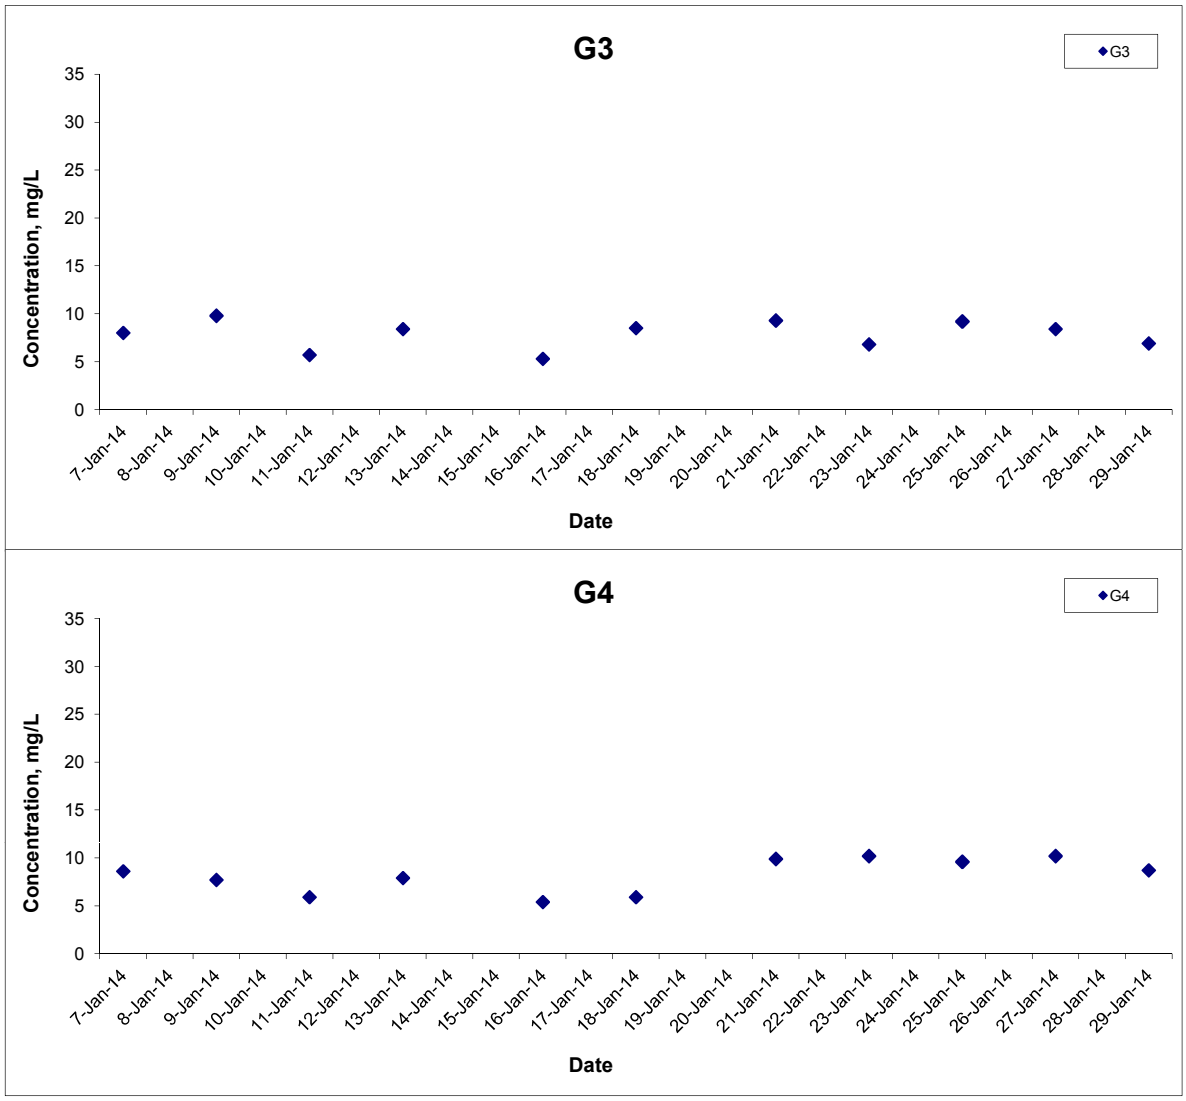
CINOTECH

Suspended Solids (Depth-averaged) at Mid-Flood Tide



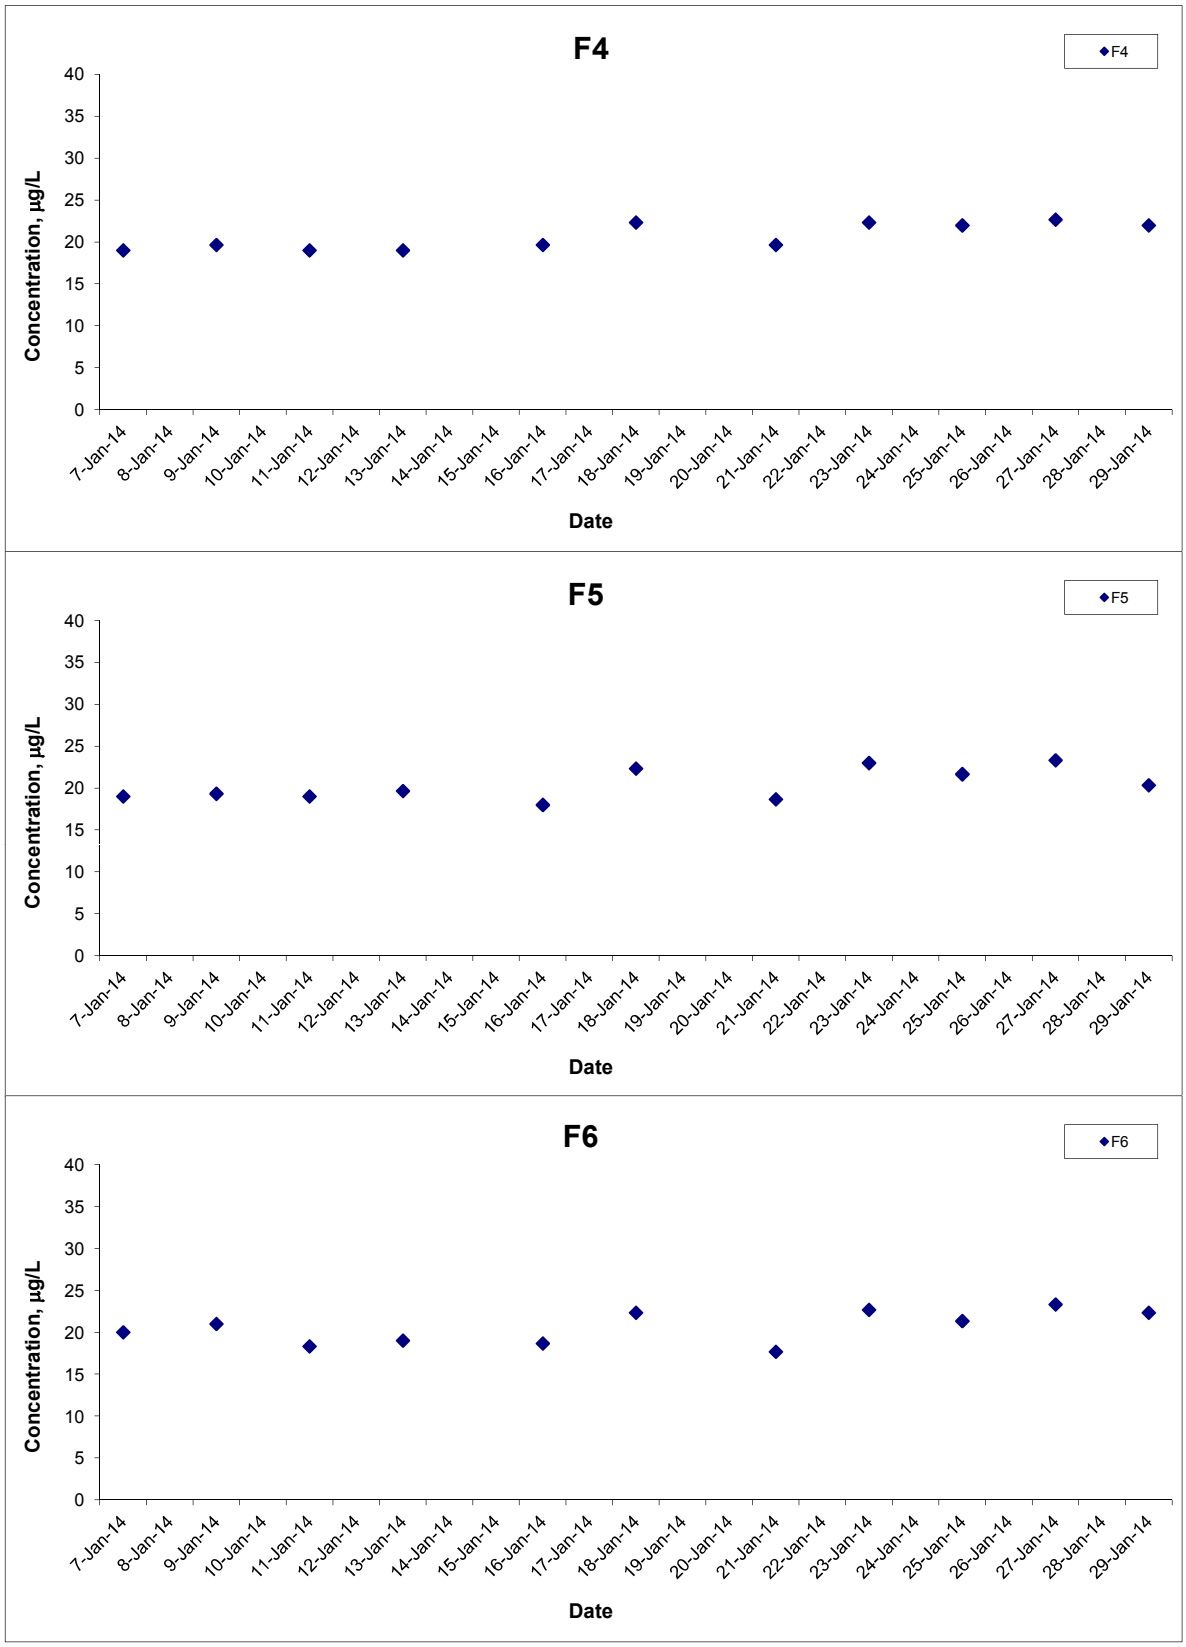
Title	Contract No. CV/2012/01 - Sediment Removal at Yim Tin Tsai (East) Fish Culture Zone Graphical Presentation of Baseline Water Quality Monitoring Results	Scale: N.T.S	Project No.: MA13027	CINOTECH
		Date: Jan 14	Appendix: N	

Suspended Solids (Depth-averaged) at Mid-Flood Tide



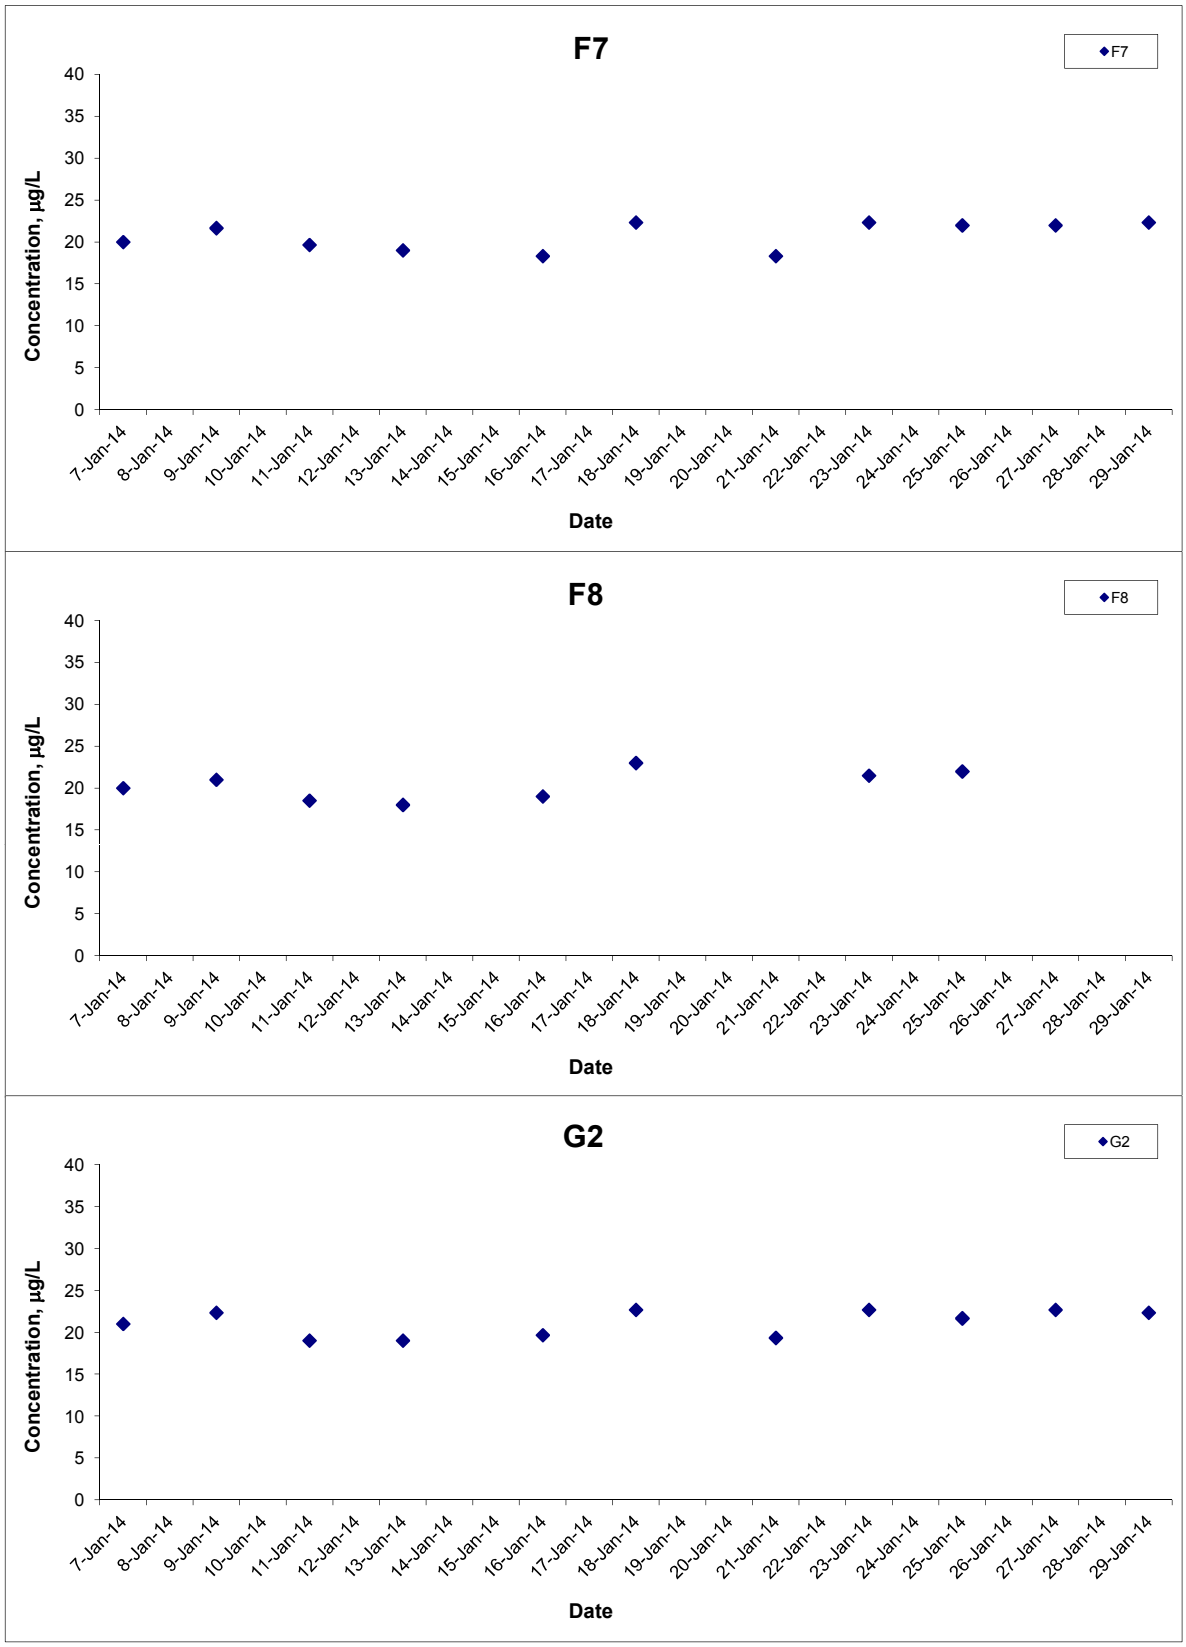
Title	Contract No. CV/2012/01 - Sediment Removal at Yim Tin Tsai (East) Fish Culture Zone Graphical Presentation of Baseline Water Quality Monitoring Results	Scale: N.T.S	Project No.: MA13027	CINOTECH
		Date: Jan 14	Appendix: N	

Arsenic (Depth-averaged) at Mid-Ebb Tide



Title	Contract No. CV/2012/01 - Sediment Removal at Yim Tin Tsai (East) Fish Culture Zone Graphical Presentation of Baseline Water Quality Monitoring Results	Scale: N.T.S	Project No.: MA13027	CINOTECH
		Date: Jan 14	Appendix: N	

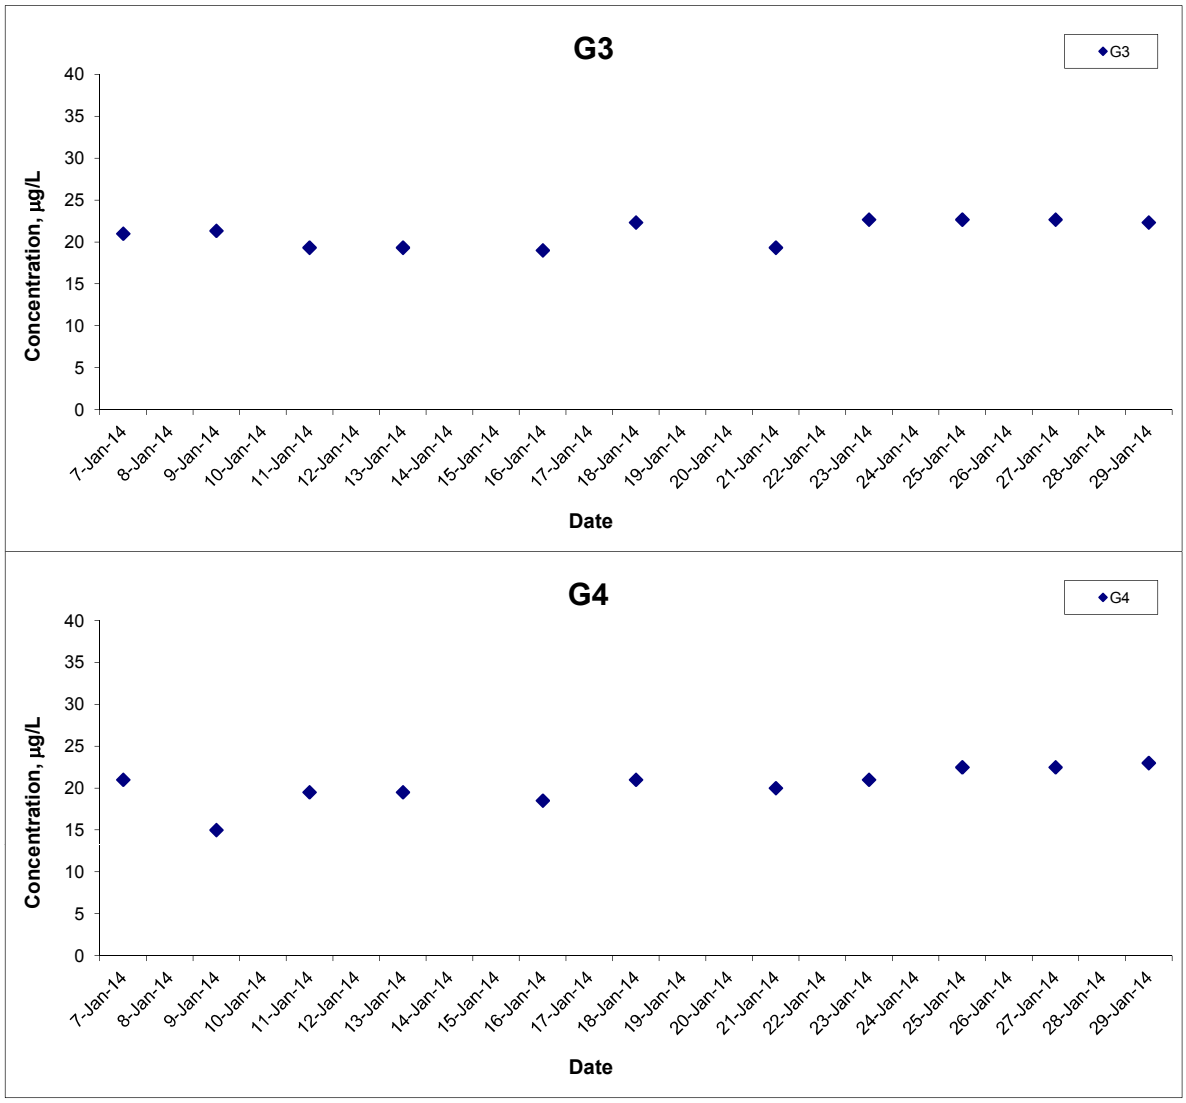
Arsenic (Depth-averaged) at Mid-Ebb Tide



Title		Scale	Project No.
Contract No. CV/2012/01 - Sediment Removal at Yim Tin Tsai (East) Fish Culture Zone		N.T.S	MA13027
Graphical Presentation of Baseline Water Quality Monitoring Results		Date: Jan 14	Appendix: N

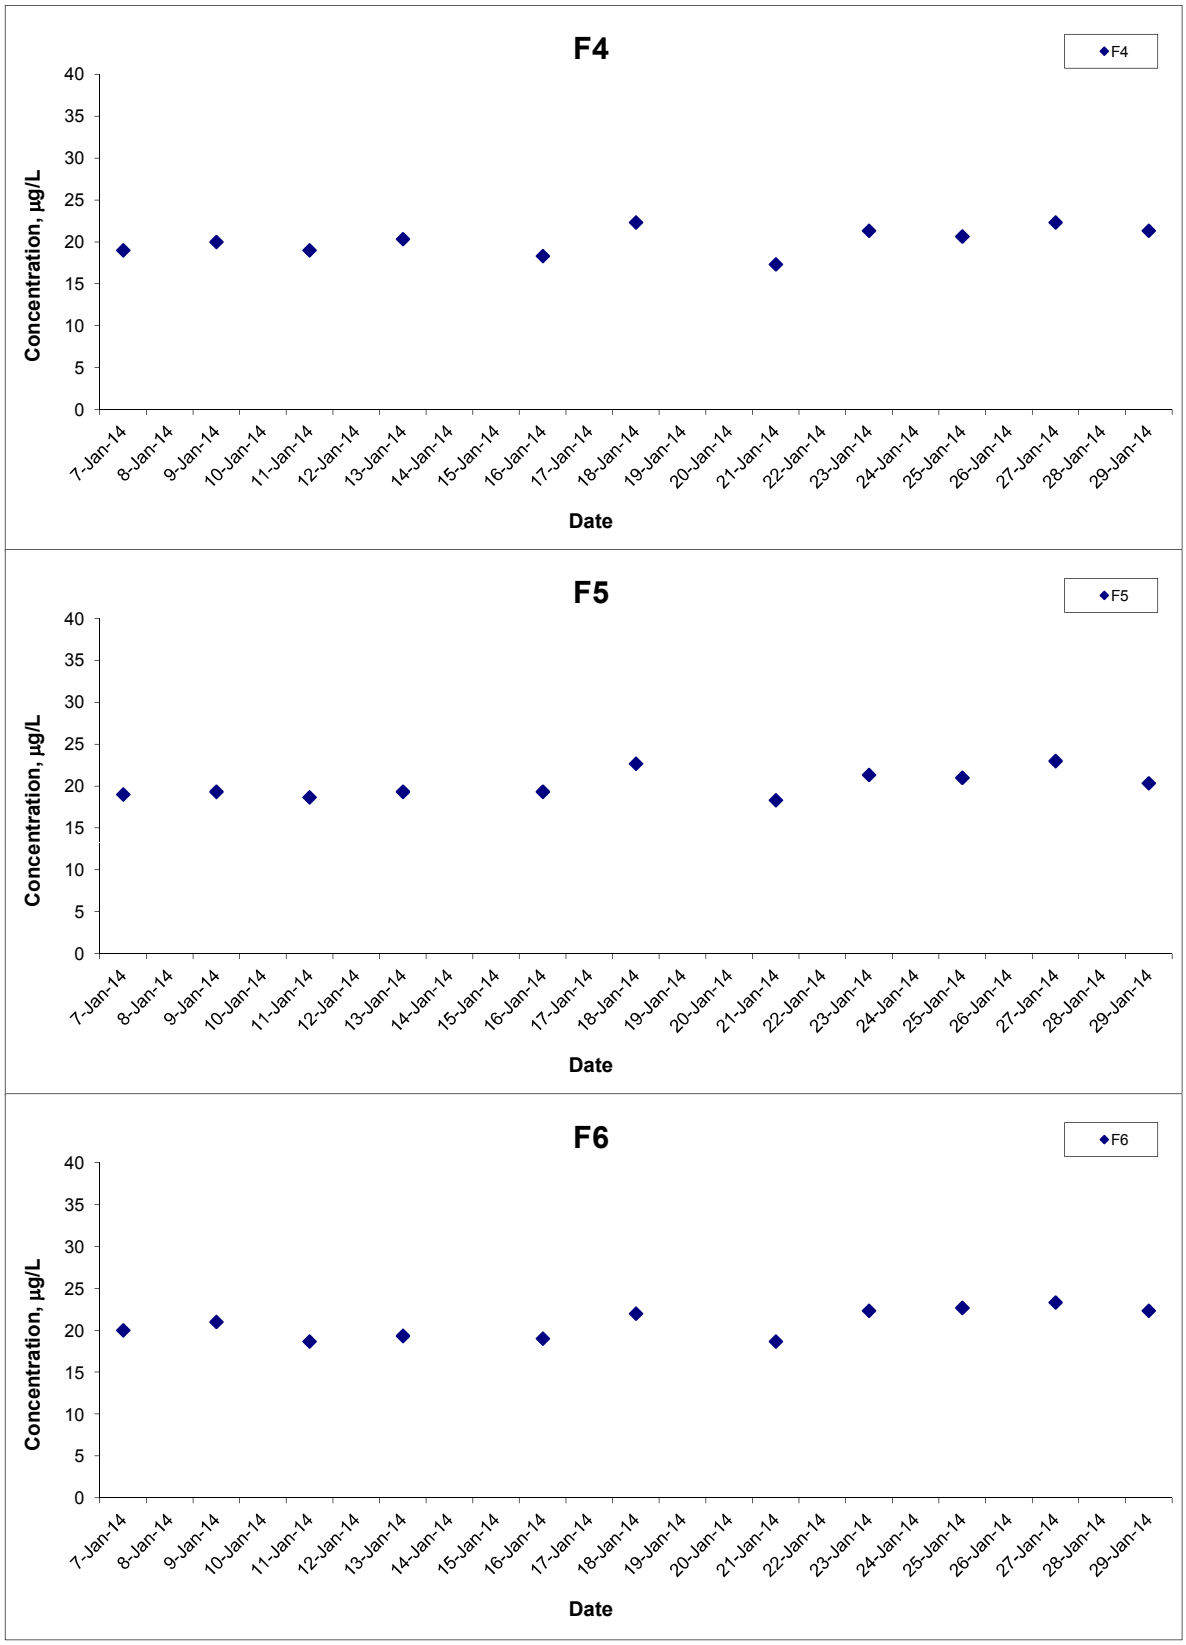
CINOTECH

Arsenic (Depth-averaged) at Mid-Ebb Tide



Title	Contract No. CV/2012/01 - Sediment Removal at Yim Tin Tsai (East) Fish Culture Zone Graphical Presentation of Baseline Water Quality Monitoring Results	Scale: N.T.S	Project No.: MA13027	CINOTECH
		Date: Jan 14	Appendix: N	

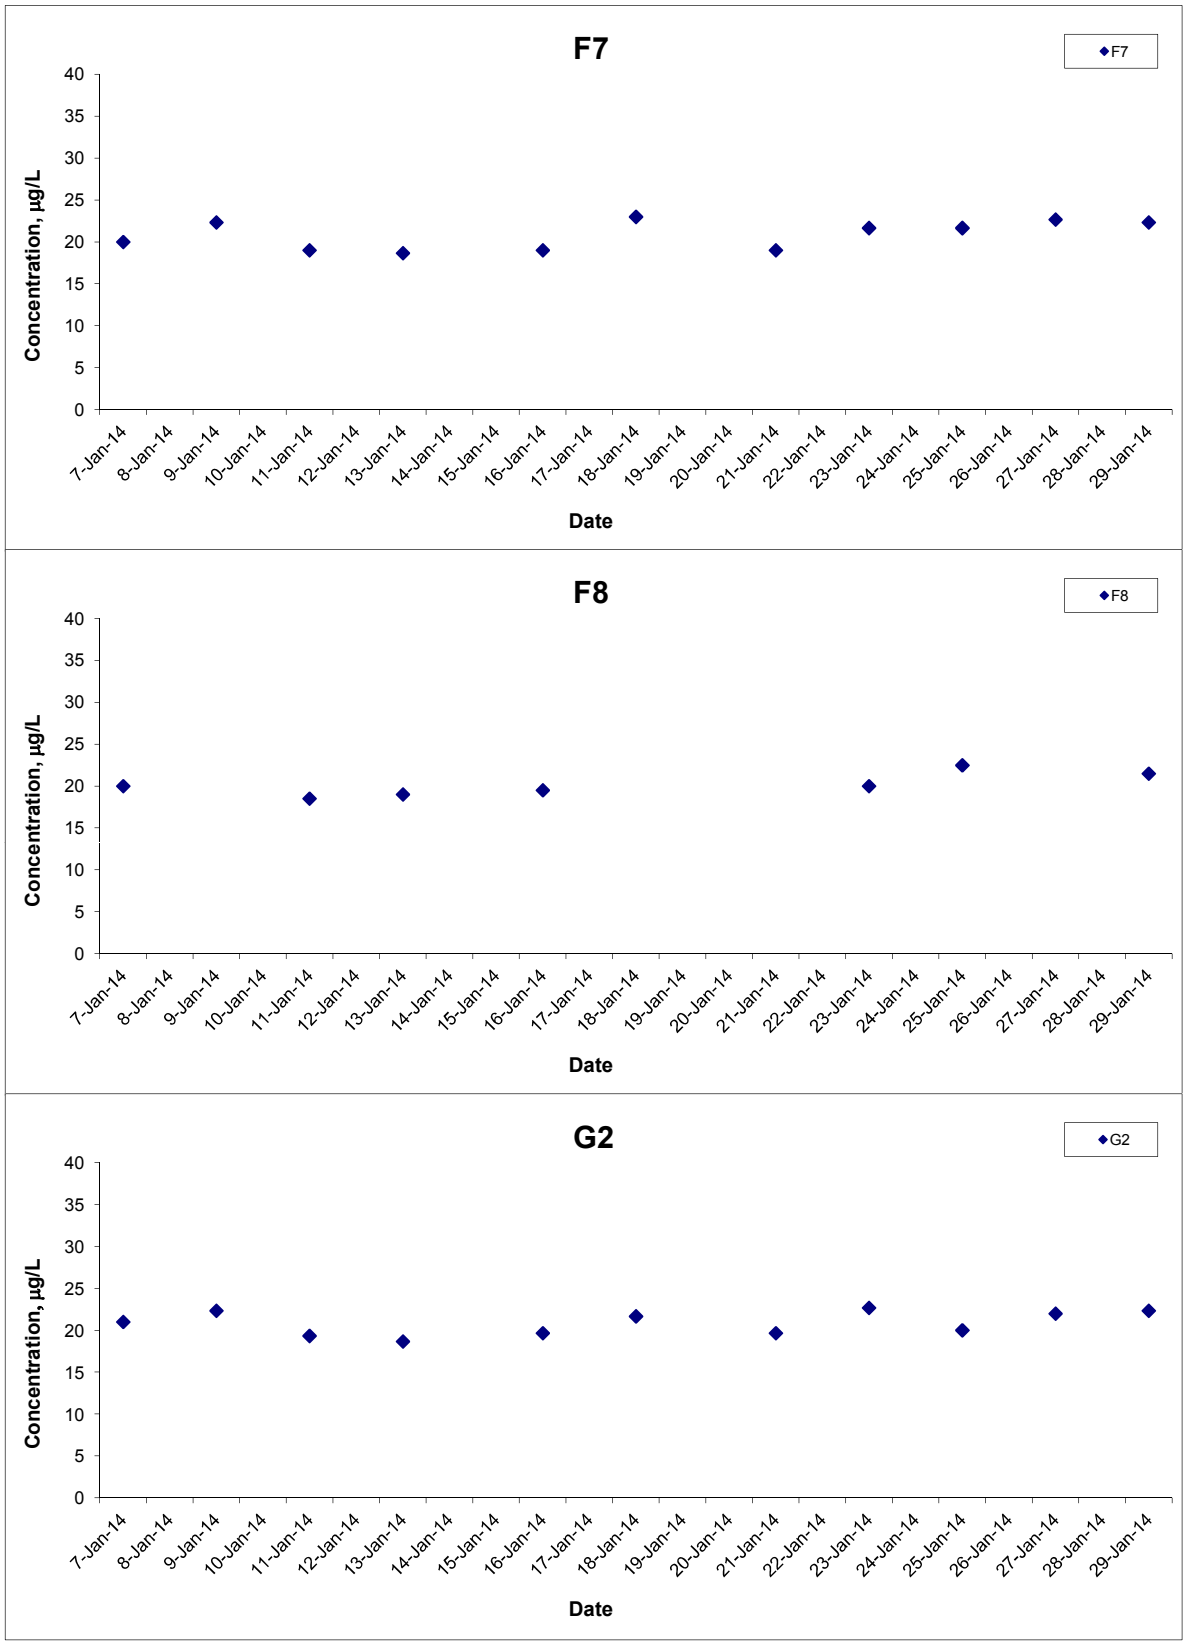
Arsenic (Depth-averaged) at Mid-Flood Tide



Title		Scale	Project No.
Contract No. CV/2012/01 - Sediment Removal at Yim Tin Tsai (East) Fish Culture Zone		N.T.S	MA13027
Graphical Presentation of Baseline Water Quality Monitoring Results		Date: Jan 14	Appendix: N

CINOTECH

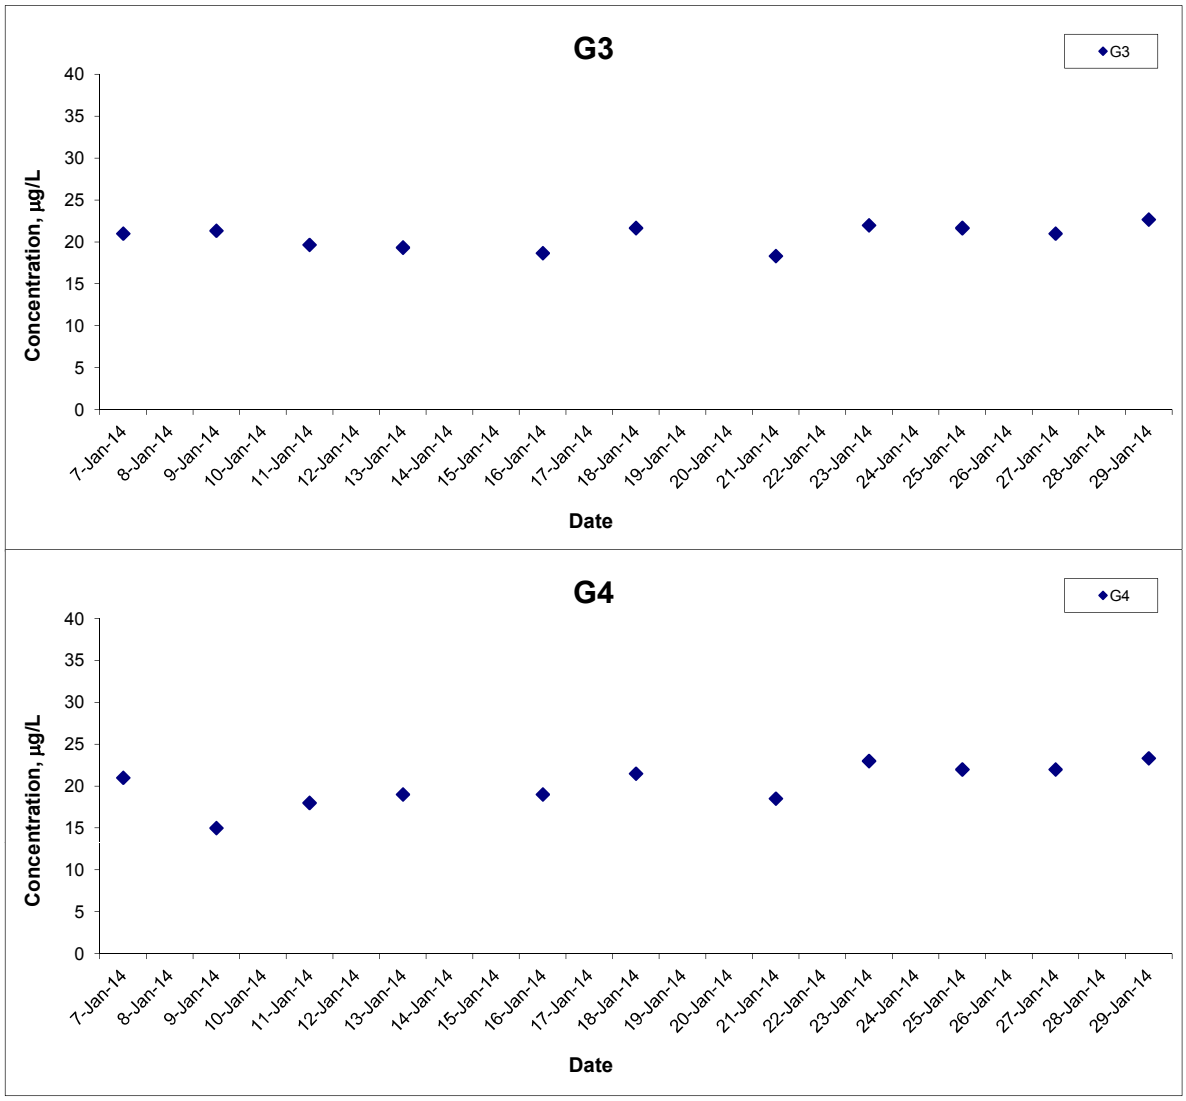
Arsenic (Depth-averaged) at Mid-Flood Tide



Title		Scale	Project No.
Contract No. CV/2012/01 - Sediment Removal at Yim Tin Tsai (East) Fish Culture Zone		N.T.S	MA13027
Graphical Presentation of Baseline Water Quality Monitoring Results		Date: Jan 14	Appendix: N

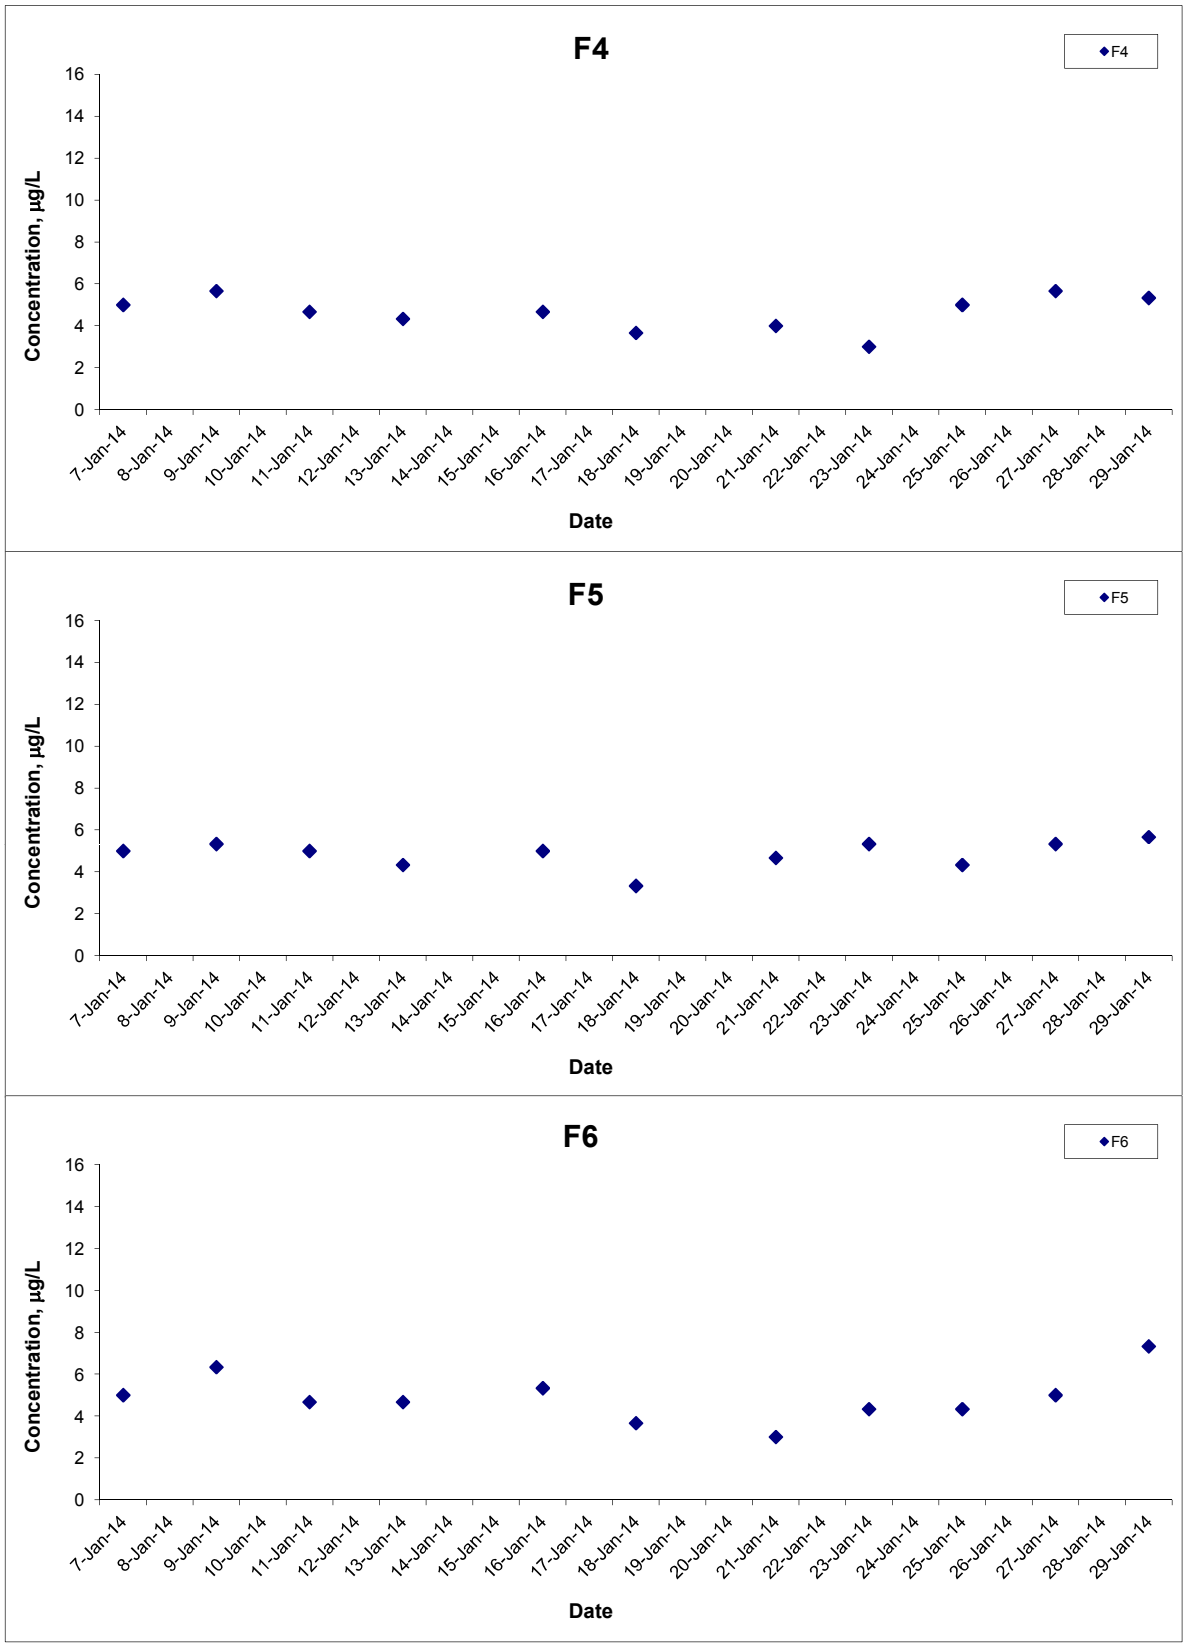
CINOTECH

Arsenic (Depth-averaged) at Mid-Flood Tide



Title	Contract No. CV/2012/01 - Sediment Removal at Yim Tin Tsai (East) Fish Culture Zone Graphical Presentation of Baseline Water Quality Monitoring Results	Scale: N.T.S	Project No.: MA13027	CINOTECH
		Date: Jan 14	Appendix: N	

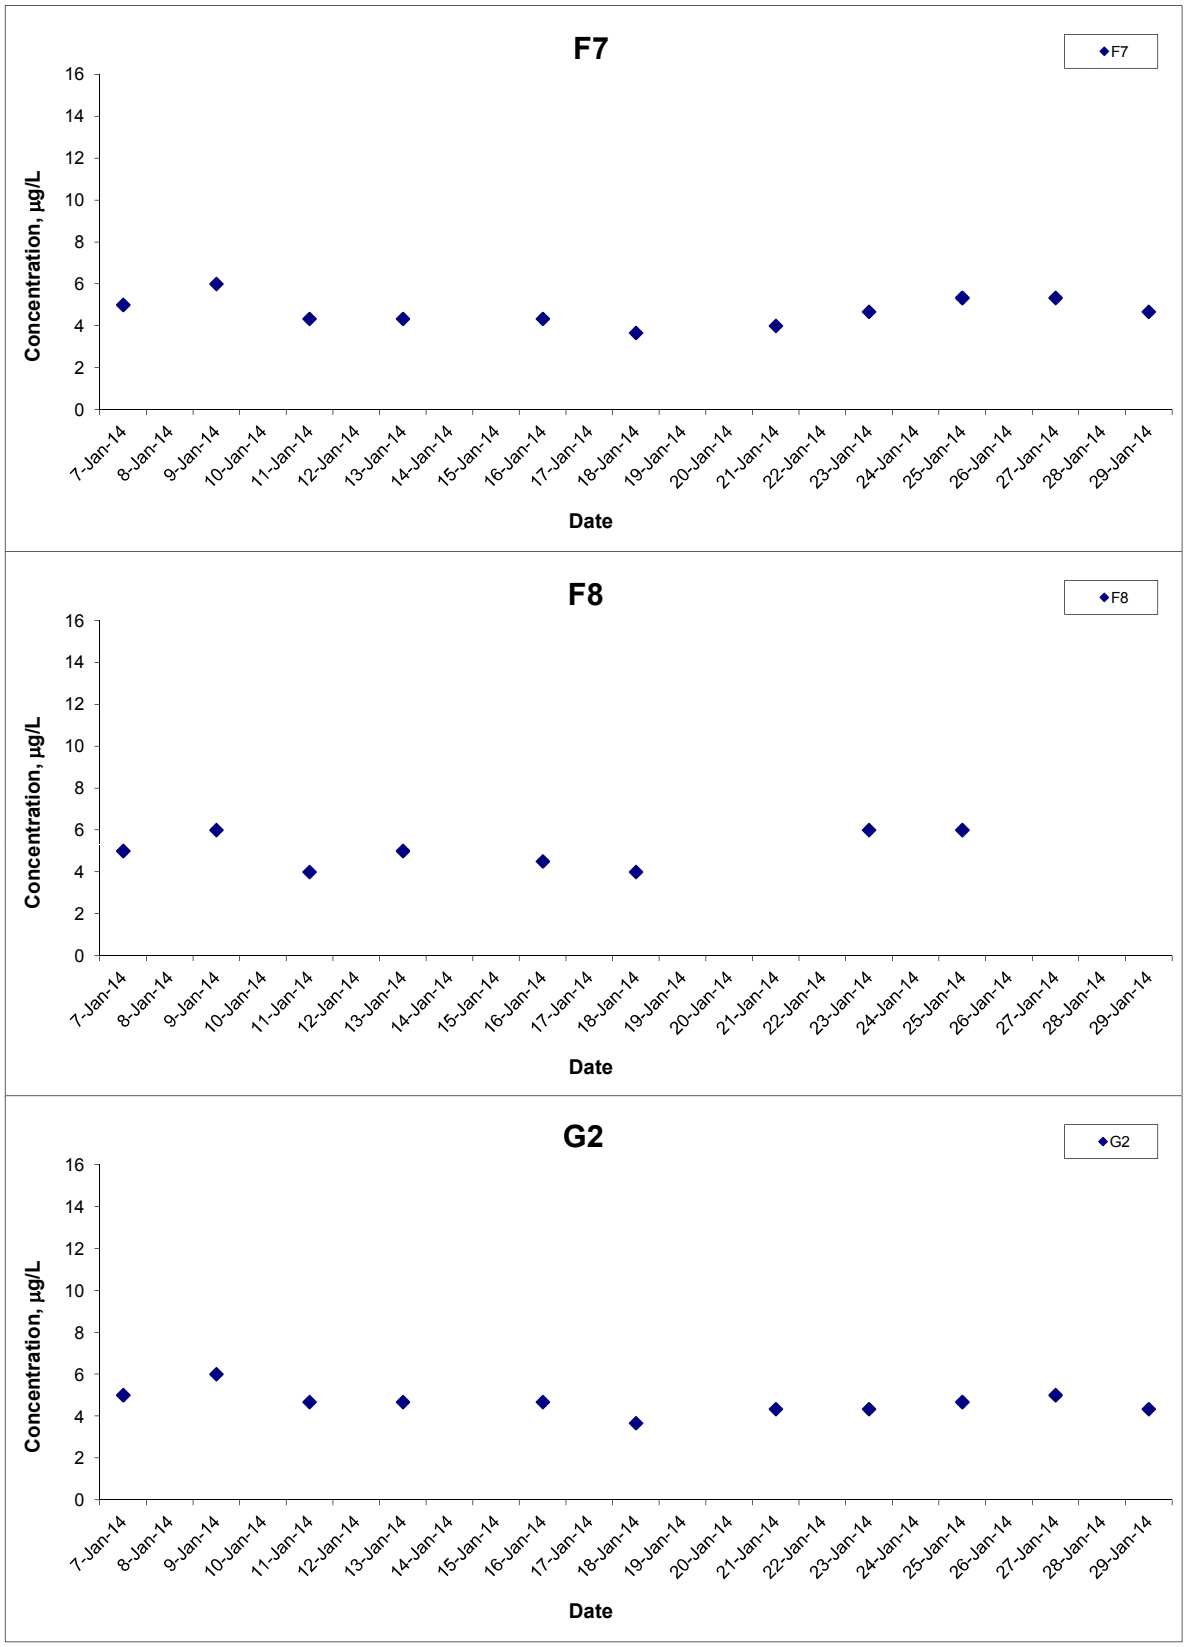
Copper (Depth-averaged) at Mid-Ebb Tide



Title		Scale	Project No.
Contract No. CV/2012/01 - Sediment Removal at Yim Tin Tsai (East) Fish Culture Zone		N.T.S	MA13027
Graphical Presentation of Baseline Water Quality Monitoring Results		Date: Jan 14	Appendix: N

CINOTECH

Copper (Depth-averaged) at Mid-Ebb Tide



Title		Scale	Project No.
Contract No. CV/2012/01 - Sediment Removal at Yim Tin Tsai (East) Fish Culture Zone		N.T.S	MA13027

TEST REPORT

APPLICANT: **Cinotech Consultants Limited**
RM 1710, Technology Park,
18 On Lai Street,
Shatin, N.T., Hong Kong

ATTN: **Miss Mei Ling Tang**

Laboratory No.:	19459
Date of Issue:	2014-01-13
Date Received:	2014-01-07
Date Tested:	2014-01-07
Date Completed:	2014-01-13
Page:	1 of 4

Sample Description : 44 liquid samples as received by customer said to be marine water
Project No. : MA13027
Project Name : Contract No. CV/2012/01
Sediment Removal at Yim Tin Tsai (East) Fish Culture Zone
Custody No. : MA13027/140107
Sampling Date : 2014-01-07

Test Requested & Methodology:

Item	Parameters	Ref. Method	Limit of Reporting
1	Suspended Solids (SS)	APHA 17ed 2540 D	*0.5 mg/L
2	Arsenic (As)	In-house method SOP076 (ICP-MS)	1 µg/L
2	Copper (Cu)		1 µg/L
4	Lead (Pb)		1 µg/L
5	Zinc (Zn)		2 µg/L

Remark: 1) * Limit of Reporting is reported as Detection Limit
****

TEST REPORT

APPLICANT: **Cinotech Consultants Limited**
RM 1710, Technology Park,
18 On Lai Street,
Shatin, N.T., Hong Kong

ATTN: **Miss Mei Ling Tang**

Laboratory No.:	19570
Date of Issue:	2014-01-29
Date Received:	2014-01-23
Date Tested:	2014-01-23
Date Completed:	2014-01-29
Page:	1 of 4

Sample Description : 44 liquid samples as received by customer said to be marine water
Project No. : MA13027
Project Name : Contract No. CV/2012/01
Sediment Removal at Yim Tin Tsai (East) Fish Culture Zone
Custody No. : MA13027/140123
Sampling Date : 2014-01-23

Test Requested & Methodology:

Item	Parameters	Ref. Method	Limit of Reporting
1	Suspended Solids (SS)	APHA 17ed 2540 D	*0.5 mg/L
2	Arsenic (As)	In-house method SOP076 (ICP-MS)	1 µg/L
2	Copper (Cu)		1 µg/L
4	Lead (Pb)		1 µg/L
5	Zinc (Zn)		2 µg/L

Remark: 1) * Limit of Reporting is reported as Detection Limit

TEST REPORT

APPLICANT: **Cinotech Consultants Limited**
RM 1710, Technology Park,
18 On Lai Street,
Shatin, N.T., Hong Kong

ATTN: **Miss Mei Ling Tang**

Laboratory No.:	19608
Date of Issue:	2014-02-06
Date Received:	2014-01-29
Date Tested:	2014-01-29
Date Completed:	2014-02-06
Page:	1 of 4

Sample Description : 43 liquid samples as received by customer said to be marine water
Project No. : MA13027
Project Name : Contract No. CV/2012/01
Sediment Removal at Yim Tin Tsai (East) Fish Culture Zone
Custody No. : MA13027/140129
Sampling Date : 2014-01-29

Test Requested & Methodology:

Item	Parameters	Ref. Method	Limit of Reporting
1	Suspended Solids (SS)	APHA 17ed 2540 D	*0.5 mg/L
2	Arsenic (As)	In-house method SOP076 (ICP-MS)	1 µg/L
2	Copper (Cu)		1 µg/L
4	Lead (Pb)		1 µg/L
5	Zinc (Zn)		2 µg/L

Remark: 1) * Limit of Reporting is reported as Detection Limit

Zinc (Zn), %	100	93	95	80-120%

Sample Spike

Parameter	19608-1 spk	19608-37 spk	19608-58 spk	Acceptance
Suspended Solids (SS)	N/A	N/A	N/A	N/A
Arsenic (As), %	88	98	97	80-120%
Copper (Cu), %	87	89	96	80-120%
Lead (Pb), %	96	87	92	80-120%
Zinc (Zn), %	99	100	99	80-120%

Remarks: 1) < = less than

2) N/A = Not applicable

3) This report is the summary of quality control data for report number 19608
