Notes:

(1) Refer to Technical Memorandum for the Assessment of Noise from Places other than Domestic Premises, Public Places or Construction Sites Section 2.3.4

(i) Rural area, including country parks or village type developments; (ii) Low density residential area consisting of low-rise or isolated high-rise developments; (iii) Urban area; (iv) Area other than those above

(2) Reference has been made on The Annual Traffic Census 2007 for determination of IF

(3) Ko Shan Theatre is a performance arts centre under TM on Noise from Places Other than domestic Premises, Public Places or Construction Sites (TM-Places). The groundborne noise criteria will be 10 dB(A) below ANL, as required under the TM-Places.

(4) Max. no. of storeys are estimated based on information provided in Agreement No. CE35/2006 (CE) Kai Tak Development Engineering Study cum Design and Construction of Advance Works - Investigation, Design and Construction Environmental Impact Assessment Report

# With the NSR located in rural/low density area, background noise measurement will be conducted at this NSR for determination of noise criteria for fixed plant noise assessment.

## It is considered that the background noise levels of the NSRs located in urban area are generally dominated by traffic noise and would be of similar magnitude to the ANL-5, and therefore background noise measurement will not be conducted at these NSRs.
