Attention: Mr. Roger Man

Dear Mr. Man,

Re: Agreement No. CE 48/2011 (EP) Environmental Project Office for the HZMB Hong Kong Link Road, HZMB Hong Kong Boundary Crossing Facilities, and Tuen Mun-Chek Lap Kok Link – Investigation

Contract No. HY/2013/12 TM-CLKL – Northern Connection Toll Plaza and Associated Works 19th Quarterly EM&A Summary Report (May 2019 to July 2019)

Reference is made to the ET's submission of 19th Quarterly EM&A Summary Report (May 2019 to July 2019) certified by the ET Leader (ET's ref.: "TCS00715/14/600/R0579v2" dated 4 September 2019) and provided to us via e-mail on 4 September 2019.

Please be informed that we have no adverse comments on the captioned report.

Thank you for your attention. Please do not hesitate to contact the undersigned or the ENPO Leader, Mr. Y. H. Hui, should you have any queries.

Yours sincerely,

Trop Cleop

EXECUTIVE SUMMARY

ES.01. This is the **19th** Quarterly EM&A Summary Report for the "*Tuen Mun - Chek Lap Kok Link - Northern Connection Toll Plaza and Associated Works*" under Environmental Permit No. EP-354/2009/D (hereinafter "the EP"), covering the period from **1 May to 31 July 2019** (hereinafter "Reporting Period").

ENVIRONMENTAL MONITORING AND AUDIT ACTIVITIES

ES.02. Environmental monitoring activities under the EM&A programme in the Reporting Period are summarized in the following table.

Environmental Aspect Environmental Monitoring Parameters / Inspection		Total Occasions
Air Quality	1-hour Total Suspended Particulates (TSP)	465
Air Quality	24-hour TSP	155
Cultural heritage inspection	Grave G1	13
Landfill Gas Monitoring	Oxygen; Methane & Carbon Dioxide	51 days
Landscape &Visual	Landscape & Visual Monitoring	13
Joint Site Inspection / Audit	IEC, ET, the Contractor and RE joint site Environmental Inspection and Auditing	13

BREACHES OF ACTION/LIMIT LEVELS

ES.03. In the Reporting Period, 2 Action Level exceedances of 1-hour TSP were recorded at ASR1 on 11 & 23 May 2019 respectively and 1 Action Level exceedance of 24-hour TSP was recorded at ASR1 on 23 May 2019; 1 Action Level exceedance of 1-hour TSP was recorded at ASR6 on 10 July 2019; 1 Limit Level and 1 Action Level exceedances of 1-hour TSP were recorded at ASR1 and ASR5 on 28 July 2019 respectively according to the measurement results by the ET of Contract HY/2012/08, investigation reports for the exceedances have been completed and the corresponding investigation reports have been submitted to all relevant parties. The summary of breach of air quality performance is shown below.

Environmentel	Manifaring Astion		T ::4	Event & Action		
Environmental Aspect	Monitoring Parameters	Action Level		NOE Issued	Investigation	Corrective Actions
A in Onelity	1-hour TSP	4	1	4	4	0
Air Quality	24-hour TSP	1	0	1*	1*	0
Londfill Coo	Oxygen	0	0	0	0	0
Landfill Gas Monitoring	Methane	0	0	0	0	0
	Carbon Dioxide	0	0	0	0	0

*NOE and IR for 23 May 2019 was included for both 1 & 24-Hr exceedance

ENVIRONMENTAL COMPLAINT

ES.04. In the Reporting Period, one (1) environmental complaint was received from EPD and referred by ENPO on 22 May 2019 regarding construction dust created at construction area near River Trade Terminal and Chu Kong Warehouse. The investigation report (IR) has been submitted by ET and concluded that the complaint was not contract related.

NOTIFICATION OF SUMMONS AND SUCCESSFUL PROSECUTIONS

ES.05. No environmental summons or successful prosecutions were recorded in the Reporting Period.

REPORTING CHANGES

ES.06. No reporting changes were made in the Reporting Period.

FUTURE KEY ISSUES

- ES.07. During the wet season, muddy water or other water pollutants from site surface runoff into the public areas will be key environment issue. Special attention should be paid on the water quality mitigation measures to prevent surface runoff flow to public area.
- ES.08. Although in wet season, air quality mitigation measures such as watering of site area for at least 12 times per day and covering of exposed slopes should be fully implemented to reduce construction dust impact as recommended in the EMIS.
- ES.09. It was reminded that good housekeeping practice should be maintained. Mosquito control measures should be properly implemented to prevent mosquito breeding on site especially after rain.

1. INTRODUCTION

1.1. PROJECT BACKGROUND

- 1.1.1. CRBC-Kaden Joint Venture (hereafter "CRBC-Kaden JV") is commissioned by the Highways Department (HyD) as the Main Contractor of the Contract No. HY/2013/12 Northern Connection Toll Plaza and Tunnel Section ((hereafter "the Contract") and this Contract is part of the Tuen Mun Chek Lap Kok Link (TM-CLK Link Project). The TM-CLK Link Project is a designated project under Environmental Permit number EP-354/2009/D issued on 13 March 2015. The layout Plan of the Project and the Contract are showed in *Appendix A* and *B* respectively.
- 1.1.2. The construction works of the Contract mainly include:
 - a. construction of an approximately 5.4 hectares toll plaza and an associated footbridge;
 - b. construction of associated carriageways including approximately 0.74 kilometre land viaducts, and an approximately 230 metres vehicular underpass to connect the toll plaza and the roundabout at Lung Mun Road/Lung Fu Road;
 - c. site formation for the construction of the toll plaza, including associated slope works and natural terrain hazard mitigation measures;
 - d. modification and realignment of the existing Lung Mun Road and Lung Fu Road; and
 - e. associated waterworks, drainage, sewerage and landscaping works, etc..
- 1.1.3. Action-United Environmental Services & Consulting has been commissioned as an Independent ET to implement the relevant EM&A program in accordance with the approved EM&A Manual, as well as the associated duties.
- 1.1.4. This is the 19th Quarterly EM&A Summary Report covering the period from 1 May to 31 July 2019.

1.2 REPORT STRUCTURE

- 1.2.1 The Quarterly Environmental Monitoring and Audit (EM&A) Report is structured into the following sections:-
 - Section 1 Introduction Section 2 Contract Organization and Construction Progress Section 3 Summary of Impact Monitoring Requirements Section 4 Air Quality Monitoring Section 5 Ecology Monitoring Section 6 Cultural Heritage Section 7 Landscape and Visual Section 8 Landfill gas hazard Monitoring Section 9 Waste Management Section 10 Site Inspections Section 11 Environmental Complaints and Non-Compliance Section 12 Implementation Status of Mitigation Measures Section 13 Conclusions and Recommendations

2 CONTRACT ORGANIZATION AND CONSTRUCTION PROGRESS

2.1 CONTRACT ORGANIZATION

2.1.1 The Contract organization and contact details of key personnel are shown in *Appendix C*.

2.2 CONSTRUCTION PROGRESS

2.2.1 In the Reporting Period, the major construction activity conducted under the Contract is summarized in below. Moreover, the three-month rolling programme is enclosed in *Appendix D*.

May 2019

- Instrumentation and Monitoring;
- Surface Drainage on Slope C, D & E and Portion H;
- E & M Works at Retaining Wall B;
- Construction of Manhole and Sewer Culvert at Portion G and H;
- Road and Drainage Works at LMR Central Median;
- Road pavement works at +19mPD platform, Lung Mun Road
- Installation of Sign Gantries;
- Landscape planting works on slopes.

June 2019

- Instrumentation and Monitoring;
- Surface Drainage on Portion H;
- E & M Works at Retaining Wall B;
- Road and Drainage Works at LMR and Butterfly Beach;
- Installation of Sign Gantries;
- Landscape planting works on slopes;
- Sewerage works at Ho Yeung Street;
- Installation of Screen Barrier.

July 2019

- Instrumentation and Monitoring;
- Surface Drainage on Portion H;
- E & M Works at Retaining Wall B;
- Road and Drainage Works at LMR and Butterfly Beach;
- Installation of Sign Gantries;
- Landscape planting works on slopes;
- Sewerage works at Ho Yeung Street ;
- Installation of Screen Barrier.

2.3 SUMMARY OF ENVIRONMENTAL SUBMISSIONS

- 2.3.1 According to the EP, the required documents had been submitted to EPD for retention and are listed below:
 - Monitoring Plan on Construction Dust (submission refer to Contract HY/2012/08)
 - Landscape and Visual Plan (not yet endorsed by EPD)
 - Waste Management Plan (endorsed by EPD on 16 March 2015)
 - Baseline Monitoring Report (not yet endorsed by EPD)

2.3.2 Summary of the relevant permits, licenses, and/or notifications on environmental protection for Contract No. HY/2013/12 are presented in *Table 2-1*.

No.	Type of Permit/ License	Reference/ License No.	Date of Issue	Date of Expiry
1	Air pollution Control (Construction Dust) Regulation	377719	06-08-2014	N/A
2	Chemical Waste Producer Registration - Waste Producers Number	5117422C389301	03-09-2014	N/A
3	Water Pollution Control Ordinance -Variation of Effluent Discharge License	WT00023973-2016	25-10-2017	30-09-2019
4	Waste Disposal Regulation - Billing Account for Disposal of Construction Waste	7020460	01-08-2014	N/A
5	CNP for Multiple Task	GW-RW0480-18	25-11-2018	24-05-2019

9	CNP for Lung Fu Road	GW-RW0341-19	26-07-2019	28-09-2019

3 SUMMARY OF IMPACT MONITORING REQUIREMENTS

3.1 GENERAL

- 3.1.1 The major construction activities under the Contract are land-based and no marine work will be involved. In accordance with the Project EM&A Manual requirements, the environmental aspects under the Contract shall be included air quality, ecological, cultural heritage, landscape and visual, landfill gas and site inspection during construction period. In addition, audit of the contractor's implementation of the construction noise and land-based water quality pollution control measures are also required for the Contract.
- 3.1.2 A summary of construction phase EM&A requirements are presented in the sub-sections below.

3.2 AIR QUALITY MONITORING

- 3.2.1 The construction phase air quality monitoring shall cover the following parameters:
 - 1-hour TSP; and
 - 24-hour TSP

3.3 MONITORING LOCATIONS

3.3.1 The air quality monitoring stations for impact monitoring are listed in *Table 3-1* and illustrated in *Appendix E*.

ID	Location	Air monitoring station Description
ASR1	Tuen Mun Fireboat Station	EM&A Manual
ASR5	Pillar Point Fire Station	EM&A Manual
AQMS1	Previous River Trade Golf	Enhanced TSP Level under EP condition 2.4
ASR6	Butterfly Beach Laundry	Enhanced TSP Level under EP condition 2.4
ASR10	Butterfly Beach Park	Enhanced TSP Level under EP condition 2.4

 Table 3-1
 Air Quality Monitoring Stations under the Contract

3.4 MONITORING FREQUENCY

- 3.4.1 As per Condition 2.4 of the EP of TM-CLKL, an enhanced monitoring plan on TSP level at Tuen Mun ("the Enhanced TSP Monitoring Plan") is required to be submitted to the DEP for approval at least 1 month before the commencement of construction of the Project. Details of the Enhanced TSP Monitoring Plan under Contract No. HY/2012/08 could be found from the project website. The air quality monitoring work under this Contract will follow the monitoring requirement of enhanced TSP monitoring under the project.
- 3.4.2 The air quality monitoring requirements for the Contract is summarized in *Table 3-2*.

 Table 3-2
 Enhanced TSP Monitoring Plan – Construction Phase

Condition	Monitoring Parameter	Monitoring Location	Frequency	Monitoring Requirement
General	1-hour TSP 24-hour TSP	ASR1, ASR5, AQMS1, ASR6, ASR10 ASR1, ASR5, AQMS1, ASR6, ASR10	3 times per day every six days Daily every six days	Throughout the Northern Connection, toll plaza and tunnel buildings construction works
Special	1-hour TSP	ASR1, ASR5, AQMS1, ASR6, ASR10	3 times per day every three days	Northern ConnectionDuring excavation worksforlaunchingshaft,excavationworkforCut

Condition	Monitoring Parameter	Monitoring Location	Frequency	Monitoring Requirement
	24-hour	ASR1, ASR5,	Daily every	and Cover Tunnel and Cut
	TSP	AQMS1, ASR6,	three days	and Cover Tunnel
		ASR10		Construction
				<u>Toll Plaza</u>
				During excavation, slope
				works, construction of road
				and superstructures and
				wind erosion from open
				sites and stockpiling areas
				Tunnel Buildings
				During excavation,
				foundation works,
				construction of
				superstructures and wind
				erosion from open sites and
				stockpiling areas

3.5 MONITORING EQUIPMENT

- 3.5.1 The 24-hour and 1-hour TSP levels shall be measured by following the standard high volume sampling method as set out in the *Title 40 of the Code of Federal Regulations, Chapter 1 (Part 50), Appendix B.*
- 3.5.2 A high volume sampler in compliance with the following specifications shall be used for carrying out the 1-hr and 24-hr TSP monitoring:
 - (i) 0.6-1.7 m3/min (20-60 SCFM) adjustable flow range;
 - (ii) equipped with a timing/control device with +/- 5 minutes accuracy for 24 hours operation;
 - (iii) installed with elapsed-time meter with +/- 2 minutes accuracy for 24 hours operation;
 - (iv) capable of providing a minimum exposed area of $406 \text{ cm} 2 (63 \text{ in}^2)$;
 - (v) flow control accuracy: +/- 2.5% deviation over 24-hr sampling period;
 - (vi) equipped with a shelter to protect the filter and sampler;
 - (vii) incorporated with an electronic mass flow rate controller or other equivalent devices;
 - (viii) equipped with a flow recorder for continuous monitoring;
 - (ix) provided with a peaked roof inlet;
 - (x) equipped with a manometer;
 - (xi) able to hold and seal the filter paper to the sampler housing in a horizontal position;
 - (xii) easy to change the filter; and
 - (xiii) capable of operating continuously for 24-hr period.
- 3.5.3 Calibration of dust monitoring equipment shall be conducted by the ET upon installation and in bi-monthly intervals during construction phase. The transfer standard shall be traceable to the internationally recognized primary standard and be calibrated annually. The calibration data shall be properly documented for future reference by concerned parties, such as the IEC. All the data shall be converted into standard temperature and pressure condition.
- 3.5.4 The filter paper of 1-hour TSP and 24-hour TSP measurement shall be determined by HOKLAS accredited laboratory.
- 3.5.5 According to the Project EM&A Manual, wind data monitoring equipment shall also be provided and set up for logging wind speed and wind direction near the dust monitoring locations. The equipment installation location shall be proposed by the ET Leader and agreed with the IEC. For installation and operation of wind data monitoring equipment, the following

points shall be observed:

- (i) the wind sensors should be installed on masts at an elevated level 10 m above ground so that they are clear of obstructions or turbulence caused by the buildings;
- (ii) the wind data should be captured by a data logger to be down-loaded for processing at least once a month;
- (iii) the wind data monitoring equipment should be re-calibrated at least once every six months; and
- (iv) wind direction should be divided into 16 sectors of 22.5 degrees each.

3.6 DERIVATION OF ACTION/LIMIT (A/L) LEVELS

3.6.1 The baseline monitoring results formed the basis for determining the air quality criteria for the impact monitoring. The ET shall compare the impact monitoring results with air quality criteria set up for 24-hour TSP and 1-hour TSP. Based on results of the approved Baseline Monitoring Report of HyD Contract HY/2012/08, the Action and Limit Levels for impact dust monitoring are shown in *Table 3-3*.

Air Quality Monitoring	24-hour T	SP (μg/m ³)	1-hour TS	SP (μg/m ³)
Stations	Action Level	Limit Level	Action Level	Limit Level
ASR1	213	260	331	500
ASR5	238	260	340	500
AQMS1	213	260	335	500
ASR6	238	260	338	500
ASR10	214	260	337	500

 Table 3-3
 Action and Limit Levels for Impact Air Quality Monitoring

3.6.2 Should non-compliance of the environmental quality criteria occurs, remedial actions will be triggered according to the Event and Action Plan which presented in *Appendix F*.

3.7 OTHER ENVIRONMENTAL ASPECTS

<u>Noise</u>

- 3.7.1 The TM-CLKL EIA study stated that no existing noise sensitive receiver (NSR) was identified within the Study Area at Tuen Mun. Therefore, no noise monitoring is required for the construction phase of the Contract.
- 3.7.2 Regular site inspections and audits will be carried out during the construction phase in order to confirm the construction works under the Contract comply with the regulatory noise requirements.

Water Quality

3.7.3 No marine works will be undertaken under the Contract. Therefore, no water quality monitoring is required for the construction phase of the Contract.

<u>Ecology</u>

- 3.7.4 No marine works will be undertaken under the Contract and generated marine ecological impact, no dolphin monitoring is required for the construction phase of the Contract.
- 3.7.5 During construction phase, the ET will perform Pitcher Plants inspection at least once every week to report the growth condition (only undertaken at Establishment period) and protection measures.

Landscape and Visual

3.7.6 Measures to mitigate landscape and visual impact during construction should be checked and monitored by a Registered Landscape Architect to ensure compliance with the intended aims of

the mitigation measures in accordance with the EM&A Manual.

Cultural Heritage

3.7.7 Grave G1 as a heritage resource is situated near the proposed toll plaza in Tuen Mun. Site inspections should be undertaken at least once per week throughout the construction period to ensure compliance with the intended aims of recommended mitigation measures.

Landfill Gas

3.7.8 During EIA study, landfill gas hazards are likely to be generated from the Pillar Point Valley (PPV) Landfill. Landfill gas monitoring is recommended during construction of the Contract to ensure the works area is free of landfill gas before the worker entered the concerned area.

4 AIR QUALITY MONITORING

4.1 GENERAL

4.1.1 The air quality impact monitoring and enhanced Total Suspended Particulates (TSP) level monitoring at five proposed locations are currently carried out by the ET of Contract HY/2012/08. Sharing of impact air quality monitoring data between HY/2012/08 and HY/2013/12 is agreed by all relevant parties. The Contract is not required to conduct its own dust monitoring exercise until the Contract HY/2012/08 ends.

4.2 SUMMARY OF MONITORING RESULTS

4.2.1 In the Reporting Period, 1- hour and 24-hour TSP monitoring at the five proposed locations are continued to perform by the ET of Contract HY/2012/08. Therefore, no air quality monitoring was conducted by the ET of Contract HY/2013/12. Details information of air quality monitoring results could be referred to the Monthly EM&A Reports of the Contract HY /2012 /08 (*May 2019, June 2019 and July 2019*).

4.3 ACTION AND LIMIT (A/L) LEVELS EXCEEDANCE

4.3.1 According to the air quality monitoring result provided by Contract HY/2012/08, 2 Action Level exceedances of 1-hour TSP were recorded at ASR1 on 11 & 23 May 2019 respectively and 1 Action Level exceedance of 24-hour TSP was recorded at ASR1 on 23 May 2019; 1 Action Level exceedance of 1-hour TSP were recorded at ASR6 on 10 July 2019; 1 Limit Level and 1 Action Level exceedances of 1-hour TSP were recorded at ASR6 on 10 July 2019; 1 Limit Level and 1 Action Level exceedances of 1-hour TSP were recorded at ASR6 on 10 July 2019; 1 Limit Level and 1 Action Level exceedances of 1-hour TSP were recorded at ASR1 and ASR5 on 28 July 2019. Notification on Exceedances (NOEs) were issued after receiving the monitoring result from the Contract HY/2012/08. The summary of air quality exceedance in the Reporting Period is shown in *Table 4-1*.

Date of Exceedance	Monitoring Station	Air Quality Parameter	Result	Exceed
11 May 2019	ASR1	1Hr TSP	$339 \ \mu g/m^3$	Action Level
23 May 2019	ASR1	1Hr TSP	$408 \ \mu g/m^3$	Action Level
23 May 2019	ASR1	24Hr TSP	$217 \ \mu g/m^3$	Action Level
10 July 2019	ASR6	1Hr TSP	$372 \ \mu g/m^3$	Action Level
28 July 2019	ASR1	1Hr TSP	$646 \ \mu g/m^3$	Limit Level
28 July 2019	ASR5	1Hr TSP	$410 \ \mu g/m^3$	Action Level

 Table 4-1
 Summary of Air Quality Monitoring Exceedance

4.4 AIR QUALITY EXCEEDANCE INVESTIGATION

- 4.4.1 Investigation for the 1-hour and 24-hour TSP exceedance was undertaken upon received the monitoring results by the ET.
- 4.4.2 For the exceednances in this reporting period, the investigation reports were submitted to all relevant parties and concluded that those exceedances are unlikely related to the Contract work and no corrective action was required accordingly. The detailed investigation reports and findings can be referred to the Monthly EM&A Reports (May 2019 and July 2019) of the contract.

5 ECOLOGY MONITORING

5.1 GENERAL

5.1.1 According to the EM&A Manual requirements, regularly inspection for Pitcher Plants shall be conducted at least once every week to report the protection measure of the Pitcher Plants during construction period.

5.2 PITCHER PLANTS INSPECTION

- 5.2.1 Total 181 pitcher plants were transplanted to final receptor site and the rest of the Pitcher Plant individuals (certified dead by the specialist) were not transplanted and were treated as general refuse. All the transplantation of pitcher plant from the nursery site to final receptor site was completed on 10th September 2015.
- 5.2.2 In the Reporting Period, inspections for implementation status of mitigation measures for the Pitcher Plants were carried out by the ET on 8th, 14th, 21st, 28th May 2019, 4th, 11th, 18th, 25th June 2019, 2nd, 9th, 16th, 23rd and 30th July 2019.
- 5.2.3 Establishment period for the pitcher plants was completed at the end of September 2016, the join site completion of Establishment period visit with AFCD was undertaken on 23 September 2016 and the final pitcher plants report was submitted to AFCD on early December 2016. Therefore after 23 September 2016, only the integrity of the protection fence was checked to fulfill the EIA requirement. During each inspection, the protection mitigation measures were checking at the final receptor area to make sure no site activities was undertaken inside the protection zone. Besides, no construction activities were observed to be carried out at the surrounding of the final receptor area. The condition of chain link fence is good and no repair or maintenance is required.
- 5.2.4 No matters the completion of Establishment period, the Contractor should properly maintain the fencing along the receptor area to avoid disturbance to the pitcher plants under the EIA requirement.

6 CULTURAL HERITAGE

6.1 GENERAL

- 6.1.1 According to the EM&A Manual requirements, regular inspection for heritage resource, Grave G1, shall be audited by the ET at least once every week to ensure recommended mitigation measures implemented during construction period. The aim of the survey is to prevent any possible damage to the grave and to ensure the proposed mitigation measures are implemented. The broad scope of the audit will involve supervision of the following:
 - Non-contact effects of the engineering works, such as vibration from pneumatic drills which could cause damage, such as foundation or wall cracks and loosening of tiles or fixtures; and
 - Contact between the historic structures and equipment and materials associated with the engineering works.
- 6.1.2 Specifically, the monitoring programme will entail the following tasks:
 - The extent of the agreed works areas should be regularly checked during the construction phase to ensure the buffer is being maintained; and
 - Ensure no stockpiling or equipment storage is affecting the structure.
- 6.1.3 In the event of non-compliance the responsibilities of the relevant parties is detailed in the Event/ Action Plan in *Appendix F*.

6.2 GRAVE INSPECTION

- 6.2.1 In the Reporting Period, site inspection for the Grave G1 was undertaken on 8th, 14th, 21st, 28th May 2019, 4th, 11th, 18th, 25th June 2019, 2nd, 9th, 16th, 23rd and 30th July 2019. During these inspections, buffer zone was maintained between the working area and the Grave. The nearby areas were clean, and no construction materials or mechanical equipment were stored within or close to the buffer zone. Moreover protective measures (hoarding and scaffold with protective net above the grave) was provided for constructing Toll Plaza Decking TD2 deck structure.
- 6.2.2 Accordingly, the Contractor has had fully implemented cultural heritage mitigation measures in accordance with the EM&A Manual requirements.

7 LANDSCPAE AND VISUAL

7.1 GENERAL

7.1.1 According to EM&A Manual requirements, monitoring of Contractor's operations during construction period to report on Contractor's compliance should be carried out on weekly basis. Measure to mitigate landscape and visual impact during construction should be checked and monitored by a Registered Landscape Architect to ensure compliance with the intended aims of the mitigation measures. Moreover, the progress of the engineering works shall be regularly reviewed on site to identify the earliest practical opportunities for the landscape works to be undertaken.

7.2 LANDSCAPE AND VISUAL INSPECTION

- 7.2.1 In the Reporting Period, site inspection for landscape and visual mitigation measures was undertaken by the Registered Landscape Architect on 3rd, 10th, 17th, 24th, 31st May 2019, 6th, 14th, 21th, 28th June 2019, 5th, 12th, 19th and 26th July 2019.
- 7.2.2 Landscape works such as slope planting was commenced and some transplanting works was commenced on 22 May 2017. The detailed inspection checklists can be referred to the Monthly EM&A Reports (May 2019, June 2019 and July 2019) of the contract.

8 LANDFILL GAS HAZARD MONITORING

8.1 GENERAL

- 8.1.1 During EIA study, landfill gas hazards are likely to be generated from the Pillar Point Valley (PPV) Landfill. Hence, regular landfill gas monitoring is recommended during construction of the proposed toll plaza.
- 8.1.2 During construction, a Safety Officer should be appointed to carry out the monitoring works. The monitoring frequency and areas to be monitored should be set down prior to commencement of ground-works either by the Safety Officer or an approved and appropriated qualified person. The routine monitoring should be carried out in all excavations, manholes, chambers, relocation of monitoring wells and any other confined spaces that may have been created. All measurements in excavations should be made with the extended monitoring tube located not more than 10 mm from the exposed ground surface. Monitoring should be performed properly to make sure that the area is free of landfill gas before any man enters in the area.
- 8.1.3 For excavations deeper than 1m, measurements should be carried out:
 - at the ground surface before excavation commences;
 - immediately before any worker enters the excavation;
 - at the beginning of each working day for the entire period the excavation remains open; and
 - periodically through the working day whilst workers are in the excavation.
- 8.1.4 For excavations between 300mm and 1m deep, measurements should be carried out:
 - directly after the excavation has been completed; and
 - periodically whilst the excavation remains open
- 8.1.5 For excavations less than 300mm deep, monitoring may be omitted, at the discretion of the Safety Officer or other appropriately qualified person.
- 8.1.6 To ensure the accuracy of the monitoring data, zeroing of the gas analyser shall be undertaken at the start of each day's monitoring. As advised by the SO, the gas analyser would be optimally calibrated by the self-test function to provide the most accurate result. The gas analyser is calibrated and certified by a laboratory accredited under HOKLAS or any other international accreditation scheme at yearly basis.
- 8.1.7 The landfill consultation zone was divided into 6 monitoring zones. The landfill gas monitoring zones are summarized in *Table 8-1*. Moreover part of landfill gas monitoring zone at TD1 was handover to the Contract No. HY/2017/10 since 7 May 2018. The layout plan for the monitoring zone is illustrated in *Appendix E*.

ID	Location	Excavation >300mm deep undertaken in this reporting period
TD1	TD1, Retaining Wall A, Grave G1 and	No
	Subway	
RW-B	Retaining Wall B	No
RW-F	Retaining Wall F	No
S&U	Slope and Underpass	No
BW	Bridge Works (G2, H1)	No
LMR	Lung Mun Road	Yes

Table 8-1Landfill Gas Monitoring Zone

8.2 LANDFILL GAS MONITORING RESULT

- 8.2.1 In the Reporting Period, landfill gas monitoring was conducted at the zone LMR where have excavation works was undertaking. A BIOGAS 5000 gas analyser was used for the landfill gas monitoring.
- 8.2.2 There were total **51** workings days monitoring were carried out by the Safety Officer or an approved and qualified persons in this reporting period. **Table 8-2** summarises landfill gas measurement results. Moreover, graphical plot are attached in *Appendix G*.

Landfill Gas	Action Level	Limit Loval	Detectable	at LMR
Parameter	Action Level	Limit Level	Min	Max
Methane	>10% LEL (>0.5% v/v)	>20% LEL (>1% v/v)	0.1%	0.1%
Oxygen	<19%	<18%	20.7%	21.0%
Carbon Dioxide	>0.5%	>1.5%	0.1%	0.2%

 Table 8-2
 Summary of Landfill Gas Measurement Results in Reporting Period

- 8.2.3 The measurement results shown that slightly methane concentration was detected and all oxygen concentration was over 19.0% and Carbon Dioxide was between 0.1 and 0.2 %. No corrective action was required accordingly.
- 8.2.4 The excavation works within the landfill consultation zone was temporary completed at the end of May 2019 and resumed in July 2019. Therefore, the landfill gas monitoring was temporary suspended in June 2019.

9 WASTE MANAGEMENT

9.1 GENERAL WASTE MANAGEMENT

9.1.1 Waste management was carried out by an on-site Environmental Officer or an Environmental Supervisor from time to time.

9.2 **RECORDS OF WASTE QUANTITIES**

- 9.2.1 All types of waste arising from the construction work are classified into the following:
 - Construction & Demolition (C&D) Material;
 - Chemical Waste;
 - General Refuse; and
 - Excavated Soil.
- 9.2.2 Whenever possible, materials were reused on-site as far as practicable. The quantities of waste for disposal in the Reporting Period are summarized in *Tables 9-1* and *9-2* and the Waste Flow Table is presented in *Appendix H*.

Type of Weste	Quantity			Disposal
Type of Waste	May 19	Jun 19	Jul 19	Location
Reused in this Contract (Inert) (in '000 m ³)	0.000	0.000	0.000	-
Reused in other Projects (Inert) (in '000 m ³)	0.000	0.000	0.000	 Lam Tei Quarry Eco Park K.wah Recycle Facilities Lung Kwu Tan Tailor Recycled Aggregates Laintang BCP TM-CLKL C2
Disposal as Public Fill (Inert) (in '000 m ³)	1.499	3.858	1.052	Tuen Mun Area 38

Table 9-1 Summary of Quantities of Inert C&D Materials

Table 9-2Summary of Quantities of C&D Wastes

Type of Weste	Quantity			Disposal
Type of Waste	May 19	Jun 19	Jul 19	Location
Recycled Metal (in '000kg)	0	0	0	-
Recycled Paper / Cardboard	0	0	0	-
Packaging (in '000kg)	0	0	0	
Recycled Plastic (in '000kg)	0	0	0	-
Chemical Wastes (in '000kg)	0	0	0	-
General Refuses (in '000m ³)	0.516	0.201	0.343	WENT

9.2.3 To control the site performance on waste management, the Contractor shall ensure that all solid and liquid waste management works are fully in compliance with the relevant license/permit requirements, such as the effluent discharge license and the chemical waste producer registration. The Contractor is also reminded to implement the recommended environmental mitigation measures according to the Environmental Monitoring and Audit Manual.

10 SITE INSPECTIONS

10.1 REQUIREMENTS

- 10.1.1 According to the approved EM&A Manual, the environmental site inspection shall be formulated by ET Leader. Weekly environmental site inspections should carry out to confirm the environmental performance of the construction site.
- 10.1.2 During the Reporting Period, *13* events of the joint site inspections were undertaken to evaluate the site environmental performance. The summaries of the findings during site inspection are presented in *Tables 10-1 and 10-2*.

Date	Findings / Deficiencies	Follow-Up Status
8 May 2019	• Drip tray should be provided for chemical storage on-site. (Portion H)	• Chemical storage on-site without drip tray had been removed.
	• Dust mitigation measures should be provided for polishing works to reduce dust impact. (LMR)	• Training had been provided to the worker to implement proper mitigation measure during the dusty work
	• Stagnant water cumulated on the tarpaulin after the rainstorm should be removed to prevent mosquito breeding. (Works area near Fire Station)	• Stagnant water cumulated on the tarpaulin after the rainstorm had been cleaned.
14 May 2019	• Sand and debris cumulated on the cycle track near the site exit should be cleaned. (Portion H)	• Sand and debris cumulated on the cycle track had been cleaned.
21 May 2019	• Water and oil mixture cumulated inside the drip tray should be cleaned and dispose as chemical waste. (Behind site office)	• Water and oil mixture cumulated inside the drip tray was cleaned.
	C&D waste cumulated on-site should be cleaned more frequency. (LMR)	• C&D waste cumulated on-site was cleaned.
	• Stockpile of bag cement should be covered with tarpaulin. (Platform 10)	• Stockpile of bag cement was removed.
	• Housekeeping should be improved, C&D waste and general refuse cumulated on-site should be cleaned more frequency. (General)	• Not required for reminder.
28 May 2019	• Nil	• NA
4 June 2019	• Stagnant water cumulated on-site should be cleaned to prevent mosquito breeding. (Footbridge)	• Stagnant water cumulated on the planter of the footbridge was cleaned.
	• C&D waste cumulated on-site should be cleaned more frequency. (Portion H)	C&D waste cumulated on-site was removed.

 Table 10-1
 Site Observations for the Contract for the Reporting Period

Date	Findings / Deficiencies	Follow-Up Status
11 June 2019	• Stagnant water cumulated inside the drip tray after rainstorm should be cleared. (West Portion	• Drip tray which stagnant water cmulated inside was removed.
	• Emptied cement bags should be disposed properly. (LMR)	• Emptied cement bags was removed.
18 June 2019	Housekeeping should be improved. C&D waste scattered on-site should be cleaned. (Toll Booth)	• Housekeeping was improved, C&D scattered on-site was cleaned.
25 June 2019	• Nil	• NA
2 July 2019	• Drip tray should be provided for chemical storage on-site. (East Portion)	• Chemical containers without drip tray were removed.
	• NRMM label should be displayed properly for NRMM using on-site. (Bridge G)	• Backhoe without display NRMM label was removed from site.
9 July 2019	NRMM label should be displayed properly for NRMM using on-site. (Portion H)	• NRMM label was displayed for NRMM using on-site.
	• Mud trace at the site exit should be cleaned. (Portion H)	• Mud trace at the site exit was cleaned.
	• Proper dust mitigation measure should be provided for opened bag cement using on-site. (Behind Site Office)	• Opened bag cement without cover was removed.
	C&D waste cumulated on-site should be cleaned properly. (Behind Site Office)	C&D waste cumulated on-site was cleaned.
16 July 2019	• Mud trace at the site exit should be cleaned. (Works Area near Fire Station)	• Mud trace at the site exit was cleaned.
	• Turbidity water generated from site should be diverted to proper de-silting facilities prior discharge from site. (Works Area Near Fire Station)	• No turbidity water discharged from site was observed.
23 July 2019	• Anti-mosquito control should be provided for ponding water cumulated on-site. (TD1)	• Stagnant water cumulated on-site had been removed and the pit was covered properly.
	• Sand and mud trace cumulated at the site exit should be cleaned. (LMR)	• Sand and mud trace cumulated at the site exit was cleaned.
30 July 2019	• Dust mitigation measures should be provided for stockpile storage over-night. (LMR)	• Not required for reminder.

Z:Jobs\2014\TCS00715(HY-2013_12)\600\Quarterly EM&A Report\19th (May to Jul 19)\R0579v2.docx Action-United Environmental Services and Consulting

Reporting Period	Date of site inspection	Nos. of findings / reminders	Follow-Up Status
May 2019	8^{th} , 14^{th} , 21^{st} and 28^{th} May 2019	8	Completed
June 2019	4 th , 11 th , 18 th and 25 th June 2019	5	Completed
July 2019	2 nd , 9 th , 16 th , 23 rd and 30 th July 2019	11	Completed

Table 10-2	Summarv	of Reminders/Observations of Site Inspection
	Summary	of Remnucis, Observations of Site inspection

10.1.3 In the Reporting Period, no non-compliance was recorded; however, **24** observations/ reminders were recorded during the site inspections. Minor deficiencies found in the weekly site inspection were in general rectified within the specified deadlines. The environmental performance of the Project was therefore considered satisfactory.

Inspection Checklist for Vulnerable to Contaminated Water Discharge

- 10.1.4 Following to the complaint about discharge of milky water to Bufferfly Beach on 2 September 2015. The Contractor proposed to carry out daily inspection of wastewater treatment facilities, concerned discharge points, drainage inlets and outlets during typhoon or wet season.
- 10.1.5 In addition, specific inspections would also be conducted before and after adverse weather to ensure necessary remedial works would be carried out timely. Should incidental contaminated water discharge be found at the inlet of the associated drainage system, a specific inspection of the relevant drainage pipes would be conducted for traces of deposit, and follow up actions would be taken when necessary.
- 10.1.6 According to the EPD visit on 22 February 2019 advised that the contractor shall keep the temporary drainage inspection record for their own record only after implementation of the permanent drainage system.

11 ENVIRONMENTAL COMPLAINT AND NON-COMPLIANCE

11.1 Environmental Complaint, Summons and Prosecution

11.1.1 In the Reporting Period, no summons and prosecution under the EM&A Programme was lodged. But one (1) environmental complaint and total 6 exceedances of the environmental performance (Action / Limit Levels) were recorded for monitoring programme. The details of complaint are listed below:-

Complaint received on 22 May 2019:

The Complainant complained that "投訴地盤的大塵滋擾,地盤位置在屯門內河碼頭及珠江倉 旁邊,正在興建一條由屯門通往機場的隧道,煩請跟進及回覆"

The investigation for the complaint was completed and concluded that the complaint was not contract related. The detailed investigation reports can be referred to the Monthly EM&A Reports (May 2019) of the contract.

11.1.2 The statistical summary table of environmental exceedance, complaint, summons and prosecution is presented in *Tables 11-1, 11-2, 11-3* and *11-4*.

Environmental Environmental		Event Exceedance		
Aspect / Parameter	Performance	Reporting Period	Previous	Cumulative
Air Quality -	Action Level	4	63	67
1-hr TSP	Limit Level	1	4	5
Air Quality -	Action Level	1	4	5
24-hr TSP	Limit Level	0	3	3

 Table 11-1

12 IMPLEMENTATION STATUS OF MITIGATION MEASURES

12.1 GENERAL REQUIREMENTS

- 12.1.1 The environmental mitigation measures that recommended in the Environmental Mitigation and Enhancement Measures Implementation Schedule (EMIS) for in the Project EM&A Manual covered the issues of air quality, cultural heritage, ecology, landfill gas hazard, landscape & visual, noise, water and waste. The updated EMIS for the Contract is shown in *Appendix I*.
- 12.1.2 The Contractor shall implement the required environmental mitigation measures according to the EM&A Manual as subject to the site condition. The environmental mitigation measures implemented by the Contract in this Reporting Period are summarized in *Table 12-1* and *Appendix I*.

Issues	Environmental Mitigation Measures
Air Quality	 Maintain damp / wet surface on access road Keep slow speed in the sites All vehicles must use wheel washing facility before off site Sprayed water during rock breaking works During transportation by truck, materials loaded lower than the side and tail boards, and covered before transport Compacted all soil stockpiles Part of the exposed slopes covered geotextile net
Cultural Heritage	 Set a buffer zone between the working area and the Grave All construction materials and equipment store far from the Grave Inspection the Grave to ensure provision mitigation measures effective
Ecology	Wire fencing provided for temporary protect Pitcher PlantsUndertake weekly inspection of Pitcher Plants
Landfill Gas Hazard	Landfill Gas measurement undertake during trench excavation
Water Quality	 Temporary drainage system provide for surface runoff prevent discharge to public area Wastewater to be treated by sedimentation tank before discharge.
Noise	 No operation of powered mechanical equipment is allowed during restricted hours from 19:00 to 07:00 on the following day and whole day during Sunday and public holiday without a valid construction noise permit (CNP). Keep good maintenance of plants The noisy plants or works provide mobile noise barriers Shut down the plants when not in use
Waste and Chemical Management	 On-site sorting prior to disposal Follow requirements and procedures of the "Trip-ticket System" Predict required quantity of concrete accurately Collect the unused fresh concrete at designated locations in the sites for subsequent disposal
General	The site was generally kept tidy and clean.

Table 12-1Environmental Mitigation Measures

13 CONCLUSIONS AND RECOMMENDATIONS

13.1 CONCLUSIONS

- 13.1.1 This is **19th** Quarterly EM&A report presenting the monitoring results and inspection findings for the Reporting Period from **1 May to 31 July 2019**.
- 13.1.2 In this reporting period, 2 exceedances of 1-hour TSP measurements trigger in Action Level at ASR1 on 11 & 23 May 2019 respectively and 1 Action Level exceedance of 24-hour TSP was recorded at ASR1 on 23 May 2019; 1 Action Level exceedance of 1-hour TSP was recorded at ASR6 on 10 July 2019; 1 Limit Level and 1 Action Level exceedances of 1-hour TSP were recorded at ASR1 and ASR5 on 28 July 2019 respectively. NOEs were issued to notify all relevant parties. Investigation reports for the exceedances on May and July 2019 were completed by ET and submitted to all relevant parties.
- 13.1.3 In this Reporting Period, no noise complaint was received by RE, the Contractor, ENPO or HyD. No Action Level exceedances were triggered and no NOE or the associated corrective actions were therefore issued.
- 13.1.4 Site inspection for landscape and visual was conducted on weekly basis by the Landscape Architect to ensure the compliance of the intended aims of the mitigation measures. Most of the landscape works such as planting was not yet commenced.
- 13.1.5 Establishment period for the pitcher plants was completed at the end of September 2016, the join site completion of Establishment period visit with AFCD was undertaken on 23 September 2016 and the final pitcher plants report was submitted to AFCD on early December 2016. Therefore after 23 September 2016, only the integrity of the protection fence was checked to fulfil the EIA requirement. During each inspection, the protection mitigation measures were checking at the final receptor area to make sure no site activities was undertaken inside the protection zone. Besides, no construction activities were observed to be carried out at the surrounding of the final receptor area. The condition of chain link fence is good and no repair or maintenance is required.
- 13.1.6 Landfill gas monitoring was conducted at the LMR works area. The monitoring results shown no exceedances were triggered.
- 13.1.7 In the Reporting Period, one (1) environmental complaint was received from EPD and referred by ENPO on 22 May 2019 regarding construction dust created at construction area near River Trade Terminal and Chu Kong Warehouse. The investigation report (IR) has been submitted by ET and concluded that the complaint was not contract related.
- 13.1.8 No notifications of summons, or successful prosecution were received by the Contractor during the Reporting Period.
- 13.1.9 During the Reporting Period, *13* events of the joint site inspections were undertaken to evaluate the site environmental performance. No non-compliance of environmental impacts were observed, indicating the implemented mitigation measures for air quality, construction noise and water quality were effective. Minor deficiencies found in the weekly site inspection were rectified within the specified deadlines. The environmental performance of the Project was considered satisfactory.
- 13.1.10 For cultural heritage, the buffer zone between the working area and the Grave was observed and no construction material or equipment was stored nearby.
- 13.1.11 No notifications of summons, or successful prosecution were received by the Contractor during the Reporting Period.

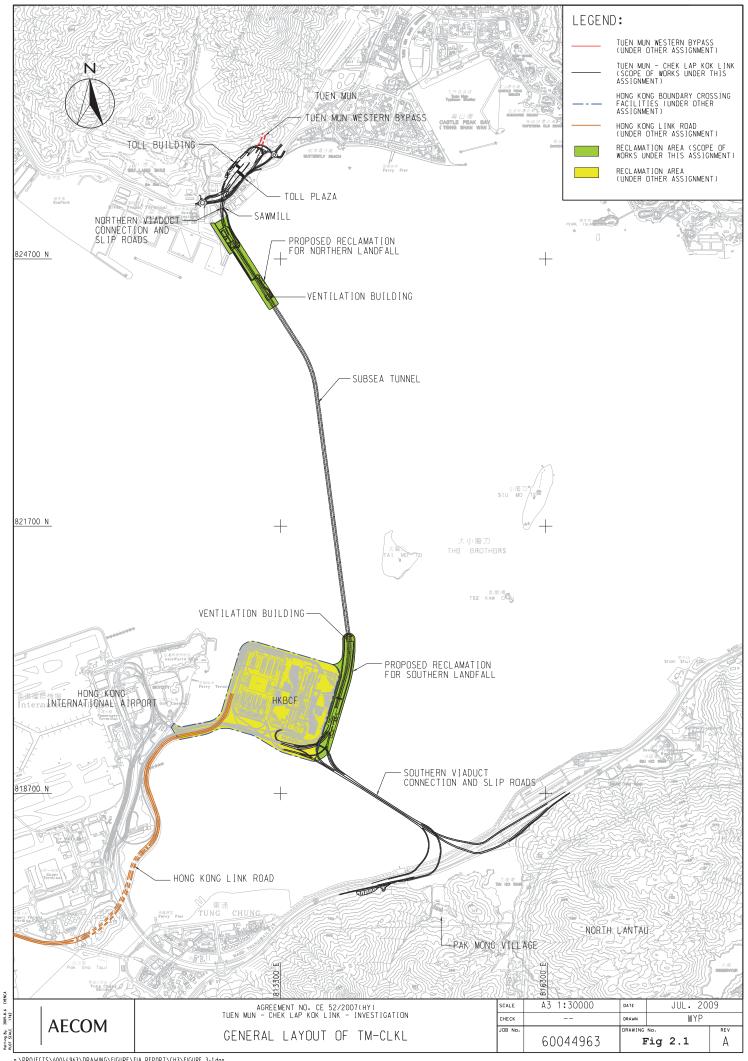

13.2 RECOMMENDATIONS

- 13.2.1 During the wet season, muddy water or other water pollutants from site surface runoff into the public areas will be key environment issue. Special attention should be paid on the water quality mitigation measures to prevent surface runoff flow to public area.
- 13.2.2 Although in wet season, air quality mitigation measures such as watering of site area for at least 12 times per day and covering of exposed slopes should be fully implemented to reduce construction dust impact as recommended in the EMIS.
- 13.2.3 Stagnant water should be removed as soon as possible after rain to prevent mosquito breeding on site.

1. THIS DRAWING SHALL BE READ IN CONJUNCTION WITH THE WORKS AREA KEY PLAN IN SHEET NO. 60240249/C3/1000.

2. DEMARCATION OF THE WORKS AREA SHALL BE DETERMINED ON SITE.

3. REFER TO HIGHWAYS DEPARTMENT STANDARD DRAWING NOS. H6110 AND H6111 FOR DETAILS OF HOARDING. 4. REFER TO HIGHWAYS DEPARTMENT STANDARD

DRAWING NOS. H6121 AND H6122 FOR DETAILS OF CHAIN LINK FENCE.

DRAWING NO. H6121 FOR DETAILS OF GATE.

6. CHAIN LINK FENCE SHALL BE ERECTED ALONG THE WORKS AREA BOUNDARY. THE ALIGNMENT AND EXTENT OF HOARDING AND CHAIN LINK FENCE SHOWN ARE INDICATIVE ONLY AND SHALL BE CONFIRMED BY THE ENGINEER.

7. THE LOCATION AND WIDTH OF GATE SHOWN ARE INDICATIVE ONLY AND SHALL BE CONFIRMED BY THE ENGINEER.

8. THE SETTING OUT INFORMATION AND WORKS AREA CONDITIONS SHOWN IN THIS DRAWING ARE FOR REFERENCE ONLY. THE WORKS AREA BOUNDARY SHALL BE IN ACCORDANCE WITH THE ENGINEERING CONDITIONS FOR TEMPORARY GOVERNMENT LAND ALLOCATION NO. GLA-TTM 639. IN CASE OF DISCREPANCY BETWEEN THE BOUNDARY SHOWN ON THIS DRAWING AND THE BOUNDARY INDICATED ON THE ENGINEERING CONDITIONS, THE LATTER SHALL PREVAIL.

9. THE WORKS AREAS SHOWN ON THIS DRAWING ARE TO BE SHARED-USED AMONG THE TM-CLKL RELATED CONTRACTS. THE AREAS HATCHED WITH ZARE TENTATIVELY ALLOCATED FOR THE USE BY THE CONTRACT.

10. THE COMMON AREA SHALL BE CONCRETE PAVED BY THE CONTRACTOR.

11. ZONE 18F SHALL BE USED FOR THE SITE ACCOMMODATION OF THE ENGINEER. ZONE 18E SHALL BE USED FOR SITE ACCOMMODATION OF THE CONTRACTOR.

12. ZONE 18D IS TO BE USED BY THE CONTRACTOR OF CONTRACT NO. HY/2012/08-TUEN MUN-CHEK LAP KOK LINK-NORTHERN CONNECTION SUB-SEA TUNNEL SECTION TO STORE PLANT AND EQUIPMENT B ASSOCIATED WITH THE TEM TUNNELS FROM THE DATE FOR COMMENCMENT (OF THE) WORKS TO 126 DAYS FROM THE DATE FOR COMMENCEMENT OF THE WORKS. THE CONTRACTOR SHALL LIAISE AND PROVIDE FREE AND UNOBSTRUCTED 24-HOUR ACCESS FOR THE CONTRACTOR OF CONTRACT NO. HY/2012/08 TO ZONE 18D. THE CONTRACTOR SHALL BE GIVEN THE POSSESSION OF ZONE 18D IN ACCORDANCE WITH APPENDIX TO FORM OF

WORKS AREA FOR THE CONTRACT

COMMON AREA (MAINTAINED UNDER THE CONTRACT) TO BE SHARED-USED WITH OTHER CONTRACTS AREA TO BE USED BY THE CONTRACTOR OF CONTRACT NO. HY/2012/08 AND WORKS AREA FOR THIS CONTRACT TO BE EARLY HANDED OVER BY THE CONTRACTOR (SEE NOTES NO. 12 ABOVE)

Event and Action Plan for Air Quality

EVENT		ACTION		
	ET ⁽¹⁾	IEC ⁽¹⁾	SOR ⁽¹⁾	Contractor(s)
Action Level				
Exceedance recorded	 Identify the source. Repeat measurements to confirm findings. If two consecutive measurements exceed Action Level, the exceedance is then confirmed. Inform the IEC and the SOR Investigate the cause of exceedance and check Contractor's working procedures to determine possible mitigation to be implemented. If the exceedance is confirmed to be Project related after investigation, increase monitoring frequency to daily. Discuss with the IEC and the Contractor on remedial actions required. If exceedance continues, arrange meeting with the IEC and the SOR. If exceedance stops, cease additional monitoring. 	 Check monitoring data submitted by the ET. Check the Contractor's working method. If the exceedance is confirmed to be Project related after investigation, discuss with the ET and the Contractor on possible remedial measures. Advise the SOR on the effectiveness of the proposed remedial measures. Supervisor implementation of remedial measures. 	 Confirm receipt of notification of failure in writing. Notify the Contractor. Ensure remedial measures properly implemented. 	 Rectify any unacceptable practice. Amend working methods if appropriate If the exceedance is confirmed to be Project related, submit proposals for remedial actions to IEC within 3 working days of notification Implement the agreed proposals Amend proposal if appropriate.
Limit Level				
Exceedance recorded	 Identify the source. Repeat measurement to confirm finding. If two consecutive measurements exceed Limit Level, the exceedance is then confirmed. Inform the IEC, the SOR, the DEP and the Contractor. Investigate the cause of exceedance and check Contractor's working procedures to determine possible mitigation to be implemented. If the exceedance is confirmed to be Project related after investigation, increase monitoring frequency to daily. Carry out analysis of the Contractor's working procedures to determine possible mitigation to be implemented. Arrange meeting with the IEC and the SOR to discuss the remedial actions to be taken. Assess effectiveness of the Contractor's remedial actions and keep the IEC, the DEP and the SOR informed of the results. If exceedance stops, cease additional monitoring. 	 Check monitoring data submitted by the ET. Check Contractor's working method. If the exceedance is confirmed to be Project related after investigation, discuss with the ET and the Contractor on possible remedial measures. Advise the SOR on the effectiveness of the proposed remedial measures. Supervisor implementation of remedial measures. 	 Confirm receipt of notification of failure in writing. Notify the Contractor. If the exceedance is confirmed to be Project related after investigation, in consultation with the IEC, agree with the Contractor on the remedial measures to be implemented. Ensure remedial measures are properly implemented. If exceedance continues, consider what activity of the work is responsible and instruct the Contractor to stop that activity of work until the exceedance is abated. 	 action to avoid further exceedance. 2 If the exceedance is confirmed to be Project related after investigation, submit proposals for remedial actions to IEC within 3 working days of notification. 3 Implement the agreed proposals. 4 Amend proposal if appropriate. 5 Stop the relevant activity of works as determined by the SOR until the exceedance is abated.

EVENT	ACTION					
ACTION LEVEL	ET	IEC	ER	Contractor		
Design Check	• Check final design conforms to the requirements of EP and prepare report.	 Check report. Recommend remedial design if necessary 	• Undertake remedial design if necessary			
Non- conformity on one occasion	 Identify Source Inform IEC and ER Discuss remedial actions with IEC, ER and Contractor Monitor remedial actions until rectification has been completed 	 Check report Check Contractor's working method Discuss with ET and Contractor on possible remedial measures Advise ER on effectiveness of proposed remedial measures. Check implementation of remedial measures 	 Notify Contractor Ensure remedial measures are properly implemented 	 Amend working methods Rectify damage and undertake any necessary replacement

		concepts of site cleanliness and appropriate waste							

CONTRACT NO. HY/2013/12

		management procedures including waste reduction, reuse and recycling					
12.6	8.1	The extent of cutting operation should be optimised where possible. Earth retaining structures and bored pile walls should be proposed to minimize the extent of cutting.	All areas / throughout construction period	Contractor	TMEIA	Y	\checkmark
12.6	8.1	Inert C&D materials from the toll plaza cut slopes shall be reused for construction of the raised platform for the toll plaza where possible.	Tol Plaza / toll plaza construction period	Contractor	TMEIA	Y	✓
12.6	8.1	The site and surroundings shall be kept tidy and litter free.	All areas / throughout construction period	Contractor	TMEIA	Y	
12.6	8.1	No waste shall be burnt on site.	All areas / throughout construction period	Contractor	TMEIA	Y	✓
12.6	8.1	The Contractor shall be prohibited from disposing of C&D materials at any sensitive locations. The Contractor should propose the final disposal sites in the EMP and WMP for approval before implementation.	All areas / throughout construction period	Contractor	TMEIA	Y	✓
12.6	8.1	Stockpiled material shall be covered by tarpaulin and /or watered as appropriate to prevent windblown dust/ surface run off.	All areas / throughout construction period	Contractor	TMEIA	Y	✓
12.6	8.1	Excavated material in trucks shall be covered by tarpaulins to reduce the potential for spillage and dust generation.	All areas / throughout construction period	Contractor	TMEIA	Y	~
12.6	8.1	Wheel washing facilities shall be used by all trucks leaving the site to prevent transfer of mud onto public roads.	All areas / throughout construction period	Contractor	TMEIA	Y	~
12.6	8.1	Standard formwork or pre-fabrication should be used as far as practicable so as to minimise the C&D materials arising. The use of more durable formwork/ plastic facing for construction works should be considered. The use of wooden hoardings should be avoided and metal hoarding should be used to facilitate recycling. Purchasing of construction	All areas / throughout construction period	Contractor	TMEIA	Y	\checkmark

		materials should avoid over-ordering and wastage.					
12.6	8.1	The Contractor should recycle as many C&D materials (this is a waste section) as possible on-site. The public fill and C&D waste should be segregated and stored in separate containers or skips to facilitate the reuse or recycling of materials and proper disposal. Where practicable, the concrete and masonry should be crushed and used as fill materials. Steel reinforcement bar should be collected for use by scrap steel mills. Different areas of the sites should be considered for segregation and storage activities.	All areas / throughout construction period	Contractor	TMEIA	Y	~
12.6	8.1	All falsework will be steel instead of wood.	All areas / throughout construction period	Contractor	TMEIA	Y	 \checkmark
12.6	8.1	 Chemical waste producers should register with the EPD. Chemical waste should be handled in accordance with the Code of Practice on the Packaging, Handling and Storage of Chemical Wastes as follows: suitable for the substance to be held, resistant to corrosion, maintained in good conditions and securely closed; Having a capacity of <450L unless the specifications have been approved by the EPD; and Displaying a label in English and Chinese according to the instructions prescribed in Schedule 2 of the Regulations. Clearly labelled and used solely for the storage of chemical wastes; Enclosed with at least 3 sides; Impermeable floor and bund with capacity to accommodate 110% of the volume of the largest container or 20% by volume of the chemical wastes; Adequate ventilation; 	All areas / throughout construction period	Contractor	TMEIA	Y	

CONTRACT NO. HY/2013/12

12.6	8.1	 Sufficiently covered to prevent rainfall entering (water collected within the bund must be tested and disposed of as chemical waste, if necessary); and Incompatible materials are adequately separated. Waste oils, chemicals or solvents shall not be disposed of to drain, Adequate numbers of portable toilets should be provided for on-site workers. Portable toilets should be maintained in reasonable states, which will not deter the workers from utilising them. 	All areas / throughout construction period All areas / throughout construction period	Contractor Contractor	TMEIA	Y Y Y	
12.6	8.1	Night soil should be regularly collected by licensed collectors.	All areas / throughout construction period	Contractor	TMEIA	Y	✓
12.6	8.1	General refuse arising on-site should be stored in enclosed bins or compaction units separately from C&D and chemical wastes. Sufficient dustbins shall be provided for storage of waste as required under the Public Cleansing and Prevention of Nuisances By-laws. In addition, general refuse shall be cleared daily and shall be disposed of to the nearest licensed landfill or refuse transfer station. Burning of refuse on construction sites is prohibited.	All areas / throughout construction period	Contractor	TMEIA	Y	
12.6	8.1	All waste containers shall be in a secure area on hardstanding;	All areas / throughout construction period	Contractor	TMEIA	Y	~
12.6	8.1	Training shall be provided to workers about the concepts of site cleanliness and appropriate waste management procedure, including waste reduction, reuse and recycling.	All areas / throughout construction period	Contractor	TMEIA	Y	✓
12.6	8.1	Office wastes can be reduced by recycling of paper if such volume is sufficiently large to warrant collection. Participation in a local collection scheme by the Contractor should be advocated. Waste separation facilities for paper, aluminum cans, plastic bottles, etc should be provided on-site.	Site Offices/ throughout construction period	Contractor	TMEIA	Y	\checkmark
