## CRBC-CEC-KADEN Joint Venture

Our Ref.: LT6/19.10.00.00/002700/L  
Date: 13 January 2017

AECOM Asia Co. Ltd.  
8/F, Grand Central Plaza, Tower 2,  
138 Shatin Rural Committee Road,  
Shatin, N.T.  
Hong Kong

By Hand

Attn: Mr. Simon Leung

Dear Sir,

**Civil Engineering and Development Department**  
**Contract No. CV/2013/08**  
**Liantang/Heung Yuen Wai Boundary Control Point Site Formation and Infrastructure Works – Contract 6**  
**Submission of Vegetation Survey Report**

In accordance with Condition 2.8 of Environmental Permit No. EP-404/2011/C, we submit herewith 3 sets of the Vegetation Survey Report (Revision 5) with ET's certificate and IEC's certificate for your onward submission.

Thank you for your kind attention.

Yours faithfully,  
For and on behalf of  
**CRBC-CEC-KADEN Joint Venture**

  
**Vincent Chan**  
**Site Agent**

**By Email & Post**

**Attention: Mr Simon LEUNG**

Dear Sirs

**Agreement No. CE 45/2008 (CE)  
Liantang/Heung Yuen Wai Boundary Control Point and Associated Works  
Independent Environmental Checker – Investigation  
Revised Vegetation Survey Report (Rev. 5)**

Reference is made to the revised Vegetation Survey Report (Rev. 5) received via email on 16 December 2016 and certified by the ET Leader. Please be noted that we have no adverse comments on the captioned submission. We herewith verify the captioned submission in accordance with Condition 2.8 of the Environmental Permit No. EP-404/2011/C.

Thank you for your attention and please do not hesitate to contact the undersigned on tel. 3995 8120 or by email to antony.wong@smec.com; or our Mr Man CHEUNG on tel. 3995 8132 or by email to man.cheung@smec.com.

Yours faithfully  
for and on behalf of  
SMEC Asia Limited

**Antony WONG**

Appendix B Photographs taken for *Aquilaria sinensis* Trees identified during Vegetation Survey  
Appendix C Photographs taken for *Euonymus kwangtungensis* identified during Vegetation survey  
Appendix D Updated location plan of *Aquilaria sinensis* and *Euonymus kwangtungensis*  
Appendix E Proposed location of Woodland Compensation Area in EIA Report  
Appendix F Proposed Reception Site for *Euonymus kwangtungensis*

## 1 INTRODUCTION

### *Background*

- 1.1 Mott MacDonald Hong Kong Ltd. (MMHK) was commissioned by the Civil Engineering and Development Department (CEDD) on 24 April 2009 under Agreement No. CE 45/2008 (CE) to provide professional services to address issues related to the planning, design and construction of the proposed Liantang / Heung Yuen Wai Boundary Control Point and Associated Works (the Project). An Environmental Impact Assessment (EIA) study for the Project was conducted to provide information on the nature and extent of environmental impacts arising from the construction and operation of the Project. The EIA Report was approved on 24 March 2011 and the Environmental Permit (EP No. EP-404/2011) was granted under the Environmental Impact Assessment Ordinance (EIAO) to construct and operate the designated project.
- 1.2 Under Condition 2.8 of the Environmental Permit a Vegetation Survey Report (VSR) shall be submitted to provide the results of a detailed vegetation survey for the purpose of:
- (a) confirming the conditions of individual flora species of conservation importance identified in the EIA Report and during the course of the survey, including *Euonymus kwangtungensis* and *Aquilaria sinensis*; (Habitat Map in the EIA Report showing the Location of *Euonymus kwangtungensis* and *Aquilaria sinensis* is in **Appendix A**)
  - (b) preparing an updated location plan showing the individual species of conservation importance and identifying the individuals which will be affected by the Project;
  - (c) identifying suitable treatment for the identified individual species of conservation importance and reception site for transplantation;
  - (d) recommending an implementation programme for in-situ preservation of the identified species of conservation importance and transplantation of the affected species.
- 1.3 AECOM Asia Co. Ltd (AECOM) has been commissioned by the Civil Engineering and Development Department to prepare and submit the Vegetation Survey Report.
- 1.4 This report is to summarize findings of the vegetation survey for the contracts awarded and propose suitable treatment for the plants affected.

### *Project Scope*

- 1.5 The Project covers the site formation and infrastructures for the LT/HYW, and comprises:
- (a) Construction of a dual two-lane trunk road of 11 in length;
  - (b) On-site sewage treatment facility and effluent reuse;
  - (c) Site formation for construction of a Boundary Control Point (BCP) building in the area of Chuk Yuen Village;
  - (d) Associated drainage facilities discharging into the Shenzhen River;
  - (e) Cargo processing facilities;
  - (f) Passenger related facilities;
  - (g) Accommodation for and facilities of the Government departments;

- (h) Provision of transport related facilities inside the BCP;
- (i) Other peripheral structures and supporting facilities;
- (j) Associated diversion / modification works at Lin Ma Hang Road; and
- (k) Associated environmental mitigation measures.

**Construction Contract Packaging**

1.6 To facilitate project management and implementation, the Project will be implemented in the following contract packages: (refer to **Figure 1.0** Project Layout Plan)

- Contract 2 (CV/2012/08)
- Contract 3 (CV/2012/09)
- Contract 4 (TCSS/NE2014/02)
- Contract 5 (CV/2013/03)
- Contract 6 (CV/2013/08)
- Contract 7 (NE/2014/03)

1.7 The details of the contracts are summarized below:

<b>Contract 2</b>	
Contract No.:	CV/2012/08
Contract Name:	Liantang/ Heung Yuen Wai Boundary Control Point Site Formation and Infrastructure Works - Contract 2
Contract Period:	The works commenced in December 2013 and will take about 54 months to complete.
Major Scope of Works:	The works include construction of a dual two-lane trunk road (with about 0.4km of at-grade road and 4.8km of tunnel) connecting the Fanling Interchange with the proposed Sha Tau Kok Interchange, provision and installation of ventilation system, E&M works and building services works for Lung Shan tunnel and Cheung Shan tunnel and their portal buildings, Tunnel Administration Building adjacent to Wo Keng Shan Road and associated landscaping works, drainage / sewerage, waterworks, utilities and traffic engineering works.
Contractor:	Dragages Hong Kong Limited

<b>Contract 3</b>	
Contract No.:	CV/2012/09
Contract Name:	Liantang/ Heung Yuen Wai Boundary Control Point Site Formation and Infrastructure Works - Contract 3
Contract Period:	The works commenced in July 2013 and will take about 63 months to complete.
Major Scope of Works:	The works include construction of four link roads connecting the existing Fanling Highway with the south portal of the Lung Shan Tunnel, realignment of the existing Tai Wo Service Road West and Tai Wo

	Service Road East, widening portion of the existing Fanling Highway and the associated works, demolition of the existing vehicular bridge and footbridge at Kiu Tau and reconstruction of the Kiu Tau Footbridge.
Contractor:	Chun Wo Construction and Engineering Company Limited

<b>Contract 4</b>	
Contract No.:	NE/2014/02
Contract Name:	Liantang/ Heung Yuen Wai Boundary Control Point Site Formation and Infrastructure Works - Contract 4
Contract Period:	The works commenced in April 2016 and will be completed in early 2021. (Major part of the works will be completed by end 2018)
Major Scope of Works:	The works mainly include provision and installation of Traffic Control and Surveillance System for the connecting road.
Contractor:	Siemens Limited

<b>Contract 5</b>	
Contract No.:	CV/2013/03
Contract Name:	Liantang/ Heung Yuen Wai Boundary Control Point Site Formation and Infrastructure Works - Contract 5
Contract Period:	The works commenced in April 2013 and was substantially completed in January 2016.
Major Scope of Works:	The works include site formation of about 23 hectares of land for the development of the new Boundary Control Point (BCP), diversion/modification of Lin Ma Hang Road, landscaping works, drainage/sewerage, waterworks, utilities and traffic engineering works.
Contractor:	Sang Hing Civil - Richwell Machinery JV

<b>Contract 6</b>	
Contract No.:	CV/2013/08
Contract Name:	Liantang/ Heung Yuen Wai Boundary Control Point Site Formation and Infrastructure Works - Contract 6
Contract Period:	The works commenced in June 2015 and will take about 40 months to complete.
Major Scope of Works:	The works include construction of a 4.6km long dual two-lane trunk road (with about 0.6km at grade roads, 3.3km viaducts and a 0.7km tunnel) connecting Sha Tau Kok Road Interchange to BCP, and the associated environmental mitigation measures, landscaping, drainage/sewerage, waterworks and utilities works.
Contractor:	CRBC-CEC-KADEN Joint Venture

<b>Contract 7</b>	
Contract No.:	NE/2014/03
Contract Name:	Liantang/ Heung Yuen Wai Boundary Control Point Site Formation and Infrastructure Works - Contract 7
Contract Period:	The works commenced in December 2015 and will take about 33 months to complete.
Major Scope of Works:	The works include construction of the Hong Kong Special Administrative Region (HKSAR) portion of four vehicular bridges and one pedestrian bridge crossing Shenzhen (SZ) River (cross boundary bridges).
Contractor:	Kwan On-Richwell-SCG JV

## 2 KEY FINDINGS OF THE VEGETATION SURVEY

- 2.1 A detailed vegetation survey was conducted focuses on confirming and updating the condition of the floral species of conservation importance which will be affected directly under the contracts to confirm the condition of *Aquilaria sinensis* and *Euonymus kwangtungensis* identified in the EIA Report. Vegetation Survey for Contract 2, Contract 3, Contract 5, and Contract 6 was conducted.
- 2.2 Section 9.5.4 of the EIA Report provided the detailed description of habitats, including *Aquilaria sinensis* within different sections of the Works Area. **Figure 9.1b** of the EIA Report is provided to illustrate the sections of the Works Areas which is given in the following order:
- Section 1 – BCP;
  - Section 2 & 3 – Lin Ma Hang to Frontier Closed Area Boundary and Ping Yeung to Wo Keng Shan;
  - Section 4 – North Tunnel (Cheung Shan tunnel section);
  - Section 5 – Sha Tau Kok Road (between North and South Tunnel);
  - Section 6 – South Tunnel (Lau Shui Heung tunnel section); and
  - Section 7 – Fanling

### *Aquilaria sinensis*

- 2.3 *Aquilaria sinensis* were identified in Sections 2 & 3, North of Section 5 (Shan Tong), South of Section 5 (Princess Hill) and Section 7. No *Aquilaria sinensis* was identified in Section 1, Section 4 and Section 6. **Table 2.1** summarizes *Aquilaria sinensis* identified in the EIA Report and the Vegetation Survey.

**Table 2.1 *Aquilaria sinensis* identified in the EIA Report and the Vegetation Survey**

Section of Works Area in the EIA Report	EIA Findings (refer to Section 9.5.4)		Vegetation Survey Result				
	Size	Abundance	Relevant Contract in this Project	Trees			Seedling
				Alive	Dead/Topped	Felled by others/Missing	
Section 1 - BCP	No	No	Contract 5	0	0	0	0
Section 2 & 3 - Lin Ma Hang to Frontier Closed Area Boundary and Ping Yeung to Wo Keng Shan	Semi-mature	Some	Contract 5 and Contract 6	65	2	6*	5
Section 4 – North Tunnel (Cheung Shan Tunnel Section)	No	No	Contract 6	0	0	0	0
Section 5 - Sha Tau Kok Road (between North and South Tunnel) - <i>Shan Tong</i>	1.0m tall	1	Contract 6	8	1	0	1
Section 5 - Sha Tau Kok Road (between North and South Tunnel) - <i>Princess Hill</i>	Trees	Some	Contract 2	19	5	18	2
Section 6 – South Tunnel (Lau Shui Heung Tunnel Section)	No	No	Contract 2	0	0	0	0
Section 7 – Fanling	Tree	1	Contract 2 and Contract 3	5	0	1	0
Sub-total				97	8	25	8
Total				130			8
Notes:							
Survey had been conducted after Contract 6 awarded in June 2015.							
*6 numbers of trees were found missing.							

2.4 130 numbers of *Aquilaria sinensis* trees were identified in the Tree Removal Application (TRA) which approved by DLO/N and DLO/TP on 8 August 2013 via DLO/N's memo to CEDD ref. (41) in L/M(5) to DLON 2/61/06 Pt.2 and on 21 October 2013 via DLO/TP's memo to CEDD ref. (11) in LM 6 to DLO/TP 781/173/07 II respectively.

2.5 130 numbers of *Aquilaria sinensis* trees were identified in the vegetation survey in which 49 numbers were within Contract 2, Contract 3 and Contract 5 Works Area and 75 numbers were identified in Contract 6. 6 numbers of trees identified in the TRA were found missing. All the trees identified were summarized in **Table 2.2** with Photographs in **Appendix B**. Damages, mainly wounding in the middle of the trunk, are commonly found which likely due to the illegal extraction of agarwood. A number of trees in Princess Hill area were felled or topped.

**Table 2.2 Summary of *Aquilaria sinensis* Trees Identified in the Vegetation Survey**

AS05	100	100	Fair
AS06	200	150	Fair
AS07	50	50	Fair
AS08	150	100	Fair

***Euonymus kwangtungensis***

2.7 Two individuals of *Euonymus kwangtungensis* were recorded within the Works Area of Section 5 – Sha Tau kok Road (between North and South Tunnel) in EIA Report. Two individual plants of 600mm~900mm in height were found in Princess Hill. **Table 2.4** summarised *Euonymus kwangtungensis* identified in the vegetation survey with photographs in **Appendix C**.

**Table 2.4 Summary of *Euonymus kwangtungensis* Identified in the Vegetation Survey**

Plant No.	Ht. (mm)	Spd. (mm)	Health Condition
EK01	900	400	Fair
EK02	600	300	Fair

2.6 An updated location plan is in **Appendix D** showing the *Aquilaria sinensis* trees and seedlings and *Euonymus kwangtungensis* identified in the Survey and will be affected by the Project.

**3 PROPOSED SUITABLE TREATMENT**

***Aquilaria sinensis***

3.1 Trees are retained in-situ where possible. For trees in conflict with construction works, transplantation is recommended if they are considered suitable for transplanting. Felling is recommended for trees which cannot be transplanted or not suitable for transplanting due to various reasons. For example, trees growing on slope are difficult to form an intact and

sufficient-sized rootball and trees with poor health condition and significant structural problem. Trees in both cases are not transplantable and hence felling is recommended. The felling of these trees under the previous tree removal application have been separately approved by the DLO/N and DLO/TP on 8 August 2013 via DLO/N's memo to CEDD ref. (41) in L/M(5) to DLON 2/61/06 Pt.2 and on 21 October 2013 via DLO/TP's memo to CEDD ref. (11) in LM 6 to DLO/TP 781/173/07 II respectively. **Table 3.1** and **Table 3.2** summarised the proposed treatment and actual status of *Aquilaria sinensis* identified in the Survey.

3.2 **Table 3.1** and **Table 3.2** are updated due to the following reason after the approval of Revision 4 of this Report.

- Approval of application for further tree felling, transplanting and compensatory planting (2 numbers of *Aquilaria sinensis* trees were identified in the application which approved by DLO/N on 26 April 2016 via DLO/N's memo to CEDD ref. (47) in L/M(5) to DLON 2/61/06 Pt.6.)
- Illegal tree felling by others
- Removed due to safety concern

**Table 3.2 Summary of Proposed Treatment to *Aquilaria sinensis* Trees**

Number of Trees to be Retained	22
Number of Trees Suitable for Transplantation	25
Number of Trees to be Felled	48
Number of Trees found Dead	8
Number of Trees found Felled by Others	21
Number of Trees found Missing	6
Total	130

3.3 In-situ preservation of *Aquilaria sinensis* seedlings around trees to be retained is recommended. Seedlings around trees to be felled and transplanted identified during the process will be collected and transplanted to a nursery area. A Woodland compensation Area (WCA) was proposed in the EIA Report. It is recommended to transplant the *Aquilaria sinensis* seedlings from the nursery to the Woodland compensation Area when the area is ready.

3.4 The proposed Woodland Compensation Area in the EIA Report is shown in **Appendix E**. A

Woodland Compensation Plan will be submitted separately to set out the planting strategy for the establishment of the habitats and subsequent maintenance and monitoring requirements for the WCA.

*Euonymus kwangtungensis*

- 3.5 The two individuals of *Euonymus kwangtungensis* identified in the Survey will be affected by construction works. It is recommended to transplant the individuals directly to a nearby suitable reception site within the Project limit with similar habitat where will not be affected by construction activities. The proposed reception site is shown in **Appendix F**.

**4 IMPLEMENTATION PROGRAMME**

*Aquilaria sinensis*

- 4.1 A nursery will be identified for holding the trees and seedlings for future transplantation. Transplantation of trees will be conducted with the overall landscaping works target in 2017. Seedlings will be planted in the Woodland Compensation Area. Planting details and schedule will be specified in the Woodland Compensation Plan.
- 4.2 Trees identified for In-situ preservation will be protected by temporary protective fencing. No site works will be carried out within the tree protection zone. Monitoring with photographic record will be conducted once per two months.
- 4.3 The transplanted trees and seedlings will be held in a nursery until transplanted to their final location. The Contractor will carry out necessary arboricultural work to maintain the transplanted trees in healthy condition during the holding period. After transplanting to their final locations, the transplanted trees will be maintained immediately by the Contractor and the maintenance will include watering, application of root activator and fertilizing. All the transplanted trees will be monitored once per month for their health condition until the expiry of the establishment period.
- 4.4 The transplanted seedlings will be monitored at least twice a month during the first year and once a month for the remaining of the planting period of the Woodland Compensation Area. The parameters to be monitored will include the health condition and survival rate of the transplanted species. Any observations and recommendations will be reported in periodic EM&A reports.

*Euonymus kwangtungensis*

- 4.5 The two *Euonymus kwangtungensis* plants will be transplanted before commencement of works at the subject location. The transplanted individual will be monitored twice a month during the first year and once a month for the remaining contract period.

**5 CONCLUSION**

- 5.1 According to the EIA Report, two species of conservation interest *Euonymus kwangtungensis* and *Aquilaria sinensis* are required to be transplanted to undisturbed areas. As the condition of plants recorded in the EIA stage may be varied, a vegetation survey to confirm the condition of the plants was conducted in Contract 2, Contract 3, Contract 5 and Contract 6. Findings of the survey and proposed treatment are presented in this report.
- 5.2 Seedlings of *Aquilaria sinensis* were found and recommended to be transplanted to nursery and to Woodland Compensation Area proposed in the EIA Report when the Area is ready. Two numbers

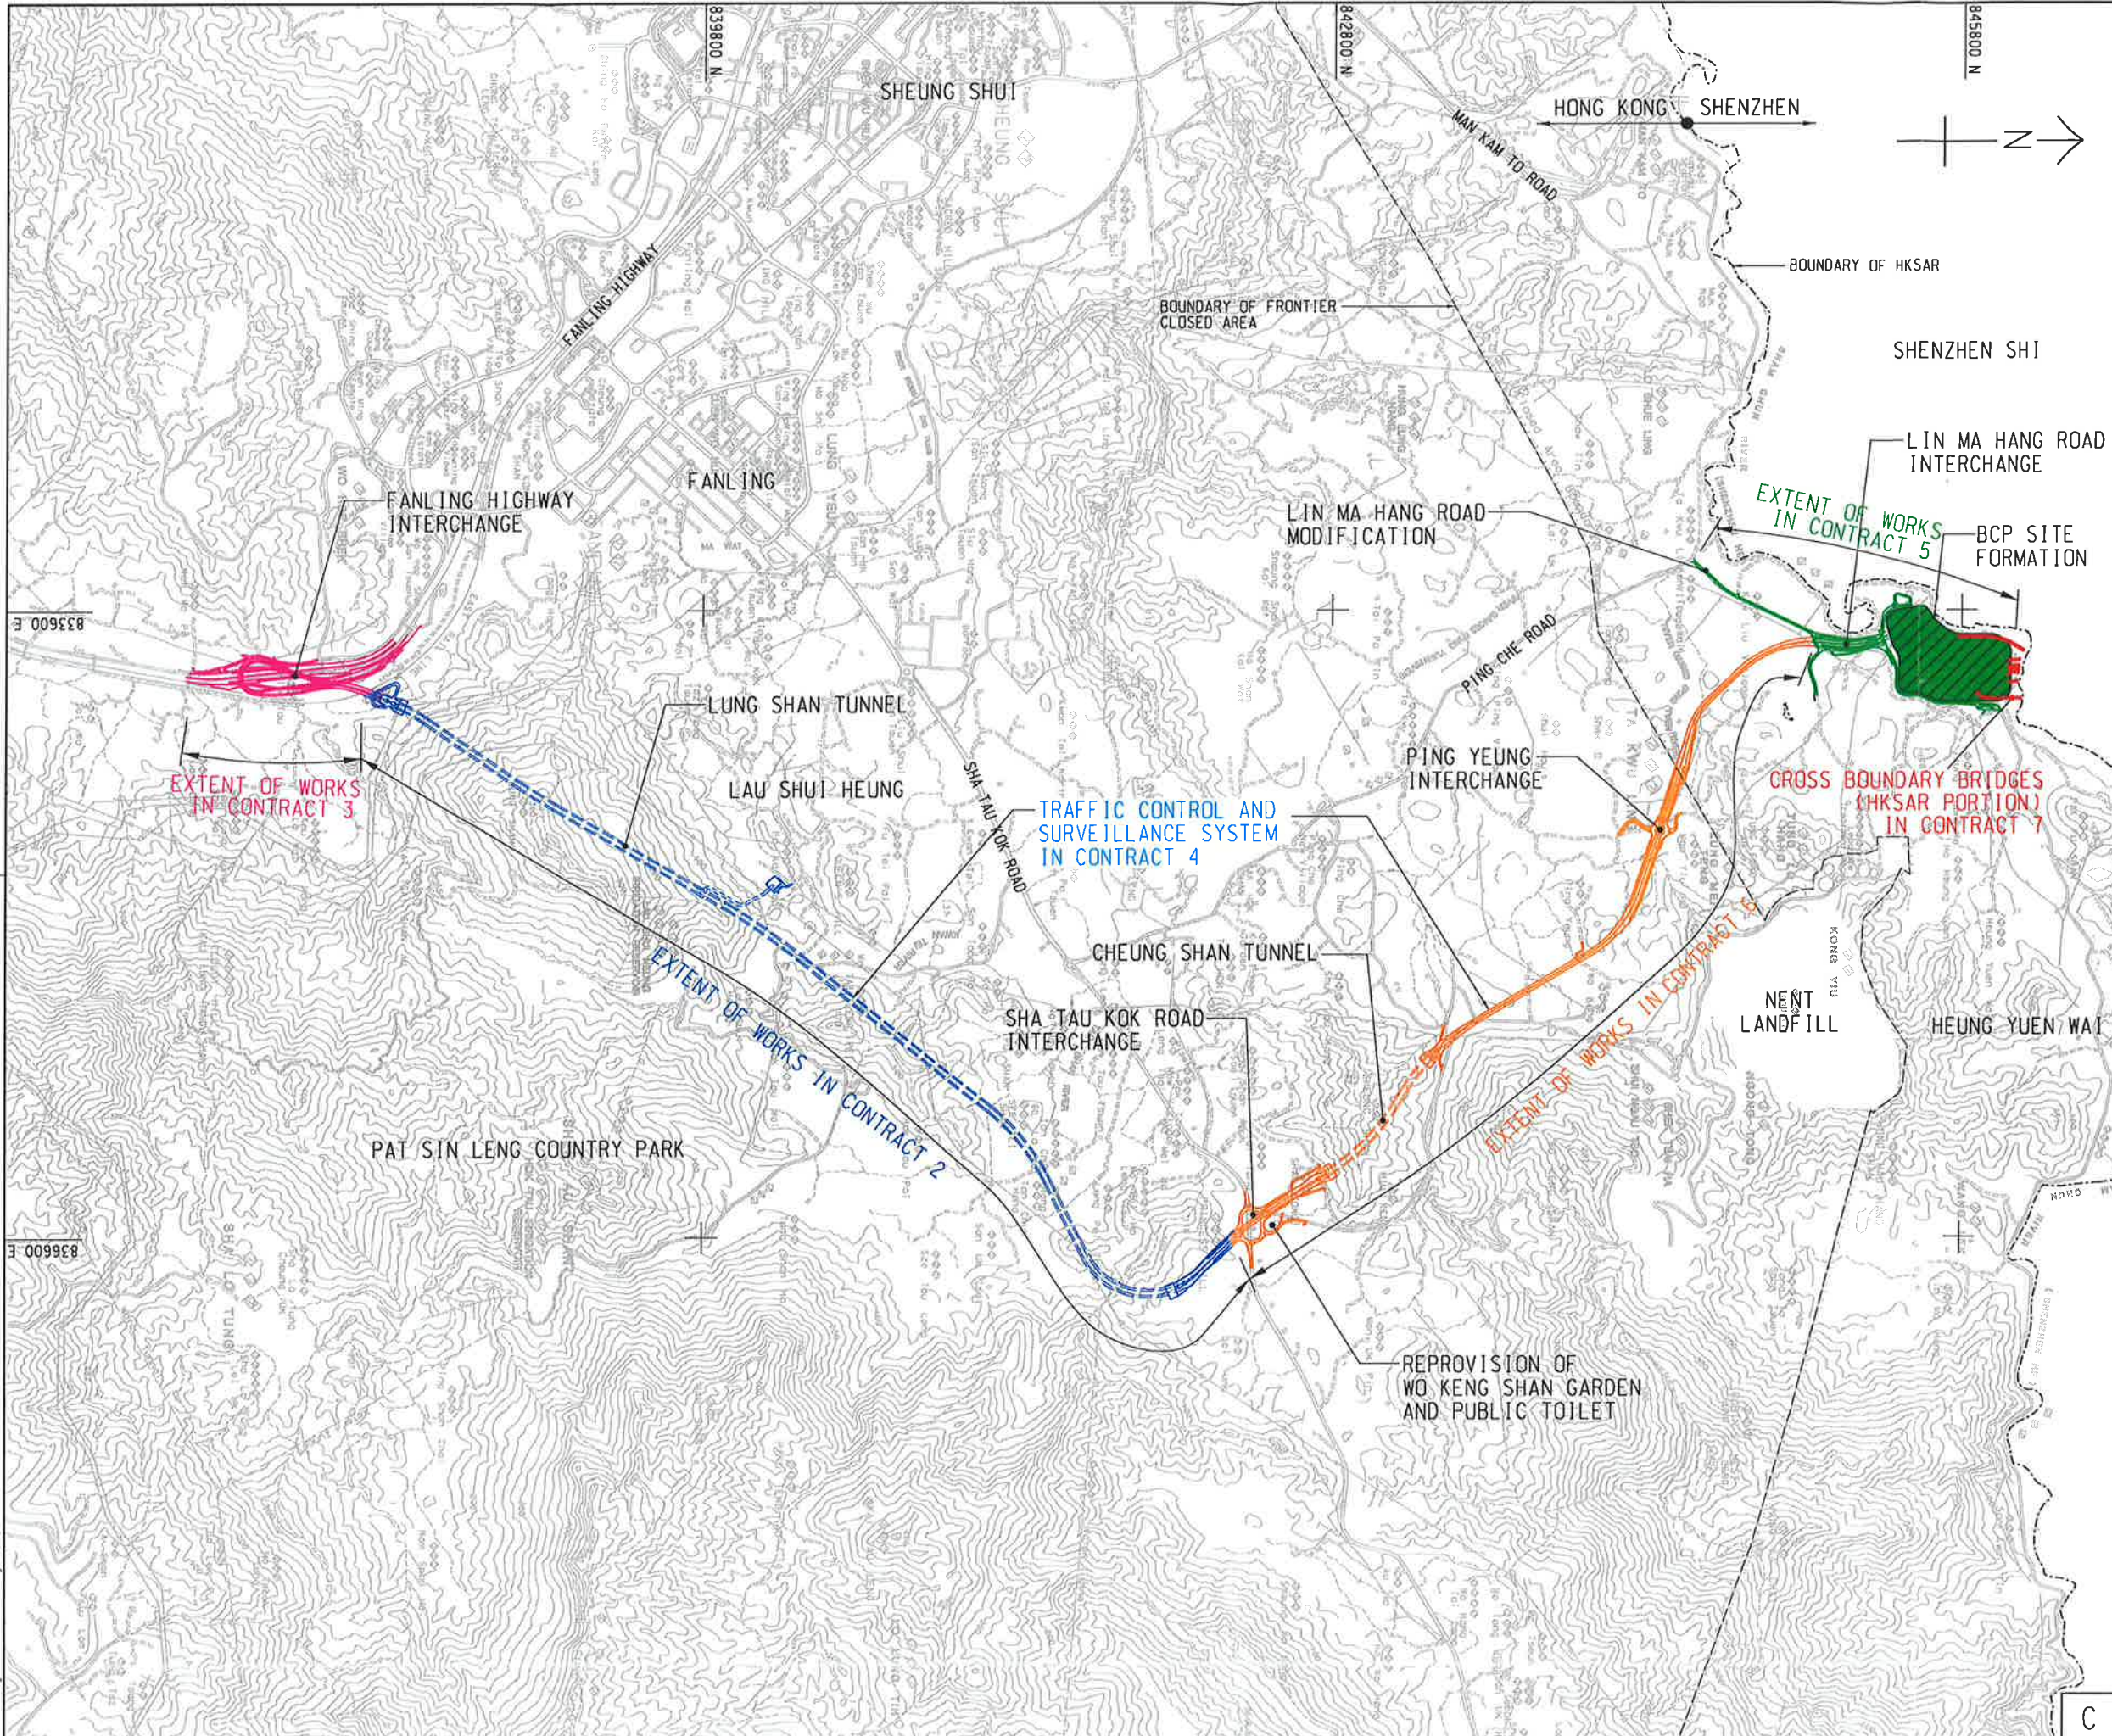

of *Euonymus kwangtungensis* individuals were identified. It is recommended to transplant the individuals directly to a nearby suitable reception site within the Project limit with similar habitat where will not be affected by construction activities.

- 5.3 Trees of *Aquilaria sinensis* are retained in-situ where possible. For trees in conflict with construction works, transplantation is recommended if they are considered suitable for transplanting. Felling is recommended for trees which cannot be transplanted or not suitable for transplanting due to various reasons.
