EXECUTIVE SUMMARY

General

EcoPark is a key element in the Government's waste management policy that aims at promoting the local recycling industry by providing long-term land at affordable rents, thereby encouraging investment in advanced technology and value-added recycling processes. EcoPark is being developed in two phases at site in Tuen Mun Area 38 as shown in *Figure 1-1*. The contract for the management of EcoPark – Contract No. *EP/SP/102/17 Provision of Management Services for EcoPark 2018* was awarded to Urban Property Management Limited (UPML) by Environmental Protection Department (EPD) effective from 30th October 2018.

UPML, the "Operator" of EcoPark, have appointed Allied Environmental Consultants Ltd. (AEC) as the Environmental Team (ET) to carry out the Environmental Monitoring and Audit (EM&A) works for the operation of EcoPark as required by the EM&A Manual and in accordance with the conditions of the Environmental Permit (EP) (EP-226/2005/F).

This is the fifty (50th) quarterly EM&A report prepared for the operation phase of EcoPark and covers the quarter from July to September 2019. In the reporting quarter, there were eleven tenants in EcoPark Phase 1 and Phase 2, one operator of Lot T7 in EcoPark Phase 1 and one operator of WEEE.PARK in EcoPark Phase 2. The details are provided as below:

Phase 1 tenants and operator comprise:

- Champway Technology Ltd. (Champway) Waste cooking oil
- 3R Hong Kong International Eco-Pioneer Ltd. (3R) Waste plastics
- Hong Kong Biomass (Wood) Collect and Recycle Co. Ltd. (HK Biomass) Waste wood
- Baguio Waste Management & Recycling Ltd. (Baguio) Waste plastics
- HP Telford Envirotech Group Ltd. (HP Telford) Waste plastics
- Food Waste Management Group (FWMG) of EPD Waste wood

Phase 2 tenants and operator comprise:

- K.Wah Construction Products Ltd. (K.Wah) Waste construction materials/waste glass
- E.Tech Management (HK) Ltd. (E.Tech) WEEE
- On Fat Lung Innovative Resources Ltd. (On Fat Lung) Waste rubber tyres
- Chung Yue Steel Group Company Ltd. (Chung Yue) Waste metals
- Hong Kong Battery Recycling Centre Ltd. (HKBRC) Waste lead-acid batteries
- South China Reborn Resources (Zhongshan) Co. Ltd. (South China) Food waste
- WEEE.PARK operated by Alba Integrated Waste Solutions (Hong Kong) Ltd. (Alba IWS) –
 WEEE

Recycling activities of WEEE.PARK and the following eight active tenants were audited in the reporting quarter: Champway, HK Biomass, HP Telford, K.Wah, E.Tech, On Fat Lung, Chung Yue and South China. Lots possessed by HKBRC (i.e. Lots P9 & P10), the lots possessed by 3R (i.e. Lots T2 & T3), the lot possessed by Baguio (i.e. Lot T6), the lot possessed by FWMG of EPD (i.e. Lot T7) and Lots P1, P5, P6 and P7 were inspected but not audited under the EM&A programme during the reporting quarter, as no recycling activities were conducted.

In this reporting quarter, site inspections were conducted by the Operator and the ET on 24th July, 20th August and 18th September 2019. IEC also carried out random site audits on 24th July and 18th September 2019. A quarterly joint site inspection was carried out by the Operator, the IEC and the ET on 20th August 2019.

Throughput of Materials / Waste Generated

The throughputs of WEEE.PARK and the eight active tenants in the reporting quarter are summarised below. Please note that product output plus waste disposal does not necessarily equal the waste input, due to material losses during processing and material retained within the lots.

Material Type	Waste Input (tonne)	Product Output (4) (tonne)	Waste Disposed (4) (tonne)
Waste Organic Food	762	649	72
Waste Ferrous Metals	24,009	24,495	142
Waste Wood	182	143	-
Waste Electronics	4,601	4,154	574
Waste Plastics	654	688	-
Construction Waste	327	12 502	202
Waste Glass	506	13,592	303
Waste Rubber Tyres	n/a	n/a	n/a

Notes:

- 1) The throughput data presented above is the best available data and has been rounded off to the nearest whole tonne for presentation.
- 2) The total product output may not be the same as the waste input due to processing of materials that were received before the reporting quarter and were stored within the lots.
- 3) Waste disposal refers to the disposal of general refuse (i.e. packaging) and/or chemical waste.
- 4) Since the recycling of waste glass and construction waste is combined to produce concrete block at K.Wah, the product output and waste disposal from both processes are combined.
- 5) "-" in the column of waste disposal denotes zero quantity; while "n/a" denotes unavailable information.

Exceedances of Any Measured Action / Limit Levels

The northern part of EcoPark is located within the 250m Landfill Gas (LFG) Consultation Zone of Shiu Lang Shui Landfill. LFG monitoring during this quarter was undertaken on 18th September 2019 at five locations (three in Phase 1 and two in Phase 2). No exceedance of Action or Limit Level was recorded in the reporting quarter.

Project No.: 1616

EcoPark Operation

Quarterly Environmental Monitoring & Audit Report (July - September 2019)

3

Summary of Complaints, Summons and Prosecutions

Number of complaints, summons and successful prosecutions in the reporting quarter are summarised below.

• Complaints: Zero.

• Summons: Zero.

• Successful Prosecutions: Zero

Reporting Changes

There is no change in the reporting quarter.

Future Key Issues

No key issues are anticipated in the next reporting quarter.

1 PROJECT BACKGROUND

1.1 Project Overview

- 1.1.1 In the document "A Policy Framework for the Management of Municipal Solid Waste (2005 –2014)", the government set out a comprehensive policy to support the recycling industry. This included allocating suitable land, encouraging research and development, introducing environmental legislation and providing effective support measures. In May 2013, the Environment Bureau launched "Hong Kong Blueprint for Sustainable Use of Resources 2013 2022", which promised continuing support for the recycling industry.
- 1.1.2 EcoPark was developed to support the local recycling industry by providing long-term land at affordable rents, thereby encouraging investment in advanced technology and value-added recycling processes.
- 1.1.3 EcoPark, as shown in *Figure 1-1*, has been developed in Tuen Mun Area 38 in two phases (Phase1 and Phase 2) under Contract *EP/SP/52/06 Development of EcoPark in Tuen Mun Area 38*, which was awarded to Kaden Construction Ltd by the Environmental Protection Department (EPD) in June 2006. Phase 1 construction was completed in July 2009 and Phase 2 construction was completed in November 2010.
- 1.1.4 The contract for the management of EcoPark Contract No. *EP/SP/102/17 Provision of Management Services for EcoPark 2018* was awarded to Urban Property Management Limited (UPML) by Environmental Protection Department (EPD) effective from 30th October 2018.
- 1.1.5 UPML, the "Operator" of EcoPark, has appointed Allied Environmental Consultants Ltd. (AEC) as the Environmental Team (ET) to carry out the Environmental Monitoring and Audit (EM&A) works for the operation of EcoPark as required by the EM&A Manual and in accordance with the conditions of the Environmental Permit (EP-226/2005/F). Ove Arup & Partners Hong Kong Ltd. (Arup) has been appointed by the EPD as the Independent Environmental Checker (IEC) for the Project. The ET and the IEC carry out the EM&A works for EcoPark as required by the EM&A Manual and in accordance with the conditions of the Environmental Permit (EP).

1.2 Operation Programme

- 1.2.1 In the reporting period, there were eleven tenants in EcoPark, one operator of Lot T7 and one operator of WEEE.PARK:
 - Eight active tenants (Champway, HK Biomass, HP Telford, Chung Yue, K.Wah, South China, E.Tech and On Fat Lung) who have carried out full recycling operations;
 - Waste Management Policy Group (WMG) of EPD has taken possession of Lots P2, P3, P4 and handed over to Alba Integrated Waste Solutions (Hong Kong) Ltd. (Alba IWS) to carry out operation of WEEE.PARK;
 - Food Waste Management Group (FWMG) of EPD has taken possession of Lot T7 for temporary storage of wood and machinery testing for tree waste;

- One tenant (HKBRC) completed plant construction for 1st Phase of its plant in May 2019 and underwent machinery testing on 16 Sep 2019;
- One tenant (Baguio) is carrying out hoarding works but without any site operation; and
- One tenant (3R) completed ground investigation works on 27 Sep 2019.

1.3 Project Organization and Contact Personnel

1.3.1 Key personnel and contact particulars are summarised in *Table 1.1*.

Table 1.1 EM&A Personnel Contact Details

Position	Name	Email Address	Phone No.			
Project Proponent -	Project Proponent – EPD					
Principal EPO	Mr. Gary C. W. Tam	garytam@epd.gov.hk	3690 7860

1.3.2 The organisational structure and lines of communication for the operation of EcoPark with respect to environmental management is given in *Figure 1-2* and *Figure 1-3* respectively.

Figure 1-1 Location of EcoPark in Tuen Mun Area 38

Site Boundary

Phase 1 Tenants

Phase 2 Tenants

Issue 1_____AEC

Figure 1-2 Organisation Chart of UPML

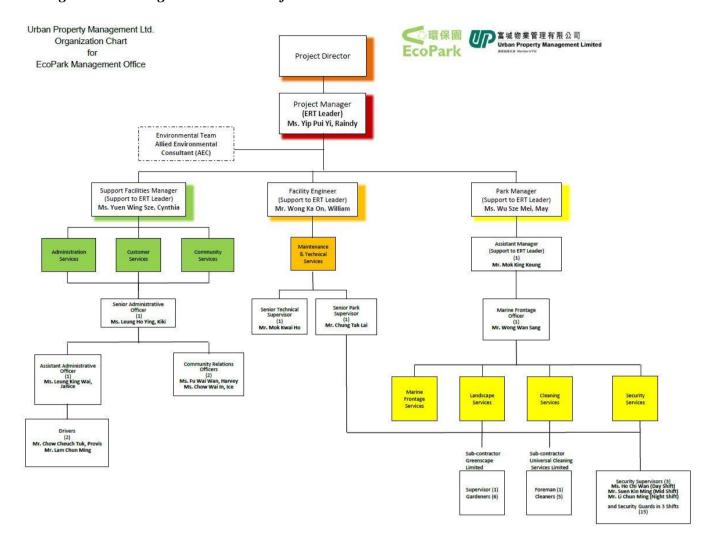

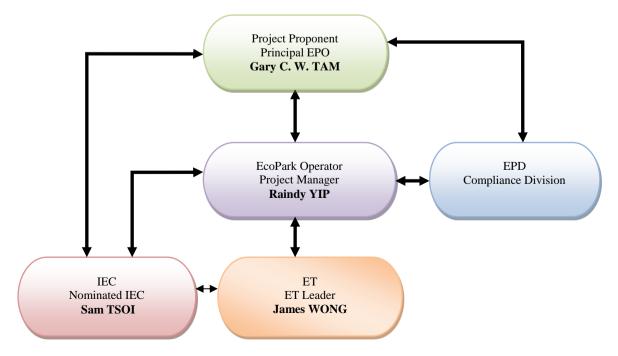

Figure 1-3 Organisation Chart of EM&A Works (Operation)

2 SUMMARY OF EM&A REQUIREMENT

2.1 Monitoring Parameters

- 2.1.1 Landfill Gas (LFG) is required to be monitored quarterly at service voids and utility boxes within EcoPark because the northern part of EcoPark lies within the 250m LFG Consultation Zone for Siu Lang Shui Landfill, which is located to the north of EcoPark.
- 2.1.2 Operational LFG monitoring has been carried out in Phase 1 after completion of construction in July 2009, commencing in the August to October 2009 quarter. In Phase 2, monitoring has been carried out after completion of construction in November 2010, commencing in the November 2010 to January 2011 quarter.
- 2.1.3 The location for LFG monitoring was not specified in the EM&A Manual since the final design of EcoPark was not available when the EM&A Manual was approved. Therefore, during a joint site inspection on 27th July 2009, three monitoring locations were identified and agreed as suitable monitoring locations by the former ET (SMEC Asia Ltd.), IEC (Atkins China Ltd.) and the Operator (Serco Guardian Joint Venture). Subsequently, two more monitoring locations in Phase 2 were proposed by the former ET and agreed by the IEC and Operator via email in January 2011. These five monitoring locations are listed in *Table 2.1* and shown in *Figure 2-1*.

Table 2.1 Operation Phase LFG Monitoring Locations in EcoPark

Monitoring Station ID	Туре	Locations
EP1-1	LFG vent pipe	Inside the landscaping area of Administration Building
EP1-2	Service void	PCCW below-ground chamber outside Lot T1
EP1-3	Service void	HGC Broadband below-ground chamber outside Lot T3
EP2-1	Service void	HGC Broadband below-ground chamber outside Lot P1
EP2-2	Service void	HGC Broadband below-ground chamber outside Lot P3

2.1.4 Routine LFG monitoring has been carried out on a quarterly basis. Should EPD alert the Operator that high LFG levels have been detected during monthly monitoring under the Siu Lang Shui Landfill restoration contract, the Operator may be required to increase LFG monitoring to monthly until such time as EPD inform the Operator that quarterly monitoring can be resumed. No detection of high LFG levels under Siu Lang Shui Landfill restoration contract was received from EPD in the reporting quarter.

2.2 Environmental Quality Performance Limits and EAP

2.2.1 The Action/Limit Levels and Event Action Plan (EAP) for LFG are shown in *Table 2.2* below. These refer to LFG detected in excavations, utilities and any enclosed on-site areas. No other A/L Levels or EAPs are specified in the EM&A Manual for the operation phase EM&A.

Table 2.2 Action Levels, Limit Levels and Event and Action Plan for LFG

Parameter	Level	Action		
	Action Level <19% O2	• Ventilate trench/void to restore O ₂ to >19%		
Oxygen (O ₂)	Limit Level <18% O ₂	 Stop works Evacuate personnel/prohibit entry Increase ventilation to restore O₂ to >19% 		
Methane	Action Level >10% LEL	 Post "No Smoking" signs Prohibit hot works Increase ventilation to restore CH₄ to <10% LI 		
(CH ₄)	Limit Level >20% LEL	 Stop works Evacuate personnel/prohibit entry Increase ventilation to restore CH₄ to <10% LEL 		
Coult ou	Action Level >0.5% CO ₂	• Ventilate to restore CO ₂ to <0.5%		
Carbon Dioxide (CO ₂)	Limit Level >1.5% CO ₂	 Stop works Evacuate personnel/prohibit entry Increase ventilation to restore CO₂ to <0.5% 		

2.3 Environmental Audit of Non-Monitored Parameters

- 2.3.1 Site inspections provide a direct means to trigger and enforce the environmental protection and pollution control measures specified in the Environmental Impact Assessment (EIA) Report. To examine operational practice, site inspections are to be undertaken by the ET once per month. The monthly inspection shall join with the random site inspection by the IEC where possible. A joint inspection by ET and IEC will be carried out at least once per quarter. Ad hoc site inspections are also carried out if significant environmental problems are identified. In addition, inspections may be required subsequent to receipt of environmental complaint, or as part of the investigation work, as specified in the EAP.
- 2.3.2 The following parameters are required to be audited as part of the operation phase EM&A program:
 - Air Quality
 - Water Quality
 - Waste Management
 - Land Contamination

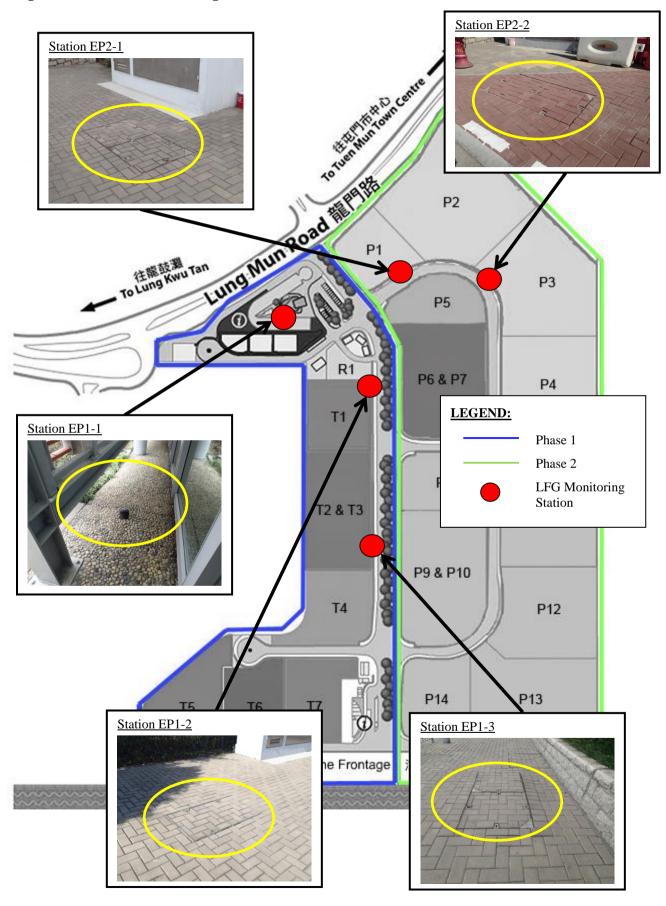

2.4 Environmental Mitigation Measures

2.4.1 Environmental mitigation measures applicable to the operation phase EM&A as stated in the Implementation Schedule are summarised in *Appendix 1*.

2.5 Environmental Requirements in Tenancy Agreements

2.5.1 Environmental requirements specified in tenancy agreements are provided in *Appendix 2*.

Figure 2-1 LFG Monitoring Locations within EcoPark

Issue 1_____AEC

3 OPERATION STATUS

3.1 General

- 3.1.1 The location of lots within EcoPark, the current usage and tenant names are shown in *Figure* 3-1. A summary of waste throughputs is provided in *Section 3.11*. Brief descriptions of the active tenants and operators are provided from *Sections 3.2* to 3.10.
- 3.1.2 In the reporting quarter:
 - Baguio carries out hoarding works;
 - HKBRC completed plant construction for 1st Phase of its plant in May 2019 and underwent machinery testing on 16 Sep 2019; and
 - 3R completed ground investigation works on 27 Sep 2019.

3.2 Champway Technology Limited

- **Lot No.:** T5 (Phase 1)
- Lot Size: Approx. 6,000m²
- Activity: Recycling of Organic Waste (Waste Cooking Oil)
- **Recycling Process:** Turn waste cooking oil into biodiesel by extraction, neutralisation, separation and distillation.
- 3.2.1 In this reporting quarter, waste cooking oil was recycled. Bi-monthly sampling for effluent arising from producing biodiesel has been conducted to comply with the requirement of effluent discharge licence.

3.3 Hong Kong Biomass (Wood) Collect and Recycle Company Limited

- **Lot No.:** T4 (Phase 1)
- Lot Size: Approx. 5,000m²
- Activity: Recycling of Waste Woods
- **Recycling Process:** Recycle waste woods to wood fuel pellets. Ferrous metals will be separated by magnets.
- 3.3.1 In this reporting quarter, waste wood was recycled.

3.4 HP Telford Envirotech Group Limited

- **Lot No.:** T1 (Phase 1)
- Lot Size: Approx. 5,000m²
- Activity: Recycling of Waste Plastics
- Recycling Process: Sorting, shredding and baling of waste plastic

3.4.1 In this reporting quarter, waste plastics were recycled.

3.5 Chung Yue Steel Group Company Limited

- **Lot No.:** P13 (Phase 2)
- **Lot Size:** Approx. 100,000 m²
- Activity: Recycling of Waste Metals
- **Recycling Process:** Turn waste metals into non-ferrous scrap, light ferrous scrap and heavy ferrous scrap by sorting, baling and shearing.
- 3.5.1 In this reporting quarter, waste metals were recycled.

3.6 K. Wah Construction Products Ltd.

- **Lot No.:** P11 (Phase 2)
- **Lot Size:** Approx. 10,000 m²
- Activity: Recycling of Waste Construction Materials/Waste Glass
- Recycling Process: Waste construction materials and waste glass will be crushed and
 delivered to the concrete mixing plant for blending and poured into block machine for
 casting. The blocks will then be cured, washed and packaged.
- 3.6.1 In this reporting quarter, waste construction materials and waste glasses were recycled.

3.7 South China Reborn Resources (Zhongshan) Company Ltd.

- **Lot No.:** P12 (Phase 2)
- **Lot Size:** Approx. 9,000 m²
- Activity: Recycling of Organic Waste (Food Waste)
- **Recycling Process:** Food waste will be segregated. The recyclable portion will undergo deodorisation, dewatering, shredding, fermentation and drying to produce high protein animal feed for livestock farming and aquaculture.
- 3.7.1 In this reporting quarter, food waste was recycled. Also, the tenant adopted "tankered away" approach for handling of industrial effluent arising from the recycling of food waste instead of discharging into foul sewer.

3.8 WEEE.PARK

- **Lot No.:** P2, P3, P4 (Phase 2)
- **Lot Size:** Approx. 30,000 m²
- **Activity:** Recycling of WEEE
- Recycling Process: Four major types of WEEE (i.e. refrigerator and freezers, air conditioners, e-scrap, TV and computer screens) will be recycled. The recycling

processes include separation of insulation/backlighting/plastics/various metals, recovery of screen/monitor stand/refrigerant/oil/hazardous materials, and shredding of casing.

3.8.1 In this reporting quarter, WEEE was recycled.

3.9 On Fat Lung Innovative Resources Ltd.

- **Lot No.:** P8 (Phase 2)
- Lot Size: Approx. 4,400 m²
- Activity: Recycling of Waste Rubber Tyres and WEEE
- Recycling Process: Waste rubber tyres will be shredded into rubber powder and processed to form rubber bricks. WEEE will be dismantled/shredded and recovered for reusable components.
- 3.9.1 In this reporting quarter, waste rubber tyres were recycled.

3.10 Food Waste Management Group (FWMG) of EPD

- **Lot No.:** T7 (Phase 1)
- Lot Size: Approx. 4,000m²
- Activity: Temporary storage of waste wood and waste tree handling
- **Recycling Process:** Bulk reduction of waste tree by mechanical shearing and chipping.
- 3.10.1 In this reporting quarter, waste wood was temporarily stored at Lot T7. Machinery testing for tree waste was conducted.

3.11 Throughput Statistics

- 3.11.1 For the active recyclers, most of the incoming waste materials and outgoing products were delivered by land transportation, except for the metals from Chung Yue were delivered by both marine and land transportation.
- 3.11.2 The throughputs of WEEE.PARK and the eight active tenants are summarised in *Table 3.1* below. Please note that product output plus waste disposal does not necessarily equal the waste input, due to material losses during processing and material retained within the lot.

Table 3.1 Throughput Statistics for the Reporting Quarter

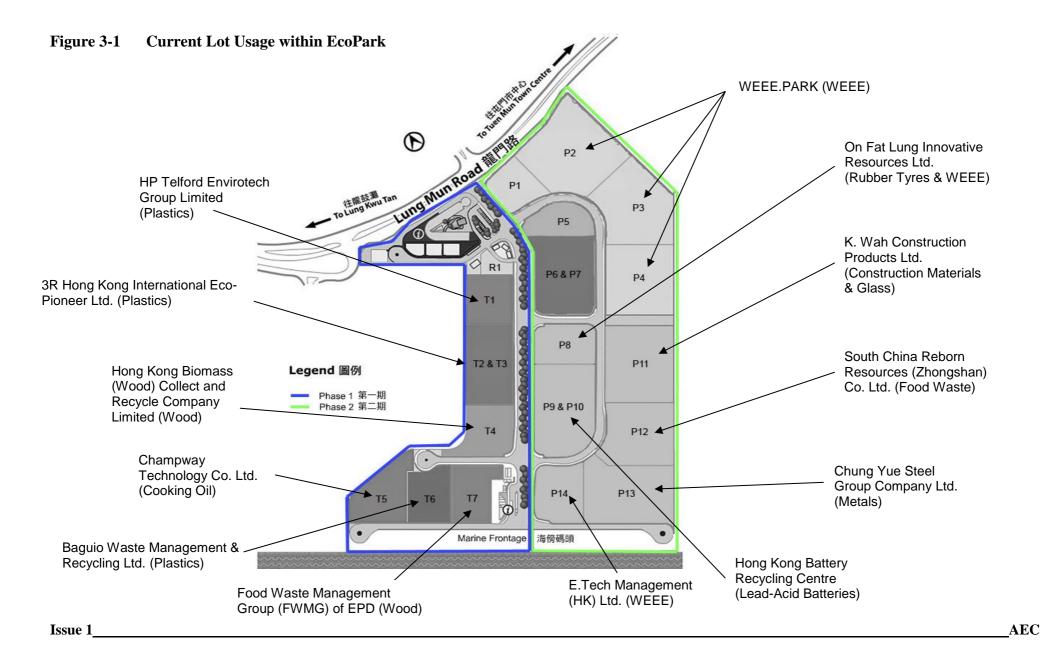

Material Type	Waste Input (tonne)	Product Output (4) (tonne)	Waste Disposed (4) (tonne)
Waste Organic Food	762	649	72
Waste Ferrous Metals	24,009	24,495	142
Waste Wood	182	143	-
Waste Electronics	4,601	4,154	574
Waste Plastics	654	688	-
Construction Waste	327	13,592	303
Waste Glass	506	13,392	303
Waste Rubber Tyres	n/a	n/a	n/a

Notes:

- 1) The throughput data presented above is the best available data and has been rounded off to the nearest whole tonne for presentation.
- 2) The total product output may not be the same as the waste input due to processing of materials that were received before the reporting quarter and were stored within the lots.
- 3) Waste disposal refers to the disposal of general refuse (i.e. packaging) and/or chemical waste.
- 4) Since the recycling of waste glass and construction waste is combined to produce concrete block at K.Wah, the product output and waste disposal from both processes are combined.
- 5) "-" in the column of waste disposal denotes zero quantity; while "n/a" denotes unavailable information.
- 3.11.3 Detailed throughput figures of the reporting quarter are provided in *Appendix 3.1*. Updated throughput figures of the previous months are provided in *Appendix 3.2*.

3.12 Process Review

- 3.12.1 Process Review, and maybe Design Audit (DA) where required, had been conducted for each recycling process to be operated within EcoPark to confirm its compliance with the findings and recommendations of the EIA report and the conditions of the EP.
- 3.12.2 Since 2008, twenty four process reviews and three DAs had been approved. Among those, sixteen process reviews and three DAs are related to the current recycling processes in EcoPark as of September 2019. In the reporting period, neither process review nor DA were approved in the reporting period. Full set of the completed PRCs and DAs are submitted separately to relevant authorities in EPD.

4 IMPLEMENTATION STATUS OF ENVIRONMENTAL PROTECTION MEASURES

- 4.1.1 Environmental mitigation measures applicable to the operation phase EM&A as stated in the implementation schedule are summarised in *Appendix 1*. Environmental requirements specified in tenancy agreements are summarised in *Appendix 2*.
- 4.1.2 By the end of September 2019, WEEE.PARK and eight tenants (Champway, HK Biomass, HP Telford, K. Wah, E.Tech, Chung Yue, South China and On Fat Lung) were under full operation.
- 4.1.3 Appropriate environmental protection measures are in place at all lots.

5 MONITORING RESULTS

5.1 Monitoring Date, Time, Frequency and Duration

5.1.1 As described in *Section 2.1*, operational LFG monitoring is conducted quarterly at five monitoring locations, three in Phase 1 and two in Phase 2. In this reporting quarter, monitoring was undertaken on 18th September 2019. Monitoring details are shown *Table 5.1* below.

Table 5.1 Sampling Schedule for the Quarterly LFG Monitoring

Station ID	Sampling Date	Time	Duration	Ambient Air Temp.	Weather
EP1-1		09:25 - 09:27	2 minutes	29°C	Fine
EP1-2		09:45 - 09:47	2 minutes	29°C	Fine

5.2 Monitoring Methodology, Parameters and Equipment

5.2.1 The LFG monitoring requirement and methodology are stipulated in *Section 6* of the EM&A Manual. The LFG monitoring parameters and their measurement ranges are detailed in *Table 5.2* below.

Table 5.2 Parameters and Measurement Ranges for LFG Monitoring

Parameters	Measurement Ranges
Methane (CH ₄)	0 – 100% LEL & 0-100% v/v
Oxygen (O ₂)	0 - 25% v/v
Carbon Dioxide (CO ₂)	0 – 100% v/v
Barometric Pressure	mBar (absolute)

- 5.2.2 LFG monitoring shall be carried out using intrinsically-safe, portable multi-gas monitoring instruments. The gas monitoring equipment shall:
 - 1. Where possible, comply with BS 6020 and be approved by BASEEFA as intrinsically safe, suitable for use in a Zone 2 are to BS 5345;
 - 2. Be capable of continuous monitoring of methane, oxygen and carbon dioxide;
 - 3. Be capable of continuous barometric pressure and gas pressure measurements;
 - 4. Normally operate in diffusion mode unless required for spot sampling, when it should be capable of operating by means of an aspirator or pump;

- 5. Have low battery, fault and over range indication incorporated;
- 6. Store monitoring data, and shall be capable of being down-loaded directly to a PC; and

7. Measure in the following ranges:

- Methane 0 - 100% LEL & 0 - 100% v/v

- Oxygen 0-25% v/v- Carbon dioxide 0-100% v/v

- Barometric pressure mBar (absolute)

5.3 Results and Graphical Plots of Monitoring Parameters

- 5.3.1 One InfraRed Gas Analyser Model GA5000 (serial number G501982) was used for LFG measurements. The gas analyser is calibrated every 6 months. *Appendix 4* presents the calibration records of the monitoring equipment.
- 5.3.2 LFG monitoring results are summarised in *Table 5.3* and compared with the Action and Limit Levels tabulated in *Table 2.2*. Graphical plots of the monitoring results are also provided in *Appendix 5*.

Table 5.3 Quarterly LFG Monitoring Results in the Reporting Quarter

		Monitoring Results				
Station ID	Sampling Date	Methane (% v/v)	Methane (% LEL)	Oxygen (% v/v)	Carbon Dioxide (% v/v)	Barometric Pressure (mBar)
EP1-1		0.1	2	20.5	< 0.1	1015
EP1-2	18^{th}	0.0	0	19.9	< 0.1	1015
EP1-3	September	0.0	0	19.9	< 0.1	1015
EP2-1	2019	0.1	2	20.0	0.3	1015
EP2-2		0.0	0	20.0	< 0.1	1015

5.3.3 No exceedance of Action and Limit Levels was recorded in the reporting quarter.

6 SUMMARY OF ENVIRONMENTAL AUDIT

6.1 General

- 6.1.1 In the reporting quarter, WEEE.PARK and eight active tenants were under full operation.
- 6.1.2 Environmental audits based on the approved site inspection checklist were carried out by the Operator and the ET on 24th July, 20th August and 18th September 2019. IEC random site audits were also carried out on 24th July and 18th September 2019. A quarterly joint site inspection was carried out by the Operator, the IEC and the ET on 20th August 2019. The completed audit checklists for tenants are provided in *Appendix* 6.

6.2 Champway Technology Limited

6.2.1 Audit observations from previous reporting quarters and this reporting quarter are summarised in *Table 6.1* below. The completed checklists for Champway are given in *Appendix 6.1*.

Table 6.1 Environmental Audit Findings for Champway

Date	Item	Comment	Status				
Observations I	Observations From Previous Reporting Quarters						
19 Mar 2019	No labelling is provided to the chemical waste and chemical waste storage area, which should also be provided with adequate ventilation.	The tenant should review relevant requirements stipulated in the Code of Practice on the Packaging, Labelling and Storage of Chemical Wastes and provide proper labelling to the chemical waste and chemical waste storage area with adequate ventilation.	As observed on 18 Sep 2019 in the relocated chemical waste storage area at the northern part of the lot, one of the chemical waste containers was without proper label. Also, the chemical waste storage area was observed without a proper signage for "CHEMICAL WASTE" in both English and Chinese. The tenant was requested to provide proper label displaying on each chemical waste container and must comply with the Code of Practice on the Packaging, Labelling and Storage of Chemical Wastes in particular section 5.2 for the size of signage. The condition will be followed up in the next audit in Oct 2019.				
Observations I	From This Repor	rting Quarter					
24 Jul 2019	No chemical waste label is provided on one of the chemical waste containers which stored at the	The tenant was reminded to provide proper chemical waste labels to all chemical waste containers.	As observed on 18 Sep 2019 in the relocated chemical waste storage area at the northern part of the lot, one of the chemical waste containers was without proper label. Also, the chemical waste storage area was observed without a proper signage for "CHEMICAL WASTE" in both English and Chinese. The

7 ENVIRONMENTAL COMPLAINTS, NOTIFICATION OF SUMMONS AND SUCCESSFUL PROSECUTION

7.1 Follow-up on Previous Environmental Complaint

Wastewater Treatment at South China received on 26th October 2016

- 7.1.1 Flow meters were installed at various points of the wastewater treatment system, e.g. incoming pipe for the storage tank at 3/F, the outgoing pipe of the treatment tank for recycling, the wastewater collection pipes for washing area at G/F, etc. The flow data was recorded to monitor the quantity of wastewater generated from different areas. During this reporting quarter, no discharge of wastewater was recorded based on the flow data record inspected. Prior to the proper functioning of the wastewater treatment plant (WTP), the wastewater was collected and transported to designated treatment facility by a licenced collector as a temporary measure.
- 7.1.2 Upgrade of the WTP is proposed by the tenant to introduce additional treatment process. The proposal is being updated by the tenant and would be submitted for further review.
- 7.1.3 The case will be followed up in the next reporting period to ensure the wastewater treatment system will function properly for handling of the wastewater. The tenant was reminded that no wastewater shall be discharged until the testing of treatment system is completed with the discharge quality in full compliance with the discharge licence.

7.2 New Environmental Complaint, Notification of Summon and Successful Prosecution in the Reporting Period

7.2.1 By the end of September 2019, no complaint or notification of summon or successful prosecution related to recycling activities was received in this reporting quarter.

8 CONCLUSIONS

- 8.1.1 This is the fifty (50th) quarterly EM&A report prepared for the operation phase of EcoPark and covers the reporting quarter from July to September 2019. The recycling activities are audited on a monthly basis and the results are summarised in this report. In the reporting quarter, there were eleven tenants in EcoPark Phase 1 and Phase 2, one operator (FWMG of EPD) of Lot T7 in EcoPark Phase 1 and one operator (Alba IWS) in EcoPark Phase 2.
- 8.1.2 The ET has conducted monthly site inspections while the IEC has carried out full site inspection on quarterly basis and random site audits on monthly basis, and some general observations have been made. The approved checklist has been used in the monthly site inspections for various tenants.
- 8.1.3 The throughputs of WEEE.PARK and the eight active tenants in the reporting quarter are summarised in *Table 8.1*. Please note that product output plus waste disposal do not necessarily equal the waste input, due to material losses during processing and material retained within the lots.

Table 8.1 Throughput Statistics for the Reporting Quarter

Material Type	Waste Input (tonne)	Product Output (4) (tonne)	Waste Disposed (4) (tonne)	
Waste Organic Food	762	649	72	
Waste Ferrous Metals	24,009	24,495	142	
Waste Wood	182	143	-	
Waste Electronics	4,601	4,154	574	
Waste Plastics	654	688	-	
Construction Waste	327	12 502	303	
Waste Glass	506	13,592		
Waste Rubber Tyres	n/a	n/a	n/a	

Notes:

- The throughput data presented above is the best available data and has been rounded off to the nearest whole tonne for presentation.
- 2) The total product output may not be the same as the waste input due to processing of materials that were received before the reporting quarter and were stored within the lots.
- 3) Waste disposal refers to the disposal of general refuse (i.e. packaging) and/or chemical waste.
- 4) Since the recycling of waste glass and construction waste is combined to produce concrete block at K.Wah, the product output and waste disposal from both processes are combined.
- 5) "-" in the column of waste disposal denotes zero quantity; while "n/a" denotes unavailable information.
- 8.1.4 LFG monitoring during the reporting quarter was undertaken on 18th September 2019 at five locations (three in Phase 1 and two in Phase 2). No exceedance of Action or Limit Level was recorded in the reporting quarter.

- 8.1.5 Numbers of complaints, summons and successful prosecutions in the reporting quarter are summarised below:
 - Complaints: Zero.
 - Summons: Zero.
 - Successful Prosecutions: Zero.
- 8.1.6 In the next reporting quarter, LFG monitoring in operation phase for Phase 1 and Phase 2 will be continued.

Appendix 1

Environmental Mitigation Measures (from the Implementation Schedule)

Issue 1______AEC

EIA Ref.	EM&A Ref.	Environmental Protection Measures Identified in the Implementation Schedule that are Applicable to the Operation Phase of EcoPark	Location / Duration of Measures / Timing of Completion of Measures	Implementation Agent	Relevant Legislation and Guidelines
General				_	
5.5.23 to 5.5.25, 10.2.24 & 10.2.37	4.2.5 to 4.2.8	The Operator shall develop and implement an Emergency Response Plan (ERP) that lists the procedures to be followed in case of fire, fuel or chemical spillage or other emergency within the EcoPark.	Throughout the duration of the operation.	Operator	
12.2	7.2	No process shall be allowed to operate within EcoPark without approval from WFBU. Approval will be based on the ten-step Process Review, which may include a Design Audit if deemed to be necessary.	Throughout the duration of the operation.	ET IEC Project Proponent	
	8.1.2	All reports (including Process Review Checklists and any Design Audits) shall be prepared and certified by the ET, verified by the IEC and approved by the Project Proponent.	Throughout the duration of construction works until construction is substantially completed. Throughout the duration of the operation.	ET IEC Project Proponent	
12.3	7.3	The Operator shall prepare and implement an Environmental Management Plan (EMP) to define mechanisms for achieving the environmental requirements specified in the EIA, EP and in statutory regulations.	Throughout the duration of the operation.	Operator	
Air Quality	,				
13.2		The Operator shall ensure that EcoPark "base case" assumptions for air quality shown in Table 13.1 of the Final EIA Report are met by tenants, as a whole.	Throughout the duration of the operation.	Operator	Table 13.1 of the Final EIA Report
Water Qua	lity				
5.4.11 & 5.6.7		To minimise the chance of accidental spillage during loading and unloading, and thereby reduce marine water quality impacts, well established cargo handling guidelines should be followed.	Adjacent to EcoPark marine frontage when loading or unloading goods.	Operator Operators of bulk carriers	Sections 5 & 6 of IMO Code of Practice for the Safe Loading/ Unloading of Bulk Carriers

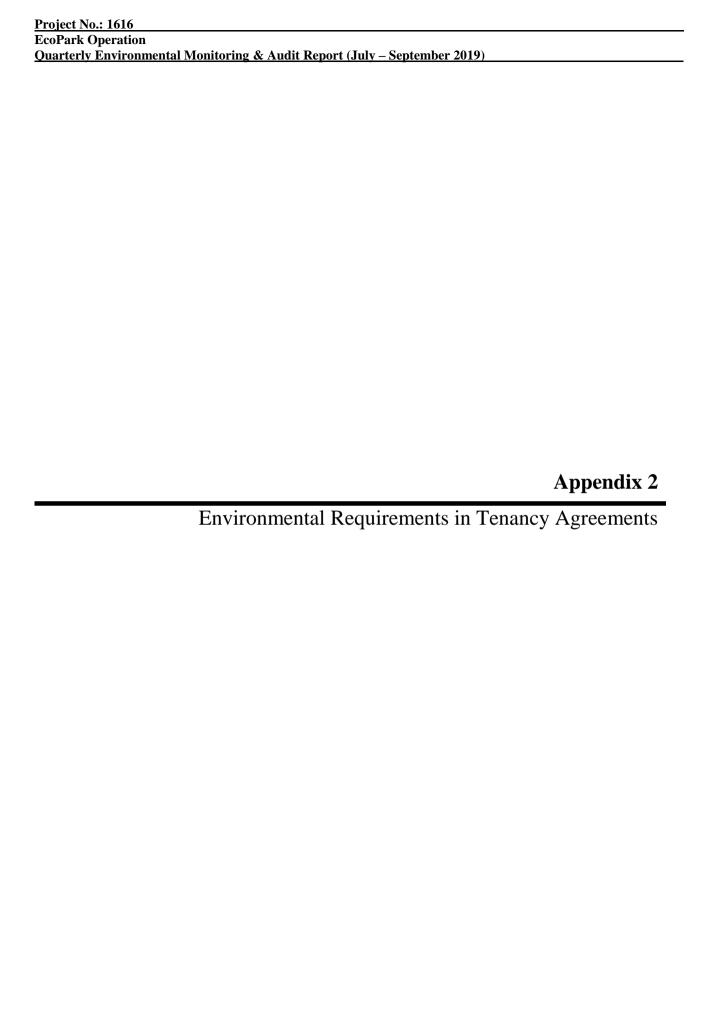

EIA Ref.	EM&A Ref.	Environmental Protection Measures Identified in the Implementation Schedule that are Applicable to the Operation Phase of EcoPark	Location / Duration of Measures / Timing of Completion of Measures	Implementation Agent	Relevant Legislation and Guidelines
5.5.19		Contaminated water collected in the surface drainage systems shall be treated at the WTF or other appropriate treatment facility.	Within EcoPark throughout the life of the facility.	Operator	
5.5.23 to 5.5.25	4.2.5 to 4.2.7	An Emergency Response Plan (ERP) will be formulated to address various accident scenarios. The ERP will be certified by the Environmental Team (ET) and verified by the Independent Environmental Checker (IEC) under the operation EM&A programme.	Within EcoPark throughout the life of the facility.	Operator	
5.6.4		For uncovered areas where recovery process identified as causing potentially high level of contamination are located, stoplogs will be installed in the perimeter drainage system to isolate contamination.	Within EcoPark throughout the life of the facility.	Operator	
	4.2.2	The ET should develop an audit checklist, with the agreement of the IEC, to ensure that each mitigation measure is implemented when appropriate and operated correctly when implemented.	Within EcoPark throughout the life of the facility.	ET with IEC	
Waste Man	agement				
6.8.7	5.2.4	The Operator should register with EPD as a chemical waste producer.	Within EcoPark throughout the life of the facility.	Operator	Waste Disposal (Chemical Waste) (General) Regulation
6.8.16		The dust collected by any air pollution control equipment installed by tenants must be tested to ensure compliance for landfill disposal.	Within EcoPark throughout the life of the facility.	Operator	Practice Note for disposal of dusty waste at landfills & Admission Ticket System
6.8.18 & 6.8.22	5.2.4	Sludge will be disposed of at WENT landfill, or at any future dedicated sludge treatment facility. Sludge will be collected by a Licensed collector at regular intervals, as determined by the	Within EcoPark throughout the life of the facility.	Operator	

AEC Issue 1

EIA Ref.	EM&A Ref.	Environmental Protection Measures Identified in the Implementation Schedule that are Applicable to the Operation Phase of EcoPark operation of the WTF.	Location / Duration of Measures / Timing of Completion of Measures	Implementation Agent	Relevant Legislation and Guidelines
6.8.21	5.2.4	Chemical wastes shall be stored in appropriate containers in a covered area. "No Smoking" signs will be clearly displayed to prevent accidental ignition of flammable materials. Drip trays capable of storing 110% of the volume of the largest container will be used to mitigate possible leakage.	Within EcoPark throughout the life of the facility.	Operator	Code of Practice on the Packaging, Labelling and Storage of Chemical Wastes
	5.2.3 & 5.2.5	The ET should develop an audit checklist, with the agreement of the IEC, to ensure that each mitigation measure is implemented when appropriate and operated correctly when implemented.	Within EcoPark throughout the life of the facility.	ET with IEC	
6.8.7	5.2.4	The Operator should register with EPD as a chemical waste producer.	Within EcoPark throughout the life of the facility.	Operator	Waste Disposal (Chemical Waste) (General) Regulation
Prevention	of Contam	ninated Land	I	l	I
7.3.1	5.3.2	Any spillages of contaminating material shall be cleaned up immediately through the use of an absorbent. Any such used material should then be considered chemical waste and disposed of appropriately.	Within EcoPark throughout the life of the facility.	Operator	
7.3.3		Any areas within the lot to be used for recycling processes shall be concrete paved before recycling activities commence.	Within EcoPark throughout the life of the facility.	Operator	
7.3.5	5.3.2	During operation, the greatest risk of land contamination will come from storage of chemical wastes, therefore the measures should be followed:	Within EcoPark throughout the life of the facility.	Operator	
		All chemical storage areas shall be provided with locks and be sited on sealed areas. The storage areas shall be surrounded by bunds with a capacity equal to 110% of the storage capacity of the largest tank to prevent spilled oil and chemicals from contaminating the ground.			

Issue 1_

EIA Ref.	EM&A Ref.	Environmental Protection Measures Identified in the Implementation Schedule that are Applicable to the Operation Phase of EcoPark	Location / Duration of Measures / Timing of Completion of Measures	Implementation Agent	Relevant Legislation and Guidelines
		Chemical wastes will be collected, stored and disposed of in accordance with the Regulation. Disposal of other construction waste will be undertaken by licensed contractors in accordance with applicable statutory requirements in the WDO.			
		 Chemical wastes shall be handled according to the relevant code of practice. Spent chemicals shall be stored and collected by an approved operator for disposal at a licensed facility in accordance with the relevant regulation. 			
Landfill Ga	ıs				
8.7.10 & 8.7.11	6.1.2	 Alert workers and visitors of possible LFG hazards Prohibit smoking and open fires on site Conduct regular (quarterly) LFG monitoring at mobile offices, equipment stores, etc. 	Within EcoPark throughout the life of the facility.	Operator	
	6.4.3	Following construction, routine monthly monitoring may be required at service voids and utility boxes. The monitoring requirement and specific locations of monitoring points shall be established based on the findings of the monitoring carried out during construction (i.e. if no LFG is detected during construction then no routine monitoring is required). The need for continued monitoring shall, however, be reviewed through discussion with EPD.	Within EcoPark throughout the life of the facility.	Operator	
Hazard to I	Life				T
10.4.3		Building height limit within EcoPark shall be applied to structures within which people may work at elevated levels.	Within EcoPark throughout the life of the facility.	Operator	EIA Report Table 10.2
Landscape	and Visua				
9.4.4		It recommended that this commonality be promoted throughout EcoPark by the Operator and adopted by tenants, if practicable.	Within EcoPark throughout the life of the facility.	Operator	

Compliance of Environmental Legislation

5. The Tenant shall comply with and observe all Ordinances, by-laws, regulations and rules for the time being in force in Hong Kong governing the control of any form of pollution, including air, noise, water and waste pollution, and for the protection of the environment.

Air Pollution

6. Save with an appropriate exemption under the Air Pollution Control Ordinance (Cap. 311) any regulations made thereunder and any amending legislation, the Tenant shall not install or permit or suffer to be installed upon the Premises or any part thereof or any building(s) or structure(s) or part of any building(s) or structure(s) erected or to be erected thereon any furnace, oven, chimney or flue or any other combustion equipment or use or permit or suffer to be used any fuel or any method or process of manufacture or treatment that might in any circumstance result in, cause or contribute to the discharge or emission of any pollutant or any noxious, harmful or corrosive matter, whether it be in the form of gas, smoke, liquid, solid or otherwise (including but not limited to air pollutant as defined in Section 2 of the Air Pollution Control Ordinance

(Cap. 311), which exists or which is imminent, without the prior written approval of the Director.

Water Pollution

- 7. (a) In the event that the Tenant produces, generates, permits, causes, allows or suffers any discharge which is subject to control under the Water Pollution Control Ordinance (Cap. 358) any regulations made thereunder and any amending legislation, the Tenant shall apply to the Director for a licence and comply with the terms and conditions stipulated in the licence at the Tenant's own cost(s). Otherwise, the Tenant is not allowed to discharge directly or indirectly or to produce, generate, permit, cause, allow or suffer any discharge into any public sewer, storm-water drain, channel, stream-course, sea or any area inside or outside the Premises any trade effluent or foul or contaminated water or cooling or hot water. Subject to the said licence from the Director, the Tenant shall at its own cost(s) separate, collect, and discharge all process or industrial wastewater which comply with the standard required for discharge into a sewer leading to the sewage treatment works at Pillar Point or other treatment works specified in the licence.
 - (b) Subject to obtaining advance written approval of the Director, the Tenant shall at its own cost(s) provide, install, operate and maintain its own waste water pretreatment plants within the Premises if such process or industrial wastewater could not meet the standard required for discharge into a sewer leading to the sewage treatment works at Pillar Point or other treatment works specified in the licence. The Tenant shall at its own cost(s) separate, collect, discharge and send all domestic wastewater (i.e. other than process or industrial wastewater) to the Pillar Point Sewage Treatment Works directly for treatment or other treatment works specified in the licence.
 - (c) In any event, the Tenant shall prevent any spilled materials from entering the surface water drainage system and prevent contamination of the sea at its own cost(s) by, inter alia, providing, installing, operating and maintaining stop-logs or interceptors in the surface water drainage system and at the marine frontage area, respectively, or as required by the licence. The Tenant shall at its own cost comply with relevant provisions of the Dumping at Sea Ordinance (Cap. 466) good practices and relevant provisions of the EIA Report and Final EM&A Manual.

Waste Management

- 8. (a) The Tenant shall at its own cost(s) comply with relevant provisions of the Waste Disposal Ordinance (Cap. 354).
 - (b) The Tenant shall not permit, allow or suffer any fuel or chemical and any sewage, waste water or effluent containing sand, cement, silt or any suspended or dissolved material to flow, escape or run from the Premises onto any adjoining land or allow any waste matter which does not form part of the recovery and/or recycling and/or reprocessing operation or is not part of the final product of such operation to be deposited, kept, held or stored anywhere within the Premises and other areas of EcoPark. The Tenant shall at its own cost(s) have all such matters and all materials arising from recycling activities, chemical materials arising from maintenance of plant and equipment, sewage sludge (from wastewater treatment facilities, if any) and general daily waste from the operation removed from the Premises or any building(s) or structure(s) or any part of any building(s) or structure(s) erected or to be erected thereon in a proper manner to the satisfaction of the Landlord and/or the Director.

Noise Pollution

- 9. (a) The Tenant shall take all necessary measures as may be required by and to the satisfaction of the Landlord and/or the Director to ensure that the operation of all plant and equipment, installed or used on the Premises or in any building(s) or structure(s) or any part of any building(s) or structure(s) erected or to be erected thereon, will not result, not cause and/or will not contribute any noise (which exists or which is imminent) which disturbs or annoys the residents or occupiers of any adjoining or neighbouring lot or lots or premises, or causes and/or contributes to disturbance to the general public under the Noise Control Ordinance (Cap. 400) any regulations made thereunder and any amending legislation.
 - (b) The decision of the Landlord or the Director as to whether any such plant and equipment are causing disturbance or annoyance as aforesaid shall be final and binding on the Tenant.

Landfill Gas Hazard

10. To mitigate landfill gas hazard, the Tenant shall at its own cost(s) comply with, inter alia, Condition 4.13 of the Environmental Permit No. EP-226/2005/A regarding raising clear of the ground all buildings and enclosed structures as specified in inter alia

Condition 3.7 (and comply with the conditions of any updated Permit, amended permit and further permit regarding measures to mitigate hazard to life impact).

EcoPark Being Within the 250m Consultation Zone of Siu Lang Shui Landfill

- 11. (a) The Tenant acknowledges that the EcoPark is within the 250m Consultation Zone of the Siu Lang Shui Landfill and that the Premises may be affected by problems associated with migrating landfill gas and undertakes to provide suitable precautionary or protection measures at his own expense to control these potential hazards.
 - (b) The Tenant shall ensure all personnel entering the Premises and all visitors to the Premises are aware of the potential hazards of the landfill gas by posting suitable warning notices of the potential hazards at his own expense.
 - (c) All buildings and enclosed structures, including temporary offices, temporary stores and the administration building, within the 250m Consultation Zone of the Siu Lang Shui Landfill shall be provided with the following measure(s):
 - (i) buildings shall be raised clear of the ground with a clear separation distance (as measured from the highest point on the ground surface to the underside of the lowest floor joist) of at least 500mm; or
 - (ii) a low-gas permeability membrane shall be applied to the surface of any wall or floor slab that rests on or is below ground. A gravel-fill vent system shall be provided such that passive venting is achieved around the perimeter of the structure. In addition, other building materials, such as dense well-compacted concrete or steel shuttering which provide a measure of resistance to gas permeation, shall be used to achieve gas protection.
 - (d) The Tenant shall ensure that the electrical equipment used on the Premises shall be intrinsically safe. Welding, flame-cutting or other hot works shall be confined to the open areas of the Premises and shall be at least 15m away from any ground-level confined space.
 - (e) No drilling, trenching and excavation shall be allowed on the Premises. During any construction work, the Tenant shall observe the guidelines recommended in Chapter 8 of the "Landfill Gas Hazard Assessment Guidance Note" published by the Department of Environmental Protection. In particular, no smoking, naked

flames and all other sources of ignition shall be allowed within 15m of any ground-level confined space.

Hazard to Life Impact

- 12. To mitigate hazard to life impact, the Tenant shall comply with, inter alia, Conditions 4.8 to 4.10 of the Environmental Permit No. EP-226/2005/A (and comply with the conditions of any updated Permit, amended permit and further permit regarding measures to mitigate hazard to life impact) and shall not:-
 - (a) bring, keep, store or transport chlorine within the Premises and other areas of EcoPark;
 - (b) bring, keep, store, locate or transport dangerous goods, substances and fuels supporting combustion including oxygen, acetylene, hydrogen peroxide, rubber tyres and diesel within 10 metres from the boundary of the site of EcoPark; and
 - (c) exceed the building height restrictions for buildings on the Premises which are on/near the western boundary of the site of EcoPark as mentioned in Annex B to the Environmental Permit No. EP-226/2005/A (including any updated Permit, amended permit and further permit).

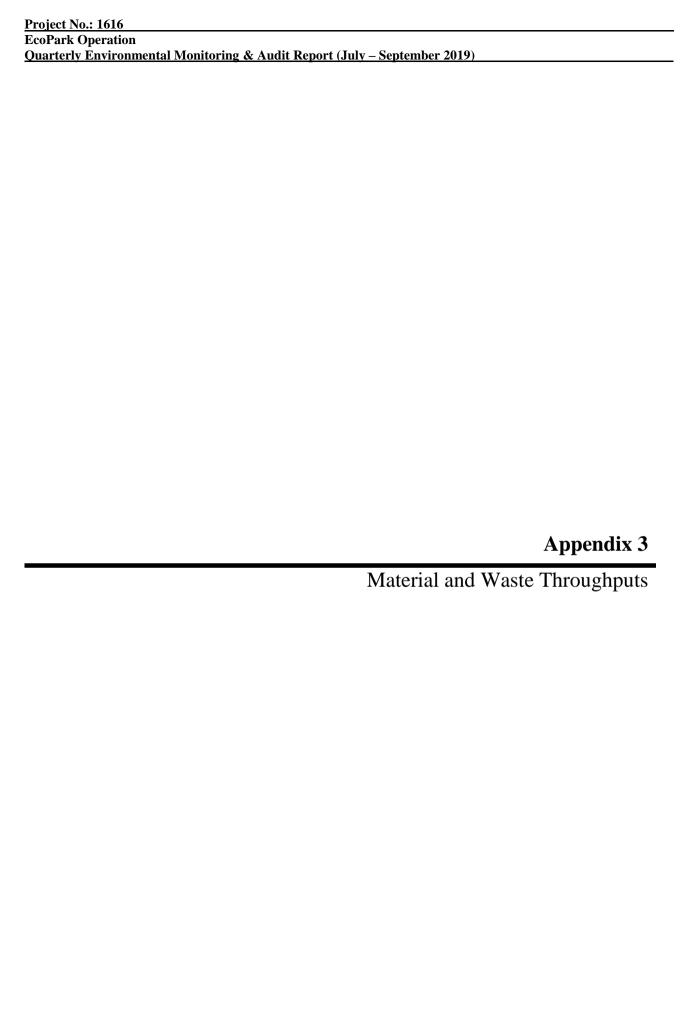

Landscape and Visual Impacts

13. To mitigate landscape and visual impacts, the Tenant shall at its own cost(s) comply with, inter alia, Condition 4.14 of the Environmental Permit No. EP-226/2005/A regarding maintaining landscape, planting, treatment and mitigation measures as specified in inter alia Condition 3.8 and Figure 3 (and comply with the conditions of any updated Permit, amended permit and further permit regarding measures to mitigate landscape and visual impacts).

Environmental Permits Relating to EcoPark

14. The Tenant hereby declares, confirms and acknowledges that it is fully aware that, pursuant to the Environmental Impact Assessment Ordinance (Cap.499), the Director has the right to grant, amend or revoke environmental permit(s) or to grant further or amended environmental permit(s) relating to the lots comprising the EcoPark and any other lots but that such right may be challenged by third parties on justifiable grounds. The Tenant hereby undertakes to waive all its rights and remedies for any loss, damages, cost and expenses whatsoever which it may sustain and/or incur directly or

indirectly as a result of the grant, amendment or revocation of the environmental permit(s) or the consequential grant of further or amended environmental permit(s), including but not limited to any right to terminate this Lease and/or to make any claim against the Landlord and/or the Director for any compensation whatsoever.

August 2019	n/a	n/a	n/a
September 2019	n/a	n/a	n/a

Notes:

- 1) The throughput data presented in Tables A3.1-1 to A3.1-7 has been rounded off to the nearest whole tonne for presentation.
- 2) The total product output may not be the same as the waste input due to processing of materials that were received before the reporting quarter and were stored within the lots.
- 3) Waste disposal refers to the disposal of general refuse (i.e. packaging) and/or chemical waste.
- 4) Since the recycling of waste glass and construction waste is combined to produce concrete block at K.Wah, the product output and waste disposal from both processes are combined.
- 5) The presented throughput is the best available data.
- 6) "-" in the column of waste disposal denotes zero quantity; while "n/a" denotes unavailable information.

REPORT ON CALIBRATION OF INFRA RED GAS ANALYSER

Client

: Fugro Technical Services Limited

Sample description

One sample of Infra Red Gas Analyser (GA5000)

Sample identification

E/084/2

Serial number

G501982

Test required

Calibration

Date of calibration

14/05/2019

Next calibration date

13/11/2019

Method used

In-house method (Comparison with Standard Gas)

Results:

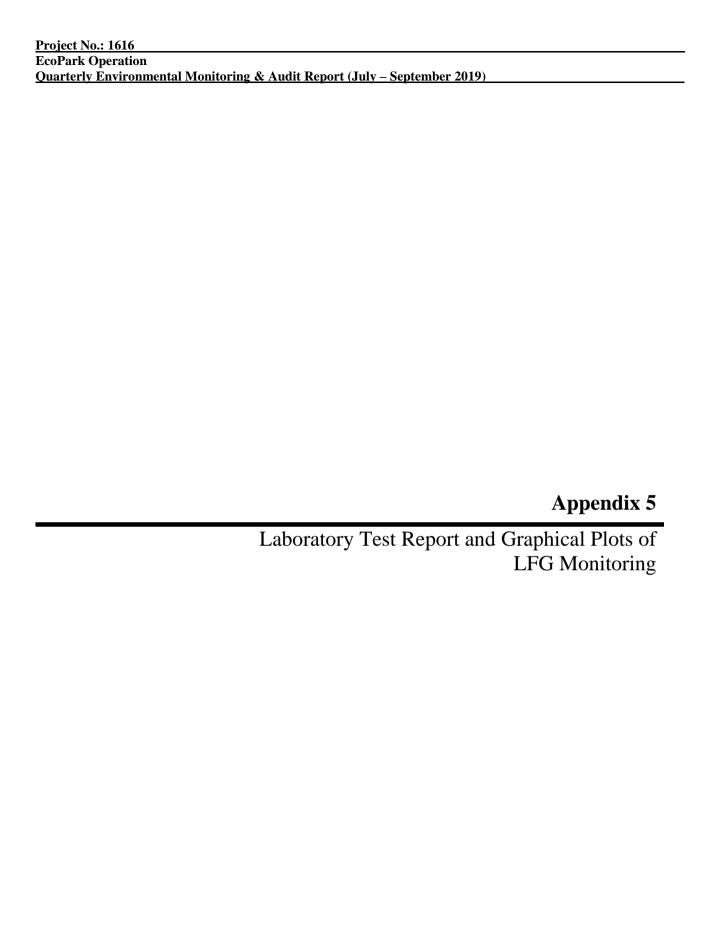

Parameters	Standard Gas Concentration, % volume	Infra Red Gas Analyser Reading, % volume	Deviation, % volume
Methane (CH₄)	1.00	1.0	0.00
Carbon dioxide (CO₂)	1.00	1.8	0.8
Oxygen (O₂)	16.0	15.9	- 0.1

Calibrated by : ______ C. F. Leung Certified by : _______ Approved Signatory : Raymond K. F. Word Mariager - Chemistry Department

Date : ______ 14/05/3019

Note: This report refers only to the sample(s) tested.

This report shall not be reproduced except in full with prior written approval from the Company.

1. General	N/A Yes No Remarks
 1.1 Environmental Permit (EP) for Tenant displayed at entrances/exits? 1.2 Environmental Policy documented? 1.3 Environmental Management Plan (EMP) kept up-to-date? 1.4 Emergency Response Plan (ERP) documented? 1.5 All recycling processes in operation have been approved by WRG of EPD? 1.6 Any record of complaint or prosecution? 	EP for tenant is not required UPML's Environmental Policy is followed UPML's EMP is followed UPML's ERP is followed
2. Water Quality	N/A Yes No Remarks
 2.1 Valid Effluent Discharge Licence available? a) Sampling record available? b) Monitoring frequency met the licence requirement? c) Monitoring result comply with the licence requirement? d) If exceedance is recorded, any follow-up action taken? 2.2 Provision of wastewater treatment facility (WTF) prior to discharge? a) Adequate capacity? b) Properly maintained and function normally? 2.3 Surface run-off control measures in place and adequately maintained? 2.4 Surface run-off discharging into drainage system? 2.5 All manholes covered? 2.6 Foam, oil, grease, debris, rubbish and other objectionable matters prevented from entering nearby drains or sewer? 	New Licence was issued on 24 Jan 2019 Bi-monthly sampling (up to Jul 2019) Bi-monthly sampling for effluent arising from producing biodiesel. V
 2.7 Storage of materials and equipment located away from water bodies? 2.8 Drainage system well maintained to prevent flooding or overflow? 2.9 Processes or activities with high risk of contamination located under covered area? 2.10 Installation of stop-logs in perimeter drainage system for uncovered areas where recovery process with potentially high level of contamination is carried out? 	Stop-logs are available for use by tenant if needed
2.11 Equipment oil and lubrication replacements performed only in bunded maintenance area?2.12 Contaminated water collected in the surface drainage system is treated at water treatment facility or other appropriate treatment facility?	Replacement activity is not observed Petrol interceptor is provided

2.13	Drainage from maintenance area discharged via oil interceptor?		✓		
	a) Oil and grease removed regularly?		✓		
	b) Collected by licensed collector?		✓		
2.14	Follow Cargo Handling Guideline to minimise the chance of accidental spillage during loading and unloading adjacent to marine frontage?	√			Not required
2.15	Bulk cargo and materials packed properly?		√		
2.16	Temporary stockpiles covered during rainstorms?	√			No dusty stockpile is observed
2.17	Measures to prevent the washing away of sand/silt to drains?	✓			No sand/silt is generated from the recycling process
3. Ai	r Quality	N/A	Yes	No	Remarks
3.1	Valid Specified Process (SP) Licence available for all specified process?		√		Valid from Feb 2018 to Feb 2023
	a) SP Licence conditions / monitoring requirements comply?		✓		Quarterly reporting on quantity of raw material and product (up to Jul 2018)
3.2	Operate without generation of noticeable odour?		✓		
	a) If odour is detected, can the source be identified?	√			
	b) Odourous materials covered?	✓			
	c) If odour control system is installed, is it operating normally?	√			
3.3	Dusty materials dampened prior to loading/unloading?	✓			No loading/unloading of dusty materials is observed
3.4	Dust monitoring record available?	✓			Not required
	a) Monitoring frequency met the licence requirement?	✓			
	b) Any exceedance?	✓			
	c) If exceedance is recorded, follow-up action taken?	✓			
3.5	Dust-suppression measures provided where main dust-generating activities take place (i.e. enclosures or regular dampening)?	√			No dust-generating activity is observed
3.6	Open burning prohibited?		✓		
3.7	Emission from chimney or powered plant free of black smoke?		✓		
3.8	Vehicles and equipment switched off while not in use?		✓		
3.9	Obtained approval for installation/alteration of furnace, oven or chimney consuming over 25L liquid fuel/hour, or 35kg solid fuel/hour, or 1150MJ gaseous fuel/hour?	√			Not required
3.10	Obtained approval for the use of liquid fuel with a viscosity point of ignition >30 centistokes or an equivalent viscosity?	√			Not required
3.11	Air pollution control system properly maintained and function normally?		√		Regular replacement of activated carbon filter
3.12	Dust collected by any air pollution control equipment installed by tenants tested to ensure compliance for landfill disposal?	√			
	a) Obtained approval for the use of controlled refrigerant?	✓			
	b) If yes, record of refrigeration equipment service available?	✓			
3.13	Only ultra-low sulphur diesel is used for activities requiring liquid fuel?	✓			
3.14	Public road around site entrance kept clean and free from dust?		√		
3.15	Materials transported on trucks covered?	√			Not observed

3.16 Truck loads to a level within the side and tail boards?	✓ Not observed					
3.17 Stockpiles of dusty materials covered or regularly watered?	✓ No stockpile of	dusty material is observed				
3.18 Major dust source(s): Wind erosion	Vehicle/equipment movement					
Loading/unloading of materials	✓ Others: n/a					
4. Waste / Chemical Management						
General	N/A Yes No Remarks					
4.1 Registered as chemical waste producer?		_				
4.2 Sufficient receptacles (e.g. rubbish bins) available?						
4.3 Disposed of regularly and properly?		_				
4.4 Sorting of materials on-site for reuse or disposal to designated outlet?						
4.5 Records of quantities of waste generated, recycled and disposed properly kept?	✓ Verified via qua	rterly report				
4.6 Collection of sludge by licensed collector at regular intervals?	✓ Not observed					
Packaging of Chemical Waste						
4.7 Stored in suitable container?						
4.8 Container properly closed or sealed?						
4.9 Spillage cleaned up immediately through the use of absorbent?						
4.10 Obtained approval for the use of chemical waste container >450L?						
<u>Labelling of Chemical Waste</u>						
4.11 Provision of chemical waste label?	✓ New Observation	n (1)				
a) Label is securely attached and visible?	✓ New Observation	n (1), Follow-up Observation (1)				
b) Label is bilingual and in proper dimension?	✓ New Observation	n (1)				
c) Information is accurate and sufficient?	✓ New Observation	n (1)				
Storage of Chemical Waste						
4.12 Proper "Chemical Waste" sign displayed?						
4.13 Incompatible wastes separated by impermeable partition?						
4.14 Containers kept in cabinet or receptacle of suitable material (if quantity $<$ 50L), or with drip trays capable of storing 110% of the volume of the largest container (if						
4.15 Enclosed on 3 sides with no less than 2m in height or height of tallest container of containers?	stack					
4.16 Properly stored and locked in designated area with adequate ventilation?	✓ Follow-up Obse	rvation (1)				
4.17 Storage area paved with concrete and kept clean and dry?		_				
4.18 Cover provided for outdoor storage area?						
4.19 Chemical waste collected by licensed collector?	✓ Not observed					
Liquid Chemical Storage						
4.20 Storage area provided with permeation-proof floor or surface?						
4.21 Capacity of retention structure sufficient to accommodate contents of the largest container or 20% volume of the material in storage?						

4.22 Walls or partitions of stacked container storage area constructed of impermeable material?	✓			
5. Landfill Gas (LFG) (within LFG Consultation Zone)		Yes N	No	Remarks
5.1 Alert workers and visitors of possible LFG hazards?	✓			Outside LFG consultation zone
5.2 Smoking and open fires prohibited?		√		
6. Others	N/A	Yes 1	No	Remarks
6.1 Works confined within lot boundaries?		√		
6.2 Damage to surrounding areas avoided?		✓		
6.3 Site lighting designed to avoid glare to surrounding receivers?	✓			
6.4 Materials and machinery stored in an orderly manner?		✓		
6.5 Areas within lot for recycling activities paved with concrete?		✓		
6.6 Potential stagnant pools cleared and mosquito breeding prevented?		√		
6.7 Valid calibration certificate for any monitoring equipment?	✓			
6.8 Valid licence(s) obtained for manufacture or storage of dangerous goods?		√		
a) Storage area in compliance with the approved plan?	✓			Subject to tenant's information provision
b) Storage area is securely locked?		√		
c) Total storage capacity in compliance with relevant statutory requirement?	✓			
d) Proper labelling provided?		√		
e) Dangerous goods properly packaged?	✓			

SITE INSPECTION CHECKLIST

Remarks:

Follow-up from Previous Audits

1) Proper chemical waste label is provided yet it is not being sticked to the correct position. The tenant was requested to attach the chemical waste label directly on the chemical waste instead of sticking to the contained plastic box. The tenant was reminded to relocate the chemical waste to the designated chemical waste storage area at the northern part of the lot.

(Observed on 17 June 2019)

(Observed on 17 June 2019)

(Observed on 24 July 2019)

New Observations

1) No chemical waste label is provided on one of the chemical waste containers which stored at the chemical waste storage area. The tenant was reminded to provide proper chemical waste labels to all chemical waste containers.

(Observed on 24 July 2019)

SITE INSPECTION CHECKLIST

Remarks:

Follow-up from Previous Audits

1) The tenant has relocated the chemical waste container to the designated chemical waste storage area at the northern part of the lot.

(Observed on 24 July 2019)

(Observed on 20 August 2019)

Chemical waste was observed without proper labels for the storage of chemical waste. Also, the chemical waste storage area was observed without a proper signage for "CHEMICAL WASTE" in both English and Chinese. The tenant was requested to provide proper labels displaying on each chemical waste containers and must comply with the Code of Practice on the Packaging, Labelling and Storage of Chemcial Wastes.

(Observed on 24 July 2019)

(Observed on 20 August 2019)

New Observations

No major environmental deficiency was observed.

Weat	Condition: Sunny Fine Overcast Drizzle Temperature: 29 °C Humidity: High Wind: Calm Light Breeze Strong	Rain Storm Hazy ✓ Moderate Low
1. Ge	eneral eneral	N/A Yes No Remarks
1.1 1.2 1.3 1.4 1.5	Environmental Permit (EP) for Tenant displayed at entrances/exits? Environmental Policy documented? Environmental Management Plan (EMP) kept up-to-date? Emergency Response Plan (ERP) documented? All recycling processes in operation have been approved by WRG of EPD?	EP for tenant is not required. UPML's Environmental Policy is followed UPML's EMP is followed UPML's ERP is followed
1.6	Any record of complaint or prosecution?	
2. W:	ater Quality	N/A Yes No Remarks No wastewater is generated from recycling
2.1	Valid Effluent Discharge Licence available? a) Sampling record available? b) Monitoring frequency met the licence requirement? c) Monitoring result comply with the licence requirement? d) If exceedance is recorded, any follow-up action taken?	
2.2	Provision of wastewater treatment facility (WTF) prior to discharge? a) Adequate capacity? b) Properly maintained and function normally?	
2.32.42.5	Surface run-off control measures in place and adequately maintained? Surface run-off discharging into drainage system? All manholes covered?	
2.6	Foam, oil, grease, debris, rubbish and other objectionable matters prevented from entering nearby drains or sewer?	
2.7 2.8	Storage of materials and equipment located away from water bodies? Drainage system well maintained to prevent flooding or overflow?	
2.9	Processes or activities with high risk of contamination located under covered area? Installation of stop-logs in perimeter drainage system for uncovered areas where recovery	Recycling process has low risk of contamination Stop-logs are available for use by tenant if needed.
	process with potentially high level of contamination is carried out? Equipment oil and lubrication replacements performed only in bunded maintenance area? Contaminated water collected in the surface drainage system is treated at water treatment	Replacement activity is not observed
	facility or other appropriate treatment facility?	No contaminated water is observed

2.13	Drainage from maintenance area discharged via oil interceptor?	✓		Not required
	a) Oil and grease removed regularly?	✓		
	b) Collected by licensed collector?	✓		
2.14	Follow Cargo Handling Guideline to minimise the chance of accidental spillage during loading and unloading adjacent to marine frontage?	✓		Not required
2.15	Bulk cargo and materials packed properly?		√	
2.16	Temporary stockpiles covered during rainstorms?	✓		No dusty stockpile is observed
2.17	Measures to prevent the washing away of sand/silt to drains?	√		No sand/silt is generated from the recycling process
3. Ai	· Quality	N/A	Yes No	Remarks
3.1	Valid Specified Process (SP) Licence available for all specified process?	√		Not required
	a) SP Licence conditions / monitoring requirements comply?	√		
3.2	Operate without generation of noticeable odour?		√	
	a) If odour is detected, can the source be identified?	√		
	b) Odourous materials covered?	√		
	c) If odour control system is installed, is it operating normally?	✓		
3.3	Dusty materials dampened prior to loading/unloading?	√		No loading/unloading of dusty materials is observed
3.4	Dust monitoring record available?	✓		Not required
	a) Monitoring frequency met the licence requirement?	√		
	b) Any exceedance?	√		
	c) If exceedance is recorded, follow-up action taken?	√		
3.5	Dust-suppression measures provided where main dust-generating activities take place (i.e. enclosures or regular dampening)?	√		Dust-generating activity is not observed
3.6	Open burning prohibited?		√	
3.7	Emission from chimney or powered plant free of black smoke?	√		No operation is observed during inspection
3.8	Vehicles and equipment switched off while not in use?		√	
3.9	Obtained approval for installation/alteration of furnace, oven or chimney consuming over 25L liquid fuel/hour, or 35kg solid fuel/hour, or 1150MJ gaseous fuel/hour?	✓		Not required
3.10	Obtained approval for the use of liquid fuel with a viscosity point of ignition >30 centistokes or an equivalent viscosity?	√		Not required
3.11	Air pollution control system properly maintained and function normally?	✓		
3.12	Dust collected by any air pollution control equipment installed by tenants tested to ensure compliance for landfill disposal?	√		
	a) Obtained approval for the use of controlled refrigerant?	✓		
	b) If yes, record of refrigeration equipment service available?	✓		
3.13	Only ultra-low sulphur diesel is used for activities requiring liquid fuel?	✓		
3.14	Public road around site entrance kept clean and free from dust?		√	
3.15	Materials transported on trucks covered?	√		Not observed

3.16	Truck loads to a level within the side and tail boards?	✓ Not observed
3.17	Stockpiles of dusty materials covered or regularly watered?	No stockpile of dusty material is observed
3.18	Major dust source(s): Wind erosion	Vehicle/equipment movement
	Loading/unloading of materials	✓ Others: <u>n/a</u>
4. W	aste / Chemical Management	
Gene	<u>ral</u>	N/A Yes No Remarks
4.1	Registered as chemical waste producer?	No chemical waste is observed
4.2	Sufficient receptacles (e.g. rubbish bins) available?	
4.3	Disposed of regularly and properly?	
4.4	Sorting of materials on-site for reuse or disposal to designated outlet?	
4.5	Records of quantities of waste generated, recycled and disposed properly kept?	✓ Verified via quarterly report
4.6	Collection of sludge by licensed collector at regular intervals?	
Packa	aging of Chemical Waste	
4.7	Stored in suitable container?	
4.8	Container properly closed or sealed?	
4.9	Spillage cleaned up immediately through the use of absorbent?	
4.10	Obtained approval for the use of chemical waste container >450L?	
Labe	lling of Chemical Waste	
4.11	Provision of chemical waste label?	
	a) Label is securely attached and visible?	
	b) Label is bilingual and in proper dimension?	
	c) Information is accurate and sufficient?	
Stora	ge of Chemical Waste	
4.12	Proper "Chemical Waste" sign displayed?	
4.13	Incompatible wastes separated by impermeable partition?	
4.14	Containers kept in cabinet or receptacle of suitable material (if quantity $<$ 50L), or with drip trays capable of storing 110% of the volume of the largest container (if q	
4.15	Enclosed on 3 sides with no less than 2m in height or height of tallest container / s of containers?	stack
4.16	Properly stored and locked in designated area with adequate ventilation?	
4.17	Storage area paved with concrete and kept clean and dry?	
4.18	Cover provided for outdoor storage area?	
4.19	Chemical waste collected by licensed collector?	
<u>Liqui</u>	id Waste Storage	
4.20	Storage area provided with permeation-proof floor or surface?	
4.21	Capacity of retention structure sufficient to accommodate contents of the largest container or 20% volume of the material in storage?	

4.22	Walls or partitions of stack	ed container storage area constructed	of impermeable material?	<u> </u>	
5. La	andfill Gas (LFG) (within L	FG Consultation Zone)		N/A Yes N	o Remarks
5.1	Alert workers and visitors of	of possible LFG hazards?			
5.2	Smoking and open fires pro	phibited?			j
6. Ot	<u>chers</u>			N/A Yes N	o Remarks
6.1	Works confined within lot	boundaries?			
6.2	Damage to surrounding are	as avoided?			<u> </u>
6.3	Site lighting designed to av	oid glare to surrounding receivers?		✓	
6.4	Materials and machinery st	ored in an orderly manner?			
6.5	Areas within lot for recyclic	ng activities paved with concrete?]
6.6	Potential stagnant pools cle	ared and mosquito breeding prevented	d?		
6.7	Valid calibration certificate	e for any monitoring equipment?		✓ □ □	Not required
6.8	Valid licence(s) obtained for	or manufacture or storage of dangerou	s goods?	/	Not required
	a) Storage area in complian	ce with the approved plan?		/	<u> </u>
	b) Storage area is securely l	locked?		/	<u> </u>
	c) Total storage capacity in	compliance with relevant statutory re	quirement?		
	d) Proper labelling provide	d?			<u> </u>
	e) Dangerous goods proper	ly packaged?		✓	□

Rem	arks:				
New	Observations				
•	Stockpiles of concrete block and earth materials are exposed and located on top of a stormw. The tenent was reminded to provide temporalist for covering the stockpiles and regularly income.				

The tenant was reminded to provide tarpaulin for covering the stockpiles and regularly inspect the stormwater channel especially after raining events in order to prevent accumulation of grit and blockage in the stormwater channel.

(Observed on 24 July	2019)

6.5	Areas within lot for recycling activities paved with concrete?		
6.6	Potential stagnant pools cleared and mosquito breeding prevented?		
6.7	Valid calibration certificate for any monitoring equipment?	✓ Not provided	
6.8	Valid licence(s) obtained for manufacture or storage of dangerous goods?	✓ Not required	
	a) Storage area in compliance with the approved plan?		
	b) Storage area is securely locked?		
	c) Total storage capacity in compliance with relevant statutory requirement?		
	d) Proper labelling provided?		
	e) Dangerous goods properly packaged?		

Remarks:

New Observations

No major environmental deficiency was observed.

Follow-up from Previous Audits

• Part of the open stockpiles has been covered with tarpaulin. The tenant was reminded to entirely cover the stockpiles and regularly inspect the stormwater channel especially after raining events in order to prevent accumulation of grit and blockage in the stormwater channel.

(Observed on 24 July 2019)

(Observed on 20 August 2019)

Remarks:

Follow-up from Previous Audits

1) The tenant was requested to clear up and take away the tarpaulin from the site in order to prevent any potential contamination of the drainage channel nearby due to the accumulation of oil mixture on top of the tarpaulin.

(Observed on 24 July 2019)

6.1	Works confined within lot boundaries?		
6.2	Damage to surrounding areas avoided?		
6.3	Site lighting designed to avoid glare to surrounding receivers?		
6.4	Materials and machinery stored in an orderly manner?		
6.5	Areas within lot for recycling activities paved with concrete?		
6.6	Potential stagnant pools cleared and mosquito breeding prevented?		
6.7	Valid calibration certificate for any monitoring equipment?		Not provided
6.8	Valid licence(s) obtained for manufacture or storage of dangerous goods?		Not required
	a) Storage area in compliance with the approved plan?		
	b) Storage area is securely locked?		
	c) Total storage capacity in compliance with relevant statutory requirement?		
	d) Proper labelling provided?		
	e) Dangerous goods properly packaged?		

Remarks:

Follow-up from Previous Audits

1) The oil mixture that contained with the tarpaulin beneath the trailer at the eastern lot boundary was cleaned up.

(Observed on 24 July 2019)

(Observed on 20 August 2019)

SITE INSPECTION CHECKLIST

New Observations

· No major environmental deficiency was observed.

	a) Storage area in compliance with the approved plan?	√			_
	b) Storage area is securely locked?	✓			
	c) Total storage capacity in compliance with relevant statutory requirement?	✓			
	d) Proper labelling provided?	✓			
	e) Dangerous goods properly packaged?	✓			

Remarks:

New Observations

· No major environmental deficiency was observed.

Follow-up from Previous Audits

1) Display signs for the chemical waste storage area were observed not securely attached. The tenant was requested to display the signages securely. The status will be reviewed in the next inspection.

(Observed on 24 July 2019)

(Observed on 20 August 2019)

1.3	Environmental Management Plan (EMP) kept up-to-date?	In-house Emergency Procedure Plan was
1.4	Emergency Response Plan (ERP) documented? All recycling processes in operation have been approved by WRG of EPD?	applied
1.5	Any record of complaint or prosecution?	
2. Wa	ater Quality	N/A Yes No Remarks
2.1	Valid Effluent Discharge Licence available?	
	a) Sampling record available?	
	b) Monitoring frequency met the licence requirement?	Self-monitoring when required
	c) Monitoring result comply with the licence requirement?	
	d) If exceedance is recorded, any follow-up action taken?	
2.2	Provision of wastewater treatment facility (WTF) prior to discharge?	via petrol interceptor
	a) Adequate capacity?	
	b) Properly maintained and function normally?	
2.3	Surface run-off control measures in place and adequately maintained?	
2.4	Surface run-off discharging into drainage system?	
2.5	All manholes covered?	
2.6	Foam, oil, grease, debris, rubbish and other objectionable matters prevented from entering nearby drains or sewer?	
2.7	Storage of materials and equipment located away from water bodies?	
2.8	Drainage system well maintained to prevent flooding or overflow?	
2.9	Processes or activities with high risk of contamination located under covered area?	Stop-logs are available for use by tenant
2.10	Installation of stop-logs in perimeter drainage system for uncovered areas where recovery process with potentially high level of contamination is carried out?	Stop-rogs are available for use by tenant if needed.
2.11	Equipment oil and lubrication replacements performed only in bunded maintenance area?	Replacement activity is not observed
2.12	Contaminated water collected in the surface drainage system is treated at water treatment facility or other appropriate treatment facility?	No contaminated water is observed

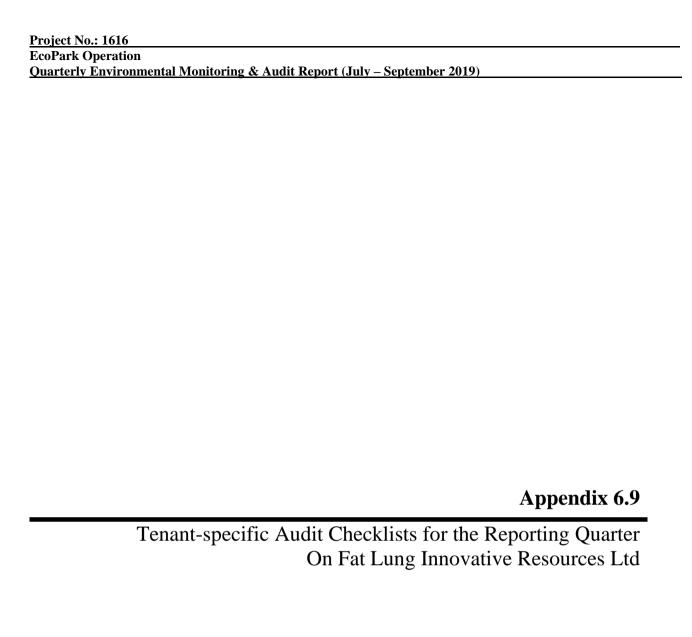

2.13	Drainage from fuel dispensing area discharged via oil interceptor?		✓		
	a) Oil and grease removed regularly?	✓			Not observed
	b) Collected by licensed collector?	✓			
2.14	Follow Cargo Handling Guideline to minimise the chance of accidental spillage during loading and unloading adjacent to marine frontage?	√			Not required
2.15	Bulk cargo and materials packed properly?		✓		
2.16	Temporary stockpiles covered during rainstorms?	✓			No dusty stockpile is observed
2.17	Measures to prevent the washing away of sand/silt to drains?	√			No sand/silt is generated from the recycling process
3. Air	<u>Quality</u>	N/A	Yes	No	Remarks
3.1	Valid Specified Process (SP) Licence available for all specified process?	✓			Not required
	a) SP Licence conditions / monitoring requirements comply?	✓			
3.2	Operate without generation of noticeable odour?		✓		
	a) If odour is detected, can the source be identified?	✓			
	b) Odourous materials covered?	✓			
	c) If odour control system is installed, is it operating normally?	✓			
3.3	Dusty materials dampened prior to loading/unloading?	✓			Dusty material is not observed
3.4	Air monitoring record available?		√		
	a) Monitoring frequency met the licence requirement?		✓		Requirements stipulated in Compliance Audit Report
	b) Any exceedance?			✓	Against AQO/USEPA
	c) If exceedance is recorded, follow-up action taken?	✓			
3.5	Suppression measures provided where main pollutant-generating activities take place (i.e. enclosures or regular dampening)?		√		Use of localised hood and extraction system with HEPA filter for CRT Recovery
3.6	Open burning prohibited?		✓		
3.7	Emission from chimney or powered plant free of black smoke?		✓		
3.8	Vehicles and equipment switched off while not in use?		✓		
3.9	Obtained approval for installation/alteration of furnace, oven or chimney consuming over 25L liquid fuel/hour, or 35kg solid fuel/hour, or 1150MJ gaseous fuel/hour?		✓		
3.10	Obtained approval for the use of liquid fuel with a viscosity point of ignition >30 centistokes or an equivalent viscosity?	✓			
3.11	Air pollution control system properly maintained and function normally?		✓		
3.12	Filtered dust/ fluorescent powder from any air pollution control equipment installed by tenants disposed of as chemical waste?		✓		
	a) Obtained approval for the use of controlled refrigerant?	✓			
	b) If yes, record of refrigeration equipment service available?	✓			
3.13	Only ultra-low sulphur diesel is used for activities requiring liquid fuel?	√			
3.14	Public road around site entrance kept clean and free from dust?		√		
3.15	Materials transported on trucks covered?	√			Not observed

3.16	Truck loads to a level within the side and tail boards?	Not observed No stockpile of dusty material is				
3.17	Stockpiles of dusty materials covered or regularly watered?	observed				
3.18	Major dust source(s): Wind erosion Ve	hicle/equipment movement				
	Loading/unloading of materials	hers: n/a				
3.19	Shredding, crushing and sorting processes including CRT dismantling are carried out in					
	enclosed structure(s)?

Gener	<u>al</u>	N/A Yes No Remarks				
4.1	Registered as chemical waste producer?					
4.2	Sufficient receptacles (e.g. rubbish bins) available?					
4.3	Disposed of regularly and properly?					
4.4	Sorting of materials on-site for reuse or disposal to designated outlet?					
4.5	Records of quantities of waste generated, recycled and disposed properly kept?	✓ Verified via quarterly report				
4.6	Collection of sludge by licensed collector at regular intervals?	Not required				
Packa	ging of Chemical Waste					
4.7	Stored in suitable container?					
4.8	Container properly closed or sealed?					
4.9	Spillage cleaned up immediately through the use of absorbent?					
4.10	Obtained approval for the use of chemical waste container >450L?					
Label	ling of Chemical Waste					
4.11	Provision of chemical waste label?					
	a) Label is securely attached and visible?					
	b) Label is bilingual and in proper dimension?					
	c) Information is accurate and sufficient?					
Storag	ge of Chemical Waste					
4.12	Proper "Chemical Waste" sign displayed?					
4.13	Incompatible wastes separated by impermeable partition?	✓ Not observed				
4.14	Containers kept in cabinet or receptacle of suitable material (if quantity $<$ 50L), or provide with drip trays capable of storing 110% of the volume of the largest container (if quantity					
4.15	Enclosed on 3 sides with no less than 2m in height or height of tallest container / stack of containers?					
4.16	Properly stored and locked in designated area with adequate ventilation?					
4.17	Storage area paved with concrete and kept clean and dry?					
4.18	Cover provided for outdoor storage area?					
4.19	Chemical waste collected by licensed collector?					
<u>Liquid Waste Storage</u>						
4.20	Storage area provided with permeation-proof floor or surface?					

4.21	Capacity of retention structure sufficient to accommodate contents of the largest container or 20% volume of the material in storage?		□
4.22	Walls or partitions of stacked container storage area constructed of impermeable material?		□
5. La	ndfill Gas (LFG) (within LFG Consultation Zone)	N/A Yes I	No Remarks
5.1	Alert workers and visitors of possible LFG hazards?		
5.2	Smoking and open fires prohibited?		□
6. Ot	ner <u>s</u>	N/A Yes I	No Remarks
6.1	Works confined within lot boundaries?		
6.2	Damage to surrounding areas avoided?		
6.3	Site lighting designed to avoid glare to surrounding receivers?	✓	
6.4	Materials and machinery stored in an orderly manner?		
6.5	Areas within lot for recycling activities paved with concrete?		
6.6	Potential stagnant pools cleared and mosquito breeding prevented?		
6.7	Valid calibration certificate for any monitoring equipment?	✓	Not provided
6.8	Valid licence(s) obtained for manufacture or storage of dangerous goods?		
	a) Storage area in compliance with the approved plan?	✓	
	b) Storage area is securely locked?		
	c) Total storage capacity in compliance with relevant statutory requirement?	✓	
	d) Proper labelling provided?		
	e) Dangerous goods properly packaged?		□

2.16	Temporary stockpiles covered during rainstorms?	✓			No rainstorm during inspection
2.17	Measures to prevent the washing away of sand/silt to drains?		√		
3. Ai	<u>· Quality</u>	N/A	Yes	No	Remarks
3.1	Valid Specified Process (SP) Licence available for all specified process?	✓			Not required
	a) SP Licence conditions / monitoring requirements comply?	\checkmark			
3.2	Operate without generation of noticeable odour?		√		
	a) If odour is detected, can the source be identified?	✓			
	b) Odourous materials covered?	✓			
	c) If odour control system is installed, is it operating normally?	✓			
3.3	Dusty materials dampened prior to loading/unloading?	✓			No loading/unloading of dusty materials is observed
3.4	Dust monitoring record available?	✓			Not required
	a) Monitoring frequency met the licence requirement?	✓			
	b) Any exceedance?	✓			
	c) If exceedance is recorded, follow-up action taken?	✓			
3.5	Dust-suppression measures provided where main dust-generating activities take place (i.e. enclosures or regular dampening)?		√		Via enclosure
3.6	Open burning prohibited?		✓		
3.7	Emission from chimney or powered plant free of black smoke?		✓		
3.8	Vehicles and equipment switched off while not in use?		✓		
3.9	Obtained approval for installation/alteration of furnace, oven or chimney consuming over 25L liquid fuel/hour, or 35kg solid fuel/hour, or 1150MJ gaseous fuel/hour?	✓			Not required
3.10	Obtained approval for the use of liquid fuel with a viscosity point of ignition >30 centistokes or an equivalent viscosity?	✓			Not required
3.11	Air pollution control system properly maintained and function normally?		✓		Via enclosure
3.12	Dust collected by any air pollution control equipment installed by tenants tested to ensure compliance for landfill disposal?	✓			
	a) Obtained approval for the use of controlled refrigerant?	✓			
	b) If yes, record of refrigeration equipment service available?	√			
3.13	Only ultra-low sulphur diesel is used for activities requiring liquid fuel?	✓			
3.14	Public road around site entrance kept clean and free from dust?		√		
3.15	Materials transported on trucks covered?	✓			Not observed

3.16	Truck loads to a level w	vithin the side and tail boards?		✓		Not observed
3.17	Stockpiles of dusty mat	terials covered or regularly watered?	[v]
3.18	Major dust source(s):	Wind erosion	Vehic	cle/equipr	nent mov	rement
		Loading/unloading of materials	✓ Other	rs: <u>n/a</u>	ı	
4. W	aste / Chemical Manag	<u>gement</u>				
Gene	<u>ral</u>			N/A Y	es No	Remarks
4.1	Registered as chemical	waste producer?]
4.2	Sufficient receptacles (e	e.g. rubbish bins) available?]
4.3	Disposed of regularly as	nd properly?]
4.4	Sorting of materials on-	site for reuse or disposal to designated outlet?]
4.5	Records of quantities of	f waste generated, recycled and disposed properly kept?				Verified via quarterly report
4.6	Collection of sludge by	licensed collector at regular intervals?		√]
Packa	aging of Chemical Waste	2				
4.7	Stored in suitable conta	iner?		✓		No chemical waste is observed
4.8	Container properly clos	sed or sealed?		√]
4.9	Spillage cleaned up imm	mediately through the use of absorbent?		✓]
4.10	Obtained approval for t	the use of chemical waste container >450L?		✓]
Label	lling of Chemical Waste					
4.11	Provision of chemical w	waste label?		✓]
	a) Label is securely atta	ached and visible?		√]
	b) Label is bilingual and	d in proper dimension?		✓]
	c) Information is accura	ate and sufficient?		√]
Stora	ge of Chemical Waste					
4.12	Proper "Chemical Wast	te" sign displayed?		✓]
4.13	Incompatible wastes sep	parated by impermeable partition?		✓]
4.14		net or receptacle of suitable material (if quantity $<$ 50L), α 0 of storing 110% of the volume of the largest container (if		✓ L)?]
4.15	Enclosed on 3 sides wit of containers?	th no less than 2m in height or height of tallest container,	/stack	√]
4.16	Properly stored and lock	ked in designated area with adequate ventilation?	[√]
4.17	Storage area paved with	n concrete and kept clean and dry?		√]
4.18	Cover provided for out	door storage area?		✓]
4.19	Chemical waste collected	ed by licensed collector?	[√]
Liqui	d Waste Storage					
4.20	Storage area provided w	with permeation-proof floor or surface?		√]
4.21		ructure sufficient to accommodate contents of the 6 volume of the material in storage?	[√]

4.22	Walls or partitions of stacked conta	iner storage area constructed of impermeable m	aterial?	
5. La	ndfill Gas (LFG) (within LFG Con	sultation Zone)	N/A Yes No Rer	marks
5.1	Alert workers and visitors of possib	le LFG hazards?		
5.2	Smoking and open fires prohibited?			
6. Ot	<u>hers</u>		N/A Yes No Rer	marks
6.1	Works confined within lot boundar	ies?		
6.2	Damage to surrounding areas avoid	ed?		
6.3	Site lighting designed to avoid glare	to surrounding receivers?	✓	
6.4	Materials and machinery stored in a	n orderly manner?		
6.5	Areas within lot for recycling activi	ties paved with concrete?		
6.6	Potential stagnant pools cleared and	mosquito breeding prevented?		
6.7	Valid calibration certificate for any	monitoring equipment?	✓ Not:	required
6.8	Valid licence(s) obtained for manuf	acture or storage of dangerous goods?	✓ Not:	required
	a) Storage area in compliance with	the approved plan?		
	b) Storage area is securely locked?			
	c) Total storage capacity in complia	nce with relevant statutory requirement?		
	d) Proper labelling provided?			
	e) Dangerous goods properly packa	ged?

Issue 1 AEC

SITE INSPECTION CHECKLIST

Inspection Date: Lot Number:	2019/07/2 n/a		me: 09:30 - enant: n/	- 12:30	Inspected by:	Cindy KWOK,	Sam CHAN
Veather Condition: Temperature: Wind:	✓ Sunny 30 °C ✓ Calm	✓ Fine Light	✓ Overcast Humidity: Breeze	Drizzle High Strong	Rain Moderate	Storm Low	Hazy

Follow-up from Previous Audits

HKBRC

1) The tenant was requested to provide hoarding along the site boundary. Yet since the phase 1 construction was completed and phase 2 construction has not been started, this follow-up observation is currently inapplicable.

(Observed on 17 June 2019)

(Observed on 24 July 2019)

2) Although open stockpile of dusty materials was not observed during site inspection, the tenant was also reminded to implement the required dust control measures and to notify the Authority for carrying out notifiable work in order to satisfy with the requirements stipulated in the Air Pollution Control Ordinance, in particular Air Pollution Control (Construction Dust) Regulation. Yet since the phase 1 construction was completed and phase 2 construction has not started, this follow-up observation is currently inapplicable.

(Observed on 17 June 2019)

(Observed on 24 July 2019)

3) During site inspection, no temporary site drainage system was observed for collection and treatment of construction wastewater. The tenant should apply for a Discharge License under Water Pollution Control Ordiance (WPCO) and establish a construction site drainage system, including provision of wastewater treatment facilities, to ensure wastewater is treated effectively prior to discharge and compliance with WPCO. Yet since the phase 1 construction was completed and phase 2 construction has not started, this follow-up observation is currently inapplicable.

(Observed on 17 June 2019)

(Observed on 24 July 2019)
