Attention: Mr. Vincent CHOW / Mr. K.T. WO

Dear Sir,

Agreement No. CE 59/2017 (EP)
Independent Environmental Checker for Tung Chung New Town Extension – Investigation
Monthly Environmental Monitoring & Audit Report for September 2022 for TCE

We refer to the Monthly Environmental Monitoring & Audit Report for September 2022 for Tung Chung New Town Extension (East) (TCE) dated November 2022 and certified by the Environmental Team (ET) Leader of TCE on 15 November 2022. Please note the submission is hereby verified, in accordance with the requirement stipulated in Condition 3.5 of EP-519/2016.

Should you have any query, please feel free to contact the undersigned at 2608 7314 (chuawo@binnies.com) or our Edward Lau at 6848 5737 (iec.tcnte@gmail.com or lauky@binnies.com).

Yours faithfully,
for and on behalf of

EXECUTIVE SUMMARY

Tung Chung New Town Extension (TCNTE) is one of the major initiatives under the Government's multi-pronged approach to increase land supply to meet Hong Kong's medium- to long-term needs for housing, economic and social developments. The Environmental Impact Assessment (EIA) Report for TCNTE (Register No. AEIAR-196/2016) was approved on 8 April 2016 and the Environmental Permit (EP) No. EP-519/2016, covering the construction and operation of TCNTE, was granted on 9 August 2016. The EIA Report and EP cover both Tung Chung East (TCE) and Tung Chung West (TCW). ERM-Hong Kong, Limited (ERM) is commissioned to undertake the role of Environmental Team (ET) for the construction and operation of TCE Project ("the Project") in accordance with the requirements specified in the EP, Updated Environmental Monitoring and Audit (EM&A) Manual, EIA Report of the TCNTE project and other relevant statutory requirements.

The construction of the Contract No. NL/2017/03 - Tung Chung New Town Extension – Reclamation and Advance Works ("Contract 1") at TCE commenced on 9 July 2018.

The construction of the Contract No. NL/2020/02 - Tung Chung New Town Extension – Salt Water Supply System ("Contract 2") at TCE commenced on 4 September 2021.

The construction of the Contract No. NL/2020/03 - Tung Chung New Town Extension – Major Infrastructure Works in Tung Chung East ("Contract 3") at TCE commenced on 5 November 2021.

The construction of the Contract No. NL/2020/07 - Tung Chung New Town Extension – Tai Ho Interchange ("Contract 7") at TCE commenced on 15 March 2022.

This is the Monthly EM&A report presenting the EM&A works carried out during the period from 1 to 30 September 2022 for the TCE Project in accordance with the Updated EM&A Manual.

A summary of monitoring and audit activities conducted in the reporting period is listed below:

| | |
|------------------------------------|-------------|
| Air Quality Monitoring | 5 sessions |
| Noise Monitoring | 5 sessions |
| Water Quality Monitoring | 13 sessions |
| Preserved Plant Species Monitoring | 1 session |
| Soft Shore Ecological Monitoring | 1 session |

Environmental Site Inspection

- Contract 1 5 sessions
- Contract 2 4 sessions
- Contract 3 5 sessions
- Contract 7 4 sessions

Environmental Management Meeting

- Contract 1 1 session
- Contract 2 1 session
- Contract 3 1 session
- Contract 7 1 session

Environmental auditing works, including weekly site inspections of construction works conducted by the ET, audit of works vessels, audit of implementation of Complaint Management Plan, Dolphin Watching Plan, Works Vessel Travel Route Plan, Silt Curtain Deployment Plan, Spill Response Plan, Detailed Preservation and/or Translocation of Plant Species of Conservation Importance, Detailed Compensatory Woodland Planting Plan and Waste Management Plan were conducted in the reporting period. Based on the audit results and the observation for the reporting period, environmental pollution control and mitigation measures for the Project were properly implemented.

Breaches of Action and Limit Levels for Air Quality

No exceedance of Action and Limit Levels was recorded for construction air quality monitoring in the reporting period.

Breaches of Action and Limit Levels for Noise

No exceedance of Limit Levels was recorded for construction noise monitoring in the reporting period. However, three (3) Action Level were triggered from three (3) environmental complaints related to noise nuisance in the reporting period. Investigation was conducted for the exceedances in accordance with the Event and Action Plan.

Breaches of Action and Limit Levels for Water Quality

Dissolved Oxygen (DO) and Suspended Solids (SS) exceedances were recorded during the reporting period. Relevant investigations and follow-up actions were conducted according to the EM&A programme. The exceedances were considered not related to this Project after investigations.

Eco-shoreline Monitoring

Mangrove eco-shoreline and rocky eco-shoreline are under construction while the construction of vertical eco-shoreline has been substantially completed.

Soft Shore Ecological Monitoring

Based on the impact monitoring conducted during the reporting period, there was no evidence showing any significant difference in intertidal communities when compared against the data obtained during baseline monitoring. The ET will continue to observe the change in density or the distribution pattern of horseshoe crab, seagrass and intertidal soft shore communities taking into account natural fluctuation in respect of the occurrence and distribution pattern.

Environmental Complaints, Non-compliance & Summons

There was no notification of summons or prosecution recorded in the reporting period.

One (1) environmental complaint related to Contract 1 and three (3) environmental complaint related to Contract 3 were received in the reporting period. Investigations were conducted for the environmental complaints in accordance with the complaint handling process as stated in the Complaint Management Plan.

Reporting Change

There was no reporting change in the reporting period.

Key Issues For The Coming Month

Potential environmental impacts arising from the upcoming construction activities in the next reporting period of October 2022 are mainly associated with dust emission, noise from barge and plant operation during normal working hours and restricted hours, elevation in SS due to marine filling works, disturbance to Chinese White Dolphin (CWD) during marine works, handling and storage of C&D materials generated from construction activities, efficiency of wastewater and drainage management and tree protection. The ET will keep track on the construction works to confirm compliance of environmental requirements and the proper implementation of all necessary mitigation measures. The ET will also recommend to the Contractor about the environmental toolbox topics on the abovementioned key issues for the coming month.

1 INTRODUCTION

1.1 BACKGROUND

Tung Chung New Town Extension (TCNTE) is one of the major initiatives under the Government's multi-pronged approach to increase land supply to meet Hong Kong's medium- to long-term needs for housing, economic and social developments. The Environmental Impact Assessment (EIA) Report for TCNTE (Register No. AEIAR-196/2016) was approved on 8 April 2016 and the Environmental Permit (EP) No. EP-519/2016, covering the construction and operation of TCNTE, was granted on 9 August 2016. The EIA Report and EP cover both Tung Chung East (TCE) and Tung Chung West (TCW).

ERM-Hong Kong, Limited (ERM) is commissioned to undertake the role of Environmental Team (ET) for the construction and operation of TCE Project ("the Project") in accordance with the requirements specified in the EP, Updated Environmental Monitoring and Audit (EM&A) Manual ⁽¹⁾, EIA Report of the TCNTE project ⁽²⁾ and other relevant statutory requirements.

The TCNTE comprises the following elements:

(a) TCE Project

1. Reclamation of the seabed by a non-dredged method at TCE to form a total of about 130 hectares of land;
2. Construction of about 4.9 kilometers of seawalls, with an eco-shoreline, three drainage box culvert outfalls, three circulation drains and a seawater intake at TCE;
3. Provision of infrastructure for Tung Chung Area 58, including construction of a single two-lane road with a footpath and the associated utility works;
4. Construction of proposed open space;
5. Construction of roads, footpaths, cycle tracks and the associated junction / road improvement works;
6. Engineering infrastructure works covering drainage, sewerage, waterworks (including a fresh water service reservoir, a salt water service reservoir and a salt water pumping station), common utility tunnels and landscaping works; and

(1) ERM (2018a). Updated Environmental Monitoring and Audit Manual for Tung Chung New Town Extension. Deposited to EPD under EP-519/2016

(2) Arup (2015). Environmental Impact Assessment Report for Tung Chung New Town Extension. Deposited to EPD under Register No. AEIAR-196/2016

7. Implementation of environmental mitigation measures and environmental monitoring and audit programme for the works.
- (b) TCW Project
1. Site formation works at TCW;
 2. Construction of proposed open space;
 3. Construction of the River Park including a visitor centre at TCW; and
 4. Construction of sustainable urban drainage systems at TCW.

The locations of Contracts 1, 2, 3 and 7 are shown in *Figure 1.1 to 1.4*. The construction and the reclamation related marine works of Contract 1 commenced on 9 and 13 July 2018, respectively. The construction of Contracts 2, 3 and 7 commenced on 4 September 2021, 5 November 2021 and 15 March 2022, respectively.

1.2 SCOPE OF THE EM&A REPORT

This is the Monthly EM&A Report for the TCE Project which summarises the key findings of the EM&A programme during the reporting period from 1 to 30 September 2022 for the construction works.

1.3 ORGANIZATION STRUCTURE

The organization structure of the Project is shown in *Annex A*. The key personnel contact names and contact details are summarized in *Table 1.1* below.

|--|---|---|
| Contract No. NL/2017/03 - Tung Chung New Town Extension - Reclamation and Advance Works (Contract 1) | | |
| Land-based Works | | |
| <ul style="list-style-type: none"> • Ground investigation works • Land DCM works • Jet grouting works • Placing of sorted public fill • Box culvert construction • Installation of PVD | <ul style="list-style-type: none"> • Dust emission • Handling and storage of C&D materials generated from construction activities • Noise from plant operation • Emission of dark smoke from PMEs • Efficiency of wastewater and drainage management | <ul style="list-style-type: none"> • Good site practices • Regular water spraying on stockpiles, unpaved haul road and land filling area • Provide tarpaulin sheets coverage on stockpiles • Sorting and reuse of C&D materials as far as practicable • Use of QPME and noise barrier/acoustic mat • Regular maintenance of PMEs • Implementation of wastewater and drainage management |
| Marine-based Works | | |
| <ul style="list-style-type: none"> • Laying of geotextile for seawall construction • Placing of sorted public fill • Seawall construction (including vertical seawall, slopping seawall & eco-shoreline) | <ul style="list-style-type: none"> • Elevation in impact on Water Quality due to sediment loss from sand blanket laying and marine filling works • Potential surface runoff • Potential filling material drop from barges • Disturbance to Chinese White Dolphin • Noise from marine vessels and plant operation during normal working hours or restricted hours • Dust emission during storage and transfer of sand/ sorted public fill • Emission of dark smoke from marine vessel | <ul style="list-style-type: none"> • Provision of perimeter silt curtain • Provision of a leading seawall of at least 200m before marine filling works • Regular cleaning of accumulated sand/fill materials at the edge of the barges • Implementation of Dolphin Watching for the marine-based works • Strictly follow requirement under CNP for the use of PMEs and works within restricted period • Use of acoustic mat and other noise mitigation measures when necessary • Regular maintenance of engines and mechanical equipment |

**Contract No. NL/2020/02 - Tung Chung New Town Extension - Salt Water Supply System
(Contract 2)**

Land-based Works

- Initial survey (land survey prior to the commencement of construction works)
 - Excavation and installing struts for ELS at Portion 6
 - Excavation and construction for service reservoir and soil nailing works at Portion 3
 - Watermain laying works at Portion 3 along Yu Tung Road
 - Preparation works for pipe jacking at Portion 3
 - Trench excavation for watermain laying works at Yi Tung Road at Portion 5
 - Trench excavation and manhole construction for drainage works at Portion 5A
 - Construction works for mud pit for HDD works at Portion 3
 - Compensatory woodland planting at Portion 1 and 2
 - Preparation works for fabrication of precast unit for box culvert at Portion 5B
 - Dust emission
 - Handling and storage of C&D materials generated from construction activities
 - Noise from plant operation
 - Emission of dark smoke from PMEs
 - Efficiency of wastewater and drainage management
 - Tree protection
 - Good site practices
 - Regular water spraying on stockpiles, unpaved haul road and land filling area
 - Provide tarpaulin sheets coverage on stockpiles
 - Sorting and reuse of C&D materials as far as practicable
 - Use of QPME and noise barrier/acoustic mat
 - Regular maintenance of PMEs
 - Implementation of wastewater and drainage management
 - Retain and protect all existing trees and vegetation within the study area which are not directly affected by the works
-

Contract No. NL/2020/03 - Tung Chung New Town Extension - Major Infrastructure Works in Tung Chung East (Contract 3)

Land-based Works

- Excavation and Installation of instrumentations at Portion 104
 - Excavation and ELS works at CUT no.1,2 & 3
 - Construction works and furniture installation of PM office at WA9
 - Construction works of Contractor office at WA6
 - Installation of sheetpile, ELS works and drainage works at Road L3 and Road D4
 - Sewerage and watermain works at Road L4
 - Pipe laying works for twin rising mains/ watermain laying at Man Tung Road
 - Trial pits for pipe jacking works at Ying Tung Road
 - Preparation works for pipe jacking at Yi Tung Road
 - Foundation works for noise barrier at Portion 11
 - Dust emission
 - Handling and storage of C&D materials generated from construction activities
 - Noise from plant operation
 - Emission of dark smoke from PMEs
 - Efficiency of wastewater and drainage management
 - Good site practices
 - Regular water spraying on stockpiles, unpaved haul road and land filling area
 - Provide tarpaulin sheets coverage on stockpiles
 - Sorting and reuse of C&D materials as far as practicable
 - Use of QPME and noise barrier/acoustic mat
 - Regular maintenance of PMEs
 - Implementation of wastewater and drainage management
-

Land-based Works

- Open cut excavation for rising main and watermain at Portion 146-5
- Trench excavation and pipe laying works at Portions 32 (Sham Shui Kok Drive), Portion 34 Phase 1 and Portions 36-38
- Tree felling works / site clearance works at Portion 30, 31, 32, 33, 34
- Set up of temporary haul road and working platform at Portion 31 Slip Road A3 (RW-R7) & A4 (RW-FR1)
- Demolition for Pak Mong Subway Extension Phase 1
- Pipe pile installation at Portion 32 (Access Road adjacent to MTRC Siu Ho Wan Depot)
- Pre-drilling for Pak Mong Channel Bridge
- Site clearance and tidiness
- Dust emission
- Handling and storage of C&D materials generated from construction activities
- Noise from plant operation
- Emission of dark smoke from PMEs
- Efficiency of wastewater and drainage management
- Tree protection
- Good site practices
- Regular water spraying on stockpiles, unpaved haul road and land filling area
- Provide tarpaulin sheets coverage on stockpiles
- Sorting and reuse of C&D materials as far as practicable
- Use of QPME and noise barrier/acoustic mat
- Regular maintenance of PMEs
- Implementation of wastewater and drainage management
- Retain and protect all existing trees and vegetation within the study area which are not directly affected by the works

The environmental mitigation implementation schedule is presented in *Annex B*.

1.5 SUMMARY OF EM&A PROGRAMME REQUIREMENTS

The status for all environmental aspects are presented in *Table 1.3*. The EM&A requirements remained unchanged during the reporting period.

Table 1.3 Summary of Status for the Environmental Aspects under the Updated EM&A Manual

| Parameters | Status |
|---------------------|--|
| Air Quality | |
| Baseline Monitoring | The results of baseline air quality monitoring for TCE were reported in Baseline Monitoring Report and submitted to EPD under EP Condition 3.4 |
| Impact Monitoring | On-going for TCE, monitoring conducted three times every six days |

| Parameters | Status |
|--|--|
| Noise | |
| Baseline Monitoring | The results of baseline noise monitoring for TCE were reported in Baseline Monitoring Report and submitted to EPD under EP Condition 3.4 |
| Impact Monitoring | On-going for TCE, monitoring conducted once per week |
| Impact Monitoring for Road Traffic Noise during Operational Phase | To be conducted during operational phase |
| Fixed Noise Commissioning Test | To be implemented by the Contractor before operation of TCNTE |
| Water Quality | |
| Baseline Monitoring | The results of baseline water quality monitoring for TCE were reported in Baseline Monitoring Report and submitted to EPD under EP Condition 3.4 |
| Impact Monitoring | On-going for TCE, monitoring conducted three times per week |
| Waste Management | |
| Waste Monitoring | On-going |
| Land Contamination | |
| Contamination Assessment Plan (CAP), Remediation Action Plan (RAP) and Remediation Report (RR) | To be conducted under TCW. Refer to the EM&A Reports of TCW. |
| Ecology | |
| Monitoring for Compensation Woodland | To be conducted when compensation woodland is planted. Compensatory woodland planting was commenced on 26 August 2022 and substantially completed on 30 September 2022. |
| Monitoring for Emergent Plant inside the future River Park | To be conducted under TCW. Refer to the EM&A Reports of TCW. |
| Monitoring for Translocated Amphibians of Conservation Importance | To be conducted under TCW. Refer to the EM&A Reports of TCW. |
| Monitoring for Preserved/Transplanted Plant Species of Conservation Importance | On-going, for transplanted plant species, transplantation works was carried out on 21 January 2022 and monitoring conducted once per week for the first three months; for preserved plant species, monitoring conducted once per month |
| Monitoring for Tung Chung Stream EIS and Wong Lung Hang EIS | To be conducted under TCW. Refer to the EM&A Reports of TCW. Monitoring for Wong Lung Hang was not required and the proposal was accepted by EPD on 2 September 2021 |
| Eco-shoreline Monitoring | To be conducted when eco-shoreline at TCE PDA and Road P1 is built |

| Parameters | Status |
|---|---|
| Tung Chung Bay and Tai Ho Wan Baseline Monitoring | The results of baseline soft shore ecological monitoring at Tung Chung Bay and Tai Ho Wan were reported in Baseline Monitoring Report and submitted to EPD under EP Condition 3.4 |
| Tung Chung Bay and Tai Ho Wan Impact Monitoring | On-going for TCE, monitoring conducted quarterly |
| Landscape and Visual | |
| Baseline Monitoring | The results of baseline landscape and visual monitoring were reported in Baseline Monitoring Report and submitted to EPD under EP Condition 3.4 |
| Impact Monitoring | On-going |
| Site Environmental Audit | |
| Regular Site Inspection | On-going |
| Dolphin Watching Plan implementation measures | Under implementation by the Contractor of Contract 1 |
| Works Vessel Travel Route Plan implementation measures | Under implementation by the Contractor of Contract 1 |
| Silt Curtain Deployment Plan implementation measures | Under implementation by the Contractor of Contract 1 |
| Spill Response Plan implementation measures | Under implementation by the Contractor of Contract 1 |
| Detailed Preservation and/or Translocation Plan for Plant Species of Conservation Importance implementation measures | Under implementation by the Contractor of Contract 2 |
| Detailed Compensatory Woodland Planting Plan implementation measures | Under implementation by the Contractor of Contract 2 |
| Waste Management Plan implementation measures | Under implementation by the Contractor of Contract 1 |
| Complaint Hotline and Email Channel | Under implementation by the Contractor of Contract 1. The 24-hour complaint hotline/email channel under Contracts 2, 3, and 7 are subjected for approval |
| Environmental Log Book | On-going |

Taking into account the construction works, impact monitoring of air quality, noise, water quality, soft shore ecological monitoring and waste management were carried out in the reporting period. The monitoring schedule of air quality, noise, water quality and soft shore ecological monitoring are provided in *Annex E2*, *Annex F2*, *Annex G2* and *Annex K1*, respectively.

The EM&A programme also involved environmental site inspections and related auditing conducted by the ET for checking the implementation of the

required environmental mitigation measures recommended in the approved EIA Report and relevant EP submissions, including Complaint Management Plan, Dolphin Watching Plan, Works Vessel Travel Route Plan, Silt Curtain Deployment Plan, Spill Response Plan, Detailed Preservation and/or Translocation Plan for Plant Species of Conservation Importance, Detailed Compensatory Woodland Planting Plan and Waste Management Plan.

To promote the environmental awareness and enhance the environmental performance of the contractors, environmental trainings and regular environmental management meetings were conducted during the reporting period, which are summarized as below:

- Four (4) environmental management committee meetings were held with the Contractors of Contract 1, 2, 3 and 7 and ER, ET, IEC and CEDD on 26, 21, 28 and 13 September 2022, respectively;
- Environmental toolbox trainings on noise control measures, dust suppression/waste management, nuisance to residence (light pollution/sudden noise/dusty work), site hygiene, wastewater handling, discharge, treatment facilities, works vessel travel route plan, use of spill kits and operation and maintenance on 2, 7, 9, 14, 21, 23, 28 and 30 September 2022 were conducted for Contract 1;
- Environmental toolbox trainings on protection and preservation of trees and loading, unloading and transfer of material on 8, 9, 16, 19 and 23 September 2022 were conducted for Contract 2;
- Environmental toolbox trainings on construction dust and suppression, construction noise and suppression, wastewater handling, discharge and treatment facilities, waste collection, handling and disposal, chemical waste and handling of chemical spillage, site plant and machinery (operation and maintenance), maintenance of site access, site boundary and haul roads, stockpiling and ground investigation on 1, 6, 8, 13, 15, 20, 22, 27 and 29 September 2022 were conducted for Contract 3;
- Environmental toolbox trainings on breaking, drilling, cutting and polishing, loading, unloading and transfer of material, stockpiling and backfilling, deposition and compaction of fill materials on 7, 14, 21 and 28 September 2022 were conducted for Contract 7.

1.6

STATUS OF STATUTORY ENVIRONMENTAL COMPLIANCE WITH THE ENVIRONMENTAL PERMIT

The status of statutory environmental compliance with the EP conditions under the EIAO, submission status under the EP and implementation status of mitigation measures are presented in *Annex C*.

1.7

STATUS OF OTHER STATUTORY ENVIRONMENTAL REQUIREMENTS

The environmental licenses and permits, including environmental permit, discharge license under Water Pollution Control Ordinance, registration as chemical waste producer, construction noise permit and specified processes license, which were valid in the reporting period are presented in *Annex D*. No non-compliance with environmental statutory requirements was recorded.

The EM&A programme for the Project required environmental monitoring for air quality, noise, water quality and marine ecology as well as environmental site inspections for air quality, noise, water quality, waste management, marine ecology and landscape and visual impacts. The EM&A requirements and related findings for each component are summarized in the following sections.

2.1 AIR QUALITY

2.1.1 Monitoring Requirements and Equipment

According to the Updated EM&A Manual of the Project, impact air quality monitoring in terms of 1-hour Total Suspended Particulate (TSP) was conducted three (3) times every six (6) days when the highest dust impact was expected. The Action and Limit Levels of the air quality monitoring is provided in *Table 2.1* below.

Table 2.1 Action and Limit Levels for 1-hour TSP

| Location | Action Level, $\mu\text{g}/\text{m}^3$ | Limit Level, $\mu\text{g}/\text{m}^3$ |
|--|--|---------------------------------------|
| Monitoring station for Tung Chung East | 279 | 500 |

Portable direct reading dust meters were used to measure 1-hour TSP levels in undertaking the air quality monitoring for the Project. The proposed use of portable direct reading dust meters was submitted to IEC and obtained agreement from the IEC as stated in Section 5.5 of the Updated EM&A Manual. With the use of direct reading dust meter, it can allow prompt and direct results for the EM&A reporting and the implementation of the event and action plan. The portable direct reading dust meter would be calibrated every year against High Volume Sampler (HVS) to check the validity and accuracy of the results measured by direct reading method.

The monitoring location and equipment used in the impact air quality monitoring programme are summarized in *Table 2.2* and illustrated in *Figure 2.1*. Copies of the calibration certificates for the equipment are presented in *Annex E1*, which showed that the portable direct reading dust meter is capable of providing comparable results with that provided by a HVS.

Resources
Management**

Table 2.2 Air Quality Monitoring Details

| Monitoring Station | Location | Parameter | Frequency and Duration | Monitoring Dates | Equipment |
|---|---------------------------------------|------------|--|-------------------------------------|--|
| DM-1 | Tung Chung Area 56 - Ying Tung Estate | 1-hour TSP | Three times per six days during the construction period of the Project | 6, 10, 16, 22 and 28 September 2022 | 1-hour TSP Dust Meter SIBATA LD-3B (S/N: 276019) |
| <p>Remark: It should be noted that impact monitoring at other construction dust monitoring locations at TCE as stated in the Updated EM&A Manual will commence after the flat intake (for Monitoring Stations DM-2, DM-3 and DM-4).</p> | | | | | |

2.1.2 Monitoring Schedule for the Reporting Month

The schedule for air quality monitoring during the reporting period is provided in *Annex E2*.

2.1.3 Results and Observations

The monitoring results for 1-hour TSP are summarized in *Table 2.3*. The monitoring data and the graphical presentation are provided in *Annex E3*.

Table 2.3 Summary of 1-hour TSP Monitoring Results in the Reporting Period

| Monitoring Station | Average ($\mu\text{g}/\text{m}^3$) | Range ($\mu\text{g}/\text{m}^3$) | Action Level ($\mu\text{g}/\text{m}^3$) | Limit Level ($\mu\text{g}/\text{m}^3$) |
|--------------------|--------------------------------------|------------------------------------|---|--|
| DM-1 | 32 | 15-62 | 279 | 500 |

Major dust sources in the reporting period included haul road traffic, excavation, loading and unloading of sand/fill material and filling works under the Project.

No exceedance of Action and Limit Levels was recorded for construction air quality monitoring in the reporting period. No action was thus required to be undertaken in accordance with the Event and Action Plan presented in *Annex E4*.

2.2 NOISE MONITORING

2.2.1 Monitoring Requirements and Equipment

According to the Updated EM&A Manual of the Project, impact noise monitoring was conducted once per week during the construction phase of the Project. The Action and Limit Level for construction noise of the Project is provided in *Table 2.4* below.

Table 2.4 *Action and Limit Levels for Construction Noise*

| Time Period | Action Level | Limit Level |
|--------------------------------------|---|--------------------|
| 0700 - 1900 hours on normal weekdays | When one documented complaint is received | 75 dB(A) * |

Notes:

Limit level is exceeded when $L_{eq} \geq 75$ dB(A). If works are to be carried out during restricted hours, the conditions stipulated in the construction noise permit issued by the Noise Control Authority have to be followed.

* Reduce to 70 dB (A) for schools and 65 dB (A) during school examination periods.

Noise monitoring was performed using sound level meter at the designated monitoring stations NMS-CA-1A ⁽¹⁾ ⁽²⁾ and NMS-CA-4 (Figure 2.2; Table 2.5) in accordance with the requirements stipulated in the Updated EM&A Manual. Acoustic calibrator was deployed to check the sound level meters at a known sound pressure level. Details of the deployed equipment are provided in Table 2.5. Copies of the calibration certificates for the equipment are presented in Annex F1.

(1) Impact monitoring at monitoring station NMS-CA-1A commenced on 19 September 2018 in view of the close vicinity of the construction works near the residential area at Century Link.

(2) Due to land handover issue, NMS-CA-1A was relocated to Ying Hong Road which is located 60m away from the original location. Proposal on the relocation of NMS-CA-1A was approved by IEC on 23 November 2018. Noise monitoring at the relocated location commenced since 24 November 2018.

Management**

Table 2.5 Noise Monitoring Details

| Monitoring Station (a) | Location | Parameter | Frequency and Duration | Monitoring Dates | Equipment |
|------------------------|--|--|---|-------------------------------------|--|
| NMS-CA-1A (b) | Residential premise in Tung Chung East - Century Link/Ying Hong Road | 30-minute in measurement between 0700 and 1900 on normal weekdays (Monday to Saturday). L_{eq} , L_{10} and L_{90} | Once per week for 30 mins during the construction period of the Project | 6, 10, 16, 22 and 28 September 2022 | Sound Level Meter: Rion NL-52 (S/N: 00542913) Acoustic Calibrator: LARSON DAVIS CAL200 (S/N: 11334) |
| NMS-CA-4 | Residential premise in the reclamation area next to Tung Chung East - Ying Tung Estate | would be recorded. | | | |

Remarks:

- (a) It should be noted that impact monitoring at other construction noise monitoring locations at TCE as stated in the Updated EM&A Manual will commence after the flat intake of residential premise in TCE (for Monitoring Station NMS-CA-1) and operation of schools (for Monitoring Stations NMS-CA-2 and NMS-CA-3).
- (b) Impact monitoring at monitoring station NMS-CA-1A commenced on 19 September 2018 in view of the close vicinity of the construction works near the residential area at Century Link.
- (c) Due to land handover issue, NMS-CA-1A was relocated to Ying Hong Road which is located 60m away from the original location. Proposal on the relocation of NMS-CA-1A was approved by IEC on 23 November 2018. Noise monitoring at the relocated location commenced since 24 November 2018.

2.2.2 Monitoring Schedule for the Reporting Month

The schedule for noise monitoring during the reporting period is provided in Annex F2.

2.2.3 Results and Observations

Results for noise monitoring are summarized in Table 2.6. The monitoring data and the graphical presentation are provided in Annex F3.

Table 2.6 Summary of Construction Noise Monitoring Results in the Reporting Period

| Monitoring Station | Average, dB(A), L_{eq} (30mins) | Range, dB(A), L_{eq} (30mins) | Limit Level, dB(A), L_{eq} (30mins) |
|--------------------|--------------------------------------|------------------------------------|--|
| NMS-CA-1A | 69.1 | 66.7-71.9 | 75 |
| NMS-CA-4 | 65.5 | 64.4-66.3 | 75 |

Major noise sources during the noise monitoring included noise from plant operation, craning, piling, haul road traffic, nearby traffic and aircraft as well as nearby construction sites.

No Limit Level exceedance was recorded for construction noise monitoring in the reporting period. However, three (3) Action Level was triggered from three (3) environmental complaint related to noise nuisance received in the reporting period. Investigation was conducted for the complaint in accordance with the Event and Action Plan (*Annex F4*) and the details were provided in Section 2.11.

2.3 WATER QUALITY MONITORING

2.3.1 Monitoring Requirements and Equipment

Impact water quality monitoring was carried out to ensure that any deterioration of water quality was detected, and that timely action was taken to rectify the situation. Impact water quality monitoring was undertaken three days per week since the commencement of marine works during the reporting period in accordance with the Updated EM&A Manual. Each impact water quality monitoring was scheduled such that the interval between two impact water quality monitoring was more than 36 hours to record representative water quality data throughout the week during the marine works.

Two (2) replicate *in-situ* measurements and samples were collected at each monitored water depth of each designated monitoring stations. Dissolved Oxygen (DO), pH value, salinity, temperature and turbidity were measured *in-situ* whereas the level of suspended solids (SS) were determined by ALS Technichem (HK) Pty Ltd which is a HOKLAS accredited laboratory.

The Action and Limit Levels of the water quality monitoring are provided in *Table 2.7*.

Table 2.7 Action and Limit Levels for Water Quality

| Parameters | Action Level | Limit Level |
|--|---|---|
| DO in mg/L (Surface, Middle & Bottom) | <u>Surface and Middle</u> 5.9 mg/L ^[1] | <u>Surface and Middle</u> 4 mg/L ^[1] |
| | <u>Bottom</u> 5.6 mg/L | <u>Bottom</u> 2 mg/L |
| SS in mg/L (Depth-averaged) | 13.5 mg/L or 120% of upstream control station at the same tide of the same day, whichever is higher. [2] | 23.5 mg/L or 130% of upstream control station at the same tide of the same day, whichever is higher. [2] |

| Parameters | Action Level | Limit Level |
|-----------------------------------|--|--|
| Turbidity in NTU (Depth-averaged) | 17.1 NTU or 120% of upstream control station at the same tide of the same day, whichever is higher. [2] | 23.5 NTU or 130% of upstream control station at the same tide of the same day, whichever is higher. [2] |

Notes:

- (1) For DO, non-compliance occurs when monitoring results is lower than the limits.
(2) For SS and Turbidity, non-compliance occurs when monitoring results is larger than the limits

The locations of the monitoring stations under the Project are shown in *Figure 2.3* and *Table 2.8*.

Table 2.8 *Locations of Impact Water Quality Monitoring Stations and the Corresponding Monitoring Requirements*

| Monitoring Station | Description | Coordinates | | Parameters ^(a) | Frequency | Monitoring Dates | Depth |
|--------------------|---|-------------|----------|---|--|--|---|
| | | Easting | Northing | | | | |
| TCE-WQM1 | Near Airport Channel | 811838 | 817341 | • Dissolved Oxygen (DO) (mg/L and % saturation) | Impact monitoring: 3 days per week, at mid-flood and mid-ebb tides during the construction period of the Project | 2, 5, 7, 9, 12, 14, 16, 19, 21, 23, 26, 28 and 30 September 2022 | 3 water depths: 1m below sea surface, mid-depth and 1m above seabed. If the water depth is less than 3m, mid-depth sampling only. If water depth less than 6m, mid-depth may be omitted |
| TCE-WQM2a | Marine Park 1 | 814439 | 819879 | • Temperature (°C) | | | |
| TCE-WQM2b | Marine Park 2 | 814439 | 821905 | • Turbidity (NTU) | | | |
| TCE-WQM3A | Outlet of Tai Ho Wan | 814705 | 817859 | • Salinity (ppt) | | | |
| TCE-WQM4 | HKBCF | 813344 | 818849 | • pH | | | |
| TCE-C1 | Control Station - Outside Airport Channel | 804247 | 815620 | • Water depth (m) | | | |
| TCE-C2 | Control Station - Sunny Bay | 819460 | 821473 | • Suspended Solid (SS) (mg/L) | | | |

Notes:

- (a) In addition to the abovementioned parameters, other relevant data shall also be recorded, including monitoring location / position, time, water depth, tidal stages, weather conditions and any special phenomena or work underway at the construction site.

Table 2.9 summarizes the equipment used in the impact water quality monitoring works. Copies of the calibration certificates are attached in *Annex G1*.

Figure 2.3

Water Quality Monitoring Locations

Table 2.9 Water Quality Monitoring Equipment

| Equipment | Model |
|---|---|
| Water Sampler | Kahlsico Water Samplers |
| Multi-parameter Water Quality System (measurement of DO, Temperature, Turbidity, Salinity and pH) | YSI ProDSS (S/N: 15M100005, 16H104234, 17E100747 and 21G105356) |

2.3.2 Monitoring Schedule for the Reporting Month

The schedule for water quality monitoring during the reporting period was provided in *Annex G2*.

2.3.3 Results and Observations

A total of 13 monitoring events for impact water quality monitoring were conducted at all designated monitoring stations during the reporting period. Impact water quality monitoring results and graphical presentations were provided in *Annex G3*.

Action level exceedances were recorded for water quality impact monitoring in the reporting period and the event and action plan (*Annex G4*) was undertaken. Investigations on the action level exceedances were conducted and summarized in *Table 2.10* below.

Table 2.10 Details of Exceedances Recorded for Water Quality Monitoring

| Date | Tide | Parameter | Station | Type | Justification | |
|------------------|--------|-----------|-----------|---------|---------------|---------|
| 2 September 2022 | ME | DO (S&M) | TCE-WQM1 | Action | (a) (b) | |

Remarks:

- (a) The exceedance was not considered as caused by the construction of the Project due to the monitoring result was similar to the corresponding upstream/control station(s).
- (b) The exceedance was not considered as caused by the construction of the Project due to the corresponding upstream/control station(s) already exceeded the Action Level during the same tide.
- (c) The exceedance was not considered as caused by the construction of the Project due to the station was located further away/upstream from the Project works area.
- (d) The exceedance was not considered as caused by the construction of the Project due to areas of reclamation related marine works undertaken under the Project were surrounded by silt curtain which were inspected daily by the Contractor and inspected periodically by ER. The silt curtain nearby the water quality monitoring stations was observed to be in good condition/well-functioning.
- (e) The exceedance was not considered as caused by the construction of the Project due to no illegal discharge/sediment plume was observed nearby the water quality monitoring station during the sampling in mid-ebb/mid-flood tide.

Based on the investigations conducted for each of the monitoring day with exceedances, the exceedances of DO and SS were not likely caused by the work activities related to the Project.

In addition, low levels of DO were recorded during previous three summer periods. This further suggested that exceedances of DO are likely caused by seasonal fluctuation and a similar trend of lower levels of DO would likely occur again during this summer period.

Nevertheless, the Contractors were reminded to implement all relevant mitigation measures for the marine works, including regular checking of silt curtain integrity, provide periodic maintenance and maintain good site practice. The ET will keep on checking monitoring data, plant, equipment and Contractor's working methods.

2.4

COMPENSATION WOODLAND MONITORING

Compensation woodland planting was substantially completed on 30 September 2022. Monitoring for compensation woodland will be carried out

after the confirmation of the monitoring proposal. Photographic record of the compensation woodland planting is provided in *Annex H*.

2.5 ***PRESERVED/TRANSPLANTED PLANT SPECIES OF CONSERVATION IMPORTANCE MONITORING***

Plant species of conservation importance, including three individuals of *Aquilaria sinensis* and 33 individuals of *Gmelina chinensis*, were identified within works areas for Contract 2. All individuals of *Aquilaria sinensis* and 31 individuals of *Gmelina chinensis* were recommended being preserved *in-situ* while two individuals of *Gmelina chinensis* (RT-07 and RT-08) were recommended being transplanted to the receptor site in accordance with the Detailed Preservation and/or Translocation Plan for Plant Species of Conservation Importance approved under Condition 2.21 of EP-519/2016. Initial tree survey was conducted in September 2021 under Contract No. NL/2020/02 before the commencement of construction works. According to the initial tree survey conducted, the *in-situ* preserved plant species of conservation importance of which one individual of *Aquilaria sinensis* and six individuals of *Gmelina chinensis* were found missing.

2.5.1 ***Preserved Plant Species of Conservation Importance***

Monthly monitoring of the *in-situ* preserved plant species of conservation importance by the Qualified Personnel (QP) appointed under Contract 2 was implemented in the reporting period. Health condition was considered fair for the majority of the *in-situ* preserved plant species of conservation importance, of which two individuals of *Gmelina chinensis* could not be monitored as a result of unsafe access to the locations, as recorded during the monitoring carried out on 26 September 2022.

Tree protection zones for the *in-situ* preserved plant species of conservation importance were demarcated. No injuries and/or damages to the individuals of the *in-situ* preserved plant species of conservation importance were reported by the QP since the previous monitoring events. Photographic record and tree schedule of the preserved plant species of conservation importance monitoring are provided in *Annex I*.

The ET will continue to monitor the implementation of monitoring of *in-situ* preserved plant species of conservation importance.

2.5.2 ***Transplanted Plant Species of Conservation Importance***

Site visit to the receptor site for the transplanted plant species of conservation importance was carried out on 20 January 2022 prior to the commencement of transplantation works for the transplanted plant species of conservation importance on 21 January 2022.

The transplanted plant species of conservation importance were both certified as dead trees by the QP on 15 June 2022 as no living signs were observed.

Replacement planting of new trees of the same species, or other species to the satisfaction of the Project Manager, at the Contractors' expense would be deemed necessary in accordance with the conditions under the approved Detailed Preservation and/or Translocation Plan for Plant Species of Conservation Importance. Replacement planting proposal prepared by the QP was submitted to EPD and under further revision on replacement plant species selection according to the suggestion by EPD and Agriculture, Fisheries and Conservation Department.

2.6 *ECO-SHORELINE MONITORING*

Mangrove eco-shoreline and rocky eco-shoreline are under construction while the construction of vertical eco-shoreline has been substantially completed. Photographic record is provided in *Annex J*.

No eco-shoreline monitoring was scheduled during the reporting period. Monitoring shall be conducted for at least 3 years after the completion of reclamation works, twice in wet season and twice in dry season, in order to determine the effectiveness of the eco-shoreline in accordance with the Updated EM&A Manual.

2.7 *SOFT SHORE ECOLOGICAL MONITORING*

2.7.1 *Monitoring Requirements*

According to the Updated EM&A Manual of the Project, impact soft shore ecological monitoring has to be conducted quarterly at each survey location at Tung Chung Bay (TCB) and Tai Ho Wan (THW) covering wet and dry seasons during the marine construction of the Project. The soft shore ecological monitoring consisted of qualitative walk-through surveys, quantitative transect surveys and sedimentation rate monitoring at the accessible survey locations of TCB and THW.

For qualitative walk-through surveys, the accessible shoreline of TCB and THW at each of the three shore heights: 2 m, 1.5 m and 1 m above Chart Datum was surveyed, and organisms encountered were recorded and their relative abundance noted. In particular, active search of horseshoe crabs and seagrasses were conducted to confirm whether these species are present along the sites.

For quantitative transect survey, one 50 – 100 m horizontal (belt) transect (actual length subject to the site conditions) was surveyed at each of the three shore heights: 2 m, 1.5 m and 1 m above Chart Datum of each survey location. On each transect, five quadrats (50 cm x 50 cm) were placed randomly in each transect to assess the abundance and distribution of flora and fauna. For each quadrat, surface layer to 5 cm depth was sieved and microbenthic organisms (e.g. crustaceans) were recorded and identified. Density of organisms was expressed as individuals / m². Areas with seagrass were also

recorded and identified and other information, such as the percentage cover, were also recorded. Sessile animals such as barnacles and oysters in each quadrat were not counted but estimated as percentage cover on the rock surface. All species of algae (encrusting, foliose and filamentous) were also identified and recorded by estimating the percentage cover on the rock surface. All organisms were identified to the lowest possible taxonomic level (at least Genus level). Species encountered outside the quadrat but in the vicinity of survey transect were also recorded.

For sedimentation rate monitoring, to avoid disturbance to the mudflat and nuisance to navigation, no fixed marker/monitoring rod was installed at the monitoring stations. A high precision Global Navigation Satellite System (GNSS) real time location fixing system was used to locate the station in the precision of 1 mm, which is reasonable under flat mudflat topography with uneven mudflat surface only at micro level.

Measurements were taken directly on the mudflat surface. The Real Time Kinematic GNSS (RTK GNSS) surveying technology was used to measure mudflat surface levels and 3D coordinates of a survey point. The RTK GNSS survey was calibrated against a reference station in the field before and after each survey. The reference station is a survey control point established by the Lands Department of the HKSAR Government using professional surveying instruments such as total station, level and geodetic global navigation satellite system. The coordinates system is in HK1980 GRID system. The reference station was surveyed and established by traditional land surveying methods using professional surveying instruments such as total station, level and geodetic GNSS. The accuracy was down to mm level and higher than the proposed RTK GNSS cm level so that the reference control station has relatively higher accuracy. As the reference control station has higher accuracy, it was set as true evaluation relative to the RTK GNSS measurement. All position and height correction were adjusted and corrected to the reference control station.

The precision of the measured mudflat surface level reading (vertical precision setting) was within 10 mm (standard deviation) after averaging the valid survey records of the XYZ HK1980 GRID coordinates. Each survey record at each station was computed by averaging at least three measurements that are within the above specified precision setting. Both digital data logging and written records were collected in the field. Field data on station fixing and mudflat surface measurement were recorded.

2.7.2 *Monitoring Schedule for the Reporting Month*

The schedule for soft shore ecological monitoring during the reporting period is provided in *Annex K1*.

2.7.3 *Results and Observations*

Impact soft shore ecological monitoring was conducted at three (3) monitoring locations at Tung Chung Bay (TCB), situated in the eastern side (TCB1),

southern side (TCB2) and western side (TCB3) as well as one (1) monitoring location at Tai Ho Wan (THW) as shown in *Figure 2.4* during the reporting period. Representative photographs taken during the impact monitoring are presented in *Figure 2.5*.

For qualitative walk-through surveys, horseshoe crabs and intertidal soft shore communities were recorded during the impact monitoring. The survey results for each monitoring location are summarized in *Table 2.11* below and detailed in *Annex K2*.

Table 2.11 *Summary of Qualitative Walk-through Surveys*

| Location | Date and Time ⁽¹⁾ | Horseshoe Crabs | | Seagrass | | No. of Other Intertidal Species |
|----------|------------------------------|-----------------|--------------------|----------------|---------------------------------|---------------------------------|
| | | No. of Species | No. of Individuals | No. of Species | Area Coverage (m ²) | |
| THW | 6/9/2022 10:00-13:00 | 1 | 36 | - | - | 39 |
| TCB2 | 9/9/2022 12:45-15:45 | 1 | 9 | - | - | 38 |
| TCB3 | 22/9/2022 11:45-14:45 | 1 | 25 | 1 | 108.3 | 40 |
| TCB1 | 23/9/2022 12:30-15:30 | 1 | 8 | - | - | 42 |

Note:

- (1) Quantitative and qualitative transect surveys were conducted on 6 September 2022 at THW, 9 September 2022 at TCB2, 22 September 2022 at TCB3 and 23 September 2022 at TCB1.

For the quantitative transect surveys, a total of 4,932 individuals were recorded from all transects at monitoring stations TCB1, TCB2, TCB3 and THW. The most abundant group of intertidal soft shore communities recorded was gastropods, with a total of 4,774 individuals (relative abundance of 96.8% and density of 318.3 individual m⁻²). The summary of the top three dominant species at each shore height of each monitoring station and the complete list of species and density recorded are presented in *Annex K2*. When compared with the results obtained during the baseline monitoring as presented in the Baseline Monitoring Report ⁽¹⁾, there was no indication of a change in the composition of intertidal communities recorded during the reporting period.

The mudflat surface levels at the four selected monitoring stations in September 2022 and the corresponding XYZ HK1980 GRID coordinates are presented in *Table 2.12*. When compared with the results obtained during the baseline monitoring as presented in the Baseline Monitoring Report ⁽¹⁾, slight changes with <0.05 mPD of sediment levels are recorded for the monitoring stations. The ET will continue to observe the trend of change in sediment levels over time for further comparison and review.

(f) Seagrass *Halophila ovalis* recorded at TCB3 during the Qualitative Walk-through Survey

Figure 2.5 Representative Photographs Taken during the Impact Soft Shore Ecological Monitoring conducted in September 2022

Date: September 2022

Environmental Resources Management

Table 2.12 Results of Sedimentation Rate Monitoring

| Monitoring Station | Northing (m) | Easting (m) | Z level at September 2022 (mPD) | Remarks |
|--------------------|--------------|-------------|---------------------------------|--------------|
| TCB1 | 816068.677 | 811129.284 | 1.277 | Soft mudflat |
| TCB2 | 815812.764 | 810917.380 | 1.099 | Soft mudflat |
| TCB3 | 816027.383 | 810696.230 | 1.054 | Soft mudflat |
| THW | 817472.026 | 815850.362 | 1.056 | Soft mudflat |

Based on the impact monitoring results, there was no evidence showing any significant difference in intertidal communities when compared against the data obtained during baseline monitoring. No action is thus required to be undertaken in accordance with the Event and Action Plan presented in *Annex K3*. The ET will continue to observe the change in density or the distribution pattern of horseshoe crab, seagrass and intertidal soft shore communities taking into account natural fluctuation in respect of the occurrence and distribution pattern.

2.8 EM&A SITE INSPECTION

Site inspections were carried out on a weekly basis with the Contractor and ER to monitor the implementation of proper environmental pollution control and mitigation measures for air quality, noise, water quality, waste management, marine ecology, landscape and visual impacts and preservation and/or transplantation of plant species of conservation importance under the Project. In the reporting period, five (5) site inspections were carried out on 1, 6, 15, 23, 26 September 2022 for Contract 1, four (4) site inspections were carried out on 7, 14, 21 and 28 September 2022 for Contract 2, five (5) site inspections were carried out on 2, 9, 16, 23, 28 September 2022 for Contract 3 and four (4) site inspections were carried out on 6, 13, 20, 27 September 2022 for Contract 7.

Key observations during the site inspections are summarized in *Table 2.13*.

Table 2.13 Key Observations Identified during the Site Inspection in this Reporting Month

| Contract No. | Inspection Date | Environmental Observations | Recommendations/ Remarks |
|--------------|------------------|---|--|
| Contract 1 | 1 September 2022 | <p>Area E</p> <ul style="list-style-type: none"> Appropriate Non-Road Mobile Machinery (NRMM) label was not observed on generator. The Contractors have rectified all of the observations identified during environmental site inspections in the reporting period. The Contractors were reminded to implement all relevant mitigation measures related to construction dust, construction noise, water quality and waste management outlined in the EIA Report and Updated EM&A Manual.

2.9 WASTE MANAGEMENT STATUS

The Contractors of Contract 1, 2, 3 and 7 have registered as chemical waste producer. Sufficient numbers of receptacles were available for general refuse collection and sorting.

All dump trucks engaged on site was equipped with RTTM system during the reporting period. The Surveillance Team of the ET conducted regular site inspection on the dump trucks and their track records. No illegal dumping and landfilling of C&D materials was found during the reporting period.

Wastes generated during this reporting period include mainly non-inert construction wastes. Reference has been made to the waste flow tables prepared by the Contractors. The quantities of different types of wastes and imported fill materials are summarised in *Table 2.14*.

Table 2.14 Quantities of Different Waste Generated and Imported Fill Materials

| Contract No. | Month/ Year | Inert C&D Materials ^(a) (m ³) | Imported Fill ^(b) (sand) (m ³) | Imported Fill ^(c) (public fill) (m ³) | Inert Construction Waste Re-used ^(d) (m ³) | Non-inert Construction Waste ^(e) (m ³) | Recyclable Materials ^(f) (kg) | Chemical Wastes (kg) |
|--------------|----------------|--|---|--|---|---|--|----------------------|
| TCNTE (East) | 1 to 31 Jul 22 | 0.0 | 0.0 | 46,767.0 | 41,967.0 | 177.3 | 6,454.0 | 0.0 |
| | 1 to 31 Aug 22 | 0.0 | 0.0 | 5,577.0 | 43,455.0 | 291.6 | 118,677.0 ^(g) | 0.0 |
| | 1 to 30 Sep 22 | 0.0 | 0.0 | 3,584.0 | 62,276.0 | 247.9 | 0.0 | 4,000.0 |

Notes:

(a) Inert construction wastes include hard rock and large broken concrete, and materials disposed as public fill.

(b) Imported materials include of sand fill from any source outside of TCNTE.

(c) Imported sorted public fill include all G200, G400 and glass gullet (local recycling materials) from any source outside of TCNTE.

(d) Reuse of inert construction waste generated under the TCNTE contracts.

(e) Non-inert construction wastes include general refuse disposed at landfill.

(f) Recyclable materials include metals, paper, cardboard, plastics and others.

(g) 118,677kg of steel was recycled from demolition of the previous site office.

2.10 LANDSCAPE AND VISUAL MONITORING

Implementation of applicable landscape and visual mitigation measures was monitored in accordance with the Updated EM&A Manual. All measures undertaken by the Contractor during the construction phase and establishment work phase shall be audited by ET to ensure compliance with the intended aims of the measures.

The implementation status of the environmental protection measures is summarized below in *Table 2.15*. Examples of landscape and visual mitigation measures are presented in *Annex L1*. The monitoring programme for detailed design, construction and establishment stages is presented in *Table 2.16*. Event and Action Plan for Landscape and Visual impacts is stated in *Annex L2*.

Table 2.15 Implementation Status of Landscape and Visual Mitigation Measures

| Landscape and Visual Mitigation Measures during Construction | Implementation Status | Relevant Contract(s) in the Reporting Period |
|---|---|---|
| MM1- Optimization of Construction Areas & Providing Temporary Landscape on Temporary Construction | The implementation of mitigation measures was checked by ET during weekly site inspection. Implementation of the measures by Contractors was observed. | All works contracts |
| MM3 - Preservation of Potentially Registerable OVTs, Rare and Protective Vegetation | <p>Tree Protection Specifications were provided in the relevant Contract Specifications respectively for implementation by the Contractors under the Project.</p> <p>The Contractors submitted Detailed Preservation and/or Translocation Plan for Plant Species of Conservation Importance under EP condition 2.21.</p> <p>The Contractors' performance on the implementation of the tree maintenance and protection measures were observed and checked by the ET weekly during construction period.</p> | All works contracts |
| MM4 - Transplanting of Existing Trees | <p>Tree Transplanting Specifications were provided in the relevant Contract Specifications respectively for implementation by the Contractors under the Project where trees would unavoidably be affected by the construction works.</p> <p>The Contractors submitted Detailed Preservation and/or Translocation Plan for Plant Species of Conservation Importance under EP condition 2.21.</p> <p>The Contractors' performance on the implementation of trees maintenance and protection measures on transplanted trees were observed and checked by the ET weekly during construction period.</p> | Contract 2 |
| MM5 - Screen Hoarding | The implementation of mitigation measures was checked by ET during weekly site inspection. Implementation of the measures by Contractors was observed. | All works contracts |

| Landscape and Visual Mitigation Measures during Construction | Implementation Status | Relevant Contract(s) in the Reporting Period |
|--|---|---|
| MM6 - Adopting Non-dredge Method for the Reclamation | The implementation of mitigation measures was checked by ET during weekly site inspection. Implementation of the measures by Contractors was observed. | Contract 1 |
| MM9 - Providing Natural Rock Material/ Planting for Artificial Seawall | Rock armour reused and construction of eco-shoreline (mangrove eco-shoreline, rocky eco-shoreline and vertical eco-shoreline) in progress. The implementation of mitigation measures was checked by ET during weekly site inspection. Implementation of the measures by Contractors was observed. | Contract 1 |
| MM18 - Landscaping on Slopes | Not applicable during the reporting period | NA |
| MM20 - Lighting Control | The implementation of mitigation measures was checked by ET during weekly site inspection. Implementation of the measures by Contractors was observed. | All works contracts |

Table 2.16 *Monitoring Programme for Landscape and Visual*

| Stage | Monitoring Task | Monitoring Report | Form of Approval | Frequency |
|---------------------|---|--|------------------------------------|-------------------------------|
| Design | Monitoring of design works against the recommendations of the landscape and visual impact assessments within the EIA should be undertaken by the Engineer and Landscape Architect, to ensure that they fulfil the intentions of the mitigation measures. Any changes to the design, including design changes on site should also be checked | Report by CEDD / ER confirming that the design conforms to requirements of EP. | Approval by Project Proponent | At completion of design stage |
| Construction | Monitoring of the contractor's operations during the construction period. | Report on Contractor's compliance by ET | Counter-signature of report by IEC | Monthly |
| Establishment Works | Monitoring of the planting works during the 24-months Establishment Period after completion of the construction works. | Report on Contractor's compliance by ET | Counter-signature of report by IEC | Bi-monthly |

2.11

IMPLEMENTATION STATUS OF ENVIRONMENTAL MITIGATION MEASURES

A summary of the Environmental Mitigation Implementation Schedule is presented in *Annex B*. The necessary mitigation measures were implemented properly for the Project.

2.12 **SUMMARY OF EXCEEDANCES OF THE ENVIRONMENTAL QUALITY PERFORMANCE LIMIT**

The monitoring results for air quality monitoring (1-hour TSP) complied with the Action/ Limit levels in the reporting period. No Limit Level exceedance was recorded for construction noise monitoring in the reporting period. However, three (3) Action Level were triggered from three (3) environmental complaints related to noise nuisance received in the reporting period.

Action level exceedances were recorded for water quality impact monitoring in the reporting period. The investigations on the action level exceedances were conducted and the results were summarized in Section 2.3.3. Cumulative statistics on exceedances is provided in *Annex M*.

2.13 **SUMMARY OF COMPLAINTS, NOTIFICATION OF SUMMONS AND SUCCESSFUL PROSECUTIONS**

There was no notification of summons or prosecution recorded in the reporting period.

One (1) environmental complaint related to Contract 1 and three (3) environmental complaint related to Contract 3 were received in the reporting period. Investigations were conducted for the environmental complaints in accordance with the complaint handling process as stated in the Complaint Management Plan. Environmental complaints in the reporting period are summarized below.

| Complaint(s) | Investigation/Follow up action(s) |
|---|---|
| 1 Environmental complaint related to Contract 1 regarding noise nuisance from the previous site office was referred by EPD on 1 September 2022. | Based on the information provided by the Contractor with confirmation by RSS, no breaking was conducted during demolition works to minimize noise generation and full-time foreman was stationed on site to supervise the works and ensure all the works were carried out within non-restricted hours. With reference to data from weekly noise monitoring, no project related exceedance was recorded. |
| 2 Environmental complaint related to Contract 3 regarding dust at the junction of Ying Hei Road and Ying Tung Road was referred by CEDD on 15 September 2022. | Based on information provided by the Contractor with confirmation by RSS, insufficient dust mitigation measures were observed at the exposed area. The Contractor immediately provided rectification and deployed impervious sheet and green net to cover up the exposed area for dust suppression. |
| 3 Environmental complaint related to Contract 3 regarding noise nuisance near the Visionary at night was referred by EPD on 28 September 2022. | Based on information provided by the Contractor with confirmation by RSS, no construction work was carried out near the Visionary during restricted hours. Nevertheless, the Contractor provided morning briefing regarding noise control for workers and foreman. |

| Complaint(s) | Investigation/Follow up action(s) |
|---|--|
| 4 Environmental complaint related to Contract 3 regarding noise nuisance near Ying Tung Estate at night was referred by EPD on 28 September 2022. | Based on information provided by the Contractor with confirmation by RSS, only welding work was carried out in Portion 114 at night. Since Portion 114-1 is located far away from Ying Tung Estate, the complaint was unlikely related to the Project. Nevertheless, the Contractor provided morning briefing regarding noise control for workers and foreman. |

Statistics on complaints, notifications of summons, successful prosecutions are summarised in *Annex M*.

3 *FUTURE KEY ISSUES*

3.1 *CONSTRUCTION PROGRAMME FOR THE COMING MONTH*

Works to be undertaken in the next monitoring period of October 2022 are summarized in *Table 3.1* below, together with the key issues and the key mitigation measures:

Table 3.1 Major Activities for the Next Reporting Period

| Activities | Key Issues | Key Mitigation Measures |
|---|--|---|
| Contract No. NL/2017/03 - Tung Chung New Town Extension – Reclamation and Advance Works (Contract 1) | | |
| Land-based Works | | |
| <ul style="list-style-type: none"> • Ground investigation works • Land DCM works • Jet grouting works • Placing of sorted public fill • Box culvert construction | <ul style="list-style-type: none"> • Dust emission • Handling and storage of C&D materials generated from construction activities • Noise from plant operation • Emission of dark smoke from PMEs • Efficiency of wastewater and drainage management | <ul style="list-style-type: none"> • Good site practices • Regular water spraying on stockpiles, unpaved haul road and land filling area • Provide tarpaulin sheets coverage on stockpiles • Sorting and reuse of C&D materials as far as practicable • Use of QPME and noise barrier/acoustic mat • Regular maintenance of PMEs • Implementation of wastewater and drainage management |
| Marine-based Works | | |
| <ul style="list-style-type: none"> • Laying of geotextile for seawall construction • Placing of sorted public fill • Seawall construction (including vertical seawall, slopping seawall & eco-shoreline) | <ul style="list-style-type: none"> • Elevation in impact on Water Quality due to marine filling works • Potential surface runoff • Potential filling material drop from barges • Disturbance to Chinese White Dolphin • Noise from marine vessels and plant operation during normal working hours or restricted hours • Dust emission during storage and transfer of sand/ sorted public fill • Emission of dark smoke from marine vessel | <ul style="list-style-type: none"> • Provision of perimeter silt curtain • Provision of a leading seawall of at least 200m before marine filling works • Regular cleaning of accumulated sand/fill materials at the edge of the barges • Implementation of Dolphin Watching for the marine-based works • Strictly follow requirement under CNP for the use of PMEs and works within restricted period • Use of acoustic mat and other noise mitigation measures when necessary • Regular maintenance of engines and mechanical equipment |

**Contract No. NL/2020/02 - Tung Chung New Town Extension - Salt Water Supply System
(Contract 2)**

Land-based Works

- Initial survey (land survey prior to the commencement of construction works)
 - Pile Head Treatment and Pile Cap Construction at Portion 6
 - Excavation and construction for service reservoir and soil nailing works at Portion 3
 - Watermain laying works at Portion 3 along Yu Tung Road
 - Preparation works for pipe jacking at Portion 3
 - Excavation and watermain laying works at Yi Tung Road at Portion 5
 - Trench excavation, manhole construction and pipe laying for drainage works at Portion 5A
 - Construction works for mud pit, plant setup and drilling works for HDD works at Portion 3
 - Preparation works for fabrication of precast unit for box culvert at Portion 5B
 - Dust emission
 - Handling and storage of C&D materials generated from construction activities
 - Noise from plant operation
 - Emission of dark smoke from PMEs
 - Efficiency of wastewater and drainage management
 - Tree protection
 - Good site practices
 - Regular water spraying on stockpiles, unpaved haul road and land filling area
 - Provide tarpaulin sheets coverage on stockpiles
 - Sorting and reuse of C&D materials as far as practicable
 - Use of QPME and noise barrier/acoustic mat
 - Regular maintenance of PMEs
 - Implementation of wastewater and drainage management
 - Retain and protect all existing trees and vegetation within the study area which are not directly affected by the works
-

Contract No. NL/2020/03 - Tung Chung New Town Extension - Major Infrastructure Works in Tung Chung East (Contract 3)

Land-based Works

- Excavation and ELS works at Portion 104
 - Excavation and ELS works at CUT no.1,2 & 3 and supporting building
 - Construction works for CUT no. 1 structure
 - Construction works and furniture installation of PM office at WA9
 - Construction works of Contractor office at WA6
 - Drainage, Sewerage and watermain works at Road L4, L3 and L5
 - Pipe laying works for twin rising mains/ watermain laying at Man Tung Road
 - Trial pits for pipe jacking works at Ying Tung Road
 - Preparation works for pipe jacking at Yi Tung Road
 - Foundation works for noise barrier at Portion 11
 - Dust emission
 - Handling and storage of C&D materials generated from construction activities
 - Noise from plant operation
 - Emission of dark smoke from PMEs
 - Efficiency of wastewater and drainage management
 - Tree protection
 - Good site practices
 - Regular water spraying on stockpiles, unpaved haul road and land filling area
 - Provide tarpaulin sheets coverage on stockpiles
 - Sorting and reuse of C&D materials as far as practicable
 - Use of QPME and noise barrier/acoustic mat
 - Regular maintenance of PMEs
 - Implementation of wastewater and drainage management
 - Retain and protect all existing trees and vegetation within the study area which are not directly affected by the works
-

Land-based Works

- Open cut excavation and pipe laying for rising main and watermain at Portion 146-5
 - Trench excavation and pipe laying works at Portions 32 (Sham Shui Kok Drive), Portion 34 Phase 1 and Portions 36-38
 - Set up of temporary haul road and working platform at Portion 31 Slip Road A3 (RW-R7) & A4 (RW-FR1)
 - ELS works at RW-R7 and RW-FR1
 - Demolition for Pak Mong Subway Extension Phase 1
 - Pipe pile installation and ELS works at Portion 32 (Access Road adjacent to MTRC Siu Ho Wan Depot)
 - Pre-drilling for Pak Mong Channel Bridge
 - Site clearance and tidiness
 - Dust emission
 - Handling and storage of C&D materials generated from construction activities
 - Noise from plant operation
 - Emission of dark smoke from PMEs
 - Efficiency of wastewater and drainage management
 - Tree protection
 - Good site practices
 - Regular water spraying on stockpiles, unpaved haul road and land filling area
 - Provide tarpaulin sheets coverage on stockpiles
 - Sorting and reuse of C&D materials as far as practicable
 - Use of QPME and noise barrier/acoustic mat
 - Regular maintenance of PMEs
 - Implementation of wastewater and drainage management
 - Retain and protect all existing trees and vegetation within the study area which are not directly affected by the works
-

The ET will keep track on the construction works to confirm compliance of environmental requirements and the proper implementation of all necessary mitigation measures. The ET will also recommend to the Contractors about the environmental toolbox topics on the abovementioned key issues for the next reporting period.

3.2

MONITORING SCHEDULE FOR THE COMING MONTH

The tentative schedules for environmental monitoring in October 2022 are provided in *Annex N*.

4 CONCLUSION AND RECOMMENDATION

This EM&A Report presents the findings of the EM&A activities undertaken for the TCE Project during the period from 1 to 30 September 2022 in accordance with the Updated EM&A Manual and the requirements of the Environmental Permit (EP-519/2016).

Air quality (1-hour TSP), noise, water quality (DO, turbidity and SS), *in-situ* preserved plant species of conservation importance and soft shore ecological monitoring were carried out in the reporting period.

The monitoring results for air quality monitoring (1-hour TSP) complied with the Action/ Limit levels in the reporting period.

No exceedance of Limit Levels was recorded for construction noise monitoring in the reporting period. However, three (3) Action Level were triggered from three (3) environmental complaints related to noise nuisance in the reporting period.

No Project-related Action/ Limit level exceedances were recorded for water quality after investigation.

Mangrove eco-shoreline and rocky eco-shoreline are under construction while the construction of vertical eco-shoreline has been substantially completed.

Based on the monitoring results for soft shore ecological monitoring, there was no evidence showing any significant change in intertidal communities when compared against the data obtained during baseline monitoring. The ET will continue to observe the change in density or the distribution pattern of horseshoe crab, seagrass and intertidal soft shore communities taking into account natural fluctuation in respect of the occurrence and distribution pattern.

Monitoring of the *in-situ* preserved plant species of conservation importance was carried out in the reporting period. Replacement planting proposal prepared by the QP was submitted to EPD and under further revision on replacement plant species selection according to the suggestion by EPD and Agriculture, Fisheries and Conservation Department.

Environmental site inspections were carried out during the reporting period. Recommendations on remedial actions were given to the Contractors for the deficiencies identified during the site inspections.

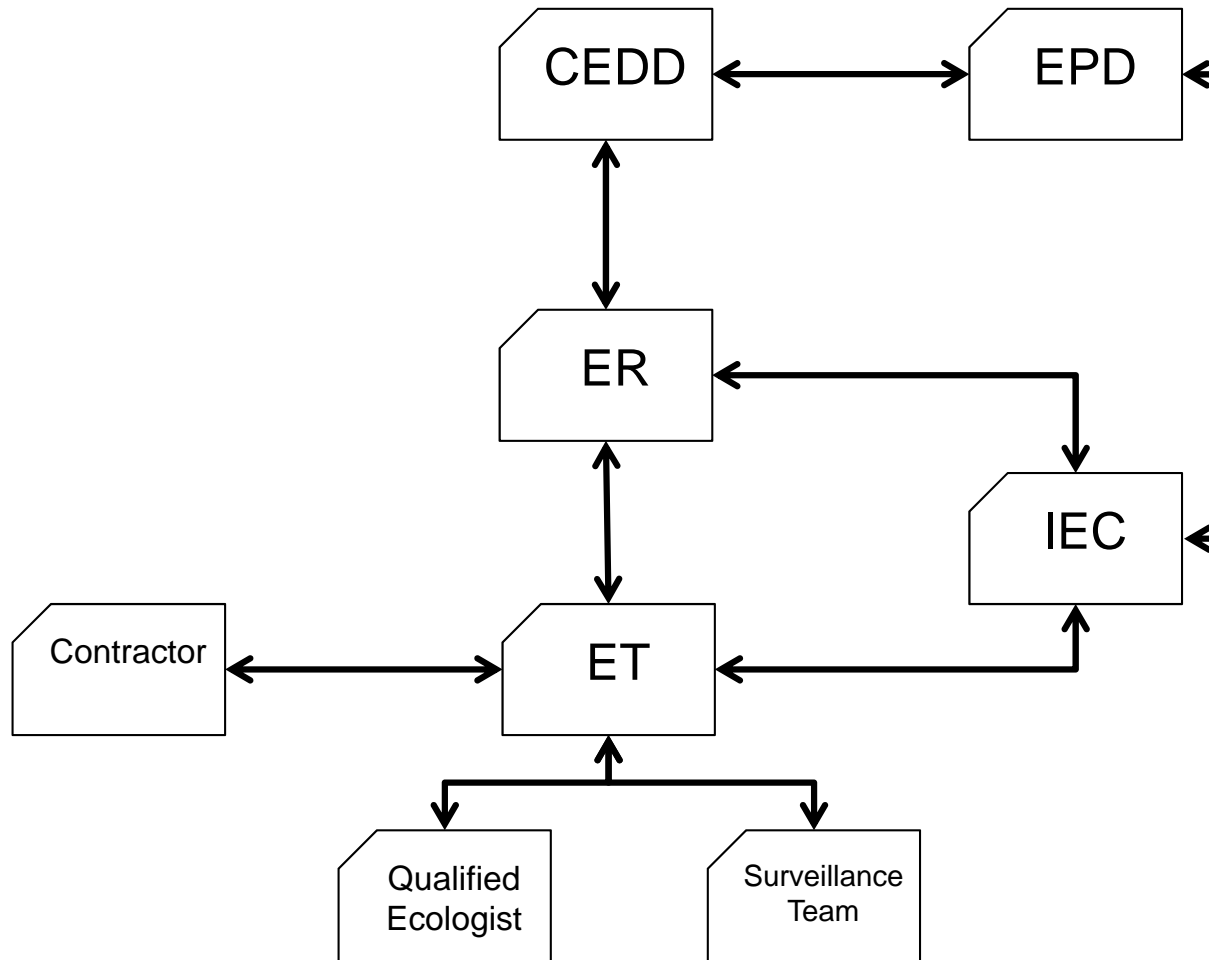

There were no notification of summons or prosecution recorded in the reporting period. One (1) environmental complaint related to Contract 1 and three (3) environmental complaint related to Contract 3 were received in the reporting period. Investigations were conducted for the environmental complaints in accordance with the complaint handling process as stated in the Complaint Management Plan.

The ET will keep track on the construction works to confirm compliance of environmental requirements and the proper implementation of all necessary mitigation measures.

Line of Communication

Annex B

Environmental Mitigation Implementation Schedule

Environmental Mitigation Implementation Schedule – Tung Chung New Town Extension

Note: Chapters 1 to 2 of the EIA report present the background information of the Project, identified concurrent projects, objectives and scope for various environmental aspects, and description on alternative options and construction description. Chapters 3 to 12 of the EIA report present the EIA findings and mitigation measures are described below with cross-reference to the EIA report. Chapters 13 to 15 describe the environmental monitoring requirements, summary of environmental outcomes and conclusion.

| EIA Ref. | EM&A Log Ref | Recommended Mitigation Measures | Objectives of the Recommended Measures & Main Concerns to address | Implementation Agent | Location / Timing | Implementation Stage | Requirements and / or standards to be achieved |
|---|--------------|---|---|----------------------|------------------------|----------------------|---|
| <i>Common Mitigation Measures (Applicable to ALL Project Components, including DPs and Non-DPs)</i> | | | | | | | |
| <i>Construction Dust Impact</i> | | | | | | | |
| S3.4.6 | D1 | Water spraying every hour on exposed worksites and haul road. | Minimize dust impact at the nearby sensitive receivers | Contractor | All construction sites | Construction stage | <ul style="list-style-type: none"> • APCO • To control the dust impact to meet HKAQO and TM-EIAO criteria |
| S3.4.6 | D2 | The contractor shall follow the procedures and requirements given in the Air Pollution Control (Construction Dust) Regulation | Minimize dust impact at the nearby sensitive receivers | Contractor | All construction sites | Construction stage | <ul style="list-style-type: none"> • APCO • To control the dust impact to meet HKAQO and TM-EIAO criteria |
| S3.4.6 | D3 | <p>The following dust suppression measures should be incorporated to control the dust nuisance throughout the construction phase:</p> <ul style="list-style-type: none"> • Any excavated or stockpile of dusty material should be covered entirely by impervious sheeting or sprayed with water to maintain the entire surface wet and then removed or backfilled or reinstated where practicable within 24 hours of the excavation or unloading; • Any dusty materials remaining after a stockpile is removed should be wetted with water and cleared from the surface of roads; | Minimize dust impact at the nearby sensitive receivers | Contractor | All construction sites | Construction stage | <ul style="list-style-type: none"> • APCO • To control the dust impact to meet HKAQO and TM-EIAO criteria |

Environmental Mitigation Implementation Schedule – Tung Chung New Town Extension

| EIA Ref. | EM&A Log Ref | Recommended Mitigation Measures | Objectives of the Recommended Measures & Main Concerns to address | Implementation Agent | Location / Timing | Implementation Stage | Requirements and / or standards to be achieved |
|----------|--------------|--|---|----------------------|-------------------|----------------------|--|
| | | <ul style="list-style-type: none"> • A stockpile of dusty material should not be extended beyond the pedestrian barriers, fencing or traffic cones; • The load of dusty materials on a vehicle leaving a construction site should be covered entirely by impervious sheeting to ensure that the dusty materials do not leak from the vehicle; • Where practicable, vehicle washing facilities with high pressure water jet should be provided at every discernible or designated vehicle exit point. The area where vehicle washing takes place and the road section between the washing facilities and the exit point should be paved with concrete, bituminous materials or hardcores; • When there are open excavation and reinstatement works, hoarding of not less than 2.4m high should be provided as far as practicable along the site boundary with provision for public crossing. Good site practice shall also be adopted by the Contractor to ensure the conditions of the hoardings are properly maintained throughout the construction period; • The portion of any road leading only to construction site that is within 30m of a vehicle entrance or exit should be kept clear of dusty materials; • Surfaces where any pneumatic or power-driven drilling, cutting, polishing or other mechanical breaking operation takes place should be sprayed with water or a dust suppression chemical continuously; • Any area that involves demolition activities should be sprayed with water or a dust suppression chemical immediately prior to, during and immediately after the activities so as to maintain the entire surface wet; • Where a scaffolding is erected around the perimeter of a building under construction, effective dust screens, | | | | | |

Environmental Mitigation Implementation Schedule – Tung Chung New Town Extension

| EIA Ref. | EM&A Log Ref | Recommended Mitigation Measures | Objectives of the Recommended Measures & Main Concerns to address | Implementation Agent | Location / Timing | Implementation Stage | Requirements and / or standards to be achieved |
|----------|--------------|--|---|----------------------|-----------------------------------|----------------------|---|
| | | <p>sheeting or netting should be provided to enclose the scaffolding from the ground floor level of the building, or a canopy should be provided from the first floor level up to the highest level of the scaffolding;</p> <ul style="list-style-type: none"> • Any skip hoist for material transport should be totally enclosed by impervious sheeting; • Every stock of more than 20 bags of cement or dry pulverised fuel ash (PFA) should be covered entirely by impervious sheeting or placed in an area sheltered on the top and the 3 sides; • Cement or dry PFA delivered in bulk should be stored in a closed silo fitted with an audible high level alarm which is interlocked with the material filling line and no overfilling is allowed; • Loading, unloading, transfer, handling or storage of bulk cement or dry PFA should be carried out in a totally enclosed system or facility, and any vent or exhaust should be fitted with an effective fabric filter or equivalent air pollution control system; and • Exposed earth should be properly treated by compaction, turfing, hydroseeding, vegetation planting or sealing with latex, vinyl, bitumen, shortcrete or other suitable surface stabiliser within six months after the last construction activity on the construction site or part of the construction site where the exposed earth lies. | | | | | |
| S3.4.6 | D4 | Implement regular dust monitoring under EM&A programme during the construction stage. | Monitoring of dust impact | Contractor | Selected dust monitoring stations | Construction stage | <ul style="list-style-type: none"> • TM-EIAO |

Environmental Mitigation Implementation Schedule – Tung Chung New Town Extension

| EIA Ref. | EM&A Log Ref | Recommended Mitigation Measures | Objectives of the Recommended Measures & Main Concerns to address | Implementation Agent | Location / Timing | Implementation Stage | Requirements and / or standards to be achieved |
|---------------------------|--------------|--|---|----------------------|--|----------------------|--|
| Construction Noise | | | | | | | |
| S4.3.4 | N1 | Implement the following good site management practices: <ul style="list-style-type: none"> • only well-maintained plant should be operated on-site and plant should be serviced regularly during the construction programme; • machines and plant (such as trucks, cranes) that may be in intermittent use should be shut down between work periods or should be throttled down to a minimum; • plant known to emit noise strongly in one direction, where possible, be orientated so that the noise is directed away from nearby NSRs; • silencers or mufflers on construction equipment should be properly fitted and maintained during the construction works; • mobile plant should be sited as far away from NSRs as possible and practicable; • material stockpiles, site office and other structures should be effectively utilised, where practicable, to screen noise from on-site construction activities. | Control construction airborne noise | Contractor | All construction sites where practicable | Construction stage | • Annex 5, TM-EIAO |
| S4.3.4 | N2 | Use of quiet plant which should be made reference to the Powered Mechanical Equipment (PME) listed in the Technical Memorandum or the Quality Powered Mechanical Equipment (QPME) / other commonly used PME listed in Environmental Protection Department (EPD) web pages as far as possible which includes the Sound Power Level (SWLs) for specific quiet PME. | Reduce the noise levels of plant items | Contractor | All construction sites where practicable | Construction stage | • Annex 5, TM-EIAO |
| S4.3.4 | N3 | Install movable temporary noise barriers (typical design is wooden framed barrier with a small-cantilevered upper portion of superficial density no less than 7kg/m ² on a skid | Screen the noisy plant items to be used at all | Contractor | All construction sites where | Construction stage | • Annex 5, TM-EIAO |

| <i>Water Quality (Construction Phase)</i> | | | | | | | |
| S5.4.3 | W1 | <p><u>General Construction Activities</u></p> <p>In accordance with the Practice Note for Professional Persons on Construction Site Drainage, Environmental Protection Department, 1994 (ProPECC PN1/94), best management practices should be implemented on site as far as practicable. The best practices are detailed below:</p> <ul style="list-style-type: none"> • At the start of site establishment, perimeter cut-off drains to direct off-site water around the site should be constructed with internal drainage works. Channels, earth bunds or sand bag barriers should be provided on site to direct stormwater to silt removal facilities.; • Diversion of natural stormwater should be provided as far as possible. The design of temporary on-site drainage should prevent runoff going through site surface, construction machinery and equipment in order to avoid or minimize polluted runoff. Sedimentation tanks with sufficient capacity, constructed from pre-formed individual cells of approximately 6 to 8 m3 capacities, are recommended as a general mitigation measure which can be used for settling surface runoff prior to disposal. The system capacity shall be flexible and able to handle multiple inputs from a variety of sources and suited to applications where the influent is pumped; • The dikes or embankments for flood protection should be implemented around the boundaries of earthwork areas. Temporary ditches should be provided to facilitate the runoff discharge into an appropriate watercourse, through a silt/sediment trap. The silt/sediment traps should be incorporated in the permanent drainage channels to enhance deposition rates; • The design of efficient silt removal facilities should be | To minimize water quality impact from construction site runoff and general construction activities | Contractor | All construction sites where applicable | Construction stage | <ul style="list-style-type: none"> • Water Pollution Control Ordinance • ProPECC PN1/94 • TM-EIAO • TM-DSS |

| | | <p>based on the guidelines in Appendix A1 of ProPECC PN 1/94. The detailed design of the sand/silt traps should be undertaken by the contractor prior to the commencement of construction;</p> <ul style="list-style-type: none"> • Construction works should be programmed to minimize surface excavation works during the rainy seasons (April to September). All exposed earth areas should be completed and vegetated as soon as possible after earthworks have been completed. If excavation of soil cannot be avoided during the rainy season, or at any time of year when rainstorms are likely, exposed slope surfaces should be covered by tarpaulin or other means; • All drainage facilities and erosion and sediment control structures should be regularly inspected and maintained to ensure proper and efficient operation at all times and particularly following rainstorms. Deposited silt and grit should be removed regularly and disposed of by spreading evenly over stable, vegetated areas; • If the excavation of trenches in wet periods is necessary, it should be dug and backfilled in short sections wherever practicable. Water pumped out from trenches or foundation excavations should be discharged into storm drains via silt removal facilities; • All open stockpiles of construction materials (for example, aggregates, sand and fill material) should be covered with tarpaulin or similar fabric during rainstorms. Measures should be taken to prevent the washing away of construction materials, soil, silt or debris into any drainage system; • Manholes (including newly constructed ones) should always be adequately covered and temporarily sealed so as to prevent silt, construction materials or debris being washed into the drainage system and storm runoff being | | | | | |

| | | <p>directed into foul sewers;</p> <ul style="list-style-type: none"> • Precautions to be taken at any time of year when rainstorms are likely, actions to be taken when a rainstorm is imminent or forecasted, and actions to be taken during or after rainstorms are summarized in Appendix A2 of ProPECC PN 1/94. Particular attention should be paid to the control of silty surface runoff during storm events; • All vehicles and plant should be cleaned before leaving a construction site to ensure no earth, mud, debris and the like is deposited by them on roads. An adequately designed and sited wheel washing facilities should be provided at every construction site exit where practicable. Wash-water should have sand and silt settled out and removed at least on a weekly basis to ensure the continued efficiency of the process. The section of access road leading to, and exiting from, the wheel-wash bay to the public road should be paved with sufficient backfall toward the wheel-wash bay to prevent vehicle tracking of soil and silty water to public roads and drains; • Oil interceptors should be provided in the drainage system downstream of any oil/fuel pollution sources. The oil interceptors should be emptied and cleaned regularly to prevent the release of oil and grease into the storm water drainage system after accidental spillage. A bypass should be provided for the oil interceptors to prevent flushing during heavy rain; • Construction solid waste, debris and rubbish on site should be collected, handled and disposed of properly to avoid water quality impacts; • All fuel tanks and storage areas should be provided with locks and sited on sealed areas, within bunds of a capacity equal to 110% of the storage capacity of the largest tank to prevent spilled fuel oils from reaching water sensitive | | | | | |

|-----------------|-------------------------|---|---|---------------------------------|---|--|---|
| S11.7 MM14 | LV14 | Aesthetic Design of Built Development – The planning of the revised RODP has considered reducing potential visual impacts, enhancing visual amenity and keeping visual corridors. The proposed development will ensure the building massing is compatible with its surroundings. To improve visual amenity, natural building materials could be used on building facades. For example, stone and timber should be considered for architectural features; light earthy tone colours such as shades of green, shades of grey, shades of brown and off-white should be considered for the façade treatment to reduce the visibility of the development components. The form, textures, finishes and colours of the proposed development components should aim to be compatible with the existing surroundings. It would only be implemented for public developments/projects. | Improve visual amenity of the new buildings, keep visual corridors and integrate as possible into the surrounding landscape | Relevant Government Departments | Through-out the TCW and TCE areas | Prior to Construction, Maintenance in Operation Phase | <ul style="list-style-type: none"> • Hong Kong Planning Standards and Guidelines (HKPSG) issued by the Planning Department (As at Aug 2011); • PNAP APP-152, Sustainable Building Design Guidelines |
| S11.7 MM15 | LV15 | Maximise Greening on Structures – The Government has been actively promoting greening in buildings and structures such as bridges to improve the environment. This includes actively implementing rooftop greening or vertical greening, as where practicable to enhance the cityscape and mitigate the heat island effect in urban areas. For the new built forms in TCW and TCE, it is considered the implementation of the following greening measures could alleviate the landscape and visual impacts of new development and help the development blend in with its surrounding landscape: <ul style="list-style-type: none"> • Sky Garden: Refuge floors or voids in building mass formed by partial removal of floor plates on certain building storeys or provision of freed up areas on certain building storeys provide opportunities for sky gardens for the proposed built development. It can allow views through the development to the background formed by the natural hillsides and | <p>Maximise Greening coverage</p> <p>Enhance visual amenity, create visual corridors and integrate as possible into the surrounding landscape</p> | Relevant Government Departments | On appropriate buildings and structures | Prior to Construction, Construction Phase & Maintenance in Operation Phase | <ul style="list-style-type: none"> • Development Bureau Technical Circular (Works) No. 3/2012 Site Coverage of Greenery for Government Building Projects • PNAP APP-152, Sustainable Building Design Guidelines |

ANALYTICAL CHEMISTRY & TESTING SERVICES

SUB-CONTRACTING REPORT

| | | | |
|---------|---|----------------|--------------------|
| CONTACT | : MR K.W. FAN | WORK ORDER | : HK2144588 |
| CLIENT | : ENVIROTECH SERVICES CO. | | |
| ADDRESS | : RM113, 1/F, MY LOFT, 9 HOI WING ROAD, TUEN MUN, N.T. HONG KONG | SUB-BATCH | : 1 |
| | | DATE RECEIVED | : 2-NOV-2021 |
| | | DATE OF ISSUE | : 11-NOV-2021 |
| PROJECT | : ---- | NO. OF SAMPLES | : 1 |
| | | CLIENT ORDER | : ---- |

General Comments

- Sample(s) was/ were submitted by client. Sample(s) arrived laboratory in ambient condition. The result(s) related only to the item(s) tested.
- Sample information (Project name, Sample ID, Sampling date/time, etc.) is provided by client.
- Calibration was subcontracted to and analysed by Action-United Environmental Services & Consulting.

Equipment Verification Report (TSP)

Equipment Calibrated:

Type: Laser Dust monitor
Manufacturer: Sibata LD-3B
Serial No. 276019
Equipment Ref: Nil
Job Order HK2144588

Standard Equipment:

Standard Equipment: Higher Volume Sampler (TSP)
Location & Location ID: AUES office (calibration room)
Equipment Ref: HVS 018
Last Calibration Date: 5 November 2021

Equipment Verification Results:

Verification Date: 5 November 2021

| Hour | Time | Mean Temp °C | Mean Pressure (hPa) | Concentration in $\mu\text{g}/\text{m}^3$ (Standard Equipment) | Total Count (Calibrated Equipment) | Count/Minute (Total Count/min) |
|----------|---------------|--------------|---------------------|--|------------------------------------|--------------------------------|
| 2hr01min | 09:11 ~ 11:12 | 25.6 | 1012.5 | 51.2 | 4508 | 37.2 |
| 2hr01min | 11:15 ~ 13:16 | 25.6 | 1012.5 | 47.8 | 3690 | 30.4 |
| 2hr02min | 13:20 ~ 15:22 | 25.6 | 1012.5 | 50.4 | 3979 | 32.7 |

Linear Regression of Y or X

Slope (K-factor): 1.4601 ($\mu\text{g}/\text{m}^3$)/CPM
Correlation Coefficient (R) 0.9930
Date of Issue 8 November 2021

Remarks:

- Strong** Correlation ($R > 0.8$)
- Factor 1.4601 ($\mu\text{g}/\text{m}^3$)/CPM should be applied for TSP monitoring

*If $R < 0.5$, repair or re-verification is required for the equipment

TSP SAMPLER CALIBRATION CALCULATION SPREADSHEET

| | | |
|---------------|---|---------------------------------|
| Location : | Gold King Industrial Building, Kwai Chung | Date of Calibration: 5-Nov-21 |
| Location ID : | Calibration Room | Next Calibration Date: 5-Feb-22 |

CONDITIONS

| | | | |
|--------------------------|--------|----------------------------|---------|
| Sea Level Pressure (hPa) | 1012.5 | Corrected Pressure (mm Hg) | 759.375 |
| Temperature (°C) | 25.6 | Temperature (K) | 299 |

CALIBRATION ORIFICE

| | | | |
|--------------------|-----------|-------------------|-----------|
| Make-> | TISCH | Qstd Slope -> | 2.10574 |
| Model-> | 5025A | Qstd Intercept -> | -0.00985 |
| Calibration Date-> | 19-Jan-21 | Expiry Date-> | 18-Jan-22 |

CALIBRATION

| Plate No. | H2O (L) (in) | H2O (R) (in) | H2O (in) | Qstd (m3/min) | I (chart) | IC corrected | LINEAR REGRESSION |
|-----------|--------------|--------------|----------|---------------|-----------|--------------|---|
| 18 | 6.2 | 6.2 | 12.4 | 1.675 | 52 | 51.93 | Slope = 24.2092 Intercept = 10.8881 Corr. coeff. = 0.9959 |
| 13 | 5 | 5 | 10.0 | 1.504 | 48 | 47.93 | |
| 10 | 3.9 | 3.9 | 7.8 | 1.329 | 42 | 41.94 | |
| 8 | 2.5 | 2.5 | 5.0 | 1.065 | 36 | 35.95 | |
| 5 | 1.0 | 1.0 | 2.0 | 0.675 | 28 | 27.96 | |

Calculations :

$$Qstd = 1/m[\text{Sqrt}(H20(Pa/Pstd)(Tstd/Ta))-b]$$

$$IC = I[\text{Sqrt}(Pa/Pstd)(Tstd/Ta)]$$

Qstd = standard flow rate

IC = corrected chart responses

I = actual chart response

m = calibrator Qstd slope

b = calibrator Qstd intercept

Ta = actual temperature during calibration (deg K)

Pstd = actual pressure during calibration (mm Hg)

For subsequent calculation of sampler flow:

$$1/m((I)[\text{Sqrt}(298/Tav)(Pav/760)]-b)$$

m = sampler slope

b = sampler intercept

I = chart response

Tav = daily average temperature

Pav = daily average pressure

Calibration Certificates for Noise

Certificate of Calibration

校正證書

Certificate No. : C220969
證書編號

ITEM TESTED / 送檢項目 (Job No. / 序引編號 : IC22-0235) Date of Receipt / 收件日期 : 9 February 2022

Description / 儀器名稱 : Precision Acoustic Calibrator
Manufacturer / 製造商 : LARSON DAVIS
Model No. / 型號 : CAL200
Serial No. / 編號 : 11334
Supplied By / 委託者 : Envirotech Services Co.
Room 113, 1/F, My Loft, 9 Hoi Wing Road, Tuen Mun,
New Territories, Hong Kong

TEST CONDITIONS / 測試條件

Temperature / 溫度 : $(23 \pm 2)^{\circ}\text{C}$ Relative Humidity / 相對濕度 : $(50 \pm 25)\%$
Line Voltage / 電壓 : ---

TEST SPECIFICATIONS / 測試規範

Calibration check

DATE OF TEST / 測試日期 : 19 February 2022

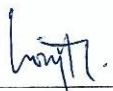

TEST RESULTS / 測試結果

The results apply to the particular unit-under-test only.
The results do not exceed manufacturer's specification & user's specified acceptance criteria.
The results are detailed in the subsequent page(s).

The test equipment used for calibration are traceable to National Standards via :

- The Government of The Hong Kong Special Administrative Region Standard & Calibration Laboratory
- Agilent Technologies / Keysight Technologies
- Fluke Everett Service Center, USA

簽發日期

The test equipment used for calibration is traceable to the National Standards as specified in this certificate. This certificate shall not be reproduced except in full, without the prior written approval of this laboratory.
本證書所載校正用之測試器材均可溯源至國際標準。局部複印本證書需先獲本實驗室所書面批准。

Certificate of Calibration

校正證書

Certificate No. : C220969

證書編號

- The unit-under-test (UUT) was allowed to stabilize in the laboratory for over 12 hours before the commencement of the test.
- The results presented are the mean of 3 measurements at each calibration point.
- Test equipment :

| <u>Equipment ID</u> | <u>Description</u> | <u>Certificate No.</u> |
|---------------------|-----------------------------------|------------------------|
| CL130 | Universal Counter | C213954 |
| CL281 | Multifunction Acoustic Calibrator | AV210017 |
| TST150A | Measuring Amplifier | C201309 |

- Test procedure : MA100N.

- Results :

5.1 Sound Level Accuracy

| UUT Nominal Value | Measured Value (dB) | User's Spec. (dB) | Uncertainty of Measured Value (dB) |
|----------------------|------------------------|----------------------|---------------------------------------|
| 94 dB, 1 kHz | 93.6 | ± 0.5 | ± 0.2 |
| 114 dB, 1 kHz | 113.7 | | |

5.2 Frequency Accuracy

| UUT Nominal Value (kHz) | Measured Value (kHz) | Mfr's Spec. | Uncertainty of Measured Value (Hz) |
|----------------------------|-------------------------|----------------|---------------------------------------|
| 1 | 1.000 | 1 kHz ± 1 % | ± 1 |

Remarks : - The user's specified acceptance criteria (user's spec.) is a customer pre-defined operating tolerance of the UUT, suitable for one's own intended use.

- The uncertainties are for a confidence probability of not less than 95 %.

Note :

Only the original copy or the laboratory's certified true copy is valid.

The values given in this Certificate only relate to the values measured at the time of the test and any uncertainties quoted will not include allowance for the equipment long term drift, variations with environment changes, vibration and shock during transportation, overloading, mis-handling, or the capability of any other laboratory to repeat the measurement. Sun Creation Engineering Limited shall not be liable for any loss or damage resulting from the use of the equipment.

The test equipment used for calibration is traceable to the National Standards as specified in this certificate. This certificate shall not be reproduced except in full, without the prior written approval of this laboratory.

6. Results :

6.1 Sound Pressure Level

6.1.1 Reference Sound Pressure Level

| UUT Setting | | | | Applied Value | | UUT Reading (dB) | IEC 61672 Class 1 Spec. (dB) |
|-------------|----------------|---------------------|----------------|---------------|-------------|------------------|------------------------------|
| Range (dB) | Function | Frequency Weighting | Time Weighting | Level (dB) | Freq. (kHz) | | |
| 30 - 130 | L _A | A | Fast | 94.00 | 1 | 93.3 | ± 1.1 |

6.1.2 Linearity

| UUT Setting | | | | Applied Value | | UUT Reading (dB) |
|-------------|----------------|---------------------|----------------|---------------|-------------|------------------|
| Range (dB) | Function | Frequency Weighting | Time Weighting | Level (dB) | Freq. (kHz) | |
| 30 - 130 | L _A | A | Fast | 94.00 | 1 | 93.3 (Ref.) |
| | | | | 104.00 | | 103.3 |
| | | | | 114.00 | | 113.3 |

IEC 61672 Class 1 Spec. : ± 0.6 dB per 10 dB step and ± 1.1 dB for overall different.

6.2 Time Weighting

| UUT Setting | | | | Applied Value | | UUT Reading (dB) | IEC 61672 Class 1 Spec. (dB) |
|-------------|----------------|---------------------|----------------|---------------|-------------|------------------|------------------------------|
| Range (dB) | Function | Frequency Weighting | Time Weighting | Level (dB) | Freq. (kHz) | | |
| 30 - 130 | L _A | A | Fast | 94.00 | 1 | 93.3 | Ref. |
| | | | Slow | | | 93.3 | ± 0.3 |

The test equipment used for calibration is traceable to the National Standards as specified in this certificate. This certificate shall not be reproduced except in full, without the prior written approval of this laboratory.

本證書所載校正用之測試器材均可溯源至國際標準。局部複印本證書需先獲本實驗室書面批准。

6.3 Frequency Weighting

6.3.1 A-Weighting

| UUT Setting | | | | Applied Value | | UUT Reading (dB) | IEC 61672 Class 1 Spec. (dB) |
|-------------|----------------|---------------------|----------------|---------------|--------|------------------|------------------------------|
| Range (dB) | Function | Frequency Weighting | Time Weighting | Level (dB) | Freq. | | |
| 30 - 130 | L _A | A | Fast | 94.00 | 63 Hz | 67.1 | -26.2 ± 1.5 |
| | | | | | 125 Hz | 77.1 | -16.1 ± 1.5 |
| | | | | | 250 Hz | 84.6 | -8.6 ± 1.4 |
| | | | | | 500 Hz | 90.1 | -3.2 ± 1.4 |
| | | | | | 1 kHz | 93.3 | Ref. |
| | | | | | 2 kHz | 94.5 | +1.2 ± 1.6 |
| | | | | | 4 kHz | 94.3 | +1.0 ± 1.6 |
| | | | | | 8 kHz | 92.3 | -1.1 (+2.1 ; -3.1) |
| | | | | | 16 kHz | 85.4 | -6.6 (+3.5 ; -17.0) |

6.3.2 C-Weighting

| UUT Setting | | | | Applied Value | | UUT Reading (dB) | IEC 61672 Class 1 Spec. (dB) |
|-------------|----------------|---------------------|----------------|---------------|--------|------------------|------------------------------|
| Range (dB) | Function | Frequency Weighting | Time Weighting | Level (dB) | Freq. | | |
| 30 - 130 | L _C | C | Fast | 94.00 | 63 Hz | 92.5 | -0.8 ± 1.5 |
| | | | | | 125 Hz | 93.1 | -0.2 ± 1.5 |
| | | | | | 250 Hz | 93.3 | 0.0 ± 1.4 |
| | | | | | 500 Hz | 93.3 | 0.0 ± 1.4 |
| | | | | | 1 kHz | 93.3 | Ref. |
| | | | | | 2 kHz | 93.1 | -0.2 ± 1.6 |
| | | | | | 4 kHz | 92.5 | -0.8 ± 1.6 |
| | | | | | 8 kHz | 90.4 | -3.0 (+2.1 ; -3.1) |
| | | | | | 16 kHz | 83.4 | -8.5 (+3.5 ; -17.0) |

The test equipment used for calibration is traceable to the National Standards as specified in this certificate. This certificate shall not be reproduced except in full, without the prior written approval of this laboratory.

Certificate of Calibration

校正證書

Certificate No. : C222710
證書編號

- Remarks : - UUT Microphone Model No. : UC-59 & S/N : 06492
- Mfr's Spec. : IEC 61672 Class 1
- Uncertainties of Applied Value :
- | | | |
|--------|------------------|--------------------------|
| 94 dB | : 63 Hz - 125 Hz | : ± 0.35 dB |
| | 250 Hz - 500 Hz | : ± 0.30 dB |
| | 1 kHz | : ± 0.20 dB |
| | 2 kHz - 4 kHz | : ± 0.35 dB |
| | 8 kHz | : ± 0.45 dB |
| | 16 kHz | : ± 0.70 dB |
| 104 dB | : 1 kHz | : ± 0.10 dB (Ref. 94 dB) |
| 114 dB | : 1 kHz | : ± 0.10 dB (Ref. 94 dB) |
- The uncertainties are for a confidence probability of not less than 95 %.

Note :
Only the original copy or the laboratory's certified true copy is valid.

The values given in this Certificate only relate to the values measured at the time of the test and any uncertainties quoted will not include allowance for the equipment long term drift, variations with environment changes, vibration and shock during transportation, overloading, mis-handling, or the capability of any other laboratory to repeat the measurement. Sun Creation Engineering Limited shall not be liable for any loss or damage resulting from the use of the equipment.

The test equipment used for calibration is traceable to the National Standards as specified in this certificate. This certificate shall not be reproduced except in full, without the prior written approval of this laboratory.

本證書所載校正用之測試器材均可溯源至國際標準。局部複印本證書需先獲本實驗所書面批准。

Annex F4

Event and Action Plan for Noise

Annex F4 *Event and Action Plan for Construction Noise*

| Event | Action | | | |
|-------------------------|--|---|--|---|
| | ET | IEC | ER | Contractor |
| Action Level Exceedance | <ol style="list-style-type: none"> 1. Notify IEC, ER and Contractor; 2. Carry out investigation; 3. Report the results of investigation to the IEC, ER and Contractor; 4. Discuss with the Contractor and formulate remedial measures; 5. Increase monitoring frequency to check mitigation effectiveness. | <ol style="list-style-type: none"> 1. Review the analysed results submitted by the ET; 2. Review the proposed remedial measures by the Contractor and advise the ER accordingly; 3. Supervise the implementation of remedial measures. | <ol style="list-style-type: none"> 1. Confirm receipt of notification of failure in writing; 2. Notify Contractor; 3. Require Contractor to propose remedial measures for the analysed noise problem; 4. Ensure remedial measures are properly implemented | <ol style="list-style-type: none"> 1. Submit noise mitigation proposals to IEC and ER; 2. Implement noise mitigation proposals. |
| Limit Level Exceedance | <ol style="list-style-type: none"> 1. Identify source; 2. Inform IEC, ER, EPD and Contractor; 3. Repeat measurements to confirm findings; 4. Increase monitoring frequency; 5. Carry out analysis of Contractor's working procedures to determine possible mitigation to be implemented; 6. Inform IEC, ER and EPD the causes and actions taken for the exceedances; 7. Assess effectiveness of Contractor's remedial actions and keep IEC, EPD and ER informed of the results; 8. If exceedance stops, cease additional monitoring. | <ol style="list-style-type: none"> 1. Discuss amongst ER, ET, and Contractor on the potential remedial actions; 2. Review Contractors remedial actions whenever necessary to assure their effectiveness and advise the ER accordingly; 3. Supervise the implementation of remedial measures. | <ol style="list-style-type: none"> 1. Confirm receipt of notification of failure in writing; 2. Notify Contractor; 3. Require Contractor to propose remedial measures for the analysed noise problem; 4. Ensure remedial measures properly implemented; 5. If exceedance continues, consider what portion of the work is responsible and instruct the Contractor to stop that portion of work until the exceedance is abated. | <ol style="list-style-type: none"> 1. Take immediate action to avoid further exceedance; 2. Submit proposals for remedial actions to IEC within 3 working days of notification; 3. Implement the agreed proposals; 4. Resubmit proposals if problem still not under control; 5. Stop the relevant portion of works as determined by the ER until the exceedance is abated. |

Water Quality

Annex G1

Calibration Certificates for Water Quality

REPORT OF EQUIPMENT PERFORMANCE CHECK/ CALIBRATION

Test Report No. : R-BB070113
Date of Issue : 28 July 2022
Page No. : 1 of 2

PART A - CUSTOMER INFORMATION

Enovative Environmental Service Ltd.
 Flat 2207, Yu Fun House Yu Chui Court, Shatin
 New Territories (HK) Hong Kong

PART B - SAMPLE INFORMATION

Name of Equipment : YSI ProDSS (Multi-Parameters)
 Manufacturer : YSI (a xylem brand)
 Serial Number : 15M10005
 Date of Received : 28 July 2022
 Date of Calibration : 28 July 2022
 Date of Next Calibration : 27 October 2022
 Request No. : D-BB070113

PART C - REFERENCE METHODS/ DOCUMENTS FOR THE CALIBRATION

| Test Parameter | Reference Method |
|------------------|---|
| pH value | APHA 21e 4500 H+ |
| Temperature | Section 6 of international Accreditation New Zealand Technical Guide no. 3 Second edition March 2008: Working Thermometer Calibration Procedure |
| Salinity | APHA 21e 2520B |
| Dissolved oxygen | APHA 21e 4500 O |
| Turbidity | APHA 21e 2130B |
| Conductivity | APHA 21e 2510B |

PART D - CALIBRATION RESULT

(1) pH value

| Target (pH unit) | Display Reading (pH unit) | Tolerance | Result |
|------------------|---------------------------|-----------|--------------|
| 4.00 | 4.08 | 0.08 | Satisfactory |
| 7.42 | 7.53 | 0.11 | Satisfactory |
| 10.01 | 10.14 | 0.13 | Satisfactory |

Tolerance of pH value should be less than ± 0.2 (pH unit)

(2) Temperature

| Reading of Ref. thermometer (°C) | Display Reading (°C) | Tolerance | Result |
|----------------------------------|----------------------|-----------|--------------|
| 15.0 | 14.9 | -0.1 | Satisfactory |
| 25.0 | 25.1 | 0.1 | Satisfactory |
| 40.0 | 40.0 | 0.0 | Satisfactory |

Tolerance of Temperature should be less than ± 2.0 (°C)

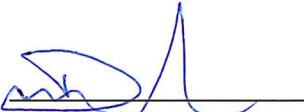

(3) Salinity

| Expected Reading (g/L) | Display Reading (g/L) | Tolerance (%) | Result |
|------------------------|-----------------------|---------------|--------------|
| 10 | 9.90 | -1.00 | Satisfactory |
| 20 | 20.49 | 2.45 | Satisfactory |
| 30 | 30.77 | 2.57 | Satisfactory |

Tolerance of Salinity should be less than ± 10.0 (%)

REPORT OF EQUIPMENT PERFORMANCE CHECK/ CALIBRATION

Test Report No. : R-BB070113
Date of Issue : 28 July 2022
Page No. : 2 of 2

(4) Dissolved oxygen

| Expected Reading (mg/L) | Display Reading (mg/L) | Tolerance | Result |
|---------------------------|--------------------------|-----------|--------------|
| 7.36 | 7.56 | 0.20 | Satisfactory |
| 5.52 | 5.70 | 0.18 | Satisfactory |
| 2.82 | 3.00 | 0.18 | Satisfactory |
| 0.11 | 0.30 | 0.19 | Satisfactory |

Tolerance of Dissolved oxygen should be less than ± 0.5 (mg/L)

(5) Turbidity

| Expected Reading (NTU) | Display Reading (NTU) | Tolerance (%) | Result |
|--------------------------|-------------------------|-----------------|--------------|
| 0 | 0.05 | -- | Satisfactory |
| 10 | 9.82 | -1.80 | Satisfactory |
| 20 | 19.17 | -4.10 | Satisfactory |
| 100 | 97.92 | -2.10 | Satisfactory |
| 800 | 812.44 | 1.60 | Satisfactory |

Tolerance of Turbidity should be less than ± 10.0 (%)

(6) Conductivity

| Expected Reading ($\mu\text{S/cm}$ at 25°C) | Display Reading ($\mu\text{S/cm}$ at 25°C) | Tolerance (%) | Result |
|---|--|-----------------|--------------|
| 146.9 | 150.6 | 2.52 | Satisfactory |
| 1412 | 1291 | -8.57 | Satisfactory |
| 12890 | 12806 | -0.65 | Satisfactory |
| 58670 | 59168 | 0.85 | Satisfactory |
| 111900 | 114106 | 1.97 | Satisfactory |

Tolerance of Conductivity should be less than ± 10.0 (%)

Remark(s)

- The "Date of Next Calibration" is recommended according to best practice principals as practiced by QPT or quoted from relevant international standards.
- The results relate only to the calibrated equipment as received
- The performance of the equipment stated in this report is checked with independent reference material and results compared against a calibrated secondary source.
- "Displayed Reading" denotes the figure shown on item under calibration/ checking regardless of equipment precision or significant figures.
- The "Tolerance Limit" mentioned is the acceptance criteria applicable for similar equipment used by Quality Pro Test-Consult Ltd. or quoted from relevant international standards.

REPORT OF EQUIPMENT PERFORMANCE CHECK/ CALIBRATION

Test Report No. : R-BB090081

Date of Issue : 19 September 2022

Page No. : 2 of 2

(4) Dissolved oxygen

| Expected Reading (mg/L) | Display Reading (mg/L) | Tolerance | Result |
|---------------------------|--------------------------|-----------|--------------|
| 7.38 | 7.60 | 0.22 | Satisfactory |
| 4.70 | 4.85 | 0.15 | Satisfactory |
| 1.48 | 1.80 | 0.32 | Satisfactory |
| 0.45 | 0.40 | -0.05 | Satisfactory |

Tolerance of Dissolved oxygen should be less than ± 0.5 (mg/L)

(5) Turbidity

| Expected Reading (NTU) | Display Reading (NTU) | Tolerance (%) | Result |
|--------------------------|-------------------------|-----------------|--------------|
| 0 | 0.10 | -- | Satisfactory |
| 10 | 9.84 | -1.60 | Satisfactory |
| 20 | 19.82 | -0.90 | Satisfactory |
| 100 | 97.79 | -2.20 | Satisfactory |
| 800 | 819.11 | 2.40 | Satisfactory |

Tolerance of Turbidity should be less than ± 10.0 (%)

(6) Conductivity

| Expected Reading ($\mu\text{S/cm at } 25^\circ\text{C}$) | Display Reading | Tolerance (%) | Result |
|--|-----------------|-----------------|--------------|
| 146.9 | 137.9 | -6.13 | Satisfactory |
| 1412 | 1380.2 | -2.25 | Satisfactory |
| 12890 | 12637.4 | -1.96 | Satisfactory |
| 58670 | 57116 | -2.65 | Satisfactory |
| 111900 | 112537 | 0.57 | Satisfactory |

Tolerance of Conductivity should be less than ± 10.0 (%)

Remark(s)

- The "Date of Next Calibration" is recommended according to best practice principals as practiced by QPT or quoted form relevant international standards.
- The results relate only to the calibrated equipment as received
- The performance of the equipment stated in this report is checked with independent reference material and results compared against a calibrated secondary source.
- "Displayed Reading" denotes the figure shown on item under calibration/ checking regardless of equipment precision or significant figures.
- The "Tolerance Limit" mentioned is the acceptance criteria applicable for similar equipment used by Quality Pro Test-Consult Ltd. or quoted form relevant international standards.

REPORT OF EQUIPMENT PERFORMANCE CHECK/ CALIBRATION

Test Report No. : R-BB060020
Date of Issue : 13 June 2022
Page No. : 1 of 2

PART A - CUSTOMER INFORMATION

Enovative Environmental Service Ltd.
Flat 2207, Yu Fun House Yu Chui Court, Shatin
New Territories (HK) Hong Kong
Attn :

PART B - SAMPLE INFORMATION

Name of Equipment : YSI ProDSS (Multi-Parameters)
Manufacturer : YSI (a xylem brand)
Serial Number : 17E100747
Date of Received : 10 June 2022
Date of Calibration : 10 June 2022
Date of Next Calibration : 09 September 2022

PART C - REFERENCE METHODS/ DOCUMENTS FOR THE CALIBRATION

| Test Parameter | Reference Method |
|------------------|---|
| Turbidity | APHA 21e 2130B |
| Dissolved oxygen | APHA 21e 4500 O |
| pH value | APHA 21e 4500 H+ |
| Salinity | APHA 21e 2520B |
| Temperature | Section 6 of international Accreditation New Zealand Technical Guide no. 3 Second edition March 2008: Working Thermometer Calibration Procedure |
| Conductivity | APHA 21e 2510B |

PART D - CALIBRATION RESULT

(1) Turbidity

| EXPECTED READING (NTU) | DISPLAY READING (NTU) | TOLERANCE (%) | RESULT |
|--------------------------|-------------------------|-----------------|--------------|
| 0 | 0.03 | -- | Satisfactory |
| 10 | 9.85 | -1.5 | Satisfactory |
| 20 | 20.2 | 1.0 | Satisfactory |
| 100 | 108.4 | 8.4 | Satisfactory |
| 800 | 797 | -0.4 | Satisfactory |

Tolerance of Turbidity should be less than ± 10.0 (%)

(2) Dissolved oxygen

| EXPECTED READING (MG/L) | DISPLAY READING (MG/L) | TOLERANCE | RESULT |
|---------------------------|--------------------------|-----------|--------------|
| 7.78 | 7.86 | 0.08 | Satisfactory |
| 4.72 | 4.91 | 0.19 | Satisfactory |
| 2.60 | 2.33 | -0.27 | Satisfactory |
| 0.09 | 0.30 | 0.21 | Satisfactory |

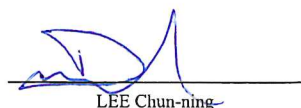

Tolerance of Dissolved oxygen should be less than ± 0.5 (mg/L)

(3) pH value

| TARGET (PH UNIT) | DISPLAY READING (PH UNIT) | TOLERANCE | RESULT |
|--------------------|-----------------------------|-----------|--------|
|--------------------|-----------------------------|-----------|--------|

REPORT OF EQUIPMENT PERFORMANCE CHECK/ CALIBRATION

Test Report No. : R-BB060020
Date of Issue : 13 June 2022
Page No. : 2 of 2

| TARGET (PH UNIT) | DISPLAY READING (PH UNIT) | TOLERANCE | RESULT |
|--------------------|-----------------------------|-----------|--------------|
| 4.00 | 4.08 | 0.08 | Satisfactory |
| 7.42 | 7.46 | 0.04 | Satisfactory |
| 10.01 | 9.94 | -0.07 | Satisfactory |

Tolerance of pH value should be less than ± 0.2 (pH unit)

(4) Salinity

| EXPECTED READING (G/L) | DISPLAY READING (G/L) | TOLERANCE (%) | RESULT |
|--------------------------|-------------------------|-----------------|--------------|
| 10 | 9.90 | -1.00 | Satisfactory |
| 20 | 19.91 | -0.45 | Satisfactory |
| 30 | 30.29 | 0.97 | Satisfactory |

Tolerance of Salinity should be less than ± 10.0 (%)

(5) Temperature

| READING OF REF. THERMOMETER (°C) | DISPLAY READING (°C) | TOLERANCE | RESULT |
|------------------------------------|------------------------|-----------|--------------|
| 10 | 10 | 0 | Satisfactory |
| 20 | 20 | 0 | Satisfactory |
| 40 | 40 | 0 | Satisfactory |

Tolerance of Temperature should be less than ± 2.0 (°C)

(6) Conductivity

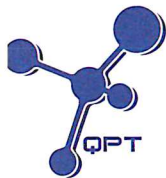

| EXPECTED READING (MS/CM AT 25°C) | DISPLAY READING | TOLERANCE (%) | RESULT |
|------------------------------------|-----------------|-----------------|--------------|
| 146.9 | 136.7 | -6.94 | Satisfactory |
| 1412 | 1329.7 | -5.83 | Satisfactory |
| 12890 | 12608.3 | -2.19 | Satisfactory |
| 58670 | 57422 | -2.13 | Satisfactory |
| 111900 | 109847 | -1.83 | Satisfactory |

Tolerance of Conductivity should be less than ± 10.0 (%)

Remark(s)

- The "Date of Next Calibration" is recommended according to best practice principals as practiced by QPT or quoted from relevant international standards.
- The results relate only to the calibrated equipment as received
- The performance of the equipment stated in this report is checked with independent reference material and results compared against a calibrated secondary source.
- "Displayed Reading" denotes the figure shown on item under calibration/ checking regardless of equipment precision or significant figures.
- The "Tolerance Limit" mentioned is the acceptance criteria applicable for similar equipment used by Quality Pro Test-Consult Ltd. or quoted from relevant international standards.

REPORT OF EQUIPMENT PERFORMANCE CHECK/ CALIBRATION

Test Report No. : R-BB090082
Date of Issue : 19 September 2022
Page No. : 1 of 2

PART A - CUSTOMER INFORMATION

Enovative Environmental Service Ltd.
Flat 2207, Yu Fun House Yu Chui Court, Shatin
New Territories (HK) Hong Kong

PART B - SAMPLE INFORMATION

Name of Equipment : YSI ProDSS (Multi-Parameters)
Manufacturer : YSI (a xylem brand)
Serial Number : 17E100747
Date of Received : 16 September 2022
Date of Calibration : 16 September 2022
Date of Next Calibration : 15 December 2022
Request No. : D-BB090082

PART C - REFERENCE METHODS/ DOCUMENTS FOR THE CALIBRATION

| Test Parameter | Reference Method |
|------------------|---|
| pH value | APHA 21e 4500 H+ |
| Temperature | Section 6 of international Accreditation New Zealand Technical Guide no. 3 Second edition March 2008: Working Thermometer Calibration Procedure |
| Salinity | APHA 21e 2520B |
| Dissolved oxygen | APHA 21e 4500 O |
| Turbidity | APHA 21e 2130B |
| Conductivity | APHA 21e 2510B |

PART D - CALIBRATION RESULT

(1) pH value

| Target (pH unit) | Display Reading (pH unit) | Tolerance | Result |
|------------------|---------------------------|-----------|--------------|
| 4.00 | 3.95 | -0.05 | Satisfactory |
| 7.42 | 7.37 | -0.05 | Satisfactory |
| 10.01 | 9.94 | -0.07 | Satisfactory |

Tolerance of pH value should be less than ± 0.2 (pH unit)

(2) Temperature

| Reading of Ref. thermometer ($^{\circ}\text{C}$) | Display Reading ($^{\circ}\text{C}$) | Tolerance | Result |
|--|--|-----------|--------------|
| 40 | 40.1 | 0.1 | Satisfactory |
| 30 | 30.1 | 0.1 | Satisfactory |
| 10 | 10.0 | 0.0 | Satisfactory |

Tolerance of Temperature should be less than ± 2.0 ($^{\circ}\text{C}$)

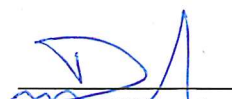

(3) Salinity

| Expected Reading (g/L) | Display Reading (g/L) | Tolerance (%) | Result |
|------------------------|-----------------------|---------------|--------------|
| 10 | 10.19 | 1.90 | Satisfactory |
| 20 | 20.43 | 2.15 | Satisfactory |
| 30 | 30.33 | 1.10 | Satisfactory |

Tolerance of Salinity should be less than ± 10.0 (%)

Monitoring Schedule for Water Quality

**Tung Chung New Town Extension (East)
Impact Marine Water Quality Monitoring (WQM) Schedule (September 2022)**

| Sunday | Monday | Tuesday | Wednesday | Thursday | Friday | Saturday |
|--------|--|---------|---|----------|--|----------|
| | | | | 1-Sep | 2-Sep | 3-Sep |
| | | | | | ebb tide 14:55 - 18:25 flood tide 9:03 - 12:33 | |
| 4-Sep | 5-Sep | 6-Sep | 7-Sep | 8-Sep | 9-Sep | 10-Sep |
| | ebb tide 6:02 - 9:32 flood tide 18:45 - 21:14 | | ebb tide 9:14 - 12:10 flood tide 16:26 - 19:56 | | ebb tide 10:28 - 13:58 flood tide 17:37 - 21:07 | |
| 11-Sep | 12-Sep | 13-Sep | 14-Sep | 15-Sep | 16-Sep | 17-Sep |
| | ebb tide 12:33 - 16:03 flood tide 6:08 - 9:38 | | ebb tide 13:37 - 17:07 flood tide 7:39 - 11:09 | | ebb tide 14:44 - 18:14 flood tide 9:24 - 12:54 | |
| 18-Sep | 19-Sep | 20-Sep | 21-Sep | 22-Sep | 23-Sep | 24-Sep |
| | ebb tide 5:55 - 9:25 flood tide 18:42 - 21:12 | | ebb tide 9:12 - 11:56 flood tide 16:19 - 19:49 | | ebb tide 9:55 - 13:25 flood tide 16:50 - 20:20 | |
| 25-Sep | 26-Sep | 27-Sep | 28-Sep | 29-Sep | 30-Sep | |
| | ebb tide 11:37 - 15:07 flood tide 5:13 - 8:43 | | ebb tide 12:43 - 16:13 flood tide 6:37 - 10:07 | | ebb tide 14:03 - 17:33 flood tide 8:18 - 11:48 | |

Remark:

Pickup time and place of 1st tide: 15 min before tidal window at Sham Tseng pier

Pickup time and place of 2nd tide: 15 min before tidal window at Tung Chung pier

| 8 | <i>Tachypleus tridentatus</i> | 2.7 | 5.0 |
| Mean (Range) | | 2.2 (0.7 - 3.8) | 4.1 (0.7 - 7.5) |

Note:

(a) 12 horseshoe crab individuals, five (5) at THW, six (6) at TCB3 and one (1) at TCB1 were recorded with prosomal width of 0.6-0.7 cm and total length of 0.6-0.8 cm. These individuals were considered to be too small for species identification by the naked eye and were recorded as unidentified species.

Table K2.2 Results for Seagrass during Qualitative Walk-through Surveys in September 2022

| Sighting # | Species | Area (m²) | Area Coverage (%) | Seagrass Area (m²) |
|---|-------------------------|-----------------------------|--------------------------|--------------------------------------|
| Monitoring Date: 22 September 2022 | | | | |
| Monitoring Station: TCB3 | | | | |
| 1 | <i>Halophila ovalis</i> | 57.4 | 80% | 45.9 |
| 2 | <i>Halophila ovalis</i> | 40.5 | 90% | 36.5 |
| 3 | <i>Halophila ovalis</i> | 32.4 | 80% | 25.9 |

Annex K3

Event and Action Plan for Soft Shore Ecology

Annex K3 **Event and Action Plan for Soft Shore Ecological Monitoring**

| Event | Action | | | |
|--|--|--|---|---|
| | ET | IEC | ER | Contractor |
| Density or the distribution pattern of horseshoe crab, seagrass and intertidal soft shore communities recorded in the impact or post-construction monitoring are significantly lower than or different from those recorded in the baseline monitoring. | <ol style="list-style-type: none"> 1. Review historical data to ensure differences are as a result of natural variation or previously observed seasonal differences; 2. Identify source(s) of impact; 3. Inform the IEC, ER and Contractor; 4. Check monitoring data; 5. Discuss additional monitoring and any other measures, with the IEC, ER and Contractor. | <ol style="list-style-type: none"> 1. Discuss amongst ER, ET, and Contractor on the potential remedial actions; 2. Review proposals for additional monitoring and any other measures submitted by the Contractor and advise the ER accordingly; 3. Supervise the implementation of remedial measures. | <ol style="list-style-type: none"> 1. Discuss with the IEC additional monitoring requirements and any other measures proposed by the ET; 2. Make agreement on the measures to be implemented. | <ol style="list-style-type: none"> 1. Inform the ER and in writing; 2. Discuss with the ET and the IEC and propose measures to the IEC and the ER; 3. Implement the agreed measures; 4. Resubmit proposals of remedial actions if problem still not under control; 5. Stop the relevant portion of works as determined by the ER until the exceedance is abated. |

Annex L

Landscape and Visual Monitoring

Annex L1

Examples of Landscape and Visual Mitigation Measures

Photo 1 – General view of tree protection zone for preserved plant species of conservation importance

Photo 2 – Regular watering of compensation woodland

Photo 3 - Erection of site hoardings in unobtrusive colours

Annex L2

Event and Action Plan for Landscape and Visual Monitoring

Annex L2 Event and Action Plan for Landscape and Visual

| Event | Action | | | |
|--------------------------------|--|--|--|--|
| | ET | IEC | ER | Contractor |
| Design Check | 1. Check final design conforms to the requirements of EP and prepare report. | 1. Check report. 2. Recommend remedial design if necessary. | 1. Undertake remedial design if necessary. | |
| Non-conformity on one occasion | 1. Inform the IEC, ER and the Contractor 2. Discuss remedial actions with IEC, ER and Contractor 3. Monitor remedial actions until rectification has been completed | 1. Check report. 2. Check Contractor's working method 3. Discuss with ET, ER and Contractor on possible remedial measures. 4. Advise ER on effective of proposed remedial measures. 5. Check implementation of remedial measures | 1. Confirm receipt of notification of non-conformity in writing 2. Review and agree on the remedial measures proposed by the Contractor 3. Ensure remedial measures are properly implemented | 1. Identify source and investigate the non-conformity 2. Amend working methods agreed with ER as appropriate 3. Rectify damage and undertake any necessary replacement |
| Repeated Non-conformity | 1. Identify sources 2. Inform the Contractor, IEC and ER 3. Discuss inspection frequency 4. Discuss remedial actions with IEC, ER and Contractor 5. Monitor remedial actions until rectification has been completed 6. If non-conformity stops, cease additional monitoring | 1. Check inspection report 2. Check Contractor's working method 3. Discuss with ET, ER and Contractor on possible remedial measures 4. Advise ER on effectiveness of proposed remedial measures | 1. Notify the Contractor 2. In consultation with the ET and IEC, agree with the Contractor on the remedial measures to be implemented 3. Supervise implementation of remedial measures | 1. Identify source and investigate the non-conformity 2. Amend working methods agreed with ER as appropriate 3. Rectify damage and undertake any necessary replacement. Stop relevant portion of works as determined by ER until the non-conformity is abated. |

Annex M

Cumulative Statistics on
Exceedances,
Environmental Complaints,
Notification of Summons
and Status of Prosecutions

Table M1 *Cumulative Statistics on Exceedances*

| | | Total No. recorded in this reporting period (1) | Total No. recorded since project commencement |
|------------------------|--------|---|---|
| Air Quality (1-hr TSP) | Action | 0 | 0 |
| | Limit | 0 | 0 |
| Noise | Action | 3 | 70 |
| | Limit | 0 | 0 |
| Water Quality | Action | 0 | 0 |
| | Limit | 0 | 0 |
| Marine Ecology | Action | 0 | 0 |
| | Limit | 0 | 0 |

Remark:

(1) Exceedances, which are not project related, are not shown in this table.

Table M2 *Cumulative Statistics on Complaints, Notifications of Summons and Successful Prosecutions*

| Contract No. | Reporting Period | Cumulative Statistics | | |
|--------------|---|-----------------------|-----------------------------|--------------|
| | | Complaints | Notifications of Summons | Prosecutions |
| Contract 1 | This Reporting Period (1 – 30 September 2022) | 1 | 0 | 0 |
| | Total no. received since project commencement | 108 | 0 | 0 |
| Contract 2 | This Reporting Period (1 – 30 September 2022) | 0 | 0 | 0 |
| | Total no. received since project commencement | 1 | 0 | 0 |
| Contract 3 | This Reporting Period (1 – 30 September 2022) | 3 | 0 | 0 |
| | Total no. received since project commencement | 28 | 0 | 0 |
| Contract 7 | This Reporting Period (1 – 30 September 2022) | 0 | 0 | 0 |
| | Total no. received since project commencement | 0 | 0 | 0 |
