Attention: Ms Jacky C M Wong

Dear Madam

Contract No. DC/2009/13

Construction of Sewage Treatment Works at Yung Shue Wan and Sok Kwu Wan

Yung Shue Wan Portion Area

Monthly Environmental Monitoring and Audit (EM&A) Report No. 33 (June 2013)

We refer to the Monthly EM&A Monitoring Report No. 34 for June 2013 received under cover of the email from the Environmental Team, Action-United Environmental Services and Consulting (AUES), dated on 16 July 2013. We have no comment and have verified the captioned report.

Yours faithfully

#### **EXECUTIVE SUMMARY**

ES.01. This is the 34<sup>th</sup> monthly Environmental Monitoring and Audit (EM&A) for Yung Shue Wan (hereinafter 'this Report') for the designated works under Environmental Permit [EP-282/2007], covering a period from 26 May to 25 June 2013 (hereinafter 'the Reporting Period').

## ENVIRONMENTAL MONITORING AND AUDIT ACTIVITIES

ES.02. Environmental monitoring activities under the EM&A programme in this Reporting Period are summarized in the following table.

Issues	Environmental Monitoring Parameters / Inspection	Occasions
Air Quality	1-hour TSP	36
All Quality	24-hour TSP	10
Construction Noise	L <sub>eq (30min)</sub> Daytime	6
Water Quality	Marine Water Sampling	13
Inspection / Audit	ET Regular Environmental Site Inspection	5

- ES.03. In this Reporting Period, marine water monitoring at both flood and ebb tides on 25 June was only carried out at impact stations (WY1 WY3) as the working boat unable to travel far from the coast of Yung Shun Wan due to high surge of the sea.
- ES.04. According to the construction information provided by the Contractor, the marine works in Yung Shue Wan has been completed on 22 April 2013. IAs agreed by the Contractor, the ecology monitoring was ceased in May 2013 due to no ecological impact and concern since the completion of marine work, whereas impact marine water quality monitoring would be ongoing until 25 June 2013.

#### BREACH OF ACTION AND LIMIT (A/L) LEVELS

ES.05. No exceedance in air quality and construction noise monitoring was recorded in this Reporting Period. The statistics of environmental exceedance, NOE issued and investigation of exceedance are summarized in the following table.

Environmental	Monitoring	Action	Limit	Event & Action		1
Issues	Monitoring Parameters	Level	Level	NOE Issued	Investigation	Corrective Actions
Air Quality	1-hour TSP	0	0	0		
7 in Quanty	24-hour TSP	0	0	0		
Construction Noise	L <sub>eq(30min)</sub> Daytime	0	0	0		
	DO	0	0	0		
Water Quality	Turbidity	0	0	0		
	SS	0	0	0	-	
	Sediment Cover (%)					
Ecology (Coral)	Bleaching (%)					
	Mortality (%)					

Note: NOE – Notification of Exceedance

## SITE INSPECTION

ES.06. In this Reporting Period, 5 events of weekly joint inspection by the RE, the Contractor and ET were carried out on 28 May, 4, 11, 18 and 25 June 2013.

# ENVIRONMENTAL COMPLAINT, NOTIFICATION OF SUMMONS AND SUCCESSFUL PROSECUTIONS

ES.07. No written or verbal complaint, environmental summons or successful prosecutions were recorded in this Reporting Period.

#### REPORTING CHANGE

ES.08. In this Reporting Period, no reporting changes were made.

#### **FUTURE KEY ISSUES**

- ES.09. During wet season, the Contractor shall pay attention on the potential water impact as the construction site is adjacent to the coastline. Muddy water and other water quality pollutants via site surface water runoff into the coral zones of Yung Shue Wan seawall, Shek Kok Tsui and O Tsai should be avoided. Mitigation measures for water quality should be fully implemented.
- ES.10. Nevertheless, the Contractor shall keep paying attention on the potential water impact as the construction site is adjacent to the coastline. Muddy water and other water quality pollutants via site surface water runoff into the sea body within Fish culture zone at Picnic Bay and the Secondary recreation contact subzone at Mo Tat Wan should be avoided. Therefore, mitigation measures for water quality should be fully implemented.

#### 1 INTRODUCTION

#### PROJECT BACKGROUND

- 1.01 The Leader Civil Engineering Corporation Limited (Leader) has been awarded the *Contract DC/2009/13 Construction of Sewage Treatment Works at Yung Shue Wan and Sok Kwu Wan* (the Project) by the Drainage Services Department (DSD) on 4 May 2010. The Project is part of an overall plan approved under a statutory EIA for Outlying Islands Sewerage Stage 1 Phase 2 Package J Sok Kwu Wan Sewage Collection and Treatment (Register No. AEIAR-075/2003) and Disposal Facilities and Outlying Islands Sewerage Stage 1 Phase 1 Package C Yung Shue Wan Sewage Treatment Works and Outfall (Register No. EIA-124/BC). The Environmental Permit (EP) No. EP-281/2007 and EP-282/2007 for the Project have been obtained by the DSD on 29 June 2007 for the relevant works. After July 2009, EP-281/2007/A stead EP-281/2007 is EP for Sok Kwu Wan relevant Works.
- 1.02 The Project involves construction of sewage treatment works at Sok Kwu Wan and Yung Shue Wan with a capacity of 1,430m³/day and 2,850m³/day respectively to provide secondary treatment, construction of 2 pumping stations at Sok Kwu Wan and 1 pumping station at Yung Shue Wan, construction of submarine outfall from the coastline and lying of underground sewerage pipeline. The site layout plan for the captioned work under the Project is showing in *Appendix A*
- 1.03 According to the Particular Specification (PS) and *Appendix 25* of the Project, Leader should establish an Environmental Team (ET) to implement the environmental monitoring and auditing works to fulfill the requirements as stipulated in the EM&A Manual. This EM&A Manual is referred to the Appendix D of the Review Report on EIA Study Yung Shue Wan (Final) in January 2007 (Agreement No. CE 20/2005(DS)).
- 1.04 Action-United Environmental Services and Consulting (AUES) has been commissioned by Leader as the ET to implement the relevant EM&A programme. Organization chart of the Environmental Team for the Project is shown in *Appendix B*. For ease of reporting, the proposed EM&A programme for baseline and impact monitoring is spilt to following two stand-alone parts:
  - (a) Proposed EM&A Programme for Baseline and Impact Monitoring Sok Kwu Wan (under EP No. 281/2007/A varied on 23 September 2009)
  - (b) Proposed EM&A Programme for Baseline and Impact Monitoring Yung Shue Wan (under EP No. 282/2007)
- 1.05 This is the 34<sup>th</sup> monthly EM&A Report for Yung Shue Wan Portion Area which presenting the monitoring results and inspection findings in the Reporting Period from 26 May to 25 June 2013.

## REPORT STRUCTURE

**SECTION 13** 

1.06 The Monthly Environmental Monitoring and Audit (EM&A) Report – Yung Shue Wan is structured into the following sections:-

structured into the following sections:-		
SECTION 1	INTRODUCTION	
SECTION 2	PROJECT ORGANIZATION AND CONSTRUCTION PROGRESS	
SECTION 3	SUMMARY OF MONITORING REQUIREMENTS	
<b>SECTION 4</b>	AIR QUALITY MONITORING RESULTS	
<b>SECTION 5</b>	CONSTRUCTION NOISE MONITORING RESULTS	
SECTION 6	WATER QUALITY MONITORING RESULTS	
SECTION 7	ECOLOGY MONITORING RESULTS	
SECTION 8	WASTE MANAGEMENT	
SECTION 9	SITE INSPECTIONS	
SECTION 10	ENVIRONMENTAL COMPLAINTS AND NON-COMPLIANCE	
SECTION 11	IMPLEMENTATION STATUES OF MITIGATION MEASURES	
SECTION 12	IMPACT FORECAST	

CONCLUSIONS AND RECOMMENDATION

## 2 PROJECT ORGANIZATION AND CONSTRUCTION PROGRESS

#### PROJECT ORGANIZATION AND MANAGEMENT STRUCTURE

2.01 Organization structure and contact details of relevant parties with respect to on-site environmental management are shown in *Appendix B*.

#### CONSTRUCTION PROGRESS

- 2.02 The master and three month rolling construction programme are enclosed in *Appendix C* and the major construction activities undertaken in this Reporting Period are listed below:-
  - Construction of road and drainage works in yard area
  - Reinstatement of HEC Cable Trench,
  - Rebar fixing, formwork erection/ removal
  - Backfilling and soil compaction
  - E&M installation
  - Plumb and Drain installation
  - Plastering and painting
  - Applying bitumenous layers
  - Casting concrete for floor finishing
  - Installation of doors and FRP cover

#### SUMMARY OF ENVIRONMENTAL SUBMISSIONS

2.03 Summary of the relevant permits, licences, and/or notifications on environmental protection for this Project in this Reporting Period is presented in *Table 2-1*.

**Table 2-1** Status of Environmental Licenses and Permits

Item	Description	License/Permit Status
1	Air Pollution Control (Construction Dust)	Notified 19/5/2010
	Regulation	Case No: 317486
2	Chemical Waste Producer Registration	Issued on 8/6/2010
		WPN 5213-912-L2720-01
3	Water Pollution Control Ordinance	Issued on 22/9/2010
		WT00007566-2010
4	Billing Account for Disposal of Construction	Issued on 26 May 2010
	Waste	A/C No: 7010815
5	Construction Noise Permit (no.	Issued on 29 January 2013
	GW-RS0074-13)	Valid from 29 January 2013
		until 25 July2013

2.04 Summary of the report submission for EM&A Programme is presented in *Table 2-2*.

Table 2-2 Status of EM&A Programme Submission

Item	EM&A Programme Submission	Status
1	Proposed EM&A Programme for Baseline / Impact	Verified by IEC and submitted to
	Monitoring – Yung Shue Wan	EPD on 8 July 2010
	(TCS00512/09/600/R0011Ver.5)	
2		Verified by IEC and submitted to
	Wan (TCS00512/09/600/R0071Ver.3)	EPD on 25 November 2010
3	Baseline Air and Noise Monitoring Report - Volume 1	Verified by IEC and submitted to
	(TCS00512/09/600/R0061Ver.3)	EPD on 31 August 2010
4	Baseline Monitoring Report Volume 2 - Water Quality	Verified by IEC and submitted to
	(TCS00512/09/600/R0158Ver.2)	EPD on 10 March 2011
5	Baseline Survey for Coral Monitoring – Yung Shue	Verified by IEC and submitted to
	Wan (TCS00512/09/600/R0132Ver.3)	EPD on 17 February 2011

Item	EM&A Programme Submission	Status
6	Methodology of Coral Tagging for Impact Monitoring	Verified by IEC and submitted to
	– Yung Shue Wan	EPD on 28 March 2011
7	Coral Tagging Report	Verified by IEC and submitted to
	(TCS00512/09/600/R0214Ver.4)	EPD on 3 August 2011

## 3 SUMMARY OF BASELINE MONITORING REQUIREMENTS

#### **ENVIRONMENTAL ASPECT**

- 3.01 The EM&A baseline monitoring programme cover the following environmental issues:
  - Air quality;
  - Construction noise;
  - · Marine water quality; and
  - · Ecology monitoring
- 3.02 The ET implements the EM&A programme in accordance with the aforementioned requirements. Detailed air quality, construction noise, water quality and ecology of the EM&A programme are presented in the following sub-sections.
- 3.03 A summary of the air, noise, marine water and ecology monitoring parameters is presented in *Table 3-1*:

**Table 3-1 Summary of the EM&A Requirements** 

<b>Environmental Issue</b>	Parameters
Air Quality	1-hour TSP Monitoring by Real-Time Portable Dust Meter; and
7th Quanty	• 24-hour TSP Monitoring by High Volume Air Sampler.
Noise	• L <sub>eq (30min)</sub> during normal working hours; and
Noise	• L <sub>eq (15min)</sub> during Restricted Hours.
	In-situ Measurements
	<ul> <li>Dissolved Oxygen Concentration (DO) (mg/L);</li> </ul>
	Dissolved Oxygen Saturation (% );
	• Turbidity (NTU);
Marine Water Quality	pH unit;
Warme Water Quanty	• Salinity (ppt);
	Water depth (m); and
	• Temperature (°C).
	Laboratory Analysis
	Suspended Solids (SS) (mg/L)
Ecology	Coral Monitoring

## MONITORING LOCATIONS

## **Air Quality**

- 3.04 Two designated monitoring stations, AC02a located at Yung Shue Wan Refuse Transfer Station and AC04 located at residential area nearby Yung Shue Wan football pitch, were recommended in the *EM&A Manual Section 2.5*. In order to identify and seek for the access of the air monitoring locations designated in the EM&A Manual, site visit was conducted by Leader and ET.
- 3.05 At the site visit, all designated monitoring locations were identified however the premises for high volume sampler installation were objected by the owner or the residents of nearby. So, alternative air monitoring locations were proposed in accordance with the criteria set out in *EM&A manual Section 2.5.2 and 2.5.3*. The proposed alternative air monitoring stations were accepted by the Engineer Representative (ER) and Independent Environmental Checker (IEC) and EPD for endorsement. Details of renewed air monitoring stations are described in *Table 3-2*. The graphical of air monitoring stations is shown in *Appendix D*.

Table 3-2 Location of Air Quality Monitoring Station

Sensitive Receiver Location					
AC02b	The entrance of RE's site office				
AC04c	Next to a power transformer station TP208 Yung Shue Wan and adjacent to the road direct to the construction site				

## **Construction Noise**

3.06 According to *EM&A Manual Section 3.4*, one noise sensitive receivers (NC05) designated for the construction noise monitoring was recommended at Yung Shue Wan Portion Area of the Project. The designated monitoring station is identified and successfully granted the premises. The detailed construction noise monitoring station is described in *Table 3-3* and graphical is shown in *Appendix D*.

**Table 3-3 Location of Construction Noise Monitoring Station** 

Sensitive Receiver	Location
NC05	Roof of North Lamma Clinic

## **Marine Water Quality**

3.07 Two control stations (CY1 and CY2) and three impact stations (WY1-WY3) were recommended in the *EM&A Manual Section 4.5*. Impact stations WY1-WY3 were identified close to the sensitive receivers (the coral colonies in the vicinity of Yung Shue Wan, and secondary contact recreation subzone). It is proposed to monitor the impacts from the construction of the submarine outfall as well as the effluent discharge from the proposed STW on water quality. Two control stations: CY1 and CY2 were recommended at locations representative of the project site in its undisturbed condition and located at upstream and downstream of the works area. The marine water quality monitoring stations to be performed under the Project is described in *Table 3-4* and shown in *Appendix D*.

**Table 3-4 Location of Marine Water Quality Monitoring Station** 

Station	Description	Coordinates			
Station	Description	Easting	Northing		
WY1	Coral colonies on seawall at STW site	829 170	809 550		
WY2	Coral colonies at Shek kok Tsui	829 000	810 400		
WY3	Coral colonies at O Tsai (headland N at SW ferry pier)	829 200	809 850		
CY1 (flood)	Control Station	828 400	810 800		
CY2 (ebb)	Control Station	828 000	808 800		

#### **Coral Monitoring**

3.08 The coral monitoring stations to be performed under the Project is show in *Appendix D*. The ecology monitoring was ceased since the completion of marine work on 22 April 2013. The corresponding letter regards to the completion of marine work in Yung Shue Wan issued by the Contractor is presented in Appendix M.

#### MONITORING FREQUENCY AND PERIOD

3.09 The Impact monitoring carried out in the EM&A programme is basically in accordance with the requirements in *EM&A Manual Sections 2.7, 3.6, 4.7, 4.8, 7.3 and 7.4*. The monitoring requirements are listed as follows:

#### Air Quality Monitoring

Parameters: 1-hour TSP and 24-hour TSP

Frequency: Once in every six days for 24-hour TSP and three times in every six days for

1-hour TSP

<u>Duration</u>: Throughout the construction period

#### **Noise Monitoring**

Parameters:  $L_{eq 30min}$  &  $L_{eq (5min)}$ ,  $L_{10}$  and  $L_{90}$ .

 $L_{eq(15min)}$  &  $L_{eq(5min)}$ ,  $L_{10}$  and  $L_{90}$  during the construction undertaken during Restricted hours (19:00 to 07:00 hours next of normal working day and full day

of public holiday and Sunday)

Frequency: Once per week during 0700-1900 hours on normal weekdays. Restricted hour

monitoring should depend on conditions stipulated in Construction Noise Permit

Duration: Throughout the construction period

## Marine Water Quality Monitoring

Parameters: Duplicate in-situ measurements: water depth, temperature, dissolved oxygen,

pH, turbidity and salinity

HOKLAS-accredited laboratory analysis: suspended solids

<u>Frequency</u>: Three days a week, at mid ebb and mid flood tides. The interval between 2 sets

of monitoring will be more than 36 hours

<u>Sampling</u> (i.) Three depths: 1m below water surface, 1m above sea bottom and at mid-depth when the water depth exceeds 6m.

(ii.) If the water depth is between 3m and 6m, two depths: 1m below water surface and 1m above sea bottom

(iii.) If the water depth is less than 3m, 1 sample at mid-depth is taken

<u>Duration</u>: During the course of marine works

### Coral Monitoring

Parameters: Presence and coverage of hard and soft corals such as diversity,

abundance and health status of the corals in the general area, plus other

physical and biological condition at the underwater environment

<u>Frequency</u>: One per week for the first three months of the marine works. If no

exceedances are reported during the first three months, the frequency may

be reduced to twice every month

<u>Duration</u>: During the course of marine works

### Post-Construction Monitoring – Marine Water

3.10 Upon the marine works (dredging and HDD pipe installation) completion, 4 weeks of post-construction monitoring would be undertaken in accordance with the *Section 4.8 of EM&A Manual*. The requirements of post-construction monitoring such as the parameter, frequency, location and sampling depth is same as the impact monitoring.

## **Post-Construction Monitoring – Ecology Monitoring**

3.11 Following completion of the marine works, post project monitoring should be carried out within two weeks of completion of the marine works (HDD and dredging), and should comprise the same two-tier Rapid Assessment Ecological Assessment (REA) method adopted for the baseline survey.

#### MONITORING EQUIPMENT

#### Air Quality Monitoring

3.12 The 24-hour and 1-hour TSP levels shall be measured by following the standard high volume sampling method as set out in the *Title 40 of the Code of Federal Regulations, Chapter 1 (Part 50), Appendix B.* If the ET proposes to use a direct reading dust meter to measure 1-hour TSP levels, it shall submit sufficient information to the IEC to approve. The filter paper of 24-hour TSP measurement shall be determined by HOKLAS accredited laboratory.

#### Noise Monitoring

3.13 Sound level meter in compliance with the *International Electrotechnical Commission Publications 651: 1979 (Type 1) and 804: 1985 (Type 1)* specifications shall be used for carrying out the noise monitoring. The sound level meter shall be checked using an acoustic calibrator. The wind speed shall be checked with a portable wind speed meter capable of measuring the

wind speed in m/s.

## Water Quality Monitoring

- 3.14 **Dissolved Oxygen and Temperature Measuring Equipment** The instrument should be a portable and weatherproof dissolved oxygen (DO) measuring instrument complete with cable and sensor, and use a DC power source. The equipment should be capable of measuring as included a DO level in the range of 0 20mg L-1 and 0 200% saturation; and a temperature of 0 45 degree Celsius.
- 3.15 **pH Meter** The instrument shall consist of a potentiometer, a glass electrode, a reference electrode and a temperature-compensating device. It shall be readable to 0.1 pH in arrange of 0 to 14.
- 3.16 *Turbidity (NTU) Measuring Equipment* The instrument should be a portable and weatherproof turbidity measuring instrument using a DC power source. It should have a photoelectric sensor capable of measuring turbidity between 0 1000 NTU.
- 3.17 **Water Sampling Equipment** A water sampler should comprise a transparent PVC cylinder, with a capacity of not less than 2 litres, which can be effectively sealed with latex cups at both ends. The sampler should have a positive latching system to keep it open and prevent premature closure until released by a messenger when the sampler is at the selected water depth.
- 3.18 *Water Depth Detector* A portable, battery-operated echo sounder should be used for the determination of water depth at each designated monitoring station. This unit can either be hand held or affixed to the bottom of the work boat.
- 3.19 **Salinity Measuring Equipment** A portable salinometer capable of measuring salinity in the range of 0 40 parts per thousand (ppt) should be provided for measuring salinity of the water at each monitoring location.
- 3.20 **Sample Containers and Storage** Water samples for suspended solids should be stored in high density polythene bottles with no preservative added, packed in ice (cooled to 4°C without being frozen).
- 3.21 *Monitoring Position Equipment* A hand-held or boat-fixed type digital Differential Global Positioning System (DGPS) with way point bearing indication and Radio Technical Commission for maritime (RTCM) Type 16 error message 'screen pop-up' facilities (for real-time auto-display of error messages and DGPS corrections from the Hong Kong Hydrographic Office), or other equipment instrument of similar accuracy, should be provided and used during marine water monitoring to ensure the monitoring vessel is at the correct location before taking measurements.
- 3.22 **Suspended Solids Analysis** Analysis of suspended solids shall be carried out in a HOKLAS or other international accredited laboratory.

## **Coral Monitoring**

3.23 The monitoring equipments used for the coral monitoring could be referred to *Impact Coral Monitoring report* which enclosed in *Appendix M*.

## **EQUIPMENT CALIBRATION**

- 3.24 Calibration of the High Volume Sampler (HVS) is performed upon installation in accordance with the manufacturer's instruction using the NIST-certified standard calibrator (Tisch Calibration Kit Model TE-5025A). The calibration data are properly documented and the records are maintained by ET for future reference.
- 3.25 The 1-hour TSP meter was calibrated by the supplier prior to purchase. Zero response of the equipment was checked before and after each monitoring event. In-house calibration with the

High Volume Sampler (HVS) in same condition was undertaken in yearly basis.

- 3.26 The sound level meter and calibrator are calibrated and certified by a laboratory accredited under HOKLAS or any other international accreditation scheme at yearly basis.
- 3.27 The water quality monitoring equipments such as DO meter, pH Meter, turbidity measuring instrument and salinometer, are calibrated by HOKLAS accredited laboratory of three month intervals.
- 3.28 All updated calibration certificates of the monitoring equipment used for the impact monitoring programme in the Reporting Period would be attached in *Appendix E*.

#### METEOROLOGICAL INFORMATION

3.29 The meteorological information during the construction phase is obtained from the Wong Chuk Hang Station of the Hong Kong Observatory (HKO) due to it nearly the Project site.

## DATA MANAGEMENT AND DATA QA/QC CONTROL

- 3.30 The impact monitoring data are handled by the ET's systematic data recording and management, which complies with in-house Quality Management System. Standard Field Data Sheets (FDS) are used in the impact monitoring programme.
- 3.31 The monitoring data recorded in the equipment e.g. 1-hour TSP meter, sound level meter and Multi-parameter Water Quality Monitoring System, are downloaded directly from the equipments at the end of each monitoring day. The downloaded monitoring data are input into a computerized database properly maintained by the ET. The laboratory results are input directly into the computerized database and QA/QC checked by personnel other than those who input the data. For monitoring activities require laboratory analysis, the local laboratory follows the QA/QC requirements as set out under the HOKLAS scheme for all laboratory testing.

### REPORTING

3.32 It was agreed among the ER, IEC, Contractor and ET that, in order to streamline the EM&A report submission and to cater for the occasional delay in obtaining laboratory analysis results, the cutoff day for each month is the 25<sup>th</sup> i.e. the first day of each report is the 26<sup>th</sup> of the last month and the end day, the 25<sup>th</sup> of that month.

#### DETERMINATION OF ACTION/LIMIT (A/L) LEVELS

3.33 According to the Yung Shue Wan Environmental Monitoring and Audit Manual, the air quality, construction noise, marine water quality and coral monitoring were established, namely Action and Limit levels are listed in *Tables 3-5* to *3-8* as below.

Table 3-5 Action and Limit Levels for Air Quality

Monitoring Station	Action Lev	vel (μg /m³)	Limit Level (µg/m³)			
Momtoring Station	1-hour TSP	1-hour TSP 24-hour TSP 1-hour		24-hour TSP		
AC02b	288	161	500	260		
AC04c	290	176	500	260		

Table 3-6 Action and Limit Levels for Construction Noise

	Recommended Action & Limit Levels of Construction Noise								
Monitoring	Action Level	Limit Level							
Location	0700-190	0 hours on normal weekdays							
NC05	When one or more documented complaints are received	75 dB(A) *							

Note: \* Reduces to 70dB(A) for schools and 65dB(A) during the school examination periods.

Table 3-7 Action and Limit Levels for Marine Water Quality

Downwater	Performance	Impact Station			
Parameter	Criteria	WY1	WY2	WY3	
DO Concentration (Surface and Middle)	Action Level	3.63	3.53	3.61	
(mg/L)	Limit Level	3.32	3.47	3.42	
DO Concentration (Bottom)	Action Level	3.33	2.92	3.36	
(mg/L)	Limit Level	3.23	2.63	3.14	
Turbidity (Depth-Average)	Action Level	10.94	14.16	14.99	
(NTU)	Limit Level	17.35	15.20	16.21	
Suspended Solids (Depth-Average)	Action Level	17.52	14.04	14.52	
(mg/L)	Limit Level	25.62	16.51	16.88	

Table 3-8 Action and Limit Levels for Coral Monitoring

Table 5	-6 Action and Limit Levels for Coral Monitoring
Step	Action
1	Commence tagged coral monitoring at the impact site. If no increase in sedimentation cover/bleaching/partial mortality is observed on the hard corals or partial mortality no the soft/black corals, no action is required. If an increase in sedimentation cover/bleaching/partial mortality is observed on the hard corals or partial mortality on the soft/black corals at one or more impact monitoring stations Step 3 should be enacted, if not, Step 2.
2	If non actions are triggered a formal report should be issued along with evidentiary photographs following completion of the survey. Meanwhile monitoring work and construction works should continue uninterrupted.
3	If during the impact monitoring a 15% increase in the percentage of sedimentation on the hard corals occurs at more than 20% of the tagged coral colonies at the Impact Monitoring Station that is not reported at the Control Monitoring Station, then the Action Level is exceeded (Step 4).
4	If the Action Level is exceeded the IC(E) should inform all parties. The data from the water quality monitoring should also be reviewed. If the water quality monitoring shows no attributable effects of the installation works, then the Action Level is not triggered. If the water quality data indicate exceedances (for SS and/or turbidity) the IC(E) should discus with the Contractor the most appropriate method of reducing suspended solids during construction (e.g. reduce rate of dredging). The water quality data reviewed should then be enacted on the next working day.
5	Monitoring should proceed the following day as per Step 1. If during the Impact Monitoring a 25% increase in the percentage of sedimentation on the hard corals at more than 20% of the tagged coral colonies at the Impact Monitoring Station that is not reported at the Control Monitoring Station, then the Limit Level is exceeded (Step 6). If the Limit Level is not exceeded Step 2 is enacted and work continues according to the mitigated method.
6	If the Limit Level is exceeded the Inspector Officer should inform all parties immediately. Should the Limit Level be exceeded, the Contractor should stop works immediately and work out a solution to the satisfaction of the IC(E), EPD and AFCD. The IC(E) should inform the Contractor to suspend marine construction works until an effective solution is identified. Once the solution has identified and agreed with all parties, backfilling works may re-commence.

3.34 Should non-compliance of the environmental quality criteria occurs, remedial actions will be triggered according to the Event and Action Plan enclosed in *Appendix F*.

## 4 IMPACT MONITORING RESULTS - AIR QUALITY

4.01 As informed by the Contractor, the construction of relevant land works at Yung Shue Wan was commenced on 14 September 2010. The impact EM&A programme was begun as compliance with the contract Particular Specification, Yung Shue Wan EM&A Manual and the EP.

## Result

4.02 In this Reporting Period, the results for 24-hour and 1-hour TSP monitoring are tabulated in *Tables 4-1 and 4-2*. The 24-hour TSP monitoring data are shown in *Appendix G* and the graphical plots are shown in *Appendix H*.

Table 4-1 Summary of 24-hour and 1-hour TSP Monitoring Results at AC02b

- 4.03 As shown in *Tables 4-1 and 4-2*, the 1-hour and 24-hour TSP monitoring results fluctuated below the Action Level during this Reporting Period. No Notification of Exceedance (NOE) of air quality criteria or corrective action was therefore required.
- 4.04 The meteorological information during the impact monitoring days are summarized in *Appendix I*.

## 5 IMPACT MONITORING RESULTS – CONSTRUCTION NOISE

5.01 The noise monitoring results are presented in the following sub-sections.

## Result

5.02 In this report period, 6 construction noise monitoring events were undertaken at designated location NC05. The results for  $L_{eq(30min)}$  are tabulated in *Tables 5-1* and the graphical plots are shown in *Appendix H*.

Table 5-1 Summarized of Construction Noise Monitoring Results at NC05

Date	Start Time	End Time	1 <sup>st</sup> set L <sub>eq5</sub>	$\begin{array}{c} 2^{nd} \\ \text{set} \\ L_{eq5} \end{array}$	$\begin{array}{c} 3^{rd} \\ \text{set} \\ L_{eq5} \end{array}$	4 <sup>th</sup> set L <sub>eq5</sub>	5 <sup>th</sup> set L <sub>eq5</sub>	6 <sup>th</sup> set L <sub>eq5</sub>	$L_{ m eq30}$	Corrected L <sub>eq30</sub> *

Lim	Limit Level			-						

<sup>\*</sup> A façade correction of +3dB(A) has been added according to acoustical principles and EPD guidelines.

5.03 It was noted that no noise complaint (which is an Action Level exceedance) was received. In view of the results shown in *Table 5-1*, all the values are well below 75dB(A), therefore, no Action or Limit Level exceedance was triggered during this Reporting Period.

## 6 IMPACT MONITORING RESULTS – WATER QULAITY

- 6.01 In this Reporting Period, 13 days of water quality monitoring were carried out at the designated locations. Nevertheless, monitoring at both flood and ebb tides on 25 June was only carried out at impact stations (WY1 WY3) as the working boat unable to travel far from the coast of Yung Shun Wan due to high surge of the sea.
- 6.02 Field measurements of both control and impact stations showed that marine water of the depth average of the salinity concentration was within 22.64 to 32.97 ppt, and pH value was within 7.80 to 8.49. The monitoring results including in-situ measurements and laboratory testing results are presented in *Appendix G*. The graphical plots are shown in *Appendix H*.
- 6.03 Monitoring results of 3 key parameters: dissolved oxygen (DO), turbidity and suspended solids in this Reporting Period, are summarized in *Tables 6-1*, 6-2, 6-3 and 6-4. A summary of exceedances for the three parameters: dissolved oxygen (DO), turbidity and suspended solids are shown in *Table 6-5*.

WY3	0	0	0	0	0	0	0	0	0	0
No of Exceedance	0	0	0	0	0	0	0	0	0	0

6.04 For marine water monitoring, no exceedance of Action/Limit level was recorded in this Reporting Period. Therefore, no associated corrective actions were then required.

## 7 IMPACT MONITORING RESULTS – ECOLOGY MONITORING

- 7.01 Impact monitoring for coral shall be conducted initially at a frequency of once per week for the first three months of the marine works (HDD and dredging). If no exceedances are reported during this period, then the frequency may be reduced to twice every month for the reminder of the marine works.
- 7.02 According to the construction information provided by the Contractor, the marine works in Yung Shue Wan has been completed on 22 April 2013. In this Reporting Period, as agreed by the Contractor, the ecology monitoring was ceased due to no ecological impact and concern since the completion of marine work.

#### 8 WASTE MANAGEMENT

8.01 Waste management was carried out by an on-site Environmental Officer or an Environmental Supervisor from time to time.

## **Records of Waste Quantities**

- 8.02 All types of waste arising from the construction work are classified into the following:
  - Construction & Demolition (C&D) material;
  - Chemical waste:
  - General refuse; and
  - Excavated soil.
- 8.03 The quantities of waste for disposal in this Reporting Period are summarized in *Tables 8-1* and 8-2 and the Monthly Summary Waste Flow Table is shown in *Appendix J*. Whenever possible, materials were reused on-site as far as practicable.

Table 8-1 Summary of Quantities of Inert C&D Materials

Type of Waste	Quantity	Disposal Location
C&D Materials (Inert) ('000m <sup>3</sup> )	0	-
Reused in this Contract (Inert) ('000m <sup>3</sup> )	0	-
Reused in other Projects (Inert) ('000m <sup>3</sup> )	0	-
Disposal as Public Fill (Inert) ('000m <sup>3</sup> )	0	Tuen Mun Area 38

Table 8-2 Summary of Quantities of C&D Wastes

Type of Waste	Quantity	Disposal Location
Metals (kg)	0	-
Paper / Cardboard Packing (kg)	0	-
Plastics (kg)	0	-
Chemical Wastes (kg)	0	-
General Refuses (tonne)	10.430	Yung Shue Wan RTS

8.04 There was no site effluent discharged but the estimated volume of surface runoff was less than  $50\text{m}^3$  in this monthly period.

## 9 SITE INSPECTION

- 9.01 According to the Environmental Monitoring and Audit Manual, the environmental site inspection should been formulation by ET Leader. Regular environmental site inspections had been carried out by the ET to confirm the environmental performance. In this Reporting Period, weekly joint-site visit by RE, the Contractor and ET was carried out on 28 May, 4, 11, 18 and 25 June 2013.
- 9.02 The findings/ deficiencies that observed during the weekly site inspection are listed in *Table 9-1* and the relevant checklists are attached in *Appendix K*.

**Table 9-1 Site Observations** 

Date	Findings / Deficiencies	Follow-Up Status
28 May 2013	Stagnant water was observed along the site and within the roofed indoor area. regular clearance of stagnant water is required to avoid mosquito breeding, or mosquito control measures are required.	Most stagnant water was cleared. Mosquito control measures were observed in the remaining stagnant water in the space within concrete wall on 1/F on 4 June 2013.
4 June 2013	No adverse environmental impacts were observed. However, stagnant rain water was observed along the site. Mosquito control measures, preferably drying off the stagnant water are required.	Not required for general reminder.
11 June 2013	No adverse environmental impacts were observed.	N.A.
18 June 2013	No adverse environmental impacts were observed.	N.A.
25 June 2013	No adverse environmental impacts were observed.	N.A.

## 10 ENVIRONMENTAL COMPLAINT AND NON-COMPLIANCE

10.01 No environmental complaint, summons and prosecution was received in this reporting period. The statistical summary table of environmental complaint is presented in *Tables 10-1*, *10-2* and *10-3*.

**Table 10-1** Statistical Summary of Environmental Complaints

#### 11 IMPLEMENTATION STATUS OF MITIGATION MEASURES

11.01 The environmental mitigation measures that recommended in the Yung Shue Wan Environmental Monitoring and Audit Manual covered the issues of dust, noise, water and waste and they are summarized as following:

## **Dust Mitigation Measure**

- 11.02 Installation of 2m high solid fences around the construction site of Pumping Station P2 is recommended. Implementation of the requirements stipulated in the Air Pollution Control (Construction Dust) Regulation and the following good site practices are recommended to control dust emission from the site:
  - Stockpiles of imported material kept on site should be contained within hoardings, dampened and / or covered during dry and windy weather;
  - Material stockpiled alongside trenches should be covered with tarpaulins whenever works are close to village houses;
  - Water sprays should be used during the delivery and handling of cement, sands, aggregates and the like.
  - Any vehicle used for moving sands, aggregates and construction waste shall have properly fitting side and tail boards. Materials should not be loaded to a level higher than the side and tail boards, and should be covered by a clean tarpaulin.

#### **Noise Mitigation Measure**

- 11.03 As detailed in the EIA report, concreting work of the Pumping Station P1a and sewer alignment construction activities would likely cause adverse noise impacts on some of the noise sensitive receivers. Appropriate mitigation measures have therefore been recommended. The mitigation measures recommended in the EIA report are summarised below:
  - (a) Use of quiet equipment for the construction activities of the Pumping Stations and sewer alignment;
  - (b) Use of temporary noise barrier around the site boundary of Pumping Station P1a;
  - (c) Use of kick ripper (saw and lift) method to replace the breaker for pavement removal during sewer alignment construction;
  - (d) Restriction on the number of plant during sewer alignment construction;
  - (e) Use of noise screening structures in the form of acoustic shed or movable barrier wherever practicable and feasible in areas with sufficient clearance and headroom during the construction of sewer alignment;
  - (f) Adoption of manual working method wherever practicable and feasible in areas where the worksites of the proposed sewer alignment are located less than 20m from the residential noise sensitive receivers and less than 30m from the temple and the public library; and
  - (g) Implementation of the following good site practices:
    - Only well-maintained plant should be operated on-site and plant should be serviced regularly during the construction programme.
    - Mobile plant, if any, should be sited as far away from NSRs as possible.
    - Machines and plant (such as trucks) that may be in intermittent use should be shut down between work periods or should be throttled down to a minimum.
    - Plant known to emit noise strongly in one direction should, wherever possible, be orientated so that the noise is directed away from the nearby NSRs.
    - Material stockpiles and other structures should be effectively utilised, wherever practicable, in screening noise from on-site construction activities.

## **Water Quality Mitigation Measure**

11.04 No-dig method using Horizontal Directional Drilling (HDD) would be used for the installation of outfall pipe of about 480 m from shore to minimize the potential water quality impacts arising from the dredging works required for the submarine outfall construction. For the remaining outfall pipe of about 240m and the diffuser section, open trench dredging would still be required.

- 11.05 During the dredging works, the Contractor should be responsible for the design and implementation of the following mitigation measures.
  - Dredging should be undertaken using closed grab dredgers with a total production rate of 55m<sup>3</sup>/hr:
  - Deployment of 2-layer silt curtains with first layer enclosing the grab and the second layer at around 50, from the dredging area while dredging works are in progress;
  - all vessels should be sized such that adequate clearance (i.e. minimum clearance of 0.6m) is maintained between vessels and the sea bed at all states of the tide to ensure that undue turbidity is not generated by turbulence from vessel movement or propeller wash;
  - all pipe leakages should be repaired promptly and plant shall not be operated with leaking pipes;
  - excess material should be cleaned from the decks and exposed fittings of barges before the vessel is moved;
  - adequate freeboard (i.e. minimum of 200m) should be maintained on barges to ensure that decks are not washed by wave action;
  - all barges should be fitted with tight fitting seals to their bottom openings to prevent leakage of material;
  - loading of barges and hoppers should be controlled to prevent splashing of dredged material
    to the surrounding water, and barges and hoppers should not be filled to a level which
    would cause the overflow of materials or sediment laden water during loading or
    transportation; and
  - the decks of all vessels should be kept tidy and free of oil or other substances that might be accidentally or otherwise washed overboard.

## Construction Run-off and Drainage

- 11.06 The Contractor should observe and comply with the Water Pollution Control Ordinance and the subsidiary regulations. The Contractor should follow the practices, and be responsible for the design, construction, operation and maintenance of all the mitigation measures as specified in ProPECC PN 1/94 "Construction Site Drainage". The design of the mitigation measures should be submitted by the Contractor to the Engineer for approval. These mitigation measures should include the following practices to minimise site surface runoff and the chance of erosion, and also to retain and reduce any suspended solids prior to discharge:
  - Provision of perimeter channels to intercept storm-runoff from outside the site. These should be constructed in advance of site formation works and earthworks.
  - Works programmes should be designed to minimize works areas at any one time, thus minimising exposed soil areas and reducing the potential for increased siltation and runoff.
  - Sand/silt removal facilities such as sand traps, silt traps and sediment basins should be provided to remove the sand/silt particles from run-off. These facilities should be properly and regularly maintained. These facilities shall be carefully planned to ensure that they would be installed at appropriate locations to capture all surface water generated on site.
  - Careful programming of the works to minimise soil excavation works during rainy seasons.
  - Exposed soil surface should be protected by paving or hydroseeding as soon as possible to reduce the potential of soil erosion.
  - Trench excavation should be avoided in the wet season, and if necessary, these should be excavated and backfilled in short sections.
  - Open stockpiles of construction materials on site should be covered with tarpaulin or similar fabric.

#### General Construction Activities

11.07 Debris and rubbish generated on-site should be collected, handled and disposed of properly to avoid entering the nearby coastal waters and stormwater drains. All fuel tanks and storage areas should be provided with locks and be sited on sealed areas, within bunds of a capacity equal to 110% of the storage capacity of the largest tank. Open drainage channels and culverts near the works areas should be covered to block the entrance of large debris and refuse.

### Wastewater Arising from Workforce

11.08 Portable toilets shall be provided by the Contractors, where necessary, to handle sewage from the workforce. The Contractor shall also be responsible for waste disposal and maintenance practices

### **Sediment Contamination Mitigation Measure**

- 11.09 The basic requirements and procedures for dredged mud disposal are specified under the WBTC No. 34/2002. The management of the dredging, use and disposal of marine mud is monitored by the MFC, while the licensing of marine dumping is the responsibility of the Director of Environmental Protection (DEP).
- 11.10 The uncontaminated dredged sediment will be loaded onto barges and transported to the designated marine disposal site. Appropriate dredging methods have been incorporated into the recommended water quality mitigation measures including the use of closed-grab dredgers and silt curtains. Category L sediment would be suitable for disposal at a gazetted open sea disposal ground.
- 11.11 During transportation and disposal of the dredged marine sediments, the following measures should be taken to minimize potential impacts on water quality:
  - Bottom opening of barges should be fitted with tight fitting seals to prevent leakage of material. Excess material should be cleaned from the decks and exposed fittings of barges and hopper dredgers before the vessel is moved.
  - Monitoring of the barge loading should be conducted to ensure that loss of material does not take place during transportation. Transport barges or vessels should be equipped with automatic self-monitoring devices as specified by the DEP.

## **Construction Waste Mitigation Measure**

#### Good Site Practices and Waste Reduction Measures

- 11.12 It is not anticipated that adverse waste management related impacts would arise, provided that good site practices are strictly followed. Recommendations for good site practices for the construction waste arising include:
  - Nomination of an approved person, such as a site manager, to be responsible for the implementation of good site practices, arranging for collection and effective disposal to an appropriate facility, of all wastes generated at the site.
  - Training of site personnel in proper waste management and chemical handling procedures.
  - Appropriate measures to minimize windblown litter and dust during transportation of waste by either covering trucks or by transporting wastes in enclosed containers.
  - Provision of sufficient waste disposal points and regular collection for disposal.
  - Separation of chemical wastes for special handling and appropriate treatment at the Chemical Waste Treatment Facility.
  - Regular cleaning and maintenance programme for drainage systems, sumps and oil interceptors.
  - Maintain records of the quantities of wastes generated, recycled and disposed.
- 11.13 In order to monitor the disposal of C&D waste at landfills and to control fly tipping, a trip-ticket system should be included as one of the contractual requirements and implemented by an Environmental Team undertaking the Environmental Monitoring and Audit work. An Independent Environmental Checker should be responsible for auditing the results of the system.
- 11.14 Good management and control can prevent the generation of significant amount of waste. Waste reduction is best achieved at the planning and design stage, as well as by ensuring the implementation of good site practices. Recommendations to achieve waste reduction include:
  - segregation and storage of different types of waste in different containers, skips or stockpiles to enhance reuse or recycling of materials and their proper disposal;

- to encourage collection of aluminium cans by individual collectors, separate labelled bins should be provided to segregate this waste from other general refuse generated by the work force:
- any unused chemicals or those with remaining functional capacity should be recycled;
- use of reusable non-timber formwork to reduce the amount of C&D material;
- prior to disposal of C&D waste, it is recommended that wood, steel and other metals should be separated for re-use and / or recycling to minimise the quantity of waste to be disposed of to landfill;
- proper storage and site practices to minimise the potential for damage or contamination of construction materials; and
- plan and stock construction materials carefully to minimise amount of waste generated and avoid unnecessary generation of waste.

#### General Site Wastes

11.15 A collection area should be provided where waste can be stored prior to removal from site. An enclosed and covered area is preferred for the collection of the waste to reduce 'wind blow' of light material.

## **Chemical Wastes**

- 11.16 After use, chemical waste (eg. cleaning fluids, solvents, lubrication oil and fuel) should be handled according to the Code of Practice on the Packaging, Labelling and Storage of Chemical Wastes. Any unused chemicals or those with remaining functional capacity should be recycled. Spent chemicals should be properly stored on site within suitably designed containers, and should be collected by an approved operator for disposal at the Chemical Waste Treatment Facility or other licenced facility in accordance with the Waste Disposal (Chemical Waste) (General) Regulation under the Waste Disposal Ordinance.
- 11.17 Any service shop and minor maintenance facilities should be located on hard standings within a bunded area, and sumps and oil interceptors should be provided. Maintenance of vehicles and equipment involving activities with potential for leakages and spillage should only be undertaken with the areas appropriately equipped to control these discharges.

### Construction and Demolition Material

- 11.18 The C&D material should be separated on-site into three categories: (i) public fill, the inert portion of the C&D material (e.g. concrete and rubble), which should be re-used on-site or disposed of at a public filling area; (ii) C&D waste for re-use and/or recycling, the non-inert portion of the C&D material, (e.g. steel and other metals, wood, glass and plastic); (iii) C&D waste which cannot be re-used and/or recycled. The waste producers are responsible for its disposal at strategic landfills.
- 11.19 In order to minimise the impact resulting from collection and transportation of material for off-site disposal, it was recommended that inert material should be re-used on-site where possible. Prior to disposal of C&D material, it was also recommended that steel and other metals should be separated for re-use and/or recycling where practicable to minimise the quantity of waste to be disposed of to landfill.

## **Ecology Mitigation Measure**

- 11.20 The following general good practice measures should be adopted to mitigate ecological impacts during marine works (including dredging and HOD);
  - Excess material from vessel loading should be cleaned from the decks and exposed fittings before vessels are moved to the backfilling location;
  - Dredging should cause no foam, oil, grease, scum, litter or other objectionable matter to be present on the water;
  - Adequate freeboard should be maintained to ensure that decks are not washed by wave

- All pie leakages should be repaired promptly and plant Should not be operated with leaking pipes; and
- All banges and other vessels should maintain adequate clearance between vessels and the seabed at all stats of the tide and reduce operational speeds to ensure that undue turbidity is not generated by turbulence from vessel movement or propeller wash.
- 11.21 In the event of exceedances of ecological action or limit level, the Contractor will be required to revise his operations as a further mitigation measure. Revisions to the operation method may include (but not be limited to):
  - Reduction in dredging rate'
  - Restriction of dredging in particular areas to specific periods in the tidal cycle
- 11.22 Should repeated non-compliances with limit level(s) occur the Contractor shall modify his working method until he is able to achieve the required compliances with the limit levels to the satisfaction of the IC(E)

## **Fisheries Mitigation Measure**

11.23 Closed grab dredger, deployment of silt curtains around the immediate dredging area and low dredging rate have been recommended in Water Quality of the EIA report in order to minimise sediment release into the water column.

#### **Landscape & Visual Mitigation Measure**

- 11.24 Mitigation measures recommended in the EIA Report for landscape and visual impacts during the construction stage are summarised below.
  - Screening of site construction works by use of hoarding that is appropriate to its site context;
  - Retaining existing trees and minimising damage to vegetation where possible by close co-ordination and on site alignment adjusted of rising main and gravity sewer pipelines. Tree protective measures should be implemented to ensure trees identified as to be retained are satisfactorily protected during the construction phase;
  - Careful and efficient transplanting of affected trees (1 no.) to temporary or final transplant location (the proposed tree to be transported is a semi-mature *Macaranga tanarius* and is located at the proposed Pumping Station P2 location);
  - Short excavation and immediate backfilling of sections upon completion of works to reduce active site area;
  - Conservation of top-soil for reuse;
  - Night-time light source from marine fleets should be directed away from the residential units
- 11.25 The implementation schedule of mitigation measures is presented in *Appendix L*.
- 11.26 Leader had been implementing the required environmental mitigation measures according to the Yung Shue Wan Environmental Monitoring and Audit Manual subject to the site condition. Environmental mitigation measures generally implemented by Leader in this Reporting Period are summarized in *Table 11-1*.

**Table 11-1 Environmental Mitigation Measures** 

Issues	Environmental Mitigation Measures
Water Quality	<ul> <li>Drainage channels were provided to convey run-off into the treatment facilities; and</li> <li>Drainage systems were regularly and adequately maintained.</li> </ul>

Issues	Environmental Mitigation Measures
Air Quality	<ul> <li>Cover all excavated or stockpile of dusty material by impervious sheeting or sprayed with water to maintain the entire surface wet;</li> <li>Public roads around the site entrance/exit had been kept clean and free from dust; and</li> <li>Tarpaulin covering of any dusty materials on a vehicle leaving the site.</li> </ul>
Noise	<ul> <li>Good site practices to limit noise emissions at the sources;</li> <li>Use of quite plant and working methods;</li> <li>Use of site hoarding or other mass materials as noise barrier to screen noise at ground level of NSRs; and</li> <li>To minimize plant number use at the worksite.</li> </ul>
Waste and Chemical Management	<ul> <li>Excavated material should be reused on site as far as possible to minimize off-site disposal. Scrap metals or abandoned equipment should be recycled if possible;</li> <li>Waste arising should be kept to a minimum and be handled, transported and disposed of in a suitable manner;</li> <li>The Contractor should adopt a trip ticket system for the disposal of C&amp;D materials to any designed public filling facility and/or landfill; and</li> <li>Chemical waste shall be handled in accordance with the Code of Practice on the Packaging, Handling and Storage of Chemical Wastes.</li> </ul>
General	The site was generally kept tidy and clean.

#### 12 IMPACT FORECAST

12.01 Key issues to be considered in the coming month include:

## Water Quality

- Erect of sand bag in proper area to avoid any muddy surface runoff from the loose soil surface or haul road during the rainy days; and
- The accumulated stagnant water should be drained away.

## Air Quality

- Vehicles shall be cleaned of mud and debris before leaving the site;
- Stockpile and loose soil surface shall be covered with tarpaulin sheet or other means to eliminate the fugitive dust;
- Water spaying on the dry haul road and exit/entrance of the site in regular basis is reminded;
   and
- Public roads around the site entrance/exit had been kept clean and free from dust.

## **Noise**

- Works and equipment should be located to minimize noise nuisance from the nearest sensitive receiver; and
- Idle equipments should be either turned off or throttled down;

#### Waste and Chemical Management

- Housekeeping on site shall be improved;
- The Contractor is advised to fence off the construction waste at a designated area in order to maintain the tidiness of the site;
- Drip tray and proper label should be provided for all chemical containers.
- C&D waste should be disposed in regular basis.

#### 13 CONCLUSIONS AND RECOMMENDATIONS

#### **CONCLUSIONS**

- 13.01 This is the 34<sup>th</sup> Monthly EM&A Report covering the construction period from 26 May to 25 June 2013.
- 13.02 No 1-hour and 24-hour TSP result was found to be triggered the Action or Limit Level in this Reporting Period.
- 13.03 No noise complaint (an Action Level exceedance) was received and no construction noise measurement results that exceeded the Limit Level were recorded in this Reporting Period.
- 13.04 No marine water monitoring exceedance was recorded in this Reporting Period.
- 13.05 According to the construction information provided by the Contractor, the marine works in Yung Shue Wan has been completed on 22 April 2013. In this Reporting Period, as agreed by the Contractor, the ecology monitoring was ceased due to no ecological impact and concern since the completion of marine work.
- 13.06 No documented complaint, notification of summons or successful prosecution was received.
- 13.07 In this Reporting Period, joint-site visit by RE, the Contractor and ET was carried out on 28 May, 4, 11, 18 and 25 June 2013. The environmental performance of the Project was considered as satisfactory.
- 13.08 No site inspection was undertaken by external parties i.e. Environmental Protection Department (EPD) or Agriculture, Fisheries and Conservation Department (AFCD) within the Reporting Period.

### RECOMMENDATIONS

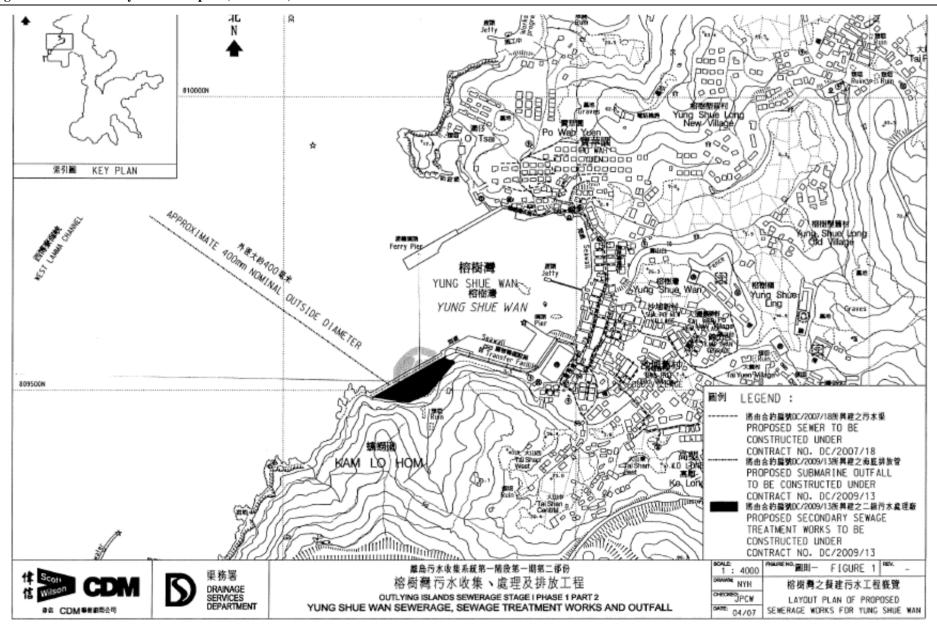

- 13.09 During wet season, the Contractor shall pay attention on the potential water impact as the construction site is adjacent to the coastline. Muddy water and other water quality pollutants via site surface water runoff into the coral zones of Yung Shue Wan seawall, Shek Kok Tsui and O Tsai should be avoided. Mitigation measures for water quality should be fully implemented.
- 13.10 Nevertheless, the Contractor shall keep paying attention on the potential water impact as the construction site is adjacent to the coastline. Muddy water and other water quality pollutants via site surface water runoff into the sea body within Fish culture zone at Picnic Bay and the Secondary recreation contact subzone at Mo Tat Wan should be avoided. Therefore, mitigation measures for water quality should be fully implemented.

## Appendix D

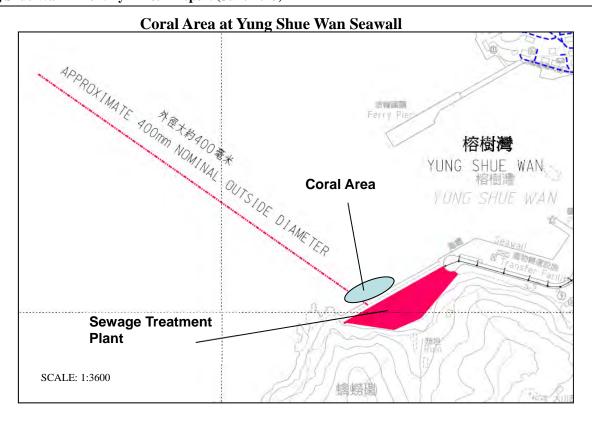

Location of Monitoring Stations (Air Quality / Construction Noise / Water Quality / Dive Surveys of Coral)

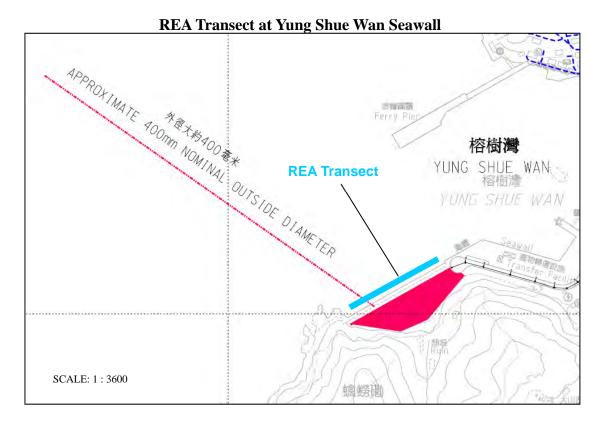

### Coral Area at Sham Wan

## **Appendix E**

**Monitoring Equipments Calibration Certificate** 

### TSP SAMPLER CALIBRATION CALCULATION SPREADSHEET

Location: YSW RE Offices Date of Calibration: 3-Jun-13 Location ID: AC02b Next Calibration Date: 3-Aug-13

Technician: Mr. Ben Tam

### **CONDITIONS**

Sea Level Pressure (hPa) Temperature (°C)

1007
29.8

Corrected Pressure (mm Hg) Temperature (K)

755.25 303

### **CALIBRATION ORIFICE**

	_
Make->	TISCH
Model->	5025A
Serial # ->	1941

Qstd Slope -> Qstd Intercept ->

11662 0.01714

### **CALIBRATION**

Plate	H20 (L)	H2O (R)	H20	Qstd	I	IC	LINEAR
No.	(in)	(in)	(in)	(m3/min)	(chart)	corrected	REGRESSION
18	5.8	5.8	11.6	1.599	59	57.88	Slope = 26.8741
13	4.6	4.6	9.2	1.425	53	52.00	Intercept = 14.4862
10	3.4	3.4	6.8	1.226	49	48.07	Corr. coeff. = 0.9979
7	2.3	2.3	4.6	1.010	42	41.20	
5	1.2	1.2	2.4	0.732	35	34.34	

### Calculations:

Qstd = 1/m[Sqrt(H20(Pa/Pstd)(Tstd/Ta))-b]

IC = I[Sqrt(Pa/Pstd)(Tstd/Ta)]

Qstd = standard flow rate

IC = corrected chart respones

I = actual chart response

m = calibrator Qstd slope

b = calibrator Qstd intercept

Ta = actual temperature during calibration ( deg K

Pstd = actual pressure during calibration ( mm Hg

### For subsequent calculation of sampler flow:

1/m(( I )[Sqrt(298/Tav)(Pav/760)]-b)

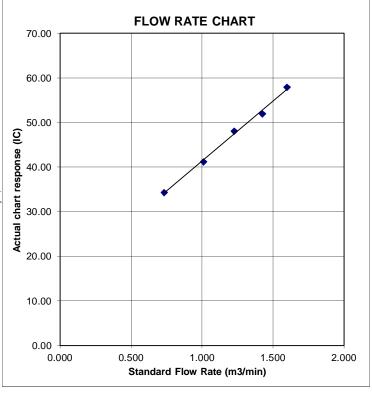

m = sampler slope

b = sampler intercept

I = chart response

Tay = daily average temperature

Pav = daily average pressure

### TSP SAMPLER CALIBRATION CALCULATION SPREADSHEET

Location: YSW Playground Date of Calibration: 3-Jun-13
Location ID: AC04c Next Calibration Date: 3-Aug-13

DATE OF TEST / 測試日期

27 April 2013

TEST RESULTS / 測試結果

The results apply to the particular unit-under-test only.

All results are within manufacturer's specification.

The results are detailed in the subsequent page(s).

The test equipment used for calibration are traceable to National Standards via:

- The Government of The Hong Kong Special Administrative Region Standard & Calibration Laboratory
- Agilent Technologies, USA
- Fluke Everett Service Center, USA
- Rohde & Schwarz Laboratory, Germany

Calibration and Testing Laboratory

# Certificate of Calibration

Certificate No.: C132568

證書編號

- The unit-under-test (UUT) was allowed to stabilize in the laboratory for over 12 hours, and switched on to 1. warm up for over 10 minutes before the commencement of the test.
- 2. Self-calibration using laboratory acoustic calibrator was performed before the test from 6.1.1.2 to 6.4.
- 3. The results presented are the mean of 3 measurements at each calibration point.
- 4. Test equipment:

Equipment ID CL280

Description

Certificate No.

CL281

40 MHz Arbitrary Waveform Generator Multifunction Acoustic Calibrator

C130019 DC110233

Test procedure: MA101N. 5.

- 6. Results:
- 6.1 Sound Pressure Level
- Reference Sound Pressure Level 6.1.1

### 6.1.1.1 Before Self-calibration

	UUT Setting Applied Value						
Range (dB)	Parameter	Frequency Weighting	Time Weighting	Level (dB)	Freq. (kHz)	Reading (dB)	
50 - 130	L <sub>AFP</sub>	A	F	94.00	1	93.6	

### 6.1.1.2 After Self-calibration

UUT Setting		Applie	d Value	UUT	IEC 60651		
Range (dB)	Parameter	Frequency Weighting	Time Weighting	Level (dB)	Freq. (kHz)	Reading (dB)	Type 1 Spec. (dB)
50 - 130	L <sub>AFP</sub>	A	F	94.00	1	94.0	± 0.7

6.1.2 Linearity

	UU	Γ Setting		Applied	d Value	UUT
Range (dB)	Parameter	Frequency Weighting	Time Weighting	Level (dB)	Freq. (kHz)	Reading (dB)
50 - 130	L <sub>AFP</sub>	A	F	94.00	1	94.0 (Ref.)
	1415		0.000	104.00		104.0
				114.00		114.0

IEC 60651 Type 1 Spec. :  $\pm$  0.4 dB per 10 dB step and  $\pm$  0.7 dB for overall different.

The test equipment used for calibration are traceable to the Nation Standards as specified in this certificate. This certificate shall not be reproduced except in full, without the prior written approval of this laboratory

# Certificate of Calibration

Certificate No.: C132568

證書編號

6.2 Time Weighting

6.2.1 Continuous Signal

UUT Setting		Applie	Applied Value		IEC 60651		
Range (dB)	Parameter	Frequency Weighting	Time Weighting	Level (dB)	Freq. (kHz)	Reading (dB)	Type 1 Spec. (dB)
50 - 130	LAFP	A	F	94.00	1	94.0	Ref.
	L <sub>ASP</sub>		S			94.0	± 0.1
	L <sub>AIP</sub>		I			94.1	± 0.1

6.2.2 Tone Burst Signal (2 kHz)

UUT Setting			Applied Value		UUT	IEC 60651	
Range (dB)	Parameter	Frequency Weighting	Time Weighting			Reading (dB)	g Type 1 Spec. (dB)
30 - 110	LAFP	A	F	106.0	Continuous	106.0	Ref.
	L <sub>AFMax</sub>				200 ms	104.9	$-1.0 \pm 1.0$
	L <sub>ASP</sub>		S		Continuous	106.0	Ref.
	L <sub>ASMax</sub>				500 ms	101.9	$-4.1 \pm 1.0$

#### 6.3 Frequency Weighting

6.3.1 A-Weighting

	UUT	Setting		Appli	ed Value	UUT	IEC 60651
Range (dB)	Parameter	Frequency Weighting	Time Weighting	Level (dB)	Freq.	Reading (dB)	Type 1 Spec. (dB)
50 - 130	0 - 130 L <sub>AFP</sub> A F	F	94.00	31.5 Hz	55.1	-39.4 ± 1.5	
					63 Hz	67.9	-26.2 ± 1.5
					125 Hz	77.8	$-16.1 \pm 1.0$
					250 Hz	85.3	$-8.6 \pm 1.0$
					500 Hz	90.7	$-3.2 \pm 1.0$
					1 kHz	94.0	Ref.
			1		2 kHz	95.2	$+1.2 \pm 1.0$
					4 kHz	95.0	$+1.0 \pm 1.0$
					8 kHz	92.9	-1.1 (+1.5; -3.0)
					12.5 kHz	89.8	-4.3 (+3.0 ; -6.0)

本證書所報校正用之測試器材均可溯源至國際標準。局部複印本證書需先獲本實驗所書而批准。

The test equipment used for calibration are traceable to the Nation Standards as specified in this certificate. This certificate shall not be reproduced except in full, without the prior syritten approval of this laborator,

證書編號

6.3.2 C-Weighting

	UUT	Setting		Appli	ed Value	UUT	IEC 60651
Range (dB)	Parameter	Frequency Weighting	Time Weighting	Level (dB)	Freq.	Reading (dB)	Type 1 Spec. (dB)
50 - 130	L <sub>CFP</sub>	C	F	94.00	31.5 Hz	91.4	$-3.0 \pm 1.5$
					63 Hz	93.3	$-0.8 \pm 1.5$
					125 Hz	93.8	$-0.2 \pm 1.0$
					250 Hz	94.0	$0.0 \pm 1.0$
					500 Hz	94.0	$0.0 \pm 1.0$
					1 kHz	94.0	Ref.
					2 kHz	93.8	$-0.2 \pm 1.0$
					4 kHz	93.2	$-0.8 \pm 1.0$
					8 kHz	90.9	-3.0 (+1.5; -3.0)
					12.5 kHz	87.8	-6.2 (+3.0; -6.0)

6.4 Time Averaging

	UUT	Setting		Applied Value					UUT	IEC 60804
Range (dB)	Parameter	Frequency Weighting	Integrating Time	Frequency (kHz)	Burst Duration (ms)	Burst Duty Factor	Burst Level (dB)	Equivalent Level (dB)	Reading (dB)	Type 1 Spec. (dB)
30 - 110	LAcq	A	10 sec.	4	1	1/10	110.0	100	100.0	± 0.5
	1.77	1 1				1/102	1	90	89.8	± 0.5
			60 sec.			1/103		80	79.4	± 1.0
			5 min.	1		1/104	12.27	70	69.2	± 1.0

Remarks: - Mfr's Spec.: IEC 60651 Type 1 & IEC 60804 Type 1

- Uncertainties of Applied Value: 94 dB : 31.5 Hz - 125 Hz : ± 0.35 dB

250 Hz - 500 Hz :  $\pm$  0.30 dB 1 kHz  $: \pm 0.20 \text{ dB}$ 2 kHz - 4 kHz : ± 0.35 dB 8 kHz  $: \pm 0.45 \, dB$ 12.5 kHz  $: \pm 0.70 \text{ dB}$ 

104 dB: 1 kHz  $: \pm 0.10 \text{ dB (Ref. 94 dB)}$ : ± 0.10 dB (Ref. 94 dB) : ± 0.2 dB (Ref. 110 dB 114 dB: 1 kHz

Burst equivalent level

continuous sound level)

### Note:

The values given in this Certificate only relate to the values measured at the time of the test and any uncertainties quoted will not include allowance for the equipment long term drift, variations with environment changes, vibration and shock during transportation, overloading, mis-handling, or the capability of any other laboratory to repeat the measurement. Sun Creation Engineering Limited shall not be liable for any loss or damage resulting from the use of the equipment.

本.遗冶所成校正用之測試器材均可測源至國際標準。 局部複印本證書壽先獲本實驗所書而批准。

<sup>-</sup> The uncertainties are for a confidence probability of not less than 95 %.

The test equipment used for calibration are traceable to the Nation Standards as specified in this certificate. This certificate shall not be reproduced except in full; without the prior written approval of this laboratory

# Certificate of Calibration 校正證書

Certificate No.: C132228

證書編號

ITEM TESTED / 送檢項目 (Job No. / 序引編號: IC13-0878)

Description / 儀器名稱 : Acoustical Calibrator (EQ081)

Manufacturer/製造商 : Brüel & Kjær

Model No. / 型號 : 4231 Serial No. / 編號 : 2326408

Supplied By / 委託者 : Action-United Environmental Services and Consulting

Unit A, 20/F., Gold King Industrial Building, 35-41 Tai Lin Pai Road, Kwai Chung, N.T.

TEST CONDITIONS / 測試條件

Temperature / 溫度 : (23 ± 2)°C Relative Humidity / 相對濕度 : (55 ± 20)%

Line Voltage / 電壓 : ---

TEST SPECIFICATIONS / 測試規範

Calibration check

DATE OF TEST / 測試日期 : 15 April 2013

TEST RESULTS / 測試結果

The results apply to the particular unit-under-test only.

All results are within manufacturer's specification.

The results are detailed in the subsequent page(s).

The test equipment used for calibration are traceable to National Standards via:

- The Government of The Hong Kong Special Administrative Region Standard & Calibration Laboratory
- Rohde & Schwarz Laboratory, Germany
- Fluke Everett Service Center, USA

- Agilent Technologies, USA

Tested By 測試

Certified By 核證 K C Lee

K M Wu

Date of Issue 簽發日期 16 April 2013

The test equipment used for calibration are traceable to the Nation Standards as specified in this certificate. This certificate shall not be reproduced except in full, without the prior written approval of this laboratory.

本證書所載校正用之測試器材均可溯源至國際標準。局部復印本證書需先獲本實驗所書面批准。

Calibration and Testing Laboratory

## Certificate of Calibration 校正證書

Certificate No.: C132228

證書編號

1. The unit-under-test (UUT) was allowed to stabilize in the laboratory for over 12 hours before the commencement of the test.

2. The results presented are the mean of 3 measurements at each calibration point.

3. Test equipment:

Equipment ID CL130 CL281 TST150A DescriptionCertificate No.Universal CounterC123541Multifunction Acoustic CalibratorDC110233Measuring AmplifierC120886

4. Test procedure : MA100N.

5. Results:

5.1 Sound Level Accuracy

UUT Nominal Value	Measured Value (dB)	Mfr's Spec. (dB)	Uncertainty of Measured Value (dB)
94 dB, 1 kHz	94.0	± 0.2	± 0.2
114 dB, 1 kHz	114.0		

5.2 Frequency Accuracy

UUT Nominal Value	Measured Value	Mfr's	Uncertainty of Measured Value (Hz)
(kHz)	(kHz)	Spec.	
1	1.000 0	1 kHz ± 0.1 %	± 0.1

Remark: The uncertainties are for a confidence probability of not less than 95 %.

### Note:

The values given in this Certificate only relate to the values measured at the time of the test and any uncertainties quoted will not include allowance for the equipment long term drift, variations with environment changes, vibration and shock during transportation, overloading, mis-handling, or the capability of any other laboratory to repeat the measurement. Sun Creation Engineering Limited shall not be liable for any loss or damage resulting from the use of the equipment.

The test equipment used for calibration are traceable to the Nation Standards as specified in this certificate. This certificate shall not be reproduced except in full, without the prior written approval of this laboratory.

本設古所載校正用之測試器材均可溯源至國際標準。局部複印本證書畫先獲本實驗所書面批准。

## REPORT OF EQUIPMENT PERFORMANCE CHECK/CALIBRATION

CONTACT: MR BEN TAM

CLIENT: ACTION UNITED ENVIRO SERVICES
ADDRESS: RM A 20/F., GOLDEN KING IND BLDG,

NO. 35-41 TAI LIN PAI ROAD,

KWAI CHUNG, N.T., HONG KONG

PROJECT: -

### **COMMENTS**

It is certified that the item under calibration/checking has been calibrated/checked by corresponding calibrated equipment in the laboratory.

Maximum Tolerance and calibration frequency stated in the report, unless otherwise stated, the internal aceptance criteria of ALS will be followed.

Scope of Test:

Dissolved Oxygen, Turbidity, pH, Salinity and Temperature

Equipment Type: Brand Name:

SONDE YSI

Model No.: Serial No.:

YSI 6820 / 650MDS 02J0912/02K0788 AA

Equipment No.:

--

Date of Calibration: 16 April, 2013

### **NOTES**

This is the Final Report and supersedes any preliminary report with this batch number.

Results apply to sample(s) as submitted. All pages of this report have been checked and approved for release.

### **ISSUING LABORATORY: HONG KONG**

### REPORT OF EQUIPMENT PERFORMANCE CHECK/CALIBRATION

Work Order:

HK1309651

Date of Issue:

17/04/2013

Client:

**ACTION UNITED ENVIRO SERVICES** 

Equipment Type:

SONDE

Brand Name:

YSI

Model No.:

YSI 6820 / 650MDS 02J0912/02K0788 AA

Serial No.:

Equipment No.:

Date of Calibration:

16 April, 2013

Date of next Calibration:

16 July, 2013

Parameters:

**Dissolved Oxygen** 

Method Ref: APHA (21st edition), 45000; G

Expected Reading (mg/L)	Displayed Reading (mg/L)	Tolerance (mg/L)	
5.51	7.86	2.35	
8.65	8.66	0.01	
	Tolerance Limit (±mg/L)	0.20	

pH Value

Method Ref: APHA 21st Ed. 4500H:B

Expected Reading (pH Unit)	Displayed Reading (pH Unit)	Tolerance (pH unit)
4.0	3.98	-0.02
7.0	6.92	-0.08
10.0	9.97	-0.03
	Tolerance Limit (±pH unit)	0.20

Salinity

Method Ref: APHA (21st edition), 2520B

Expected Reading (NTU)	Displayed Reading (NTU)	Tolerance (%)
0	0.08	1
10	10.83	8.3
20	21.15	5.7
30	32.28	7.6
	Tolerance Limit (±%)	10.0

**Temperature** 

Method Ref: Section 6 of International Accreditation New Zealand Technical

Guide No. 3 Second edition March 2008: Working Thermometer Calibration Procedure.

Expected Reading (°C)	Displayed Reading (°C )	Tolerance (°C )	
12.0	11.40	-0.6	
23.0	22.54	-0.5	
42.5	42.68	0.2	
	Tolerance Limit (±°C)	2.0	

**Turbidity** 

Method Ref: APHA (21st edition), 2130R

Expected Reading (NTU)	Displayed Reading (NTU)	Tolerance (%)
0	-0.2	
40	42.6	6.5
80	78.0	-2.5
400	435.5	8.9
800	782.9	-2.1
	Tolerance Limit (±%)	10.0

Remark: "Displayed Reading" presents the figures shown on item under calibration / checking regardless of equipment precision or significant figures.

## Appendix F

**Event and Action Plan** 

## **Air Quality**

EVENT	ACTION			
	ET	IC(E)	ER	CONTRACTOR
ACTION LEVEL		`		•
Exceedance for one sample	Identify source, investigate the causes of exceedance and propose remedial measures;     Inform IC(E) and ER;     Repeat measurement to confirm finding;     Increase monitoring frequency to daily.	Check monitoring data submitted by ET;     Check Contractor's working method.	1. Notify Contractor.	Rectify any unacceptable practice;     Amend working methods if appropriate.
2. Exceedance for two or more consecutive samples	<ol> <li>Identify source;</li> <li>Inform IC(E) and ER;</li> <li>Advise the ER on the effectiveness of the proposed remedial measures;</li> <li>Repeat measurements to confirm findings;</li> <li>Increase monitoring frequency to daily;</li> <li>Discuss with IC(E) and Contractor on remedial actions required;</li> <li>If exceedance continues, arrange meeting with IC(E) and ER;</li> <li>If exceedance stops, cease additional monitoring.</li> </ol>	<ol> <li>Check monitoring data submitted by ET;</li> <li>Check Contractor's working method;</li> <li>Discuss with ET and Contractor on possible remedial measures;</li> <li>Advise the ET on the effectiveness of the proposed remedial measures;</li> <li>Supervise Implementation of remedial measures.</li> </ol>	<ol> <li>Confirm receipt of notification of failure in writing;</li> <li>Notify Contractor;</li> <li>Ensure remedial measures properly implemented.</li> </ol>	<ol> <li>Submit proposals for remedial to ER within 3 working days of notification;</li> <li>Implement the agreed proposals;</li> <li>Amend proposal if appropriate.</li> </ol>
		LIMIT LEVEL		
Exceedance for one sample	Identify source, investigate the causes of exceedance and propose remedial measures;     Inform ER, Contractor and EPD;     Repeat measurement to confirm finding;     Increase monitoring frequency to daily;     Assess effectiveness of Contractor's remedial actions and keep IC(E), EPD and ER informed of the results.	<ol> <li>Check monitoring data submitted by ET;</li> <li>Check Contractor's working method;</li> <li>Discuss with ET and Contractor on possible remedial measures;</li> <li>Advise the ER on the effectiveness of the proposed remedial measures;</li> <li>Supervise implementation of remedial measures.</li> </ol>	Confirm receipt of notification of failure in writing;     Notify Contractor;     Ensure remedial measures properly implemented.	Take immediate action to avoid further exceedance;     Submit proposals for remedial actions to IC(E) within 3 working days of notification;     Implement the agreed proposals;     Amend proposal if appropriate.
Exceedance for two or more consecutive samples	<ol> <li>Notify IC(E), ER, Contractor and EPD;</li> <li>Identify source;</li> <li>Repeat measurement to confirm findings;</li> <li>Increase monitoring frequency to daily;</li> <li>Carry out analysis of Contractor's working procedures to determine possible mitigation to be implemented;</li> <li>Arrange meeting with IC(E) and ER to discuss the remedial actions to be taken;</li> <li>Assess effectiveness of Contractor's remedial actions and keep IC(E), EPD and ER informed of the results;</li> <li>If exceedance stops, cease additional monitoring.</li> </ol>	Discuss amongst ER, ET, and     Contractor on the potential remedial actions;      Review Contractor's remedial actions whenever necessary to assure their effectiveness and advise the ER accordingly;      Supervise the implementation of remedial measures.	<ol> <li>Confirm receipt of notification of failure in writing;</li> <li>Notify Contractor;</li> <li>In consolidation with the IC(E), agree with the Contractor on the remedial measures to be implemented;</li> <li>Ensure remedial measures properly implemented;</li> <li>If exceedance continues, consider what portion of the work is responsible and instruct the Contractor to stop that portion of work until the exceedance is abated.</li> </ol>	<ol> <li>Take immediate action to avoid further exceedance;</li> <li>Submit proposals for remedial actions to IC(E) within 3 working days of notification;</li> <li>Implement the agreed proposals;</li> <li>Resubmit proposals if problem still not under control;</li> <li>Stop the relevant portion of works as determined by the ER until the exceedance is abated.</li> </ol>

### **Construction Noise**

EVENT	ACTION			
	ET	IC(E)	ER	CONTRACTOR
Action Level	<ol> <li>Notify IC(E) and Contractor;</li> <li>Carry out investigation;</li> <li>Report the results of investigation to the IC(E), ER and Contractor;</li> <li>Discuss with the Contractor and formulate remedial measures;</li> <li>Increase monitoring frequency to check mitigation effectiveness</li> </ol>	<ol> <li>Review the analysed results submitted by the ET;</li> <li>Review the proposed remedial measures by the Contractor and advise the ER accordingly;</li> <li>Supervise the implementation of remedial measures.</li> </ol>	<ol> <li>Confirm receipt of notification of failure in writing;</li> <li>Notify Contractor;</li> <li>Require Contractor to propose remedial measures for the analysed noise problem;</li> <li>Ensure remedial measures are properly implemented.</li> </ol>	<ol> <li>Submit noise mitigation proposals to IC(E);</li> <li>Implement noise mitigation proposals.</li> </ol>
Limit Level	<ol> <li>Identify source;</li> <li>Inform IC(E), ER, EPD and Contractor;</li> <li>Repeat measurements to confirm findings;</li> <li>Increase monitoring frequency;</li> <li>Carry out analysis of Contractor's working procedures to determine possible mitigation to be implemented;</li> <li>Inform IC(E), ER and EPD the causes and actions taken for the exceedances;</li> <li>Assess effectiveness of Contractor's remedial actions and keep IC(E), EPD and ER informed of the results;</li> <li>If exceedance stops, cease additional monitoring.</li> </ol>	1. Discuss amongst ER, ET, and Contractor on the potential remedial actions;  2. Review Contractors remedial actions whenever necessary to assure their effectiveness and advise the ER accordingly;  3. Supervise the implementation of remedial measures.	<ol> <li>Confirm receipt of notification of failure in writing;</li> <li>Notify Contractor;</li> <li>Require Contractor to propose remedial measures for the analysed noise problem;</li> <li>Ensure remedial measures properly implemented;</li> <li>If exceedance continues, consider what portion of the work is responsible and instruct the Contractor to stop that portion of work until the exceedance is abated.</li> </ol>	1. Take immediate action to avoid further exceedance; 2. Submit proposals for remedial actions to IC(E) within 3 working days of notification; 3. Implement the agreed proposals; 4. Resubmit proposals if problem still not under control; 5. Stop the relevant portion of works as determined by the ER until the exceedance is abated.

## **Water Quality**

EVENT ACTION				
EVENT	ET	IC(E)	ER	CONTRACTOR
ACTION LEVEL		TC(E)	ER	CONTRACTOR
Exceedance for one sampling day	<ol> <li>Repeat in-situ measurement on the next day of exceedance to confirm findings;</li> <li>Identify source(s) of impact;</li> <li>Inform ICE, Contractor, ER, EPD and AFCD; and</li> <li>Check monitoring data, all plant, equipment and Contractor's working methods.</li> </ol>	Check monitoring data submitted by ET and Contractor's working methods	Confirm receipt of notification of non-compliance in writing; and     Notify Contractor	Information the ER and confirm notification of the non-compliance in writing;     Rectify unacceptable practice; and 3. Amend working methods if appropriate
Exceedance for two or more consecutive sampling days	<ol> <li>Same as the above;</li> <li>Inform ICE, Contractor, ER, EPD and AFCD;</li> <li>Discuss mitigation measures with IC(E), RE and Contractor;</li> <li>Ensure well implementation of mitigation measures; and</li> <li>Increase the monitoring frequency to daily until no exceedance of Action Level</li> </ol>	Contractor on possible remedial actions; 3. Review the proposed mitigation measures submitted by Contractor and advise the ER accordingly; and 4. Supervise the implementation of mitigation measures.	Discuss with IC(E) on the proposed mitigation measures;     Ensure well implementation of mitigation measures; and     Assess the effectiveness of the implemented mitigation measures	Same as the above;     Check all plant and equipment and consider changes of working methods;     Submit proposal of additional mitigation measures to ER within 3 working days of notification and discuss with ET, IC(E), and ER; and Implement the agreed mitigation measures
		LIMIT LEVEL		
Exceedance for one sampling day	<ol> <li>Repeat in-situ measurement on the next day of exceedance to confirm findings;</li> <li>Identify source(s) of impact;</li> <li>Inform ICE, Contractor, ER, EPD and AFCD;</li> <li>Check monitoring data, all plant, equipment and Contractor's working methods; and</li> <li>Discuss mitigation measures with IC(E), RE and Contractor</li> </ol>	Check monitoring data submitted by ET and Contractor's working method     Discuss with ER and Contractor on possible	<ol> <li>Confirm receipt of notification failure in writing; and</li> <li>Discuss with IC(E), ET and</li> <li>Contractor on the proposed mitigation measures; and</li> <li>Request Contractor to review the working methods</li> </ol>	notification of the failure in writing; 2. Rectify unacceptable practice;
Exceedance for two or more consecutive sampling days	Same as the above;     Ensure mitigation measures are implemented; and     Increase the monitoring frequency to daily until no exceedance of Limit Level for two consecutive days	Same as the above; and     Supervise the Implementation of mitigation measures	Same as the above;     Ensure well implementation of mitigation measures     Make agreement on the mitigation measures to be implemented; and     Consider and instruct, if necessary, the Contractor to stow down or to stop all or part of the construction activities until no exceedance of limit level	measures; 4. Resubmit proposals of mitigation measures if problem still not under control; and

## **Coral Monitoring**

EVENT	ACTION		
	ET	CONTRACTOR	ER/ IC(E)
Action Level being exceeded	Inform contractor, AFCD and EPD immediately; Discuss mitigation measure with ER/IC(E) and Contractor; Ensure mitigation measures are implemented.	Inform the Engineer and confirm notification of the non-compliance in writing;  Propose mitigation measure to ER/IC€ within 1 working day and discuss with Et and ER/IC(E);  Ensure mitigation measures are implemented.	Inform contractor, Review water quality monitoring data;  Determine whether water quality monitoring data shows effects attributable to the backfilling works;  If water quality monitoring data indicates effects attributable to backfilling works, then make agreement on mitigation measures to be implemented;  If water quality monitoring data indicates no effects attributable to backfilling works then Action Level is not triggered;  Assess the effectiveness of the implemented mitigation
Limit Level	Inform contractor, AFCD and EPD immediately; Discuss mitigation measure with ER/IC(E) and Contractor; Ensure mitigation measures are implemented.	Inform the Engineer and confirm notification of the non-compliance in writing;  Suspend backfilling operations;  Propose mitigation measure to ER/IC(E) within 3 working days and discuss with Et and ER/IC(E);  Implement the agreed mitigation measures.	measures.  Inform contractor to suspend backfilling operations;  Make agreement on the mitigation measures to be implemented;  Assess the effectiveness of the implemented mitigation measures.

## Meteorological Data Extracted from HKO during the Reporting Period

Date		Weather
26-May-13	Sun	Hot, sunny intervals. moderate south to southeasterly winds.
27-May-13	Mon	Fine, very hot, light to moderate southerly winds.
28-May-13	Tue	Fine, very hot, light to moderate southerly winds.
29-May-13	Wed	Fine, very hot, light to moderate southerly winds.
30-May-13	Thu	Fine, very hot, light to moderate southerly winds.
31-May-13	Fri	Fine, very hot, light to moderate southerly winds.
1-Jun-13	Sat	Fine, very hot, light to moderate southerly winds.
2-Jun-13	Sun	Fine, very hot, light to moderate southerly winds.
3-Jun-13	Mon	Cloudy, showers, squally thunderstorms, moderate south to southwesterly winds.
4-Jun-13	Tue	Fine, very hot, light to moderate southerly winds.
5-Jun-13	Wed	Fine, very hot, light to moderate southerly winds.
6-Jun-13	Thu	Fine, very hot, light to moderate southerly winds.
7-Jun-13	Fri	Cloudy, showers, squally thunderstorms, moderate south to southwesterly winds.
8-Jun-13	Sat	Cloudy, showers, squally thunderstorms, moderate south to southwesterly winds.
9-Jun-13	Sun	Cloudy, showers, moderate north to northeasterly winds
10-Jun-13	Mon	Cloudy, showers, moderate north to northeasterly winds
11-Jun-13	Tue	Cloudy, showers, moderate north to northeasterly winds
12-Jun-13	Wed	Cloudy, a few showers, moderate to fresh northeasterly winds.
13-Jun-13	Thu	Cloudy, a few showers, moderate to fresh northeasterly winds.
14-Jun-13	Fri	Cloudy, rain, moderate to fresh easterly winds, strong offshore and on high ground.
15-Jun-13	Sat	Cloudy, rain, moderate to fresh easterly winds, strong offshore and on high ground.
16-Jun-13	Sun	Hot, sunny periods, a few showers, mderate east to southeasterly winds
17-Jun-13	Mon	Hot, sunny periods, a few showers, moderate east to southeasterly winds
18-Jun-13	Tue	Hot, sunny periods, isolated showers, Moderate southeasterly winds.
19-Jun-13	Wed	Hot, sunny periods, isolated showers, Moderate southeasterly winds.
20-Jun-13	Thu	Hot, sunny periods, a few showers, moderate east to southeasterly winds
21-Jun-13	Fri	Hot, sunny periods, a few showers, moderate east to southeasterly winds
22-Jun-13	Sat	Hot, sunny periods, isolated showers, Moderate southeasterly winds.
23-Jun-13	Sun	Cloudy, rain, Moderate to fresh southerly winds.
24-Jun-13	Mon	Cloudy, rain, Moderate to fresh southerly winds.
25-Jun-13	Tue	Hot, isolated showers, moderate to fresh southwesterly winds

Section	1: Water Quality									
1.01	s an effluent discharge license obtained for the Project?		$\overline{\checkmark}$							
1.02 ls	s the effluent discharged in accordance with the discharge licence?						1 <u>- 1112</u>			
1.03 1	s the discharge of turbid water avoided?									
1.04 <sup>A</sup>	Are there proper desilting facilities in the drainage systems to reduce SS levels in effluent?		$\checkmark$							
1.05	Are there channels, sandbags or bunds to direct surface run-off to sedimentation tanks?									
1.06 <sup>/</sup> i	Are there any perimeter channels provided at site boundaries to ntercept storm runoff from crossing the site?		$\checkmark$							
1.07 I	s drainage system well maintained?									
	As excavation proceeds, are temporary access roads protected by crushed stone or gravel?						· · · · · · · · · · · · · · · · · · ·			
1.09	Are temporary exposed slopes properly covered?									
1.10	Are earthworks final surfaces well compacted or protected?		$\overline{\checkmark}$							
1.11	Are manholes adequately covered or temporarily sealed?		$\checkmark$							
1.12	Are there any procedures and equipment for rainstorm protection?		$\checkmark$							
1.13	Are wheel washing facilities well maintained?									
1.14	ls runoff from wheel washing facilities avoided?					$\overline{\checkmark}$				
1.15	Are there toilets provided on site?									
1.16	Are toilets properly maintained?		$\overline{\checkmark}$							
	Are the vehicle and plant servicing areas paved and located within roofed areas?	' <b></b>				$\square$				
1.18	Is the oil/grease leakage or spillage avoided?		$\overline{\checkmark}$							
	Are there any measures to prevent leaked oil from entering the drainage system?		$\checkmark$							
	Are there any measures to collect spilt cement and concrete washings during concreting works?	· 🗌	$\overline{\checkmark}$							
4.64	Are there any oil interceptors/grease traps in the drainage systems for vehicle and plant servicing areas, canteen kitchen, etc?	· 🗌								

Environmental Team – Weekly Site Inspection and Audit Checklist – Yung Shue Wan

AUES

Note:	Not Obs.: Not Observed; Yes: Compliance; No: Non-Compliance; Follow Up: Observations requiring follow-Up actions N/A: Not Applicable	Not Obs.	Yes	No	Follow Up	N/A	Photo/ Remarks
1,22	Are the oil interceptors/grease traps maintained properly?					$\checkmark$	
1.23	Is used bentonite recycled where appropriate?					$\overline{\checkmark}$	
1.24	Designated settlement area for runoff/wheel wash waste is provide and located at the streambed with 1-2m deep, 12m long and around 50m3 capacities for sedimentation.						
1.25	No excavation is undertaken in the settlement area.					$\checkmark$	
1.26	Concreting wastes water should be neutralized below the pH Action Levels before discharge.					$\checkmark$	
1.27	Mobile toilets should provide on site and located away the stream course.		$\overline{\checkmark}$				
1.28	License collector should be employed for handling the sewage of mobile toilet.						
1.29	Is ponding /stand water avoided?		$\checkmark$				Note 1
Section	on 2: Air Quality						
2.01	Are there wheel washing facilities with high pressure jets provided at every vehicle exit point?					$\overline{\mathbf{V}}$	·
2.02	Are vehicles washed to remove any dusty materials from their bodies and wheels before leaving construction sites?		$\overline{\checkmark}$				
2.03	Are the excavated materials sprayed with water during handling?						
2.04	Are stockpiles of dusty materials sprayed with water, covered or placed in sheltered areas?					$\checkmark$	
2.05	Is the exposed earth properly treated within six months after the last construction activities?					$\checkmark$	
2.06	Are the access roads sprayed with water to maintain the entire road surface wet or paved?						
2.07	Is the surface where any drilling, cutting, polishing or breaking operation continuously sprayed with water?						
2.08	Is the load on vehicles covered entirely by clean impervious sheeting?						· · · ·
2.09	Is the loading of materials to a level higher than the side and tail boards during transportation by vehicles avoided?					$\checkmark$	
2,10	Is the road leading to the construction site within 30m of the vehicle entrance kept clear of dusty materials?						
2.11	Is dark smoke emission from plant/equipment avoided?		$\checkmark$				
2.12	Are de-bagging, batching and mixing processes carried out in sheltered areas during the use of bagged cement?					$\overline{\checkmark}$	
2.13	Are site vehicles travelling within the speed limit not more than 15km/hour?					$\overline{\checkmark}$	
2.14	Are hoardings of not less than 2.4m high provided along the site boundary, which adjoins areas accessible to the public?		$\checkmark$				
2.15	Is open burning avoided?						
2.16	Excavated materials from the stream must be removed from the site on the same day. The materials shall be stored in covered impermeable skips awaiting removal from site.						
Sect	ion 3: Noise			_			
3.01	Are noisy equipment and activities positioned as far as practicable from the sensitive receivers?						
3.02	Is silenced equipment adopted?					$\overline{\square}$	
3.03	Is idle equipment turned off or throttled down?	<u> </u>					
3.04	Are all plant and equipment well maintained and in good condition?						
3.05	Are noise barriers or enclosures provided at areas where construction activities cause noise impact on sensitive receivers?					$\overline{\square}$	Sec. 2
3.06	Are hand held breakers fitted with valid noise emission labels during operation?						
3.07	Are air compressors fitted with valid noise emission labels during operation?					$\overline{\checkmark}$	

Note:	Not Obs.: Not Observed; Yes: Compliance; No: Non-Compliance; Follow Up: Observations requiring follow-Up actions N/A: Not Applicable	Not Obs.	Yes	No	Follow Up	N/A	Photo/ Remarks
3.08	Are flaps and panels of mechanical equipment closed during operation?					$\checkmark$	
3.09	Are Construction Noise Permit(s) applied for percussive piling works?						
3.10	Are Construction Noise Permit(s) applied for general construction works during restricted hours?						
3.11	Are valid Construction Noise Permit(s) posted at site entrances?						
3.12	Use of quiet plant had been used on site to minimise the construction noise impact to the surrounding residences/dwellings					$\checkmark$	
3.13	(Level 1 mitigation measures).  Temporary/Moveable noise barrier or site hoarding are provide or erect at the site boundary to minimise the noise impact of the closest NSRs or stationary equipments shield by the noise barrier which cannot visible from NSRs (Level 2 mitigation measure)  Temporary/Moveable noise barrier equal to or more than 3m height					<b>I</b>	
3.14	with 10kg/m2 are provide for noise mitigation measures (Level 2 mitigation measures).					$\overline{\checkmark}$	
Sectio	on 4: Waste/Chemical Management				_		
4.01	Waste Management Plan had been submit to Engineer for approval.						
4.02	Are receptacles available for general refuse collection?						
4.03	Is general refuse sorting or recycling implemented?						· · · · · · · · · · · · · · · · · · ·
4.04	Is general refuse disposed of properly and regularly?		$\checkmark$				
4.05	Is the Contractor registered as a chemical waste producer?					$\checkmark$	<u></u>
4.06	Are the chemical waste containers and storage area properly labelled?					$\checkmark$	
4.07	Are the chemical wastes stored in proper storage areas?					V	
4.08	Is the chemical container or equipment provided with drip tray?						
4.09	Is the chemical waste storage area used for storage of chemical waste only?						
4.10	Are incompatible chemical wastes stored in different areas?					$\square$	
4.11	Are the chemical wastes disposed of by licensed collectors?						
4.12	Are trip tickets for chemical wastes disposal available for inspection?						<del></del>
4.13	Are chemical/fuel storage areas bounded?					V	
4.14	Are designated areas identified for storage and sorting of construction wastes?					$\checkmark$	
4.15	Are construction wastes sorted (inert and non-inert) on site?		$\checkmark$				
4.16	Are construction wastes reused?		$\checkmark$				
4.17	Are construction wastes disposed of properly?		$\checkmark$				bdatt**
4.18	Are site hoardings and signboards made of durable materials instead of timber?		V				
4.19	Is trip ticket system implemented for the disposal of construction wastes and records available for inspection?						
4.20	Are appropriate procedures followed if contaminated material exists?					$\checkmark$	
4.21	Is relevant license/ permit for disposal of construction waste or excavated materials available for inspection?					$\checkmark$	
4.22	Site cleanliness and appropriate waste management training had		$\checkmark$				
4.23	Contaminated sediments will be managed according to WBTC						

Note:	Not Obs.: Not Observed; Yes: Compliance; No: Non-Compliance; Follow Up: Observations requiring follow-Up actions N/A: Not Applicable	Not Obs.	Yes	No	Follow Up	N/A	Photo/ Remarks
Section	on 5: Landscape & Visual			<del></del> -			
5.01	Are retained and transplanted trees in health condition?		$\checkmark$				
5.02	Are retained and transplanted trees properly protected?		$\checkmark$				<del>.</del>
5.03	Are surgery works carried out for the damaged trees?	$\checkmark$					
5.04	Is damage to trees outside site boundary due to construction activities avoided?		$\checkmark$				
5.05	Is the night-time lighting controlled to minimize glare to sensitive receivers?						
Secti	on 6: Others						
6.01	Are relevant Environmental Permits posted at all vehicle site entrances/exits?					$\checkmark$	
6.02	Are the warning sign or larvicidal oil record shown clearly at the construction site?

1.22	Are the oil interceptors/grease traps maintained properly?						
1.23	Is used bentonite recycled where appropriate?					$\checkmark$	
1.24	Designated settlement area for runoff/wheel wash waste is provide and located at the streambed with 1-2m deep, 12m long and around 50m3 capacities for sedimentation.					$\overline{\checkmark}$	
1.25	No excavation is undertaken in the settlement area.					$\checkmark$	
1.26	Concreting wastes water should be neutralized below the pH Action Levels before discharge.						
1.27	Mobile toilets should provide on site and located away the stream course.						
1.28	License collector should be employed for handling the sewage of mobile toilet.		$\checkmark$				
1.29	Is ponding /stand water avoided?		$\checkmark$				
Sectio	n 2: Air Quality						
2.01	Are there wheel washing facilities with high pressure jets provided at every vehicle exit point?					$\sqrt{}$	
2.02	Are vehicles washed to remove any dusty materials from their bodies and wheels before leaving construction sites?						
2.03	Are the excavated materials sprayed with water during handling?					$\sqrt{}$	
2.04	Are stockpiles of dusty materials sprayed with water, covered or placed in sheltered areas?					$\checkmark$	
2.05	Is the exposed earth properly treated within six months after the last construction activities?					$\sqrt{}$	
2.06	Are the access roads sprayed with water to maintain the entire road surface wet or paved?		$\checkmark$				
2.07	Is the surface where any drilling, cutting, polishing or breaking operation continuously sprayed with water?						
2.08	Is the load on vehicles covered entirely by clean impervious sheeting?					$\checkmark$	
2.09	Is the loading of materials to a level higher than the side and tail boards during transportation by vehicles avoided?					$\checkmark$	
2.10	Is the road leading to the construction site within 30m of the vehicle entrance kept clear of dusty materials?					$\sqrt{}$	
2.11	Is dark smoke emission from plant/equipment avoided?		$\checkmark$				
2.12	Are de-bagging, batching and mixing processes carried out in sheltered areas during the use of bagged cement?					$\checkmark$	
2.13	Are site vehicles travelling within the speed limit not more than 15km/hour?					$\checkmark$	
2.14	Are hoardings of not less than 2.4m high provided along the site boundary, which adjoins areas accessible to the public?		$\checkmark$				
2.15	Is open burning avoided?		$\checkmark$				
2.16	Excavated materials from the stream must be removed from the site on the same day. The materials shall be stored in covered impermeable skips awaiting removal from site.					$\checkmark$	
Sectio	n 3: Noise						
3.01	Are noisy equipment and activities positioned as far as practicable from the sensitive receivers?					$\sqrt{}$	
3.02	Is silenced equipment adopted?						
3.03	Is idle equipment turned off or throttled down?	$\checkmark$					
3.04	Are all plant and equipment well maintained and in good condition?		$\checkmark$				
3.05	Are noise barriers or enclosures provided at areas where construction activities cause noise impact on sensitive receivers?					$\sqrt{}$	
3.06	Are hand held breakers fitted with valid noise emission labels during operation?						
3.07	Are air compressors fitted with valid noise emission labels during operation?					$\sqrt{}$

		• the decks of all vessels should be kept tidy and free of oil or other substances that might be accidentally or otherwise washed overboard.						
2.5.39	4.12.4	Construction Run-off and Drainage	Construction works	Contractor				ProPECC
		Implementation of the following site practices outlined in ProPECC PN 1/94 for "Construction Site Drainage"	sites					PN 1/94
		• Provision of perimeter channels to intercept storm-runoff from outside the site. These should be constructed in advance of site formation works and earthworks.						
		• Works programmes should be designed to minimize works areas at any one time, thus minimizing exposed soil areas and reducing the potential for increased siltation and runoff.						
		• Sand / silt removal facilities such as sand traps, silt traps and sediment basins should be provided to remove the sand / silt particles from run-off. These facilities should be properly and regularly maintained. These facilities should be carefully planned to ensure that they would be installed at appropriate locations to capture all surface water generated on site.						
		• Careful programming of the works to minimise soil excavation works during rainy seasons.						
		• Exposed soil surface should be protected by paving or hydroseeding as soon as possible to reduce the potential of soil erosion.						
		• Trench excavation should be avoided in the wet season, and if necessary, these should be excavated and backfilled in short sections.						
		Open stockpiles of construction materials on site should be covered with tarpaulin or similar fabric						
2.5.39	4.12.5	General Construction Activities	Construction works	Contractor		√		
		<ul> <li>Debris and rubbish generated on-site should be collected, handled and disposed of properly to avoid entering the nearby coastal waters and stormwater drains.</li> </ul>	sites
