

PLANTING

LANDSCAPE MITIGATION MEASURE 4:
Compensatory Planting along Drainage Channel

Proposed Mitigation Measure

Planting new groups of native woodland trees, shrubs and grasses alongside the drainage channel

Transplant important trees to new locations unaffected by drainage improvement works.

LANDSCAPE MITIGATION MEASURE 5:
New roadside tree planting along maintenance access roads

Conventional Proposal

Access road without shade tree planting

Proposed Mitigation Measure

Access road with shade tree planting at 5m centres. Exact position of trees finalised during detailed design.

Recommended tree species includes Litchi chinensis, Melaleuca quinquervia, Aleurites moluccana, Salix babylonica, Bombax malabaricum, Cassia siamea, Celtis sinensis, Crataeva religiosa, Ficus microcarpa, Litsea monopetala, Cleistocalyx
