

Invest Hong Kong
Controlling Officers' Environmental Report 2006

Introduction

This report sets out the environmental policy, commitments and progress of green management measures taken by Invest Hong Kong (InvestHK) in the year 2006.

InvestHK was set up on 1 July 2000 to spearhead government's efforts to attract foreign direct investment. It offers solution-oriented investment promotion, facilitation, and aftercare services to make sure that external investors have all the support required to establish or expand operations in Hong Kong. It operates in leased premises at One Pacific Place, Queensway, occupying a total floor area of 1,527 m² with 90 staff members as at 1 January 2006.

Environmental Policy

In working towards a better and healthier future, InvestHK supports the Government's commitment for sustainable development. Our environmental objectives are:

(A) Consumption minimization

We adhere to the principle of "3R- Reduce, Reuse and Recycle" in the consumption of resources, such as paper and energy.

(B) Promoting staff's awareness on environmental protection and develop a sense of responsible care for the environment

We implement measures including provision of guidelines, participate in and organise green activities to raise staff's awareness on the importance of protecting natural environment.

(C) Green procurement

We request suppliers and contractors to provide products and services that are environmentally friendly.

(D) Communication

We make known our environmental policy to the public and encourage staff participation in environmental protection activities. We also collect feedback to further review our objectives and improve our performance.

Green measures Implemented

The green measures taken in 2006 and our achievements are set out below:

(A) Reduce paper consumption

We continue to reduce paper consumption through the following means-

- (i) **E-communication:** We encourage communication by email instead of paper communication by fax, memo or letters whenever possible and appropriate. InvestHK sets up its own intranet as e-platform for dissemination of information and publication of various management reports. With this in place, all departmental circulars, operation announcement and management reports are accessed and maintained electronically.
- (ii) **E-publication:** InvestHK issues its publications, such as its quarterly newsletter in e-form instead of paper form.
- (iii) **Double-sided printing:** We encourage our staff to print on both sides as far as possible. We procure photocopier and printer with such functions.
- (iv) **Re-use of paper:** Re-used paper or recycled paper are used for drafting, printing of file record and other internal purposes. Envelopes and file jackets are also re-used as far as possible.

With the above measures well in place, the quantity of printing paper consumed in 2006 is 1,340 reams. Compared with the figures of 1,360 reams in 2005, a substantial reduction of 1.5% was achieved.

(B) Minimize the use of stationery through

- (i) using refillable ballpens
- (ii) minimizing the use of envelopes
- (iii) using CR-RWs for record storage instead of CD-Rs which allow re-use for storage of electronic records.

(C) Reduce energy consumption through

- (i) It is our on-going efforts to scale down the lighting in our office after normal office hours. An inspection system is in place to ensure that unnecessary equipment and lights in corridors and office areas are turned off when not in use.
- (ii) Appointing energy wardens to conduct regular inspection to make sure that all energy-saving measures are put in place.

With the above measures in place, in 2006/07, InvestHK consumed 212,532kWh of electricity. As compared with the figures of 210,110 kWh in 2005/06, a 1% slight increase was due to the increased number of equipment and the additional accommodation allocated since the previous year.

(D) Promote waste recycling through

- (i) Placing collection bins at various office locations to collect waste papers and printer cartridges for recycling arrangement.**
- (ii) Reusing envelopes, folder and file jackets.**
- (iii) Reusing decorative accessories for festive decorations**

(E) Organise and participate in environmental activities

- (i) Organising departmental outings to the country-side and participating in environmental protection activities to promote staff's awareness on preserving environment and instil a sense of responsibility for protecting the environment.**
- (ii) Nominating resource managers to attend seminars on green office practice so as to keep them abreast with the latest green measures for introducing the latest green housekeeping practice in office.**

(F) Using environmentally friendly products

- (i) Ordering environmentally friendly products through the Government Logistics Department and outside contractors as far as practicable.**
- (ii) Using equipment that help to reduce paper consumption. Printers and photocopiers are equipped with duplex function which enable double-sided printing for reducing paper consumption.**
- (iii) Using energy-saving appliances: all computers and photocopiers in use are equipped with auto switch-off or energy saving features.**

The Way Forward

Looking ahead, we will sustain our effort in green management and continue to implement the prevailing green measures in consumption minimization, waste recovery and energy conservation. There is increased staff awareness of environmental protection. We will continue our efforts in protecting and improving the environment through green management practices in the department. We shall closely monitor our environmental performance on paper and energy consumption and the use of green products. Where appropriate, we will also take advantage of new technologies to help preserve nature and improve efficiency.
