EXECUTIVE SUMMARY

This is the fifty monthly Environmental Monitoring and Audit (EM&A) Report for the Environmental Protection Department Contract No. EP/SP/52/06 entitled "Development of EcoPark in Tuen Mun Area 38". (Environmental Permit No. EP-226/2005/A).

This report contains the results and findings of site inspection activities and EM&A works carried out by the Environmental Team (ET) of the Works Contractor as required in the contract during August 2010.

The site activities in the reporting period mainly consisted of excavation and site formation works and construction of drainage in Phase II construction site.

Several environmental issues, such as the housekeeping issues, stagnant water inside and outside of lot P10, road A near construction site exit was covered with dirt and dust, and sign boards were found scattered on the ground in lot T10, have been identified by ET during weekly site inspections in the reporting month. Contractor has implemented some mitigation measures to address those problems as advised by ET. Some of the measures taken by the contractor were considered as effective to minimize negative impact to the environment. On-going investigation will be carried out to observe performance and effectiveness of those measures. Outstanding environmental items will be inspected in the following month.

There was no LFG monitoring required as all excavation pits are filled since February 2010. The construction noise permit has been expired on 18th of July, 2010.

There were no notifications of summons or successful prosecution during August 2010.

Planned activities for August 2010 with regard to development of Ecopark consist of:

- 1) Site formation works, and
- 2) Road formation works.

1. BASIC PROJECT INFORMATION

1.1 Introduction

This is the fifty monthly Environmental Monitoring and Audit (EM&A) Report for the Environmental Protection Department Contract No. EP/SP/52/06 entitled "Development of EcoPark in Tuen Mun Area 38". The site layout plan is shown in Appendix 1. The report was prepared by the Environmental Team, Environmental Pioneers & Solutions Limited, of the Works Contractor, Kaden Construction Limited. The report is to be submitted to the Works Contractor, the Engineer and the Environmental Protection Department for the project.

This report presents the results of the environmental monitoring of the project activities conducted during the month of August 2010. This included regular site inspections once per week for verification of implementation of the mitigation measures as recommended in the EM&A Manual and the Contractor's Environmental Management Plan (EMP).

The construction works of Phase I have already commenced in July 2006 and have been completed in November 2008.

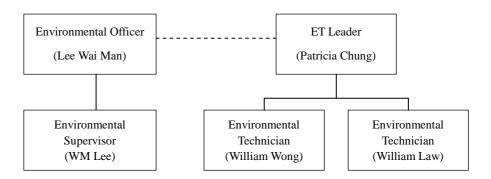

The construction works of Phase II commenced in December 2008 and is anticipated to be completed in November 2010.

The contact person and telephone number of key personnel for the captioned project are shown in Appendix 2.

1.2 Project Organization and Management

The Works Contractor has commissioned Environmental Pioneers & Solutions Limited as the Environmental Team, which comprises the environmental team leader and the environmental technicians to undertake the environmental monitoring and audit work for this project. The project Organization Chart of Environmental Team is shown in Figure 1.1.

Figure 1.1 Organization Chart of Environmental Team

2. SUMMARY OF WORK ACTIVITIES AND CONSTRUCTION STATUS

2.1 Works Undertaken during the Month

A summary of the site installation works in this month, with the information of locations, activities, equipment/materials and dates of occurrence, is provided by the Contractor, as shown in Table 2.1.

Table	Table 2.1 Work Activities for August 2010				
Item	Work Activities & Location	Date of Occurrence			
1	Site formation works	01 August 2010 – 31 August 2010			
2	Road Formation works	01 August 2010 – 31 August 2010			

	Machineries				
	Equipment/ Plant	Quantity			
1	Mobile Crane	0			
2	Excavator	0			
3	Generator	1			
4	Air Compressor	1			
5	Roller	0			
6	Loader	1			
	Grab Lorry	0			
8	Crane Lorry	0			
9	Water Truck	1			
10	Dump Truck	1			

Remarks:

- As informed by the Contractor, most equipment is mobile at site subject to work progress.
- Refer to Appendix 1 Site layout plan for location of construction activities.

2.2 Future Key Issues

The Contractor has provided an updated construction program in Table 2.2 to show the planned activities for the coming month (September 2010). The anticipated environmental issues are summarized as follow:

Table	Table 2.2 Construction Program and Anticipated Environmental Issues			
Item	Works	Anticipated Environmental Issues		
		 Generation of C&D waste should be reused as much as practicable. 		
		 Dust may be generated; the wheel washing machine should be in operation. 		
1	Site formation works and road works	 Haul road should be sprayed regularly, by truck or sprinkler. 		
		- Stagnant water should be removed.		
		 Mosquito mitigation measures should be implemented. 		

The site inspection schedule for the next month (September 2010) is designated on 2^{nd} , 9^{th} , 16^{th} , 22^{nd} and 30^{th} of September 2010.

3. STATUS OF ENVIRONMENTAL PROTECTION AND SITE INSPECTIONS

3.1 Environmental Site Inspections

Environmental site inspections are required to inspect the construction activities of the Development of EcoPark in order to ensure that appropriate environmental protection and pollution control mitigation measures are properly implemented. Regular site inspections should be carried out by the ET once per week during construction phase.

Outstanding issues at the end of July 2010 includes:

- 1. Road A, B and D are covered with dirt and dust. Contractor was reminded to clean construction vehicles thoroughly before leaving the construction site. This issue was closed on 5th August, 2010.
- 2. General waste was piled near Contractor's site office. Contractor was reminded to monitor the waste collecting schedule and revise if the existing schedule does not adequately meet the current needs. This issue was closed on 10th August, 2010.
- 3. Sign boards were found scattered on the ground in T10. Contractor was reminded to clean up the construction site after bad weather and maintain good housekeeping. This issue was closed on 10th August, 2010.

Site inspections for Phase II construction site were conducted on 5th, 12th, 19th and 26th of August 2010.

A detailed checklist of each site inspection together with comments, relevant photos and maps have been filed and kept.

The findings and results of site inspections are provided in Table 3.1:

Date Observations		Advice from ET	Action taken	Closing Date
09 October 09 to 31August 10	Road A near construction site exit is covered with dirt and dust.	Contractor was reminded to manually wash the vehicles leaving the construction site before the automatic wheel washing machine is repaired or replaced.	Site entrance was relocated to Lot 10 facing Road A.	To be followed in the next reporting month. (Tentative closing date: 30 September 2010)
11 December 09 to 31 July 10	Roads A and D are covered with dirt and dust.	Contractor was reminded to manually wash the vehicles leaving the construction site before the automatic wheel washing machine is repaired or replaced.	The number of construction vehicles entering and exiting the construction site reduced and the site staff always made sure the vehicles were washed before entering Road A.	5 th August 2010
20 May 10 to 19 August 10	Accumulated water has been observed in drip tray in chemical storage area.	Contractor was reminded to clear the stagnant water regularly to prevent overflowing of oil and fuel.	Contractor took action in removing stagnant water in drip tray in chemical storage area.	26 th August 2010
15 July 10 to 19 August 10	Accumulated water has been observed on ground near Contractor's site office.	Contractor was reminded to clear the stagnant water regularly to prevent mosquito breeding.	Contractor took action to remove the stagnant water.	26 August 2010
29 July 10	Waste materials in P10 were not covered.	Contractor was advised to cover the waste materials with tarpaulin to prevent erosion and dust being brought into the air.	Waste materials in P10 was covered with tarpaulin.	5 August 2010
29 July 10 to 5 August 10	Sign boards were found scattered on the ground in T10.	Contractor was reminded to clean up the construction site after bad weather and maintain good housekeeping.	Sign boards found near the contractor site office were removed.	10 August 2010
5 August 10	Waste and materials were found scattered in Road F.	Contractor was reminded to clean up the construction site and keep good site housekeeping practice.	Sign boards near contractor site office were removed.	10 August 2010
5 August 10 to 31 August 10	Waste and materials were found scattered near contractor site office.	Contractor was reminded to clean up the construction site and keep good site housekeeping practice.		To be followed in the next reporting month. (Tentative closing date: 30 September 2010)

Table 3.1 Summary of Site Inspections for Phase II construction site during August 2010				
Date	Date Observations Advice from ET		Action taken	Closing Date
19 August 10	Accumulated water was observed inside and outside of P10.	Contractor was reminded to clear the stagnant water regularly.	Contractor took action to remove the stagnant water and instruct workers to clean up after any rainfall.	26 August 2010
19 August 10	General waste was found scattered in P10.	-	Contractor took immediate action to instruct workers for a site cleanup.	26 August 2010
26 August 10	Dirt and dust trail observed at entrance of P10.	Contractor was reminded to instruct workers and drivers to properly wash construction vehicles before leaving construction site.		To be followed in the next reporting month. (Tentative closing date: 15 September 2010)

3.2 Air Dust

Excavation work is being carried out in Phase II construction site. Dust problem may be arisen when stockpiles of excavated materials are not enclosed, covered or dampened during dry or windy conditions. Dust suppression measures such as water spraying have been observed in the reporting month.

3.3 Noise

The major noise source was vehicle movement and machinery in the EcoPark. Since the nearby NSRs were remote, the noise impact was minimal. There was no specific observation noted regarding noise issue. The Contractor has obtained the Construction Noise Permit on 19 Jan 2010 and it was expired on 18 Jul 2010. There are no more overnight construction works planned, so the Construction Noise Permit is no longer required.

3.4 Surface Water Quality

Since there was no water discharge at manhole, the Contractor removed the silt curtain installed at discharge point on 4 April 2007, as agreed by the Engineer's Representative. Muddy water was observed at discharge point for Phase I construction site on 14 August 2009. The contractor was reminded to consider using a silt curtain if the discharge continues. As informed by Engineer's Representative, there was no direct water discharge at manhole in Phase II construction site. No muddy water discharge is expected.

Chemical toilets (1 nos.) have been provided in Phase II construction site by a licensed contractor, of which sewage generated, is collected every three to five days without causing contamination on surface water. The Effluent Discharge License was issued to the Contractor on 20 November 2006.

The temporary storage tank was used to store the effluent of aerobic wastewater treatment system and the stored effluent was pumped away regularly. As checked by the ET, there was no effluent discharge into the storm water drain. To avoid any sewage overflow, frequent checking is required after the commencement of Phase II construction works.

3.5 Visual and Landscape Impact

Nil.

3.6 Waste / Chemical Waste

The Contractor implemented visual inspection and distributed flyers/ notices to ensure all dump trucks have mechanical covers closed when leaving EcoPark site.

Separate waste collection bins were made available for collecting aluminum cans, waste paper and plastic bottles etc. The Contractor has provided the revised site layout plan

for refuse collection points as shown in Appendix 3.

Waste dumpsters were used for the collection and storage of general waste. Temporary storage areas for waste metals and waste tires were established in Phase I construction site. For Phase II construction site, a designated refuse collection point has been established and location is shown in Appendix 3.

Excavated materials are reused as back-fill material to balance cut and fill and hence reduce the generation of materials. Surplus materials are returned to stock in centralized area with suitable protective measures. The Contractor was reminded to comply with the requirements and conditions for disposal at public fill facility and all oversized aggregates should be crushed to less than 250mm before delivering to the public fill.

Materials are recycled and re-used at site as much as practicable to minimize waste generation. Timbers are recycled to make temporary tools and assess ladders etc. Excavated rocks, concrete and asphalts are stored for future re-use in land formation and structural construction etc.

Registered waste collectors will be arranged to collect and transport the wastes whenever necessary.

Table 3.4 provides a summary table of waste disposal in August 2010. The Contractor has been reminded to keep good record at site in order to have a clear presentation of waste disposal.

Table 3.4 Summary of Waste Disposal in August 2010				
Type of Waste Disposal Site Quantity Remarks				
General Waste	WENT Landfill	10.70 tonnes	-	
Inert C&D Material	Public Fill Facility	36.7 tonnes*	-	

*Note: Excavated soil and concrete unable to back filled.

3.7 Landfill Gas

There was no LFG monitoring required as all excavation pits are filled since February

2010.

Table 3.5 Action Levels, Limit Levels and Event and Action Plan for LFG (From EM&A				
Manual)				
Parameter	Parameter Level Action			
Oxygen Action Level < 19% O ₂		Ventilate trench/ void to restore O ₂ to >19%		
	Limit Level < 18% O ₂	Stop works		
		Evacuate personnel/prohibit entry		
		Increase ventilation to restore O_2 to $> 19\%$		
Methane	Action Level >10% LEL	Post "No Smoking" signs		
(CH ₄)		Prohibit hot works		
		Increase ventilation to restore CH ₄ to <10%		
		LEL		
Limit Level >20% LEL		Stop works		
		Evacuate personnel/prohibit entry		
		Increase ventilation to restore CH ₄ to <10%		
		LEL		
Carbon	Action Level >0.5% CO ₂	Ventilate to restore CO ₂ to < 0.5%		
Dioxide	Limit Level >1.5% CO ₂	Stop works		
(CO_2)		Evacuate personnel/prohibit entry		
		Increase ventilation to restore CO_2 to $< 0.5\%$		

4. SUMMARY OF ENVIRONMENTAL PERMIT AND LICENCES

ET has checked with the Contractor for the status of all environmental permits and licenses for this project as at August 2010, which is summarized in Table 4.1. ET will follow the application process of the outstanding permits / licenses and will provide suitable assistance whenever appropriate.

Table 4.1 Summary of Environmental Permits/Licences					
Description License / Permit		Date of	Date of	Status/Remarks	
	No.#	Issue	Expiry		
Environmental Permit	EP-226/2005/A	9-Sep-2005		Issued	
Registration of Waste Producer	5111-421-K2869-02	27-Jul-2006		Issued	
Construction Noise Permit	GW-RW0012-10	19-Jan-2010	18-Jul-2010	*Expired	
Effluent Discharge Licence	EP760/421/011762/I	20-Nov-2006	1-Dec-2011	Issued	

^{*}Note: Construction Noise Permit for overnight works was no longer required.

5. CUMULATIVE LOG OF COMPLAINTS AND REMEDIAL ACTION

The cumulative log of complaints is referred in Appendix 4.

6. CUMULATIVE LOG OF NOTIFICATION OF SUMMONS AND PROSECUTIONS

No notification of summons and no prosecutions occurred during August 2010.

7. CONCLUSION

There is no summon nor prosecutions reported during August 2010.

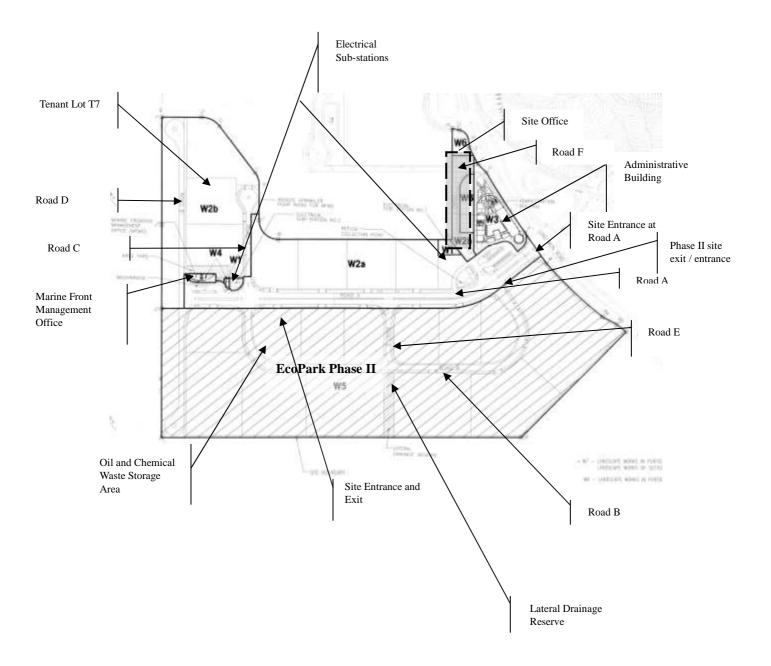

Several environmental issues, such as the housekeeping issues, stagnant water inside and outside of lot P10, road A near construction site exit was covered with dirt and dust, and sign boards were found scattered on the ground in lot T10, have been identified by ET during weekly site inspections in the reporting month. Contractor has implemented some mitigation measures to address those problems as advised by ET. Some of the measures taken by the contractor were considered as effective to minimize negative impact to the environment. On-going investigation will be carried out to observe performance and effectiveness of those measures. Outstanding environmental items will be inspected in the following month.

The Contractor has been using the waste management and record system including allocation of waste storage areas and the trip ticket system as proposed in the Environmental Management Plan.

There was no LFG monitoring required as all excavation pits are filled since February 2010. The construction noise permit has been expired on 18th of July, 2010.

The ET will continue to implement the environmental monitoring & audit programme in accordance with the EM&A Manual and Environmental Permit requirement.
