RAMBOLL

### **EXECUTIVE SUMMARY**

Ramboll Hong Kong Limited has been commissioned by the Architectural Service Department (ArchSD) as the Independent Environmental Checker (IEC) under the Environmental Permit no. EP-518/2016 (EP) to audit the implementation of all mitigation measures and Environmental Monitoring and Audit (EM&A) programme recommended in the EP and Project Profile (Register No.: PP-535/2016) as well as to confirm in writing in the monthly audit report full implementation of the measures and EM&A programme.

Construction works were undertaken during this reporting month since 1 July 2018.

This is the  $12^{th}$  IEC Monthly Audit Report prepared and submitted under Condition 2.3 of the EP.

#### **Implementation of Mitigation Measures**

One site inspection was carried out by IEC on 12 June 2019 in the reporting month. The inspection finding is summarized in **Section 3.1.2**.

The status of implementation of mitigation measures is presented in **Appendix A**.

#### Air Quality and Noise Monitoring

Impact monitoring for air quality (1-hr TSP) and noise were required according to the Contract Particular Specification of the Project.

No Action and Limit Level exceedances of 1-hr TSP were recorded at air monitoring stations – A, B, C and D the reporting month.

No Action and Limit Level exceedances of noise were recorded at noise monitoring stations – A, B, C and D in the reporting month.

# **Record of Environmental Complaint, Notification of Summons and Successful Prosecution**

No environmental complaint was received in the reporting month.

No notification of summons or successful prosecution was received in the reporting month.

### **1. INTRODUCTION**

#### 1.1 Background

- 1.1.1 The conversion of the former French Mission Building (FMB) for Accommodation use by law-related organisations (LROs) and related purposes, which hereinafter is referred to as the "Project", has an objective to convert the former FMB into general office accommodation and ancillary facilities with central air-condition system.
- 1.1.2 The Project is located at No.1, Battery Path, Central, and the Project site covers a footprint of about 1,364 m<sup>2</sup>.
- 1.1.3 The purpose of the Project includes the following:
  - To renovate and enhance the FMB to meet the needs of LROs and related purposes;
  - To upgrade the FMB in order to comply with the prevailing statutory requirements without compromising the conservation principles; and
  - To restore the Building to the French Mission era dating back in 1919 based on available records, while the history of CFA will be displayed by means of interpretation so as to enhance the understanding of the cultural significance of FMB.
- 1.1.4 Given the status of FMB being a declared monument under the Antiquities and Monuments Ordinance since 1989, the Project constitutes a Designated Project under item Q.1, Part I, Schedule 2 of the Environmental Impact Assessment Ordinance (EIAO). An Environmental Permit no. EP-518/2016 (EP) has been issued to the Department of Justice (DoJ) on 26 July 2016 for the construction of the Project.
- 1.1.5 Department of Justice (DoJ) is the Project Proponent. The Architectural Services Department (ArchSD) is the works agent of DoJ. ArchSD will be responsible for project management, contract preparation and site supervision and will consult DoJ at all stages of the Project.
- 1.1.6 Ramboll Hong Kong Limited has been commissioned by the Architectural Service Department, as the Independent Environmental Checker (IEC) to audit the implementation of all mitigation measure and environmental monitoring and audit (EM&A) programme recommended in the Project Profile (PP) (Register No.: PP-535/2016) and to confirm in writing in the monthly audit report full implementation of the measures and EM&A programme in accordance with condition 2.3 of the EP.
- 1.1.7 This is the 12<sup>th</sup> monthly audit report summarising the findings of implementation status of the mitigation measures and EM&A programme under the Project from 1 June 2019 to 31 June 2019.
- 1.1.8 The site location of the Project is presented in **Figure 1**.

#### **1.2 Project Organization**

1.2.1 The contact information of key personnel is summarized in **Table 1.1**. An organization chart is presented in **Appendix B**.

| Table | 1.1   | Contact | information |
|-------|-------|---------|-------------|
| labic | ~ ~ ~ | contact | mation      |

| Party                                        | Position                                      | Contact Person | Telephone | Fax       |

| Design 2 (HK) Limited                        | Architectural<br>Consultant                   | William Lai    | 2525 3011 | 2521 8203 |
| Ramboll Hong Kong Limited                    | Independent<br>Environmental<br>Checker (IEC) | Simon Cheung   | 3465 2861 | 3465 2899 |
| Hop Lee Builders Company<br>Limited          | Contractor                                    | Lo Ting Fung   | 6223 5549 | 2356 9167 |

#### 1.3 Construction activities

- 1.3.1 The construction activities undertaken in this reporting month are presented below:
  - New disable lift construction:
  - Demolition of R.C. structure for new disable lift
  - Excavation work for lift pit
  - New staircase construction:
  - Grouting works
  - Structural steel frame
  - New skylight construction:
  - Demolition of existing R.C. structure
  - Rebar fixing for new concrete block
  - Strengthening work of library (LG/F)
  - Block works and plastering works.

#### 1.3.2 The Construction Programme of the Project is provided in **Appendix C**.

### 2. AIR QUALITY AND NOISE MONITORING

#### 2.1 Monitoring Requirement

- 2.1.1 Baseline and Impact monitoring for air quality (1-hr TSP) and noise were required according to the Contract Particular Specification (PS) of the Project.
- 2.1.2 The Baseline Monitoring for Air Quality and Noise was carried out by the Contractor for 14 consecutive days between 16 April 2018 and 29 April 2018 at 4 monitoring locations prior to the commencement of construction works of the Project according to the agreed methodology.
- 2.1.3 The Action and Limit Levels for impact air quality were determined from the baseline air quality monitoring result. The Action and Limit Levels for both impact air quality and noise monitoring are presented in **Table 2.4**.
- 2.1.4 The event and action plans for impact air quality and noise monitoring are presented in **Appendix D.**
- 2.1.5 Impact air quality and noise monitoring were conducted in the reporting month. Table2.1 summarizes the details of the parameter, frequency and duration of the monitoring.

#### Table 2.1 Impact Air Quality and Noise Monitoring Parameters, Frequencies and Durations

| Parameter                                      | Frequency and Duration                                                                      |
|------------------------------------------------|---------------------------------------------------------------------------------------------|
| Air Quality                                    |                                                                                             |
| 1-hour Total Suspended Particulates (1-hr TSP) | At least 3 times in every six-days                                                          |
| Noise                                          |                                                                                             |
| $L_{Aeq}$ (30 mins), $L_{10}$ and $L_{90}$     | One set of measurement between 0700-1900 hours on normal weekdays (i.e. Monday to Saturday) |

2.1.6 Impact air quality and noise monitoring in this reporting month were conducted on 4, 10, 15, 21, 27 June 2019.

#### 2.2 Monitoring Location

2.2.1 Four locations were proposed as the air quality and noise monitoring stations during the construction phase of the Project. **Table 2.2** summarizes the details of these monitoring stations.

#### Table 2.2 Locations of Impact Air Quality and Noise Monitoring Stations

| Monitoring Station | Location                                                | Type of Noise Monitoring<br>Measurement |
|--------------------|---------------------------------------------------------|-----------------------------------------|
| A                  | Cheung Kong Park                                        | Free-field                              |
| В                  | Battery Path                                            | Free-field                              |
| С                  | North corner of the Project site with the site boundary | Façade                                  |
| D                  | West side of Battery Path                               | Free-field                              |

#### 2.3 Monitoring Equipment and Methodology

2.3.1 **Table 2.3** summarizes the equipment used to carry out the impact air quality and noise monitoring. The calibration certificates were checked by IEC in the reporting month.

| Equipment                          | Model/Brand (Serial No.)     | Calibration Certificate Expiry<br>Date |
|------------------------------------|------------------------------|----------------------------------------|
| Air Quality                        |                              |                                        |
| Portable direct reading dust meter | LD-5R (882106)               | 26 August 2019                         |
| Portable direct reading dust meter | LD-5R (882107)               | 26 August 2019                         |
| Portable direct reading dust meter | LD-5R (882108)               | 26 August 2019                         |
| Portable direct reading dust meter | LD-5R (882110)               | 26 August 2019                         |
| Noise                              |                              |                                        |
| Sound Level Meter                  | NTi Audio XL2 (A2A-13661-E0) | 9 September 2019                       |
| Sound Level Calibrator             | Pulsar Model 43 (PN1768)     | 17 October 2019                        |
|                                    |                              |                                        |

#### Table 2.3 Equipment for Impact Air Quality and Noise Monitoring

2.3.2 The portable direct reading dust meter(s), sound level meter(s) and sound level calibrator(s) were calibrated annually.

#### 2.4 Action & Limit Level

2.4.1 The Action and Limit Levels was established in accordance with the approved EM&A Manual. **Table 2.4** presents the Action and Limit Levels for air quality and noise monitoring.

| Monitoring Station | Action Level                              | Limit Level                         |
|--------------------|-------------------------------------------|-------------------------------------|
| Air Quality        | (µg/m³)                                   | (µg/m³)                             |
| A                  | 296                                       | 500                                 |
| В                  | 294                                       | 500                                 |
| С                  | 293                                       | 500                                 |
| D                  | 295                                       | 500                                 |
|                    |                                           |                                     |
| Noise              |                                           | (L <sub>eq (30 mins)</sub> , dB(A)) |
| A,B,C,D            | When one documented complaint is received | 75                                  |

#### Table 2.4 Action & Limit Level for Air Quality and Noise Monitoring

#### 2.5 Monitoring Result

2.5.1 The monitoring results for impact air quality and noise monitoring in the reporting month are summarized in **Table 2.5** and **Table 2.6** respectively.

| Monitoring Station | Average, μg/m³ | Range, µg/m³ |
|--------------------|----------------|--------------|
| A                  | 55             | 51 - 62      |
| В                  | 54             | 42 - 62      |
| С                  | 76             | 64 - 97      |
| D                  | 63             | 54 - 68      |

2.5.2 No Action and Limit Level exceedances of 1-hr TSP were recorded at air monitoring stations – A, B, C and D the reporting month.

| Table 2.6 | Summary of Impact Noise Monitoring Results in the Reporting Month |
|-----------|-------------------------------------------------------------------|
|-----------|-------------------------------------------------------------------|

| Monitoring Station | Average, dB(A)<br>(with free-field<br>correction for A, B<br>and D) |             | Range, dB(A) |             |
|--------------------|---------------------------------------------------------------------|-------------|--------------|-------------|
|                    | Leq (30 mins)                                                       | Leq (5mins) | L10(5 mins)  | L90(5 mins) |
| А                  | 65                                                                  | 64 - 66     | 64 - 65      | 59 - 61     |
| В                  | 65                                                                  | 65 - 66     | 63 - 65      | 58 - 61     |
| С                  | 67                                                                  | 66 - 68     | 67 - 71      | 62 - 65     |
| D                  | 65                                                                  | 64 - 65     | 64 - 65      | 58 - 59     |

2.5.3 No Limit Level exceedance of noise was recorded at noise monitoring stations – A, B, C and D in the reporting month.

### 3. ENVIRONEMNTAL SITE INSPECTION AND AUDIT

#### 3.1 Site Inspection

- 3.1.1 Site inspections are required to be conducted by IEC on a monthly basis to monitor the implementation of proper environmental pollution control and mitigation measures recommended in the PP of the Project as required in the EP.
- 3.1.2 One site inspection was carried out on 12 June 2019 in the reporting month. The finding(s) of the site inspection are described as below:
  - No major observation was noted during site inspection.
- 3.1.3 Only hand-held power tools and hand-held manual tools were used for carrying out the internal works of the Project.
- 3.1.4 Cultural heritage mitigation measure set out in Sections 2.6 and 2.7 of the Project Profile were implemented in the reporting period.

#### 3.2 Advice on the Waste Management Status

- 3.2.1 A billing account for disposal of construction waste was created for the Project on 9 February 2018.
- 3.2.2 The Project was registered as a Chemical Waste Producer on 23 February 2018.
- 3.2.3 According to information provided by the Contractor, 17.38 tonnes of inert C&D materials were disposed in public fill. 9.59 tonnes of other non-inert C&D waste, such as general refuse, were disposed to the Landfill in the reporting month.

#### 3.3 Status of Environmental Licences and Permits

3.3.1 The environmental licenses and permits for the Project that were valid in the reporting month are summarized in **Table 3.1**.

| Permit / Licence                                     | Reference No.     | Date of Issue | Valid Thru  | Status |  |
|------------------------------------------------------|-------------------|---------------|-------------|--------|--|
| Environmental<br>Permit                              | EP-518/2016       | 26 Jul 2016   | N/A         | Valid  |  |
| Notification of<br>Works under APCO                  | 430032            | 24 Jan 2018   | N/A         | Valid  |  |
| Billing account<br>under Waste<br>Disposal Ordinance | 7030054           | 9 Feb 2018    | N/A         | Valid  |  |
| Registration as a<br>Chemical Waste<br>Producer      | 5213-123-H3927-01 | 23 Feb 2018   | N/A         | Valid  |  |
| WPCO Discharge<br>Licence                            | WT00031811-2018   | 8 Oct 2018    | 31 Oct 2023 | Valid  |  |

#### Table 3.1 Summary of Environmental Licences and Permits

#### 3.4 Implementation Status of Mitigation Measures

3.4.1 The implementation status of mitigation measures recommended in the PP is summarized in **Appendix A**.

### 4. REPORT ON COMPLAINT, NOTIFICATION OF SUMMONS AND SUCCESSFUL PROSECUTION

#### 4.1 Record of Environmental Complaint Received

4.1.1 No environmental complaint was received in the reporting month.

#### 4.2 Record of Environmental Quality Performance Exceedance

- 4.2.1 No Action and Limit Level exceedances of 1-hr TSP were recorded at air monitoring stations A, B, C and D the reporting month.
- 4.2.2 No Action and Limit Level exceedances of noise were recorded at noise monitoring stations A, B, C and D in the reporting month.

#### 4.3 Record of Notification of Summons and Successful Prosecution

4.3.1 No notification of summons or successful prosecution was received in the reporting month.

# 4.4 Cumulative Statistics for Complaint, Notification of Summons and Successful Prosecution

4.4.1 Cumulative statistics of complaint, notification of summons and successful prosecution for the period from the date of commencement of construction to end of the reporting month are summarized in **Table 4.1**.

#### Table 4.1 Statistics for Complaint, Notification of Summons and Successful Prosecution

|                                                                             | Complaints | Notifications of<br>Summons | Successful<br>Prosecution |
|-----------------------------------------------------------------------------|------------|-----------------------------|---------------------------|
| Within the reporting month (June 2019)                                      | 0          | 0                           | 0                         |
| From the date of commencement of construction to end of the reporting month | 0          | 0                           | 0                         |

### 5. FUTURE KEY ISSUES

#### 5.1 Monitoring Schedule for the Coming Month

5.1.1 The tentative dates of air quality and noise monitoring for next month are 3, 9, 15, 20 and 26 July 2019.

#### 5.2 Construction Works for the Coming Month

- 5.2.1 The construction works that are anticipated to be conducted in the coming month include:
  - New disable lift construction:
  - Lift pit construction
  - Sub frame for glass lift shaft
  - Steel frame for lift installation
  - New staircase construction:
  - Grouting works for steel frame
  - Structural steel frame
  - New skylight construction:
  - R.C. block
  - Steel frame
  - Dog house construction
  - Wall and door opening
  - Block works and plastering works
  - Floor screeding
  - Waterproofing works (Toilet and Plant Room)
  - Strengthening works (External area)
  - Additional strengthening works (due to existing site condition)
  - Repair of existing window and timber flooring
  - Metal scaffold for chapel
  - Bamboo scaffolding on R/F for re-roofing works

### 5.3 Key Issues for the Coming Month

- 5.3.1 The key environmental issues to be considered in the coming month include:
  - Sorting, recycling, storage and disposal of general refuse and C&D waste
  - Cover stockpile of silty material to prevent silty surface runoff discharge during rainstorm events

### 6. CONCLUSION

#### 6.1 Conclusion

- 6.1.1 The EM&A programme recommended in the PP has been undertaken since 1 July 2018
- 6.1.2 No environmental complaint was received in the reporting month.
- 6.1.3 No Action and Limit Level exceedances of 1-hr TSP were recorded at air monitoring stations A, B, C and D the reporting month.
- 6.1.4 No Action and Limit Level exceedances of noise were recorded at noise monitoring stations A, B, C and D in the reporting month.
- 6.1.5 One site inspection was conducted in the reporting month by IEC, and the implementation of mitigation measures by Contractor as recommended in the PP was audited.
- 6.1.6 No notification of summons or successful prosecution was received in the reporting month.

| Legend                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | ⊥ N                                              |
