Follow-up actions for previous Site Audit:

Follow-up actions taken for the observations as recorded during the previous landscape monitoring conducted on 19 February 2021:

i) The health of the tree, *Grevillea robusta*, grown in the vicinity of F17 (pier mark) was not improved (see Observation 1); and ii) Tree re-planting works for *Grevillea robusta* in the vicinity of F16 (pier mark) had been idle since last monitoring (see Observation 2).

Observations:

Obs. 1: The health of the tree with sparse foliage, *Grevillea robusta*, grown in the vicinity of F17 (pier mark) was not improved, and it was eventually dead and removed from site as advised by the SOR on site. Tree re-planting works should be undertaken in accordance with the latest planting plans within the planting season.

Obs. 2: Re-planting works for the tree, *Grevillea robusta*, in the vicinity of F16 (pier mark) had been idle since last monitoring conducted in February 2021. Tree re-planting works should be undertaken in accordance with the latest planting plans within the planting season.

Obs. 3: The tree, *Grevillea robusta*, planted with tree support systems in the vicinity of E14-A (pier mark) was leant. The tree health condition in terms of leaning should be closely monitored and reviewed, and tree support systems with strength should be utilised, as necessary.

Obs. 4: The tree, *Plumeria rubra*, planted in the vicinity of E14-A (pier mark) was in wilting. The tree health condition should be closely monitored and reviewed, and tree re-planting works should be undertaken in accordance with the latest planting plans if the tree has to be removed from site eventually.

Obs. 5: Bare ground in the vicinity of F13 (pier mark) was observed. Grass planting, *Zoysia japonica*, should be undertaken in accordance with the latest planting plans within the planting season.

Corrective Actions (if any):

- Tree health condition should be closely monitored and reviewed.
- Tree re-planting and grass planting works should be undertaken in accordance with the latest planting plans.

General Conclusion:

Total number of trees planted: 275 (Zone 2). Planting area (Zone 2): 4.71 ha (based on the survey data provided by the SOR).

Follow up actions for previous Site Audit on 25 February 2021:

1. Incorrect species of tree in Zone 5 was replaced.
2. The tree (T2820 *Melaleuca cajuputi* subsp. *Cumingiana*) on toll plaza became wilted was replaced.
3. The newly-grown leaves were observed for the trees (*Bauhinia variegata*) on slope (5SE-D/C171) that became wilted in last inspection.

Observations:

1. The tree HL409 (*Cinnamomum burmannii*) on slope (5SE-D/C170) became bent had been supported in upright position.
2. The trees HL250 (*Machilus chekiangensis*) on slope (5SE-D/C170) became wilted; the tree health condition in terms of irrigation should be closely monitored and reviewed..
3. The trees (*Bauhinia variegata*) on slope (5SE-D/C171) became wilted; the tree health condition in terms of irrigation should be closely monitored and reviewed.
4. The trees (*Bauhinia variegata*) on slope (5SE-D/C215) became wilted; the tree health condition in terms of irrigation should be closely monitored and reviewed.

Corrective Actions (if any):

1. Tree health condition, irrigation in particular, should be closely monitored and reviewed.

General Conclusion:

The establishment planting for the contract is generally in fair and good condition. Regularly watering, fertilizing, weeding, pruning and mowing had been provided by Contractor. Some tree planting species are different from the approved tree planting plan should be rectified.
