EXECUTIVE SUMMARY

General

EcoPark is a key element in the Government's waste management policy that aims at promoting the local recycling industry by providing long-term land at affordable rents, thereby encouraging investment in advanced technology and value-added recycling processes. EcoPark is being developed in two phases at site in Tuen Mun Area 38 as shown in *Figure 1-1*. The contract for the management of EcoPark – Contract No. *EP/SP/71/13 Provision of Management Services for EcoPark 2014* was awarded to Urban Property Management Limited (UPML) by Environmental Protection Department (EPD) effective from 30th October 2014.

UPML, the "Operator" of EcoPark, have appointed Allied Environmental Consultants Ltd. (AEC) as the Environmental Team (ET) to carry out the Environmental Monitoring and Audit (EM&A) works for the operation of EcoPark as required by the EM&A Manual and in accordance with the conditions of the Environmental Permit (EP) (EP-226/2005/D).

This is the thirty-ninth (39th) quarterly EM&A report prepared for the operation phase of EcoPark and covers the quarter from October to December 2016. In the reporting quarter, there were fourteen tenants in EcoPark Phase 1 and Phase 2, and one tenant with tenancy terminated. The details of tenants are provided as below:

Phase 1 tenants comprise:

- Champway Technology Limited (Champway) Waste cooking oil
- Shiu Wing Steel Limited (Shiu Wing) Waste metals
- Hong Kong Hung Wai Wooden Board Co (Hung Wai) Waste wood
- Li Tong Group (Li Tong) Waste Electrical and Electronic Equipment (WEEE)
- Hong Kong Telford Envirotech Group Ltd (Telford) Waste plastics

Phase 2 tenants comprise:

- Yan Oi Tong EcoPark Plastic Resources Recycling Centre (Yan Oi Tong) Waste plastics
- WEEE Refurbishment at Lot P5 (WEEE Refurbishment) WEEE
- K.Wah Construction Products Ltd (K.Wah) Waste construction materials/waste glass
- E.Tech Management (HK) Ltd (E.Tech) WEEE
- On Fat Lung Innovative Resources Ltd (On Fat Lung) Waste rubber tyres
- Chung Yue Steel Group Company Ltd (Chung Yue) Waste metals
- SSK Metal Ltd (SSK) Waste lead-acid batteries
- South China Reborn Resources (Zhongshan) Co Ltd (South China) Food waste
- Alba Integrated Waste Solutions (Hong Kong) Ltd (Alba IWS) WEEE

Tenancy of one tenant was terminated:

Cosmos Star Holdings Co Ltd (Cosmos) – Waste lead-acid batteries

Recycling activities of the following eleven tenants were audited in the reporting quarter: Champway, Shiu Wing, Hung Wai, Li Tong, Telford, WEEE Refurbishment, Yan Oi Tong, Chung Yue, K.Wah, South China and E.Tech. Tenancy of Lot P5 to St. James' Settlement WEEE GO GREEN (St. James' Settlement) had expired on 7th October 2016. The lot was handled by Alba IWS temporarily for continuation of the carrying out of WEEE refurbishment without introduction of new process from 8th October 2016. Lots under development by On Fat Lung, SSK and Alba IWS were inspected but not audited under the EM&A programme during the reporting quarter, as no recycling activities had commenced.

In this reporting quarter, site inspections were conducted by the Operator and the ET on 20th October and 22nd December 2016. IEC also carried out random site audits on 20th October and 22nd December 2016. A quarterly joint site inspection was carried out by the Operator, the IEC and the ET on 28th November 2016.

Throughput of Materials / Waste Generated

The throughputs of the ten active tenants in the reporting quarter are summarised below. Please note that product output plus waste disposal does not necessarily equal the waste input, due to material losses during processing and material retained within the lots.

Material Type	Waste Input (tonnes)	Product Output (4) (tonnes)	Waste Disposed ⁽⁴⁾ (tonnes)	
Waste Organic Food	2,978	1,820	1,444	
Waste Ferrous Metals	24,542	23,204	-	
Waste Wood	98	29	-	
Waste Electronics	325	307	20	
Waste Plastics	101	64	-	
Construction Waste	3,768	9,848	29	
Waste Glass	162	9,040	29	

Notes:

- 1) The throughput data presented above is the best available data and has been rounded off to the nearest whole tonne for presentation.
- 2) The total product output may not be the same as the waste input due to processing of materials that were received before the reporting quarter and were stored within the lots.
- 3) Waste disposal refers to the disposal of general refuse (i.e. packaging) and/or chemical waste.
- 4) Since the recycling of waste glass and construction waste is combined to produce concrete block at K.Wah, the product output and waste disposal from both processes are combined.

Exceedances of Any Measured Action / Limit Levels

The northern part of EcoPark is located within the 250m Landfill Gas (LFG) Consultation Zone of Shiu Lang Shui Landfill. LFG monitoring during this quarter was undertaken on 22nd December 2016 at five locations (three in Phase 1 and two in Phase 2). No exceedance of Action or Limit Level was recorded in the reporting quarter.

Summary of Complaints, Summons and Prosecutions

Number of complaints, summons and successful prosecutions in the reporting quarter are summarised below.

• Complaints: One.

• **Summons:** Zero.

Successful Prosecutions: Zero.

A public complaint on the wastewater treatment and odour generation at South China was received by EPD on 26th October 2016 and referred to the ET, IEC and the Project Proponent on 3rd November 2016. A meeting was held between the ET, the tenant and the Operator on 8th November 2016 followed by a site investigation. Temporary measures had been implemented by South China, while some of the rectification works are in progress. Details of the complaint and actions taken are provided in *Section 7* and *Appendix 7*.

Reporting Changes

There is no change in the reporting quarter.

Future Key Issues

No key issues are anticipated in the next reporting quarter.

1 PROJECT BACKGROUND

1.1 Project Overview

- 1.1.1 In the document "A Policy Framework for the Management of Municipal Solid Waste (2005 –2014)", the government set out a comprehensive policy to support the recycling industry. This included allocating suitable land, encouraging research and development, introducing environmental legislation and providing effective support measures. In May 2013, the Environment Bureau launched "Hong Kong Blueprint for Sustainable Use of Resources 2013 2022", which promised continuing support for the recycling industry.
- 1.1.2 EcoPark was developed to support the local recycling industry by providing long-term land at affordable rents, thereby encouraging investment in advanced technology and value-added recycling processes
- 1.1.3 EcoPark, as shown in *Figure 1-1*, has been developed in Tuen Mun Area 38 in two phases (Phase1 and Phase 2) under Contract *EP/SP/52/06 Development of EcoPark in Tuen Mun Area 38*, which was awarded to Kaden Construction Ltd by the Environmental Protection Department (EPD) in June 2006. Phase 1 construction was completed in July 2009 and Phase 2 construction was completed in November 2010.
- 1.1.4 The contract for the management of EcoPark Contract No. *EP/SP/71/13 Provision of Management Services for EcoPark 2014* was awarded to Urban Property Management Limited (UPML) by Environmental Protection Department (EPD) effective from 30th October 2014.
- 1.1.5 UPML, the "Operator" of EcoPark, has appointed Allied Environmental Consultants Ltd. (AEC) as the Environmental Team (ET) to carry out the Environmental Monitoring and Audit (EM&A) works for the operation of EcoPark as required by the EM&A Manual and in accordance with the conditions of the Environmental Permit (EP-226/2005/D). Mott MacDonald Hong Kong Limited (MottMac) has been appointed by the EPD as the Independent Environmental Checker (IEC) for the Project. The ET and the IEC carry out the EM&A works for EcoPark as required by the EM&A Manual and in accordance with the conditions of the Environmental Permit (EP).

1.2 Operation Programme

- 1.2.1 By the end of December 2016, there were a total of fourteen tenants in EcoPark and one tenant's tenancy was terminated:
 - Ten active tenants (Champway, Shiu Wing, Li Tong, Telford, WEEE Refurbishment, Yan Oi Tong, Hung Wai, Chung Yue, K.Wah, and South China) who have carried out full recycling operations;
 - One tenant (E.Tech) carried out machinery testing;
 - Waste Management Policy Group (WMG) of EPD has taken possession of Lot Nos. P2, P3 and P4 and handed over to Alba IWS to carry out plant construction.

- Two tenants (On Fat Lung and SSK) who are carrying out plant construction / site works; and
- One tenant (Cosmos) whose tenancy was terminated.

1.3 Project Organization and Contact Personnel

1.3.1 Key personnel and contact particulars are summarised in *Table 1.1*.

Table 1.1 EM&A Personnel Contact Details

Position Name		Email Address	Phone No.			
Project Proponent – EPD						
Senior EPO	Mr. W. Y. WONG	wywong@epd.gov.hk	2872 1647

^{*} Dr. James WONG was replaced by Ms. Grace KWOK with effective from mid-December 2016.

1.3.2 The organisational structure and lines of communication for the operation of EcoPark with respect to environmental management is given in *Figure 1-2* and *Figure 1-3* respectively.

Figure 1-1 Location of EcoPark in Tuen Mun Area 38

Issue 1______AEC

Figure 1-2 Organisation Chart of UPML

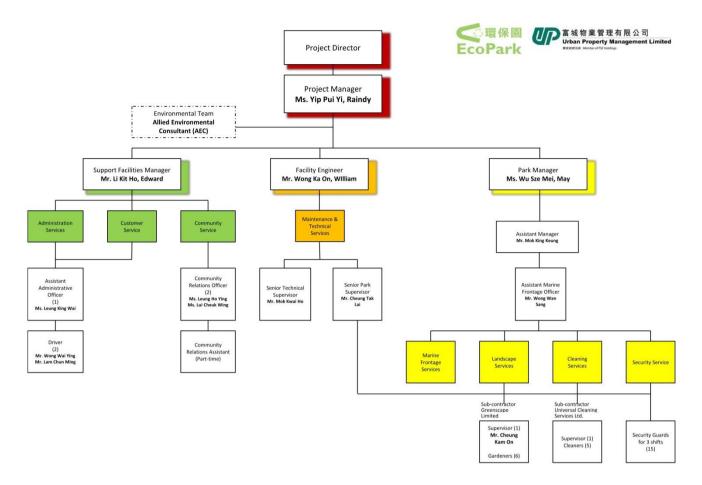

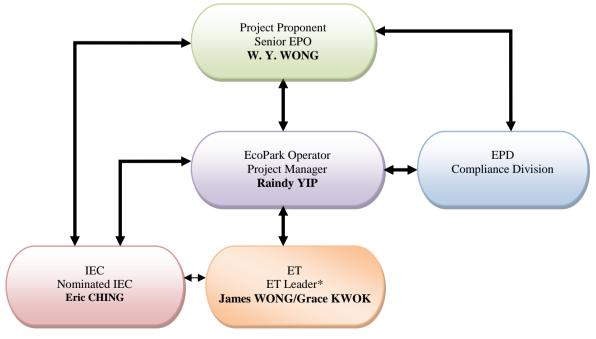

Figure 1-3 Organisation Chart of EM&A Works (Operation)

^{*} Dr. James WONG was replaced by Ms. Grace KWOK with effective from mid-December 2016.

2 SUMMARY OF EM&A REQUIREMENT

2.1 Monitoring Parameters

- 2.1.1 Landfill Gas (LFG) is required to be monitored quarterly at service voids and utility boxes within EcoPark because the northern part of EcoPark lies within the 250m LFG Consultation Zone for Siu Lang Shui Landfill, which is located to the north of EcoPark.
- 2.1.2 Operational LFG monitoring has been carried out in Phase 1 after completion of construction in July 2009, commencing in the August to October 2009 quarter. In Phase 2, monitoring has been carried out after completion of construction in November 2010, commencing in the November 2010 to January 2011 quarter.
- 2.1.3 The location for LFG monitoring was not specified in the EM&A Manual since the final design of EcoPark was not available when the EM&A Manual was approved. Therefore, during a joint site inspection on 27th July 2009, three monitoring locations were identified and agreed as suitable monitoring locations by the former ET (SMEC Asia Ltd.), IEC (Atkins China Ltd.) and the Operator (Serco Guardian Joint Venture). Subsequently, two more monitoring locations in Phase 2 were proposed by the former ET and agreed by the IEC and Operator via email in January 2011. These five monitoring locations are listed in *Table 2.1* and shown in *Figure 2-1*.

Table 2.1 Operation Phase LFG Monitoring Locations in EcoPark

Monitoring Station ID	Туре	Locations
EP1-1	LFG vent pipe	Inside the landscaping area of Administration Building
EP1-2	Service void	PCCW below-ground chamber outside Lot EP08-01
EP1-3	Service void	HGC Broadband below-ground chamber outside Lot EP08-03
EP2-1	Service void	HGC Broadband below-ground chamber outside Lot P1
EP2-2	Service void	HGC Broadband below-ground chamber outside Lot P3

2.1.4 Routine LFG monitoring has been carried out on a quarterly basis. Should EPD alert the Operator that high LFG levels have been detected during monthly monitoring under the Siu Lang Shui Landfill restoration contract, the Operator may be required to increase LFG monitoring to monthly until such time as EPD inform the Operator that quarterly monitoring can be resumed. No detection of high LFG levels under Siu Lang Shui Landfill restoration contract was received from EPD in the reporting quarter.

2.2 Environmental Quality Performance Limits and EAP

2.2.1 The Action/Limit Levels and Event Action Plan (EAP) for LFG are shown in *Table 2.2* below. These refer to LFG detected in excavations, utilities and any enclosed on-site areas. No other A/L Levels or EAPs are specified in the EM&A Manual for the operation phase EM&A.

Table 2.2 Action Levels, Limit Levels and Event and Action Plan for LFG

Parameter Level		Action			
	Action Level <19% O2	• Ventilate trench/void to restore O ₂ to >19%			
Oxygen (O ₂)	Limit Level <18% O ₂	 Stop works Evacuate personnel/prohibit entry Increase ventilation to restore O₂ to >19% 			
Methane	Action Level >10% LEL	 Post "No Smoking" signs Prohibit hot works Increase ventilation to restore CH₄ to <10% LEL 			
(CH ₄)	Limit Level >20% LEL	 Stop works Evacuate personnel/prohibit entry Increase ventilation to restore CH₄ to <10% LEL 			
Conform	Action Level >0.5% CO ₂	• Ventilate to restore CO ₂ to <0.5%			
Carbon Dioxide (CO ₂)	Limit Level >1.5% CO ₂	 Stop works Evacuate personnel/prohibit entry Increase ventilation to restore CO₂ to <0.5% 			

2.3 Environmental Audit of Non-Monitored Parameters

- 2.3.1 Site inspections provide a direct means to trigger and enforce the environmental protection and pollution control measures specified in the Environmental Impact Assessment (EIA) Report. To examine operational practice, site inspections are to be undertaken by the ET once per month. The monthly inspection shall join with the random site inspection by the IEC where possible. A joint inspection by ET and IEC will be carried out at least once per quarter. Ad hoc site inspections are also carried out if significant environmental problems are identified. In addition, inspections may be required subsequent to receipt of environmental complaint, or as part of the investigation work, as specified in the EAP.
- 2.3.2 The following parameters are required to be audited as part of the operation phase EM&A program:
 - Air Quality
 - Water Quality
 - Waste Management
 - Land Contamination

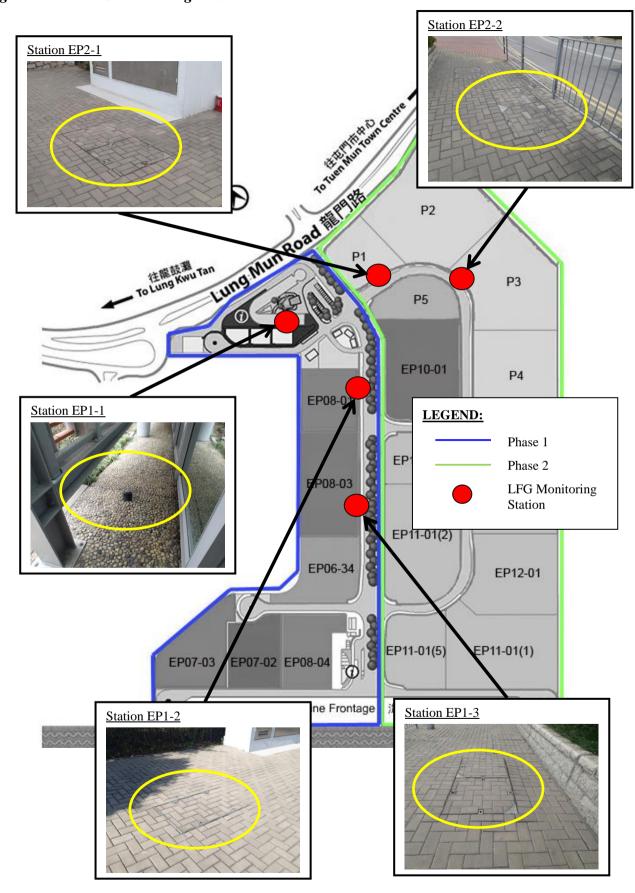

2.4 Environmental Mitigation Measures

2.4.1 Environmental mitigation measures applicable to the operation phase EM&A as stated in the Implementation Schedule are summarised in *Appendix 1*.

2.5 Environmental Requirements in Tenancy Agreements

2.5.1 Environmental requirements specified in tenancy agreements are provided in *Appendix 2*.

Figure 2-1 LFG Monitoring Locations within EcoPark

Issue 1_____AEC

3 OPERATION STATUS

3.1 General

- 3.1.1 The location of lots within EcoPark, the tenancy numbers and tenant names are shown in *Figure 3-1*. A summary of waste throughputs is provided in *Section 3.12*. Brief descriptions of the active tenants are provided from *Sections 3.2* to *3.11*.
- 3.1.2 In the reporting quarter:
 - E.Tech carried out machinery testing;
 - Tenancy of St. James' Settlement expired on 7th October 2016. Lot P5 was transferred to Alba IWS temporarily for continuation of the carrying out of WEEE refurbishment from 8th October 2016;
 - Waste Management Policy Group (WMG) of EPD has taken possession of Lot Nos. P2, P3 and P4 and handed over to Alba IWS to carry out plant construction; and
 - On Fat Lung and SSK carried out plant construction works / site works.

3.2 Champway Technology Limited

- **Tenancy No.:** EP07-03 (Phase 1)
- Lot Size: Approx. 6,000m²
- Activity: Recycling of Organic Waste (Waste Cooking Oil)
- **Recycling Process:** Turn waste cooking oil into biodiesel by extraction, neutralisation, separation and distillation.
- 3.2.1 In this reporting quarter, waste cooking oil was recycled.

3.3 Shiu Wing Steel Limited

- **Tenancy No.:** EP08-03 (Phase 1)
- **Lot Size:** Approx. 9,500m²
- **Activity:** Recycling of Waste Metals
- **Recycling Process:** Turn waste metals into light ferrous scrap and heavy ferrous scrap by sorting, baling and shearing.
- 3.3.1 In this reporting quarter, waste metal was recycled.

3.4 Hong Kong Hung Wai Wooden Board Company

• **Tenancy No.:** EP06-34 (Phase 1)

• **Lot Size:** Approx. 5,000m²

Activity: Recycling of Waste Wood

- **Recycling Process:** Recycle waste wood to wood fuel pellets. Ferrous metals will be separated by magnets.
- 3.4.1 In this reporting quarter, waste wood was recycled.

3.5 Li Tong Group

• **Tenancy No. :** EP07-02 (Phase 1)

• Lot Size: Approx. 6,500m²

• **Activity:** Recycling of WEEE

- Recycling Process: Manually dismantling of WEEE into metals (ferrous materials, aluminium, etc.) and non-metals (fibres, plastics, etc.). Manually dismantling of Cathode Ray Tube (CRT) glass and Liquid Crystal Display (LCD) panels would be carried out upon request.
- 3.5.1 In this reporting quarter, WEEE was recycled.

3.6 Hong Kong Telford Envirotech Group Limited

- **Tenancy No. :** EP08-01 (Phase 1)
- **Lot Size:** Approx. 5,000m²
- Activity: Recycling of Waste Plastics
- **Recycling Process:** Sorting, shredding and baling of waste plastics
- 3.6.1 In this reporting quarter, waste plastic was recycled.

3.7 Yan Oi Tong EcoPark Plastic Resources Recycling Centre

- **Tenancy No. :** EP10-01 (Phase 2)
- Lot Size: Approx.9,000 m²
- **Activity:** Recycling of waste plastics
- **Recycling Process:** Convert mixed waste plastics into pellets/flake/baled materials by pre-washing/sterilization, sorting, flaking, washing, drying, extrusion and chipping.
- 3.7.1 In this reporting quarter, waste plastic was recycled.

3.8 WEEE Refurbishment at Lot P5

• **Lot No.:** P5 (Phase 2)

• Lot Size: Approx. 5,000 m²

• Activity: Recycling of WEEE

- **Recycling Process:** WEEE will be sorted on site first. WEEE suitable for reuse will be repaired and refurbished, whilst those irreparable / not suitable for repair will be collected by local contractors designated by WMG.
- 3.8.1 Tenancy of Lot P5 to St. James' Settlement has expired on 7th October 2016. The lot was transferred to Alba IWS temporarily for continuation of the carrying out of WEEE refurbishment from 8th October 2016. Initial assessment was made and findings were reported in the supplementary information to the previously approved process review checklist (PRC) for St. James' Settlement (PRC No. 008). It was confirmed that the WEEE refurbishment processes to be carried out is only a continuum of parts of the processes in St. James' Settlement and no new process is introduced. In this reporting quarter, WEEE was recycled.

3.9 Chung Yue Steel Group Company Limited

- **Tenancy No.:** EP11-01(1) (Phase 2)
- **Lot Size:** Approx. 100,000 m²
- Activity: Recycling of Waste Metals
- **Recycling Process:** Turn waste metals into non-ferrous scrap, light ferrous scrap and heavy ferrous scrap by sorting, baling and shearing
- 3.9.1 In this reporting quarter, waste metal was recycled.

3.10 K.Wah Construction Products Ltd.

- **Tenancy No.:** EP11-01(3) (Phase 2)
- **Lot Size:** Approx. 10,000 m²
- Activity: Recycling of Waste Construction Materials/Waste Glass
- **Recycling Process:** Waste construction materials and waste glass will be crushed and delivered to the concrete mixing plant for blending and poured into block machine for casting. The blocks will then be cured, washed and packaged.
- 3.10.1 In this reporting quarter, waste construction materials and waste glasses were recycled.

3.11 South China Reborn Resources (Zhongshan) Company Ltd.

- **Tenancy No.:** EP12-01 (Phase 2)
- **Lot Size:** Approx. 9,000 m²
- Activity: Recycling of Organic Waste (Food Waste)
- **Recycling Process:** Food waste will be segregated. The recyclable portion will undergo deodorisation, dewatering, shredding, fermentation and drying to produce high protein animal feed for livestock farming and aquaculture.
- 3.11.1 In this reporting quarter, food waste was recycled.

3.12 Throughput Statistics

- 3.12.1 For the active recyclers, most of the incoming waste materials and outgoing products were delivered by land transportation, except for the metals from Chung Yue and Shiu Wing were delivered by both marine and land transportation.
- 3.12.2 The throughputs of the ten active tenants in the reporting quarter are summarised in *Table* 3.1 below. Please note that product output plus waste disposal does not necessarily equal the waste input, due to material losses during processing and material retained within the lot

Table 3.1 Throughput Statistics for the Reporting Quarter

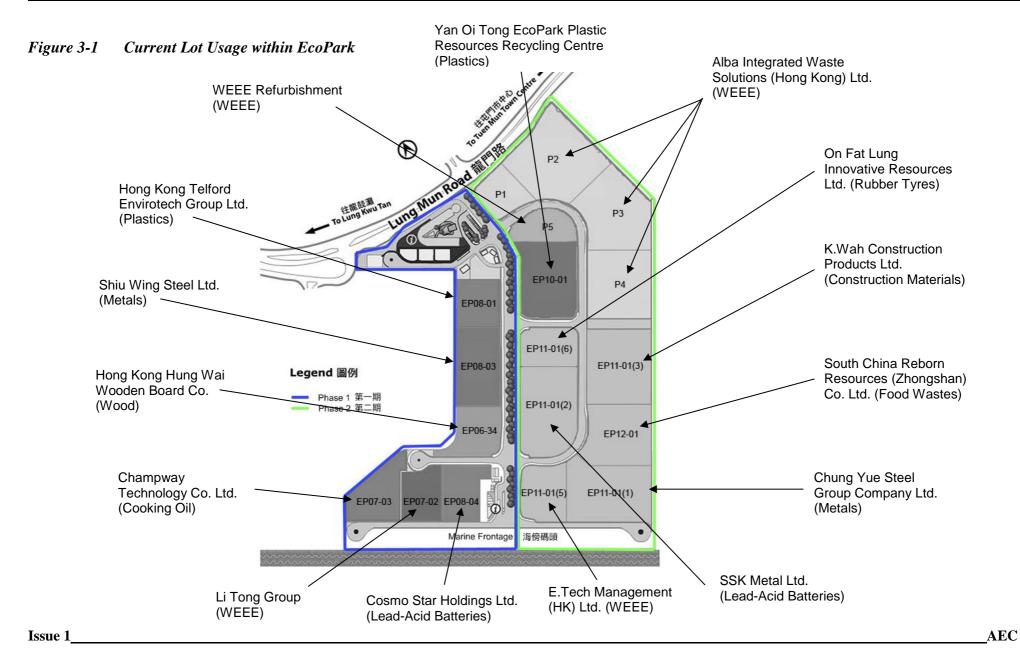

Material Type	Waste Input (tonnes)	Product Output (4) (tonnes)	Waste Disposed (4) (tonnes)	
Waste Organic Food	2,978	1,820	1,444	
Waste Ferrous Metals	24,542	23,204	-	
Waste Wood	98	29	-	
Waste Electronics	325	307	20	
Waste Plastics	101	64	-	
Construction Waste	3,768	0.949	29	
Waste Glass	162	9,848	29	

Notes:

- 1) The throughput data presented above is the best available data and has been rounded off to the nearest whole tonne for presentation.
- 2) The total product output may not be the same as the waste input due to processing of materials that were received before the reporting quarter and were stored within the lots.
- 3) Waste disposal refers to the disposal of general refuse (i.e. packaging) and/or chemical waste.
- 4) Since the recycling of waste glass and construction waste is combined to produce concrete block at K.Wah, the product output and waste disposal from both processes are combined.
- 3.12.3 Detailed throughput figures of the reporting quarter are provided in *Appendix 3.1*. Updated throughput figures of the previous months are provided in *Appendix 3.2*.

3.13 Process Review

- 3.13.1 Process Review, and maybe Design Audit (DA) where required, had been conducted for each recycling processes to be operated within EcoPark to confirm its compliance with the findings and recommendations of the EIA report and the conditions of the EP.
- 3.13.2 Since 2008, 18 process reviews and 2 DAs had been approved. Among those, 15 process reviews and 2 DAs are related to the recycling processes that are currently operating in EcoPark as of December 2016. The supplementary information for PRC No. 008 is completed in the reporting period for the temporary continuation of WEEE refurbishment at Lot P5 by Alba IWS. No new process review or DA is ongoing or completed in the reporting period. Full set of the completed PRCs and DAs are submitted separately to relevant authorities in EPD.

4 IMPLEMENTATION STATUS OF ENVIRONMENTAL PROTECTION MEASURES

- 4.1.1 Environmental mitigation measures applicable to the operation phase EM&A as stated in the implementation schedule are summarised in *Appendix 1*. Environmental requirements specified in tenancy agreements are summarised in *Appendix 2*.
- 4.1.2 By the end of December 2016, eleven tenants (Champway, Shiu Wing, Li Tong, Yan Oi Tong, Telford, WEEE Refurbishment, Hung Wai, Chung Yue, K.Wah, South China and E.Tech) were under full operation or machinery testing.
- 4.1.3 Appropriate environmental protection measures are in place at all lots.

5 MONITORING RESULTS

5.1 Monitoring Date, Time, Frequency and Duration

5.1.1 As described in *Section 2.1*, operational LFG monitoring is conducted quarterly at five monitoring locations, three in Phase 1 and two in Phase 2. In this reporting quarter, monitoring was undertaken on 22nd December 2016. Monitoring details are shown *Table 5.1* below.

Table 5.1 Sampling Schedule for the Quarterly LFG Monitoring

Station ID	Sampling Date	Time	Duration	Ambient Air Temp.	Weather
EP1-1	22 nd December 2016	10:05 - 10:08	3 minutes	24°C	Fine
EP1-2		09:50 - 09:53	3 minutes	24°C	Fine
EP1-3		09:45 - 09:48	3 minutes	24°C	Fine
EP2-1		09:55 - 09:58	3 minutes	24°C	Fine
EP2-2		10:00 - 10:03	3 minutes	24°C	Fine

5.2 Monitoring Methodology, Parameters and Equipment

5.2.1 The LFG monitoring requirement and methodology are stipulated in *Section 6* of the EM&A Manual. The LFG monitoring parameters and their measurement ranges are detailed in *Table 5.2* below.

Table 5.2 Parameters and Measurement Ranges for LFG Monitoring

Parameters	Measurement Ranges	
Methane (CH ₄)	0 – 100% LEL & 0-100% v/v	
Oxygen (O ₂)	0 – 25% v/v	
Carbon Dioxide (CO ₂)	0 – 100% v/v	
Barometric Pressure	mBar (absolute)	

- 5.2.2 LFG monitoring shall be carried out using intrinsically-safe, portable multi-gas monitoring instruments. The gas monitoring equipment shall:
 - 1. Where possible, comply with BS 6020 and be approved by BASEEFA as intrinsically safe, suitable for use in a Zone 2 are to BS 5345;
 - 2. Be capable of continuous monitoring of methane, oxygen and carbon dioxide;
 - 3. Be capable of continuous barometric pressure and gas pressure measurements;
 - 4. Normally operate in diffusion mode unless required for spot sampling, when it should be capable of operating by means of an aspirator or pump;

- 5. Have low battery, fault and over range indication incorporated;
- 6. Store monitoring data, and shall be capable of being down-loaded directly to a PC; and

7. Measure in the following ranges:

- Methane 0 - 100% LEL & 0 - 100% v/v

- Oxygen 0-25% v/v- Carbon dioxide 0-100% v/v

- Barometric pressure mBar (absolute)

5.3 Results and Graphical Plots of Monitoring Parameters

- 5.3.1 One InfraRed Gas Analyser Model GA5000 (serial number G501982) was used for LFG measurements. The gas analyser is calibrated every 6 months. *Appendix 4* presents the calibration records of the monitoring equipment.
- 5.3.2 LFG monitoring results are summarised in *Table 5.3* and compared with the Action and Limit Levels tabulated in *Table 2.2*. Graphical plots of the monitoring results are also provided in *Appendix 5*.

Table 5.3 Quarterly LFG Monitoring Results in the Reporting Quarter

			onitoring Resu	g Results		
Station ID	Sampling Date	Methane (% v/v)	Methane (% LEL)	Oxygen (% v/v)	Carbon Dioxide (% v/v)	Barometric Pressure (mBar)
EP1-1	22 nd December 2016	0.0	0	20.8	0.0	1021
EP1-2		0.0	0	20.8	0.1	1021
EP1-3		0.0	0	20.8	0.1	1021
EP2-1		0.0	0	20.6	0.1	1021
EP2-2		0.0	0	20.5	0.2	1021

5.3.3 No exceedance of Action and Limit Levels was recorded in the reporting quarter.

19

6 SUMMARY OF ENVIRONMENTAL AUDIT

6.1 General

- 6.1.1 Among the fourteen tenants and the tenant with the tenancy terminated, only ten active tenants were under full operation, including the WEEE Refurbishment at Lot P5 that was transferred to Alba IWS temporarily for continuation of the carrying out of WEEE refurbishment without introduction of new process upon expiration of tenancy of St. James' Settlement, and one tenant was under machinery testing. As such, specific site inspections were only carried out at the lots of these eleven tenants. For the lots of those tenants not currently in operation, general site inspections were conducted.
- 6.1.2 Environmental audits based on the approved site inspection checklist were carried out by the Operator and the ET on 20th October and 22nd December 2016. IEC random site audits were also carried out on 20th October and 22nd December 2016. A quarterly joint site inspection was carried out by the Operator, the IEC and the ET on 28th November 2016. The completed audit checklists for tenants are provided in *Appendix 6*.

6.2 Champway Technology Limited

6.2.1 Audit observations from previous reporting quarters and this reporting quarter are summarised in *Table 6.1* below. The completed checklists for Champway are given in *Appendix 6.1*.

Date	Item	Comment	Status	
Observations I	From Previous Reporting	Quarters		
None				
Observations I	From This Reporting Quar	rter		
20 Oct 2016	Accumulation of gravels and sands are observed in the surface channel between the site office and the entrance of workshop.	The tenant is requested to provide regular cleaning to the channel.	As observed on 28 th Nov 2016, the tenant had cleared the gravels and sands from the surface channel between the site office and the entrance of workshop.	
28 Nov 2016	Fallen leaves and branches are observed in the stormwater drain near the southwest corner of the lot that clogged the drainage channel.	The tenant is requested to remove the materials and regularly inspect the condition of all drainage channels in the lot to ensure that the channels can function properly.	The tenant has yet to clear the blockage of the stormwater drain near the southwest corner of the lot during the site audit on 22 nd Dec 2016, but the clearance activity will be carried out in the afternoon of the same day as advised by the tenant. According to the photo record provided by the Operator on the same day, the tenant has cleared the drainage channel. The condition will be verified in the next site audit in Jan 2017	
22 Dec 2016	No new critical issue was identified.			

6.11 South China Reborn Resources (Zhongshan) Company Limited.

6.11.1 Audit observations from previous reporting quarters and this reporting quarter are summarised in *Table 6.10* below. The completed checklists for South China are given in *Appendix 6.10*.

Table 6.10 Environmental Audit Findings for South China

Date	Item	Comment	Status			
Observations I	Observations From Previous Reporting Quarters					
23 Aug 2016	Oil patch was observed inside stormwater drainage channel at the Eastern lot boundary.	The tenant is requested to clear the spillage and ensure that no oil-relating activities will be carried out near drainage channel.	As observed during inspection on 20 th Oct 2016, the tenant had removed all oil/waste storage containers from area near the drainage channel and provided cleaning to the concerned area.			
Observations I	From This Reporting Qu	arter				
20 Oct 2016	No new critical issue v	vas identified.				
28 Nov 2016	Storage tank is observed near the perimeter drainage channel along the eastern boundary of the lot that may cause potential contamination.	The tenant is requested to relocate the tanks away from the drainage channel to prevent potential accidental leakage directly into the channel, and provide cleaning for the channels/storage area where needed.	As observed during the inspection on 22 nd Dec 2016, the tenant has yet to remove the storage tank near the perimeter drainage channel and a reminder is given to the tenant. The condition will be followed-up in the next site audit in Jan 2017.			
22 Dec 2016	No new critical issue v	vas identified.				

6.12 E.Tech Management (HK) Limited.

6.12.1 Audit observations from previous reporting quarters and this reporting quarter are summarised in *Table 6.11* below. The completed checklists for E.Tech are given in *Appendix 6.11*.

7 ENVIRONMENTAL COMPLAINTS, NOTIFICATION OF SUMMONS AND SUCCESSFUL PROSECUTION

- 7.1.1 By the end of December 2016, one complaint was received in this reporting quarter; but no notification of summons or successful prosecutions related to recycling activities was received in this reporting quarter.
- 7.1.2 A public complaint on the operation of South China was received by EPD on 26th October 2016 and referred to the ET, IEC and the Project Proponent on 3rd November 2016 regarding the following:
 - No treatment was provided by the WTP and discharged directly and emits odour with rotten smell irregularly;
 - The wastewater treatment plant (WTP) on 3/F was never used; and
 - Wastewater from the WTP on 3/F was discharged to stormwater drain.
- 7.1.3 A meeting was held between the ET, the tenant and the Operator to review the situation on 8th November 2016 followed by a site investigation. No recycling activity was being carried out during the investigation while cleaning of recycling bin was in progress.
- 7.1.4 No noticeable odour was detected within the lot during the investigation, except a slight odour with sour smell was noticed within the building at the works area, which was likely to be the residual odour from food waste processing and no particular source of generation could be identified. The odour intensity was similar to that detected during regular monthly site audit and was considered as normal from operation of food waste processing. As advised by South China, the air curtains would be switched on with roller shutter partially lowered when recycling activity is in operation.
- 7.1.5 As advised by South China, the wastewater treatment system was not functioning properly, including the clogging of surface drainage channel that transfer the wastewater from grease trap on G/F towards the underground storage tank, and the submersible pumping system between the underground storage tank and the WTP on 3/F. Defective design was also identified as a couple of stormwater manholes were located at low ground near the designated cleaning area for the incoming food waste containers and vehicle, in which there was possibility for the cleansing water to be washed into the stormwater manholes accidentally.
- 7.1.6 As observed during the investigation, temporary water pipes and pump were added to divert the wastewater towards the underground storage tank as mitigation. Additional pump cars were also deployed for tank away of the wastewater. No wastewater was discharged as noticed during the investigation. Cleaning of the treatment system was ongoing as observed during the monthly site audit on 28th November 2016. As advised by South China, the WTP would be tested and effluent sampling would be collected by HOKLAS laboratory upon completion of the cleaning activity. The wastewater treatment system is proposed to re-operate once the testing is completed with the discharge quality in full compliance with the discharge licence.

- 7.1.7 According to the photo records provided by the Operator, new submersible pumps have been installed to replace the inefficient pump between the storage tank and the WTF. Further to covering up the manholes with plastic board and surrounding the manholes with sandbags as observed during the investigation, the tenant had sealed up the stormwater manholes near the designated cleaning area with metal covers and surrounded with concrete bunding to prevent accidental spillage of cleansing water from entering the manholes as observed during the monthly site audit on 28th November 2016. No sign of potential contamination of discharge by food waste was observed in the stormwater outfall immediate outside the lot of South China.
- 7.1.8 South China is also arranging to install flow meters with logging function for the WTP on 3/F to record the flow of wastewater. Advice was also being sought from the Authorised Person (AP) by South China for practical proposals to permanently improve the surface drainage collection on G/F and the efficiency of wastewater diversion from grease trap on G/F to the underground storage tank.
- 7.1.9 The repairing status of the WTP will be followed up and monitored in subsequent monthly site audits. The complaints log is provided in *Appendix 7*.

8 CONCLUSIONS

- 8.1.1 This is the thirty-ninth (39th) quarterly EM&A report prepared for the operation phase of EcoPark and covers the reporting quarter from October to December 2016. The tenants' recycling activities are audited on a monthly basis and the results are summarised in this report. In the reporting quarter, there were fifteen tenants in EcoPark Phase 1 and Phase 2.
- 8.1.2 The ET has conducted monthly site inspections while the IEC has carried out full site inspection on quarterly basis and random site audits on monthly basis, and some general observations have been made. The approved checklist has been used in the monthly site inspections for various tenants.
- 8.1.3 The throughputs of the ten active tenants in the reporting quarter are summarised in *Table* 8.1. Please note that product output plus waste disposal do not necessarily equal the waste input, due to material losses during processing and material retained within the lots.

Table 8.1 Throughput Statistics for the Reporting Quarter

Material Type	Waste Input (tonnes)	Product Output (4) (tonnes)	Waste Disposed (4) (tonnes)	
Waste Organic Food	2,978	1,820	1,444	
Waste Ferrous Metals	24,542	23,204	-	
Waste Wood	98	29	-	
Waste Electronics	325	307	20	
Waste Plastics	101	64	-	
Construction Waste	3,768	0.848	29	
Waste Glass	162	9,848		

Notes:

- 1) The throughput data presented above is the best available data and has been rounded off to the nearest whole tonne for presentation.
- 2) The total product output may not be the same as the waste input due to processing of materials that were received before the reporting quarter and were stored within the lots.
- 3) Waste disposal refers to the disposal of general refuse (i.e. packaging) and/or chemical waste.
- 4) Since the recycling of waste glass and construction waste is combined to produce concrete block at K.Wah, the product output and waste disposal from both processes are combined.
- 8.1.4 LFG monitoring during the reporting quarter was undertaken on 22nd December 2016 at five locations (three in Phase 1 and two in Phase 2). No exceedance of Action or Limit Levels was recorded in the reporting quarter.
- 8.1.5 Numbers of complaints, summons and successful prosecutions in the reporting quarter are summarised below:

• Complaints: One.

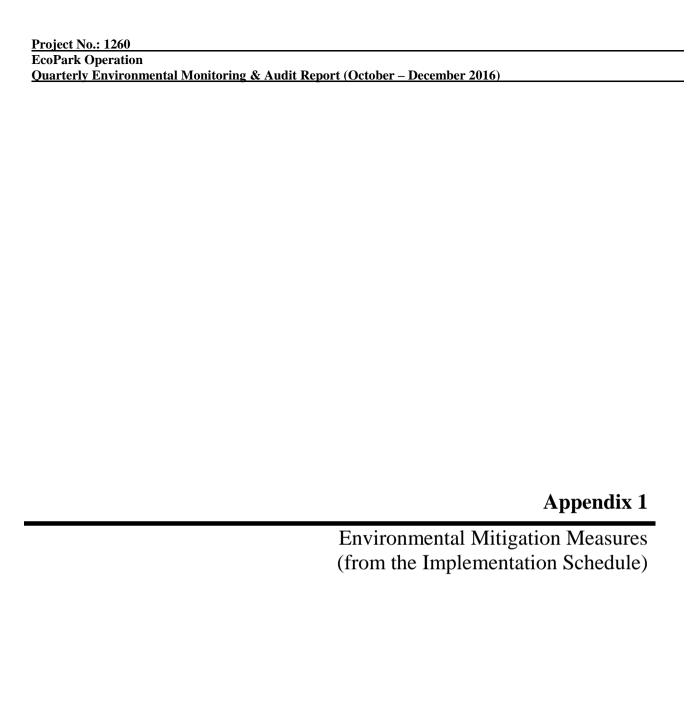

• **Summons:** Zero.

• Successful Prosecutions: Zero.

8.1.6 A public complaint on the wastewater treatment and odour generation at South China was received by EPD on 26th October 2016 and referred to the ET, IEC and the Project

Proponent on 3rd November 2016. A meeting was held between the ET, the tenant and the Operator on 8th November 2016 followed by a site investigation. Details of the complaint and actions taken are provided in *Section 7* and *Appendix 7*.

8.1.7 In the next reporting quarter, LFG monitoring in operation phase for Phase 1 and Phase 2 will be continued.

Issue 1______AEC

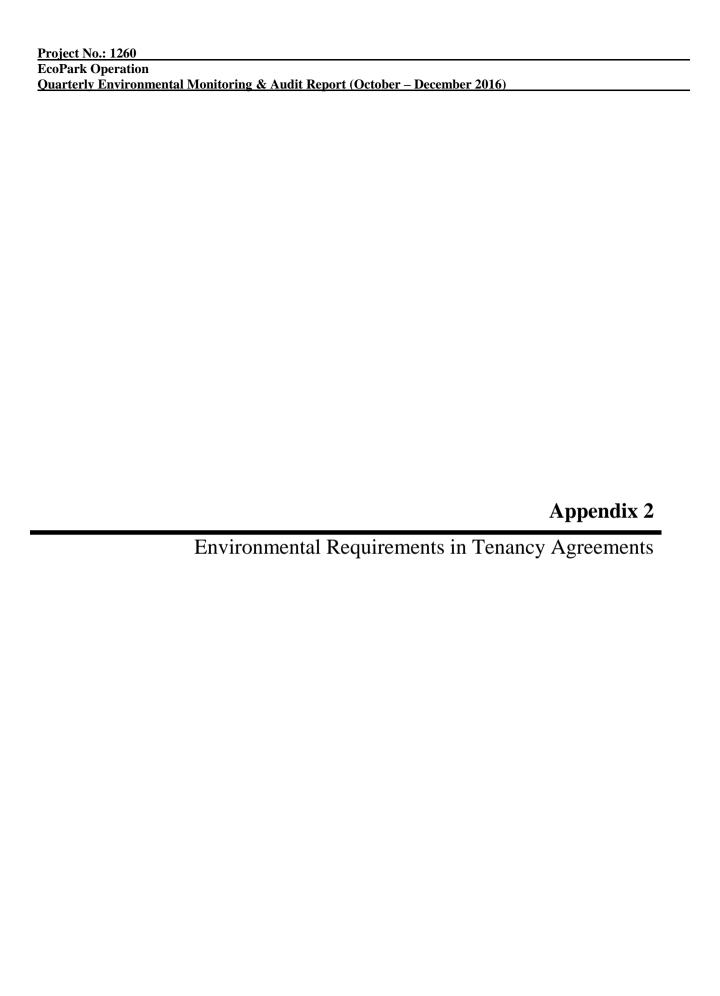

EIA Ref.	EM&A Ref.	Environmental Protection Measures Identified in the Implementation Schedule that are Applicable to the Operation Phase of EcoPark	Location / Duration of Measures / Timing of Completion of Measures	Implementation Agent	Relevant Legislation and Guidelines
General					
5.5.23 to 5.5.25, 10.2.24 & 10.2.37	4.2.5 to 4.2.8	The Operator shall develop and implement an Emergency Response Plan (ERP) that lists the procedures to be followed in case of fire, fuel or chemical spillage or other emergency within the EcoPark.	Throughout the duration of the operation.	Operator	
12.2	7.2	No process shall be allowed to operate within EcoPark without approval from WFBU. Approval will be based on the ten-step Process Review, which may include a Design Audit if deemed to be necessary.	Throughout the duration of the operation.	ET IEC Project Proponent	
	8.1.2	All reports (including Process Review Checklists and any Design Audits) shall be prepared and certified by the ET, verified by the IEC and approved by the Project Proponent.	Throughout the duration of construction works until construction is substantially completed. Throughout the duration of the operation.	ET IEC Project Proponent	
12.3	7.3	The Operator shall prepare and implement an Environmental Management Plan (EMP) to define mechanisms for achieving the environmental requirements specified in the EIA, EP and in statutory regulations.	Throughout the duration of the operation.	Operator	
Air Quality	,				
13.2		The Operator shall ensure that EcoPark "base case" assumptions for air quality shown in Table 13.1 of the Final EIA Report are met by tenants, as a whole.	Throughout the duration of the operation.	Operator	Table 13.1 of the Final EIA Report
Water Qua	lity				
5.4.11 & 5.6.7		To minimise the chance of accidental spillage during loading and unloading, and thereby reduce marine water quality impacts, well established cargo handling guidelines should be followed.	Adjacent to EcoPark marine frontage when loading or unloading goods.	Operator Operators of bulk carriers	Sections 5 & 6 of IMO Code of Practice for the Safe Loading/ Unloading of Bulk Carriers

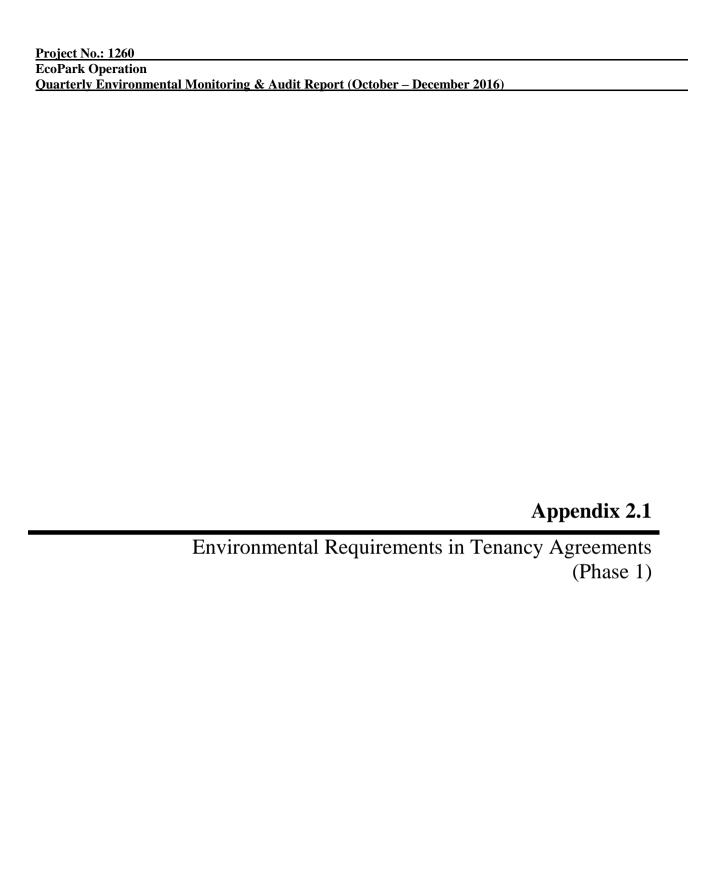

AEC Issue 1

EIA Ref.	EM&A Ref.	Environmental Protection Measures Identified in the Implementation Schedule that are Applicable to the Operation Phase of EcoPark	Location / Duration of Measures / Timing of Completion of Measures	Implementation Agent	Relevant Legislation and Guidelines
5.5.19		Contaminated water collected in the surface drainage systems shall be treated at the WTF or other appropriate treatment facility.	Within EcoPark throughout the life of the facility.	Operator	
5.5.23 to 5.5.25	4.2.5 to 4.2.7	An Emergency Response Plan (ERP) will be formulated to address various accident scenarios. The ERP will be certified by the Environmental Team (ET) and verified by the Independent Environmental Checker (IEC) under the operation EM&A programme.	Within EcoPark throughout the life of the facility.	Operator	
5.6.4		For uncovered areas where recovery process identified as causing potentially high level of contamination are located, stop-logs will be installed in the perimeter drainage system to isolate contamination.	Within EcoPark throughout the life of the facility.	Operator	
	4.2.2	The ET should develop an audit checklist, with the agreement of the IEC, to ensure that each mitigation measure is implemented when appropriate and operated correctly when implemented.	Within EcoPark throughout the life of the facility.	ET with IEC	
Waste Man	agement				
6.8.7	5.2.4	The Operator should register with EPD as a chemical waste producer.	Within EcoPark throughout the life of the facility.	Operator	Waste Disposal (Chemical Waste) (General) Regulation
6.8.16		The dust collected by any air pollution control equipment installed by tenants must be tested to ensure compliance for landfill disposal.	Within EcoPark throughout the life of the facility.	Operator	Practice Note for disposal of dusty waste at landfills & Admission Ticket System
6.8.18 & 6.8.22	5.2.4	Sludge will be disposed of at WENT landfill, or at any future dedicated sludge treatment facility. Sludge will be collected by a Licensed collector at regular intervals, as determined by the operation of the WTF.	Within EcoPark throughout the life of the facility.	Operator	

EM&A Ref.	Environmental Protection Measures Identified in the Implementation Schedule that are Applicable to the Operation Phase of EcoPark	Location / Duration of Measures / Timing of Completion of Measures	Implementation Agent	Relevant Legislation and Guidelines
5.2.4	Chemical wastes shall be stored in appropriate containers in a covered area. "No Smoking" signs will be clearly displayed to prevent accidental ignition of flammable materials. Drip trays capable of storing 110% of the volume of the largest container will be used to mitigate possible leakage.	Within EcoPark throughout the life of the facility.	Operator	Code of Practice on the Packaging, Labelling and Storage of Chemical Wastes
5.2.3 & 5.2.5	The ET should develop an audit checklist, with the agreement of the IEC, to ensure that each mitigation measure is implemented when appropriate and operated correctly when implemented.	Within EcoPark throughout the life of the facility.	ET with IEC	
5.2.4	The Operator should register with EPD as a chemical waste producer.	Within EcoPark throughout the life of the facility.	Operator	Waste Disposal (Chemical Waste) (General) Regulation
of Contam	ninated Land			
5.3.2	Any spillages of contaminating material shall be cleaned up immediately through the use of an absorbent. Any such used material should then be considered chemical waste and disposed of appropriately.	Within EcoPark throughout the life of the facility.	Operator	
	Any areas within the lot to be used for recycling processes shall be concrete paved before recycling activities commence.	Within EcoPark throughout the life of the facility.	Operator	
5.3.2	During operation, the greatest risk of land contamination will come from storage of chemical wastes, therefore the measures should be followed:	Within EcoPark throughout the life of the facility.	Operator	
	All chemical storage areas shall be provided with locks and be sited on sealed areas. The storage areas shall be surrounded by bunds with a capacity equal to 110% of the storage capacity of the largest tank to prevent spilled oil and chemicals from contaminating the ground.

9.4.4		It recommended that this commonality be promoted throughout EcoPark by the Operator and adopted by tenants, if practicable.	Within EcoPark throughout the life of the facility.	Operator	

NERAL ENVIRONMENTAL RESPONSIBILITIES

- The Tenant shall at its own cost(s) comply with and shall ensure that the Premises is used, designed, constructed, operated and maintained in accordance with:-
 - (a) All relevant Ordinances, by-laws, regulations, statutory technical memorandums, codes of practice, rules, non-statutory guidance notes, schemes and abatement notices for the time being in force in Hong Kong including those relating to the environment and governing the control of any form of pollution (see specific Ordinances mentioned hereinbelow) and licensing requirements under relevant Ordinances and regulations.
 - (b) All information, mitigation measures, prohibitions, restrictions, recommendations and requirements under the Environmental Impact Assessment Report for Development of an EcoPark in Tuen Mun Area 38 with Appendices, i.e. the EIA Report (Register No.: AEIAR-086/2005) dated April 2005, the Final EM&A Manual dated April 2005, the application documents including all attachments (Application No. AEP-226/2005) and other relevant documents in the Register (or in any other places, any internet websites or by any other means as specified by the Director), including the prohibitions and mitigation measures for processes in Table 14.1 and the material throughputs, processes and remarks in Table B.1 of the EIA Report (in so far as applicable).
 - (c) All information, conditions, submissions, mitigation measures, orders, notices, requirements, prohibitions, restrictions and time limits under the Environmental Permit No. EP-226/2005 as amended by the Variation of Environmental Permit Application No.VEP-221/2006 (including updated information about the Permit, any amended permit and any further permit) and all mitigation measures recommended and to be recommended in submissions that shall be deposited with or approved by the Director as a result of permit conditions contained in the Environmental Permit No. EP-226/2005 as amended by the Variation of Environmental Permit Application No.VEP-221/2006 (including updated information about the Permit, any amended permit and any further permit). The Tenant shall refer to, inter alia, Conditions 4.1 to 4.14 (and Annexes A and B) and Conditions 3.7 and 3.8 (and Figures 2 and 3) of the Environmental Permit No. EP-226/2005 as amended by the Variation of Environmental Permit Application No.VEP-221/2006 regarding measures to mitigate air quality impact, measures to mitigate hazard to life impact, measures to prevent land contamination, measures to mitigate landfill gas hazard, maintenance of landscape and visual measures (see also hereinbelow regarding Condition 5 of the Environmental Permit and specified Ordinances).
 - (d) All information, conditions, submissions, mitigation measures, orders, notices and requirements under on going surveillance and monitoring activities during all stages of the Project and during the tenancy under the Tenancy Agreement (e.g. any additional mitigation measures recommended and to be recommended under the Process Review and Design Audit (carried out and to be carried out in accordance with the EM&A Manual) for various environmental impacts including, but not limited to,

- noise pollution, air quality, hazard to life, landfill gas hazard, landscape and visual measures, waste management and land contamination).
- (e) All recommendations referred to in the documents of the EIAO Register which are not expressly referred to in Environmental Permit No. EP-226/2005 as amended by the Variation of Environmental Permit Application No.VEP-221/2006 and any amended Environmental Permit (unless expressly excluded or impliedly amended in the Environmental Permit No. EP-226/2005 as amended by the Variation of Environmental Permit Application No.VEP-221/2006 and any amended Environmental Permit).
- 9.2 Further to Condition Nos. 6 and 8 hereinabove, the Tenant shall at its own cost provide relevant environmental monitoring data, information, documents and assistance to the Director and/or the Environmental Protection Department and shall permit authorised representatives of the Environmental Protection Department to access, inspect, take samples and monitor the Premises and operations for the Process Review and the Design Audit carried out and/or to be carried out pursuant to Conditions 4.1 and 5 of the Environmental Permit No. EP-226/2005 as amended by the Variation of Environmental Permit Application No.VEP-221/2006 (and any updated Permit, amended permit and further permit).
- 9.3 If the Tenant's operations (i.e. activities and facilities for recovery and/or recycling and/or reprocessing) are not covered by the EIA Report and/or deviate from the development parameters mentioned in inter alia the EIA Report, the Environmental Permit No. EP-226/2005 as amended by the Variation of Environmental Permit Application No.VEP-221/2006 (including the parameters at Annex A) and/or any environmental licence (e.g. the Water Treatment Facility ("WTF") Discharge Licence), and if additional mitigation measures are not available or are not effective in the opinion of the Director, to ensure compliance with the EIA Report, the Environmental Permit No. EP-226/2005 as amended by the Variation of Environmental Permit Application No.VEP-221/2006 (including any updated Permit, amended permit and further permit) and the relevant environmental licence(s), the Tenant shall comply with any modified parameters and/or the Tenant shall immediately modify its operations in such a way that the findings and requirements of the EIA Report, the Environmental Permit No. EP-226/2005 as amended by the Variation of Environmental Permit Application No.VEP-221/2006 (including any updated Permit, amended permit and further permit) and the environmental licence(s) are complied with and shall immediately cease to continue the offending part of the operations or activity in question.
- 9.4 The Tenant shall at its own cost(s) apply for, obtain, renew, maintain and comply with all the relevant licences related to compliance with all relevant Ordinances, by-laws, regulations, statutory technical memorandums, codes of practice, rules, non-statutory guidance notes, schemes, abatement notices and the environmental permits for the time being in force in Hong Kong (including those relating to the environment and governing the control of any form of pollution). The Tenant shall obtain, renew and comply with all the said licences within the relevant time limits (in any event, within one (1) calendar month of the date of signing and/or execution of the Tenancy Agreement), shall comply with all abatement notices, orders, directions and requests of the relevant authorities and public officers and shall be responsible for paying all relevant fees, costs, fines and penalties.

- 9.5 The Tenant shall not do anything or omit to do anything which would cause, contribute to or involve a breach or potential breach by the Director relating to any of the matters mentioned in Conditions 9.1 to 9.4 hereinabove (and other Conditions hereinbelow).
- The Tenant shall fully indemnify the Government and/or the Director for any fees, costs, damages, expenses, fines, penalties, losses and claims arising (a) out of any breach of any of the matters mentioned in inter alia Conditions 9.1 to 9.4 hereinabove (and other Conditions hereinbelow) or (b) from the use of the Premises or (c) out of any works carried out at any time during the term to or at the Premises or (d) out of anything now or during the term attached to or projecting from the Premises or (e) from any neglect or default by the Tenant or by its respective servants or agents or by any express licensee of the Tenant.

SPECIFIC ENVIRONMENTAL RESPONSIBILITIES

Air Pollution

- Save with an appropriate exemption under the Air Pollution Control Ordinance (Cap. 311 of the Laws of Hong Kong) any regulations made thereunder and any amending legislation, the Tenant shall not install or permit or suffer to be installed upon the Premises or any part thereof or any building(s) or structure(s) or part of any building(s) or structure(s) erected or to be erected thereon any furnace, oven, chimney or flue or any other combustion equipment or use or permit or suffer to be used any fuel or any method or process of manufacture or treatment that might in any circumstance result in, cause or contribute to the discharge or emission of any pollutant or any noxious, harmful or corrosive matter, whether it be in the form of gas, smoke, liquid, solid or otherwise (including but not limited to air pollutant as defined in Section 2 of the Air Pollution Control Ordinance (Cap. 311 of the Laws of Hong Kong)), which exists or which is imminent, without the prior written approval of the Director.
- 11. No alteration to the installation and method of manufacture shall be made without the prior written consent of the Director. In any event, the Tenant shall at its own cost(s) comply with, inter alia, Conditions 4.2 to 4.7 and Annex A of the Environmental Permit No. EP-226/2005 as amended by the Variation of Environmental Permit Application No.VEP-221/2006 regarding design, installation and operation of chimney, location of fresh air intakes and use of ultra-low sulphur or other cleaner fuel(s) as agreed by the Director (and the conditions of any updated Permit, amended permit and further permit regarding measures to mitigate air quality impact), good practices and relevant provisions of the EIA Report and Final EM&A Manual.

Noise Pollution

12. The Tenant shall take all necessary measures as may be required by and to the satisfaction of the Director to ensure that the operation of all plant and equipment, installed or used on the Premises or in any building(s) or structure(s) erected or to be erected thereon, will not result, not cause and/or will not contribute any noise (which exists or which is imminent) which disturbs or annoys the residents or occupiers of any adjoining or neighbouring lot or lots or premises, or causes and/or contributes to

disturbance to the general public under the Noise Control Ordinance (Cap. 400 of the Laws of Hong Kong) any regulations made thereunder and any amending legislation.

13. The decision of the Director as to whether any such plant and equipment are causing disturbance or annoyance as aforesaid shall be final and binding on the Tenant.

Waste Management

- 14. The Tenant shall not permit, allow or suffer any fuel or chemical and any sewage, waste water or effluent containing sand, cement, silt or any suspended or dissolved material to flow, escape or run from the Premises onto any adjoining land or allow any waste matter which does not form part of the recovery and/or recycling and/or reprocessing operation or is not part of the final product of such operation to be deposited, kept, held or stored anywhere within the Premises and other areas of EcoPark. The Tenant shall at its own cost(s) have all such matters and all waste arising from recycling activities, chemical waste arising from maintenance of plant and equipment, sewage sludge (from WTF) and general daily waste from the operation removed from the Premises or any building(s) or structure(s) or any part of any building(s) or structure(s) erected or to be erected thereon in a proper manner to the satisfaction of the Director.
- In any event, the Tenant shall at its own cost(s) comply with, inter alia, Conditions 4.11 and 4.12 of the Environmental Permit No. EP-226/2005 as amended by the Variation of Environmental Permit Application No.VEP-221/2006 regarding paving all areas of the Premises with concrete/using concrete hardstanding and siting all fuel tanks and chemical storage areas on the specified sealed areas, respectively (and comply with the conditions of any updated Permit, amended permit and further permit regarding measures to prevent land contamination). The Tenant shall at its own cost(s) comply with relevant provisions of the Waste Disposal Ordinance (Cap.354 of the Laws of Hong Kong) good practices and relevant provisions of the EIA Report and Final EM&A Manual.

Water Pollution

In the event that the Tenant produces, generates, permits, causes, allows or suffers any discharge which is subject to control under the Water Pollution Control Ordinance (Cap. 358 of the Laws of Hong Kong) any regulations made thereunder and any amending legislation, and is not covered by a WTF Discharge Licence issued under the Water Pollution Control Ordinance (Cap. 358 of the Laws of Hong Kong) the Tenant shall apply to the Director for a licence and comply with the terms and conditions stipulated in the licence and the WTF Discharge Licence at the Tenant's own cost(s). Otherwise, the Tenant is not allowed to discharge directly or indirectly or to produce, generate, permit, cause, allow or suffer any discharge into any public sewer, stormwater drain, channel, stream-course, sea or any area inside or outside the Premises any trade effluent or foul or contaminated water or cooling or hot water. Subject to the said licence from the Director and WTF Discharge Licence, the Tenant shall at its own cost(s) separate, collect, discharge and send all process or industrial wastewater to the WTF for treatment to the standard required for discharge into a sewer leading to the sewage treatment works at Pillar Point or other treatment works specified in the licence.

- 17. Subject to obtaining advance written approval of the Director, the Tenant shall at its own cost(s) provide, install, operate and maintain its own waste water pre-treatment plants within the Premises if such process or industrial wastewater could not meet the influent limits / exceeds the maximum influent criteria of the WTF (in accordance with paragraph 7.2.9 of the Final E&MA Manual). The Tenant shall at its own cost(s) separate, collect, discharge and send all domestic wastewater (i.e. other than process or industrial wastewater) to the Pillar Point Sewage Treatment Works directly for treatment or other treatment works specified in the licence.
- 18. In any event, the Tenant shall prevent any spilled materials from entering the surface water drainage system and prevent contamination of the sea at its own cost(s) by, inter alia, providing, installing, operating and maintaining stop-logs or interceptors in the surface water drainage system and at the marine frontage area, respectively, or as required by the licence. The Tenant shall at its own cost comply with relevant provisions of the Dumping at Sea Ordinance (Cap 466 of the Laws of Hong Kong) good practices and relevant provisions of the EIA Report and Final EM&A Manual.

Hazard to Life Impact

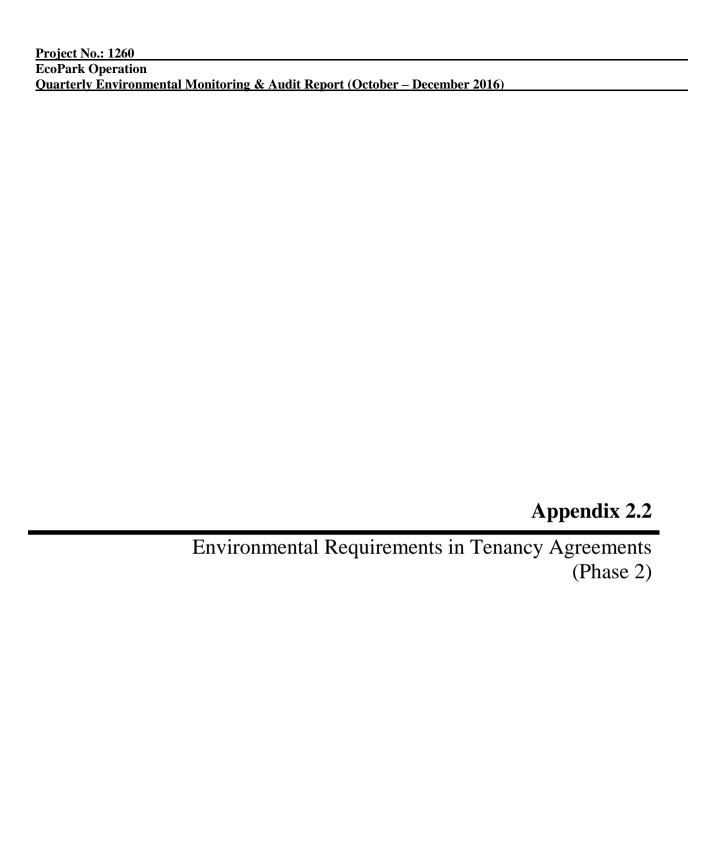

- 19. To mitigate hazard to life impact, the Tenant shall comply with, inter alia, Conditions 4.8 to 4.10 of the Environmental Permit No. EP-226/2005 as amended by the Variation of Environmental Permit Application No.VEP-221/2006 (and comply with the conditions of any updated Permit, amended permit and further permit regarding measures to mitigate hazard to life impact) and shall not:-
 - (a) Bring, keep, store or transport chlorine within the Premises and other areas of EcoPark;
 - (b) Bring, keep, store, locate or transport dangerous goods, substances and fuels supporting combustion including oxygen, acetylene, hydrogen peroxide, rubber tyres and diesel within 10 metres from the boundary of the site of EcoPark; and
 - (c) Exceed the building height restrictions for buildings on the Premises which are on/near the western boundary of the site of EcoPark as mentioned in Annex B to the Environmental Permit No. EP-226/2005 as amended by the Variation of Environmental Permit Application No.VEP-221/2006 (including any updated Permit, amended permit and further permit).

Landfill Gas Hazard

20. To mitigate landfill gas hazard, the Tenant shall at its own cost(s) comply with, inter alia, Condition 4.13 of the Environmental Permit No. EP-226/2005 as amended by the Variation of Environmental Permit – Application No.VEP-221/2006 regarding raising clear of the ground all buildings and enclosed structures as specified in inter alia Condition 3.7 (and comply with the conditions of any updated Permit, amended permit and further permit regarding measures to mitigate hazard to life impact).

Landscape and Visual Impacts

To mitigate landscape and visual impacts, the Tenant shall at its own cost(s) comply with, inter alia, Condition 4.14 of the Environmental Permit No. EP-226/2005 as amended by the Variation of Environmental Permit — Application No.VEP-221/2006 regarding maintaining landscape, planting, treatment and mitigation measures as specified in inter alia Condition 3.8 and Figure 3 (and comply with the conditions of any updated Permit, amended permit and further permit regarding measures to mitigate landscape and visual impacts).

Compliance of Environmental Legislation

5. The Tenant shall comply with and observe all Ordinances, by-laws, regulations and rules for the time being in force in Hong Kong governing the control of any form of pollution, including air, noise, water and waste pollution, and for the protection of the environment.

Air Pollution

6. Save with an appropriate exemption under the Air Pollution Control Ordinance (Cap. 311) any regulations made thereunder and any amending legislation, the Tenant shall not install or permit or suffer to be installed upon the Premises or any part thereof or any building(s) or structure(s) or part of any building(s) or structure(s) erected or to be erected thereon any furnace, oven, chimney or flue or any other combustion equipment or use or permit or suffer to be used any fuel or any method or process of manufacture or treatment that might in any circumstance result in, cause or contribute to the discharge or emission of any pollutant or any noxious, harmful or corrosive matter, whether it be in the form of gas, smoke, liquid, solid or otherwise (including but not limited to air pollutant as defined in Section 2 of the Air Pollution Control Ordinance

(Cap. 311), which exists or which is imminent, without the prior written approval of the Director.

Water Pollution

- 7. (a) In the event that the Tenant produces, generates, permits, causes, allows or suffers any discharge which is subject to control under the Water Pollution Control Ordinance (Cap. 358) any regulations made thereunder and any amending legislation, the Tenant shall apply to the Director for a licence and comply with the terms and conditions stipulated in the licence at the Tenant's own cost(s). Otherwise, the Tenant is not allowed to discharge directly or indirectly or to produce, generate, permit, cause, allow or suffer any discharge into any public sewer, storm-water drain, channel, stream-course, sea or any area inside or outside the Premises any trade effluent or foul or contaminated water or cooling or hot water. Subject to the said licence from the Director, the Tenant shall at its own cost(s) separate, collect, and discharge all process or industrial wastewater which comply with the standard required for discharge into a sewer leading to the sewage treatment works at Pillar Point or other treatment works specified in the licence.
 - (b) Subject to obtaining advance written approval of the Director, the Tenant shall at its own cost(s) provide, install, operate and maintain its own waste water pretreatment plants within the Premises if such process or industrial wastewater could not meet the standard required for discharge into a sewer leading to the sewage treatment works at Pillar Point or other treatment works specified in the licence. The Tenant shall at its own cost(s) separate, collect, discharge and send all domestic wastewater (i.e. other than process or industrial wastewater) to the Pillar Point Sewage Treatment Works directly for treatment or other treatment works specified in the licence.
 - (c) In any event, the Tenant shall prevent any spilled materials from entering the surface water drainage system and prevent contamination of the sea at its own cost(s) by, inter alia, providing, installing, operating and maintaining stop-logs or interceptors in the surface water drainage system and at the marine frontage area, respectively, or as required by the licence. The Tenant shall at its own cost comply with relevant provisions of the Dumping at Sea Ordinance (Cap. 466) good practices and relevant provisions of the EIA Report and Final EM&A Manual.

Waste Management

- 8. (a) The Tenant shall at its own cost(s) comply with relevant provisions of the Waste Disposal Ordinance (Cap. 354).
 - (b) The Tenant shall not permit, allow or suffer any fuel or chemical and any sewage, waste water or effluent containing sand, cement, silt or any suspended or dissolved material to flow, escape or run from the Premises onto any adjoining land or allow any waste matter which does not form part of the recovery and/or recycling and/or reprocessing operation or is not part of the final product of such operation to be deposited, kept, held or stored anywhere within the Premises and other areas of EcoPark. The Tenant shall at its own cost(s) have all such matters and all materials arising from recycling activities, chemical materials arising from maintenance of plant and equipment, sewage sludge (from wastewater treatment facilities, if any) and general daily waste from the operation removed from the Premises or any building(s) or structure(s) or any part of any building(s) or structure(s) erected or to be erected thereon in a proper manner to the satisfaction of the Landlord and/or the Director.

Noise Pollution

- 9. (a) The Tenant shall take all necessary measures as may be required by and to the satisfaction of the Landlord and/or the Director to ensure that the operation of all plant and equipment, installed or used on the Premises or in any building(s) or structure(s) or any part of any building(s) or structure(s) erected or to be erected thereon, will not result, not cause and/or will not contribute any noise (which exists or which is imminent) which disturbs or annoys the residents or occupiers of any adjoining or neighbouring lot or lots or premises, or causes and/or contributes to disturbance to the general public under the Noise Control Ordinance (Cap. 400) any regulations made thereunder and any amending legislation.
 - (b) The decision of the Landlord or the Director as to whether any such plant and equipment are causing disturbance or annoyance as aforesaid shall be final and binding on the Tenant.

Landfill Gas Hazard

To mitigate landfill gas hazard, the Tenant shall at its own cost(s) comply with, inter alia, Condition 4.13 of the Environmental Permit No. EP-226/2005/A regarding raising clear of the ground all buildings and enclosed structures as specified in inter alia

Condition 3.7 (and comply with the conditions of any updated Permit, amended permit and further permit regarding measures to mitigate hazard to life impact).

EcoPark Being Within the 250m Consultation Zone of Siu Lang Shui Landfill

- 11. (a) The Tenant acknowledges that the EcoPark is within the 250m Consultation Zone of the Siu Lang Shui Landfill and that the Premises may be affected by problems associated with migrating landfill gas and undertakes to provide suitable precautionary or protection measures at his own expense to control these potential hazards.
 - (b) The Tenant shall ensure all personnel entering the Premises and all visitors to the Premises are aware of the potential hazards of the landfill gas by posting suitable warning notices of the potential hazards at his own expense.
 - (c) All buildings and enclosed structures, including temporary offices, temporary stores and the administration building, within the 250m Consultation Zone of the Siu Lang Shui Landfill shall be provided with the following measure(s):
 - (i) buildings shall be raised clear of the ground with a clear separation distance (as measured from the highest point on the ground surface to the underside of the lowest floor joist) of at least 500mm; or
 - (ii) a low-gas permeability membrane shall be applied to the surface of any wall or floor slab that rests on or is below ground. A gravel-fill vent system shall be provided such that passive venting is achieved around the perimeter of the structure. In addition, other building materials, such as dense well-compacted concrete or steel shuttering which provide a measure of resistance to gas permeation, shall be used to achieve gas protection.
 - (d) The Tenant shall ensure that the electrical equipment used on the Premises shall be intrinsically safe. Welding, flame-cutting or other hot works shall be confined to the open areas of the Premises and shall be at least 15m away from any ground-level confined space.
 - (e) No drilling, trenching and excavation shall be allowed on the Premises. During any construction work, the Tenant shall observe the guidelines recommended in Chapter 8 of the "Landfill Gas Hazard Assessment Guidance Note" published by the Department of Environmental Protection. In particular, no smoking, naked

flames and all other sources of ignition shall be allowed within 15m of any ground-level confined space.

Hazard to Life Impact

- 12. To mitigate hazard to life impact, the Tenant shall comply with, inter alia, Conditions 4.8 to 4.10 of the Environmental Permit No. EP-226/2005/A (and comply with the conditions of any updated Permit, amended permit and further permit regarding measures to mitigate hazard to life impact) and shall not:-
 - (a) bring, keep, store or transport chlorine within the Premises and other areas of EcoPark;
 - (b) bring, keep, store, locate or transport dangerous goods, substances and fuels supporting combustion including oxygen, acetylene, hydrogen peroxide, rubber tyres and diesel within 10 metres from the boundary of the site of EcoPark; and
 - (c) exceed the building height restrictions for buildings on the Premises which are on/near the western boundary of the site of EcoPark as mentioned in Annex B to the Environmental Permit No. EP-226/2005/A (including any updated Permit, amended permit and further permit).

Landscape and Visual Impacts

13. To mitigate landscape and visual impacts, the Tenant shall at its own cost(s) comply with, inter alia, Condition 4.14 of the Environmental Permit No. EP-226/2005/A regarding maintaining landscape, planting, treatment and mitigation measures as specified in inter alia Condition 3.8 and Figure 3 (and comply with the conditions of any updated Permit, amended permit and further permit regarding measures to mitigate landscape and visual impacts).

Environmental Permits Relating to EcoPark

14. The Tenant hereby declares, confirms and acknowledges that it is fully aware that, pursuant to the Environmental Impact Assessment Ordinance (Cap.499), the Director has the right to grant, amend or revoke environmental permit(s) or to grant further or amended environmental permit(s) relating to the lots comprising the EcoPark and any other lots but that such right may be challenged by third parties on justifiable grounds. The Tenant hereby undertakes to waive all its rights and remedies for any loss, damages, cost and expenses whatsoever which it may sustain and/or incur directly or

indirectly as a result of the grant, amendment or revocation of the environmental permit(s) or the consequential grant of further or amended environmental permit(s), including but not limited to any right to terminate this Lease and/or to make any claim against the Landlord and/or the Director for any compensation whatsoever.

Notes:

- 1) The throughput data presented in Tables A3.1-1 to A3.1-6 has been rounded off to the nearest whole tonne for presentation.
- 2) The total product output may not be the same as the waste input due to processing of materials that were received before the reporting quarter and were stored within the lots.
- 3) Waste disposal refers to the disposal of general refuse (i.e. packaging) and/or chemical waste.
- 4) Since the recycling of waste glass and construction waste is combined to produce concrete block at K.Wah, the product output and waste disposal from both processes are combined.
- 5) The presented throughput is the best available data.

Table A3.2-1 Recycling of Waste Organic Food

Test Report on Landfill Monitoring

Information Supplied by Client

Client

: Allied Environmental Consultants Ltd.

Client's address

19/F, Kwan Chart Tower, 6 Tonnochy Road,

Wan Chai, Hong Kong

Project

Landfill Gas Monitoring at Eco Park, Tuen Mun

Sample description

Five samples of gas

Sampling location

EP1-1 Inside the Landscaping area of Administration Building

EP1-2 PCCW below-ground chamber outside Lot EP08-01

EP1-3 HGC Broadband below–ground chamber outside Lot EP08-03 EP2-1 HGC Broadband below-ground chamber outside Lot P1 EP2-2 HGC Broadband below-ground chamber outside Lot P3

Test required

For all locations -

In-situ measurement of methane, carbon dioxide, oxygen and

barometric pressure

Laboratory Information

Date of in-situ testing

22/12/2016

Test method used

Measured by Infra Red Gas Analyser GA5000

Results:

Sampling	Sampling Sampling		Meth	nane	Carbon dioxide,	Oxygen,
location	time	pressure, mbar	%v/v	%LEL	%v/v	%v/v
EP1-1	10:05	1021	0.0	0	0.0	20.8
EP1-2	09:50	1021	0.0	0	0.1	20.8
EP1-3	09:45	1021	0.0	0	0.1	20.8
EP2-1	09:55	1021	0.0	0	0.1	20.6
EP2-2	10:00	1021	0.0	0	0.2	20.5

Remarks: 1. A calibration certificate of the monitoring equipment is attached for reference.

2. A layout plan showing the sampling location is also attached for reference.

Issue 1_____AEC

	Inspection Date: 2016/10/20 Time: 10:30 Lot Number: EP07-03 Tenant: Champway	Inspected by:	T. K. 1	HO, Ronan CHAN
<u>Wea</u>	ther Condition: ✓ Sunny Fine Overcast Drizzle Temperature: 29 ℃ Humidity: High Wind: Calm ✓ Light Breeze Strong	Rain ✓ Moderate		Storm Hazy Low
1. G	<u>eneral</u>	N/A Yes	No	Remarks
1.3	Environmental Permit (EP) for Tenant displayed at entrances/exits? Environmental Policy documented? Environmental Management Plan (EMP) kept up-to-date? Emergency Response Plan (ERP) documented?			EP for tenant is not required.
1.5	(a) Drill or training records available?			
2. W	ater Quality	N/A Yes	No	Remarks
2.1	Valid Effluent Discharge Licence available? a) Sampling record available? b) Monitoring frequency met the licence requirement? c) Monitoring result comply with the licence requirement? d) If exceedance is recorded, any follow-up action taken?			Self-monitoring when required by Authority
2.2	Provision of wastewater treatment facility prior to discharge? a) Adequate capacity? b) Properly maintained and function normally? Surface run-off control measures in place and adequately maintained?			
2.4	Surface run-off discharging into drainage system?			
2.52.6	All manholes covered? Foam, oil, grease, debris, rubbish and other objectionable matters prevented from entering nearby drains or sewer?			
2.7	Storage of materials and equipment located away from water bodies?			
2.8	Drainage system well maintained to prevent flooding or overflow? Processes or activities with high risk of contamination located under covered area?		屵	
	Installation of stop-logs in perimeter drainage system for uncovered areas where recovery process with potentially high level of contamination is carried out?	✓ <u> </u>		Stop-logs are available for use by tenant if needed.
2.11	Equipment oil and lubrication replacements performed only in bunded maintenance area?	✓		Replacement activity is not observed

2.12 Contaminated water collected in the surface drainage system is treated at variable facility or other appropriate treatment facility?	water treatment	
2.13 Drainage from maintenance area discharged via oil interceptor?		
a) Oil and grease removed regularly?		
b) Collected by licensed collector?		
2.14 Follow Cargo Handling Guideline to minimise the chance of accidental sploading and unloading adjacent to marine frontage?	oillage during	Not required
2.15 Bulk cargo and materials packed properly?		
2.16 Temporary stockpiles covered during rainstorms?	V	
2.17 Measures to prevent the washing away of sand/silt to drains?	V	No sand/silt is generated from the recycling process
3. Air Quality	N/A Yes No	Remarks
3.1 Valid Specified Process (SP) Licence available for all specified process?		
a) SP Licence conditions / monitoring requirements comply?		
3.2 Operate without generation of noticeable odour?		No operation is observed during inspection
a) If odour is detected, can the source be identified?		
b) Odourous materials covered?		
c) If odour control system is installed, is it operating normally?		The system is switched off as there is no operation
3.3 Dusty materials dampened prior to loading/unloading?		No loading/unloading of dusty materials is observed
3.4 Dust monitoring record available?		Not required
a) Monitoring frequency met the licence requirement?		
b) Any exceedance?		
c) If exceedance is recorded, follow-up action taken?		
3.5 Dust-suppression measures provided where main dust-generating activitie enclosures or regular dampening)?	es take place (i.e.	Dust-generating activity is not observed
3.6 Open burning prohibited?		
3.7 Emission from chimney or powered plant free of black smoke?		No operation is observed during inspection
3.8 Vehicles and equipment switched off while not in use?		
3.9 Obtained approval for installation/alteration of furnace, oven or chimney of 25L liquid fuel/hour, or 35kg solid fuel/hour, or 1150MJ gaseous fuel/hour.	• — — —	Not required
3.10 Obtained approval for the use of liquid fuel with a viscosity point of ignitic centistokes or an equivalent viscosity?	ion >30	Not required
3.11 Air pollution control system properly maintained and function normally?	V	The system is switched off as there is no operation
3.12 Dust collected by any air pollution control equipment installed by tenants compliance for landfill disposal?	tested to ensure	
a) Obtained approval for the use of controlled refrigerant?	V	
b) If yes, record of refrigeration equipment service available?		
3.13 Only ultra-low sulphur diesel is used for activities requiring liquid fuel?		
3.14 Public road around site entrance kept clean and free from dust?		

3.15 Materials transported on trucks covered?	✓ Not observed
3.16 Truck loads to a level within the side and tail boards?	Not observed
3.17 Stockpiles of dusty materials covered or regularly watered?	No stockpile of dusty material is observed
3.18 Major dust source(s): Wind erosion Ve	ehicle/equipment movement
Loading/unloading of materials ✓ Ot	thers: n/a
4. Waste/Chemical Management	
	N/A Y N D I
General A.1. Paris and the state of the stat	N/A Yes No Remarks
4.1 Registered as chemical waste producer?	
4.2 Sufficient receptacles (e.g. rubbish bins) available?	
4.3 Disposed of regularly and properly?	
4.4 Sorting of materials on-site for reuse or disposal to designated outlet?	
4.5 Records of quantities of waste generated, recycled and disposed properly kept?	
4.6 Collection of sludge by licensed collector at regular intervals?	
Packaging of Chemical Waste	V 1 1 1 1 1
4.7 Stored in suitable container?	No chemical waste is observed
4.8 Container properly closed or sealed?	
4.9 Spillage cleaned up immediately through the use of absorbent?	
4.10 Obtained approval for the use of chemical waste container >450L?	
Labelling of Chemical Waste	
4.11 Provision of chemical waste label?	
a) Label is securely attached and visible?	
b) Label is bilingual and in proper dimension?	
c) Information is accurate and sufficient?	
Storage of Chemical Waste	
4.12 Proper "Chemical Waste" sign displayed?	
4.13 Incompatible wastes separated by impermeable partition?	
4.14 Containers kept in cabinet or receptacle of suitable material (if quantity <50L), or provided with drip trays capable of storing 110% of the volume of the largest container (if quantity >50L)?	
4.15 Enclosed on 3 sides with no less than 2m in height or height of tallest container / stack of containers?	
4.16 Properly stored and locked in designated area with adequate ventilation?	
4.17 Storage area paved with concrete and kept clean and dry?	
4.18 Cover provided for outdoor storage area?	
4.19 Chemical waste collected by licensed collector?	
Liquid Chemical Storage	
4.20 Storage area provided with permeation-proof floor or surface?	For storage of product

2.9	Processes or activities with high risk of contamination located under covered area?		Stan lage are available for
2.10	Installation of stop-logs in perimeter drainage system for uncovered areas where recovery process with potentially high level of contamination is carried out?	/	Stop-logs are available for use by tenant if needed.
2.11	Equipment oil and lubrication replacements performed only in bunded maintenance area?	/	Replacement activity is not observed

2.12	Contaminated water collected in the surface drainage system is treated at water treatment facility or other appropriate treatment facility?	Pending for provision of drainage plan from tenant
2.13	Drainage from maintenance area discharged via oil interceptor?	
	a) Oil and grease removed regularly?	
	b) Collected by licensed collector?	
2.14	Follow Cargo Handling Guideline to minimise the chance of accidental spillage during loading and unloading adjacent to marine frontage?	Not required
2.15	Bulk cargo and materials packed properly?	
2.16	Temporary stockpiles covered during rainstorms?	
2.17	Measures to prevent the washing away of sand/silt to drains?	No sand/silt is generated from the recycling process
3. Ai	r Quality	N/A Yes No Remarks
3.1	Valid Specified Process (SP) Licence available for all specified process?	
	a) SP Licence conditions / monitoring requirements comply?	✓ □ □
3.2	Operate without generation of noticeable odour?	No operation is observed during inspection
	a) If odour is detected, can the source be identified?	
	b) Odourous materials covered?	
	c) If odour control system is installed, is it operating normally?	The system is switched off as there is no operation
3.3	Dusty materials dampened prior to loading/unloading?	No loading/unloading of dusty materials is observed
3.4	Dust monitoring record available?	
	a) Monitoring frequency met the licence requirement?	
	b) Any exceedance?	
	c) If exceedance is recorded, follow-up action taken?	
3.5	Dust-suppression measures provided where main dust-generating activities take place (i.e. enclosures or regular dampening)?	Dust-generating activity is not observed
3.6	Open burning prohibited?	
3.7	Emission from chimney or powered plant free of black smoke?	No operation is observed during inspection
3.8	Vehicles and equipment switched off while not in use?	
3.9	Obtained approval for installation/alteration of furnace, oven or chimney consuming over 25L liquid fuel/hour, or 35kg solid fuel/hour, or 1150MJ gaseous fuel/hour?	Not required
3.10	Obtained approval for the use of liquid fuel with a viscosity point of ignition >30 centistokes or an equivalent viscosity?	Not required
3.11	Air pollution control system properly maintained and function normally?	The system is switched off as there is no operation
3.12	Dust collected by any air pollution control equipment installed by tenants tested to ensure compliance for landfill disposal?	
	a) Obtained approval for the use of controlled refrigerant?	/
	b) If yes, record of refrigeration equipment service available?	
3.13	Only ultra-low sulphur diesel is used for activities requiring liquid fuel?	
3.14	Public road around site entrance kept clean and free from dust?	

3.15 Materials transported on trucks covered?	✓ Not observed
3.16 Truck loads to a level within the side and tail boards?	✓ Not observed
3.17 Stockpiles of dusty materials covered or regularly watered?	No stockpile of dusty material is observed
3.18 Major dust source(s): Wind erosion V	ehicle/equipment movement
Loading/unloading of materials	others: n/a
4. Waste / Chemical Management	
General	N/A Yes No Remarks
4.1 Registered as chemical waste producer?	
4.2 Sufficient receptacles (e.g. rubbish bins) available?	
4.3 Disposed of regularly and properly?	
4.4 Sorting of materials on-site for reuse or disposal to designated outlet?	
4.5 Records of quantities of waste generated, recycled and disposed properly kept?	✓ Verified via quarterly report
4.6 Collection of sludge by licensed collector at regular intervals?	
Packaging of Chemical Waste	
4.7 Stored in suitable container?	No chemical waste is observed
4.8 Container properly closed or sealed?	
4.9 Spillage cleaned up immediately through the use of absorbent?	
4.10 Obtained approval for the use of chemical waste container >450L?	
Labelling of Chemical Waste	
4.11 Provision of chemical waste label?	
a) Label is securely attached and visible?	
b) Label is bilingual and in proper dimension?	
c) Information is accurate and sufficient?	
Storage of Chemical Waste	
4.12 Proper "Chemical Waste" sign displayed?	
4.13 Incompatible wastes separated by impermeable partition?	
4.14 Containers kept in cabinet or receptacle of suitable material (if quantity <50L), or provided with drip trays capable of storing 110% of the volume of the largest container (if quantity >50L)?	
4.15 Enclosed on 3 sides with no less than 2m in height or height of tallest container / stack of containers?	
4.16 Properly stored and locked in designated area with adequate ventilation?	
4.17 Storage area paved with concrete and kept clean and dry?	
4.18 Cover provided for outdoor storage area?	
4.19 Chemical waste collected by licensed collector?	
Liquid Chemical Storage	
4.20 Storage area provided with permeation-proof floor or surface?	For storage of product

3.16 Truck loads to a level within the side and tail boards?	✓ Not observed
3.17 Stockpiles of dusty materials covered or regularly watered?	✓ No dusty material is observed
3.18 Major dust source(s): Wind erosion	Vehicle/equipment movement
Loading/unloading of materials	Others: n/a
4. Waste / Chemical Management	
General	N/A Yes No Remarks
4.1 Registered as chemical waste producer?	No chemical waste is observed
4.2 Sufficient receptacles (e.g. rubbish bins) available?	
4.3 Disposed of regularly and properly?	
4.4 Sorting of materials on-site for reuse or disposal to designated outlet?	
4.5 Records of quantities of waste generated, recycled and disposed properly kept?	Verified via quarterly report
4.6 Collection of sludge by licensed collector at regular intervals?	vermed via quarterly report
Packaging of Chemical Waste	
4.7 Stored in suitable container?	
4.8 Container properly closed or sealed?	
4.9 Spillage cleaned up immediately through the use of absorbent?	
4.10 Obtained approval for the use of chemical waste container >450L?	
Labelling of Chemical Waste	
4.11 Provision of chemical waste label?	
a) Label is securely attached and visible?	
b) Label is bilingual and in proper dimension?	
c) Information is accurate and sufficient?	<u> </u>
Storage of Chemical Waste	
4.12 Proper "Chemical Waste" sign displayed?	
4.13 Incompatible wastes separated by impermeable partition?	
4.14 Containers kept in cabinet or receptacle of suitable material (if quantity <50L), or provided with drip trays capable of storing 110% of the volume of the largest container (if quantity >50L)?	ı [
4.15 Enclosed on 3 sides with no less than 2m in height or height of tallest container / stack of containers?	
4.16 Properly stored and locked in designated area with adequate ventilation?	<u> </u>
4.17 Storage area paved with concrete and kept clean and dry?	
4.18 Cover provided for outdoor storage area?	<u> </u>
4.19 Chemical waste collected by licensed collector?	
Liquid Waste Storage	
4.20 Storage area provided with permeation-proof floor or surface?

1.1	Environmental Permit (EP) for Tenant displayed at entrances/exits?	/		EP for tenant is not required		
1.2	Environmental Policy documented?	✓		UPML's Environmental Policy is followed		
1.3	Environmental Management Plan (EMP) kept up-to-date?	✓		UPML's EMP is followed		
1.4	Emergency Response Plan (ERP) documented?	✓		UPML's ERP is followed		
	(a) Drill or training records available?	√				
1.5	All recycling processes in operation have been approved by WFBU?					
1.6	Any record of complaint or prosecution?		√	_		
<u>2. W</u>	ater Quality	N/A Yes	No	Remarks		
2.1	Valid Effluent Discharge Licence available?	V		No wastewater is generated from the recycling process		
	a) Sampling record available?	✓				
	b) Monitoring frequency met the licence requirement?	✓				
	c) Monitoring result comply with the licence requirement?	✓				
	d) If exceedance is recorded, any follow-up action taken?	✓				
2.2	Provision of wastewater treatment facility prior to discharge?	✓				
	a) Adequate capacity?	✓				
	b) Properly maintained and function normally?	✓				
2.3	Surface run-off control measures in place and adequately maintained?	✓				
2.4	Surface run-off discharging into drainage system?	✓				
2.5	All manholes covered?	✓				
2.6	Foam, oil, grease, debris, rubbish and other objectionable matters prevented from entering nearby drains or sewer?					
2.7	Storage of materials and equipment located away from water bodies?					
2.8	Drainage system well maintained to prevent flooding or overflow?			Describe		
2.9	Processes or activities with high risk of contamination located under covered area?	V		Recycling process has low risk of contamination		
2.10	Installation of stop-logs in perimeter drainage system for uncovered areas where recovery process with potentially high level of contamination is carried out?	/		Stop-logs are available for use by tenant if needed.		
2.11	Equipment oil and lubrication replacements performed only in bunded maintenance area?	V		Replacement activity is not observed		

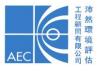

2.12	Contaminated water collected in the surface drainage system is treated at water treatment facility or other appropriate treatment facility?	/	No contaminated water is observed
2.13	Drainage from maintenance area discharged via oil interceptor?	/	Not required
	a) Oil and grease removed regularly?	✓ □ □	
	b) Collected by licensed collector?	/	
2.14	Follow Cargo Handling Guideline to minimise the chance of accidental spillage during loading and unloading adjacent to marine frontage?	/	Not required
2.15	Bulk cargo and materials packed properly?		
2.16	Temporary stockpiles covered during rainstorms?		
2.17	Measures to prevent the washing away of sand/silt to drains?	/	No sand/silt is generated from the recycling process
3. Ai	r Quality	N/A Yes No	Remarks
3.1	Valid Specified Process (SP) Licence available for all specified process?		Not required
	a) SP Licence conditions / monitoring requirements comply?		-
3.2	Operate without generation of noticeable odour?		
	a) If odour is detected, can the source be identified?		-
	b) Odourous materials covered?	✓ □ □	
	c) If odour control system is installed, is it operating normally?	/	
3.3	Dusty materials dampened prior to loading/unloading?	✓ □ □	No loading/unloading of dusty materials is observed
3.4	Dust monitoring record available?		Not required
	a) Monitoring frequency met the licence requirement?		
	b) Any exceedance?	✓ □ □	
	c) If exceedance is recorded, follow-up action taken?	✓ □ □	
3.5	Dust-suppression measures provided where main dust-generating activities take place (i.e. enclosures or regular dampening)?		
3.6	Open burning prohibited?		
3.7	Emission from chimney or powered plant free of black smoke?	✓ □ □	No operation is observed during inspection
3.8	Vehicles and equipment switched off while not in use?		
3.9	Obtained approval for installation/alteration of furnace, oven or chimney consuming over 25L liquid fuel/hour, or 35kg solid fuel/hour, or 1150MJ gaseous fuel/hour?	/	Not required
3.10	Obtained approval for the use of liquid fuel with a viscosity point of ignition >30 centistokes or an equivalent viscosity?	/	Not required
3.11	Air pollution control system properly maintained and function normally?	✓ □ □	No operation is observed during inspection
3.12	Dust collected by any air pollution control equipment installed by tenants tested to ensure compliance for landfill disposal?	/	
	a) Obtained approval for the use of controlled refrigerant?		
	b) If yes, record of refrigeration equipment service available?		
3.13	Only ultra-low sulphur diesel is used for activities requiring liquid fuel?		
3.14	Public road around site entrance kept clean and free from dust?		

3.15 Materials transported on trucks covered?	✓ Not observed			
3.16 Truck loads to a level within the side and tail boards?	Not observed			
3.17 Stockpiles of dusty materials covered or regularly watered?	No stockpile of dusty material is observed			
3.18 Major dust source(s): Wind erosion Ve	chicle/equipment movement			
Loading/unloading of materials Ot	hers: n/a

4.13 Incompatible wastes separated by impermeable partition?		
4.14 Containers kept in cabinet or receptacle of suitable material (if quantity <50L), or provided with drip trays capable of storing 110% of the volume of the largest container (if quantity >50L)?		
4.15 Enclosed on 3 sides with no less than 2m in height or height of tallest container / stack of containers?	/	_
4.16 Properly stored and locked in designated area with adequate ventilation?		
4.17 Storage area paved with concrete and kept clean and dry?	✓	
4.18 Cover provided for outdoor storage area?		
4.19 Chemical waste collected by licensed collector?		
Liquid Waste Storage		
4.20 Storage area provided with permeation-proof floor or surface?		

SITE INSPECTION CHECKLIST

4.21	Capacity of retention structure sufficient to accommodate contents of the largest container or 20% volume of waste in storage?		
4.22	Walls or partitions of stacked container storage area constructed of impermeable material?	V	
5. La	andfill Gas (LFG) (within LFG Consultation Zone)	N/A Yes No	Remarks
5.1	Alert workers and visitors of possible LFG hazards?		
5.2	Smoking and open fires prohibited?		
<u>6. O</u>	thers	N/A Yes No	Remarks
6.1	Works confined within lot boundaries?		
6.2	Damage to surrounding areas avoided?		
6.3	Site lighting designed to avoid glare to surrounding receivers?		
6.4	Materials and machinery stored in an orderly manner?		
6.5	Areas within lot for recycling activities paved with concrete?		
6.6	Potential stagnant pools cleared and mosquito breeding prevented?		
6.7	Valid calibration certificate for any monitoring equipment?		No monitoring is required
6.8	Valid licence(s) obtained for manufacture or storage of dangerous goods?		Not required
	a) Storage area in compliance with the approved plan?		
	b) Storage area is securely locked?		
	c) Total storage capacity in compliance with relevant statutory requirement?		
	d) Proper labelling provided?		
	e) Dangerous goods properly packaged?

1.1	Environmental Permit (EP) for Tenant displayed at entrances/exits?	V		EP for tenant is not required.
1.2	Environmental Policy documented?			
1.3	Environmental Management Plan (EMP) kept up-to-date?			
1.4	Emergency Response Plan (ERP) documented?			
	(a) Drill or training records available?			
1.5	All recycling processes in operation have been approved by WFBU?			
1.6	Any record of complaint or prosecution?		✓	
<u>2. W</u>	ater Quality	N/A Yes	No	Remarks
2.1	Valid Effluent Discharge Licence available?	√		No wastewater is generated from recycling process
	a) Sampling record available?	✓		
	b) Monitoring frequency met the licence requirement?	√		
	c) Monitoring result comply with the licence requirement?	✓		
	d) If exceedance is recorded, any follow-up action taken?	✓		
2.2	Provision of wastewater treatment facility prior to discharge?	✓		
	a) Adequate capacity?	✓		
	b) Properly maintained and function normally?	✓		
2.3	Surface run-off control measures in place and adequately maintained?	✓		
2.4	Surface run-off discharging into drainage system?	✓		
2.5	All manholes covered?	✓		
2.6	Foam, oil, grease, debris, rubbish and other objectionable matters prevented from entering nearby drains or sewer?			
2.7	Storage of materials and equipment located away from water bodies?			
2.8	Drainage system well maintained to prevent flooding or overflow?			
2.9	Processes or activities with high risk of contamination located under covered area?			Complementary 2000
2.10	Installation of stop-logs in perimeter drainage system for uncovered areas where recovery process with potentially high level of contamination is carried out?	V		Stop-logs are available for use by tenant if needed.
2.11	Equipment oil and lubrication replacements performed only in bunded maintenance area?	✓		Replacement activity is not observed

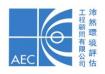

2.12	Contaminated water collected in the surface drainage system is treated at water treatment facility or other appropriate treatment facility?	√	No contaminated water is observed
2.13	Drainage from maintenance area discharged via oil interceptor?		Not required
	a) Oil and grease removed regularly?	✓ □ □	
	b) Collected by licensed collector?	✓ □ □	
2.14	Follow Cargo Handling Guideline to minimise the chance of accidental spillage during loading and unloading adjacent to marine frontage?	✓ □ □	Not required
2.15	Bulk cargo and materials packed properly?		
2.16	Temporary stockpiles covered during rainstorms?		
2.17	Measures to prevent the washing away of sand/silt to drains?	✓	No sand/silt is generated from the recycling process
3. Ai	r Quality	N/A Yes No	Remarks
3.1	Valid Specified Process (SP) Licence available for all specified process?		Not required
	a) SP Licence conditions / monitoring requirements comply?		
3.2	Operate without generation of noticeable odour?		
	a) If odour is detected, can the source be identified?		-
	b) Odourous materials covered?		
	c) If odour control system is installed, is it operating normally?	✓	
3.3	Dusty materials dampened prior to loading/unloading?	✓ □ □	Dusty material is not observed
3.4	Dust monitoring record available?	✓ <u> </u>	Not required
	a) Monitoring frequency met the licence requirement?	✓ □ □	
	b) Any exceedance?		
	c) If exceedance is recorded, follow-up action taken?		
3.5	Dust-suppression measures provided where main dust-generating activities take place (i.e. enclosures or regular dampening)?		Dust-generating activity is not observed
3.6	Open burning prohibited?		
3.7	Emission from chimney or powered plant free of black smoke?		No chimney/powered plant is being used
3.8	Vehicles and equipment switched off while not in use?		
3.9	Obtained approval for installation/alteration of furnace, oven or chimney consuming over 25L liquid fuel/hour, or 35kg solid fuel/hour, or 1150MJ gaseous fuel/hour?	/	
3.10	Obtained approval for the use of liquid fuel with a viscosity point of ignition >30 centistokes or an equivalent viscosity?	✓ □ □	
3.11	Air pollution control system properly maintained and function normally?	✓ □ □	
3.12	Dust collected by any air pollution control equipment installed by tenants tested to ensure compliance for landfill disposal?		
	a) Obtained approval for the use of controlled refrigerant?		
	b) If yes, record of refrigeration equipment service available?		
3.13	Only ultra-low sulphur diesel is used for activities requiring liquid fuel?		
3.14	Public road around site entrance kept clean and free from dust?		

3.15 Materials transported on trucks covered?	✓ Not observed			
3.16 Truck loads to a level within the side and tail boards?	Not observed			
3.17 Stockpiles of dusty materials covered or regularly watered?	No stockpile of dusty material is observed			
3.18 Major dust source(s): Wind erosion	Vehicle/equipment movement			
Loading/unloading of materials	Others: n/a			
4. Waste / Chemical Management				
<u>General</u>	N/A Yes No Remarks			
4.1 Registered as chemical waste producer?				
4.2 Sufficient receptacles (e.g. rubbish bins) available?				
4.3 Disposed of regularly and properly?				
4.4 Sorting of materials on-site for reuse or disposal to designated outlet?				
4.5 Records of quantities of waste generated, recycled and disposed properly kept?				
4.6 Collection of sludge by licensed collector at regular intervals?				
Packaging of Chemical Waste				
4.7 Stored in suitable container?				
4.8 Container properly closed or sealed?				
4.9 Spillage cleaned up immediately through the use of absorbent?				
4.10 Obtained approval for the use of chemical waste container >450L?				
<u>Labelling of Chemical Waste</u>				
4.11 Provision of chemical waste label?				
a) Label is securely attached and visible?				
b) Label is bilingual and in proper dimension?				
c) Information is accurate and sufficient?				
Storage of Chemical Waste				
4.12 Proper "Chemical Waste" sign displayed?				
4.13 Incompatible wastes separated by impermeable partition?

2.11	Equipment oil and lubrication replacements performed only in bunded maintenance area?	✓	Replacement activity is not observed

2.12	Contaminated water collected in the surface drainage system is treated at water treatment facility or other appropriate treatment facility?	√	No contaminated water was observed
2.13	Drainage from maintenance area discharged via oil interceptor?	✓	Not required
	a) Oil and grease removed regularly?	✓	
	b) Collected by licensed collector?	/	
2.14	Follow Cargo Handling Guideline to minimise the chance of accidental spillage during loading and unloading adjacent to marine frontage?	/	Not required
2.15	Bulk cargo and materials packed properly?		
2.16	Temporary stockpiles covered during rainstorms?	✓	
2.17	Measures to prevent the washing away of sand/silt to drains?	√	No sand/silt is generated from the recycling process
3. Ai	r Quality	N/A Yes No	Remarks
3.1	Valid Specified Process (SP) Licence available for all specified process?	✓	Not required
	a) SP Licence conditions / monitoring requirements comply?		
3.2	Operate without generation of noticeable odour?	✓	
	a) If odour is detected, can the source be identified?		
	b) Odourous materials covered?	✓	
	c) If odour control system is installed, is it operating normally?	✓ □ □	
3.3	Dusty materials dampened prior to loading/unloading?	/	No loading/unloading of dusty materials is observed
3.4	Dust monitoring record available?	✓	Not required
	a) Monitoring frequency met the licence requirement?	✓ <u> </u>	
	b) Any exceedance?	✓	
	c) If exceedance is recorded, follow-up action taken?	✓	
3.5	Dust-suppression measures provided where main dust-generating activities take place (i.e. enclosures or regular dampening)?	V	Dust-generating activity is not observed
3.6	Open burning prohibited?	✓	
3.7	Emission from chimney or powered plant free of black smoke?	✓	No operation is observed during inspection
3.8	Vehicles and equipment switched off while not in use?		
3.9	Obtained approval for installation/alteration of furnace, oven or chimney consuming over 25L liquid fuel/hour, or 35kg solid fuel/hour, or 1150MJ gaseous fuel/hour?	✓	Not required
3.10	Obtained approval for the use of liquid fuel with a viscosity point of ignition >30 centistokes or an equivalent viscosity?	V	Not required
3.11	Air pollution control system properly maintained and function normally?	✓	
3.12	Dust collected by any air pollution control equipment installed by tenants tested to ensure compliance for landfill disposal?	V	
	a) Obtained approval for the use of controlled refrigerant?	✓	
	b) If yes, record of refrigeration equipment service available?	✓	
3.13	Only ultra-low sulphur diesel is used for activities requiring liquid fuel?	✓	
3.14	Public road around site entrance kept clean and free from dust?	✓	

3.15 Materials transported on trucks covered?	✓ Not observed
3.16 Truck loads to a level within the side and tail boards?	✓ Not observed
3.17 Stockpiles of dusty materials covered or regularly watered?	No stockpile of dusty material is observed
3.18 Major dust source(s): Wind erosion	Vehicle/equipment movement
Loading/unloading of materials	Others: n/a
4. Waste / Chemical Management	
<u>General</u>	N/A Yes No Remarks No chemical waste is
4.1 Registered as chemical waste producer?	observed
4.2 Sufficient receptacles (e.g. rubbish bins) available?	
4.3 Disposed of regularly and properly?	
4.4 Sorting of materials on-site for reuse or disposal to designated outlet?	
4.5 Records of quantities of waste generated, recycled and disposed properly kept?	
4.6 Collection of sludge by licensed collector at regular intervals?	
Packaging of Chemical Waste	
4.7 Stored in suitable container?	
4.8 Container properly closed or sealed?	
4.9 Spillage cleaned up immediately through the use of absorbent?	
4.10 Obtained approval for the use of chemical waste container >450L?	
Labelling of Chemical Waste	
4.11 Provision of chemical waste label?	
a) Label is securely attached and visible?	
b) Label is bilingual and in proper dimension?	
c) Information is accurate and sufficient?	
Storage of Chemical Waste	
4.12 Proper "Chemical Waste" sign displayed?	
4.13 Incompatible wastes separated by impermeable partition?	
4.14 Containers kept in cabinet or receptacle of suitable material (if quantity <50L), or provided wit drip trays capable of storing 110% of the volume of the largest container (if quantity >50L)?	th 🗸 📗
4.15 Enclosed on 3 sides with no less than 2m in height or height of tallest container / stack of containers?	
4.16 Properly stored and locked in designated area with adequate ventilation?	
4.17 Storage area paved with concrete and kept clean and dry?	
4.18 Cover provided for outdoor storage area?	
4.19 Chemical waste collected by licensed collector?	
Liquid Waste Storage	
4.20 Storage area provided with permeation-proof floor or surface?	

SITE INSPECTION CHECKLIST

	Capacity of retention structure sufficient to accommodate contents of the largest container or		
	20% volume of waste in storage? Walls or partitions of stacked container storage area constructed of impermeable material?

1. G	eneral	N/A Yes	No Remarks
1.1	Environmental Permit (EP) for Tenant displayed at entrances/exits?	V	EP for tenant is not required.
1.2	Environmental Policy documented?	/	UPML's Environmental Policy is followed
1.3	Environmental Management Plan (EMP) kept up-to-date?	/ [UPML's Environmental Policy is followed
1.4	Emergency Response Plan (ERP) documented?	/ [UPML's EMP is followed
	(a) Drill or training records available?	/	UPML's ERP is followed
1.5	All recycling processes in operation have been approved by WFBU?		
1.6	Any record of complaint or prosecution?		✓
2. W	ater Quality	N/A Yes	No Remarks Renewal record is pending
2.1	Valid Effluent Discharge Licence available?		from tenant
	a) Sampling record available?		<u> </u>
	b) Monitoring frequency met the licence requirement?	<u> </u>	
	c) Monitoring result comply with the licence requirement?		
	d) If exceedance is recorded, any follow-up action taken?		
2.2	Provision of wastewater treatment facility prior to discharge?		
	a) Adequate capacity?	<u> </u>	
	b) Properly maintained and function normally?	<u> </u>	
2.3	Surface run-off control measures in place and adequately maintained?		
2.4	Surface run-off discharging into drainage system?	✓	Not observed
2.5	All manholes covered?		
2.6	Foam, oil, grease, debris, rubbish and other objectionable matters prevented from entering nearby drains or sewer?		
2.7	Storage of materials and equipment located away from water bodies?		
2.8	Drainage system well maintained to prevent flooding or overflow?		
2.9	Processes or activities with high risk of contamination located under covered area?		Stop-logs are available for use
2.10	Installation of stop-logs in perimeter drainage system for uncovered areas where recovery process with potentially high level of contamination is carried out?	/	by tenant if needed.
2.11	Equipment oil and lubrication replacements performed only in bunded maintenance area?	✓	Replacement activity is not observed

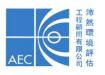

2.12	Contaminated water collected in the surface drainage system is treated at water treatment facility or other appropriate treatment facility?	√	No recycling operation is observed
2.13	Drainage from maintenance area discharged via oil interceptor?	✓ <u> </u>	Not required
	a) Oil and grease removed regularly?	✓	
	b) Collected by licensed collector?	✓ <u> </u>	
2.14	Follow Cargo Handling Guideline to minimise the chance of accidental spillage during loading and unloading adjacent to marine frontage?	V	Not required
2.15	Bulk cargo and materials packed properly?		
2.16	Temporary stockpiles covered during rainstorms?	✓	
2.17	Measures to prevent the washing away of sand/silt to drains?	V	No sand/silt is generated from the recycling process
3. Ai	r Quality	N/A Yes No	Remarks
3.1	Valid Specified Process (SP) Licence available for all specified process?	/	Not required
	a) SP Licence conditions / monitoring requirements comply?	/	
3.2	Operate without generation of noticeable odour?		
	a) If odour is detected, can the source be identified?	/	
	b) Odourous materials covered?	✓ <u> </u>	
	c) If odour control system is installed, is it operating normally?	✓	
3.3	Dusty materials dampened prior to loading/unloading?	✓ <u> </u>	No loading/unloading of dusty materials is observed
3.4	Dust monitoring record available?	✓	Not required
	a) Monitoring frequency met the licence requirement?	✓ <u> </u>	
	b) Any exceedance?	✓ <u> </u>	
	c) If exceedance is recorded, follow-up action taken?	✓	
3.5	Dust-suppression measures provided where main dust-generating activities take place (i.e. enclosures or regular dampening)?	V	Dust-generating activity is not observed
3.6	Open burning prohibited?		
3.7	Emission from chimney or powered plant free of black smoke?		
3.8	Vehicles and equipment switched off while not in use?		
3.9	Obtained approval for installation/alteration of furnace, oven or chimney consuming over 25L liquid fuel/hour, or 35kg solid fuel/hour, or 1150MJ gaseous fuel/hour?	V	Not required
3.10	Obtained approval for the use of liquid fuel with a viscosity point of ignition >30 centistokes or an equivalent viscosity?	V	Not required
3.11	Air pollution control system properly maintained and function normally?	✓	
3.12	Dust collected by any air pollution control equipment installed by tenants tested to ensure compliance for landfill disposal?	V	
	a) Obtained approval for the use of controlled refrigerant?	✓	
	b) If yes, record of refrigeration equipment service available?	✓	
3.13	Only ultra-low sulphur diesel is used for activities requiring liquid fuel?	✓ <u> </u>	
3.14	Public road around site entrance kept clean and free from dust?		-

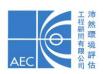

3.15 Materials transported on trucks covered?	✓ Not observed
3.16 Truck loads to a level within the side and tail boards?	✓ Not observed
3.17 Stockpiles of dusty materials covered or regularly watered?	No stockpile of dusty material is observed
3.18 Major dust source(s): Wind erosion	Vehicle/equipment movement
Loading/unloading of materials	Others: n/a

4.12 Proper "Chemical Waste" sign displayed?	
4.13 Incompatible wastes separated by impermeable partition?	
4.14 Containers kept in cabinet or receptacle of suitable material (if quantity <50L), or provided winding trays capable of storing 110% of the volume of the largest container (if quantity >50L)?	th
4.15 Enclosed on 3 sides with no less than 2m in height or height of tallest container / stack of containers?	
4.16 Properly stored and locked in designated area with adequate ventilation?	
4.17 Storage area paved with concrete and kept clean and dry?	
4.18 Cover provided for outdoor storage area?	✓ No outdoor storage
4.19 Chemical waste collected by licensed collector?	
Liquid Waste Storage	
4.20 Storage area provided with permeation-proof floor or surface?	✓ Not observed

SITE INSPECTION CHECKLIST

4.21 Capacity of retention structure sufficient to accommodate contents of the largest container or 20% volume of waste in storage?	<u> </u>
4.22 Walls or partitions of stacked container storage area constructed of impermeable material?	
5. Landfill Gas (LFG) (within LFG Consultation Zone)	N/A Yes No Remarks
5.1 Alert workers and visitors of possible LFG hazards?	
5.2 Smoking and open fires prohibited?	
6. Others	N/A Yes No Remarks
6.1 Works confined within lot boundaries?	
6.2 Damage to surrounding areas avoided?	
6.3 Site lighting designed to avoid glare to surrounding receivers?	
6.4 Materials and machinery stored in an orderly manner?	
6.5 Areas within lot for recycling activities paved with concrete?	
6.6 Potential stagnant pools cleared and mosquito breeding prevented?	
6.7 Valid calibration certificate for any monitoring equipment?	✓ No monitoring is required
6.8 Valid licence(s) obtained for manufacture or storage of dangerous goods?	
a) Storage area in compliance with the approved plan?	
b) Storage area is securely locked?	
c) Total storage capacity in compliance with relevant statutory requirement?	
d) Proper labelling provided?	
e) Dangerous goods properly packaged?

Remarks:

Follow-up from Previous Audits

1) The tenant has cleared the gravels and sands from the surface channel between the site office and the entrance of workshop.

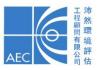

(Observed on 20 October 2016)

(Observed on 23 November 2016)

SITE INSPECTION CHECKLIST

New Observations

1) Fallen leaves and branches are observed in the stormwater drain near the southwest corner of the lot that clogged the drainage channel. The tenant is requested to remove the materials and regularly inspect the condition of all drainage channels in the lot to ensure that the channels can function properly.

(Observed on 28 November 2016)

Remarks:

Follow-up from Previous Audits

1) The tenant has yet to clear the blockage of the stormwater drain near the southwest corner of the lot during the site audit. As advised by the tenant, the clearance activity will be carried out in the afternoon of the same day. According to the photo record provided by the Operator on the same day, the tenant has cleared the drainage channel. The condition will be verified in the next site audit.

3.16 Truck loads to a level within the side and tail boards?	✓ Not observed
3.17 Stockpiles of dusty materials covered or regularly watered?	No stockpile of dusty material is observed
3.18 Major dust source(s): Wind erosion	Vehicle/equipment movement
Loading/unloading of materials	Others: n/a
4. Waste / Chemical Management	
<u>General</u>	N/A Yes No Remarks
4.1 Registered as chemical waste producer?	No chemical waste is observed
4.2 Sufficient receptacles (e.g. rubbish bins) available?	
4.3 Disposed of regularly and properly?	
4.4 Sorting of materials on-site for reuse or disposal to designated outlet?	
4.5 Records of quantities of waste generated, recycled and disposed properly kept?	Verified via quarterly report
4.6 Collection of sludge by licensed collector at regular intervals?	
Packaging of Chemical Waste	
4.7 Stored in suitable container?	
4.8 Container properly closed or sealed?	
4.9 Spillage cleaned up immediately through the use of absorbent?	
4.10 Obtained approval for the use of chemical waste container >450L?	
<u>Labelling of Chemical Waste</u>	
4.11 Provision of chemical waste label?	
a) Label is securely attached and visible?	
b) Label is bilingual and in proper dimension?	
c) Information is accurate and sufficient?	
Storage of Chemical Waste	
4.12 Proper "Chemical Waste" sign displayed?	
4.13 Incompatible wastes separated by impermeable partition?	
4.14 Containers kept in cabinet or receptacle of suitable material (if quantity <50L), or provided with drip trays capable of storing 110% of the volume of the largest container (if quantity >50L)?	h 🗸 🗌 🔝
4.15 Enclosed on 3 sides with no less than 2m in height or height of tallest container / stack of containers?	
4.16 Properly stored and locked in designated area with adequate ventilation?	
4.17 Storage area paved with concrete and kept clean and dry?	
4.18 Cover provided for outdoor storage area?	
4.19 Chemical waste collected by licensed collector?	
<u>Liquid Waste Storage</u>	
4.20 Storage area provided with permeation-proof floor or surface?	

SITE INSPECTION CHECKLIST

4.21	Capacity of retention structure sufficient to accommodate contents of the largest container or	
	20% volume of waste in storage?	
4.22	Walls or partitions of stacked container storage area constructed of impermeable material?	
5. La	ndfill Gas (LFG) (within LFG Consultation Zone)	N/A Yes No Remarks
5.1	Alert workers and visitors of possible LFG hazards?	Outside LFG consultation zone
5.2	Smoking and open fires prohibited?	
<u>6. Ot</u>	<u>hers</u>	N/A Yes No Remarks
6.1	Works confined within lot boundaries?	
6.2	Damage to surrounding areas avoided?	
6.3	Site lighting designed to avoid glare to surrounding receivers?	
6.4	Materials and machinery stored in an orderly manner?	
6.5	Areas within lot for recycling activities paved with concrete?	
6.6	Potential stagnant pools cleared and mosquito breeding prevented?	
6.7	Valid calibration certificate for any monitoring equipment?	Not provided
6.8	Valid licence(s) obtained for manufacture or storage of dangerous goods?	
	a) Storage area in compliance with the approved plan?	
	b) Storage area is securely locked?	
	c) Total storage capacity in compliance with relevant statutory requirement?	
	d) Proper labelling provided?	✓
	e) Dangerous goods properly packaged?	

Remarks:

New Observations

1) Storage tank is observed near the perimeter drainage channel along the eastern boundary of the lot that may cause potential contamination. The tenant is requested to relocate the tanks away from the drainage channel to prevent potential accidental leakage directly into the channel, and provide cleaning for the channels/storage area where needed.

(Observed on 28 November 2016)

Project No.: 1260	
EcoPark Operation Ouarterly Environmental Monitoring & Audit Report (October – December 20)	016)
	Appendix 7
	Appendix 7 Complaints Log

Issue 1_____AEC

Log Reference	005
Date	26 th October 2016
Location	Lot EP12-01 (South China)
Complainant/ Date of Contact	A public complaint on the operation of South China Reborn Resources (Zhongshan) Co. Ltd. (tenant) was received by EPD on 26 th October 2016. The complaint was referred by EPD to the ET, IEC and the Project Proponent on 3 rd November 2016.
Details of Complaint	According to the information by EPD, the following complaints were made by the complainant:
	 a) No treatment was provided by the WTP and discharged directly and emits odour with rotten smell irregularly;
	b) The wastewater treatment plant (WTP) on 3/F was never used; and
	c) Wastewater from the WTP on 3/F was discharged to stormwater drain.
Investigation/ Mitigation Action	A meeting was held between the ET, the tenant and the Operator to review the situation on 8 th November 2016 followed by a site investigation. No recycling activity was being carried out during the investigation while cleaning of recycling bin was in progress. No noticeable odour was detected within the lot, except a slight odour with sour smell was
	noticed within the building at the works area, which was likely to be the residual odour from food waste processing and no particular source of generation could be identified. The odour became barely perceptible near the entrance of the building and was not noticeable at the building entrance outside the building structure. The odour intensity was similar to that detected during regular monthly site audit and was considered as normal from operation of food waste processing. As advised by the tenant, the air curtains would be switched on with roller shutter partially lowered when recycling activity is in operation.
	As advised by the tenant, wastewater was generated mainly from the cleaning of food waste containers and vehicles on G/F. The wastewater would be collected by surface drainage channels with grease trap and discharged into the underground storage tank to undergo preliminary sedimentation (Stage 1) and oil-grease separation (Stage 2), where the scum and sediments from stage 1 and 2 are tanked away. The remaining wastewater (Stage 3) after the two-stage treatment will be pumped to the WTP on 3/F for further treatment.
	However, the surface drainage channels and grease trap on G/F were malfunctioned probably due to the high viscosity of the wastewater that clogged the channel, thereby reducing the efficiency to transfer the wastewater from drainage channel towards the underground storage tank and potentially causing occasional discharge of the accumulated wastewater from the drainage channel. As observed during the investigation, temporary water pipes and pump were added to divert the wastewater towards the underground storage tank as mitigation. Additional pump cars were also deployed for tank away of the wastewater. As advised by the tenant, advice would be sought from the Authorised Person (AP) to look for possible proposals in order to improve the efficiency of wastewater diversion permanently.
	In addition to the diversion of wastewater towards the underground storage tank, improper functioning of the submersible pumping system was also identified by the tenant that was unable to pump the wastewater to the WTP on 3/F efficiently. As advised by the tenant, a new submersible pump with greater capacity is being purchased to replace the inefficient pump. When needed, additional tank away was employed by the tenant to pump away the wastewater from Stage 3 as mitigation.

Testing of the wastewater treatment system including the WTP was in progress during the investigation. Sampling of the treated effluent from the WTP has been scheduled to be carried out by HOKLAS laboratory on 9th November 2016. The wastewater treatment system is proposed to re-operate once the testing is completed with the discharge quality in full compliance with the discharge licence. No wastewater was discharged as noticed during the investigation.

It was noticed that a couple of stormwater manholes were located near the designated cleaning area for the incoming food waste containers and vehicle. Since the manholes were located at low ground, the tenant admitted that there was possibility for the cleansing water to be washed into the stormwater manholes accidentally. The tenant is investigating with the AP to permanently improve the surface drain collection and cleansing water collection at the designated cleaning area. Prior to confirmation and implementation of the improvement plan, the tenant proposed to seal up the stormwater manholes near the cleaning area initially.

As contingency, plastic boards had been placed on the stormwater manholes during cleaning activities and sandbags were provided to surround the manholes to prevent potential spillage of wastewater into the manholes as observed during the investigation. The tenant will provide regular checking of the manholes and had reminded factory staff to pay particular attention to the cleaning activities to avoid cleansing water from entering the manholes.

Follow-up Action

According to the photo records provided by the Operator, new pumps had been installed at the underground storage tank by the tenant to replace the existing pump. Cleaning of the treatment system was ongoing as noticed during the monthly site audit on 28th November 2016. As advised by the tenant, effluent sampling would be carried out again by HOKLAS laboratory upon completion of the cleaning activity. No discharge will be made prior to ensuring the discharge quality fully complies with the discharge licence.

Further to covering up the manholes with plastic board and surrounding the manholes with sandbags, the tenant had sealed up the stormwater manholes near the designated cleaning area with metal covers and surrounded with concrete bunding to prevent accidental spillage of cleansing water from entering the manholes as observed during monthly site audit. The stormwater outfall immediate outside the lot of South China was also opened for investigation during the monthly site audit and no sign of potential contamination of discharge by food waste was observed. Reminders were given to factory staff to pay particular attention. Nonetheless, cleaning work for stormwater manholes and drainage channels had been carried out by the tenant.

In addition, the tenant had met with the AP to seek for practical proposals to permanently improve the surface drainage collection on G/F and the efficiency of wastewater diversion from grease trap on G/F to the underground storage tank. The AP is still working on potential proposals as advised by tenant.

Nonetheless, visual inspection of the last stormwater manhole within the tenant's lot during future site audit will be considered to verify that no occurrence of wastewater spillage to stormwater drains. Additional sampling may be carried out at the last stormwater manhole, when needed, to verify the condition with reference to the standards stipulated on the *Technical Memorandum Standards for Effluent Discharged into Drainage and Sewerage Systems, Inland and Coastal Waters*.

The tenant is also arranging to install flow meters with logging function for the WTP on 3/F to record the flow of wastewater in order to demonstrate the use of the WTP.

	The tenant was reminded to ensure proper operation of the air curtains during operation of recycling activities. The roller shutter should also be lowered partially to enhance the negative pressure condition of the works area when recycling activity is carried out. The repairing status of the WTP will be followed up by the ET in subsequent monthly site audits.
Status	Ongoing
