**BY POST**

Dear Sirs

Agreement No. EDO/04/2017  
Independent Environmental Checker (IEC) for  
Development of Anderson Road Quarry Site – Road Improvement Works  
Post-Transplantation Monitoring Report

We refer to emails dated 25 March and 4 April 2022 from Environmental Team, Lam Environmental Services Limited attaching a Post-Transplant Monitoring Report for the captioned project.

We have no further comment and hereby verify the abovementioned report in accordance with Clause 2.14 of the Environmental Permit no. EP-513/2016.

Should you have any queries, please do not hesitate to contact the undersigned or our Mr Frankie Yuen on 2618 2831.

Yours faithfully  
ANEWR CONSULTING LIMITED

James Choi

## 1 Introduction

### Scope of the Report

- 1.1.1. Lam Environmental Services Limited was appointed by Civil Engineering and Development Department (CEDD) under Environmental Permit (EP) no. EP-513/2016 to submit the Post-Transplantation Monitoring Report as required under Clause 2.14 and 2.15 of the EP for Contract No. NE/2017/03 Development of Anderson Road Quarry Site – Road Improvement Works.
- 1.1.2. In reference to Clause 2.14(d) under the EP, Report should be submitted to the Environmental Protection Department (EPD) showing that the 3-year post-transplantation monitoring and maintenance works were implemented after the transplantation works in 2019.

### Project Background

- 1.1.3. The Project under Environmental Permit (EP) (EP No. EP-513/2016) is intended for three associated off-site road improvement works which comprises: (i) improvement of junction of (J/O) Lin Tak Road / Sau Mau Ping Road (RIW3) (ii) widening and improvement of sections of Clear Water Bay Road and On Sau Road (RIW2); and (iii) widening and improvement of sections of New Clear Water Bay Road and Shun Lee Tsuen Road (RIW1).

### Previous Submissions under EP Clause 2.14

- 1.1.4. Measures for mitigating the impacts on plant species of conservation importance within the site areas were conducted and the following documentations were subsequently submitted to CEDD.
  - Detailed Vegetation Survey – The final version of the tree survey was submitted on 3 December 2018 to record the conditions, number and locations of the individual flora species of conservation importance to be affected, and the transplantation feasibility of these individual trees before the commencement of construction works.
  - Transplantation Proposal - The final version of the Proposal was submitted on 7 December 2018, detailing the methodology and implementation programme of the proposed transplantation works. Supplement information on the Proposal was submitted on 18 April 2019 to justify the exclusion of the two *Aquilaria sinensis* trees for transplantation.
  - Transplantation Completion Report – The final version of the Report was submitted on 18 April 2019 after the recommended transplantation works for 55 *Aquilaria sinensis* seedlings were conducted in late March 2019.

## 2 Post-Transplantation Monitoring

### Monitoring Summary

- 2.1.1. According to Section 4 of the Transplantation Proposal, the transplanted trees should be monitored at a biweekly basis by Plant Specialist of the Environmental Team for the first three months and on a monthly basis for the remaining months within 3 years. In total, 40 post-transplantation monitoring were conducted from April 2019 to March 2022.
- 2.1.2. As recorded in the transplantation Completion Report, 55 *Aquilaria sinensis* seedlings, including the 6 (B1-B6) additional seedlings found *in-situ* were successfully transplanted to a receptor site near Po Lam Road as shown in **Figure 1**. Two *Aquilaria sinensis* trees were not transplanted as their survival rates after transplantation were assessed to be low. The monthly monitoring records are summarized in **Appendix A** and the last photographic record of the seedlings on 9 March 2022 is presented in **Appendix B**.
- 2.1.3. As observed during the post-transplantation monitoring period, the extreme heat and humidity during the summer of 2020 resulted in significant damage on the leaves by pest such as the *Heortia vitessoides* (黃野螟), while relatively mild damage was observed in 2019 and 2021. The applied insect repellent was observed to be an effectively control on the pest at lower level and allowed the regeneration of new foliage. Mulching had also been applied to facilitate the growth of new leaves when yellow foliage appeared in seedlings during hot and dry periods.
- 2.1.4. No construction works or other disturbances to the receptor site were observed during the monitoring period. By the end of the post-transplantation monitoring period in March 2022, 5 seedlings (A4, A7, A9 A12 and A23) have been declared dead during the first year while 1 seedling was observed to be in poor condition. The other 49 seedlings are mostly in fair health. The continuous growth of these seedlings as indicated by the height measured during the monitoring has demonstrated that the *Aquilaria sinensis* can be developed on the receptor site.

### Maintenance Works

- 2.1.5. During the post-transplantation monitoring period, the Contractor has regularly provided watering, mulching and weeding at the receptor site as part of the maintenance works recommended in the Transplantation Proposal. Pest control was conducted when insects were observed consuming the leaves of the seedlings.

### **3 Conclusion**

- 3.1.1. The Post-Transplantation Monitoring for Contract No. NE/2017/03 Development of Anderson Road Quarry Site – Road Improvement Works under the Environmental Permit (EP) no. EP-513/2016, Clause 2.14 and 2.15, was completed in March 2022.
- 3.1.2. The 3-years post-transplantation monitoring works to check the growth, health condition, and survival rate of the transplanted seedlings have been carried out. Maintenance works including weeding and watering were conducted regularly.
- 3.1.3. While further monitoring was not deemed necessary, the Contractor is recommended to provide watering, mulching, weeding and pest control to the seedlings whenever possible before the receptor site area is handed over.
