## 1 Introduction

---

To support the construction of West Island Line (WIL), a temporary magazine was constructed in 2010 under the western side of Mount Davis off Victoria Road in Kennedy Town for the storage of explosives that would be supplied and delivered by Mines Division of the Civil Engineering and Development Department (CEDD). Under the agreement with the relevant Government departments, MTR Corporation (the Corporation) is required to decommission and reinstate the magazine upon completion of the blasting works for WIL.

A Project Profile (PP) study for the Decommissioning of the Magazine Site at Victoria Road for West Island Line (WIL) (the Project) was submitted by the Corporation to apply directly for Environmental Permit (EP) in February 2013 to the Environmental Protection Department (EPD) and was approved under the EIA Ordinance. Following approval of the PP (Register No.: PP-479/2013), an EP (EP-447/2013) was granted by EPD on 15 March 2013 for the decommissioning of the Magazine Site at Victoria Road for West Island Line (WIL).

Ove Arup & Partners Hong Kong Limited (Arup) was commissioned by the Corporation to undertake the role of Independent Checker (IC) in accordance with Clause 2.5 of the EP.

The decommissioning work was started in June 2013. Based on the current works programme, the decommissioning work will take about 7 months.

As advised by the Corporation, this Project will be implemented by Gammon Nishimatsu WIL Joint Venture (GNWILJV) under works contract no. 704.

## 2 IC Site Audit

---

This is the first monthly IC Site audit report prepared by the IC for the Project. This report presents the audit results conducted in the month of June 2013 (1 to 30 June 2013). A site audit was conducted on 25<sup>th</sup> June 2013.

Based on the site audit findings (see **Appendix A**), no non-compliance to the environmental requirements was identified. Full implementation of the mitigation measures as described in the Project Profile during decommissioning of the Project was observed.
