### EXECUTIVE SUMMARY

Allied Environmental Consultants Limited (AEC) has been appointed to conduct an environmental monitoring and audit (EM&A) program for the proposed Joint User Complex and Wholesale Fish Market at Area 44, Tuen Mun. The construction works was commenced on 31<sup>st</sup> July 2008. This report is the second quarterly EM&A report, which summarizes the environmental monitoring and audit results recorded during the period from 1<sup>st</sup> February 2009 to 30<sup>th</sup> April 2009.

Based on the monitoring results, the air quality and construction noise level complied with the environmental requirements in EM&A Manual. There were no environmental complaints received in this quarter. No notification of summons or prosecution was received.

Construction activities undertaken from February 2009 to April 2009 included jack piling, underground foundation works, drainage diversion, ELS and pile cap construction, underground building services, ELS and concrete footing for tower crane and ground floor superstructure. Potential environmental impacts include dust generation from stockpiles of dusty materials, the drainage diversion work the superstructure and the underground building services; noise from operation of the equipments and jack piling; runoff from underground building services and the storage of various C&D and chemical wastes. The Contractor should properly implement the required environmental mitigation measures as per the implementation schedule in the EM&A manual to ensure no significant adverse environmental impacts to be arisen from the construction works. The Contractor was reminded to maintain good housekeeping throughout the construction phase.

Joint User Complex and Wholesale Fish Market at Area 44, Tuen Mun Third Quarterly Environmental Monitoring & Audit Report (February 2009 - April 2009)

### 1. PROJECT BACKGROUND

A Joint User Complex and Wholesale Fish Market (WFM Complex) at Area 44 in Tuen Mun is proposed to be designed and built by Architectural Services Department on behalf of Agriculture, Fisheries and Conservation Department, Marine Department, and Food and Environmental Hygiene Department of the Hong Kong SAR. The WFM Complex is to provide a permanent site for the relocation of the existing temporary wholesale fish market at Tuen Mun Area 27 and to accommodate a community hall and dragon boat racing spectator stand for public use. The proposed development is a 3-storey complex to accommodate the wholesale fish market at the ground floor, a community hall on the first and second floors, and an extensive landscaped deck on roof level. The proposed Wholesale Fish Market is categorized as a designated project under the Environmental Impact Assessment Ordinance (EIAO) and therefore a detailed Environmental Impact Assessment (EIA-085/2002) has been conducted in year 2002 and an Environmental Permit (EP-296/2007) was issued by Environmental Protection Department in December 2007.

The subject site is located at Castle Peak Bay of Tuen Mun given in Figure 1. The subject site is bounded to the north by a future local open space presently used as a temporary car park, to the east by Castle Peak Bay typhoon shelter, to the south by a future lorry park and to the west by Wu Shan Road. Yuet Wu Villa being the nearest residential establishment is located at around 85m from the site boundary.

#### 1.1 **Project Organization and Contact Personnel**

Key personnel and contact particulars are summarized in Table 1.

### 2. SENSITIVE RECEIVERS

Air Sensitive Receivers (ASRs) within 500m include Yuet Wu Villa, Lawn Bowling Field, Tennis Court, which are less than 100m away from the subject site. Tuen Mun Wu Hong Clinic is located to the west at about 100m to the site boundary. Two secondary schools, namely Ka Chi Secondary School and South Tuen Mun Government Secondary School, are approximately 300m to the south of the site boundary.

Noise Sensitive Receivers (NSRs) within 300m are Yuet Wu Villa, Siu Hei Court, Yan Chai Hospital Low Chan Chor Si Primary School and Wu King Estate. The nearest NSR will be Block 15 of Yuet Wu Villa.

### 3. SUMMARY OF EM&A REQUIREMENT

For regular impact monitoring, the sampling frequency of at least once in every six-days, shall be strictly observed at the monitoring station for 24-hr TSP monitoring. For 1-hr TSP monitoring, the sampling frequency of at least three times in every six-days should be undertaken when the highest dust impact occurs. For noise monitoring, one set of measurement between 0700-1900 hours on normal weekdays. Leq(30 min) shall be used as the monitoring parameter.

From baseline monitoring results, the proposed Action and Limit Levels for air quality are summarized in Table 2. The average baseline 1-hr TSP value of  $129\mu g/m^3$  and 24-hr TSP value of  $65\mu g/m^3$  measured at Block 15, Yuet Wu Villa was used to determine the action and limit level for air quality impact monitoring. The proposed Action and Limit Levels for construction noise are summarized in Table 3.

Table 2 Action and Limit Level for Air Quality Impact Monitoring at Yuet Wu Villa

Parameters	Baseline Level (µg/m³)	Action Level (μg/m³)	Limit Level (µg/m³)
24 Hour TSP Level	65	173	260
1 Hour TSP Level	129	334	500

<u>Table 3</u> Action and Limit Levels for Construction Noise Impact Monitoring

Time Period	Action Level	Limit Level
Daytime (0700-1900 hours) on weekdays	When one documented compliant is received	Dwelling 75dB(A) <sup>1</sup> School 70dB(A) <sup>1</sup> (65dB(A) during examinations) <sup>1</sup>
1900-2300 on any day and 0700-2300 on Sunday and general holidays, for use of PME <sup>2</sup>	When one documented compliant is received	65dB(A) <sup>3</sup>
All days during the night-time (2300-0700 hours) <sup>2</sup>	When one documented compliant is received	50dB(A) <sup>3</sup>

Note: 1. Construction noise criteria stipulated in the TM-EIAO

Should non-compliance of the above Action and Limit levels occurs, the contractor shall undertake corresponding action in accordance with the proposed Event Action Plan given in EM&A Manual. A summarized general Event Action Plan is given in Table 4. Details should be referred to the Event Action Plan in the EM&A Manual.

Table4 Event Action Plan

Level	Step 1	Step 2	Step 3
Action	<ul> <li>Identify source</li> <li>Check monitoring data and working methods</li> </ul>	<ul> <li>Contact project         manager to discuss         and implement         remedial action</li> <li>Rectify any         unacceptable practice</li> <li>Amend working         methods if         appropriate</li> <li>If exceedance         continues, commence         additional monitoring</li> </ul>	<ul> <li>Notify client/project manager following correct of the situation</li> <li>Cease additional monitoring if exceedance stops</li> </ul>
Limit	<ul> <li>Identify source</li> <li>Notify client/project manager</li> <li>Check monitoring data and working methods</li> <li>Repeat measurement to confirm finding</li> <li>Commence additional</li> </ul>	<ul> <li>Take immediate action to avoid further exceedance</li> <li>Submit proposal for remedial actions to client/project manager within 3 working days</li> <li>Implement the agreed proposal</li> </ul>	<ul> <li>Notify client/project manager following correction of the situation</li> <li>Cease additional monitoring if exceedance stops</li> </ul>

Issue 1 \_\_\_\_\_\_AEC

<sup>2.</sup> A Construction Noise Permit (CNP) shall be required for the carrying out of the construction work during the restricted hours (1900-2300 on any day and 0700-2300 on Sunday and general holidays, for use of PME; and All days during the night-time (2300-0700 hours))

<sup>3.</sup> Area sensitivity rating of the monitoring location is "B".

	J

monitoring	• If exceedance	
	continues, amend and	
	resubmit the proposal	

### 4. MONITORING METHODOLOGY

### 4.1 Monitoring Programme

Air quality monitoring and noise monitoring were conducted at Block 15, Yuet Wu Villa. Air quality monitoring station was set up at the roof top of the residential block and noise monitoring was conducted at 1.2m above ground level at the junction of Wu Sau Street and Wu On Street as given in Figure 2 and 3. Figure 4 and 5 show photos taken during monitoring at the two locations.

A construction site for the proposed Junior Police Officers' Married Quarters is located at Wu Hong Street which is 110m northwest from the monitoring location, which is also a potential major source of the TSP generation. Figure 6 shows the photos of the construction site.

### 4.2 Air Quality Monitoring

1-hour and 24-hour TSP air quality monitoring was conducted at the designated air quality monitoring location using a High Volume TSP Sampler (Model No: Anderson GMWS-2310 ACCU-VOL) at the designated location. The Calibration Record of the High-Volume TSP Sampler is given in Appendix A. 24-hour TSP samples were taken every six days. 1-hour TSP samples were taken three times a day between 0700-1900 hours.

### 4.3 Noise Monitoring

Noise monitoring was conducted at the designated noise monitoring location between 0700-1900 hours using a sound level meter which complies with the International Electrotechnical Commission Publications 651:1979 (Type 1) and 804:1985 (Type 1). Noise instrumentation details are given in Table 5 and the Calibration Certificate for the sound level meter and calibrator is given in Appendix B.

Table 5 Noise Monitoring Equipment

Manufacturer	Type/Model No.	Equipment
RION	Model NL 31	Precision Sound Level
		Analyzer with windshield
RION	Model NC 73	Calibrator

6

Noise levels measurements were recorded in terms of thirty minutes A-weighted equivalent continuous sound pressure level (Leq(30min)) on a weekly basis. The sound level meter was calibrated immediately prior to and following each noise measurement. The meter was mounted on a tripod at a height of 1.2m and the microphone was positioned at 1m away the building façade of the noise monitoring station facing the construction site.

Noise measurements were not made in the presence of fog, rain, and wind with a steady speed exceeding 5m/s or wind with gusts exceeding 10m/s. The wind speed was checked with a portable anemometer capable of measuring the wind speed in m/s.

### 5. RESULTS

### 5.1. Air Quality

No exceedance was recorded in this quarter. Summary and graphical plots of air quality monitoring record of 1-hour TSP levels and 24-hour TSP levels are provided in Appendices C and D.

### 5.2. Noise

Noise monitoring results in terms of  $L_{eq(30min)}$ ,  $L_{10(30min)}$   $L_{90(30min)}$  were measured at the designated noise monitoring location.  $L_{10}$  and  $L_{90}$  represent sound levels that are exceeded 10% and 90% of the time respectively. Normally,  $L_{10}$  measurements can be considered as the average peak levels, whilst  $L_{90}$  levels can be considered as the average background noise levels.

No exceedance was recorded in this quarter. Summary of noise monitoring record is provided in Appendix E.

### 5.3. Weather Conditions

Weather data of the monitoring station were obtained from the nearest Hong Kong Observatory (HKO) Tuen Mun automatic weather station located at Tuen Mun Town Park (63 mPD). Table 6 summarizes the wind data during the monitoring dates. Wind record from HKO is shown in Appendix F.

Table 6 Summary of Weather Conditions during the Monitoring Period

Date	Weather	Prevailing Wind Direction	Daily Average Wind Speed (m/s)
4 Feb 2009	Sunny	S	2.11
10 Feb 2009	Sunny	SW	1.57
16 Feb 2009	Cloudy	S	2.97
21 Feb 2009	Sunny	SE	4.09
27 Feb 2009	Cloudy	S	2.41
5 Mar 2009	Cloudy	SE	2.91
11 Mar 2009	Cloudy	S	2.66
17 Mar 2009	Sunny	SE	2.29
23 Mar 2009	Cloudy	S	2.59
28 Mar 2009	Cloudy	SW	2.01
3 Apr 2009	Cloudy	S	2.44
9 Apr 2009	Sunny	SE	2.48
15 Apr 2009	Sunny	S	2.92
21 Apr 2009	Cloudy	NE	3.33
27 Apr 2009	Cloudy	SE	3.17

### 6. SITE INSPECTION & AUDIT

Weekly site inspections were carried out by representatives of the ET. Thirteen site inspections were conducted on 6<sup>th</sup>, 13<sup>th</sup>, 20<sup>th</sup>, and 27<sup>th</sup> February 2009; 6<sup>th</sup>, 12<sup>th</sup>, 20<sup>th</sup>, 27<sup>th</sup> March 2009 and 3<sup>rd</sup>, 9<sup>th</sup>, 17<sup>th</sup>, 24<sup>th</sup>, and 29<sup>th</sup> April 2009. The environmental condition on site was acceptable. There was a minor exception that the stockpiles were only partially covered during site inspections on 29<sup>th</sup> April 2009 and it was rectified immediately.

The mitigation measures undertaken by the Contractor are effective in minimizing the environmental impact. However, the Contractor should implement these mitigation measures more effectively in order to prevent causing any adverse environmental impact.

During site inspections in this quarter, no non-conformance of implementation of environmental mitigation measures was identified. All environmental mitigation measures for construction stages stated in the approved EIA Report, EM&A Manual and Environmental Permit shall be carried out throughout the whole construction period as shown in Appendix G.

# 7. NON-COMPLIANCE, COMPLAINTS, NOTIFICATIONS OF SUMMONS AND SUCCESSFUL PROSECUTIONS

In this quarter, no complaints, inspection notices, and notifications of summons or prosecution were received.

### 8. OTHERS

10844.76 tonnes of inert C&D waste was disposed at public fill. 21.32 tonnes of waste was disposed to landfill. No chemical waste was transported off site in this quarter.

### 9. RECOMMENDATIONS AND CONCLUSIONS

#### 9.1. Recommendations

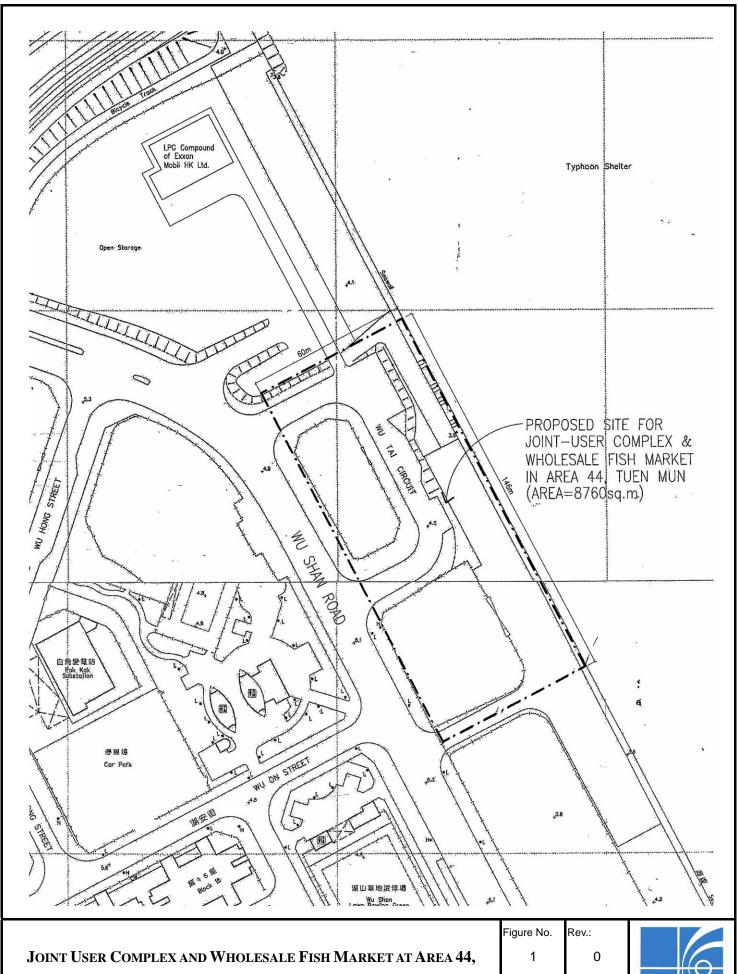

In accordance with the environmental site audits undertaken during the reporting quarter, the following recommendations are made:

• Stockpiles should be covered properly when no works were being undertaken.

The ET will keep track on the EM&A programme to ensure compliance of environmental requirements and proper implementation of all necessary mitigation measures.

### 9.2. Conclusions

Environmental monitoring has been carried out for the proposed Joint User Complex and Wholesale Fish Market at Area 44, Tuen Mun. 1-hour and 24-hour TSP air quality monitoring and noise monitoring was conducted at Block 15, Yuet Wu Villa during the period from 1<sup>st</sup> February 2009 to 30<sup>th</sup> April 2009, in accordance with EM&A Manual and the requirement under Environmental Permit (No. EP-296/2007). All monitoring results were checked and reviewed. 45 sets of 1-hour TSP level monitoring, 15 sets of 24-hour TSP level monitoring, and 15 sets of noise monitoring were carried out during the reporting quarter. No exceedance of any of the monitoring data was recorded. No environmental complaints and notification of summons or prosecution were received during the second quarter.

Summary and Graphical Plot of Noise Monitoring Record

## Impact Monitoring for Fish Market Project in Tuen Mun

**Noise Monitoring** 

Quarter: February 2009 - April 2009

Quarter: Pedruary 2007 - April 2007					
Date	Time	L10(30mins) (dB(A))	L90(30mins) (dB(A))	Leq(30mins) (dB(A))	
4-Feb-09	09:05 - 09:35	66.2	61.9	64.2	
10-Feb-09	08:50 - 09:20	64.2	59.8	62.7	
16-Feb-09	09:00 - 09:30	63.5	58.7	61.2	
21-Feb-09	09:00 - 09:30	61.9	58.2	60.2	
27-Feb-09	09:05 - 09:35	64.3	59.7	62.9	
5-Mar-09	09:00 - 09:30	64.6	59.9	62.7	
11-Mar-09	09:00 - 09:30	63.6	58.3	61.2	
17-Mar-09	09:00 - 09:30	63.7	57.9	61.9	
23-Mar-09	09:00 - 09:30	63.3	58.2	61.2	
28-Mar-09	09:00 - 09:30	66	62.1	64.2	
3-Apr-09	09:00 - 09:30	67.5	57.8	65.7	
9-Apr-09	09:00 - 09:30	66.5	61.1	64.2	
15-Apr-09	09:00 - 09:30	66	60.7	64.2	
21-Apr-09	09:00 - 09:30	65.2	60.7	63.7	
27-Apr-09	09:00 - 09:30	64.6	58.7	62.7

Mitigation Measures Implementation Schedule for Construction Stage

# MITIGATION MEASURES IMPLEMENTATION SCHEDULE FOR CONSTRUCTION STAGE

EIA Ref. Section	EM&A Ref. Section	Environmental Protection Measures	Location/Duration of Measures/ Timing of completion measures	Relevant Legislation & Guidelines
4.7	2.8	<ul> <li>Air Quality</li> <li>Hoarding of not less than 2.4m high shall be provided along the site boundary section adjoins a road, street, service land or other area accessible to the public</li> <li>Spray water to where excavation to be taken place immediately prior to, during and after excavation</li> <li>Any stockpile of dusty material shall be either: (a) covered entirely by impervious sheeting; (b) placed in an area sheltered on the top and the three sides; or (c) sprayed with water or a dust suppression chemical so as to maintain the entire surface wet</li> <li>Cement bags or any other dusty materials collected during the work should be disposed of in totally enclosed containers</li> <li>All dusty materials should be sprayed with water immediately prior to any loading, unloading or transfer operation so as to minimise the dusty materials wet</li> <li>Any dusty material remaining after a stockpile of cement or other materials is removed should be wetted and removed from the surface of roads</li> <li>Where a vehicle leaving the construction site is carrying a load of dusty materials, the load shall be covered entirely by clean impervious sheeting to ensure that the dusty materials do not leak from the vehicle</li> <li>Conveyor belts shall be fitted with windboards, and conveyor transfer points and hopper discharge areas shall be enclosed and fitted with belt cleaners</li> <li>Skip hoist for the transport of construction wastes should be properly enclosed</li> <li>Vehicle washing facilities including a high pressure water jet shall be provided at the designated vehicle exit point and every vehicle immediately before leaving the construction site shall be washed to remove any dusty materials from its body and wheels</li> <li>Every main haul road, vehicle washing areas and the section of road between the washing facilities and the exit point shall be paved with concrete, bituminous materials, hardcore or metal plates and kept clear of dusty materials or sprayed with water so as to maintain the entire road sur</li></ul>	Construction site of the proposed WFM/ Throughout the construction period	APCO/EIA Study
5.7	3.7	Noise  Use quiet construction equipment  Use silencers / mufflers, noise barriers / enclosure where practicable  The Contractor is required to determine the number and type of construction equipment taking	Construction site of the proposed WFM throughout the	NCO/EIA Study

Ref. I	M&A Ref. ection	Environmental Protection Measures	Location/Duration of Measures/ Timing of completion measures	Relevant Legislation & Guidelines
		<ul> <li>into account the use of quiet plant while devising a feasible work programme</li> <li>Only well-maintained plant shall be operated on-site and all equipment shall be routinely checked</li> <li>Turn off or throttle down idle plant</li> <li>Plants known to emit noise strongly shall be oriented away from NSRs</li> <li>Mobile plants shall be sited as far away from NSRs as possible</li> <li>Stockpiles and other structures shall be effectively utilised as practicable to screen noise from on-site construction activities</li> <li>Obtain valid noise permits for construction work during restricted hours</li> </ul>	construction period	
6.7	4.1	<ul> <li>Water Quality</li> <li>Site shall be kept clean and tidy to avoid construction materials and waste being washed off from site</li> <li>Works shall be planned to avoid rainy season so as to minimize the runoff and reduce the amount of soil that can be carried offsite</li> <li>Surface run-off from the construction site shall be directed to silt traps or sedimentation basin before reuse or discharge with help of channels, earth bunds or sand bag barriers for suspended solids removal prior to its being discharged to storm water drain. Silt trap design shall conform to the guidelines laid down in Appendix A1 of ProPECC PN 1/94</li> <li>Wastewater likely to be contaminated with oil or grease should be passed through an oil separator or grease trap before entering the site drainage system</li> <li>Hoarding gaps should be tightly sealed to avoid the seepage of wastewater to the nullah and outside the site</li> <li>Perimeter channels shall be provide at site boundaries, where necessary, to intercept stormwater runoff from outside the site</li> <li>Silt traps, sedimentation basins, channels and manholes shall be regularly cleaned to remove the deposited silt and grit</li> <li>Temporarily exposed slope surfaces and construction material stockpiles shall be covered with tarpaulin or similar fabric to prevent erosion</li> <li>Wastewater generated from bored-piling shall be re-circulated after sedimentation as practicable. The final discharge of the wastewater shall be via silt removal facilities</li> <li>All fuel tanks and chemical storage areas shall be surrounded by bunds with a capacity equal to 110% of the storage capacity of the largest tank to prevent spilled oil, fuel and chemicals from reaching the receiving waters</li> <li>Obtain valid discharge license for construction site discharges</li> <li>Chemical toilets shall be provided on site</li> <li>Monitor the quality of water discharge to ensure compliance of the license condition</li> </ul>	Construction site of the proposed WFM Throughout the construction period	WPCO/EIA Study

EIA Ref. Section	EM&A Ref. Section	Environmental Protection Measures	Location/Duration of Measures/ Timing of completion measures	Relevant Legislation & Guidelines
		Surface drainage channels of operational areas shall be easily cleaned and connected to foul sewerage		
7.2	5.1	<ul> <li>Waste Management</li> <li>Reuse of excavated soils for back-filling and landscaping purposes</li> <li>All reusable and recyclable waste materials shall be segregated and stored in different containers, skips or stockpiled</li> <li>Separate the inert and non-inert portions of construction material for disposal of public fill and landfill respectively</li> <li>Employ approved licensed waste collectors to collect the inert construction materials to be disposed of at public fill</li> <li>Provide a temporary storage areas for storing and stockpiling reusable and recyclable materials</li> <li>Contractor should register as chemical waste producer should chemical waste is produced</li> <li>Licensed waste collectors shall be employed for collecting chemical wastes for disposal</li> <li>Handling and Disposal of chemical waste shall be in accordance with the Code of Practice on the Practice on the Packaging, Labelling and Storage of Chemical Wastes issued under the Waste Disposal Ordinance</li> <li>Quantities of waste materials generated on site and disposal record (e.g. trip ticket) shall be kept on site for inspection</li> <li>A Waste Management Plan (WMP) shall be prepared to set out waste handling and disposal strategy and submitted for the architect's approval</li> <li>Material being temporary used for construction shall be recyclable as possible</li> <li>Design and provide an area within the construction site to allow on-site sorting and segregation of waste materials</li> <li>Training shall be provided to site staff on waste minimisation practices including waste reduction, reuse and recycling</li> <li>Disposal of C&amp;D material shall be monitored by Trip-Ticket System</li> <li>In order to minimize the amount of waste disposal, durable and reusable containers should be</li> </ul>	Construction site of the proposed WFM Throughout the construction period	WDO/EIA Study  WBTC No.5/99
8.7	6.1	<ul> <li>used, where practicable, instead of plastic bags</li> <li>Hazard to Life</li> <li>Cranes shall be located away from the LPG compound and its access as far as possible</li> <li>Before excavation work is undertaken, the gas company should be contacted to obtain information (drawings, plans) of all gas pipes in the vicinity of the site. Suitable pipe locating devices must be used to locate underground pipes. Hand dug trial holes must then be used to confirm the position of underground pipes. Excavation must be carried out with extreme care following any advice given by the Gas Authority or Gas Company</li> </ul>	Construction site of the proposed WFM Throughout the construction period	

EIA	EM&A	Environmental Protection Measures	Location/Duration of	Relevant
Ref.	Ref.		Measures/ Timing of	Legislation &
Section	Section		completion measures	Guidelines
		<ul> <li>Sufficient guidance shall be given to all workers before carrying out excavation in the vicinity of pipelines</li> <li>Manually operated warning siren shall be installed to instruct people to take timely shelter</li> <li>Fire drill exercises shall be organized for the workers at the site and users of the WFM</li> </ul>
