## EXECUTIVE SUMMARY

ES01. This is the **38<sup>th</sup>** Monthly Environmental Monitoring and Audit (EM&A) Report for the designated work of Project under Environmental Permit No.EP-327/2009/A (hereinafter ‘the EP’), covering a period from **1 to 31 March 2013** (hereinafter ‘the Reporting Period’).

## ENVIRONMENTAL MONITORING AND AUDIT ACTIVITIES

ES02. Environmental monitoring activities under the EM&A programme in this Reporting Period are summarized in the following table.

| Aspects            | Environmental Monitoring Parameters / Inspection | Occasions |
|--------------------|--------------------------------------------------|-----------|
| Air Quality        | 1-hour Total Suspended Particulates (TSP)        | <b>30</b> |
|                    | 24-hour Total Suspended Particulates (TSP)       | <b>10</b> |
| Construction Noise | L <sub>eq(30min)</sub> Daytime                   | <b>10</b> |
| Water Quality      | Dissolved Oxygen                                 | <b>12</b> |
|                    | Turbidity                                        | <b>12</b> |
|                    | Suspended Solids                                 | <b>12</b> |
| Inspection / Audit | ET Weekly Environmental Site Inspection          | <b>4</b>  |

## BREACH OF ACTION AND LIMIT (A/L) LEVELS

ES03. In this reporting period, no exceedance was recorded in air quality, noise and water quality monitoring. The summary of breach of environmental performance is shown below.

| Environmental Aspects | Monitoring Parameters          | Action Level | Limit Level | Event & Action |               |                    |
|-----------------------|--------------------------------|--------------|-------------|----------------|---------------|--------------------|
|                       |                                |              |             | NOE Issued     | Investigation | Corrective Actions |
| Air Quality           | 1-hour TSP                     | 0            | 0           | 0              | --            | --                 |
|                       | 24-hour TSP                    | 0            | 0           | 0              | --            | --                 |
| Construction Noise    | L <sub>eq(30min)</sub> Daytime | 0            | 0           | 0              | --            | --                 |
| Water Quality         | Dissolved Oxygen               | 0            | 0           | 0              | --            | --                 |
|                       | Turbidity                      | 0            | 0           | 0              | --            | --                 |
|                       | Suspended Solids               | 0            | 0           | 0              | --            | --                 |

Note: NOE – Notification of Exceedance

## SITE INSPECTION

ES04. Regular environmental site inspections had been carried out by ET joined with the Contractor and ER on **5, 12, 19 and 28 March 2013**. No non-compliance was observed during the inspections.

## ENVIRONMENTAL COMPLAINT

ES05. No environmental complaint was recorded / received in this Reporting Period.

## NOTIFICATION OF SUMMONS AND SUCCESSFUL PROSECUTIONS

ES06. No environmental summons and successful prosecutions were recorded in this Reporting Period.

## REPORTING CHANGE

ES07. There are no reporting changes in this reporting month.

## RECOMMENDATIONS

ES08. As wet season is approaching, muddy water or other water pollutants from site surface runoff into the local stream will be key environment issue. Therefore, water mitigation measures to prevent surface runoff into nearby water bodies should be paid on special attention. Moreover,

mitigation measures should be properly maintained to avoid fugitive dust emissions from loose soil surface or haul road.

- ES09. Other environmental issues such as construction noise as well as waste management, as stipulated in the Environmental Monitoring and Audit Manual should be implemented and maintained, as appropriate.

## 1. INTRODUCTION

### BACKGROUND

- 1.01 The China State Construction Engineering (Hong Kong) Limited (hereinafter “The Contractor”) has been awarded by the Drainage Services Department (DSD) the Contract DC/2009/08 *Construction of Yuen Long South Branch Sewers and Expansion of Ha Tsuen Sewage Pumping Station* (the Project) in October 2009.
- 1.02 The Project involves construction of about 9km of sewers and rising mains with diameter ranging from 200-1500mm in Yuen Long South and Ha Tsuen areas, a sewage pumping station near Shui Tsiu San Tsuen Road in Yuen Long South, expansion of existing Ha Tsuen Sewage Pumping Station. The site layout plan is shown in **Appendix A**.
- 1.03 The expansion of Ha Tsuen Sewage Pumping Station is under a statutory EIA (Register No. AEIAR-072/2003) study for “*Upgrading and expansion of San Wai Sewage Treatment Works and expansion of Ha Tsuen Sewage Pumping Station*” commissioned by the DSD. An Environmental Permit (No. EP-327/2009/A) for upgrading and expansion of Sewage Treatment Works at San Wai (excluded for the Project) and Ha Tsuen Sewage Pumping Station has been obtained by DSD in January 2009 for the relevant works.
- 1.04 According to Section 25 of the Particular Specification (PS) and the Environmental Permit No. EP-327/2009/A, the scope of monitoring includes air quality, construction noise, water quality and environmental site audit. It should be undertaken in accordance with the Environmental Monitoring and Audit Manual as part of EIA report [AEIAR-072/2003] (hereafter “the EM&A Manual”) by an independent Environmental Team (ET). Also, monitoring and audit works for landscaping and visual will be undertaken as part of the EM&A programme.
- 1.05 As the works of the Project has been commenced in different periods of time, the EM&A Report for the Project are split to two separate parts as follows:
  - (a) Expansion of Ha Tsuen Sewage Pumping Station (under Environmental Permit No.EP-327/2009/A);
  - (b) Construction of sewers and rising mains with diameter ranging from 200-1500mm in Yuen Long South and Ha Tsuen areas and a sewage pumping station near Shui Tsiu San Tsuen Road in Yuen Long South (the works without Environmental Permit)
- 1.06 Action-United Environmental Services and Consulting (AUES) has been commissioned by the Contractor as the ET to implement the relevant EM&A program. As part of the project EM&A program, baseline monitoring was conducted between 22 December 2009 and 18 January 2010 to determine the ambient environmental conditions before the project commence any major construction works at Ha Tsuen Sewage Pumping Station and it had been verified by IEC and endorsed by EPD.
- 1.07 This is the **38<sup>th</sup>** Monthly EM&A Report – *Expansion of Ha Tsuen Sewage Pumping Station* (hereinafter ‘this Report’) for designated works of the Project under Environmental Permit No.EP-327/2009/A (hereinafter ‘the EP’), covering a period from **1 to 31 March 2013**.

### REPORT STRUCTURE

- 1.08 The Monthly Environmental Monitoring and Audit (EM&A) Report is structured into the following sections:-

|                  |                                                |
|------------------|------------------------------------------------|
| <b>SECTION 1</b> | INTRODUCTION                                   |
| <b>SECTION 2</b> | PROJECT ORGANIZATION AND CONSTRUCTION PROGRESS |
| <b>SECTION 3</b> | SUMMARY OF IMPACT MONITORING REQUIREMENTS      |
| <b>SECTION 4</b> | IMPACT MONITORING RESULTS                      |
| <b>SECTION 5</b> | WASTE MANAGEMENT                               |
| <b>SECTION 6</b> | SITE INSPECTIONS                               |
| <b>SECTION 7</b> | ENVIRONMENTAL COMPLAINTS AND NON-COMPLIANCE    |

|                   |                                              |
|-------------------|----------------------------------------------|
| <b>SECTION 8</b>  | IMPLEMENTATION STATUS OF MITIGATION MEASURES |
| <b>SECTION 9</b>  | IMPACT FORECAST                              |
| <b>SECTION 10</b> | CONCLUSIONS AND RECOMMENDATIONS              |

## 2. PROJECT ORGANIZATION AND CONSTRUCTION PROGRESS

### PROJECT ORGANIZATION AND MANAGEMENT STRUCTURE

- 2.01 Organization structure and contact details of the Contractor and relevant parties with respect to the on-site environmental management are shown in [Appendix B](#).

### CONSTRUCTION PROGRESS

- 2.02 The tentative master construction programs is enclosed in [Appendix C](#). Also, the major construction activities undertaken in this reporting month are listed below:
- Construction of sewage pumping station

### SUMMARY OF ENVIRONMENTAL SUBMISSIONS

- 2.03 Summary of the relevant permits, licences, and/or notifications on environmental protection for this Project in this reporting month is presented in [Table 2-1](#).

**Table 2-1 Status of Environmental Licenses and Permits**

| Item | Description                                                                          | License/Permit Status                             |
|------|--------------------------------------------------------------------------------------|---------------------------------------------------|

- 2.04 The baseline monitoring report - *Expansion of Ha Tsuen Sewage Pumping Station* (Ref: TCS00491/09/600/R0023v6) had been verified by IEC and endorsed by EPD.

### 3. SUMMARY OF IMPACT MONITORING REQUIREMENTS

- 3.01 The Environmental Monitoring and Audit requirements are set out in the EM&A Manual. Environmental issues such as air quality, construction noise and water quality were identified as the key issues during the construction phase of expansion of Ha Tsuen Sewage Pumping Station. Also, monitoring and audit works for landscaping and visual shall be undertaken as part of the EM&A programme.

#### MONITORING PARAMETERS

- 3.02 According to the EM&A Manual, the EM&A implemented by ET has to include air quality, construction noise and water quality; the landscape and visual impact shall be monitored by a competent landscape architect. The monitoring parameters are summarized in **Table 3-1**.

**Table 3-1 Summary of Monitoring Parameters**

| Environmental Aspect                | Parameters                                                                                                                                                                                                                                                                                                                                               |
|-------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Air Quality                         | <ul style="list-style-type: none"> <li>1-hour Total Suspended Particulates (hereinafter '1-hr TSP'); and</li> <li>24-hour Total Suspended Particulates (hereinafter '24-hr TSP').</li> </ul>                                                                                                                                                             |
| Construction Noise                  | <ul style="list-style-type: none"> <li>A-weighted equivalent continuous sound pressure level (30min) (hereinafter 'L<sub>eq(30min)</sub>') during the normal working hours; and</li> <li>A-weighted equivalent continuous sound pressure level (5min) (hereinafter 'L<sub>eq(5min)</sub>') for construction work during the restricted hours.</li> </ul> |
| Water Quality – Local Stream Course | <ul style="list-style-type: none"> <li>In Situ Measurement - Dissolved Oxygen (DO) and Turbidity</li> <li>Laboratory Analysis - Suspended Solids (SS)</li> </ul>                                                                                                                                                                                         |
| Water Quality – Effluent Discharge  | <ul style="list-style-type: none"> <li>In Situ Measurement - pH value</li> <li>Laboratory Analysis - SS and Chemical oxygen demand (COD)</li> </ul>                                                                                                                                                                                                      |
| Landscape and Visual Resources      | <ul style="list-style-type: none"> <li>Vegetation survey undertaken on an "area" basis to identify representative types and species composition;</li> <li>Assessment of landscape character; and</li> <li>Tree survey report (The inspection findings will be submitted separately).</li> </ul>                                                          |

#### MONITORING LOCATIONS

##### Monitoring Location Stipulation in the EM&A Manual

- 3.03 According to *EM&A Manual Sections 2.2.1.18, 3.4.1.1 & 4.4.1.4*, and Figures 2.1, 2.2, 3.1, 3.2 and 4.2, there are four air quality and noise monitoring stations and one water quality monitoring station identified as sensitive receivers during construction phase of the Project. For the four designated air quality and noise monitoring stations, two are located within the San Wai STW and other two are within the existing Ha Tsuen Sewage Pumping Station. Also, a local stream course of water quality monitoring station is identified in Tin Shui Wai Nullah. Besides, the area of landscape and visual monitoring is recommended for the entire selected route and within compounds in accordance with *the EM&A Manual Section 6.3.1.1*.

##### Air Quality

- 3.04 In order to identify and seek for the access for the air quality monitoring locations designated in the EM&A Manual, site inspection and the premises request about the monitoring locations have been carried out by the Contractor and ET. The designated monitoring location Yeung Chun Pui Care & Attention Home located at Sha Chau Lei Road has been identified, but the premise was granted by CEDD existing project CV/2008/03 for air quality monitoring. Also, the access to premises at the other designated air quality monitoring station at Tin Shing Court was refused by the incorporated owners.
- 3.05 In this case, the alternative location Ho Tak Sum Primary School as one sensitive receiver

mentioned in the EIA Report (Register No. AEIAR-072/2003) was proposed to be the replacement to undertake air quality monitoring during the expansion works of Ha Tsuen Sewage Pumping Station in accordance with the EM&A Manual Clauses 2.2.1.20. Simultaneously, air quality monitoring at the designated location Yeung Chun Pui Care & Attention Home was proposed to be performed. The proposal and recommendation was agreed by IEC and as endorsed by EPD.

- 3.06 As requested by the occupants of Yeung Chun Pui Care & Attention Home (AM2) due to safety reasons, the High Volume Air Sampler (HVS) for AM2 was relocated to a nearby location on 27 October 2011. Details of the relocation were given in the October 2011 Monthly EM&A Report.
- 3.07 As reported to the RE and IEC on 16 October 2012, the power supply for the HVS at AM2 was disconnected since the office that provides the electric support has been dismantled. A new location AM2(a) was therefore proposed. The proposal of new location AM2(a) has been formally submit to EPD on 14 November 2012 prior agreement by the RE and IEC. No further comments were received from EPD regards on the proposal.
- 3.08 Details of monitoring stations are presented in **Table 3-2** and illustrated in **Appendix D**.

**Table 3-2 Air Quality Monitoring Stations**

| Monitoring Location ID | Identified Address                                                                          | Remarks                                                                        |
|------------------------|---------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------|
| AM1                    | Ho Tak Sum Primary School                                                                   | Replace the Designated Monitoring Station Tin Shing Court                      |
| AM2(a)                 | RE Site Office which opposite to the original location Yeung Chun Pui Care & Attention Home | Replace the Designated Monitoring Station Yeung Chun Pui Care & Attention Home |

Construction Noise

- 3.09 Similar to the air quality monitoring, the construction noise monitoring stations undertaken for EM&A programme is agreed by IEC and as endorsed by EPD.
- 3.10 Details of the monitoring stations are presented in **Table 3-3** and shown in **Appendix D**.

**Table 3-3 Construction Noise Monitoring Stations**

| Monitoring Location ID | Identified Address                   | Remarks                                                   |
|------------------------|--------------------------------------|-----------------------------------------------------------|
| NM1                    | Ho Tak Sum Primary School            | Replace the Designated Monitoring Station Tin Shing Court |
| NM2                    | Yeung Chun Pui Care & Attention Home | Designated in the EM&A Manual                             |

Water Quality

- 3.11 One designated location of a local stream course, Tin Shui Wai Nullah, is proposed to carry out water quality monitoring in accordance with the EM&A Manual. The designated sampling location R1 is located at the midpoint between two pedestrian flyovers athwart Tin Shui Wai Nullah, which are 320 meters apart. There are technical difficulty and safety issue to sample at R1. So, a new sampling point located at approximately 160m upstream of the R1 (hereinafter as R1b) was therefore proposed for the local stream water quality impact monitoring and was verified by IEC, without comment from EPD.
- 3.12 Details of the monitoring station are presented in **Table 3-4** and shown in **Appendix D**.

**Table 3-4 Local Stream Water Quality Monitoring Station**

| Monitoring Location ID | Identified Address                                 | Remarks                                                                                                                                          |
|------------------------|----------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| R1b                    | The athwart Tin Shui Wai Nullah pedestrian flyover | About 160 m upstream from the designated location as stipulated in the EM&A Manual and is closer to the existing Ha Tsuen Sewage Pumping Station |

- 3.13 According to the EM&A Manual Section 4.3.1.5, the effluent water quality monitoring should be carried out at representative discharge point(s) where effluent from the construction sites is discharged into the local water course after being treated in a wastewater treatment system.

Landscape and Visual

- 3.14 The inspection area would be around the works area at Ha Tsuen Sewage Pumping Station. During construction regular inspections of the retained and transplanted trees should be made to ensure the effectiveness of the hoarding.

**MONITORING FREQUENCY**

- 3.15 According to the EM&A Manual Sections 2.2.1.27, 3.6 and 4.4.1.8, impact monitoring covers air quality, noise and water quality of local stream course.

Air Quality Monitoring

Parameters: 1-hour TSP and 24-hour TSP.

Frequency: Once every six days for 24-hour TSP and three times every six days for 1-hour TSP.

Duration: Throughout the construction period.

Noise Monitoring

Parameters: One set of  $L_{eq(30min)}$  as 6 consecutive  $L_{eq(5min)}$  between 0700-1900 hours on normal weekdays.

$L_{eq(5min)}$ ,  $L_{10}$  and  $L_{90}$  during the construction undertaken during Restricted Hours (19:00 to 07:00 hours next of normal working day and full day of public holiday and Sunday)

Frequency: Once every six days during 0700-1900 hours on normal weekdays. Restricted Hour monitoring should depend on conditions stipulated in Construction Noise Permit.

Duration: Throughout the construction period.

Water Quality Monitoring of Local Stream Course

Parameters: DO, Turbidity and SS.

Frequency: 3 days per week.

Depths: mid-depth

Duration: Throughout the construction period and the interval between 2 sets of monitoring is not less than 36 hours

Water Quality Monitoring of Effluent Discharge

Parameters: pH, COD and SS.

Frequency: Depend on conditions stipulated in discharge license under **Section 20** of the **Water Pollution Control Ordinance**.

Duration: Throughout the construction period

Landscape and Visual Monitoring

Parameters: Site inspection with broad scope of audit as listed in the EM&A Manual

Frequency: Once every 2 weeks

Duration: Throughout the construction period

- 3.16 Post-project monitoring will be performed at water quality monitoring station of the local stream course. The requirements that are same as baseline monitoring are presented below:

Parameters: DO, Turbidity and SS.

Frequency: 3 days per week.

Depths: mid-depth

Duration: 4 weeks and the interval between 2 sets of monitoring is not less than 36 hours upon completion of the construction activities

#### **MONITORING METHODOLOGY AND EQUIPMENT**

##### **Air Quality**

- 3.17 The air quality monitoring equipment for 1-hour and 24-hour TSP are listed in **Table 3-5** and the specification of equipment was submitted before the EM&A programme commencement.

**Table 3-5 Air Quality Monitoring Equipment**

| <b>Equipment</b>        | <b>Description</b>                      |
|-------------------------|-----------------------------------------|
| <b>1-hour TSP</b>       |                                         |
| Portable dust meter     | TSI DustTrak Aerosol Monitor Model 8520 |
| <b>24-hour TSP</b>      |                                         |
| High Volume Air Sampler | Thermo Anderson GS 2310 HVS             |
| Calibration Kit         | TISCH Model TE-5025A                    |

##### 1-hour TSP

- 3.18 The 1-hour TSP monitoring is conducted with a portable dust meter, brand named, TSI DustTrak Aerosol Monitor Model 8520 which is a portable, battery-operated laser photometer. The 1-hour TSP meter provides a real time 1-hour TSP measurement based on 90° light scattering. The 1-hour TSP monitor consists of the following:
- (a.) A pump to draw sample aerosol through the optic chamber where TSP is measured;
  - (b.) A sheath air system isolates the aerosol in the chamber to keep the optics clean for maximum reliability; and
  - (c.) A built-in data logger compatible with Windows based program to facilitate data collection, analysis and reporting.
- 3.19 The 1-hour TSP meter is used within the valid period following manufacturer's Operation and Service Manual.

##### 24-hour TSP

- 3.20 The equipment used for 24-hour TSP measurement is Thermo Andersen Model GS2310 TSP high volume air sampling system, which complied with EPA Code of Federal Regulation, Appendix B to Part 50. The High Volume Air Sampler (HVS) consists of the following:
- (a.) An anodized aluminum shelter;
  - (b.) A 8"x10" stainless steel filter holder;
  - (c.) A blower motor assembly;
  - (d.) A continuous flow/pressure recorder;
  - (e.) A motor speed-voltage control/elapsed time indicator;
  - (f.) A 7-day mechanical timer; and
  - (g.) A power supply of 220V/50 Hz.
- 3.21 The HVS was operated and calibrated on a regular basis in accordance to the manufacturer's instruction using the NIST-certified standard calibrator (Tisch Calibration Kit Model TE-5025A). One point checking would be carried out in two-month interval while full point checking every six months.
- 3.22 24-hour TSP was collected by the ET on filters of HVS and quantified by a local HOKLAS accredited laboratory, ALS Technichem (HK) Pty Ltd (ALS), upon receipt of the samples. The

ET kept all the sampled 24-hour TSP filters in normal room conditions for six months before disposal.

### Noise

- 3.23 The equipment for noise monitoring is summarized in **Table 3-6** and the specification was submitted before the EM&A programme commencement.

**Table 3-6 Noise Monitoring Equipment**

| Equipment                     | Description      |
|-------------------------------|------------------|
| Integrating Sound Level Meter | B&K Type 2238    |
| Calibrator                    | B&K Type 4231    |
| Portable Wind Speed Indicator | Testo Anemometer |

- 3.24 Sound level meters listed above comply with the International Electrotechnical Commission Publications 651: 1979 (Type 1) and 804: 1985 (Type 1) specifications, as recommended in Technical Memorandum issued under the Noise Control Ordinance (NCO).
- 3.25 Noise measurements were taken in terms of the A-weighted equivalent continuous sound pressure level ( $L_{eq}$ ) measured in decibels (dB). Supplementary statistical results ( $L_{10}$  and  $L_{90}$ ) were also obtained for reference.
- 3.26 During the construction noise monitoring, all noise measurements were performed with the meter set to FAST response and on the A-weighted equivalent continuous sound pressure level ( $L_{eq}$ ).  $L_{eq(30min)}$  in six consecutive  $L_{eq(5min)}$  measurements were used as the monitoring parameter for the time period between 0700-1900 hours on weekdays; and also  $L_{eq(15min)}$  in three consecutive  $L_{eq(5min)}$  measurements were used as monitoring parameter for other time periods (e.g. during restricted hours).
- 3.27 No noise extension cable was used to link the microphone with sound level meter for the measurement. The microphone was set about 1.2m height above ground and oriented such that it was pointed to the site with the microphone facing perpendicular to the line of sight. The windshield was fitted for all measurements. The monitoring locations NM1 and NM2 were normally set in a free field situation.
- 3.28 In prior of impact noise measurement, the accuracy of the sound level meter was checked using an acoustic calibrator generating a known sound pressure level at a known frequency. The checking was performed before and after the noise measurement. Also, the wind speed was checked with a portable wind speed meter. No fog and rain were encountered during the noise measurement, and the wind speed and gusts were also below 5m/s and 10m/s respectively.

### Water quality of Local Stream Course

- 3.29 The equipment for water quality monitoring is summarized in **Table 3-7** and the specifications were submitted before the EM&A programme commencement.

**Table 3-7 Water Quality Monitoring Equipment**

| Equipment              | Model / Description                                     |
|------------------------|---------------------------------------------------------|
| Water Sampler          | Teflon bailer / bucket                                  |
| Thermometer & DO meter | YSI Pro 20                                              |
| Turbidimeter           | Turbidimeter HACH 2100Q                                 |
| Sample Container       | High density polythene bottles (provided by laboratory) |
| Storage Container      | 'Willow' 33-litter plastic cool box                     |

- 3.30 Water quality monitoring was conducted at mid-depth of the water column.

### Dissolved Oxygen (DO)

- 3.31 A multiple meter, brand named YSI Pro 20 was used for in-situ DO measurement, which automates the measurements of temperature, dissolved oxygen and dissolved oxygen saturation simultaneously. The multiple meter is capable of measuring DO in the range of 0 - 20 mg/L. Before each round of monitoring, the multiple meter, is calibrated by the wet bulb method with distilled water. Calibration of the equipment is performed by ALS on quarterly basis.

3.32 Turbidity

A portable turbidimeter, brand named HACH Turbidimeter 2100Q was used for in-situ turbidity measurement. The turbidity meter is capable of measuring turbidity in the range of 0 – 1000 NTU. Calibration of the equipment is performed by ALS on quarterly basis.

Suspended Solids (SS)

- 3.33 SS was determined by ALS upon receipt of the water samples using HOKLAS accredited analytical methods namely ALS Method EA-025.

Water Sampler

- 3.34 Water samples were collected by the ET using a plastic sampler, which has a volume of not less than 2 litres and can be sealed at both ends with cups to prevent metal contamination. The sampler was rinsed before collection with the sample to be taken. The water sample was collected at mid-depth level at the selected monitoring location for SS determination.

Sample Container

- 3.35 Water sample was contained in screw-cap PE (Poly-Ethylene) sampling bottle (1,000ml) to be provided by HOKLAS accredited laboratory ALS. Where appropriate, the sampling bottle was rinsed with the water to be contained in prior. Water sample was then transferred from the sampler to the sample bottles to 95% bottle capacity to allow possible volume expansion during delivery and storage.

Sample Storage

- 3.36 A 'Willow' 33-liter plastic cool box packed with ice was used to preserve the collected water samples prior to arrival at the laboratory. The water temperature of the cool box was maintained at a temperature as close to 4°C as possible without being frozen. Samples were delivered to laboratory within 24 hours and analyzed within 2 days of delivery or within the holding time as advised by the laboratory.

**EQUIPMENT CALIBRATION**

- 3.37 Calibration of the HVS was performed upon installation in accordance with the manufacturer's instruction using the NIST-certified standard calibrator (Tisch Calibration Kit Model TE-5025A). The calibration data are properly documented and the records are maintained by ET for future reference.
- 3.38 The 1-hour TSP meter was calibrated by the supplier prior to purchase. Zero response of the equipment was checked before and after each monitoring event. In-house calibration with the High Volume Sampler (HVS) in same condition was undertaken in yearly basis.
- 3.39 The sound level meter and calibrator are calibrated and certified by a laboratory accredited under HOKLAS or any other international accreditation scheme at yearly basis.
- 3.40 All updated calibration certificates of the monitoring equipment used for the impact monitoring program in this Reporting Month are attached in [Appendix E](#).

**METEOROLOGICAL INFORMATION**

- 3.41 The meteorological information in this reporting month was downloaded from Lau Fau Shan Station of the Hong Kong Observatory (HKO) and presented in [Appendix F](#).

**DATA MANAGEMENT AND DATA QA/QC CONTROL**

- 3.42 The impact monitoring data are handled by the ET's systematic data recording and management,

which complies with in-house Quality Management System. Standard Field Data Sheets (FDS) are used in the impact monitoring program.

- 3.43 The monitoring data recorded in the equipment e.g. 1-hour TSP meters and noise meters are downloaded directly from the equipment at the end of each monitoring day. The downloaded monitoring data are input into a computerized database properly maintained by the ET. The laboratory results or water quality in-situ measurement records are input directly into the computerized database and QA/QC checked by personnel other than those who input the data.
- 3.44 For monitoring activities that require laboratory analysis, the local laboratory follows the QA/QC requirements as set out under the HOKLAS scheme for all laboratory testing.

#### DETERMINATION OF ACTION/LIMIT (A/L) LEVELS

- 3.45 According to the EM&A Manual, the air quality, construction noise and water quality criteria were set up, namely Action and Limit levels are listed in **Tables 3-8, 3-9** and **3-10** as below:-

**Table 3-8 Action and Limit Levels for Air Quality Monitoring**

| Monitoring Location | Action Level ( $\mu\text{g}/\text{m}^3$ ) |         | Limit Level ( $\mu\text{g}/\text{m}^3$ ) |         |
|---------------------|-------------------------------------------|---------|------------------------------------------|---------|
|                     | 1-hour                                    | 24-hour | 1-hour                                   | 24-hour |
| AM1                 | 305                                       | 162     | 500                                      | 260     |
| AM2                 | 310                                       | 190     | 500                                      | 260     |

**Table 3-9 Action and Limit Levels for Construction Noise**

| Monitoring Location | Action Level                                        | Limit Level in dB(A)                                                                                                                              |
|---------------------|-----------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------|
|                     | 0700-1900 hrs on normal weekdays                    |                                                                                                                                                   |
| NM1                 | When one or more documented complaints are received | 70 dB(A) of $L_{eq(30min)}$ during normal hours from 0700 to 1900 hours on normal weekdays, reduced to 65 dB(A) during school examination periods |
| NM2                 |                                                     | 70 dB(A) of $L_{eq(30min)}$ during normal hours from 0700 to 1900 hours on normal weekdays                                                        |

Note: \* Reduces to 65 dB(A) during the school examination periods.

**Table 3-10 Action and Limit Levels for a Local Stream Water Quality Monitoring (R1b)**

| Parameter       | Action Level | Limit Level                      |
|-----------------|--------------|----------------------------------|
| DO (mg/L)       | 4.6          | 4 mg/L or 40% saturation at 15°C |
| Turbidity (NTU) | 15.6         | 16.2                             |
| SS (mg/L)       | 31.5         | 31.9                             |

- 3.46 Should non-compliance of the environmental quality criteria occurs, remedial actions will be triggered according to the Event and Action Plan enclosed in [Appendix G](#).

#### 4. IMPACT MONITORING RESULTS

- 4.01 The impact monitoring schedule for air quality, noise and water quality in this Reporting Period is shown in [Appendix H](#). The monitoring results are presented in the following sub-sections.

##### RESULTS OF AIR QUALITY MONITORING

- 4.02 In this Reporting Period, a total of **10** events of 24-hour TSP monitoring and **30** events of 1-hour TSP monitoring were undertaken and the results are summarized in [Tables 4-1 and 4-2](#). The 24-hour TSP raw data sheets are shown in [Appendix I](#). Also, the graphical plots for the 24-hour and 1-hour TSP monitoring result are shown in [Appendix J](#).

**Table 4-1 Summary of 24-hour and 1-hour TSP Monitoring Results – AM1**

| Date            | 24-hour TSP ( $\mu\text{g}/\text{m}^3$ ) | 1-hour TSP ( $\mu\text{g}/\text{m}^3$ ) |            |                               |                               |                               |

| Average (Range) | <b>73 (35-134)</b>                       | Average (Range)                         |            | <b>123 (56 – 214)</b>         |                               |                               |

- 4.03 As shown in [Tables 4-1 and 4-2](#), 1-hour and 24-hour TSP monitoring results fluctuated well below the Action Level in this Reporting Period.
- 4.04 The meteorological data during the impact monitoring days are summarized in [Appendix F](#).

##### RESULTS OF CONSTRUCTION NOISE MONITORING

- 4.05 The noise monitoring results conducted at the designated locations are summarized in [Tables 4-3 and 4-4](#). The graphical plots of the monitoring results are shown in [Appendix J](#). The sound level were measured in a free field situation and, therefore, a façade correction of +3 dB(A) was added according to acoustical principles and EPD guidelines.

| 9-Mar-13           | 11:06      | 62.7                                      | 65.6                                      | 64.1                                      | 64.8                                      | 65.2                                      | 66.1                                      | 64.9                    | 67.9                                  |
| 15-Mar-13          | 10:19      | 64.7                                      | 61.8                                      | 61.2                                      | 61.0                                      | 60.9                                      | 63.6                                      | 62.5                    | 65.5                                  |
| 21-Mar-13          | 11:01      | 62.8                                      | 59.5                                      | 62.6                                      | 60.6                                      | 63.9                                      | 59.1                                      | 61.8                    | 64.8                                  |
| 27-Mar-13          | 13:01      | 65.2                                      | 63.0                                      | 63.7                                      | 61.7                                      | 61.8                                      | 60.7                                      | 62.9                    | 65.9                                  |
| <b>Limit Level</b> |            | -                                         |                                           |                                           |                                           |                                           |                                           | <b>70 dB(A)</b>         |                                       |

(\*) A façade correction of +3 dB(A) has been added according to acoustical principles and EPD guidelines.

- 4.06 In this Reporting Period, no noise complaint (which is an Action Level exceedance) was received. As shown in [Tables 4-3](#) and [4-4](#), no Limit level exceedance was recorded and no corrective action was therefore required. The graphical plots of the monitoring results are shown in [Appendix J](#).

#### RESULTS OF WATER QUALITY MONITORING – LOCAL STREAM COURSE

- 4.07 In this Reporting Period, a total of **12** sampling days were performed for water quality monitoring at R1b of the local stream course, Tin Shui Wai Nullah. The monitoring results including in-situ measurements and laboratory testing results are provided in [Appendix I](#). The graphical plots of the monitoring results are shown in [Appendix J](#).
- 4.08 Monitoring results of 3 key parameters: dissolved oxygen (DO), turbidity and suspended solids (SS) in this Reporting Period, are summarized in [Table 4-5](#).

**Table 4-5 Summaries of Water Quality Results – R1b**

| Sampling date | DO conc. (mg/L) | Turbidity (NTU) | SS (mg/L) |
|---------------|-----------------|-----------------|-----------|
| 2-Mar-13      | 6.8             | 14.3            | 11.0      |
| 4-Mar-13      | 9.1             | 9.8             | 24.0      |
| 6-Mar-13      | 7.7             | 12.5            | 30.0      |
| 9-Mar-13      | 5.4             | 5.8             | 18.0      |
| 11-Mar-13     | 4.7             | 6.9             | 18.0      |
| 13-Mar-13     | 5.1             | 11.7            | 26.0      |
| 15-Mar-13     | 5.8             | 7.4             | 9.0       |
| 18-Mar-13     | 5.7             | 11.8            | 24.0      |
| 21-Mar-13     | 5.0             | 12.4            | 11.0      |
| 23-Mar-13     | 4.7             | 10.1            | 11.0      |
| 25-Mar-13     | 5.1             | 8.8             | 13.0      |
| 27-Mar-13     | 4.8             | 13.5            | 17.0      |

- 4.09 During the Reporting Period, field measurements showed that water temperature and pH value of the local stream are within **22.3°C** to **25.1°C** and **8.4 to 8.9** respectively.
- 4.10 In Reporting Period, no exceedance of water quality monitoring recorded at water samples

collected from location “R1b”. No NOE was therefore issued and no corrective measures recommended.

#### **RESULTS OF LANDSCAPE AND VISUAL IMPACT**

- 4.11 The landscape and visual impacts monitoring results and findings will be submitted separately as a stand-alone document.

#### **RESULTS OF EFFLUENT MONITORING**

- 4.12 Monitoring of effluent quality should follow the requirements specified in Section 4.3 of the approved EM&A Manual. A discharge license under Water Pollution Control Ordinance has been obtained by the Contractor upon commencement of the Project. The licensee shall perform self-monitoring as and when required by the Authority.
- 4.13 Since no effluent discharge was made in this Reporting Period, no effluent quality monitoring was carried out by the Contractor.

## 5. WASTE MANAGEMENT

- 5.01 Waste management was carried out by an on-site Environmental Officer or an Environmental Supervisor from time to time.

### RECORDS OF WASTE QUANTITIES

- 5.02 All types of waste arising from the construction work are classified into the following:
- Construction & Demolition (C&D) Material;
  - Chemical Waste;
  - General Refuse; and
  - Excavated Soil.
- 5.03 The quantities of waste for disposal in this Reporting Period are summarized in [Tables 5-1](#) and [5-2](#) and the Monthly Summary Waste Flow Table is shown in [Appendix K](#). Whenever possible, materials were reused on-site as far as practicable.

**Table 5-1 Summary of Quantities of Inert C&D Materials**

| Type of Waste                                      | Quantity | Disposal Location |
|----------------------------------------------------|----------|-------------------|
| C&D Materials (Inert) (m <sup>3</sup> )            | 0        | -                 |
| Reused in this Contract (Inert) (m <sup>3</sup> )  | 0        | -                 |
| Reused in other Projects (Inert) (m <sup>3</sup> ) | 0        | -                 |
| Disposal as Public Fill (Inert) (m <sup>3</sup> )  | 1925     | Tuen Mun Area 38  |

**Table 5-2 Summary of Quantities of C&D Wastes**

| Type of Waste                           | Quantity | Disposal Location |
|-----------------------------------------|----------|-------------------|
| Recycled Metal (kg)                     | 0        | -                 |
| Recycled Paper / Cardboard Packing (kg) | 0        | -                 |
| Recycled Plastic (kg)                   | 0        | -                 |
| Chemical Wastes (kg)                    | 0        | -                 |
| General Refuses (m <sup>3</sup> )       | 1        | NENT              |

- 5.04 To control over the site performance on waste management, the Contractor shall ensure that all solid and liquid waste management works are in full compliance with the relevant license/permit requirements, such as the effluent discharge license and the chemical waste producer registration. The Contractor is also reminded to implement the recommended environmental mitigation measures according to the EM&A Manual based on actual site conditions.

## 6. SITE INSPECTIONS

- 6.01 According to the Environmental Monitoring and Audit Manual, the environmental site inspection should be formulated by ET Leader. Regular environmental site inspections had been carried out by ET joined with the Contractor and ER to confirm the environmental performance. During this Reporting Period, the joint site inspection was undertaken on **5, 12, 19 and 28 March 2013** to evaluate the site environmental performance. No non-compliance was noted.
- 6.02 Observations for the site inspections and monthly audit found at Ha Tsuen Sewage Pumping Station within this Reporting Period are summarized in **Table 6-1** and inspection checklists are attached in **Appendix L**.

**Table 6-1 Site Observations in the Reporting Month**

| <b>Date</b>   | <b>Findings / Deficiencies</b>                                                                                                                          | <b>Follow-Up Status</b>                                                                  |
|---------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------|
| 5 March 2013  | - Dusty stockpile was observed in Ha Tsuen Sewage Pumping Station, the Contractor should cover it with impervious sheet or remove it off site properly. | The sand stockpile in Ha Tsuen Sewage Pumping Station has been removed on 12 March 2013. |
| 12 March 2013 | No environmental issue was observed during site inspection.                                                                                             | N.A.                                                                                     |
| 19 March 2013 | No environmental issue was observed during site inspection.                                                                                             | N.A.                                                                                     |
| 28 March 2013 | - Dusty stockpile was observed in Ha Tsuen Sewage Pumping Station, the Contractor should cover it with impervious sheet or remove it off site properly. | To be followed.                                                                          |

## 7. ENVIRONMENTAL COMPLAINTS AND NON-COMPLIANCE

### ENVIRONMENTAL COMPLAINT, SUMMONS AND PROSECUTION

- 7.01 No environmental complaint, summons and prosecution was received in this Reporting Period. The statistical summary table of environmental complaint is presented in [Tables 7-1, 7-2](#) and [7-3](#).

**Table 7-1 Statistical Summary of Environmental Complaints**

| Reporting Period | Environmental Complaint Statistics |            |                  |
|------------------|------------------------------------|------------|------------------|
|                  | Frequency                          | Cumulative | Complaint Nature |
| Feb – Dec 2010   | 3                                  | 3          | Air(2)/Noise(1)  |
| Jan – Dec 2011   | 0                                  | 3          | NA               |
| Jan – Dec 2012   | 0                                  | 3          | NA               |
| Jan – Feb 2013   | 0                                  | 3          | NA               |
| Mar 2013         | 0                                  | 3          | NA               |

**Table 7-2 Statistical Summary of Environmental Summons**

| Reporting Period | Environmental Summon Statistics |            |                  |
|------------------|---------------------------------|------------|------------------|
|                  | Frequency                       | Cumulative | Complaint Nature |
| Feb – Dec 2010   | 0                               | 0          | NA               |
| Jan – Dec 2011   | 0                               | 0          | NA               |
| Jan – Dec 2012   | 0                               | 0          | NA               |
| Jan – Feb 2013   | 0                               | 0          | NA               |
| Mar 2013         | 0                               | 0          | NA               |

**Table 7-3 Statistical Summary of Environmental Prosecution**

| Reporting Period | Environmental Prosecution Statistics |            |                  |
|------------------|--------------------------------------|------------|------------------|
|                  | Frequency                            | Cumulative | Complaint Nature |
| Feb – Dec 2010   | 0                                    | 0          | NA               |
| Jan – Dec 2011   | 0                                    | 0          | NA               |
| Jan – Dec 2012   | 0                                    | 0          | NA               |
| Jan – Feb 2013   | 0                                    | 0          | NA               |
| Mar 2013         | 0                                    | 0          | NA               |

## **8. IMPLEMENTATION STATUS OF MITIGATION MEASURES**

8.01 The environmental mitigation measures that recommended in the Environmental Monitoring and Audit Manual covered the issues of dust, noise and waste and they are summarized as following:

### **Dust Mitigation Measure**

- (a) The contractor shall frequently clean and water the site to minimize fugitive dust emissions.
- (b) Effective water sprays shall be used during the delivery and handling of aggregate, and other similar materials, when dust is likely to be created and to dampen all sited material during dry and windy weather.
- (c) Watering of exposed surfaces shall be exercised as often as possible depending on the circumstance.
- (d) Areas within the site where there is regular movement of vehicles must be regularly watered as often as necessary for effective suppression of dust or as often as directed by the Engineer.
- (e) Where dusty materials are being discharged to vehicle from a conveying system at a fixed transfer point, a three-sided roofed enclosure with a flexible curtain across the entry shall be provided. Exhausted fans shall be provided for this enclosure and vented to a suitable fabric filter system.
- (f) The Contractor shall restrict all motorized vehicles within the site, excluding those on public roads, to a maximum speed of 5km per hour and confine haulage and delivery vehicles to designated roadways inside the site.
- (g) Wheel washing facilities shall be installed and used by all vehicles leaving the site. No earth, mud, debris, dust and the like shall be deposited on public roads, water in wheel cleaning facility shall be changed at frequent intervals and sediments shall be removed regularly. The Contractor shall submit detailed proposals for the wheel cleaning facilities to the Engineer prior to construction of the facility. Such wheel washing facilities shall be usable prior to any earthworks excavating activity in the site.
- (h) Any material dropped in the roads will need to be cleaned up immediately to prevent dust nuisance.

### **Noise Mitigation Measure**

- (a) During construction of the Project, temporary noise barriers should be used in order to reduce the noise impacts emanating from the construction sites on nearby Noise Sensitive Receivers (NSRs). The location of the temporary noise barriers should be along the site boundary of the expanded portion of Ha Tsuen Sewage Pumping Station.
- (b) Noisy equipment and activities should be sited by the Contractor as far from close-proximity sensitive receivers as practical. Prolonged operation of noisy equipment close to dwellings and schools should be avoided.
- (c) The Contractor should minimize construction noise exposure to the schools. Especially during examination periods, the Contractor should not carry out any construction activities. Activities shall be restricted to transit movements by construction vehicles during this period.
- (d) Noisy plant or processes should be replaced by quieter alternatives where possible. Silenced diesel and gasoline generators and power units, as well as silenced and super-silenced air compressors should be used.
- (e) Noisy activities should be scheduled to minimize exposure of nearby sensitive receivers to high levels of construction noise. For example, noisy activities can be scheduled for midday, or at times coinciding with periods of high background noise (such as during peak traffic hours).
- (f) Idle equipment should be turned off or throttled down. Noisy equipment should be properly maintained and used no more often than is necessary.
- (g) The power units of non-electric stationary plant and earth-moving plant should be quietened by vibration isolation and partial or full acoustic enclosures for individual noise-generating components.

- (h) Construction activities should be planned so that parallel operation of several sets of equipment close to a given receiver is avoided, thus reducing the cumulative impacts between operations. The numbers of operating items of powered mechanical equipment should be minimized.
- (i) Construction plant should be properly maintained (well-greased, damage and worn parts promptly replaced) and operated. Construction equipment often has silencing measures built in or added on, e.g. bulldozer silencers, compressor panels, and mufflers. Silencing measures should be properly maintained and utilized. Where possible, rubber or damping materials should be introduced between metal panels to avoid rattle and reverberation of noise.
- (j) Equipment known to emit sound strongly in one direction, should where possible, be oriented so that the noise is directed away from nearby NSRs.
- (k) Material stockpiles and other structures (such as site offices) should be effectively utilized, where practicable, to screen noise from on-site construction activities.
- (l) The Contractor should devise, arrange methods of working and carry out the works in such manner as to minimize noise impacts on the surrounding environment, and should provide experienced personnel with suitable training to ensure that these measures are implemented properly.

#### **Water Quality Mitigation Measures**

- (a) Exposed stockpiles should be covered with tarpaulin or impervious sheets before a rainstorm occurs;
- (b) The exposed soil surfaces should also be properly protected to minimize dust emission;
- (c) The stockpiles of materials should be placed in the locations away from the drainage channel so as to avoid releasing materials into the channel;
- (d) Wheel washing facilities should be provided at site exits to ensure that earth, mud and debris would not be carried out of the works areas by vehicles;
- (e) Provision of site drainage systems and treatment facilities would be required to minimize the water pollution;
- (f) A discharge licence needs to be applied from EPD for discharging effluent from the construction site;
- (g) The treated effluent quality is required to meet the requirements specified in the discharge licence;
- (h) Provision of chemical toilets is required to collect sewage from workforce. The chemical toilets should be cleaned on a regular basis;
- (i) Wastewater generated from kitchens should be discharged to public foul sewers or collected in a temporary storage tank if connection to public foul sewers is not feasible;
- (j) A licensed waste collector should be employed to clean the chemical toilets and temporary storage tank on a regular basis;
- (k) Illegal disposal of chemicals should be strictly prohibited;
- (l) Registration as a chemical waste producer is required if chemical wastes are generated and need to be disposed of. The Waste Disposal Ordinance (Cap 354) and its subsidiary regulations in particular the Waste Disposal (Chemical Waste) (General) Regulation should be observed and complied with for control of chemical wastes;
- (m) Disposal of chemical wastes should be carried out in compliance with the Waste Disposal Ordinance. The Code of Practice on the Packaging, Labelling and Storage of Chemical Wastes published under the Waste Disposal Ordinance should be used as a guideline for handling chemical wastes; and
- (n) The impact from accidental spillage of chemicals can be effectively controlled through good management practices.

#### **Waste Mitigation Measures**

- (a) Segregation and storage of different types of waste in different containers, skips or stockpiles to enhance reuse or recycling of materials and their proper disposal;

- (b) To encourage collection of aluminium cans by individual collectors, separate bins should be provided to segregate this waste from other general refuse generated by the workforce;
- (c) Any unused chemicals or those with remaining functional capacity should be recycled;
- (d) Prior to disposal of C&D waste, it is recommended that wood, steel and other metals be separated for re-use and/or recycling and inert waste as fill material to minimize the quantity of waste to be disposed of to landfill;
- (e) Proper storage and site practices to minimize the potential for damage or contamination of construction materials; and
- (f) Plan and stock construction materials carefully to minimize amount of waste generated and avoid unnecessary generation of waste.

#### **Landscape and Visual Mitigation Measures**

- (a) Prior to construction work the detailed tree survey should have been completed and, if appropriate, trees to be transplanted moved to their final positions.
- (b) The transplants and existing trees to be retained should be properly protected from damage by stout hoarding positioned as directed by a qualified Landscape Architect.
- (c) Hoarding will help screening the construction work from the view of passers by.
- (d) Typically a minimum of 4 months should be allowed prior to construction to prepare trees for transplanting.
- (e) During construction regular inspections of the retained and transplanted trees should be made to ensure the effectiveness of the hoarding.
- (f) Any topsoil excavated in the course of the works shall be stored and protected on site for reuse for restoration and screen planting works.

8.02 The Contractor had been implementing the required environmental mitigation measures according to the Environmental Monitoring and Audit Manual subject to the site condition. Environmental mitigation measures generally implemented by the Contractor in this Reporting Period are summarized in [Table 8-1](#).

**Table 8-1 Environmental Mitigation Measures**

| <b>Issues</b> | <b>Environmental Mitigation Measures</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

## **9. IMPACT FORECAST**

### **KEY ISSUES FOR THE COMING MONTH**

9.01 Key issues to be considered in the coming month include:

- Implementation of dust suppression measures at all times;
- Potential wastewater impact due to surface runoff;
- Potential fugitive dust impact from the dry/loose/exposure soil surface/dusty material;
- Disposal of empty engine oil containers within site area;
- Ensure dust suppression measures are implemented properly;
- Sediment catch-pits and silt removal facilities should be regularly maintained;
- Management of chemical wastes;
- Discharge of site effluent to the nearby nullah or storm drainage, stockpiling or disposal of materials, and any dredging or construction area in the nullah are prohibited;
- Follow-up of improvement on general waste management issues; and
- Implementation of construction noise preventative control measures.

## 10. CONCLUSIONS AND RECOMMENTATIONS

### CONCLUSIONS

- 10.01 This is the **38<sup>th</sup>** Monthly EM&A Report for the designated work of the Project, covering the construction period from **1** to **31 March 2013**.
- 10.02 No 1-hour TSP and 24-hour TSP monitoring results that triggered the Action or Limit Level was recorded in this Reporting Period.
- 10.03 No noise complaint (which is an Action Level exceedance) was received and no construction noise measurement results exceeded the Limit Level were recorded in this Reporting Period.
- 10.04 No Action/Limit Level exceedance was recorded for the water quality monitoring during Reporting Period.
- 10.05 No effluent quality monitoring was carried out by the Contractor in this Reporting Period.
- 10.06 No documented complaint, notification of summons or successful prosecution was received.
- 10.07 Regular environmental site inspections had been carried out by ET joined with the Contractor and ER on **5, 12, 19 and 28 March 2013**. No non-compliance was observed during the inspections. Overall, the environmental performance of the Project was therefore considered satisfactory.
- 10.08 The landscape and visual impacts monitoring results and findings will be submitted separately as a stand-alone document. The Contractor is reminded that the landscape and visual impacts site audit shall be carried out by a competent landscape architect, as a member of ET to implement the EM&A programme.

### RECOMMENDATIONS

- 10.09 As wet season is approaching, muddy water or other water pollutants from site surface runoff into the local stream will be key environment issue. Therefore, water mitigation measures to prevent surface runoff into nearby water bodies should be paid on special attention. Moreover, mitigation measures should be properly maintained to avoid fugitive dust emissions from loose soil surface or haul road.
- 10.10 Other environmental issues such as construction noise as well as waste management, as stipulated in the Environmental Monitoring and Audit Manual should be implemented and maintained, as appropriate.
- 10.11 To control the site performance on waste management, the Contractor shall ensure that all solid and liquid waste management works are fully in compliance with the relevant license/permit requirements, such as the effluent discharge license and the chemical waste producer registration.

| 18        | 5.2          | 5.2          | 10.4     | 1.632         | 49        | 50.72        | Slope = 29.4530       |
| 13        | 3.6          | 3.6          | 7.2      | 1.359         | 42        | 43.47        | Intercept = 2.9824    |
| 10        | 2.5          | 2.5          | 5        | 1.135         | 35        | 36.23        | Corr. coeff. = 0.9991 |
| 7         | 1.7          | 1.7          | 3.4      | 0.937         | 30        | 31.05        |                       |
| 5         | 1.1          | 1.1          | 2.2      | 0.756         | 24        | 24.84        |                       |

#### Calculations :

$$Qstd = 1/m[\text{Sqrt}(H2O(Pa/Pstd)(Tstd/Ta))-b]$$

$$IC = I[\text{Sqrt}(Pa/Pstd)(Tstd/Ta)]$$

Qstd = standard flow rate

IC = corrected chart responses

I = actual chart response

m = calibrator Qstd slope

b = calibrator Qstd intercept

Ta = actual temperature during calibration ( deg F)

Pstd = actual pressure during calibration ( mm Hg)

#### For subsequent calculation of sampler flow:

$$1/m((I)[\text{Sqrt}(298/Tav)(Pav/760)]-b)$$

m = sampler slope

b = sampler intercept

I = chart response

Tav = daily average temperature

Pav = daily average pressure

# CALCULATIONS

Vstd = Diff. Vol [(Pa-Diff. Hg)/760] (298/Ta)  
 Qstd = Vstd/Time

Va = Diff Vol [(Pa-Diff Hg)/Pa]  
 Qa = Va/Time

For subsequent flow rate calculations:

Qstd = 1/m{ [SQRT(H2O(Pa/760) (298/Ta))] - b}  
 Qa = 1/m{ [SQRT H2O(Ta/Pa)] - b}

# Certificate of Calibration

## 校正證書

Certificate No. : C124263

證書編號

### ITEM TESTED / 送檢項目 (Job No. / 序引編號 : IC12-0960)

Description / 儀器名稱 : Integrating Sound Level Meter (EQ009)  
Manufacturer / 製造商 : Bruel & Kjaer  
Model No. / 型號 : 2238  
Serial No. / 編號 : 2285722  
Supplied By / 委託者 : Action-United Environmental Services and Consulting  
Unit A, 20/F., Gold King Industrial Building,  
35-41 Tai Lin Pai Road, Kwai Chung, N.T.

### TEST CONDITIONS / 測試條件

Temperature / 溫度 :  $(23 \pm 2)^{\circ}\text{C}$   
Line Voltage / 電壓 : ---

Relative Humidity / 相對濕度 :  $(55 \pm 20)\%$

### TEST SPECIFICATIONS / 測試規範

Calibration check

DATE OF TEST / 測試日期 : 20 July 2012

### TEST RESULTS / 測試結果

The results apply to the particular unit-under-test only.  
All results are within manufacturer's specification.  
The results are detailed in the subsequent page(s).

The test equipment used for calibration are traceable to National Standards via :

- The Government of The Hong Kong Special Administrative Region Standard & Calibration Laboratory
- Rohde & Schwarz Laboratory, Germany
- Fluke Precision Measurement Ltd., UK
- Fluke Everett Service Center, USA
- Agilent Technologies, USA

Tested By  
測試

:   
L K Yeung

Certified By  
核證

:   
K C Lee

Date of Issue  
簽發日期

20 July 2012

The test equipment used for calibration are traceable to the Nation Standards as specified in this certificate. This certificate shall not be reproduced except in full, without the prior written approval of this laboratory.

本證書所載校正用之測試器材均可溯源至國際標準。局部複印本證書需先獲本實驗室書面批准。

# Certificate of Calibration

## 校正證書

Certificate No. : C124263

證書編號

- The unit-under-test (UUT) was allowed to stabilize in the laboratory for over 12 hours, and switched on to warm up for over 10 minutes before the commencement of the test.
- Self-calibration using laboratory acoustic calibrator was performed before the test from 6.1.1.2 to 6.4.
- The results presented are the mean of 3 measurements at each calibration point.
- Test equipment :

| Equipment ID | Description                         | Certificate No. |
|--------------|-------------------------------------|-----------------|
| CL280        | 40 MHz Arbitrary Waveform Generator | C120016         |
| CL281        | Multifunction Acoustic Calibrator   | DC110233        |

- Test procedure : MA101N.

- Results :

### 6.1 Sound Pressure Level

#### 6.1.1 Reference Sound Pressure Level

##### 6.1.1.1 Before Self-calibration

| UUT Setting |                  |                     |                | Applied Value |             | UUT Reading (dB) |
|-------------|------------------|---------------------|----------------|---------------|-------------|------------------|
| Range (dB)  | Parameter        | Frequency Weighting | Time Weighting | Level (dB)    | Freq. (kHz) |                  |
| 50 - 130    | L <sub>AFP</sub> | A                   | F              | 94.00         | 1           | 93.6             |

##### 6.1.1.2 After Self-calibration

| UUT Setting |                  |                     |                | Applied Value |             | UUT Reading (dB) | IEC 60651 Type 1 Spec. (dB) |
|-------------|------------------|---------------------|----------------|---------------|-------------|------------------|-----------------------------|
| Range (dB)  | Parameter        | Frequency Weighting | Time Weighting | Level (dB)    | Freq. (kHz) |                  |                             |
| 50 - 130    | L <sub>AFP</sub> | A                   | F              | 94.00         | 1           | 94.0             | ± 0.7                       |

##### 6.1.2 Linearity

| UUT Setting |                  |                     |                | Applied Value |             | UUT Reading (dB) |
|-------------|------------------|---------------------|----------------|---------------|-------------|------------------|
| Range (dB)  | Parameter        | Frequency Weighting | Time Weighting | Level (dB)    | Freq. (kHz) |                  |
| 50 - 130    | L <sub>AFP</sub> | A                   | F              | 94.00         | 1           | 94.0 (Ref.)      |
|             |                  |                     |                | 104.00        |             | 104.0            |
|             |                  |                     |                | 114.00        |             | 113.9            |

IEC 60651 Type 1 Spec. : ± 0.4 dB per 10 dB step and ± 0.7 dB for overall different.

The test equipment used for calibration are traceable to the Nation Standards as specified in this certificate. This certificate shall not be reproduced except in full, without the prior written approval of this laboratory.

|               |                  |                        | 5 min.              |                    |                           | 1/10 <sup>4</sup>       |                        | 70                          | 69.1                   | ± 1.0                                |

Remarks : - Mfr's Spec. : IEC 60651 Type 1 & IEC 60804 Type 1

- Uncertainties of Applied Value : 94 dB : 31.5 Hz - 125 Hz : ± 0.35 dB  
 250 Hz - 500 Hz : ± 0.30 dB  
 1 kHz : ± 0.20 dB  
 2 kHz - 4 kHz : ± 0.35 dB  
 8 kHz : ± 0.45 dB  
 12.5 kHz : ± 0.70 dB  
 104 dB : 1 kHz : ± 0.10 dB (Ref. 94 dB)  
 114 dB : 1 kHz : ± 0.10 dB (Ref. 94 dB)  
 Burst equivalent level : ± 0.2 dB (Ref. 110 dB continuous sound level)

- The uncertainties are for a confidence probability of not less than 95 %.

#### Note :

The values given in this Certificate only relate to the values measured at the time of the test and any uncertainties quoted will not include allowance for the equipment long term drift, variations with environment changes, vibration and shock during transportation, overloading, mis-handling, or the capability of any other laboratory to repeat the measurement. Sun Creation Engineering Limited shall not be liable for any loss or damage resulting from the use of the equipment.

The test equipment used for calibration are traceable to the Nation Standards as specified in this certificate. This certificate shall not be reproduced except in full, without the prior written approval of this laboratory.

本證書所載校正用之測試器材均可溯源至國際標準。局部複印本證書需先獲本實驗室書面批准。

# Certificate of Calibration

## 校正證書

Certificate No. : C122427  
證書編號

**ITEM TESTED / 送檢項目 (Job No. / 序引編號 : IC12-0960)**

Description / 儀器名稱 : Integrating Sound Level Meter (EQ010)  
Manufacturer / 製造商 : Bruel & Kjaer  
Model No. / 型號 : 2238  
Serial No. / 編號 : 2285721  
Supplied By / 委託者 : Action-United Environmental Services and Consulting  
Unit A, 20/F., Gold King Industrial Building,  
35-41 Tai Lin Pai Road, Kwai Chung, N.T.

**TEST CONDITIONS / 測試條件**

Temperature / 溫度 :  $(23 \pm 2)^{\circ}\text{C}$   
Line Voltage / 電壓 : ---

Relative Humidity / 相對濕度 :  $(55 \pm 20)\%$

**TEST SPECIFICATIONS / 測試規範**

Calibration check

**DATE OF TEST / 測試日期** : 20 April 2012

**TEST RESULTS / 測試結果**

The results apply to the particular unit-under-test only.  
All results are within manufacturer's specification.  
The results are detailed in the subsequent page(s).

The test equipment used for calibration are traceable to National Standards via :

- The Government of The Hong Kong Special Administrative Region Standard & Calibration Laboratory
- Rohde & Schwarz Laboratory, Germany
- Fluke Precision Measurement Ltd., UK
- Fluke Everett Service Center, USA
- Agilent Technologies, USA

Tested By  
測試

:

  
L K Yeung

Certified By  
核證

:

  
K C Lee

Date of Issue  
簽發日期

:

23 April 2012

The test equipment used for calibration are traceable to the Nation Standards as specified in this certificate. This certificate shall not be reproduced except in full, without the prior written approval of this laboratory.

# Certificate of Calibration

## 校正證書

Certificate No. : C122427  
證書編號

- The unit-under-test (UUT) was allowed to stabilize in the laboratory for over 12 hours, and switched on to warm up for over 10 minutes before the commencement of the test.
- Self-calibration using the B & K Acoustic Calibrator 4231, S/N : 2713428 was performed before the test.
- The results presented are the mean of 3 measurements at each calibration point.
- Test equipment :

| Equipment ID | Description                         | Certificate No. |
|--------------|-------------------------------------|-----------------|
| CL280        | 40 MHz Arbitrary Waveform Generator | C120016         |
| CL281        | Multifunction Acoustic Calibrator   | DC110233        |

- Test procedure : MA101N.

- Results :

### 6.1 Sound Pressure Level

#### 6.1.1 Reference Sound Pressure Level

| UUT Setting |                  |                     |                | Applied Value |             | UUT Reading (dB) | IEC 60651 Type 1 Spec. (dB) |
|-------------|------------------|---------------------|----------------|---------------|-------------|------------------|-----------------------------|
| Range (dB)  | Parameter        | Frequency Weighting | Time Weighting | Level (dB)    | Freq. (kHz) |                  |                             |
| 50 - 130    | L <sub>AFP</sub> | A                   | F              | 94.00         | 1           | 94.0             | ± 0.7                       |

#### 6.1.2 Linearity

| UUT Setting |                  |                     |                | Applied Value |             | UUT Reading (dB) |
|-------------|------------------|---------------------|----------------|---------------|-------------|------------------|
| Range (dB)  | Parameter        | Frequency Weighting | Time Weighting | Level (dB)    | Freq. (kHz) |                  |
| 50 - 130    | L <sub>AFP</sub> | A                   | F              | 94.00         | 1           | 94.0 (Ref.)      |
|             |                  |                     |                | 104.00        |             | 104.0            |
|             |                  |                     |                | 114.00        |             | 114.0            |

IEC 60651 Type 1 Spec. : ± 0.4 dB per 10 dB step and ± 0.7 dB for overall different.

### 6.2 Time Weighting

#### 6.2.1 Continuous Signal

| UUT Setting |                  |                     |                | Applied Value |             | UUT Reading (dB) | IEC 60651 Type 1 Spec. (dB) |
|-------------|------------------|---------------------|----------------|---------------|-------------|------------------|-----------------------------|
| Range (dB)  | Parameter        | Frequency Weighting | Time Weighting | Level (dB)    | Freq. (kHz) |                  |                             |
| 50 - 130    | L <sub>AFP</sub> | A                   | F              | 94.00         | 1           | 94.0             | Ref.                        |
|             | L <sub>ASP</sub> |                     | S              |               |             | 94.0             | ± 0.1                       |
|             | L <sub>AIP</sub> |                     | I              |               |             | 94.1             | ± 0.1                       |

The test equipment used for calibration are traceable to the Nation Standards as specified in this certificate. This certificate shall not be reproduced except in full, without the prior written approval of this laboratory.

| 30 – 110    | L <sub>Aeq</sub> | A                   | 10 sec.          | 4               | 1                   | 1/10              | 110.0            | 100                   | 99.9         | ± 0.5             |
|             |                  |                     |                  |                 |                     | 1/10 <sup>2</sup> |                  | 90                    | 89.6         | ± 0.5             |
|             |                  |                     | 60 sec.          |                 |                     | 1/10 <sup>3</sup> |                  | 80                    | 79.8         | ± 1.0             |
|             |                  |                     | 5 min.           |                 |                     | 1/10 <sup>4</sup> |                  | 70                    | 69.8         | ± 1.0             |

Remarks : - Mfr's Spec. : IEC 60651 Type 1 & IEC 60804 Type 1

- Uncertainties of Applied Value :

|                        |                  |                                                 |
|------------------------|------------------|-------------------------------------------------|
| 94 dB                  | 31.5 Hz - 125 Hz | : ± 0.40 dB                                     |
|                        | 250 Hz - 500 Hz  | : ± 0.30 dB                                     |
|                        | 1 kHz            | : ± 0.20 dB                                     |
|                        | 2 kHz            | : ± 0.40 dB                                     |
|                        | 4 kHz            | : ± 0.50 dB                                     |
|                        | 8 kHz            | : ± 0.70 dB                                     |
|                        | 12.5 kHz         | : ± 1.20 dB                                     |
| 104 dB                 | 1 kHz            | : ± 0.10 dB (Ref. 94 dB)                        |
| 114 dB                 | 1 kHz            | : ± 0.10 dB (Ref. 94 dB)                        |
| Burst equivalent level |                  | : ± 0.2 dB (Ref. 110 dB continuous sound level) |

- The uncertainties are for a confidence probability of not less than 95 %.

#### Note :

The values given in this Certificate only relate to the values measured at the time of the test and any uncertainties quoted will not include allowance for the equipment long term drift, variations with environment changes, vibration and shock during transportation, overloading, mis-handling, or the capability of any other laboratory to repeat the measurement. Sun Creation Engineering Limited shall not be liable for any loss or damage resulting from the use of the equipment.

# Certificate of Calibration

## 校正證書

Certificate No. : C122426  
證書編號

**ITEM TESTED / 送檢項目 (Job No. / 序引編號 : IC12-0960)**

Description / 儀器名稱 : Acoustical Calibrator (EQ082)  
Manufacturer / 製造商 : Bruel & Kjaer  
Model No. / 型號 : 4231  
Serial No. / 編號 : 2713428  
Supplied By / 委託者 : Action-United Environmental Services and Consulting  
Unit A, 20/F., Gold King Industrial Building,  
35-41 Tai Lin Pai Road, Kwai Chung, N.T.

**TEST CONDITIONS / 測試條件**

Temperature / 溫度 :  $(23 \pm 2)^{\circ}\text{C}$   
Line Voltage / 電壓 : ---

Relative Humidity / 相對濕度 :  $(55 \pm 20)\%$

**TEST SPECIFICATIONS / 測試規範**

Calibration

**DATE OF TEST / 測試日期** : 20 April 2012

**TEST RESULTS / 測試結果**

The results apply to the particular unit-under-test only.  
All results are within manufacturer's specification.  
The results are detailed in the subsequent page(s).

The test equipment used for calibration are traceable to National Standards via :

- The Government of The Hong Kong Special Administrative Region Standard & Calibration Laboratory
- Rohde & Schwarz Laboratory, Germany
- Fluke Everett Service Center, USA
- Agilent Technologies, USA

Tested By  
測試

  
L K Yeung

Certified By

## 校正證書

Certificate No. : C122426  
證書編號

- The unit-under-test (UUT) was allowed to stabilize in the laboratory for over 12 hours before the commencement of the test.
- The results presented are the mean of 3 measurements at each calibration point.
- Test equipment :

| Equipment ID | Description                       | Certificate No. |
|--------------|-----------------------------------|-----------------|
| CL130        | Universal Counter                 | C113350         |
| CL281        | Multifunction Acoustic Calibrator | DC110233        |
| TST150A      | Measuring Amplifier               | C120886         |

- Test procedure : MA100N.

- Results :

### 5.1 Sound Level Accuracy

#### 5.1.1 Before Adjustment

| UUT<br>Nominal Value | Measured Value<br>(dB) | Mfr's Spec.<br>(dB) | Uncertainty of Measured Value<br>(dB) |
|----------------------|------------------------|---------------------|---------------------------------------|
| 94 dB, 1 kHz         | 94.1                   | ± 0.2               | ± 0.2                                 |
| 114 dB, 1 kHz        | 114.1                  |                     |                                       |

#### 5.1.2 After Adjustment

| UUT<br>Nominal Value | Measured Value<br>(dB) | Mfr's Spec.<br>(dB) | Uncertainty of Measured Value<br>(dB) |
|----------------------|------------------------|---------------------|---------------------------------------|

## ALS Technichem (HK) Pty Ltd

### REPORT OF EQUIPMENT PERFORMANCE CHECK/CALIBRATION

**CONTACT:** MR BEN TAM  
**CLIENT:** ACTION UNITED ENVIRO SERVICES  
**ADDRESS:** RM A 20/F., GOLDEN KING IND BLDG,  
NO. 35-41 TAI LIN PAI ROAD,  
KWAI CHUNG,  
N.T., HONG KONG.  
**PROJECT:** --

**WORK ORDER:** HK1300486  
**LABORATORY:** HONG KONG  
**DATE RECEIVED:** 07/01/2013  
**DATE OF ISSUE:** 09/01/2013

#### COMMENTS

It is certified that the item under calibration/checking has been calibrated/checked by corresponding calibrated equipment in the laboratory.  
Maximum Tolerance and calibration frequency stated in the report, unless otherwise stated, the internal acceptance criteria of ALS will be followed.

**Scope of Test:** Dissolved Oxygen & Temperature  
**Description:** DO Meter  
**Brand Name:** YSI  
**Model No.:** YSI PRO 20  
**Serial No.:** 12C100570  
**Equipment No.:** --  
**Date of Calibration:** 08 January, 2013

#### NOTES

This is the Final Report and supersedes any preliminary report with this batch number.  
Results apply to sample(s) as submitted. All pages of this report have been checked and approved for release.

#### ISSUING LABORATORY: HONG KONG

##### **Address**

### REPORT OF EQUIPMENT PERFORMANCE CHECK/CALIBRATION

**CONTACT:** MR BEN TAM  
**CLIENT:** ACTION UNITED ENVIRO SERVICES  
**ADDRESS:** RM A 20/F., GOLDEN KING IND BLDG,  
NO. 35-41 TAI LIN PAI ROAD,  
KWAI CHUNG,  
N.T., HONG KONG.  
**PROJECT:** --

**WORK ORDER:** HK1300617  
**LABORATORY:** HONG KONG  
**DATE RECEIVED:** 08/01/2013  
**DATE OF ISSUE:** 17/01/2013

#### COMMENTS

It is certified that the item under calibration/checking has been calibrated/checked by corresponding calibrated equipment in the laboratory.  
Maximum Tolerance and calibration frequency stated in the report, unless otherwise stated, the internal acceptance criteria of ALS will be followed.

Scope of Test: Turbidity  
Description: Turbidimeter  
Brand Name: HACH  
Model No.: 2100Q  
Serial No.: 11030C008499  
Equipment No.: --  
Date of Calibration: 14 January, 2013

#### NOTES

This is the Final Report and supersedes any preliminary report with this batch number.  
Results apply to sample(s) as submitted. All pages of this report have been checked and approved for release.

#### ISSUING LABORATORY: HONG KONG

## **Appendix J**

### **Graphical plots**

## Air Quality – 24-hour TSP

## Air Quality – 1 hour TSP

## Construction Noise

Remark: Limit Level was reduced to 65dB(A) during examination period between 15 and 18 January 2013.

## Water Quality – Local Stream Course (R1b)

## **Appendix K**

| Yearly Total    | 3.772                                                                                   | 0                                                                       | 0                         | 0                           | 3.772                      | 0                        | 0                                                           | 0                             | 0.000                                                                                 | 0              | 0.003                                   |

## **Appendix L**

### **Inspection Checklist**

**Project:** DC/2009/08  
**Inspection** Construction of Yuen Long South Branch Sewers and Expansion of Ha Tsuen PS  
**Date:** 5 March 2013  
**Time:** 10:00

**Inspected by**  
**RE's representative:** Mr. K.P. Cheung  
**IEC's representative:** -  
**ET's representative:** Ms. Nicola Hon  
**Contractor's representative:** Mr. Scott Tsiu  
**Checklist No.** DC200908-5-Mar-2013

## PART A: GENERAL INFORMATION

**Environmental Permit No.:** EP-327/2009/A

**Weather:** ☐ Sunny ☒ Fine ☐ Cloudy ☐ Rainy  
**Temperature:** 18.5 °C  
**Humidity:** ☐ High ☐ Moderate ☒ Low  
**Wind:** ☐ Strong ☐ Breeze ☒ Light ☐ Calm

## PART B: SITE AUDIT

### Section 1: Water Quality

|                                                                                                                                                    | Not Observed                        | Yes                                 | No                       | Follow up                           | Not Applicable                      | Photo/Remarks |
|----------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------|-------------------------------------|--------------------------|-------------------------------------|-------------------------------------|---------------|
| 1.01 Is an effluent discharge license obtained for the Project?                                                                                    | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.02 Is the effluent discharged in accordance with the discharge licence?                                                                          | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |               |
| 1.03 Is the discharge of turbid water avoided?                                                                                                     | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.04 Are there proper desilting facilities in the drainage systems to reduce SS levels in effluent?                                                | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.05 Are there channels, sandbags or bunds to divert the surface run-off to sedimentation tanks/desilting system prior discharge?                  | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.06 Are there any temporary perimeter channels provided at site boundaries to intercept storm runoff from crossing the site?                      | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.07 Is temporary drainage system (within site boundaries) and the nearby permanent drainage system (outside site boundaries) are well maintained? | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.08 As excavation proceeds, are temporary access roads protected by crushed stone or gravel?                                                      | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.09 Are temporary exposed slopes properly covered?                                                                                                | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.10 Are earthworks final surfaces well compacted or protected?                                                                                    | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.11 Are manholes adequately covered or temporarily sealed?                                                                                        | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.12 Are there any procedures and equipment for rainstorm protection?                                                                              | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.13 Are wheel washing facilities well maintained?                                                                                                 | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.14 Is overflow runoff from wheel washing facilities avoided?                                                                                     | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.15 Are there chemical toilets provided on site?                                                                                                  | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.16 Are chemical toilets properly maintained?                                                                                                     | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.17 Are the vehicle and plant servicing areas paved and located within roofed areas?                                                              | <input type="checkbox"/>            | <input type="checkbox"/>            | <input type="checkbox"/> | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |               |
| 1.18 Is the oil leakage from the on-site vehicles/plants or spillage during the fuel refilling avoided?                                            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.19 Are there any measures to prevent oil leakage entering the temporary/permanent drainage system?                                               | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.20 Are there any measures to collect spilt cement and concrete washings during concreting works?                                                 | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.21 Are there any oil interceptors/grease traps in the drainage systems for vehicle and plant servicing areas, canteen kitchen, etc?              | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.22 Are the oil interceptors/grease traps maintained properly?                                                                                    | <input type="checkbox"/>            | <input type="checkbox"/>            | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |               |

|                                                                                                                                                 | Not Observed                        | Yes                                 | No                       | Follow up                           | Not Applicable                      | Photo/ Remarks |
|-------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------|-------------------------------------|--------------------------|-------------------------------------|-------------------------------------|----------------|
| 1.23 Is used bentonite recycled where appropriate?                                                                                              | <input type="checkbox"/>            | <input type="checkbox"/>            | <input type="checkbox"/> | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |                |
| 1.24 Is the sediment laden runoff from the unpaved surface to avoid discharge into the nearby aquatic environments, marsh lands and moat ponds? | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| <b>Section 2: Air Quality</b>                                                                                                                   |                                     |                                     |                          |                                     |                                     |                |
| 2.01 Are there wheel washing facilities with high pressure jets provided at every vehicle exit point?                                           | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 2.02 Are vehicles washed to remove any dusty materials from their bodies and wheels before leaving construction sites?                          | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 2.03 Are the excavated materials or exposure soil surface sprayed with water during handling?                                                   | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 2.04 Are stockpiles of dusty materials sprayed with water, covered or placed in sheltered areas?                                                | <input type="checkbox"/>            | <input type="checkbox"/>            | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | Photo 2        |
| 2.05 Is the exposed earth properly treated within six months after the last construction activities?                                            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 2.06 Are the access roads sprayed with water to maintain the entire road surface wet or paved and speed control (<15km/hr)?                     | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 2.07 Is the surface where any drilling, cutting, polishing or breaking operation continuously sprayed with water?                               | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 2.08 Is the load on vehicles covered entirely by clean impervious sheeting?                                                                     | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 2.09 Is the loading of materials to a level higher than the side and tail boards during transportation by vehicles avoided?                     | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 2.10 Is the road leading to the construction site within 30m of the vehicle entrance kept clear of dusty materials?                             | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 2.11 Is dark smoke emission from plant/equipment avoided?                                                                                       | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 2.12 Are de-bagging, batching and mixing processes carried out in sheltered areas (3-sided roofed enclosure) during the use of bagged cement?   | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 2.13 Are site vehicles travelling within the speed limit (<15km/hour)?                                                                          | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 2.14 Are hoardings of not less than 2.4m high provided along the site boundary, which adjoins areas accessible to the public?                   | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 2.15 Is open burning avoided?                                                                                                                   | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 2.16 Are any materials dropped on the roads (Outside the site boundaries) had clean up immediately?                                             | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| <b>Section 3: Noise</b>                                                                                                                         |                                     |                                     |                          |                                     |                                     |                |
| 3.01 Are noisy equipment and activities positioned as far as practicable from the sensitive receivers?                                          | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 3.02 Is silenced equipment adopted?                                                                                                             | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 3.03 Is idle equipment turned off or throttled down?                                                                                            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 3.04 Are all plant and equipment well maintained and in good condition?                                                                         | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 3.05 Are noise barriers or enclosures provided at areas where construction activities cause noise impact on sensitive receivers?                | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 3.06 Are hand held breakers fitted with valid noise emission labels during operation?                                                           | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 3.07 Are air compressors fitted with valid noise emission labels during operation?                                                              | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 3.08 Are flaps and panels of mechanical equipment closed during operation?                                                                      | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 3.09 Are Construction Noise Permit(s) applied for percussive piling works?                                                                      | <input type="checkbox"/>            | <input type="checkbox"/>            | <input type="checkbox"/> | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |                |
| 3.10 Are Construction Noise Permit(s) applied for general construction works during restricted hours?                                           | <input type="checkbox"/>            | <input type="checkbox"/>            | <input type="checkbox"/> | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |                |
| 3.11 Are valid Construction Noise Permit(s) posted at site entrances?                                                                           | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| <b>Section 4: Waste/Chemical Management</b>                                                                                                     |                                     |                                     |                          |                                     |                                     |                |
| 4.01 Are receptacles available for general refuse collection?                                                                                   | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |

|                                                                                                                      | Not Observed                        | Yes                                 | No                       | Follow up                | Not Applicable           | Photo/ Remarks |
|----------------------------------------------------------------------------------------------------------------------|-------------------------------------|-------------------------------------|--------------------------|--------------------------|--------------------------|----------------|
| 4.02 Is general refuse sorting or recycling implemented?                                                             | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.03 Is general refuse disposed of properly and regularly?                                                           | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.04 Is the Contractor registered as a chemical waste producer?                                                      | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.05 Are the chemical waste containers properly labelled?                                                            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.06 Are the chemical wastes stored in proper storage areas?                                                         | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.07 Is the chemical waste storage area properly labelled?                                                           | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.08 Is the chemical waste storage area used for storage of chemical waste only?                                     | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.09 Are incompatible chemical wastes stored in different areas?                                                     | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.10 Are the chemical wastes disposed of by licensed collectors?                                                     | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.11 Are trip tickets for chemical wastes disposal available for inspection?                                         | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.12 Are chemical/fuel storage areas bunded?                                                                         | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.13 Are designated areas identified for storage and sorting of construction wastes?                                 | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.14 Are construction wastes sorted on site?                                                                         | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.15 Are construction wastes reused?                                                                                 | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.16 Are construction wastes disposed of properly?                                                                   | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.17 Are site hoardings and signboards made of durable materials instead of timber?                                  | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.18 Is trip ticket system implemented for the disposal of construction wastes and records available for inspection? | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.19 Are appropriate procedures followed if contaminated material exists?                                            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.20 Is relevant license/ permit for disposal of construction waste or excavated materials available for inspection? | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| <b>Section 5: Landscape &amp; Visual</b>                                                                             |                                     |                                     |                          |                          |                          |                |
| 5.01 Are retained and transplanted trees in health condition?                                                        | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 5.02 Are retained and transplanted trees properly protected?                                                         | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 5.03 Are surgery works carried out for the damaged trees?                                                            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 5.04 Is damage to trees outside site boundary due to construction activities avoided?                                | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 5.05 Is the night-time lighting controlled to minimize glare to sensitive receivers?                                 | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| <b>Section 6: Others</b>                                                                                             |                                     |                                     |                          |                          |                          |                |
| 6.01 Are relevant Environmental Permits posted at all vehicle site entrances/exits?                                  | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 6.02 Is mosquito control measures adequately implemented?                                                            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |

**Remarks:**

**Follow up of Last Site Inspection:**

1. Housekeeping in Sham Chung working area has been improved.
2. Debris and mud tails in Ha Tsuen Sewage Pumping Station were cleared.

**Observations recorded in this Site Inspection: (5-Mar-2013)**

Photo 1: Generator without drip tray was observed in the working area of Hiu Hing Road, the Contractor should provide drip tray underneath.

Photo 2: Dusty stockpile was observed in Ha Tsuen Sewage Pumping Station, the Contractor should cover it with impervious sheet or remove it off site properly.

## PART A: GENERAL INFORMATION

**Environmental Permit No.:** EP-327/2009/A

**Weather:** ☐ Sunny ☒ Fine ☐ Cloudy ☐ Rainy

**Temperature:** 20.4 °C

**Humidity:** ☒ High ☐ Moderate ☐ Low

**Wind:** ☐ Strong ☐ Breeze ☒ Light ☐ Calm

## PART B: SITE AUDIT

### Section 1: Water Quality

|                                                                                                                                                    | Not Observed                        | Yes                                 | No                       | Follow up                           | Not Applicable                      | Photo/Remarks |
|----------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------|-------------------------------------|--------------------------|-------------------------------------|-------------------------------------|---------------|
| 1.01 Is an effluent discharge license obtained for the Project?                                                                                    | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.02 Is the effluent discharged in accordance with the discharge licence?                                                                          | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |               |
| 1.03 Is the discharge of turbid water avoided?                                                                                                     | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.04 Are there proper desilting facilities in the drainage systems to reduce SS levels in effluent?                                                | <input type="checkbox"/>            | <input type="checkbox"/>            | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | Photo 1       |
| 1.05 Are there channels, sandbags or bunds to divert the surface run-off to sedimentation tanks/desilting system prior discharge?                  | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.06 Are there any temporary perimeter channels provided at site boundaries to intercept storm runoff from crossing the site?                      | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.07 Is temporary drainage system (within site boundaries) and the nearby permanent drainage system (outside site boundaries) are well maintained? | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.08 As excavation proceeds, are temporary access roads protected by crushed stone or gravel?                                                      | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.09 Are temporary exposed slopes properly covered?                                                                                                | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.10 Are earthworks final surfaces well compacted or protected?                                                                                    | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.11 Are manholes adequately covered or temporarily sealed?                                                                                        | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.12 Are there any procedures and equipment for rainstorm protection?                                                                              | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.13 Are wheel washing facilities well maintained?                                                                                                 | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.14 Is overflow runoff from wheel washing facilities avoided?                                                                                     | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.15 Are there chemical toilets provided on site?                                                                                                  | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.16 Are chemical toilets properly maintained?                                                                                                     | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.17 Are the vehicle and plant servicing areas paved and located within roofed areas?                                                              | <input type="checkbox"/>            | <input type="checkbox"/>            | <input type="checkbox"/> | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |               |
| 1.18 Is the oil leakage from the on-site vehicles/plants or spillage during the fuel refilling avoided?                                            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.19 Are there any measures to prevent oil leakage entering the temporary/permanent drainage system?                                               | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.20 Are there any measures to collect spilt cement and concrete washings during concreting works?                                                 | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.21 Are there any oil interceptors/grease traps in the drainage systems for vehicle and plant servicing areas, canteen kitchen, etc?              | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.22 Are the oil interceptors/grease traps maintained properly?                                                                                    | <input type="checkbox"/>            | <input type="checkbox"/>            | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |               |

|                                                                                                                                                 | Not Observed                        | Yes                                 | No                       | Follow up                | Not Applicable                      | Photo/ Remarks |
|-------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------|-------------------------------------|--------------------------|--------------------------|-------------------------------------|----------------|
| 1.23 Is used bentonite recycled where appropriate?                                                                                              | <input type="checkbox"/>            | <input type="checkbox"/>            | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |                |
| 1.24 Is the sediment laden runoff from the unpaved surface to avoid discharge into the nearby aquatic environments, marsh lands and moat ponds? | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| <b>Section 2: Air Quality</b>                                                                                                                   |                                     |                                     |                          |                          |                                     |                |
| 2.01 Are there wheel washing facilities with high pressure jets provided at every vehicle exit point?                                           | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 2.02 Are vehicles washed to remove any dusty materials from their bodies and wheels before leaving construction sites?                          | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 2.03 Are the excavated materials or exposure soil surface sprayed with water during handling?                                                   | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 2.04 Are stockpiles of dusty materials sprayed with water, covered or placed in sheltered areas?                                                | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 2.05 Is the exposed earth properly treated within six months after the last construction activities?                                            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 2.06 Are the access roads sprayed with water to maintain the entire road surface wet or paved and speed control (<15km/hr)?                     | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 2.07 Is the surface where any drilling, cutting, polishing or breaking operation continuously sprayed with water?                               | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 2.08 Is the load on vehicles covered entirely by clean impervious sheeting?                                                                     | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 2.09 Is the loading of materials to a level higher than the side and tail boards during transportation by vehicles avoided?                     | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 2.10 Is the road leading to the construction site within 30m of the vehicle entrance kept clear of dusty materials?                             | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 2.11 Is dark smoke emission from plant/equipment avoided?                                                                                       | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 2.12 Are de-bagging, batching and mixing processes carried out in sheltered areas (3-sided roofed enclosure) during the use of bagged cement?   | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 2.13 Are site vehicles travelling within the speed limit (<15km/hour)?                                                                          | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 2.14 Are hoardings of not less than 2.4m high provided along the site boundary, which adjoins areas accessible to the public?                   | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 2.15 Is open burning avoided?                                                                                                                   | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 2.16 Are any materials dropped on the roads (Outside the site boundaries) had clean up immediately?                                             | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| <b>Section 3: Noise</b>                                                                                                                         |                                     |                                     |                          |                          |                                     |                |
| 3.01 Are noisy equipment and activities positioned as far as practicable from the sensitive receivers?                                          | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 3.02 Is silenced equipment adopted?                                                                                                             | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 3.03 Is idle equipment turned off or throttled down?                                                                                            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 3.04 Are all plant and equipment well maintained and in good condition?                                                                         | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 3.05 Are noise barriers or enclosures provided at areas where construction activities cause noise impact on sensitive receivers?                | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 3.06 Are hand held breakers fitted with valid noise emission labels during operation?                                                           | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 3.07 Are air compressors fitted with valid noise emission labels during operation?                                                              | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 3.08 Are flaps and panels of mechanical equipment closed during operation?                                                                      | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 3.09 Are Construction Noise Permit(s) applied for percussive piling works?                                                                      | <input type="checkbox"/>            | <input type="checkbox"/>            | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |                |
| 3.10 Are Construction Noise Permit(s) applied for general construction works during restricted hours?                                           | <input type="checkbox"/>            | <input type="checkbox"/>            | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |                |
| 3.11 Are valid Construction Noise Permit(s) posted at site entrances?                                                                           | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| <b>Section 4: Waste/Chemical Management</b>                                                                                                     |                                     |                                     |                          |                          |                                     |                |
| 4.01 Are receptacles available for general refuse collection?                                                                                   | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |

# Environmental Site Inspection Checklist

|                                                                                                                      | Not Observed                        | Yes                                 | No                       | Follow up                           | Not Applicable           | Photo/ Remarks |
|----------------------------------------------------------------------------------------------------------------------|-------------------------------------|-------------------------------------|--------------------------|-------------------------------------|--------------------------|----------------|
| 4.02 Is general refuse sorting or recycling implemented?                                                             | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> |                |
| 4.03 Is general refuse disposed of properly and regularly?                                                           | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> |                |
| 4.04 Is the Contractor registered as a chemical waste producer?                                                      | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> |                |
| 4.05 Are the chemical waste containers properly labelled?                                                            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> |                |
| 4.06 Are the chemical wastes stored in proper storage areas?                                                         | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> |                |
| 4.07 Is the chemical waste storage area properly labelled?                                                           | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> |                |
| 4.08 Is the chemical waste storage area used for storage of chemical waste only?                                     | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> |                |
| 4.09 Are incompatible chemical wastes stored in different areas?                                                     | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> |                |
| 4.10 Are the chemical wastes disposed of by licensed collectors?                                                     | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> |                |
| 4.11 Are trip tickets for chemical wastes disposal available for inspection?                                         | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> |                |
| 4.12 Are chemical/fuel storage areas bunded?                                                                         | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> |                |
| 4.13 Are designated areas identified for storage and sorting of construction wastes?                                 | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> |                |
| 4.14 Are construction wastes sorted on site?                                                                         | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> |                |
| 4.15 Are construction wastes reused?                                                                                 | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> |                |
| 4.16 Are construction wastes disposed of properly?                                                                   | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> |                |
| 4.17 Are site hoardings and signboards made of durable materials instead of timber?                                  | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> |                |
| 4.18 Is trip ticket system implemented for the disposal of construction wastes and records available for inspection? | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> |                |
| 4.19 Are appropriate procedures followed if contaminated material exists?                                            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> |                |
| 4.20 Is relevant license/ permit for disposal of construction waste or excavated materials available for inspection? | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> |                |
| <b>Section 5: Landscape &amp; Visual</b>                                                                             |                                     |                                     |                          |                                     |                          |                |
| 5.01 Are retained and transplanted trees in health condition?                                                        | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> |                |
| 5.02 Are retained and transplanted trees properly protected?                                                         | <input type="checkbox"/>            | <input type="checkbox"/>            | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | Photo 2        |
| 5.03 Are surgery works carried out for the damaged trees?                                                            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> |                |
| 5.04 Is damage to trees outside site boundary due to construction activities avoided?                                | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> |                |
| 5.05 Is the night-time lighting controlled to minimize glare to sensitive receivers?                                 | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> |                |
| <b>Section 6: Others</b>                                                                                             |                                     |                                     |                          |                                     |                          |                |
| 6.01 Are relevant Environmental Permits posted at all vehicle site entrances/exits?                                  | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> |                |
| 6.02 Is mosquito control measures adequately implemented?                                                            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> |                |

**Remarks:**

**Follow up of Last Site Inspection:**

1. The generator in the working area of Hui Hing Road has been removed.
2. The sand stockpile in Ha Tsuen Sewage Pumping Station has been removed.

**Observations recorded in this Site Inspection: (12-Mar-2013)**

Photo 1: The de-silting tank in the working area of Sham Chung should be cleaned regularly in order to maintain the de-silting capability.

Photo 2: The retained trees in Shui Tsui San Tsuen Road were not fenced off properly, the Contractor should provide proper fencing for it and keep it away from work.

## PART A: GENERAL INFORMATION

Environmental Permit No.: EP-327/2009/A

**Weather:** ☐ Sunny ☐ Fine ☐ Cloudy ☒ Rainy  
**Temperature:** 24.3 °C  
**Humidity:** ☒ High ☐ Moderate ☐ Low  
**Wind:** ☐ Strong ☐ Breeze ☒ Light ☐ Calm

## PART B: SITE AUDIT

### Section 1: Water Quality

|                                                                                                                                                    | Not Observed                        | Yes                                 | No                       | Follow up                           | Not Applicable                      | Photo/Remarks |
|----------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------|-------------------------------------|--------------------------|-------------------------------------|-------------------------------------|---------------|
| 1.01 Is an effluent discharge license obtained for the Project?                                                                                    | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.02 Is the effluent discharged in accordance with the discharge licence?                                                                          | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |               |
| 1.03 Is the discharge of turbid water avoided?                                                                                                     | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.04 Are there proper desilting facilities in the drainage systems to reduce SS levels in effluent?                                                | <input type="checkbox"/>            | <input type="checkbox"/>            | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | Photo 1       |
| 1.05 Are there channels, sandbags or bunds to divert the surface run-off to sedimentation tanks/desilting system prior discharge?                  | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.06 Are there any temporary perimeter channels provided at site boundaries to intercept storm runoff from crossing the site?                      | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.07 Is temporary drainage system (within site boundaries) and the nearby permanent drainage system (outside site boundaries) are well maintained? | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.08 As excavation proceeds, are temporary access roads protected by crushed stone or gravel?                                                      | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.09 Are temporary exposed slopes properly covered?                                                                                                | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.10 Are earthworks final surfaces well compacted or protected?                                                                                    | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.11 Are manholes adequately covered or temporarily sealed?                                                                                        | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.12 Are there any procedures and equipment for rainstorm protection?                                                                              | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.13 Are wheel washing facilities well maintained?                                                                                                 | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.14 Is overflow runoff from wheel washing facilities avoided?                                                                                     | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.15 Are there chemical toilets provided on site?                                                                                                  | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.16 Are chemical toilets properly maintained?                                                                                                     | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.17 Are the vehicle and plant servicing areas paved and located within roofed areas?                                                              | <input type="checkbox"/>            | <input type="checkbox"/>            | <input type="checkbox"/> | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |               |
| 1.18 Is the oil leakage from the on-site vehicles/plants or spillage during the fuel refilling avoided?                                            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.19 Are there any measures to prevent oil leakage entering the temporary/permanent drainage system?                                               | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.20 Are there any measures to collect spilt cement and concrete washings during concreting works?                                                 | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.21 Are there any oil interceptors/grease traps in the drainage systems for vehicle and plant servicing areas, canteen kitchen, etc?              | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.22 Are the oil interceptors/grease traps maintained properly?                                                                                    | <input type="checkbox"/>            | <input type="checkbox"/>            | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |               |

|                                                                                                                                                 | Not Observed                        | Yes                                 | No                       | Follow up                | Not Applicable                      | Photo/ Remarks |
|-------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------|-------------------------------------|--------------------------|--------------------------|-------------------------------------|----------------|
| 1.23 Is used bentonite recycled where appropriate?                                                                                              | <input type="checkbox"/>            | <input type="checkbox"/>            | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |                |
| 1.24 Is the sediment laden runoff from the unpaved surface to avoid discharge into the nearby aquatic environments, marsh lands and moat ponds? | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| <b>Section 2: Air Quality</b>                                                                                                                   |                                     |                                     |                          |                          |                                     |                |
| 2.01 Are there wheel washing facilities with high pressure jets provided at every vehicle exit point?                                           | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 2.02 Are vehicles washed to remove any dusty materials from their bodies and wheels before leaving construction sites?                          | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 2.03 Are the excavated materials or exposure soil surface sprayed with water during handling?                                                   | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 2.04 Are stockpiles of dusty materials sprayed with water, covered or placed in sheltered areas?                                                | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 2.05 Is the exposed earth properly treated within six months after the last construction activities?                                            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 2.06 Are the access roads sprayed with water to maintain the entire road surface wet or paved and speed control (<15km/hr)?                     | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 2.07 Is the surface where any drilling, cutting, polishing or breaking operation continuously sprayed with water?                               | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 2.08 Is the load on vehicles covered entirely by clean impervious sheeting?                                                                     | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 2.09 Is the loading of materials to a level higher than the side and tail boards during transportation by vehicles avoided?                     | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 2.10 Is the road leading to the construction site within 30m of the vehicle entrance kept clear of dusty materials?                             | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 2.11 Is dark smoke emission from plant/equipment avoided?                                                                                       | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 2.12 Are de-bagging, batching and mixing processes carried out in sheltered areas (3-sided roofed enclosure) during the use of bagged cement?   | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 2.13 Are site vehicles travelling within the speed limit (<15km/hour)?                                                                          | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 2.14 Are hoardings of not less than 2.4m high provided along the site boundary, which adjoins areas accessible to the public?                   | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 2.15 Is open burning avoided?                                                                                                                   | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 2.16 Are any materials dropped on the roads (Outside the site boundaries) had clean up immediately?                                             | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| <b>Section 3: Noise</b>                                                                                                                         |                                     |                                     |                          |                          |                                     |                |
| 3.01 Are noisy equipment and activities positioned as far as practicable from the sensitive receivers?                                          | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 3.02 Is silenced equipment adopted?                                                                                                             | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 3.03 Is idle equipment turned off or throttled down?                                                                                            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 3.04 Are all plant and equipment well maintained and in good condition?                                                                         | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 3.05 Are noise barriers or enclosures provided at areas where construction activities cause noise impact on sensitive receivers?                | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 3.06 Are hand held breakers fitted with valid noise emission labels during operation?                                                           | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 3.07 Are air compressors fitted with valid noise emission labels during operation?                                                              | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 3.08 Are flaps and panels of mechanical equipment closed during operation?                                                                      | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| 3.09 Are Construction Noise Permit(s) applied for percussive piling works?                                                                      | <input type="checkbox"/>            | <input type="checkbox"/>            | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |                |
| 3.10 Are Construction Noise Permit(s) applied for general construction works during restricted hours?                                           | <input type="checkbox"/>            | <input type="checkbox"/>            | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |                |
| 3.11 Are valid Construction Noise Permit(s) posted at site entrances?                                                                           | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |
| <b>Section 4: Waste/Chemical Management</b>                                                                                                     |                                     |                                     |                          |                          |                                     |                |
| 4.01 Are receptacles available for general refuse collection?                                                                                   | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            |                |

|                                                                                                                      | Not Observed                        | Yes                                 | No                       | Follow up                | Not Applicable           | Photo/ Remarks |
|----------------------------------------------------------------------------------------------------------------------|-------------------------------------|-------------------------------------|--------------------------|--------------------------|--------------------------|----------------|
| 4.02 Is general refuse sorting or recycling implemented?                                                             | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.03 Is general refuse disposed of properly and regularly?                                                           | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.04 Is the Contractor registered as a chemical waste producer?                                                      | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.05 Are the chemical waste containers properly labelled?                                                            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.06 Are the chemical wastes stored in proper storage areas?                                                         | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.07 Is the chemical waste storage area properly labelled?                                                           | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.08 Is the chemical waste storage area used for storage of chemical waste only?                                     | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.09 Are incompatible chemical wastes stored in different areas?                                                     | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.10 Are the chemical wastes disposed of by licensed collectors?                                                     | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.11 Are trip tickets for chemical wastes disposal available for inspection?                                         | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.12 Are chemical/fuel storage areas bunded?                                                                         | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.13 Are designated areas identified for storage and sorting of construction wastes?                                 | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.14 Are construction wastes sorted on site?                                                                         | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.15 Are construction wastes reused?                                                                                 | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.16 Are construction wastes disposed of properly?                                                                   | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.17 Are site hoardings and signboards made of durable materials instead of timber?                                  | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.18 Is trip ticket system implemented for the disposal of construction wastes and records available for inspection? | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.19 Are appropriate procedures followed if contaminated material exists?                                            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.20 Is relevant license/ permit for disposal of construction waste or excavated materials available for inspection? | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| <b>Section 5: Landscape &amp; Visual</b>                                                                             |                                     |                                     |                          |                          |                          |                |
| 5.01 Are retained and transplanted trees in health condition?                                                        | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 5.02 Are retained and transplanted trees properly protected?                                                         | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 5.03 Are surgery works carried out for the damaged trees?                                                            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 5.04 Is damage to trees outside site boundary due to construction activities avoided?                                | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 5.05 Is the night-time lighting controlled to minimize glare to sensitive receivers?                                 | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| <b>Section 6: Others</b>                                                                                             |                                     |                                     |                          |                          |                          |                |
| 6.01 Are relevant Environmental Permits posted at all vehicle site entrances/exits?                                  | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 6.02 Is mosquito control measures adequately implemented?                                                            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |

Remarks:

**Follow up of Last Site Inspection:**

1. The de-silting tank in the working area of Sham Chung has been cleaned.
2. Tree protection with fencing has been provided for the retained trees in Shui Tsui San Tsuen Road.

**Observations recorded in this Site Inspection: (19-Mar-2013)**

Photo 1: Muddy water and debris in exiting u-channel was observed in Tai Shu Ha Road, the Contractor should clean the u-channel properly to avoid drainage blocking.

Photo 2: Generator without drip tray was observed in the working area of Hiu Hing Road, the Contractor should provide drip tray underneath.

## PART A: GENERAL INFORMATION

Environmental Permit No.: EP-327/2009/A

Weather: ☐ Sunny ☐ Fine ☐ Cloudy ☒ Rainy  
 Temperature: 19.7 °C  
 Humidity: ☒ High ☐ Moderate ☐ Low  
 Wind: ☐ Strong ☐ Breeze ☒ Light ☐ Calm

## PART B: SITE AUDIT

### Section 1: Water Quality

|      |                                                                                                                                               | Not Observed                        | Yes                                 | No                       | Follow up                           | Not Applicable                      | Photo/Remarks |
|------|-----------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------|-------------------------------------|--------------------------|-------------------------------------|-------------------------------------|---------------|
| 1.01 | Is an effluent discharge license obtained for the Project?                                                                                    | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.02 | Is the effluent discharged in accordance with the discharge licence?                                                                          | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |               |
| 1.03 | Is the discharge of turbid water avoided?                                                                                                     | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.04 | Are there proper desilting facilities in the drainage systems to reduce SS levels in effluent?                                                | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.05 | Are there channels, sandbags or bunds to divert the surface run-off to sedimentation tanks/desilting system prior discharge?                  | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.06 | Are there any temporary perimeter channels provided at site boundaries to intercept storm runoff from crossing the site?                      | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.07 | Is temporary drainage system (within site boundaries) and the nearby permanent drainage system (outside site boundaries) are well maintained? | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.08 | As excavation proceeds, are temporary access roads protected by crushed stone or gravel?                                                      | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.09 | Are temporary exposed slopes properly covered?                                                                                                | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.10 | Are earthworks final surfaces well compacted or protected?                                                                                    | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.11 | Are manholes adequately covered or temporarily sealed?                                                                                        | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.12 | Are there any procedures and equipment for rainstorm protection?                                                                              | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.13 | Are wheel washing facilities well maintained?                                                                                                 | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.14 | Is overflow runoff from wheel washing facilities avoided?                                                                                     | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.15 | Are there chemical toilets provided on site?                                                                                                  | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.16 | Are chemical toilets properly maintained?                                                                                                     | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.17 | Are the vehicle and plant servicing areas paved and located within roofed areas?                                                              | <input type="checkbox"/>            | <input type="checkbox"/>            | <input type="checkbox"/> | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |               |
| 1.18 | Is the oil leakage from the on-site vehicles/plants or spillage during the fuel refilling avoided?                                            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.19 | Are there any measures to prevent oil leakage entering the temporary/permanent drainage system?                                               | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.20 | Are there any measures to collect spilt cement and concrete washings during concreting works?                                                 | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.21 | Are there any oil interceptors/grease traps in the drainage systems for vehicle and plant servicing areas, canteen kitchen, etc?              | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |               |
| 1.22 | Are the oil interceptors/grease traps maintained properly?                                                                                    | <input type="checkbox"/>            | <input type="checkbox"/>            | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |               |

|                                                                                                                                                 | Not Observed                        | Yes                                 | No                       | Follow up                           | Not Applicable                      | Photo/ Remarks |
|-------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------|-------------------------------------|--------------------------|-------------------------------------|-------------------------------------|----------------|
| 1.23 Is used bentonite recycled where appropriate?                                                                                              | <input type="checkbox"/>            | <input type="checkbox"/>            | <input type="checkbox"/> | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |                |
| 1.24 Is the sediment laden runoff from the unpaved surface to avoid discharge into the nearby aquatic environments, marsh lands and moat ponds? | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| <b>Section 2: Air Quality</b>                                                                                                                   |                                     |                                     |                          |                                     |                                     |                |
| 2.01 Are there wheel washing facilities with high pressure jets provided at every vehicle exit point?                                           | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 2.02 Are vehicles washed to remove any dusty materials from their bodies and wheels before leaving construction sites?                          | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 2.03 Are the excavated materials or exposure soil surface sprayed with water during handling?                                                   | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 2.04 Are stockpiles of dusty materials sprayed with water, covered or placed in sheltered areas?                                                | <input type="checkbox"/>            | <input type="checkbox"/>            | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | Photo 3        |
| 2.05 Is the exposed earth properly treated within six months after the last construction activities?                                            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 2.06 Are the access roads sprayed with water to maintain the entire road surface wet or paved and speed control (<15km/hr)?                     | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 2.07 Is the surface where any drilling, cutting, polishing or breaking operation continuously sprayed with water?                               | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 2.08 Is the load on vehicles covered entirely by clean impervious sheeting?                                                                     | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 2.09 Is the loading of materials to a level higher than the side and tail boards during transportation by vehicles avoided?                     | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 2.10 Is the road leading to the construction site within 30m of the vehicle entrance kept clear of dusty materials?                             | <input type="checkbox"/>            | <input type="checkbox"/>            | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | Photo 1        |
| 2.11 Is dark smoke emission from plant/equipment avoided?                                                                                       | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 2.12 Are de-bagging, batching and mixing processes carried out in sheltered areas (3-sided roofed enclosure) during the use of bagged cement?   | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 2.13 Are site vehicles travelling within the speed limit (<15km/hour)?                                                                          | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 2.14 Are hoardings of not less than 2.4m high provided along the site boundary, which adjoins areas accessible to the public?                   | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 2.15 Is open burning avoided?                                                                                                                   | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 2.16 Are any materials dropped on the roads (Outside the site boundaries) had clean up immediately?                                             | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| <b>Section 3: Noise</b>                                                                                                                         |                                     |                                     |                          |                                     |                                     |                |
| 3.01 Are noisy equipment and activities positioned as far as practicable from the sensitive receivers?                                          | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 3.02 Is silenced equipment adopted?                                                                                                             | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 3.03 Is idle equipment turned off or throttled down?                                                                                            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 3.04 Are all plant and equipment well maintained and in good condition?                                                                         | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 3.05 Are noise barriers or enclosures provided at areas where construction activities cause noise impact on sensitive receivers?                | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 3.06 Are hand held breakers fitted with valid noise emission labels during operation?                                                           | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 3.07 Are air compressors fitted with valid noise emission labels during operation?                                                              | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 3.08 Are flaps and panels of mechanical equipment closed during operation?                                                                      | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| 3.09 Are Construction Noise Permit(s) applied for percussive piling works?                                                                      | <input type="checkbox"/>            | <input type="checkbox"/>            | <input type="checkbox"/> | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |                |
| 3.10 Are Construction Noise Permit(s) applied for general construction works during restricted hours?                                           | <input type="checkbox"/>            | <input type="checkbox"/>            | <input type="checkbox"/> | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |                |
| 3.11 Are valid Construction Noise Permit(s) posted at site entrances?                                                                           | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |
| <b>Section 4: Waste/Chemical Management</b>                                                                                                     |                                     |                                     |                          |                                     |                                     |                |
| 4.01 Are receptacles available for general refuse collection?                                                                                   | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |                |

|                                                                                                                      | Not Observed                        | Yes                                 | No                       | Follow up                | Not Applicable           | Photo/ Remarks |
|----------------------------------------------------------------------------------------------------------------------|-------------------------------------|-------------------------------------|--------------------------|--------------------------|--------------------------|----------------|
| 4.02 Is general refuse sorting or recycling implemented?                                                             | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.03 Is general refuse disposed of properly and regularly?                                                           | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.04 Is the Contractor registered as a chemical waste producer?                                                      | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.05 Are the chemical waste containers properly labelled?                                                            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.06 Are the chemical wastes stored in proper storage areas?                                                         | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.07 Is the chemical waste storage area properly labelled?                                                           | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.08 Is the chemical waste storage area used for storage of chemical waste only?                                     | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.09 Are incompatible chemical wastes stored in different areas?                                                     | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.10 Are the chemical wastes disposed of by licensed collectors?                                                     | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.11 Are trip tickets for chemical wastes disposal available for inspection?                                         | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.12 Are chemical/fuel storage areas bunded?                                                                         | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.13 Are designated areas identified for storage and sorting of construction wastes?                                 | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.14 Are construction wastes sorted on site?                                                                         | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.15 Are construction wastes reused?                                                                                 | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.16 Are construction wastes disposed of properly?                                                                   | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.17 Are site hoardings and signboards made of durable materials instead of timber?                                  | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.18 Is trip ticket system implemented for the disposal of construction wastes and records available for inspection? | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.19 Are appropriate procedures followed if contaminated material exists?                                            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 4.20 Is relevant license/ permit for disposal of construction waste or excavated materials available for inspection? | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| <b>Section 5: Landscape &amp; Visual</b>                                                                             |                                     |                                     |                          |                          |                          |                |
| 5.01 Are retained and transplanted trees in health condition?                                                        | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 5.02 Are retained and transplanted trees properly protected?                                                         | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 5.03 Are surgery works carried out for the damaged trees?                                                            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 5.04 Is damage to trees outside site boundary due to construction activities avoided?                                | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 5.05 Is the night-time lighting controlled to minimize glare to sensitive receivers?                                 | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| <b>Section 6: Others</b>                                                                                             |                                     |                                     |                          |                          |                          |                |
| 6.01 Are relevant Environmental Permits posted at all vehicle site entrances/exits?                                  | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |
| 6.02 Is mosquito control measures adequately implemented?                                                            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |                |

Remarks:

**Follow up of Last Site Inspection:**

1. The debris in exiting u-channel in Tai Shu Ha Road has been cleaned.
2. Drip tray has been provided for the generator in the working area of Hui Hing Road.

**Observations recorded in this Site Inspection: (28-Mar-2013)**

Photo 1: Mud tails was observed in Shui Tsui Sewage Pumping Station, the Contractor should clean it properly.

Photo 2: Generator without drip tray was observed in the working area of Shum Chung, the Contractor should provide drip tray underneath.

Photo 3: Dusty stockpile was observed in Ha Tsuen Sewage Pumping Station, the Contractor should cover it with impervious sheet or remove it off site properly.
