Attention: Mr. H.K.Chan and Mr. Max Tai

Dear Sirs,

**Re: Agreement No. DP 01/2010**

**Services as Independent Environmental Checker for the Drainage Improvement Works in Sha Tin and Tai Po under Contract No. DC/2009/22 & DC/2010/02**  
**Monthly Environmental Monitoring and Audit Report for January 2016**

Reference is made to Environment Team's submission of the Monthly Environmental Monitoring and Audit Report for January 2016 by Email on 19 February 2016 (entitled "DC/2009/22 & DC/2010/02 – Monthly EM&A Report for Operation Phase – January 2016").

Please be informed that we have no comment on the captioned report. We write to verify the captioned submission in accordance with Condition 5.4 of EP-303/2008.

Thank you very much for your kind attention and please do not hesitate to contact Mr. Tony Cheng (3465-2822) should you have any queries.

Yours faithfully,

Tony Cheng  
Independent Environmental Checker

## EXECUTIVE SUMMARY

ES.01. This is the Monthly Environmental Monitoring and Audit (EM&A) Report for DSD Contract No. DC/2010/02 (hereafter “Contract 2”) for Drainage Improvement in Shuen Wan under Environmental Permit No.EP-303/2008, covering the Operation Phase period from **1 to 31 January 2016** (hereinafter ‘the Reporting Period’).

ES.02. The Works at Tung Tsz Road Shuen Wan was divided two DSD Contracts i.e. DC/2009/22 (hereinafter called the “Contract 1”) and DC/2010/02 (hereinafter called the “Contract 2”). The construction works of Contract 1 was commenced in **August 2010** and the Operation Phase was commenced on **4 December 2014** and terminated on **4 December 2015**. For Contract 2, the construction works was commenced in **May 2011** and the Operation Phase was commenced on **1 April 2015**.

### ENVIRONMENTAL MONITORING AND AUDIT ACTIVITIES

ES.03. In the Reporting Period, environmental monitoring activities for the Operation Phase of the Project under the of EM&A programme are summarized in the following table.

Environmental Aspect	Monitoring Parameters / Inspection	Contract 2
		Operation Phase
Water Quality	Hydrological characteristics measurement – H1, H2, H3 and H4	4 events
Ecological	Ecological Monitoring	1 event
Landscape & Visual	Inspection by a registered Landscape Architect	0 event

ES.04. Operation phase ecological monitoring for Contracts 2 should be undertaken on a quarterly basis. In the Reporting Period, the 4<sup>th</sup> quarterly ecological monitoring report under Contract 2 was carried out on 29 January 2016.

ES.05. Operation phase Landscape and visual inspection of the Contracts 2 should be undertaken on a quarterly basis and it was not carried out in the Reporting Period.

ES.06. The hydrological characteristics of water depth and water flow rate as compared baseline monitoring period, the currently water depth and volumetric flow rate has insignificant change.

### ENVIRONMENTAL COMPLAINT

ES.07. No written or verbal complaint was recorded in this Reporting Period.

### NOTIFICATION OF SUMMONS AND SUCCESSFUL PROSECUTIONS

ES.08. No environmental summons or successful prosecutions were recorded in this Reporting Period.

### REPORTING CHANGE

ES.09. In the Reporting Period, no reporting change was made.

---

## 1.0 INTRODUCTION

### PROJECT BACKGROUND

- 1.01 ***Kwan Lee-Kuly Joint Venture*** (hereinafter ‘KLKJV’) has been awarded by Drainage Services Department (hereinafter ‘DSD’) of the Contract No. DC/2010/02 - Drainage Improvement in Shuen Wan and Shek Wu Wai (hereinafter ‘the Project’). For the Project, construction works at Tung Tsz Road Shuen Wan is part of the Drainage Improvement works amongst Shatin and Tai Po and it is defined as a “Designated Project” which controlled under Environmental Permit EP-303/2008. On the other hand, Shek Wu Wai San Tin is a non-designated project work.
- 1.02 The Works at Tung Tsz Road Shuen Wan was divided two DSD Contracts i.e. DC/2009/22 (hereinafter called the “Contract 1”) and DC/2010/02 (hereinafter called the “Contract 2”). The construction works of Contract 1 was commenced in **August 2010** and the Operation Phase was commenced in **December 2014 and** terminated on **4 December 2015**. For Contract 2, the construction works was commenced in **May 2011** and the Operation Phase was commenced in **April 2015**. The Project site boundary is shown in **Appendix A**.
- 1.03 Action-United Environmental Services and Consulting (AUES) was appointed as the Environmental Team (ET) of Contracts 1 and 2 to implement the relevant EM&A programme of the Project.
- 1.04 This is the Monthly EM&A Report presenting the monitoring results for Operation Phase during the Reporting Period from **1** to **31 January 2016**.

### REPORT STRUCTURE

- 1.05 The Monthly Environmental Monitoring and Audit (EM&A) Report is structured into the following sections:-
- |           |  |
|-----------|--|
| SECTION 1 | INTRODUCTION   |
| SECTION 2 | PROJECT ORGANIZATION AND WORKS PROGRESS AND SUBMISSION |
| SECTION 3 | EM&A PROGRAM REQUIREMENT FOR THE PROJECT               |
| SECTION 4 | IMPACT MONITORING RESULTS                              |
| SECTION 5 | SITE INSPECTIONS                                       |
| SECTION 6 | ENVIRONMENTAL COMPLAINTS AND NON-COMPLIANCE            |
| SECTION 7 | IMPLEMENTATION STATUES OF MITIGATION MEASURES          |
| SECTION 8 | CONCLUSIONS AND RECOMMENDATION                         |

## 2.0 PROJECT ORGANIZATION AND SUBMISSION

### PROJECT ORGANIZATION AND MANAGEMENT STRUCTURE

- 2.01 Organization structure and contact details of relevant parties with respect to on-site environmental management are shown in *Appendix B*.

### SUMMARY OF ENVIRONMENTAL SUBMISSIONS

- 2.02 Summary of the relevant permits, licences, and/or notifications on environmental protection for this Project in this Reporting Period is presented in *Table 2-1*.

**Table 2-1 Status of Environmental Licenses and Permits**

Item	Description	License/Permit Status
1	Air Pollution Control (Construction Dust)	Notified EPD on 17 October 2011
2	Chemical Waste Producer Registration (WPN5213-727-K2972-02)	Approved on 28 October 2011
3	Water Pollution Control Ordinance (Discharge License) WT00009528-2011	Valid to 31 July 2016
4	Billing Account for Disposal of Construction Waste (Account No.: 7012838)	Effective

### 3.0 EM&A PROGRAM REQUIREMENT

3.01 The EM&A requirements for the Operation Phases are according to the PP, EIAR, Environmental Permit EP303/2008 (hereinafter ‘the EP’), and the associated updated EM&A Manual and they are presented in below sub-section.

#### MONITORING PARAMETERS

3.02 According to the updated EM&A Manual of the Project, the Operation Phases monitoring requirement is showed in **Table 3-1**.

**Table 3-1 Summary of Monitoring Parameters for the Project**

Environmental Aspect	Requirement / Parameter
Hydrological Characteristics Monitoring	<ul style="list-style-type: none"> <li>In-situ measurement including water flow and depth</li> </ul>
(*) Ecological Monitoring and Audit	<ul style="list-style-type: none"> <li>Monitor and inspect including the vegetation, fauna (includes avifauna, herpetofauna, odonate and butterfly) and Stream (includes fish and macroinvertebrates)</li> </ul>
(#) Landscape and Visual Monitoring	<ul style="list-style-type: none"> <li>Inspect and audit the implementation and maintenance of landscape and visual mitigation measures</li> </ul>

Remarks:

(\*) the monitoring is carried out by IEC

(#) The monitoring is carried out by the registered Landscape Architect

#### MONITORING LOCATIONS

3.03 Monitoring locations have been proposed in the updated EM&A Manual. The monitoring location is summarized in **Table 3-2** and shown in **Appendix C**.

**Table 3-2 Monitoring Locations of Operation Phase**

Aspect	Location ID	Address
Hydrological	H1	Between the Shuen Wan Marsh and ECA <ul style="list-style-type: none"> <li>Coordinates: E839306, N836379)</li> </ul>
	H2	Route 10 Sam Kung Temple <ul style="list-style-type: none"> <li>Coordinates: E839163, N836433</li> </ul>
	H3	Upstream of Tung Tze Shan Road <ul style="list-style-type: none"> <li>Coordinates: E838760, N836714</li> </ul>
	H4	Wai Ha Village 29D <ul style="list-style-type: none"> <li>Coordinates: E838865, N836621</li> </ul>
Ecology	Areas within 100m of the works boundary under Contract 1 and Contract 2	
Landscape & Visual	As within and adjacent to the construction sites and works areas under the Contract 1 and Contract 2	

#### MONITORING FREQUENCY OF OPERATION PHASE

3.04 According to the updated EM&A Manual, frequency and duration of the Operation Phase monitoring are summarized below.

##### *Hydrological Characteristics*

Frequency: Once per week at mid-flood and mid-ebb tides

Duration: One year after the construction is complete as operation phase monitoring (in accordance with the Updated EM&A Manual Section 4.32).

##### *Ecology*

3.05 In according with Section 6.17 of the Updated EM&A Manual, the Operation Phase ecological monitoring would be to conduct by the Independent Environmental Checker (hereinafter ‘IEC’). Regular checking and monitoring by quarter month would be performed for one year duration

***Landscape & Visual***

- 3.06 According to Section 7.5 of the Updated EM&A Manual, all landscape and visual mitigation measures would be monitored quarterly during the first year of the Operation Phase to check on the effectiveness of the mitigations.

**MONITORING EQUIPMENT**

***Hydrological Characteristics***

- 3.07 **Water Depth Detector** - A portable, battery-operated echo sounder shall be used for the determination of water depth at each designated monitoring station.
- 3.08 **Stream water flow Equipment** –A portable, battery-operated flow meter should be used for the determination of water flow rate at each designated monitoring location and record in m<sup>3</sup>/s.
- 3.09 The monitoring equipment using for the Project’s EM&A program were proposed by the ET and verified by the IEC prior commencement of the monitoring. Details of the equipment used for impact monitoring are listed in **Table 3-3**.

**Table 3-3 Monitoring Equipment Used for Operation Phase**

<b>Equipment</b>	<b>Model</b>
<b>Hydrological Characteristics</b>	
Water flow meter	GLOBAL WATER model FP211
Water Depth Detector	Eagle Sonar or an appropriate steel ruler or rope with appropriate weight

**MONITORING METHODOLOGY**

***Hydrological Characteristics***

- 3.10 A portable, water flow meter, brand named “*GLOBAL WATER model FP211*” are used to determine the water current flow at the designated monitoring stations. A water flow velocity is measured at mid depth of current water body or 0.5m below water level.
- 3.11 Water depths are determined prior to measurement, using a portable battery operated depth detector, brand named ‘Eagle Sonar’, if the depths exceed 1.5 meter. If the depth between 1.5 meter and 1 meter, plastic tape measurement tied with appropriate weight are used the depth estimation. For the depths well below 1 meter, an appropriate steel ruler or rope with appropriate weight are used for the depth measurement.

**OTHERS MONITORING IMPLEMENTATION FOR THE PROJECT**

**Ecology**

- 3.12 Ecological monitoring and reporting should be performed by IEC. Site survey will be carried out during the construction and 1-year establishment period of the Ecological Compensatory Area. These monitoring events include regular check on the retained and transplanted trees and shrubs, monitoring on fauna groups and aquatic fauna. No equipment and procedure are presented in the EM&A Monthly Report.

**Landscape and Visual**

- 3.13 A registered Landscape Architect as member of the ET is employed by the Contractor to undertake site inspection. Site inspection will undertake once every three months during the first year of the Operation Phase to check on the effectiveness of the mitigations.

**DETERMINATION OF ACTION/LIMIT (A/L) LEVELS**

- 3.14 No performance criteria i.e. Action and Limit levels of hydrological is used for the Operation Phase. The locations H3 and H4 are a reference measurement point in order to monitor any changes in the hydrological characteristics of Wai Ha River arising from the work Contract 2 to affect the Shuen Wan Marsh.

**4.0 MONITORING RESULTS OF CONTRACT 2 FOR OPERATION PHASE**

4.01 The operation phase monitoring schedule is presented in *Appendix D*. The monitoring results are presented in the following sub-sections.

**RESULTS OF HYDROLOGICAL CHARACTERISTICS MONITORING**

4.02 In this Reporting Period, hydrological characteristics measurements were carried out on **6, 13, 21 and 29 January 2016**. The detailed measurement results in this Reporting Period are presented in *Tables 4-1* and the graphical plot area shown in *Appendix E*.

**Table 4-1 Detailed Monitoring Results of hydrological characteristics at Designated Measurement Points**

Measurement		Tide Condition	River Width (m)	Water Depth (m)	Cut Section (m <sup>2</sup> )	Velocity Flow Rate (m/s)	Average Volumetric Flow Rate (Q), m <sup>3</sup> /s
Point	Time

	14:36	Ebb	2.74	0.32	0.8768	0.3	0.263

4.03 Hydrological characteristics results of the all measurement points are summarized in *Tables 4-2* and *4-3*.

**Table 4-2 Summarized Hydrological Characteristics of Water Depth, m**

Date	Mid-Flood				Mid-Ebb			
	H1	H2	H3	H4	H1	H2	H3	H4
6-Jan-16	0.57	0.39	0.41	0.29	0.56	0.38	0.40	0.29
13-Jan-16	0.48	0.38	0.43	0.31	0.48	0.38	0.43	0.30
21-Jan-16	0.47	0.33	0.42	0.30	0.47	0.32	0.40	0.30
29-Jan-16	0.49	0.34	0.44	0.32	0.49	0.33	0.43	0.32

**Table 4-3 Summarized Hydrological Characteristics of Average Volumetric flow rate (Q), m<sup>3</sup>/s**

Date	Mid-Flood				Mid-Ebb			
	H1	H2	H3	H4	H1	H2	H3	H4
6-Jan-16	0.941	0.550	0.916	0.159	0.924	0.536	0.894	0.159
13-Jan-16	0.792	0.536	0.961	0.255	0.792	0.536	0.641	0.247
21-Jan-16	1.034	0.465	0.939	0.164	0.776	0.301	0.596	0.164
29-Jan-16	0.539	0.320	0.983	0.263	0.539	0.465	0.961	0.263

4.04 To compare the monitoring data between the Reporting Period and baseline monitoring period, the currently water depth and volumetric flow rate has insignificant change.

**RESULTS OF ECOLOGICAL MONITORING**

4.05 According to updated EM&A Manual, quarterly ecological monitoring shall be conducted and it is undertaken by the IEC – Ramboll Environ Hong Kong Limited. In brief, the monitoring tasks include regular check on the retained and transplanted trees and shrubs, monitoring on fauna groups and aquatic fauna within the works area and any ecologically sensitive area within 100 m of the works boundary.

4.06 The 3<sup>rd</sup> quarterly ecological monitoring under Contract 2 was carried out 29 October 2015. In the Reporting Period, the 4<sup>th</sup> quarterly ecological monitoring report under Contract 2 was carried out on 29 January 2016.

4.07 The details Ecological Monitoring Report are presented in *Appendix F*.

**METEOROLOGICAL INFORMATION**

4.08 The meteorological information during the measurement day of Operation Phase would be extracted from Tai Po and Shatin Stations of the Hong Kong Observatory (HKO). The meteorological data during the measurement days are presented in *Table 4-4*.

**Table 4-4 Meteorological Data in Reporting Period**

Date	Weather	Total Rainfall (mm)	Tai Po Station		Shatin Station		
			Mean Air Temp. (°C)	Mean Relative Humidity (%)	Wind Speed (km/h)	Wind Direction	
6-Jan-16	Wed	Mainly fine. Moderate east to northeasterly winds, occasionally fresh tomorrow.	Trace	20.4	82.5	5.5	N/NE
13-Jan-16	Wed	Mainly fine. Cool in the morning. Moderate northeasterly winds.	0	14.8	72.2	6.7	N/NE
21-Jan-16	Thu	Mainly cloudy with occasional rain. It will be cold. Moderate to fresh northeasterly winds.	0.1	14.9	95	6.1	E/NE
29-Jan-16	Fri	Mainly cloudy with occasional rain. It will be cold. Moderate to fresh northeasterly winds.	32.8	16.8	93	7.4	N/NE

## 5.0 SITE INSPECTION

### REGULAR SITE INSPECTION AND MONTHLY AUDIT

- 5.01 According to the Updated Environmental Monitoring and Audit Manual, regular site inspection to evaluate the project environmental performance is not required during operation phase.

### LANDSCAPE AND VISUAL INSPECTION

- 5.02 According to Section 7.5 of the Updated EM&A Manual, quarterly landscape and visual inspection shall be carried out during the first year of the Operation Phase.

### Operation Phase of Contract 2

- 5.03 The 3<sup>rd</sup> quarterly Landscape & Visual inspection for Contract 2 which signed by the Registered Landscape Architect was undertaken on 29 December 2015 and it was not carried out in the Reporting Period.

**6.0 ENVIRONMENTAL COMPLAINT AND NON-COMPLIANCE**

**ENVIRONMENTAL COMPLAINT, SUMMONS AND PROSECUTION**

6.01 For the Project, no environmental complaint, summons and prosecution was received in this Reporting Period. The statistical summary table of environmental complaint for the **Contracts 1 and 2** is presented in *Tables 6-1, 6-2* and *6-3*.

**Table 6-1 Statistical Summary of Environmental Complaints**

Reporting Period	Environmental Complaint Statistics		
	Frequency	Cumulative	Complaint Nature
July 2011 –December 2015	1	1	Air Quality (1)
January 2016	0	1	Air Quality (1)

**Table 6-2 Statistical Summary of Environmental Summons**

Reporting Period	Environmental Summons Statistics		
	Frequency	Cumulative	Complaint Nature
July 2011 –December 2015	0	0	NA
January 2016	0	0	NA

**Table 6-3 Statistical Summary of Environmental Prosecution**

Reporting Period	Environmental Prosecution Statistics		
	Frequency	Cumulative	Complaint Nature
July 2011 –December 2015	0	0	NA
January 2016	0	0	NA

## 7.0 IMPLEMENTATION STATUS OF MITIGATION MEASURES

7.01 According to the Updated Environmental Monitoring and Audit Manual, mitigation measures of Operation Phase of the Project is included the Ecological and Landscape & Visual as listed below.

### **Ecological**

- To minimize sedimentation, de-silting should be limited to the dry season; and
- Waste material produced during de-silting should be disposed of in a timely and appropriate manner

### **Landscape and visual**

- Viewing area formation by planting with shrubs, grasses and benches along the area
- Architectural design of the pump house will help it fit into the existing suburban, natural to semi-natural surroundings
- Landscape design of pump house by providing sufficient planting around its boundary fence
- Enhancement planting along Tung Tsz Road with shrubs / trees of suitable species to help protect the stream and marshes
- Construction of box culvert should be with at least 1.0m soil depth for enhancement planting
- Transplanting of existing affected trees to adjacent locations should be carried out
- Preparation for transplanting is needed to allow sufficient time for root pruning and rootball preparation prior to transplanting
- Reinstatement of affected area should be carried out to check that the works areas are properly reinstated

## 8.0 CONCLUSIONS AND RECOMMENTATIONS

### CONCLUSIONS

- 8.01 The Works at Tung Tsz Road Shuen Wan was divided two DSD Contracts i.e. DC/2009/22 (hereinafter called the “Contract 1”) and DC/2010/02 (hereinafter called the “Contract 2”). The construction works of Contract 1 was commenced in **August 2010** and the Operation Phase was commenced on **4 December 2014** and terminated on **4 December 2015**. For Contract 2, the construction works was commenced in **May 2011** and the Operation Phase was commenced on **1 April 2015**.
- 8.02 This is the Monthly Environmental Monitoring and Audit (EM&A) Report for DSD Contract No. DC/2010/02 (hereafter “Contract 2”) for Drainage Improvement in Shuen Wan under Environmental Permit No.EP-303/2008, covering the Operation Phase period from **1 to 31 January 2016** (hereinafter ‘the Reporting Period’).
- 8.03 The hydrological characteristics of water depth and water flow rate as compared baseline monitoring period, the currently water depth and volumetric flow rate has insignificant change.
- 8.04 Operation phase ecological monitoring of the Contracts 2 should be undertaken on a quarterly basis. In the Reporting Period, the 4<sup>th</sup> quarterly ecological monitoring report under Contract 2 was carried out on 29 January 2016.
- 8.05 Operation phase Landscape and visual inspection of the Contracts 1 and 2 should be undertaken on a quarterly basis and it was not carried out in the Reporting Period.
- 8.06 No documented complaint, notification of summons or successful prosecution was received in the Reporting Period.

### RECOMMENDATIONS

- 8.07 Mitigation Measures of Operation Phase shall fulfill the updated EM&A Manual requirements.

## **1. Introduction**

### **1.1 Project description**

The Drainage Improvement Works in Shuen Wan was undertaken to minimize the potential flooding impacts in Sha Tin and Tai Po area. Although the Ecological Impact Assessment in the EIA Report identified that ecological impacts resulting from the proposed drainage improvement works at Shuen Wan were anticipated to be very minor in scale, ecological mitigation and ecological monitoring were recommended in the EM&A Manual ([http://env-shuenwan.com/pdf/review\\_note\\_em&a\\_rev.3.pdf](http://env-shuenwan.com/pdf/review_note_em&a_rev.3.pdf)) as stipulated under Environment Permit No. EP-303/2008.

1.2 Scope of ecological impact monitoring (Operation phase) was described in the Particular Specifications and EM&A Manual of the projects. In brief, the monitoring tasks include regular check on the retained and transplanted trees and shrubs, monitoring on fauna groups and aquatic fauna within the works area and any ecologically sensitive area within 100m of the works boundary.

1.3 China-Hong Kong Ecology Consultants Co. was commissioned by Ramboll Environ Hong Kong Limited (formerly ENVIRON Hong Kong Limited) to perform the ecological impact monitoring survey for the projects under Contract2 since April 2015.

1.4 The construction work of Contract 2 was completed in March 2015 and the operation phase of Contract 2 commenced in April 2015. The first quarterly ecological impact monitoring under Contract 2 for operation phase was conducted in April 2015.

1.5 The outline of this ecological monitoring report was as follow:

- Highlights of this report
- Monitoring methodology
- Monitoring data
- Review of monitoring results
- Comments and brief summary

1.6 This report no. OP-4b is the third quarterly ecological impact monitoring for operation phase monitoring conducted on 29 January 2016 within the works boundary under Contract 2 and area within 100m from the works boundary.

## **2. Highlights of this report**

- Field survey was conducted on 29 January 2016
- Construction phase ecological impact monitoring of Contract 2 was completed in March 2015 and the operational phase ecological impact monitoring of Contract 2 was started in April 2015.
- Lower number of species was observed within the works area under Contract 2 but habitats in the 100m buffer area retain its natural condition.

---

### 3. Monitoring Methodology

Ecological monitoring methods were generally followed those described in the baseline ecological surveys (DC/2009/22). However, sampling area maybe reduced because of habitat change, for instance, deforestation and channel modification due to drainage works, where sampling was not applicable. Survey data and evaluation are detailed in the following sections.

#### 3.1 Vegetation survey

Vegetation survey was performed along the designated transects (Figure 1) for ecological monitoring as described in the project specifications to monitor the vegetation health which could be adversely influenced by any bad site practice. Qualitative data of plants within the works boundary and wetland vegetation in the 100m buffer area of Contract 2 adjacent to construction site and wetland was recorded. Riparian vegetation including aquatic and emergent at 4 stream ecological monitoring points (hereinafter referred to as “SEMP”) under Contract 2 (i.e. SEMP 3 & 4; Figure 2 & 3) along the affected stream channel and riparian habitat was recorded in terms of species, relative abundance and average heights. Any signs of damages and adverse health problems directly caused the works were recorded and reported. Nomenclature and protection status of the species followed those documented in the AFCD website ([www.hkbiodiversity.net](http://www.hkbiodiversity.net)) and Hong Kong Herbarium (2004).

#### 3.2 Avifauna

Bird survey was conducted by following the proposed transects which cover the major ecologically sensitive areas of the Project (Figure 1). All bird species were recorded with special attention paid on the species of conservation importance and wetland-dependent species. List of bird species recorded and the relative abundance was provided.

#### 3.3 Herpetofauna

Hepetofauna survey was conducted via direct observation and active searching along the survey transects with a focus in the work areas (Figure 1). All reptiles and amphibians encountered or heard were recorded. Nomenclature and conservation status of herpetofauna species follows AFCD website ([www.hkbiodiversity.net](http://www.hkbiodiversity.net)).

#### 3.4 Butterflies and Odonata

Odonates and butterfly survey of different habitats within the Study Area was conducted along the proposed transect (Figure 1). All butterflies and odonata were identified and relative abundance was recorded. Nomenclature and status of conservation of butterflies follows Lo & Hui (2005) while that of odonata follows AFCD websites ([www.hkbiodiversity.net](http://www.hkbiodiversity.net)).

#### 3.5 Mammals

As the monitoring site was situated near traffics, plant nursery and residential buildings, mammals were unlikely inhabited at the site except rodents, domestic dogs and cats. Detailed mammal monitoring was not conducted. However, any sighting, tracks and signs of mammals encountered during survey of other faunal groups was recorded. Bat was surveyed by search for potential colony habitat, such as palm trees, which are often used by fruit bats as nesting sites.

---

### 3.6 Aquatic fauna

Monitoring of aquatic fauna was carried out mainly by bank-side observation, sometimes with the aid of binoculars, at two stream ecological monitoring points under Contract 2 (i.e. SEMP 3 & 4). These points are selected for covering representative sections of Wai Ha River and are shown in Figure 1. Netting and fish traps were also deployed at these points to collect supplementary data. Aquatic fauna seen/collected was identified *in situ* to the lowest possible taxon and relative abundance was presented.

## 4. Monitoring data

### 4.1 Vegetation survey

The habitats identified in area under Contract 2 are river course, wooded area, mangrove, marsh and developed area (including village). Vegetation were found in wooded area, mangrove, marsh, develop area and river bank. The riparian vegetation which were dominated by *Leucaena leucocephala* and *Pueraria labata* with average coverage ranged from 5% to 20% (**Table 1**) at SEMP 4. A list of plant species recorded from different habitats within the assessment area under Contract 2 is presented on **Table 2**. A total of 209 species were recorded within the assessment boundary in which 208 species were recorded within the buffer area, while 93 species recorded within the work areas under Contract 2. Among them, species protected under Hong Kong ordinance were found in buffer area under Contract 2, namely *Aquilaria sinensis* (Cap. 586), *Cibotium barometz* (Cap. 586). Three individuals of protected species *Pavetta hongkongensis* located within works area of Contract 2 were transplanted to ECA on 20<sup>th</sup> Dec 2011. Currently, some trees were planted along the project site for landscaped purpose. Moreover, some drainage section has been restored as marsh habitat by planting wetland species such as *Juncus effuses*. Wetland flora species such as *Juncus effuses* were growing poor comparing with last monitoring in Oct 2015 due to current cold and dry season. Some wetland dependant birds such as Little Egret were found utilizing the restored marsh habitat.

### 4.2 Avifauna

A total of 14 bird species were recorded in the current survey (**Table 3**). Among recorded species, one wetland dependent species Little Egret was recognized as being regional conservation concern which was recorded from marsh habitat within project site.

### 4.3 Herpetofauna

No herpetofauna was recorded within the assessment area during dry season.

### 4.4 Butterflies

No butterfly was recorded within the assessment area during dry season.

### 4.5 Odonata

No odonata was recorded within the assessment area during dry season.

### 4.6 Mammal

No other mammals or trace of mammals was observed within the assessment area.

---

#### 4.7 Aquatic fauna

Under Contract 2 (i.e. SEMP 3 & 4), a total of 13 fish species, 3 crustaceans, 1 gastropod, 1 bivalve and 1 arthropod were recorded and most of them were freshwater species (**Table 4**). *Carassius auratus* was commonly observed at SEMP 3 because of the traditional Buddhist practice from the nearby temple in which captured organisms were released back to nature. The density of fish species has slightly been reduced at SEMP 3 and SEMP 4 at current monitoring due to recent raining. Since no construction work was found in vicinity of the monitoring stream, fish density was anticipated restoring to normal level in coming month. Overall, no protected species were recorded.

---

## 5. Review of the monitoring results

During the present survey period, no construction activity was carried out at works area under Contract 2. In general, lower numbers of species were recorded within the works area under Contract 2 than that of 100 m buffer area because of the urbanized in nature. Water quality in river section of Contract 2 (i.e. SEMP 3 and SEMP 4) was maintained at acceptable condition as indicated by the presence of *Parazacco spilurus*. Density of fish species was found slightly reduced at SEMP 3 and SEMP 4 due to recent raining. Nevertheless, the fish density was anticipated restoring to normal in coming month. Currently, project construction work was completed. The impact on downstream of SEMP 4 is anticipated to be insignificant. As mitigation measures recommended in the EM&A Manual were properly implemented during the construction phase period, and hence the residual environmental impacts would be minimized.

## 6. Comments and summary

The fourth quarterly ecological impact monitoring under Contract 2 for operation phase was conducted in January 2016 and relevant flora and fauna data were collected according to project specification and EM&A Manual. As indicated by the low abundance and diversity of species within the work areas, habitats within the work boundary under Contract 2 offer few ecological opportunities for colonization of fauna and flora. On the other hand, the natural habitats in the 100m buffer area are retained at acceptable condition, and hence the 100m buffer area has not been significantly affected by the construction works. Currently, project work was completed. Thus, the impact on downstream of SEMP4 is anticipated to be insignificant.

**Note:** "S" = Stream; "SW" = Secondary Woodland; "M" = Marsh; "Man" = Mangrove; "DA" = Developed area; "CL" = Cultivated area; "P" = Plantation

**Table 3.** List of avifauna species and maximum counts recorded from the operation phase impact monitoring survey at work area under Contract 2 and 100m buffer area.

Common name	Species	Habitat	Conservation status in Hong Kong	Work area: Contract 2	100m buffer area
Chinese Bulbul	<i>Pycnonotus sinensis</i>		--	1	5
Common Tailorbird	<i>Orthotomus sutorius</i>		--		1
Crested Myna	<i>Acridotheres cristatellus</i>		--		2
White Wagtail	<i>Motacilla alba</i>		--	1	
Eurasian Tree Sparrow	<i>Passer montanus</i>		--	3	2
Masked Laughing thrush	<i>Garrulax perspicillatus</i>		--		3
Oriental Magpie Robin	<i>Copsychus saularis</i>		--	1	1
Spotted Dove	<i>Streptopelia chinensis</i>		--		2
Spotted Munia	<i>Lonchura punctulata</i>			3	5
Yellow-bellied Prinia	<i>Prinia flaviventris</i>		--	1	1
Japanese White-eye	<i>Zosterops japonicus</i>		--		2
Grey Heron	<i>Ardea cinerea</i>	W	RC		1
Little Egret	<i>Egretta garzetta</i>	W	RC	1	
<b>Total number of species:</b>				<b>7</b>	<b>11</b>

**\*Key:**

W = Wetland dependent species; RC = Regional Concern; LC = Local Concern

**Table 4.** Relative abundance of aquatic species recorded in Wai Ha River within the 100m buffer of works boundary under Contract 2 in the operation phase impact monitoring survey.

Species	Common name	<sup>1</sup> Life-cycle characteristics	<sup>2</sup> Origin	SEMP 3	SEMP 4
<i>Carassius auratus</i>	Goldfish	F	I	+	+
<i>Cirrhinus molitorella</i>	Mud carp	F	I	++	
<i>Cyprinus carpio</i>	Common Carp	F	I	+	
<i>Gambusia affinis</i>	Mosquito Fish	F	I	+	+
<i>Oreochromis niloticus</i>	Nile Tilapa	F	I	+	
<i>Parazacco spilurus</i>	Predaceous Chub	F	N	+	+
<i>Zacco platypus</i>	Freshwater Minnow	F	N	+	+
<i>Poecilia reticulata</i>	Guppy	F	I	+	+
<i>Puntius semifasciolatus</i>	Chinese Barb	F	N	+	
<i>Rhinogobius duospilus</i>	Goby	F	N	+	+
<i>Pseudogastromyzon myersi</i>	Sucker-belly Loach	F	N	+	
<i>Xiphophorus hellerii</i>	Swordtail	F	I	+	+
<i>Uca arcuata</i>	Fiddler Crab	M	N	+	
<i>Pomacea lineata</i>	Apple snail	F	I	+	
<i>Caridina contonensis</i>	Bee shrimp	F	N	+	+
<i>Biomphalaria straminea</i>	Bivalve	F	I	+	+
<i>Eriocheir japonicus</i>	Mitten crab	F	N	+	
<i>Glossogobius sp.</i>	Goby	F	/	+	
<i>Gerris sp.</i>	Water Strider	F	/	+	
			<b>Total number of species:</b>	<b>19</b>	<b>9</b>

**Key:**

Relative abundance:

+ : Species exists in the survey area

++ : Species common in the survey area

+++ : Species abundant in the survey area

<sup>1</sup> Life-cycle characteristics:

M = Marine vagrant

F = Freshwater species

<sup>2</sup>Origin:

N = Native

I = Introduced; / = not available
