# Agreement No. CE 64/2020 (EP) Environmental Team for Tung Chung New Town Extension (West) – Design and Construction

Monthly Environmental Monitoring & Audit Report for October 2023

November 2023

Environmental Permit No. EP-519/2016

**Tung Chung New Town Extension (West)** 

### **Environmental Team Leader Certification**

### **Reference Document/Plan**

| Document to be Certified: | Monthly Environmental Monitoring and Audit Report for October 2023 |
|---------------------------|--|
| Date of Document:         | November 2023  |
| Date received by ETL:     | 10 November 2023   |

## **Reference EP Condition**

Environmental Permit Condition: 3.5 & 4.1 Email from EPD dated 29 September 2022

The Permit Holder shall submit 1 hard copy and 1 electronic copy of Monthly EM&A Reports for the construction stage of the Project to the Director, within 2 weeks after the end of the reporting month. The monthly EM&A Reports shall include an executive summary of all environmental audit results, together with actions taken in the event of non-compliance (exceedances) of the environmental quality performance limits (Action and Limit Levels), complaints received and emergency events relating to violation of environmental legislation (such as illegal dumping and landfilling). The submissions shall be certified by the ET Leader and verified by the IEC as having complied with the requirements as set out in the updated EM&A Manual before submission to the Director. Additional copies of the Monthly EM&A Reports shall be provided upon request by the Director.

## **ETL Certification**

I hereby certify that the above reference document/plan complies with the above referenced condition of EP-519/2016.

Daniel Sum Environmental Team Leader

Attention: Mr. Samson KWONG / Ms. Carol LAM

Dear Sir / Madam,

#### Agreement No. CE 59/2017 (EP) Independent Environmental Checker for Tung Chung New Town Extension – Investigation <u>Monthly Environmental Monitoring & Audit Report for October 2023 for TCW</u>

We refer to the Monthly Environmental Monitoring & Audit Report for October 2023 for Tung Chung New Town Extension (West) (TCW) dated November 2023 and certified by the Environmental Team (ET) Leader of TCW on 10 November 2023. Please note the submission is hereby verified, in accordance with the requirement stipulated in Condition 3.5 of EP-519/2016.

Should you have any query, please feel free to contact the undersigned at 2608 7314 (<u>chuawo@binnies.com</u>) or our Edward Lau at 3894 9695 (<u>lauky@binnies.com</u>).

Yours faithfully, for and on behalf of BINNIES HONG KONG LIMITED

MANUEL CHUA INDEPENDENT ENVIRONMENTAL CHECKER

# **Executive summary**

Tung Chung New Town Extension (TCNTE) is one of the major initiatives under the Government's multi-pronged approach to increase land supply to meet Hong Kong's medium- to long-term needs for housing, economic and social developments. The Environmental Impact Assessment (EIA) Report for TCNTE (Register No. AEIAR-196/2016) was approved on 8 April 2016 and the Environmental Permit (EP) No. EP-519/2016, covering the construction and operation of TCNTE, was granted on 9 August 2016. The EIA Report and EP cover both Tung Chung East (TCE) and Tung Chung West (TCW, hereafter referred to as "the Project").

Civil Engineering and Development Department (CEDD) commissioned Mott MacDonald Hong Kong Limited (MMHK) to undertake the role of Environmental Team (ET) for carrying out the Environmental Monitoring & Audit (EM&A) works during the construction phase of the Project in accordance with the requirements specified in the EP, Updated EM&A Manual (the Manual), EIA Report of the Project – i.e., Tung Chung New Town Extension (TCNTE) development in Tung Chung West (TCW) and other relevant statutory requirements.

This EM&A Report summarises the monitoring results and audit findings of the EM&A programme undertaken for the TCW Project during the reporting period from 1 to 31 October 2023 in accordance with the Manual. A summary of the monitoring and audit activities conducted in the reporting period is listed as below.

| Parameter                     | Number of Sessions                                 |  |
|-------------------------------|--|--|
| Air Quality Monitoring        | 5 sessions   |  |
| Noise Monitoring              | 5 sessions   |  |
| Water Quality Monitoring      | 12 sessions <sup>(1)</sup>                         |  |
| Ecological Monitoring         | 1 session  |  |
| Environmental Site Inspection | Contract No. NL/2020/05 ("Contract 5"): 5 sessions |  |
|                               | Contract No. NL/2020/06 ("Contract 6"): 4 sessions |  |

#### Summary of Monitoring and Audit Activities in the Reporting Period

Note:

(1) Water quality monitoring scheduled on 9 Oct 2023 was cancelled due to the hoisting of the No. 8 Tropical Cyclone Warning Signal.

Environmental auditing works, including weekly site inspections of construction works conducted by the ET, audit of implementation of Detailed Compensatory Woodland Planting Plan, Plan on Provision of Buffer Zones, Detailed Preservation and/or Translocation Plan for Plant Species of Conservation Importance and Waste Management Plan were conducted in the reporting period. Based on the audit results and the observation for the reporting period, environmental pollution control and mitigation measures for the Project were properly implemented.

#### Breaches of Action and Limit Levels for Air Quality

No exceedance of Action and Limit Levels was recorded for impact air quality monitoring in the reporting period.

#### **Breaches of Action and Limit Levels for Noise**

No exceedance of Action and Limit Levels was recorded for construction noise monitoring in the reporting period.

#### Breaches of Action and Limit Levels for Water Quality

Suspended Solids (SS) exceedance was recorded during the reporting period. Relevant investigation and follow-up actions were conducted in accordance with the Event and Action Plan.

#### **Ecological Monitoring**

No exceedance of Action and Limit Levels was recorded for impact ecological monitoring in the reporting period.

#### **Environmental Complaints, Non-compliance & Summons**

There was no environmental complaint, notification of summons or prosecution recorded in the reporting period.

#### **Reporting Change**

There was no reporting change in the reporting period.

#### **Summary of Upcoming Construction Activities**

Contract No. NL/2020/05 ("Contract 5") - Ma Wan Chung

- Defective Work at Part D;
- Excavation Work, Excavation for Retaining Wall, Temporary Excavation and Lateral Support (ELS) Works (Sheet-piling and Excavation), Drainage Work (Excavation, Pipe Installation and Concreting), Sheet-pile Installation, Slope Excavation, Temporary ELS Works for Retaining Wall (Sheet-piling and Excavation), Retaining Wall Construction and Road Diversion at Part E;
- Sheet-pile Installation for Covered Walkway and Water Main, Covered Walkway Construction, Excavation for Drainage Work and Drainpipe Installation at Part F;
- Slope Excavation, Temporary Pipe-pile Wall, Piling Work and Installation of Socket H-Pile for Abutments and Piers at Part G;
- Sheet-pile Installation, Excavation for Retaining Wall, Temporary Pipe-pile Wall, Retaining Wall Construction, Hiking Trail Construction and Drainage Work Excavation at Part H;

#### Contract No. NL/2020/06 ("Contract 6") - Tung Chung Valley

- Excavation, Site Clearance, Clutch Piling, Pre-boring for Socketed H-pile Installation and Piling Works for Bridge A and Bridge B at Road L29;
- Drainage and Road Works, Sloping Works, Utility Works and Retaining Wall Construction at Road L30;
- Site Clearance, Road Marking, ELS Works, Water Main and Rising Main Installation, Sheet-piling and Hard Paving at Yu Tung Road;
- Site Clearance, Excavation, Road Works, Water Main and Rising Main Installation, Utility Works and Setting Back Roadside Kerb at Chung Mun Road;
- Excavation, Site Clearance, ELS Works for Abutment of Bridge C and Retaining Wall Construction at Shek Mun Kap Road;
- Piling Works and ELS Works at Visitor Centre;
- Excavation, Pipe-pile Wall Construction, Site Formation and Backfilling at Area 46;
- ELS Works at Sewage Pumping Station-A;
- Piling Works and Pumping Test at Sewage Pumping Station-B;
- Retaining Wall Construction at Stormwater Attenuation and Treatment Pond (SATP);
- Site Clearance and Excavation at Sustainable Urban Drainage System (SUDS).

# **1** Introduction

## 1.1 Background

Tung Chung New Town Extension (TCNTE) is one of the major initiatives under the Government's multi-pronged approach to increase land supply to meet Hong Kong's medium- to long-term needs for housing, economic and social developments. The Environmental Impact Assessment (EIA) Report for TCNTE (Register No. AEIAR-196/2016) was approved on 8 April 2016 and the Environmental Permit (EP) No. EP-519/2016, covering the construction and operation of TCNTE, was granted on 9 August 2016. The EIA Report and EP cover both Tung Chung East (TCE) and Tung Chung West (TCW, hereafter referred to as "the Project").

Civil Engineering and Development Department (CEDD) commissioned Mott MacDonald Hong Kong Limited (MMHK) to undertake the role of Environmental Team (ET) for carrying out the Environmental Monitoring & Audit (EM&A) works during the construction phase of the Project in accordance with the requirements specified in the EP, Updated EM&A Manual (the Manual), EIA Report of the TCW Project and other relevant statutory requirements. The scope of the Project works in TCW includes the following elements:

- Site formation works;
- Construction or the River Park including a visitor centre;
- Construction of proposed open space;
- Construction of sustainable urban drainage system;
- Construction of roads, footpath and the associated junction / road improvement works;
- Construction of coastal pedestrian access;
- Engineering infrastructure works covering drainage, sewerage, waterworks and landscaping works; and
- Implementation of environmental mitigation measures and environmental monitoring and audit works.

The construction works for the Project were commenced on 3 November 2021 and are divided into various works contracts. The following active works contracts were commenced on the dates shown in **Table 1.1**.

| Table 1.1: Commencement Dates of Construction Works for the Active Works Co | ntracts |
|---|---------|
|---|---------|

| Contract No.                              | Contract Name   | Commencement Date of<br>Construction Works   |
|---|---|--|
| Contract No. NL/2020/05<br>("Contract 5") | Tung Chung New Town Extension – Site Formation<br>and Infrastructure Works at Ma Wan Chung                  | 3 Nov 2021   |
| Contract No. NL/2020/06<br>("Contract 6") | Tung Chung New Town Extension – Site Formation<br>and Infrastructure Works at Tung Chung Valley,<br>Phase 1 | 3 Nov 2021<br>(Note: Construction works at<br>Tung Chung Valley<br>commenced on 30 Nov 2021) |

The locations of Contracts 5 and 6 are shown in Figures 1.1 and 1.2 respectively.

#### **1.2** Scope of this Report

This is the Monthly EM&A Report for the TCW Project which summarises the key findings of the EM&A programme for the construction works during the reporting period from 1 to 31 October 2023.

#### **1.3 Organisation Structure**

The organisation structure of the Project is shown in **Appendix A**. The key personnel contact names and contact details of the active works contracts are summarised in **Table 1.2** below. 423291 | 09/02 | A | November 2023

#### 1.4 Summary of Construction Works

The programme of the construction is shown in Appendix B.

As informed by the Contractors of the active works contracts, details of the major works carried out in this reporting period are listed in **Table 1.3**.

The environmental mitigation implementation schedule is presented in Appendix C.

(1) The construction work in Area 42 was completed and handover of the site to the Housing Department

#### Table 1.3: Major Activities in the Reporting Period

| Activities  | Key Issues   | Key Mitigation Measures   |
|---|--|---|
| Contract No. NL/2020/05 ("Contract 5")<br>Fung Chung New Town Extension – Site Formation and Infrastructure   | Works at Ma Wan Chung  |   |

## 1.5 Summary of EM&A Requirements

The status of all environmental aspects is presented in **Table 1.4**. The EM&A requirements remained unchanged during the reporting period.

| Table 1.4: Summary of Status for | the Environmental | Aspects under | the Updated EM&A |
|----------------------------------|-------------------|---------------|------------------|
| Manual                           |                   |               |                  |

| Parameter  | Status  |  |
|--|---|--|
| Air Quality  |   |  |
| Baseline Monitoring  | The results of baseline air quality monitoring for TCW were reported in the Baseline Monitoring Report and submitted to EPD under EP Condition 3.4.   |  |
| Impact Monitoring  | On-going for TCW. Monitoring conducted three times in every 6 days.   |  |
| Noise  |   |  |
| Baseline Monitoring (Construction Noise)   | The results of baseline noise monitoring for TCW were reported in the Baseline Monitoring Report and submitted to EPD under EP Condition 3.4.   |  |
| Impact Monitoring (Construction Noise)   | On-going for TCW. Monitoring conducted once per week.   |  |
| Impact Monitoring for Road Traffic Noise during Operational Phase                                    | To be conducted during operational phase.   |  |
| Fixed Noise Commissioning Test   | To be implemented by the Contractor before operation of Tung Chung New Town Extension (TCNTE) development.  |  |
| Water Quality  |   |  |
| Baseline Monitoring  | The results of baseline water quality monitoring for TCW were reported<br>in the Baseline Monitoring Report and submitted to EPD under EP<br>Condition 3.4.   |  |
| Impact Monitoring  | On-going for TCW. Monitoring conducted three times per week.  |  |
| Waste Management   |   |  |
| Waste Monitoring   | On-going.   |  |
| Land Contamination   |   |  |
| Contamination Assessment Plan (CAP),<br>Remediation Action Plan (RAP) and<br>Remediation Report (RR) | Remediation works in Area 42 was completed in accordance with the Contamination Assessment Report and Remediation Action Plan as approved by EPD. Revised Remediation Report for Area 42 was submitted to EPD on 9 August 2023 and approved by EPD on 28 August 2023. Proposed site investigation of the remaining potentially contaminated areas identified in the approved EIA Report is to be conducted after land resumption. |  |
|  | Site investigation at the suspected land contamination sites in Chung<br>Mun Road, Road L29 and Shek Mun Kap Road was completed in<br>accordance with the Supplementary Contamination Assessment Plan<br>as approved by EPD. Contamination Assessment Report was approved<br>by EPD on 11 January 2023.   |  |
|  | Site investigation for Site TC-1 located in Area Part F was completed in accordance with the Supplementary Contamination Assessment Plan as approved by EPD. Contamination Assessment Report for Site TC-1 was approved by EPD on 16 May 2023.  |  |
|  | Site investigation for Site TC-4 located in Chung Mun Road was carried<br>out in July 2023 in accordance with the Supplementary Contamination<br>Assessment Plan as approved by EPD. Revised Supplementary<br>Contamination Assessment Report for Site TC-4 was approved by EPD<br>on 5 October 2023.   |  |

| Parameter   | Status   |
|---|--|
| Ecology   |  |
| Monitoring for Compensation Woodland  | Compensation Woodland Planting was completed in May 2022. With<br>the approval from EPD on the monitoring proposal in October 2022, the<br>monitoring for Compensation Woodland was commenced in November<br>2022. Quarterly post-planting monitoring report for August 2023 was<br>submitted to EPD on 31 October 2023.   |
|   | Quarterly post-planting monitoring for the compensation woodland was ongoing.  |
| Monitoring for Emergent Plant inside the<br>future River Park   | To be conducted when the emergent plants are planted.  |
| Monitoring for Translocated Amphibians of<br>Conservation Importance  | Pre-construction survey was conducted during 20-22 October 2021.<br>Capture and translocation exercise was conducted during 29-31<br>October 2021. Report of Capture and Translocation Exercise was<br>submitted by Contractor and no target amphibian species were captured<br>or translocated during the exercise.   |
| Monitoring for Preserved/Transplanted<br>Plant Species of Conservation Importance   | Pre-construction Survey Report and the Preservation/Translocation<br>Proposal were submitted to EPD. Preservation of Plant Species of<br>Conservation Importance has been commenced and monitoring has<br>been carried out in the reporting period. Translocation of the two (2)<br>individuals of Aquilaria sinensis to temporary holding nursery in Tai Po<br>as stipulated in the revised Proposal for Plant Species of Conservation<br>Importance for Contract 6 was completed on 29 September 2023. |
| Baseline Monitoring for Tung Chung<br>Stream Ecologically Important Stream<br>(EIS) and Wong Lung Hang EIS  | The results of baseline ecological monitoring at the Eastern Tributary of<br>Tung Chung Stream for TCW were reported in the Baseline Monitoring<br>Report and submitted to EPD under EP Condition 3.4. Baseline<br>ecological monitoring at the Western Tributary of Tung Chung Stream<br>was commenced in May 2023 and would be completed by March 2024.<br>Baseline ecological monitoring at the Western Tributary of Tung Chung<br>Stream for TCW was commenced in May 2023.                          |
|   | Monitoring for Wong Lung Hang was not required and the proposal by the ET Leader of TCE was accepted by EPD on 2 September 2021.   |
| Impact Monitoring for Tung Chung Stream   | On-going for the Eastern Tributary of Tung Chung Stream for TCW.<br>Monitoring conducted at monthly intervals.   |
| Landscape and Visual  |  |
| Baseline Monitoring   | The results of baseline landscape and visual monitoring were reported<br>in the Baseline Monitoring Report and submitted to EPD under EP<br>Condition 3.4.   |
| Cultural Heritage   |  |
| Archaeological Work at the development<br>clusters in TCW, which included the<br>implementation of Rescue Excavation and<br>Survey-Cum-Excavation prior to any<br>construction works; and Watching Brief<br>during construction phase | On-going.  |
| Site Environmental Audit  |  |
| Regular Site Inspection   | On-going.  |
| Plan on Provision of Buffer Zones<br>implementation measures  | Under implementation by the Contractor of Contract 6.  |
| Plan for Review of Use of New Low Noise<br>Road Surfacing Material implementation<br>measures   | Not applicable during this reporting period.   |
| River Park Plan implementation measures   | Not applicable during this reporting period.   |
| Preservation and/or Translocation Plan for<br>Plant Species of Conservation Importance<br>implementation measures   | Under implementation by the Contractors of Contracts 5 and 6.  |
| Detailed Compensatory Woodland<br>Planting Plan implementation measures   | Under implementation by the Contractor of Contract 6.  |

| Parameter  | Status  |
|--|---|
| Habitat Enhancement and Translocation<br>Plan for Amphibian Species of<br>Conservation Importance implementation<br>measures | Under implementation by the Contractor of Contract 6.         |
| Waste Management Plan implementation measures  | Under implementation by the Contractors of Contracts 5 and 6. |
| Complaint Hotline and Email Channel  | Under implementation by the Contractors of Contracts 5 and 6. |
| Environmental Log Book   | On-going.   |

Taking into account the construction works, impact monitoring of air quality, noise, water quality, ecology and waste management were carried out in the reporting period. The monitoring schedule of air quality, noise, water quality and ecological monitoring are provided in **Appendix F**, **Appendix G**, **Appendix H** and **Appendix I** respectively.

The EM&A programme also involved environmental site inspections and related auditing conducted by the ET for checking the implementation of the required environmental mitigation measures recommended in the approved EIA Report and relevant EP submissions, including Detailed Preservation and/or Translocation Plan for Plant Species of Conservation Importance, Detailed Compensatory Woodland Planting Plan, Plan on Provision of Buffer Zones and Waste Management Plan.

# 1.6 Status of Statutory Environmental Compliance with the Environmental Permit

The status of statutory environmental compliance with the EP conditions under the EIAO, submission status under the EP and implementation status of mitigation measures are presented in **Appendix D**.

## **1.7** Status of Other Statutory Environmental Requirements

The environmental licences and permits (including Environmental Permit, waste disposal billing account, registration as chemical waste producer and construction noise permit) which were valid in the reporting period are presented in **Appendix E**. No non-compliance with environmental statutory requirements was recorded.

## **1.8 Reporting of EM&A Results**

The EM&A programme for the Project required environmental monitoring for air quality, noise and water quality as well as environmental site inspections for air quality, noise, water quality, waste management, ecology, and landscape and visual impacts. The EM&A requirements and related findings for each component are summarised in the following sections:

- Section 2 Air Quality;
- Section 3 Noise;
- Section 4 Water Quality;
- Section 5 Ecology;
- Section 6 Waste Management Status;
- Section 7 EM&A Site Inspection;
- Section 8 Implementation Status of Environmental Mitigation Measures;
- Section 9 Summary of Exceedances of the Environmental Quality Performance Limit;
- Section 10 Summary of Complaints, Notification of Summons and Successful Prosecutions;
- Section 11 Future Key Issues; and
- Section 12 Conclusions and Recommendations.

# 2 Air Quality

#### 2.1 Monitoring Requirements

According to the requirements in the Updated EM&A Manual, regular impact air quality monitoring shall be carried out at the designated monitoring locations during the construction period of the Project to obtain 1-hour Total Suspended Particulate (TSP) concentrations. One-hour sampling should be done at least 3 times per 6 days while the highest dust impact is expected. Further details of the impact air quality monitoring are presented in the following sections.

#### 2.2 Monitoring Locations

A total of two air quality monitoring stations were identified for impact monitoring in the TCNTE possible development area (PDA) at Tung Chung West and are covered by this Report.

Locations of the impact air quality monitoring stations covered in this Report are summarised in **Table 2.1** and shown in **Appendix F1**.

#### **Table 2.1: Impact Air Quality Monitoring Stations**

| <b>Monitoring Station</b> | Location        |
|---------------------------|-----------------|
| DM-5                      | Lung Tseung Tau |
| DM-6                      | Mok Ka          |

#### 2.3 Monitoring Parameters, Frequency, Duration and Monitoring Dates

**Table 2.2** summarises the parameters, frequency, duration and monitoring dates for impact air quality monitoring during the reporting period.

# Table 2.2: Impact Air Quality Monitoring Parameters, Frequency, Duration and Monitoring Dates

| Monitoring Station | Parameter              | Frequency and Duration             | Monitoring Dates       |
|--------------------|------------------------|------------------------------------|------------------------|
| DM-5               | 1-hour Total Suspended | 3 times per 6 days during the      | 5, 11, 17, 20 & 26 Oct |
| DM-6               | Particulates (TSP)     | construction period of the Project | 2023                   |

#### 2.4 Action and Limit Levels

The Action and Limit Levels of the air quality monitoring are provided in **Table 2.3** below.

#### Table 2.3: Action and Limit Levels for 1-hour TSP

| Monitoring Station | Action Level (µg/m <sup>3</sup> ) | Limit Level (µg/m³) |
|--------------------|-----------------------------------|---------------------|
| DM-5               | 266                               | 500                 |
| DM-6               | 260                               | 500                 |

#### 2.5 Monitoring Equipment

Portable direct reading dust meter was used to carry out the 1-hour TSP impact monitoring for the Project. The proposed use of portable direct reading dust meters was submitted to IEC and agreed by IEC in accordance with Section 5.5 of the Updated EM&A Manual. With the use of direct reading dust meter, it can allow prompt and direct results for the EM&A reporting and the implementation of the Event and Action Plan. The portable direct reading dust meter would be calibrated every year against High Volume Sampler (HVS) to check the validity and accuracy of the results measured by direct reading method.

**Table 2.4** summarizes the equipment used in the impact air quality monitoring during the reporting period. Copies of the calibration certificates for the portable dust meters are presented in **Appendix F2** and show that the portable direct reading dust meter is capable of providing comparable results with that provided by HVS.

#### Table 2.4: Impact Air Quality Monitoring Equipment

| Monitoring Station | Equipment                          | Model                            |
|--------------------|------------------------------------|----------------------------------|
| DM-5               | Portable direct reading dust meter | SIBATA LD-3B (Serial No. 336338, |
| DM-6               | _                                  | 456668, 476664 and 6Z7784)       |

#### 2.6 Monitoring Schedule for the Reporting Period

The schedule for impact air quality monitoring during the reporting period is provided in **Appendix F3**.

#### 2.7 Results and Observations

The monitoring results for 1-hour TSP are summarised in **Table 2.5**. The monitoring data and the graphical presentation are provided in **Appendix F4**.

#### Table 2.5: Summary of 1-hour TSP Monitoring Results in the Reporting Period

| Monitoring<br>Station | Average<br>(μg/m³) | Range<br>(µg/m³) | Action Level<br>(µg/m³) | Limit Level<br>(µg/m³) |
|-----------------------|--------------------|------------------|-------------------------|------------------------|
| DM-5                  | 60                 | 35 – 78          | 266                     | 500                    |
| DM-6                  | 31                 | 20 – 37          | 260                     | 500                    |

The dust sources in the reporting period included road traffic and nearby construction sites.

No exceedance of Action and Limit Levels was recorded for construction air quality monitoring in the reporting period. No action was thus required to be undertaken in accordance with the Event and Action Plan presented in **Appendix F5**.

# 3 Noise

#### 3.1 Monitoring Requirements

According to the requirements in the Updated EM&A Manual, regular impact construction noise monitoring shall be carried out at the designated monitoring locations once per week during the construction period of the Project. Construction noise level shall be measured in terms of the A-weighted equivalent continuous sound pressure level ( $L_{eq}$ ).  $L_{eq}$  (30min) shall be used as the monitoring parameter for the time period between 0700 and 1900 hours on normal weekdays. For all other time periods,  $L_{eq}$  (5min) shall be employed for comparison with the Noise Control Ordinance (NCO) criteria. As supplementary information for data auditing, statistical results such as  $L_{10}$  and  $L_{90}$  shall also be obtained for reference.

Further details of the impact construction noise monitoring are presented in the following sections.

## 3.2 Monitoring Locations

A total of five construction noise monitoring stations were identified for impact monitoring in the TCNTE possible development area (PDA) at Tung Chung West and are covered by this Report.

Locations of the impact construction noise monitoring stations covered in this Report are summarised in **Table 3.1** and shown in **Appendix G1**.

| •                  | 0  |                     |  |
|--------------------|--|---------------------|--|
| Monitoring Station | Location   | Type of Measurement |  |
| NMS-CA-5           | Village house in Ma Wan Chung (G/F)                | Free field^         |  |
| NMS-CA-6           | Village house in Shek Mun Kap (G/F)                | Free field^         |  |

| NING-CA-3          |  | l açaue             |  |

#### Table 3.1: Impact Construction Noise Monitoring Stations

Remark: \* NMS-CA-9, which was described as "possible school development near Tung Chung Area 39" in the Updated EM&A Manual, was subsequently confirmed as "Hong Chi Shiu Pong Morninghope School" prior to commencement of baseline monitoring.

^ For Free Field measurement, +3dB(A) should be added to the measured results.

#### 3.3 Monitoring Parameters, Frequency, Duration and Monitoring Dates

**Table 3.2** summarises the parameters, frequency, duration and monitoring dates for impact construction noise quality monitoring during the reporting period.

# Table 3.2: Impact Construction Noise Monitoring Parameters, Frequency, Duration and Monitoring Dates

| <b>Monitoring Station</b> | Parameter  | Frequency and Duration  | Monitoring Dates               |
|---------------------------|--|---|--------------------------------|
| NMS-CA-5                  | 30-min measurement   |   |                                |
| NMS-CA-6                  | between 0700 & 1900 hrs on                                   | Once every week for 30 mins<br>during the construction period of<br>the Project | 6, 10, 19, 25 & 31 Oct<br>2023 |
| NMS-CA-7                  | <ul> <li>normal weekdays (Monday<br/>to Saturday)</li> </ul> |   |                                |
| NMS-CA-8                  | $L_{eq}$ , $L_{10}$ and $L_{90}$ would be                    |   |                                |
| NMS-CA-9                  | recorded   |   |                                |

## 3.4 Action and Limit Levels

The Action and Limit Levels for construction noise of the Project are provided in **Table 3.3** below.

| Monitoring Station | Time Period                                      | Action Level                                    | Limit Level (dB(A), L <sub>eq(30min)</sub> )    |  |
|--------------------|--|---|---|--|
| NMS-CA-5           |  |   | 75  |  |
| NMS-CA-6           | 0700 4000 1                                      | When one<br>documented complaint<br>is received | 75  |  |
| NMS-CA-7*          | 0700-1900 hrs on<br>normal weekdays <sup>#</sup> |   | 70  |  |
| NMS-CA-8*          |  |   | 70<br>(CE during action lower institute action) |  |
| NMS-CA-9*          |  |   | (65 during school examination periods)          |  |

#### Table 3.3: Action and Limit Levels for Construction Noise

Note: # If works are to be carried out during restricted hours, the conditions stipulated in the construction noise permit issued by the Noise Control Authority have to be followed.

\* Denotes school / educational institution.

#### 3.5 Monitoring Equipment

Integrating Sound Level Meters were used to conduct impact construction noise monitoring. They were the Type 1 sound level meter capable of giving a continuous readout of the noise level readings including equivalent continuous sound pressure level ( $L_{Aeq}$ ) and percentile sound pressure level ( $L_x$ ). They complied with International Electrotechnical Commission Publications 651:1979 (Type 1) and 804:1985 (Type 1). **Table 3.4** summarizes the equipment used in the impact construction noise monitoring. Copies of the calibration certificates for the sound level meters and acoustical calibrators are attached in **Appendix G2**.

#### Table 3.4: Noise Monitoring Equipment

| Monitoring Station | Equipment & Model                |  |  |
|--------------------|----------------------------------|--|--|
|                    | Integrating Sound Level Meter    | Acoustical Calibrator                  |  |
| NMS-CA-5           |                                  |  |  |
| NMS-CA-6           |                                  |  |  |
| NMS-CA-7           | Rion NL-52 (serial no. 00175561) | Larson Davis CAL200 (serial no. 10227) |  |
| NMS-CA-8           |                                  |  |  |
| NMS-CA-9           |                                  |  |  |

## 3.6 Monitoring Schedule for the Reporting Period

The schedule for impact construction noise monitoring during the reporting period is provided in **Appendix G3**.

#### 3.7 Results and Observations

The monitoring results for construction noise are summarised in **Table 3.5**. The monitoring data and the graphical presentation are provided in **Appendix G4**.

#### Table 3.5: Summary of Construction Noise Monitoring Results in the Reporting Period

| Monitoring Station | Average                          | Range                            | Limit Level                      |
|--------------------|----------------------------------|----------------------------------|----------------------------------|
|                    | (dB(A), L <sub>eq(30min)</sub> ) | (dB(A), L <sub>eq(30min)</sub> ) | (dB(A), L <sub>eq(30min)</sub> ) |
| NMS-CA-5           | 55^                              | 52 – 56^                         | 75                               |
| NMS-CA-6           | 59^                              | 54 – 61^                         | - 75                             |
| NMS-CA-7           | 64                               | 62 – 67                          | 70                               |
| NMS-CA-8           | 64                               | 61 – 66                          | (65 <sup>#</sup> during school   |
| NMS-CA-9           | 64                               | 62 - 66                          | examination periods)             |

Note: ^ +3dB(A) Façade correction included for Free Field measurement.

<sup>#</sup> No school examination was taken place at NMS-CA-9 during this reporting period.

<sup>(1)</sup> Reduced to 65dB(A) during school examination periods at NMS-CA-7 and NMS-CA-8. School examination period took place at NMS-CA-7 on 5-9, 11-12, 16-23, 25-27 and 30 Oct. School examination period took place at NMS-CA-8 on 16-27 Oct.

The noise sources during the construction noise monitoring in the reporting period included bird sound, nearby traffic, school activities and aircraft as well as nearby construction sites.

No exceedance of Action and Limit Levels was recorded for construction noise monitoring in the reporting period. No action was thus required to be undertaken in accordance with the Event and Action Plan presented in **Appendix G5**.

# 4 Water Quality

### 4.1 Monitoring Requirements

According to the requirements in the Updated EM&A Manual, regular impact water quality monitoring shall be carried out 3 days per week at the designated monitoring locations during the construction period of the Project. The interval between two sets of monitoring shall not be less than 36 hours. Further details of the impact water quality monitoring are presented in the following sections.

#### 4.2 Monitoring Locations

The locations of the monitoring stations under the Project are shown in **Table 4.1** and **Appendix H1**.

| Monitoring               | Description   | Location |          |  |
|--------------------------|---|----------|----------|--|
| Station                  |   | Easting  | Northing |  |
| TCW-WQM1                 | Downstream of Tung Chung Stream                                 | 810784   | 815710   |  |
| Tung Chung Stre          | am (West)   |          |          |  |
| TCW-WQM2                 | Middle of Tung Chung Stream (West)                              | 810701   | 815015   |  |
| TCW-WQM4                 | Upstream of Tung Chung Stream (West)                            | 810641   | 814405   |  |
| TCW-WQM6 <sup>(1)</sup>  | Downstream of Tung Chung Stream (West)                          | 810814   | 815385   |  |
| Tung Chung Stream (East) |   |          |          |  |
| TCW-WQM3A <sup>(2)</sup> | Middle of Tung Chung Stream (East) [aka Upstream of River Park] | 811083   | 814895   |  |
| TCW-WQM5A <sup>(3)</sup> | Upstream of Tung Chung Stream (East)                            | 811194   | 814368   |  |
|                          |   | 811138   | 814498   |  |
| TCW-WQM7 <sup>(1)</sup>  | Downstream of Tung Chung Stream (East)                          | 810862   | 815400   |  |
|                          | [aka Downstream of River Park]                                  |          |          |  |

#### **Table 4.1: Impact Water Quality Monitoring Stations**

Notes:

(1) TCW-WQM6 and TCW-WQM7 are additional monitoring stations which can monitor the water quality impact associated with construction activities along the Tung Chung Stream (West) and Tung Chung Stream (East) respectively.

(2) TCW-WQM3A is the proposed relocated TCW-WQM3, which will be upstream of the River Park where there are no direct works on Tung Chung Stream (East). The original TCW-WQM3 location lies within the construction works area for the future River Park, which will be directly modified and inaccessible during construction phase.

(3) The monitoring location of TCW-WQM5A will be bounded by the coordinates shown, with the exact location depending on the nearest safe accessible and practical location to the original TCW-WQM5.

## 4.3 Monitoring Parameters, Frequency and Duration

**Table 4.2** summarises the parameters, frequency and duration for impact water quality monitoring during the reporting period.

| Monitoring<br>Station  | Parameters (Units)   | Frequency, Duration and<br>Replication   | Monitoring Dates   |
|--|--|--|--|
| TCW-WQM1,<br>TCW-WQM2,<br>TCW-WQM3A,<br>TCW-WQM4,<br>TCW-WQM5A,<br>TCW-WQM6, | <ul> <li>Dissolved Oxygen (DO)<br/>(mg/L and % saturation)</li> <li>Temperature (°C)</li> <li>Turbidity (NTU)</li> <li>Salinity (ppt)</li> <li>pH</li> </ul> | Impact monitoring:<br>3 days per week during the<br>construction period of the Project.<br>Not less than 36 hours' interval<br>between two sets of monitoring.<br>Two (2) replicate in-situ<br>measurements and water samples. | 3, 5, 7, 11, 13, 16, 18, 20,<br>24, 26, 28 & 30 Oct<br>2023 <sup>(2)</sup> |

| Monitoring<br>Station | Parameters (Units)   | Frequency, Duration and<br>Replication | Monitoring Dates |
|-----------------------|--|--|------------------|
| TCW-WQM7              | <ul> <li>Suspended Solids (SS)<br/>(mg/L)</li> <li>Conductivity<sup>(1)</sup> (µS/cm)</li> </ul> |  |                  |

Remark:

1. Water depth measurement is not applicable due to very shallow depth of the monitoring locations.

Note:

(1) Conductivity is an additional reference monitoring parameter adopted during a review of the baseline monitoring programme in June 2021. It is not compulsory as prescribed in the Updated EM&A Manual.

(2) Water quality monitoring scheduled on 9 Oct 2023 was cancelled due to the hoisting of the No. 8 Tropical Cyclone Warning Signal.

In addition to the parameters presented in **Table 4.2**, other relevant data were also recorded, including monitoring location, time, approximate water depth (by visual observation), tidal condition (if applicable), weather conditions and any special phenomena or work underway at the Project site.

#### 4.4 Action and Limit Levels

The calculated Action and Limit Levels of the impact water quality monitoring for the monitoring stations of Tung Chung Stream (West), Tung Chung Stream (East) and TCW-WQM1 are shown in **Table 4.3** below.

| Parameters               | Action Level   | Limit Level  |  |  |
|--------------------------|--|--|--|--|
| Tung Chung Stream (West) |  |  |  |  |
| DO in mg/L               | 3.4 mg/L   | 3.3 mg/L   |  |  |
| SS in mg/L               | 7.0 mg/L or  | 16.9 mg/L or   |  |  |
|                          | 120% of upstream control station at the same tide of the same day, whichever is higher | 130% of upstream control station at the same tide of the same day, whichever is higher |  |  |
| Turbidity in NTU         | 6.7 NTU or   | 22.0 NTU or  |  |  |
|                          | 120% of upstream control station at the same tide of the same day, whichever is higher | 130% of upstream control station at the same tide of the same day, whichever is higher |  |  |
| Tung Chung Strea         | am (East)  |  |  |  |
| DO in mg/L               | 4.2 mg/L   | 4.0 mg/L   |  |  |
| SS in mg/L               | 7.2 mg/L or  | 9.7 mg/L or  |  |  |
|                          | 120% of upstream control station at the same tide of the same day, whichever is higher | 130% of upstream control station at the same tide of the same day, whichever is higher |  |  |
| Turbidity in NTU         | 9.8 NTU or   | 22.5 NTU or  |  |  |
|                          | 120% of upstream control station at the same tide of the same day, whichever is higher | 130% of upstream control station at the same tide of the same day, whichever is higher |  |  |
| TCW-WQM1                 |  |  |  |  |
| DO in mg/L               | 2.2 mg/L   | 1.8 mg/L   |  |  |
| SS in mg/L               | 7.3 mg/L   | 9.7 mg/L   |  |  |
| Turbidity in NTU         | 24.7 NTU   | 35.3 NTU   |  |  |

#### Table 4.3: Calculated Action and Limit Levels for Impact Water Quality Monitoring

Notes:

(1) For DO, non-compliance occurs when monitoring results is lower than the limits.

(2) For SS and Turbidity, non-compliance occurs when monitoring results is larger than the limits.

(3) Action and Limit Levels do not apply to TCW-WQM4 and TCW-WQM5A which are upstream control stations.

#### 4.5 Monitoring Equipment

**Table 4.4** summarizes the equipment used in the impact water quality monitoring works. All the monitoring equipment complied with the requirements set out in the Updated EM&A Manual. Copies of the calibration certificates are attached in **Appendix H2**.

#### Table 4.4: Water Quality Monitoring Equipment

| Equipment  | Brand and Model                      |
|--|--------------------------------------|
| Multifunctional Meter (in-situ measurement of DO, pH, temperature, salinity, turbidity and conductivity) | Horiba U-53<br>(serial no. KP23RRSM) |

## 4.6 Monitoring Schedule for the Reporting Period

The schedule for impact water quality monitoring during the reporting period is provided in **Appendix H3**.

#### 4.7 Results and Observations

A total of 12 monitoring events for impact water quality monitoring were conducted at all designated monitoring stations during the reporting period. Impact water quality monitoring results and graphical presentations were provided in **Appendix H4**.

Limit Level exceedance was recorded for water quality impact monitoring in the reporting period and the Event and Action Plan (**Appendix H5**) was undertaken. Investigation on the limit level exceedance was conducted and summarised in **Table 4.5** below.

#### Table 4.5: Details of Exceedances Recorded for Water Quality Monitoring

| Date        | Parameter   | Station           | Туре        | Justification                   |
|-------------|---|-------------------|-------------|---------------------------------|
| 16 Oct 2023 | Suspended Solids  | TCW-WQM7          | Limit       | (a) (b) (c) (d) (e) (f) (g)     |
| Remarks:(a) |   | n at the diverte  | ed channel  | to minimise the silt content    |
|             | flowing downstream.   |                   |             |                                 |
| (b)         | Construction runoff was   | diverted to wa    | astewater   | treatment facilities at various |
|             | locations of the constru-   | ction site for tr | eatment b   | efore final discharge.          |
| (c)         | Sump pits were constructed at site for temporary containment of surface runoff. |                   |             |                                 |
| (d)         | Deployment of additional of sedimentation tank for the existing wastewater      |                   |             |                                 |
|             | treatment facility to enh   | ance the over     | all treatme | nt capacity of the wastewater   |
|             | treatment facility.   |                   |             |                                 |
| (e)         |   |                   |             |                                 |
| (0)         | mitigation measures was observed.   |                   |             |                                 |
| (f)         | No specific observations were made during the course of monitoring which might  |                   |             |                                 |
| (1)         |   |                   |             |                                 |
| (           | result in the exceedance in the measurement result.                             |                   |             |                                 |
| (g)         |   |                   | said monite | oring station was recorded from |
|             | the subsequent monitor  | ing event.        |             |                                 |
|             |   |                   |             |                                 |

Nevertheless, the Contractors were reminded to implement all relevant mitigation measures for the works, including periodic maintenance of construction plant and equipment as well as maintain good site practice. The ET will keep on checking monitoring data, plant equipment and Contractors' working methods.

# 5 Ecology

#### 5.1 Monitoring Requirements

According to the requirements in the Updated EM&A Manual, regular impact ecological monitoring in terms of water quality, aquatic invertebrate and fish species shall be carried out on a monthly basis at the designated monitoring locations during the construction period of the Project. Further details of the impact ecological monitoring are presented in the following sections.

#### 5.2 Monitoring Locations

A total of seven (7) monitoring stations at Tung Chung Stream covering both River Park and other Public Works (road crossings, polders, and stormwater attenuation and treatment ponds) were identified for the construction phase monitoring.

The locations of the monitoring stations are presented in **Table 5.1** and **Appendix I1**. Note that the exact monitoring locations were subject to fine adjustment based on site conditions (e.g. adverse weather conditions, blockage by plants, rocks or other obstacles).

| Monitoring         | Description                                  | Coordinates |          |               |                |
|--------------------|--|-------------|----------|---------------|----------------|
| Station            |  | Easting     | Northing | Latitude (N)  | Longitude (E)  |
| RP1                | Conservation Zone (Natural Section)          | 811150      | 814469   | 22°16'07.95"N | 113°55'59.41"E |

#### **Table 5.1: Impact Ecological Monitoring Stations**

Note (1): Ecological Monitoring at the monitoring station RP3 and PW2 were suspended since March 2023 with the commencement of temporary river diversion in Tung Chung Stream.

#### 5.3 Monitoring Frequency and Dates

As required under the Updated EM&A Manual, the impact ecological monitoring shall cover the full construction programme on a monthly basis. **Table 5.2** summarises the frequency and monitoring dates for the impact monitoring during the reporting period.

#### Table 5.2: Impact Ecological Monitoring Schedule

| Reporting | River Park Study Area (RP1, RP2, RP3 and RP4) and |  |
|-----------|---|--|
| Month     | Other Public Works Study Area (PW1, PW2 and PW3)  |  |
| Oct 2023  | 25 Oct 2023                                       |  |

## 5.4 Monitoring Methodology

#### 5.4.1 Stream Fauna

Several survey methods which covered different components of the stream fauna (which includes fish species and aquatic invertebrates) were used to monitor the study areas to yield a comprehensive result:

- 1. Direct Observation covered all along the accessible part of the watercourse to provide a species list of fish and aquatic invertebrate with corresponding relative abundance.
- 2. Baited Fish Cage At each sampling location, two replicates of baited fish cages were deployed for a duration of at least one hour. All collected fish and aquatic invertebrate species were recorded and their abundance were counted. This method may collect fishes which are wary of humans. Permit from the AFCD was obtained before the use of any equipment to collect stream fauna in any streams and watercourses.
- 3. Kick Sampling at least two replicates of kick sampling were performed at each monitoring station to obtain aquatic invertebrate (and fish) samples. Kick sampling is a relatively quick method to survey aquatic invertebrates in shallow fast-flowing streams. A ~30 cm x ~30 cm kick sampler with ~0.5 mm mesh size was placed on the stream bed and the area just upstream of the sampler were vigorously disturbed by kicking for one minute. The contents of the net were transferred to suitable containers with freshwater for identification and counting in situ. All identifiable samples were released back to the sampling locations.

#### 5.4.2 Water Quality

Ecologically related water quality monitoring, including *in situ* measurements and collection of water samples for laboratory analysis, was conducted at each monitoring location. Duplicate water samples were collected at surface water level at each monitoring location.

Water quality parameters including Dissolved Oxygen (in % saturation and mg/L), pH value, temperature, turbidity and salinity were measured in situ while the other parameters, including Suspended Solids (SS), Ammonia, Total Kjeldahl Nitrogen (TKN), Total Phosphorus (TP), *Escherichia coli (E. coli)*, 5-day Biochemical Oxygen Demand (BOD<sub>5</sub>), Chemical Oxygen Demand (COD) and Oil & Grease, were measured at a HOKLAS accredited laboratory for water quality analysis. Other relevant data, including time, water depth, weather conditions and special phenomena or works underway in the vicinity were recorded.

The measured water quality parameters and laboratory testing method are shown in Table 5.3.

# Table 5.3: Ecologically related Water Quality Monitoring Parameters and Testing Methods Parameter

| In situ measurements            | Instrument Range Capability | Measurement rEsolution |
|---------------------------------|-----------------------------|------------------------|
| рН                              | 0 – 14 pH Units             | 0.01 pH units          |
| Salinity                        | 0 – 40 ppt                  | 0.01 ppt               |
| Temperature                     | 0 – 45°C                    | 0.1°C                  |
| Turbidity                       | 0 – 1000 NTU                | 0.1 NTU                |
| Dissolved Oxygen (DO)           | 0 – 20 mg/L                 | 0.1 mg/L               |
|                                 | 0 – 200% saturation         | 0.1% saturation        |
| Laboratory testing and analyses | Method Reference            | Level of Reporting     |
| Suspended Solids (SS)           | APHA 2540 D                 | 0.5 mg/L               |
| Ammonia as N                    | APHA 4500 NH <sub>3</sub> G | 0.01 mg/L              |

#### Parameter

| Total Kjeldahl Nitrogen (TKN) as N                  | APHA 4500 P: J;<br>APHA 4500 NO3: I | 0.05 mg/L   |
|---|-------------------------------------|-------------|
| Total Phosphorus as P                               | APHA 4500 P: J                      | 0.01 mg/L   |
| E. coli   | TM09/EC/10/98 Issue 3, HKEPD        | 1 CFU/100mL |
| 5-day Biochemical Oxygen Demand (BOD <sub>5</sub> ) | APHA 5210 B                         | 1 mg/L      |
| Chemical Oxygen Demand (COD)                        | APHA 5220 B                         | 2 mg/L      |
| Oil & Grease  | APHA 5520 B                         | 2 mg/L      |

The equipment used for the *in situ* ecologically related water quality monitoring work is summarised in **Table 5.4**. Copies of the calibration certificates are attached in **Appendix I2**.

| Table 5.4: Ecologically | v-related Water | Quality | Monitoring | Equipment |
|-------------------------|-----------------|---------|------------|-----------|
|                         |                 |         |            |           |

| Equipment   | Brand and Model       |
|---|-----------------------|
| Multifunctional Meter (in-situ measurement of DO, pH, | Horiba U-53           |
| temperature, salinity and turbidity)                  | (serial no. X42XKBNO) |

#### 5.5 Action and Limit Levels

The Action and Limit Levels for the impact ecological monitoring are defined in Table 5.5.

| Exceedance Level | Description  |
|------------------|--|
| Action Level     | Reduction in the monthly taxa diversity (i.e. number of species) of fish or aquatic invertebrate (macroinvertebrate only) of any monitoring station compared to the corresponding monitoring season and station of the baseline survey by <b>30%</b> . |
| Limit Level      | Reduction in the monthly taxa diversity (i.e. number of species) of fish or aquatic invertebrate (macroinvertebrate only) of any monitoring station compared to the corresponding monitoring station and season of the baseline survey by <b>50%</b> . |

#### Table 5.5: Action and Limit Levels for Impact Ecological Monitoring

For ease of reference, the Action and Limit Levels for aquatic invertebrate and fish (rounded to nearest 0.1) in Wet Season (April to October) and Dry Season (November to March) at each monitoring station are provided in **Table 5.6** and **Table 5.7** respectively.

# Table 5.6: Action Level (AL) and Limit Level (LL) for Number of Aquatic Invertebrate Species at Each Monitoring Station during Wet (Apr - Oct) and Dry (Nov - Mar) Seasons

|        |    | River Park Study Area |     |     | Public Works Study Area |     |     |     |

#### 5.6 Results and Observations

#### 5.6.1 Environment of Stream Courses

The environment of stream courses at the monitoring stations for the River Park Study Area (RP1 to RP4) and other Public Works Study Area (PW1 to PW3) are presented in **Table 5.8.** 

#### Table 5.8: Environment of Stream Courses at each Monitoring Station

| Station Name | Location                               | Physical Environment   |
|--------------|--|--|
| RP1          | Conservation Zone<br>(Natural Section) | Fast flowing natural stream. The substrate was dominant with boulders and rocks, and sands were sometimes observed. Woodland with dense vegetation was on the river banks.   |
| RP2          | Upstream of River Park                 | Moderate fast flowing natural stream. The substrate was in the form of boulders, rocks, sand and silt mixture. Short but dense herbaceous vegetation was on the right bank of the stream, while dense woodland was on the left bank.   |
| RP4          | Downstream of River<br>Park            | The channelised section of Tung Chung Stream ended at the upstream of RP4. RP4 is a moderate fast flowing natural stream close to the estuary. The substrate was in the form of boulders, rocks, sand and silt mixture. Woody plants and herbaceous plants were along the river banks. |
| PW1          | Near Public Works                      | Fast flowing natural stream. The substrate was dominant with boulders and rocks, and sand was sometimes observed. Woodland with dense vegetation was on the river banks.   |
| PW3          | Near Public Works                      | A natural estuary. The substrate was dominant with sand and mud. Dense mangroves were on the shores of the estuary.  |

Note (1): Ecological Monitoring at the monitoring station RP3 and PW2 were suspended since March 2023 with the commencement of temporary river diversion in Tung Chung Stream.

#### 5.6.2 Stream Fauna

A total of 7 aquatic invertebrate species and 20 fish species were recorded across all monitoring stations during the reporting period. The monitoring results for aquatic invertebrate and fish species are summarised in **Table 5.9** and **Table 5.10**. The monitoring data is provided in **Appendix I4** and **Appendix I5**. Representative photos of the species of conservation importance and other species recorded are presented in **Appendix I3**.

| Common Name           | Species Name           | Rive     | er Park Study | Public Works Study Area |     |     |

#### Table 5.10: Summary of Fish Species Recorded in the Reporting Period

Note (1): Species of conservation importance (Fellowes et. al., 2002) (2): Species of conservation importance (Yue & Chen, 1998)

No exceedance of Action and Limit Levels was recorded for the impact ecological monitoring in the reporting period, comparing against the baseline monitoring data. No action was thus required to be undertaken in accordance with the Event and Action Plan presented in **Appendix I6**.

## 5.6.3 Water Quality

As the EM&A programme of TCW already has its own river water quality monitoring (i.e. 3 times per week, refer to **Section 4** of this EM&A Report) and its associated Action and Limit Levels, this section of ecologically-related water quality monitoring results (i.e. at monthly basis) will be adopted for facilitating the investigation in case of any trigger of Action and Limit Levels of the ecological monitoring. The ecologically related water quality monitoring result during the reporting period is summarised in **Appendix I7**.

# 6 Waste Management Status

#### 6.1 General

The Contractors of Contracts 5 and 6 have each obtained a waste disposal billing account and registered as chemical waste producer. Sufficient numbers of receptacles were available for general refuse collection and sorting.

All dump trucks engaged on site were equipped with Real Time Tracking and Monitoring (RTTM) system during the reporting period. The Surveillance Team of the ET conducted regular site inspections on the dump trucks and their track records. No illegal dumping and landfilling of C&D materials was found during the reporting period.

Wastes generated during this reporting period include mainly non-inert construction wastes. Reference has been made to the waste flow tables prepared by the Contractors. The quantities of different types of wastes and imported fill materials are summarised in **Table 6.1**.

| Month / Year | Inert C&D<br>Materials <sup>(a)</sup><br>(in '000m <sup>3</sup> ) | Imported Fill<br>Materials <sup>(d)</sup><br>(in '000m <sup>3</sup> ) | Inert Construction<br>Waste Re-used in the<br>Contract<br>(in '000m <sup>3</sup> ) | Inert Construction<br>Waste Re-used in<br>other Projects <sup>(e)</sup><br>(in '000m <sup>3</sup> ) | Non-inert<br>Construction<br>Waste <sup>(b)</sup><br>(in '000m <sup>3</sup> ) | Recyclable<br>Materials <sup>(c)</sup><br>(in '000kg) | Chemical<br>Waste<br>('000kg) |
|--------------|---|---|--|---|---|---|-------------------------------|
| Aug 2023     | 11.18   | 0.37  | 0  | 3.30  | 0.83  | 2.93  | 0                             |

| Oct 2023     | 3.94  | 5.94  | 0  | 2.59  | 0.18  | 0.30  | 0                             |

#### Table 6.1: Quantities of Different Waste Generated and Imported Fill Materials for TCW

(a) Inert construction and demolition wastes include hard rock and large broken concrete, and materials disposed as public fill. Notes:

(b) Non-inert construction wastes include general refuse disposed at landfill.
 (c) Recyclable materials include metals, paper, cardboard, plastics and others.
 (d) Imported fill materials include public fill.

(e) Inert Construction Waste reused in other construction contracts under TCNTE.

(f) Updated figure for the previous month is reported and marked with an asterisk (\*).

# 7 EM&A Site Inspection

### 7.1 Monitoring Requirements

Environmental site inspections were carried out on a weekly basis with the Contractors and ER to monitor the implementation of proper environmental pollution control and mitigation measures for air quality, noise, water quality, waste management, ecology and landscape and visual impacts under the Project.

#### 7.2 Site Inspections and Key Observations

In the reporting period:

- Five (5) site inspections were carried out on 3, 10, 17, 27 and 31 October 2023 for Contract 5; and
- Four (4) site inspections were carried out on 5, 12, 19 and 27 October 2023 for Contract 6.

Key observations during the site inspections are summarised in **Table 7.1**.

The Contractors were reminded to implement all relevant mitigation measures related to construction dust, construction noise, water quality, waste management, ecology and landscape and visual outlined in the EIA Report and the Updated EM&A Manual.

| Contract No. | Inspection Date(s) | Environmental Observation   | Recommendation / Remark   |
|--------------|--------------------|---|---|
| Contract 5   | 3 Oct 2023         | <ul> <li>Area Part E</li> <li>Copy of Environmental Permit was not observed</li> <li>Area Part H</li> <li>NRMM labels on the body of generator and excavator were faded</li> <li>NRMM label on the body of the generator was found missing</li> <li>Area Part D</li> <li>No deficiency was observed</li> </ul>  | <ul> <li>Area Part E</li> <li>Display the copy of Environmental Permit for public information in accordance with Permit requirement</li> <li>Area Part H</li> <li>Replace the NRMM label on the body of generator and excavator</li> <li>Affix valid NRMM label on the body of the generator which was found missing</li> </ul>   |
|              | 10 Oct 2023        | Area Part F and Part H <ul> <li>No deficiency was observed</li> </ul>   | • Nil   |
|              | 17 Oct 2023        | <ul> <li>Area Part H</li> <li>Drip tray was not provided for the containment of chemicals</li> <li>Area Part E</li> <li>No deficiency was observed</li> </ul>   | <ul> <li>Area Part H</li> <li>Provide drip tray for the proper containment of chemicals to prevent potential spillage at the site</li> </ul>  |
|              | 27 Oct 2023        | <ul> <li>Area Part G and Part H</li> <li>Records of the maintenance and flowmeter of the wastewater treatment facilities were not updated</li> </ul>  | <ul> <li>Area Part G and Part H</li> <li>Maintain updated records of the maintenance and flowmeter reading of the wastewater treatment facilities in accordance with Discharge Licence requirements</li> </ul>  |
|              | 31 Oct 2023        | <ul><li>Area Part F</li><li>Idled stockpiles at the site were not covered</li></ul>   | <ul><li>Area Part F</li><li>Cover the idled stockpiles by impervious sheeting such as tarpaulin or kept in damp condition</li></ul>   |

## 7.3 Landscape and Visual Mitigation Measures

Implementation of applicable landscape and visual mitigation measures (reference to the environmental protection measures MM1 to MM5, MM7 to MM8, MM10 to MM20 in **Appendix C**) was monitored in accordance with Manual. All measures undertaken by the Contractor during the construction phase and establishment work phase shall be audited by ET to ensure compliance with the intended aims of the measures.

The implementation status of the environmental protection measures is summarised below in **Table 7.2**. Examples of landscape and visual mitigation measures are shown in **Table 7.3**. The monitoring programme for detailed design, construction and establishment stages is presented in **Table 7.4**. Event and Action Plan for Landscape and Visual impacts is stated in **Table 7.5**.

| Landscape and Visual<br>Mitigation Measures during<br>Construction   | Implementation Status  | Relevant<br>Contract(s) in<br>the Reporting<br>Period |
|--|--|---|
| MM1- Optimization of Construction<br>Areas & Providing Temporary<br>Landscape on Temporary<br>Construction | Implementation of the measures were carried out during the detailed design stage of the Project.   | All works contracts                                   |
| MM2 - Minimize Topographical<br>Changes  |  |   |
| MM3 - Preservation of Potentially<br>Registerable OVTs, Rare and<br>Protective Vegetation                  | Tree Protection Specifications were provided in the relevant Contract Specifications respectively for implementation by the Contractors under the Project.   | All works contracts                                   |
|  | The Detailed Preservation and/or Translocation Plan for<br>Plant Species of Conservation Importance was<br>submitted under EP Condition 2.21 and accepted by<br>EPD.   |   |
|  | The Contractors' performance on the implementation of<br>the tree maintenance and protection measures were<br>observed and checked by the ET weekly during<br>construction period.   |   |
| MM4 - Transplanting of Existing<br>Trees   | Tree Transplanting Specifications were provided in the relevant Contract Specifications respectively for implementation by the Contractors under the Project where trees would unavoidably be affected by the construction works.  | All works contracts                                   |
|  | The Detailed Preservation and/or Translocation Plan for<br>Plant Species of Conservation Importance was<br>submitted under EP Condition 2.21 and accepted by<br>EPD.   |   |
|  | The Contractors were required to submit Method<br>Statements for tree transplanting prior to the<br>transplanting works. Tree inspections were conducted by<br>ET to check the tree transplanting works implemented by<br>the Contractors on site.                       |   |
|  | The Contractors' performance on the implementation of trees maintenance and protection measures on transplanted trees were observed and checked by the ET bi-monthly during the 24-month establishment period after the completion of each batch of transplanting works. |   |

#### Table 7.2: Landscape and Visual – Construction Phase Audit Summary

| Landscape and Visual<br>Mitigation Measures during<br>Construction                        | Implementation Status  | Relevant<br>Contract(s) in<br>the Reporting<br>Period |
|---|--|---|
| MM5 – Screen Hoarding   | The implementation of mitigation measures was checked<br>by ET during weekly site inspection. Implementation of<br>the measures by Contractors was observed. | All works contracts                                   |
| MM7 – Protection of Natural<br>Rivers and Streams   | The implementation of mitigation measures was checked<br>by ET during weekly site inspection. Implementation of<br>the measures by Contractors was observed. | Contract 6  |
| MM8 - Preservation of Natural<br>Coastline  | Implementation of the measures were carried out during the detailed design stage of the Project.   | Contract 5  |
| MM10 – Compensatory Planting  | Not applicable during the reporting period   | All works contracts                                   |
| MM11 – Woodland Restoration   | The implementation of mitigation measures was checked<br>by ET during weekly site inspection. Implementation of<br>the measures by Contractors was observed. | Contract 6  |
| MM12 – Screen Planting  | Not applicable during the reporting period   | All works contracts                                   |
| MM13 – Roadside Planting  | Not applicable during the reporting period   | All works contracts                                   |
| MM14 – Aesthetic Design of Built<br>Development   | Not applicable during the reporting period   | All works contracts                                   |
| MM15 – Maximise Greening on<br>Structure  | Not applicable during the reporting period   | All works contracts                                   |
| MM16 – Noise Barrier Design   | Not applicable during the reporting period   | Contract 6  |
| MM17 – Landscape Treatment for<br>Polders & Stormwater Attenuation<br>and Treatment Ponds | Not applicable during the reporting period   | Contract 6  |
| MM18 - Landscaping on Slopes  | Not applicable during the reporting period   | All works contracts                                   |
| MM19 - Landscape Treatment on<br>Channelized Watercourses                                 | Not applicable during the reporting period   | Contract 6  |
| MM20 - Lighting Control   | The implementation of mitigation measures was checked<br>by ET during weekly site inspection. Implementation of<br>the measures by Contractors was observed. | All works contracts                                   |

 Table 7.3: Examples of Landscape and Visual Mitigation Measures in the Reporting

 Period

| Stage                  | Monitoring Task   | Monitoring<br>Report   | Form of<br>Approval                   | Frequency                        |
|------------------------|---|--|---------------------------------------|----------------------------------|
| Design                 | Monitoring of design<br>works against the<br>recommendations of<br>the landscape and<br>visual impact<br>assessments within<br>the EIA should be<br>undertaken by the<br>Engineer and<br>Landscape<br>Architect, to ensure<br>that they fulfil the<br>intentions of the<br>mitigation measures.<br>Any changes to the<br>design, including<br>design changes on<br>site should also be<br>checked | Report by CEDD /<br>ER confirming that<br>the design conforms<br>to requirements of<br>EP. | Approved by CEDD                      | At completion of<br>design stage |

#### Table 7.5: Event and Action Plan for Landscape and Visual

## 7.4 Land Contamination Assessment

Remediation works in Area 42 was completed in accordance with the Contamination Assessment Report (CAR) and Remediation Action Plan (RAP) as approved by EPD. Revised Remediation Report for Area 42 was submitted to EPD on 9 August 2023 and approved by EPD on 28 August 2023. Site Investigation in Chung Mun Road, Road L29 and Shek Mun Kap Road was completed in accordance with the Supplementary CAP as approved by EPD. CAR was approved by EPD on 11 January 2023. Site investigation for Site TC-1 located in Area Part F was completed in accordance with the Supplementary CAP as approved by EPD. CAR was approved by EPD on 16 May 2023. Site investigation for Site TC-4 located in Chung Mun Road was carried out in July 2023 in accordance with the Supplementary Contamination Assessment Plan as approved by EPD. Revised Supplementary Contamination Assessment Report for Site TC-4 was approved by EPD on 5 October 2023.

Proposed site investigation of the remaining potentially contaminated areas identified in the approved EIA Report would be confirmed and conducted after approval of the further submission of the Supplementary CAP as necessary.

## 7.5 Monitoring for Compensation Woodland

Compensation Woodland Planting was completed in May 2022. With the approval from EPD on the monitoring proposal in October 2022, the monitoring for Compensation Woodland was

commenced in November 2022. Quarterly post-planting monitoring report for August 2023 was submitted to EPD on 31 October 2023. Photos of the Compensation Woodland planting are shown in **Table 7.6**.

Table 7.6: Photos of the Compensation Woodland Planting

## 7.6 Monitoring for Preserved/Transplanted Plant Species of Conservation Importance

For the plant species of conservation importance within the works area of Contract 5, there were three (3) individuals of *Gmelina chinensis*, six (6) individuals of *Aquilaria sinensis* and five (5) individuals of *Canthium dicoccum* identified. One (1) individual of *Gmelina chinensis*, two (2) individuals of *Aquilaria sinensis* and two (2) individuals of *Canthium dicoccum* were recommended being preserved *in-situ*. The remaining individuals were recommended to be removed owing to poor form and structure condition.

As for the plant species of conservation importance within the works area of Contract 6, there were twelve (12) individuals of *Aquilaria sinensis* identified. Three (3) individuals of *Aquilaria sinensis* were recommended being preserved *in-situ* while two (2) individuals of *Aquilaria sinensis* were recommended being transplanted to the receptor site in accordance with the Preservation and/or Translocation Proposal for Plant Species of Conservation Importance submitted under section 3.1.1 of Detailed Preservation and/or Translocation Plan for Plant Species of Conservation Importance (Condition 2.21 of the EP No. EP-519/2016). The remaining individuals were recommended to be removed owing to poor form and structure condition.

## 7.6.1 Preserved Plant Species of Conservation Importance

Monthly monitoring of a total of eight (8) individuals of the plant species of conservation importance which are recommended to be preserved *in-situ*, were implemented by the Qualified Botanist (QB) under Contract 5 and Contract 6 during the reporting period.

The condition of the individual was closely monitored and reviewed by QB. Application of termiticide was carried out at the individual of *Aquilaria sinensis* (Tree No. U041) under Contract 5. No obvious old termite tracks were found at the individual during the reporting period. Wound wood development was observed at the individual of *Gmelina chinensis* (Tree No. U042) under Contract 5. Application of pesticide was conducted by QB. No fungal fruiting bodies were found at the individual of *Aquilaria sinensis* (Tree No. U042) under Contract 5. Application of pesticide was conducted by QB. No fungal fruiting bodies were found at the individual of *Aquilaria sinensis* (Tree No. U043) under Contract 5 and application of fungicide was carried out by QB. Staking was readjusted for both individuals of *Aquilaria sinensis* (Tree No. U041) under Contract 5 for providing support to the individuals.

As advised by Contract 6, three (3) individuals of *Aquilaria sinensis* (Tree No. A9, A10, A11) under Contract 6 were found to be felled illegally on 21 August 2023. The case was reported to the Hong Kong Police and EPD on 21 August 2023.

The ET will continue to monitor the implementation of monitoring of *in-situ* preserved plant species of conservation importance.

## 7.6.2 Transplanted Plant Species of Conservation Importance

With the approval from EPD, the translocation of the two (2) individuals of *Aquilaria sinensis* to temporary holding nursery in Tai Po as stipulated in the revised Proposal for Plant Species of Conservation Importance for Contract 6 was completed on 29 September 2023. Monthly monitoring and maintenance works (e.g. weeding and watering) for the transplanted individuals for maintain the plant health and survival were carried out until translocation to the receptor site.

# 8 Implementation Status of Environmental Mitigation Measures

A summary of the Environmental Mitigation Implementation Schedule is presented in **Appendix C**. The necessary mitigation measures were implemented properly for the Project.

## 9 Summary of Exceedances of the Environmental Quality Performance Limit

No Action/Limit Level exceedance was recorded for the impact air quality monitoring (1-hour TSP) in the reporting period.

No Action/Limit Level exceedance was recorded for the construction noise monitoring in the reporting period.

One (1) Limit Level exceedance was recorded for impact water quality monitoring in the reporting period. The investigations on the Limit Level exceedance was conducted and the result was summarised in **Section 4.7**.

No Action/Limit Level exceedance was recorded for impact ecological monitoring in the reporting period.

Cumulative statistics on exceedance are summarised in Appendix K.

## 10 Summary of Complaints, Notification of Summons and Successful Prosecutions

There was no environmental complaint, notification of summons or prosecution recorded in the reporting period.

Statistics on complaints, notifications of summons, successful prosecutions are summarised in **Appendix K**.

# **11 Future Key Issues**

## 11.1 Construction Programme for the Coming Reporting Period

Works to be undertaken in the next monitoring period of November 2023 are summarised in **Table 11.1** below, together with the key issues and the key mitigation measures.

The ET will keep track on the construction works to confirm compliance of environmental requirements and the proper implementation of all necessary mitigation measures. The ET will also recommend to the Contractors about the environmental toolbox topics on the abovementioned key issues for the next reporting period.

## 11.2 Monitoring Schedule for the Coming Reporting Period

The tentative schedules for environmental monitoring in November 2023 are provided in **Appendix L**.

## Table 11.1: Major Activities for the next Reporting Period

| Activities  | Key Issues   | Key Mitigation Measures  |
|---|--|--|
| Contract No. NL/2020/05 ("Contract 5")  |  |  |
| Tung Chung New Town Extension – Site Formation and Infrastructu   | re Works at Ma Wan Chung   |  |
| <ul> <li>Defective Work at Part D;</li> <li>Excavation Work, Excavation for Retaining Wall, Temporary ELS Works (Sheet-piling and Excavation), Drainage Work (Excavation, Pipe Installation and Concreting), Sheet-pile Installation, Slope Excavation. Temporary ELS Works for Retaining Wall (Sheet-piling and Excavation), Retaining Wall Construction and Road Diversion at Part E;</li> <li>Sheet-pile Installation for Covered Walkway and Water Main, Covered Walkway Construction, Excavation for Drainage Work and Drainpipe Installation at Part F;</li> <li>Slope Excavation, Temporary Pipe-pile Wall, Piling Work and Installation of Socket H-Pile for Abutments and Piers at Part G;</li> </ul>  | <ul> <li>Dust Emission</li> <li>Handling and storage of C&amp;D materials generated from construction activities</li> <li>Noise from plant operation</li> <li>Emission of dark smoke from PMEs</li> <li>Efficiency of wastewater and drainage management</li> <li>Tree Protection</li> </ul> | <ul> <li>Good site practices</li> <li>Regular water spraying on stockpiles</li> <li>Provide tarpaulin sheets coverage on stockpiles</li> <li>Sorting and reuse of C&amp;D materials as far as practicable</li> <li>Use of QPME and noise barrier/acoustic mat</li> <li>Regular maintenance of PMEs</li> <li>Implementation of wastewater and drainage management</li> <li>Retain and protect all existing trees and vegetation within the study area which are not directly affected by the works</li> </ul> |

## **12 Conclusions and Recommendations**

#### General

This EM&A Report presents the findings of the EM&A activities undertaken for the Project – i.e., Tung Chung New Town Extension (TCNTE) development in Tung Chung West (TCW) – during the period from 1 to 31 October 2023 in accordance with the Updated EM&A Manual and the requirements of the Environmental Permit (EP) (No. EP-519/2016).

#### **Air Quality**

No exceedance of Action/Limit Levels was recorded for the air quality monitoring (1-hour TSP) in the reporting period.

#### Noise

No exceedance of Action/Limit Levels was recorded for the construction noise monitoring in the reporting period.

#### Water Quality

One (1) Limit Level exceedance was recorded for impact water quality monitoring.

#### Ecology

No exceedance of Action/Limit Levels was recorded for impact ecological monitoring in the reporting period.

### **Environmental Site Inspections**

Environmental site inspections were carried out during the reporting period. Recommendations on remedial actions were given to the Contractors for the deficiencies identified during the site inspections.

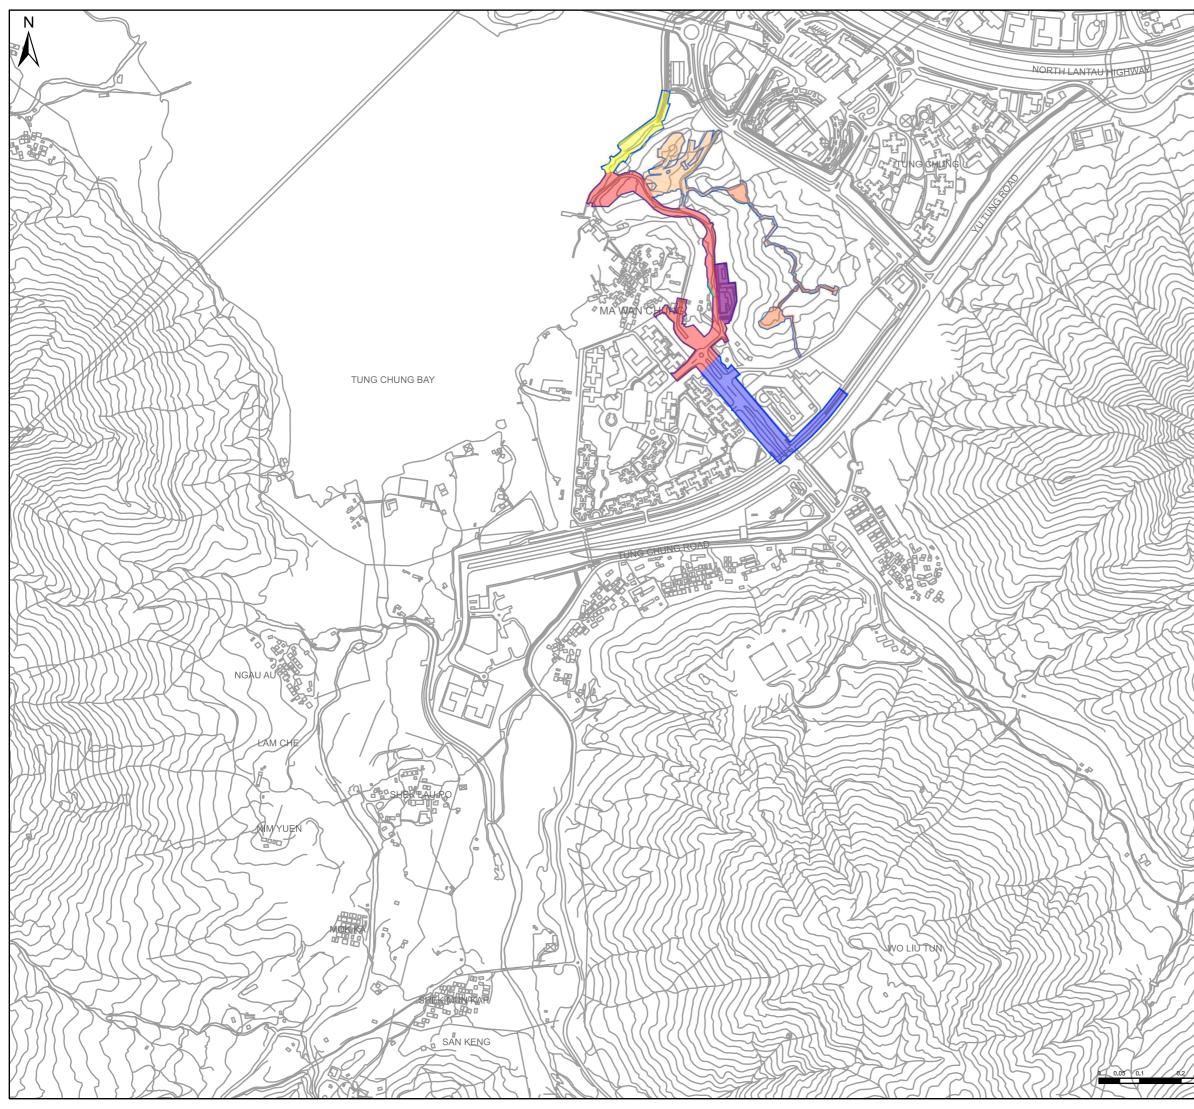

## **Environmental Complaint, Notification of Summons or Prosecution**

There was no environmental complaint, notification of summons or prosecution recorded in the reporting period.

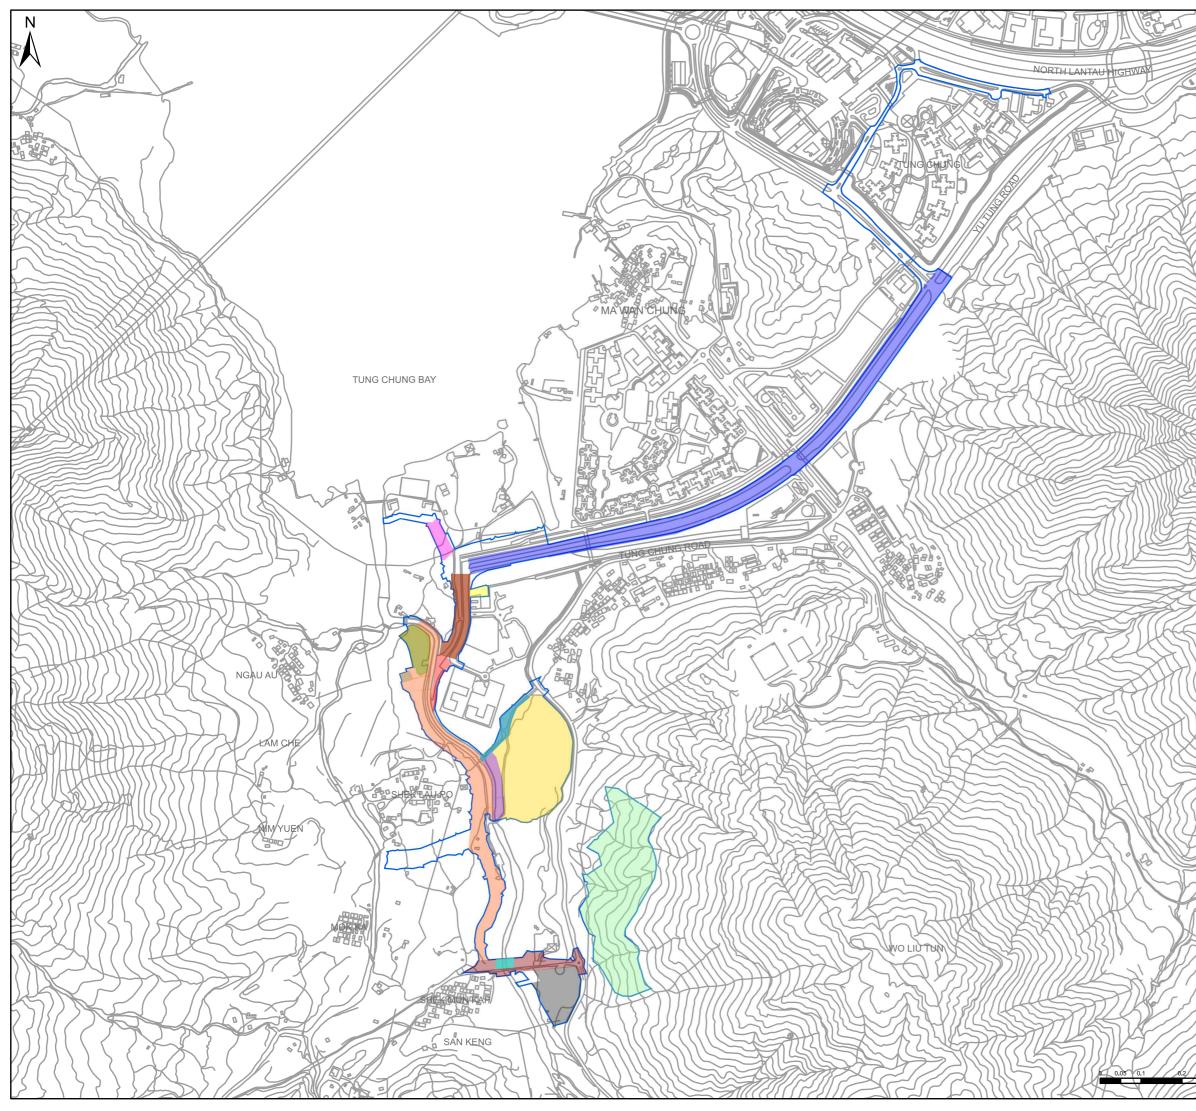

#### Recommendations

The ET will keep track of the construction works to confirm compliance of environmental requirements and the proper implementation of all necessary mitigation measures.

# C. Environmental Mitigation Implementation Schedule

(Relevant pages for the Project works in Tung Chung West, originally extracted from the Updated EM&A Manual, dated May 2018)

## **Environmental Mitigation Implementation Schedule – Tung Chung New Town Extension**

Note: Chapters 1 to 2 of the EIA report present the background information of the Project, identified concurrent projects, objectives and scope for various environmental aspects, and description on alternative options and construction description. Chapters 3 to 12 of the EIA report present the EIA findings and mitigation measures are described below with cross-reference to the EIA report. Chapters 13 to 15 describe the environmental monitoring requirements, summary of environmental outcomes and conclusion.

| EIA<br>Ref. | EM&A<br>Log Ref | Recommended Mitigation Measures   | Objectives of the<br>Recommended<br>Measures & Main<br>Concerns to address | Implementation<br>Agent | Location /<br>Timing         | Implementation<br>Stage | Requirements<br>and / or<br>standards to be<br>achieved   |
|-------------|-----------------|---|--|-------------------------|------------------------------|-------------------------|---|
| Common      | Mitigation      | Measures (Applicable to ALL Project Components, including D   | Ps and Non-DPs)  |                         |                              |                         |   |
| Construc    | ction Dust In   | npact   |  |                         |                              |                         |   |
| S3.4.6      | D1              | Water spraying every hour on exposed worksites and haul road.   | Minimize dust impact at<br>the nearby sensitive<br>receivers               | Contractor              | All<br>construction<br>sites | Construction stage      | <ul> <li>APCO</li> <li>To control the dust impact to meet HKAQO and TM-EIAO criteria</li> </ul> |
| S3.4.6      | D2              | The contractor shall follow the procedures and requirements<br>given in the Air Pollution Control (Construction Dust)<br>Regulation   | Minimize dust impact at<br>the nearby sensitive<br>receivers               | Contractor              | All<br>construction<br>sites | Construction stage      | <ul> <li>APCO</li> <li>To control the dust impact to meet HKAQO and TM-EIAO criteria</li> </ul> |
| \$3.4.6     | D3              | <ul> <li>The following dust suppression measures should be incorporated to control the dust nuisance throughout the construction phase:</li> <li>Any excavated or stockpile of dusty material should be covered entirely by impervious sheeting or sprayed with water to maintain the entire surface wet and then removed or backfilled or reinstated where practicable within 24 hours of the excavation or unloading;</li> <li>Any dusty materials remaining after a stockpile is removed should be wetted with water and cleared from the surface of roads;</li> </ul> | Minimize dust impact at<br>the nearby sensitive<br>receivers               | Contractor              | All<br>construction<br>sites | Construction stage      | <ul> <li>APCO</li> <li>To control the dust impact to meet HKAQO and TM-EIAO criteria</li> </ul> |

| EIA<br>Ref. | EM&A<br>Log Ref | Recommended Mitigation Measures   | Objectives of the<br>Recommended<br>Measures & Main<br>Concerns to address | Implementation<br>Agent | Location /<br>Timing | Implementation<br>Stage | Requirements<br>and / or<br>standards to be<br>achieved |
|-------------|-----------------|---|--|-------------------------|----------------------|-------------------------|---|
|             |                 | • A stockpile of dusty material should not be extended beyond the pedestrian barriers, fencing or traffic cones;  |  |                         |                      |                         |   |
|             |                 | • The load of dusty materials on a vehicle leaving a construction site should be covered entirely by impervious sheeting to ensure that the dusty materials do not leak from the vehicle;   |  |                         |                      |                         |   |
|             |                 | • Where practicable, vehicle washing facilities with high pressure water jet should be provided at every discernible or designated vehicle exit point. The area where vehicle washing takes place and the road section between the washing facilities and the exit point should be paved with concrete, bituminous materials or hardcores;                          |  |                         |                      |                         |   |
|             |                 | • When there are open excavation and reinstatement works, hoarding of not less than 2.4m high should be provided as far as practicable along the site boundary with provision for public crossing. Good site practice shall also be adopted by the Contractor to ensure the conditions of the hoardings are properly maintained throughout the construction period; |  |                         |                      |                         |   |
|             |                 | • The portion of any road leading only to construction site that is within 30m of a vehicle entrance or exit should be kept clear of dusty materials;   |  |                         |                      |                         |   |
|             |                 | • Surfaces where any pneumatic or power-driven drilling, cutting, polishing or other mechanical breaking operation takes place should be sprayed with water or a dust suppression chemical continuously;  |  |                         |                      |                         |   |
|             |                 | • Any area that involves demolition activities should be sprayed with water or a dust suppression chemical immediately prior to, during and immediately after the activities so as to maintain the entire surface wet;  |  |                         |                      |                         |   |
|             |                 | • Where a scaffolding is erected around the perimeter of a building under construction, effective dust screens,   |  |                         |                      |                         |   |

| EIA<br>Ref. | EM&A<br>Log Ref | Recommended Mitigation Measures  | Objectives of the<br>Recommended<br>Measures & Main<br>Concerns to address | Implementation<br>Agent | Location /<br>Timing                       | Implementation<br>Stage | Requirements<br>and / or<br>standards to be<br>achieved |
|-------------|-----------------|--|--|-------------------------|--|-------------------------|---|
|             |                 | sheeting or netting should be provided to enclose the<br>scaffolding from the ground floor level of the building, or<br>a canopy should be provided from the first floor level up to<br>the highest level of the scaffolding;  |  |                         |  |                         |   |
|             |                 | • Any skip hoist for material transport should be totally enclosed by impervious sheeting;   |  |                         |  |                         |   |
|             |                 | • Every stock of more than 20 bags of cement or dry pulverised fuel ash (PFA) should be covered entirely by impervious sheeting or placed in an area sheltered on the top and the 3 sides;   |  |                         |  |                         |   |
|             |                 | • Cement or dry PFA delivered in bulk should be stored in a closed silo fitted with an audible high level alarm which is interlocked with the material filling line and no overfilling is allowed;   |  |                         |  |                         |   |
|             |                 | • Loading, unloading, transfer, handling or storage of bulk<br>cement or dry PFA should be carried out in a totally<br>enclosed system or facility, and any vent or exhaust should<br>be fitted with an effective fabric filter or equivalent air<br>pollution control system; and   |  |                         |  |                         |   |
|             |                 | • Exposed earth should be properly treated by compaction, turfing, hydroseeding, vegetation planting or sealing with latex, vinyl, bitumen, shortcrete or other suitable surface stabiliser within six months after the last construction activity on the construction site or part of the construction site where the exposed earth lies. |  |                         |  |                         |   |
| \$3.4.6     | D4              | Implement regular dust monitoring under EM&A programme during the construction stage.  | Monitoring of dust impact  | Contractor              | Selected<br>dust<br>monitoring<br>stations | Construction stage      | • TM-EIAO   |

| EIA<br>Ref. | EM&A<br>Log Ref | Recommended Mitigation Measures   | Objectives of the<br>Recommended<br>Measures & Main<br>Concerns to address | Implementation<br>Agent | Location /<br>Timing                              | Implementation<br>Stage | Requirements<br>and / or<br>standards to be<br>achieved |
|-------------|-----------------|---|--|-------------------------|---|-------------------------|---|
| Construc    | tion Noise      |   |  |                         |   |                         |   |
| S4.3.4      | N1              | <ul> <li>Implement the following good site management practices:</li> <li>only well-maintained plant should be operated on-site and plant should be serviced regularly during the construction programme;</li> <li>machines and plant (such as trucks, cranes) that may be in intermittent use should be shut down between work periods or should be throttled down to a minimum;</li> <li>plant known to emit noise strongly in one direction, where possible, be orientated so that the noise is directed away from nearby NSRs;</li> <li>silencers or mufflers on construction equipment should be properly fitted and maintained during the construction works;</li> <li>mobile plant should be sited as far away from NSRs as possible and practicable;</li> <li>material stockpiles, site office and other structures should be effectively utilised, where practicable, to screen noise from on-site construction activities.</li> </ul> | Control construction<br>airborne noise                                     | Contractor              | All<br>construction<br>sites where<br>practicable | Construction stage      | • Annex 5, TM-<br>EIAO                                  |
| S4.3.4      | N2              | Use of quiet plant which should be made reference to the<br>Powered Mechanical Equipment (PME) listed in the<br>Technical Memorandum or the Quality Powered Mechanical<br>Equipment (QPME) / other commonly used PME listed in<br>Environmental Protection Department (EPD) web pages as far<br>as possible which includes the Sound Power Level (SWLs)<br>for specific quiet PME.  | Reduce the noise levels<br>of plant items                                  | Contractor              | All<br>construction<br>sites where<br>practicable | Construction stage      | • Annex 5, TM-<br>EIAO                                  |

| S5.4.3      | W1              | <u>General Construction Activities</u><br>In accordance with the Practice Note for Professional Persons<br>on Construction Site Drainage, Environmental Protection<br>Department, 1994 (ProPECC PN1/94), best management<br>practices should be implemented on site as far as practicable.<br>The best practices are detailed below:  | quality impact from<br>construction site runoff<br>and general construction<br>activities | Contractor              | All<br>construction<br>sites where<br>applicable | Construction stage      | <ul> <li>Water Pollution<br/>Control<br/>Ordinance</li> <li>ProPECC<br/>PN1/94</li> <li>TM-EIAO</li> </ul> |
|             |                 | • At the start of site establishment, perimeter cut-off drains to direct off-site water around the site should be constructed with internal drainage works. Channels, earth bunds or sand bag barriers should be provided on site to direct stormwater to silt removal facilities.;   |   |                         |  |                         | • TM-DSS   |
|             |                 | • Diversion of natural stormwater should be provided as far<br>as possible. The design of temporary on-site drainage<br>should prevent runoff going through site surface,<br>construction machinery and equipment in order to avoid<br>or minimize polluted runoff. Sedimentation tanks with<br>sufficient capacity, constructed from pre-formed<br>individual cells of approximately 6 to 8 m3 capacities, are<br>recommended as a general mitigation measure which can<br>be used for settling surface runoff prior to disposal. The<br>system capacity shall be flexible and able to handle<br>multiple inputs from a variety of sources and suited to<br>applications where the influent is pumped; |   |                         |  |                         |  |
|             |                 | • The dikes or embankments for flood protection should be<br>implemented around the boundaries of earthwork areas.<br>Temporary ditches should be provided to facilitate the<br>runoff discharge into an appropriate watercourse, through<br>a silt/sediment trap. The silt/sediment traps should be<br>incorporated in the permanent drainage channels to<br>enhance deposition rates;   |   |                         |  |                         |  |
|             |                 | • The design of efficient silt removal facilities should be   |   |                         |  |                         |  |

| EIA<br>Ref. | EM&A<br>Log Ref | Recommended Mitigation Measures  | Objectives of the<br>Recommended<br>Measures & Main<br>Concerns to address | Implementation<br>Agent | Location /<br>Timing | Implementation<br>Stage | Requirements<br>and / or<br>standards to be<br>achieved |
|-------------|-----------------|--|--|-------------------------|----------------------|-------------------------|---|
|             |                 | based on the guidelines in Appendix A1 of ProPECC PN 1/94. The detailed design of the sand/silt traps should be undertaken by the contractor prior to the commencement of construction;  |  |                         |                      |                         |   |
|             |                 | • Construction works should be programmed to minimize<br>surface excavation works during the rainy seasons (April<br>to September). All exposed earth areas should be<br>completed and vegetated as soon as possible after<br>earthworks have been completed. If excavation of soil<br>cannot be avoided during the rainy season, or at any time<br>of year when rainstorms are likely, exposed slope surfaces<br>should be covered by tarpaulin or other means; |  |                         |                      |                         |   |
|             |                 | • All drainage facilities and erosion and sediment control structures should be regularly inspected and maintained to ensure proper and efficient operation at all times and particularly following rainstorms. Deposited silt and grit should be removed regularly and disposed of by spreading evenly over stable, vegetated areas;  |  |                         |                      |                         |   |
|             |                 | • If the excavation of trenches in wet periods is necessary, it should be dug and backfilled in short sections wherever practicable. Water pumped out from trenches or foundation excavations should be discharged into storm drains via silt removal facilities;  |  |                         |                      |                         |   |
|             |                 | • All open stockpiles of construction materials (for example, aggregates, sand and fill material) should be covered with tarpaulin or similar fabric during rainstorms. Measures should be taken to prevent the washing away of construction materials, soil, silt or debris into any drainage system;   |  |                         |                      |                         |   |
|             |                 | • Manholes (including newly constructed ones) should<br>always be adequately covered and temporarily sealed so<br>as to prevent silt, construction materials or debris being<br>washed into the drainage system and storm runoff being   |  |                         |                      |                         |   |

| EIA<br>Ref. | EM&A<br>Log Ref | Recommended Mitigation Measures  | Objectives of the<br>Recommended<br>Measures & Main<br>Concerns to address | Implementation<br>Agent | Location /<br>Timing | Implementation<br>Stage | Requirements<br>and / or<br>standards to be<br>achieved |
|-------------|-----------------|--|--|-------------------------|----------------------|-------------------------|---|
|             |                 | directed into foul sewers;   |  |                         |                      |                         |   |
|             |                 | • Precautions to be taken at any time of year when rainstorms are likely, actions to be taken when a rainstorm is imminent or forecasted, and actions to be taken during or after rainstorms are summarized in Appendix A2 of ProPECC PN 1/94. Particular attention should be paid to the control of silty surface runoff during storm events;   |  |                         |                      |                         |   |
|             |                 | • All vehicles and plant should be cleaned before leaving a construction site to ensure no earth, mud, debris and the like is deposited by them on roads. An adequately designed and sited wheel washing facilities should be provided at every construction site exit where practicable. Wash-water should have sand and silt settled out and removed at least on a weekly basis to ensure the continued efficiency of the process. The section of access road leading to, and exiting from, the wheel-wash bay to the public road should be prevent vehicle tracking of soil and silty water to public roads and drains; |  |                         |                      |                         |   |
|             |                 | • Oil interceptors should be provided in the drainage system<br>downstream of any oil/fuel pollution sources. The oil<br>interceptors should be emptied and cleaned regularly to<br>prevent the release of oil and grease into the storm water<br>drainage system after accidental spillage. A bypass should<br>be provided for the oil interceptors to prevent flushing<br>during heavy rain;   |  |                         |                      |                         |   |
|             |                 | • Construction solid waste, debris and rubbish on site should be collected, handled and disposed of properly to avoid water quality impacts;   |  |                         |                      |                         |   |
|             |                 | • All fuel tanks and storage areas should be provided with locks and sited on sealed areas, within bunds of a capacity equal to 110% of the storage capacity of the largest tank to prevent spilled fuel oils from reaching water sensitive  |  |                         |                      |                         |   |

|--------------|-----------------|---|--|---------------------------------------|-----------------------|--|--|
|              |                 | development near Tung Chung Stream.<br>According to the latest RODP, a 30m buffer zone will be<br>zoned as "CA". Precast structures or other similar<br>approaches will be used to prevent / minimise any<br>construction works in river and thus to avoid any direct<br>water quality impact. Good site management as stipulated<br>in ProPECC PN1/94 will be fully implemented to avoid<br>polluted liquid or solid wastes from falling into the river<br>waters. |  |                                       |                       |  | Circular No.<br>2/2004.<br>• ETWB TC(W)<br>No.5/2005<br>Protection of<br>natural<br>streams/rivers<br>from adverse<br>impacts arising<br>from<br>construction<br>works |
| S11.7<br>MM8 | LV8             | Preservation of Natural Coastline – The natural coastline<br>along the proposed "RO" of the RODP in TCW should be<br>preserved. The remaining natural shorelines in Tung<br>Chung Bay including sandy shores close to the Tung<br>Chung old pier will be conserved as a Waterfront Park<br>according to the latest RODP.  | Preservation of Natural<br>Coastline                                       | Relevant<br>Government<br>Departments | Onsite where possible | Prior to<br>Construction &<br>Construction Phase |  |
| S11.7<br>MM9 | LV9             | Providing Natural Rock Material/ Planting for Artificial<br>Seawall – There would be inevitable permanent losses of<br>marine waters (seabed and water column), and direct<br>impacts on existing artificial seawalls due to the<br>reclamation. To minimize the impacts, the design of the<br>future seawall like 'eco-shoreline' could be improved to<br>provide high ecological functions and mitigate the impact<br>of the loss.                                | Mitigate the impacts on existing artificial seawalls                       | Relevant<br>Government<br>Departments | Onsite where possible | Prior to<br>Construction &<br>Construction Phase |  |
|              |                 | An 'eco-shoreline' is any shoreline which provides<br>beneficial functions to the local ecosystem through a range<br>of active or passive solutions, whilst providing coastal<br>protection. By means of using natural rock materials for<br>artificial seawall and considering to introduce a native<br>vegetation buffer directly behind the top of seawalls as<br>appropriate to create habitat, shelter and a source of food                                    |  |                                       |                       |  |  |

| EIA<br>Ref.   | EM&A<br>Log Ref | Recommended Mitigation Measures  | Objectives of the<br>Recommended Measures<br>& Main Concerns to<br>address                  | Implementati<br>on Agent                                  | Location   | Implementation<br>Stage  | Requirements<br>and / or<br>standards to be<br>achieved  |
|---------------|-----------------|--|---|---|--|--|--|
|               |                 | for benefiting both terrestrial and aquatic species along the<br>foreshore, these measures can help to enhance the<br>ecological functions and 'natural-look' of the shoreline,<br>and the potential impacts will be mitigated.  |   |   |  |  |  |
| Landscap      | e and Visua     | l (Operational Phase)  |   |   |  |  |  |
| S11.7<br>MM10 | LV10            | Compensatory Planting – Compensatory planting for<br>felled trees shall be provided to the satisfaction of relevant<br>Government departments. Required numbers and locations<br>of compensatory trees shall be determined and agreed<br>separately with Government during the Tree Removal<br>Application process under DEVB TCW No. 10/2013 and<br>LAO PN 7/2007.<br>The location of compensatory planting is proposed at the<br>potential open areas such as open spaces, amenity areas,<br>open areas of the streetscapes including roadside planting,<br>as well as the open areas within development lots.<br>The species to be planted should be all native species,<br>taken "Characteristics of Major Local Tree Species<br>Propagated by AFCD" as a reference. A search of species<br>to be planted will be conducted in a further detailed stage. | Compensate for trees and<br>shrubs lost due to the<br>Project                               | Relevant<br>Government<br>Departments /<br>Private Sector | Onsite where<br>possible,<br>particular-ly<br>for TCW area | Prior to<br>Construction,<br>Construction Phase<br>& Maintenance in<br>Operation Phase | <ul> <li>DEVB TC(W)<br/>No.10/2013<br/>and LAO PN<br/>7/2007.</li> <li>GLTM of the<br/>Development<br/>Bureau,<br/>Guidelines on<br/>Tree<br/>Preservation<br/>during<br/>Development<br/>(April, 2015)</li> </ul> |
| S11.7<br>MM11 | LV11            | Woodland Restoration – A search of area to mitigate the<br>loss of woodland has been conducted. Priority has been<br>given to the practicability of compensation of woodland<br>within the boundary of RODP. Given the nature of the<br>project is to provide development opportunities to satisfy<br>the needs for the society in general and the aspirations of<br>local communities, compensation of woodland is only<br>possible for the areas beyond the RODP. It is considered<br>that the areas adjoining the woodlands near the existing<br>services reservoirs, and hillsides to the east of Tung Chung<br>Road, would be suitable locations. The advantage of these<br>locations is that there are existing woodlands immediately  | Reprovide areas of<br>woodland to compensate<br>for those areas of quality<br>woodland lost | CEDD /AFCD  | In areas<br>identified and<br>as agreed with<br>AFCD       | Prior to<br>Construction,<br>Construction Phase<br>& Maintenance in<br>Operation Phase | <ul> <li>DEVB<br/>Technical<br/>Circular Works<br/>10/2013- Tree<br/>Preservation</li> <li>GLTM of the<br/>Development<br/>Bureau,<br/>Guidelines on<br/>Tree<br/>Preservation</li> </ul>                          |

### Equipment Verification Report (TSP)

#### **Equipment Calibrated:**

| Туре:          | Laser Dust monitor |
|----------------|--------------------|
| Manufacturer:  | Sibata LD – 3B     |
| Serial No.     | 336338             |
| Equipment Ref: | NA                 |
| Job Order      | HK2240047          |
|                |                    |

#### Standard Equipment:

| Higher Volume Sampler (TSP)    |   |
|--------------------------------|---|
| AUES office (calibration room) |   |
| HVS 018                        |   |
| 13 September 2022              |   |
|                                | AUES office (calibration room)<br>HVS 018 |

### **Equipment Verification Results:**

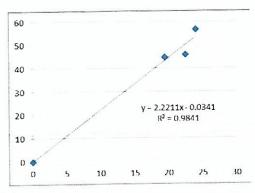

Verification Date:

14 October 2022

| Hour      | Time          | Mean<br>Temp °C | Mean<br>Pressure<br>(hPa) | Concentration in ug/m <sup>3</sup><br>(Standard Equipment) | Total Count<br>(Calibrated Equipment) | Count/Minute<br>(Total Count/min) |
|-----------|---------------|-----------------|---------------------------|--|---------------------------------------|-----------------------------------|
| 2hr15mins | 09:33 ~ 11:48 | 26.9            | 1012.1                    | 44.6   | 2621                                  | 19.5                              |
| 2hr01mins | 11:51 ~ 13:52 | 26.9            | 1012.1                    | 45.7   | 2722                                  | 22.6                              |
| 2hr01mins | 13:55 ~ 15:56 | 26.9            | 1012.1                    | 56.6   | 2922                                  | 24.1                              |

#### Linear Regression of Y or X

| Slope (K-factor):           | 2.2211 (µg/m <sup>3</sup> )/CPM |
|-----------------------------|---------------------------------|
| Correlation Coefficient (R) | 0.9920                          |
| Date of Issue               | 17 October 2022                 |

#### Remarks:

1. Strong Correlation (R>0.8)

Factor 2.2211 (µg/m<sup>3</sup>)/CPM should be applied for TSP monitoring 2.

\*If R<0.5, repair or re-verification is required for the equipment

ANALYTICAL CHEMISTRY & TESTING SERVICES

#### SUB-CONTRACTING REPORT HK2321489 WORK ORDER : MR MAGNUM FAN CONTACT ENVIROTECH SERVICES CO. CLIENT SUB-BATCH : 1 ADDRESS : RM 712, 7/F, MY LOFT 9 HOI WING ROAD, DATE RECEIVED : 2-JUN-2023 TUEN MUN, N.T., HK DATE OF ISSUE : 8-JUN-2023 NO. OF SAMPLES : 1 PROJECT : ----CLIENT ORDER

#### General Comments

- No sample is received in this Work Order. The report presents non-laboratory testing data only.
- Sample information (Project name, Sample ID, Sampling date/time, etc.) is provided by client.
- Result(s) of sample(s) is/are reported on as received basis, unless otherwise specified. The result(s) is/are related only to the item(s) tested.
- Calibration was subcontracted to Envirotech Services Company.

#### Signatories

This document has been signed by those names that appear on this report and are the authorised signatories

| ADDRESS | : RM 712, 7/F, MY LOFT 9 HOI WING ROAD,<br>TUEN MUN, N.T., HK | SUB-BATCH: 1DATE RECEIVED: 2-JUN-2023DATE OF ISSUE: 8-JUN-2023 |
| PROJECT | : <u></u>   | NO. OF SAMPLES : 1<br>CLIENT ORDER :                           |

#### General Comments

No sample is received in this Work Order. The report presents non-laboratory testing data only.

- Sample information (Project name, Sample ID, Sampling date/time, etc.) is provided by client. •
- Result(s) of sample(s) is/are reported on as received basis, unless otherwise specified. The result(s) is/are related only to the • item(s) tested.
- Calibration was subcontracted to Envirotech Services Company. •

#### Signatories

This document has been signed by those names that appear on this report and are the authorised signatories

#### General Comments

 Sample(s) was/ were submitted by client. Sample(s) arrived laboratory in amblent condition. The result(s) related only to the item(s) tested.

- Sample information (Project name, Sample ID, Sampling date/time, etc.) is provided by client.
- Result(s) of sample(s) is/are reported on as received basis, unless otherwise specified.
- Calibration was subcontracted to and analysed by Envirotech Services Company

Notes 1. Major site activities carried out during the reporting period are summarized in Section 1.4 of the monthly EM&A report. 2. Weather conditions during monitoring are presented in the data tables above. 3. QA/QC requirements as stipulated in the EM&A Manual were carried out during measurement.

F5. Air Quality Monitoring Event and Action Plan

#### Table F5.1: Event and Action Plan for Construction Air Quality (Action Level)

| Event   | Action  |  |  |   |  |  |  |
|---|---|--|--|---|--|--|--|
|   | ET  | IEC  | ER   | Contractor  |  |  |  |
| Action Level  |   |  |  |   |  |  |  |
| Exceedance for one sample                               | <ol> <li>Identify source, investigate the causes of<br/>exceedance and propose remedial measures;</li> <li>Inform IEC and ER;</li> <li>Repeat measurement to confirm finding;</li> <li>Increase monitoring frequency to daily.</li> </ol>   | <ol> <li>Check monitoring data submitted<br/>by ET;</li> <li>Check Contractor's working<br/>method.</li> </ol>   | 1. Notify Contractor.  | <ol> <li>Rectify any unacceptable practice;</li> <li>Amend working methods if<br/>appropriate.</li> </ol>   |  |  |  |
| Exceedance for<br>two or more<br>consecutive<br>samples | <ol> <li>Identify source;</li> <li>Inform IEC and ER;</li> <li>Advise the ER on the effectiveness of the proposed remedial measures;</li> <li>Repeat measurements to confirm findings;</li> <li>Increase monitoring frequency to daily;</li> <li>Discuss with IEC and Contractor on remedial actions required;</li> <li>If exceedance continues, arrange meeting with IEC and ER;</li> <li>If exceedance stops, cease additional monitoring.</li> </ol> | <ol> <li>Check monitoring data submitted<br/>by ET;</li> <li>Check Contractor's working<br/>method;</li> <li>Discuss with ET and Contractor<br/>on possible remedial measures;</li> <li>Advise the ET on the<br/>effectiveness of the proposed<br/>remedial measures;</li> <li>Supervise Implementation of<br/>remedial measures.</li> </ol> | <ol> <li>Confirm receipt of notification of<br/>failure in writing;</li> <li>Notify Contractor;</li> <li>Ensure remedial measures<br/>properly implemented.</li> </ol> | <ol> <li>Submit proposals for remedial to ER<br/>within 3 working days of notification;</li> <li>Implement the agreed proposals;</li> <li>Amend proposal if appropriate.</li> </ol> |  |  |  |

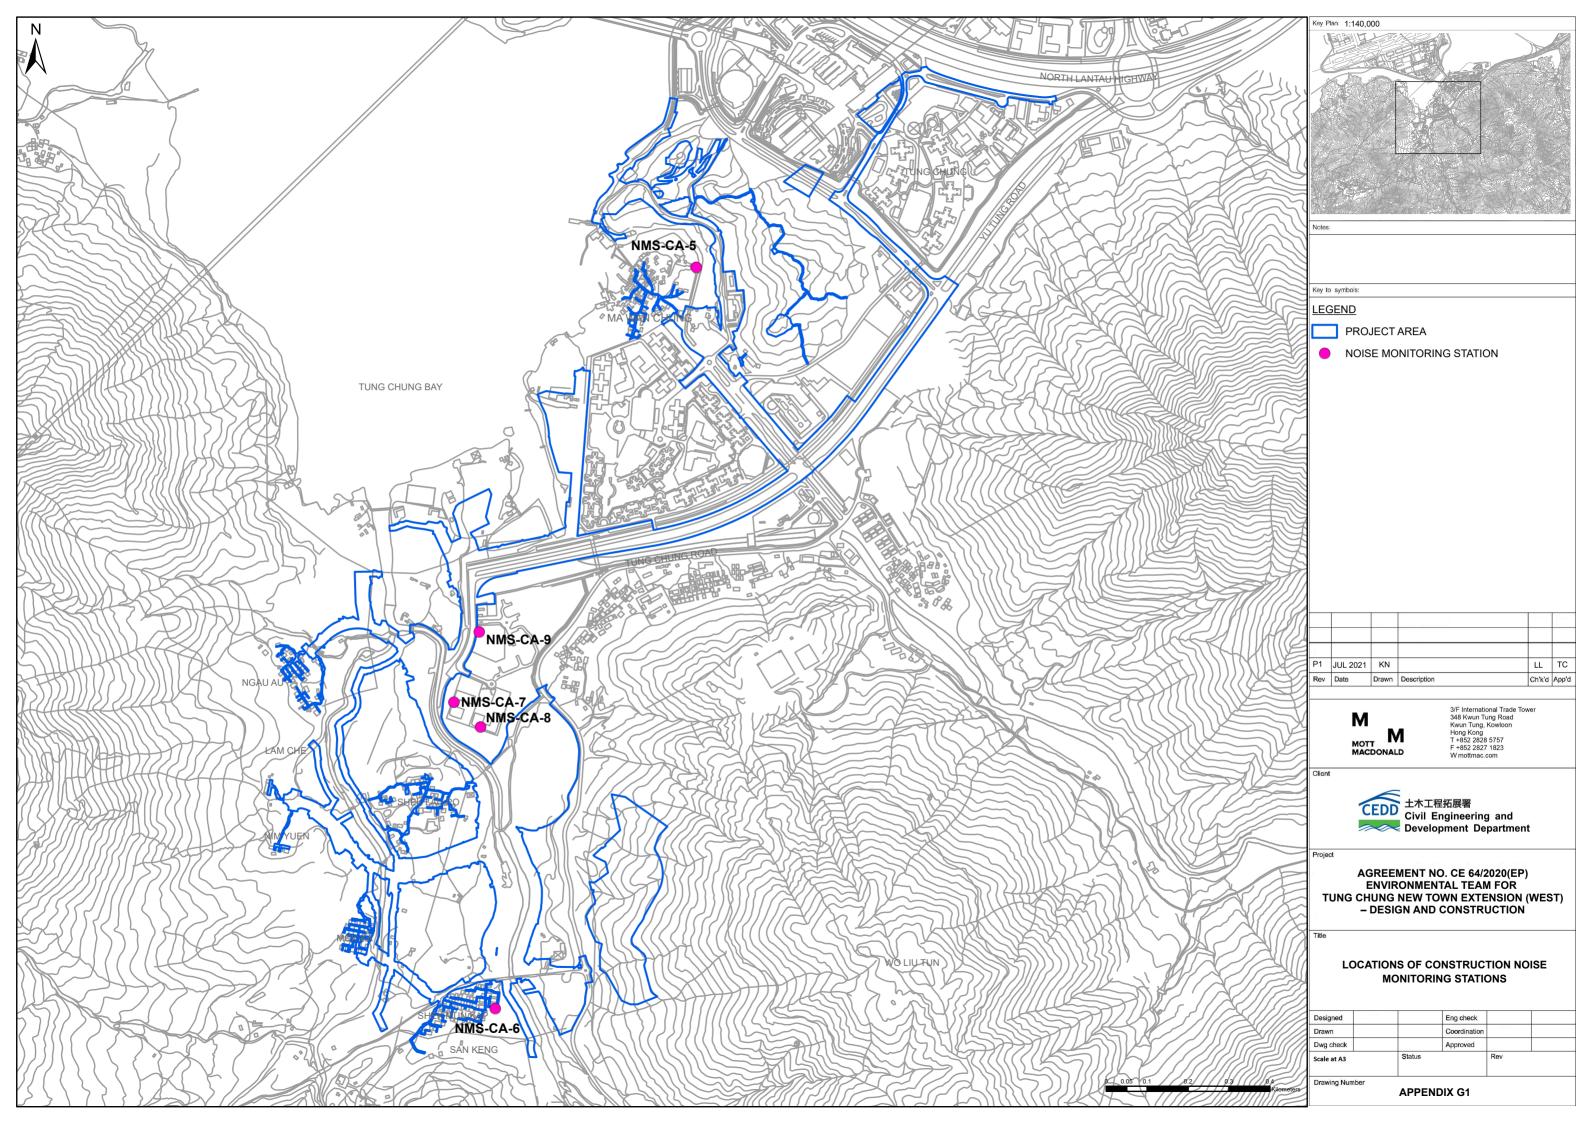

### Table F5.2: Event and Action Plan for Construction Air Quality (Limit Level)

| Event   | Action   |  |   |  |  |  |  |
|---|--|--|---|--|--|--|--|
|   | ET   | IEC  | ER  | Contractor   |  |  |  |
| Limit Level   |  |  |   |  |  |  |  |
| Exceedance for<br>one sample                            | <ol> <li>Identify source, investigate the causes of<br/>exceedance and propose remedial<br/>measures;</li> <li>Inform ER, Contractor and EPD;</li> <li>Repeat measurement to confirm finding;</li> <li>Increase monitoring frequency to daily;</li> <li>Assess effectiveness of Contractor's<br/>remedial actions and keep IEC, EPD and<br/>ER informed of the results.</li> </ol>   | <ol> <li>Check monitoring data submitted<br/>by ET;</li> <li>Check Contractor's working<br/>method;</li> <li>Discuss with ET and Contractor<br/>on possible remedial measures;</li> <li>Advise the ER on the<br/>effectiveness of the proposed<br/>remedial measures;</li> <li>Supervise implementation of<br/>remedial measures.</li> </ol> | <ol> <li>Confirm receipt of notification of<br/>failure in writing;</li> <li>Notify Contractor;</li> <li>Ensure remedial measures properly<br/>implemented</li> </ol>   | <ol> <li>Take immediate action to avoid<br/>further exceedance;</li> <li>Submit proposals for remedial<br/>actions to IEC within 3 working days<br/>of notification;</li> <li>Implement the agreed proposals;</li> <li>Amend proposal if appropriate.</li> </ol>   |  |  |  |
| Exceedance for<br>two or more<br>consecutive<br>samples | <ol> <li>Notify IEC, ER, Contractor and EPD;</li> <li>Identify source;</li> <li>Repeat measurement to confirm findings;</li> <li>Increase monitoring frequency to daily;</li> <li>Carry out analysis of Contractor's working<br/>procedures to determine possible<br/>mitigation to be implemented;</li> <li>Arrange meeting with IEC and ER to<br/>discuss the remedial actions to be taken;</li> <li>Assess effectiveness of Contractor's<br/>remedial actions and keep IEC, EPD and<br/>ER informed of the results;</li> <li>If exceedance stops, cease additional<br/>monitoring.</li> </ol> | <ol> <li>Discuss amongst ER, ET, and<br/>Contractor on the potential<br/>remedial actions;</li> <li>Review Contractor's remedial<br/>actions whenever necessary to<br/>assure their effectiveness and<br/>advise the ER accordingly;</li> <li>Supervise the implementation of<br/>remedial measures.</li> </ol>                              | <ol> <li>Confirm receipt of notification of<br/>failure in writing;</li> <li>Notify Contractor;</li> <li>In consultation with the IEC, agree<br/>with the Contractor on the remedial<br/>measures to be implemented;</li> <li>Ensure remedial measures properly<br/>implemented;</li> <li>If exceedance continues, consider<br/>what portion of the work is<br/>responsible and instruct the<br/>Contractor to stop that portion of<br/>work until the exceedance is<br/>abated.</li> </ol> | <ol> <li>Take immediate action to avoid<br/>further exceedance;</li> <li>Submit proposals for remedial<br/>actions to IEC within 3 working days<br/>of notification;</li> <li>Implement the agreed proposals;</li> <li>Resubmit proposals if problem still<br/>not under control;</li> <li>Stop the relevant portion of works as<br/>determined by the ER until the<br/>exceedance is abated.</li> </ol> |  |  |  |

核證

DATE OF TEST / 測試日期 : 28 January 2023

#### TEST RESULTS / 測試結果

The results apply to the particular unit-under-test only. The results are detailed in the subsequent page(s).

The test equipment used for calibration are traceable to National Standards via :

- The Government of The Hong Kong Special Administrative Region Standard & Calibration Laboratory
- Agilent Technologies / Keysight Technologies
- Fluke Everett Service Center, USA

| Tested By<br>測試 | : _ | H T Wong<br>Assistant Engineer |  |

Calibration & Testing Laboratory

### Certificate of Calibration 校正證書

Certificate No. : C230386 證書編號

- 1. The unit-under-test (UUT) was allowed to stabilize in the laboratory for over 12 hours before the commencement of the test.
- 2. The results presented are the mean of 3 measurements at each calibration point.
- 3. Test equipment :

| Equipment ID | Description                       | Certificate No. |
|--------------|-----------------------------------|-----------------|
| CL130        | Universal Counter                 | C223647         |
| CL281        | Multifunction Acoustic Calibrator | AV210017        |
| TST150A      | Measuring Amplifier               | C221750         |
|              |                                   |                 |

- 4. Test procedure : MA100N.
- 5. Results :
- 5.1 Sound Level Accuracy

| UUT<br>Nominal Value | Measured Value<br>(dB) | Uncertainty of Measured Value<br>(dB) |
|----------------------|------------------------|---------------------------------------|
| 94 dB, 1 kHz         | 93.9                   | ± 0.2                                 |
| 114 dB, 1 kHz        | 113.9                  |                                       |

#### 5.2 Frequency Accuracy

| UUT Nominal Value | Measured Value | Uncertainty of Measured Value |
|-------------------|----------------|-------------------------------|
| (kHz)             | (kHz)          | (Hz)                          |
| 1                 | 1.000          | ± 1                           |

Remark : The uncertainties are for a confidence probability of not less than 95 %.

Note :

Only the original copy or the laboratory's certified true copy is valid.

The values given in this Certificate only relate to the values measured at the time of the test and any uncertainties quoted will not include allowance for the equipment long term drift, variations with environment changes, vibration and shock during transportation, overloading, mis-handling, or the capability of any other laboratory to repeat the measurement. Sun Creation Engineering Limited shall not be liable for any loss or damage resulting from the use of the equipment.

The test equipment used for calibration is traceable to the National Standards as specified in this certificate. This certificate shall not be reproduced except in full, without the prior written approval of this laboratory.

#### TEST CONDITIONS / 測試條件

Temperature / 溫度 : (23 ± 2)°C Line Voltage / 電壓 : --- Relative Humidity / 相對濕度 : (50±25)%

#### . TEST SPECIFICATIONS / 測試規範

Calibration check

DATE OF TEST / 測試日期 : 14 November 2022

#### TEST RESULTS / 測試結果

The results apply to the particular unit-under-test only. The results do not exceed manufacturer's specification. The results are detailed in the subsequent page(s).

The test equipment used for calibration are traceable to National Standards via :

- The Government of The Hong Kong Special Administrative Region Standard & Calibration Laboratory

- Agilent Technologies / Keysight Technologies
- Fluke Everett Service Center, USA

Tested By 測試 C K Lo **Project Engineer** Certified By Date of Issue : 簽發日期 核證

K C Lee Engineer 14 November 2022

The test equipment used for calibration is traceable to the National Standards as specified in this certificate. This certificate shall not be reproduced except in full, without the prior written approval of this laboratory.

Sun Creation Engineering Limited

Calibration & Testing Laboratory

### Certificate of Calibration 校正證書

Certificate No. : C226679 證書編號

- 1. The unit-under-test (UUT) was allowed to stabilize in the laboratory for over 12 hours, and switched on to warm up for over 10 minutes before the commencement of the test.
- 2. Self-calibration was performed before the test.
- 3. The results presented are the mean of 3 measurements at each calibration point.
- 4. Test equipment :

| Equipment ID | Description                         | Certificate No. |
|--------------|-------------------------------------|-----------------|
| CL280        | 40 MHz Arbitrary Waveform Generator | C220381         |
| CL281        | Multifunction Acoustic Calibrator   | AV210017        |

- 5. Test procedure : MA101N.
- 6. Results :
- 6.1 Sound Pressure Level
- 6.1.1 Reference Sound Pressure Level

|               | UUT Setting    |                        |                   |               | d Value        | UUT             | IEC 61672             |
|---------------|----------------|------------------------|-------------------|---------------|----------------|-----------------|-----------------------|
| Range<br>(dB) | Function       | Frequency<br>Weighting | Time<br>Weighting | Level<br>(dB) | Freq.<br>(kHz) | Reading<br>(dB) | Class 1 Spec.<br>(dB) |
| 30 - 130      | L <sub>A</sub> | A                      | Fast              | 94.00         | 1              | 93.3            | $\pm 1.1$             |

#### 6.1.2 Linearity

| UUT Setting   |                |                        |                   | Applie        | UUT            |                 |
|---------------|----------------|------------------------|-------------------|---------------|----------------|-----------------|
| Range<br>(dB) | Function       | Frequency<br>Weighting | Time<br>Weighting | Level<br>(dB) | Freq.<br>(kHz) | Reading<br>(dB) |
| 30 - 130      | L <sub>A</sub> | A                      | Fast              | 94.00         | 1              | 93.3 (Ref.)     |
| -             |                |                        |                   | 104.00        | Γ              | 103.4           |
|               |                |                        |                   | 114.00        |                | 113.4           |

IEC 61672 Class 1 Spec. :  $\pm$  0.6 dB per 10 dB step and  $\pm$  1.1 dB for overall different.

#### 6.2 Time Weighting

|               | UUT Setting    |                        |                   | Applied Value |                | UUT             | IEC 61672             |
|---------------|----------------|------------------------|-------------------|---------------|----------------|-----------------|-----------------------|
| Range<br>(dB) | Function       | Frequency<br>Weighting | Time<br>Weighting | Level<br>(dB) | Freq.<br>(kHz) | Reading<br>(dB) | Class 1 Spec.<br>(dB) |
| 30 - 130      | L <sub>A</sub> | A                      | Fast              | 94.00         | 1              | 93.3            | Ref.                  |
|               |                |                        | Slow              |               |                | 93.3            | $\pm$ 0.3             |

The test equipment used for calibration is traceable to the National Standards as specified in this certificate. This certificate shall not be reproduced except in full, without the prior written approval of this laboratory.

本證書所載校正用之測試器材均可溯源至國際標準。局部複印本證書需先獲本實驗所書面批准。

### Certificate of Calibration 校正證書

Certificate No. : C226679 證書編號

Remarks : - UUT Microphone Model No. : UC-59 & S/N : 16651

- Mfr's Spec. : IEC 61672 Class 1

| - Uncertainties of Applied Value : | 94 dB : 63 Hz - 125 Hz | $\pm 0.35 \text{ dB}$    |
|------------------------------------|------------------------|--------------------------|
|                                    | 250 Hz - 500 Hz        | : ± 0.30 dB              |
|                                    | 1 kHz                  | : ± 0.20 dB              |
|                                    | 2 kHz - 4 kHz          | : ± 0.35 dB              |
|                                    | 8 kHz                  | : ± 0.45 dB              |
|                                    | 16 kHz                 | : ± 0.70 dB              |
|                                    | 104 dB : 1 kHz         | : ± 0.10 dB (Ref. 94 dB) |
|                                    | 114 dB : 1 kHz         | : ± 0.10 dB (Ref. 94 dB) |
|                                    |                        |                          |

- The uncertainties are for a confidence probability of not less than 95 %.

#### Note :

Only the original copy or the laboratory's certified true copy is valid.

The values given in this Certificate only relate to the values measured at the time of the test and any uncertainties quoted will not include allowance for the equipment long term drift, variations with environment changes, vibration and shock during transportation, overloading, mis-handling, or the capability of any other laboratory to repeat the measurement. Sun Creation Engineering Limited shall not be liable for any loss or damage resulting from the use of the equipment.

The test equipment used for calibration is traceable to the National Standards as specified in this certificate. This certificate shall not be reproduced except in full, without the prior written approval of this laboratory.

Remark:

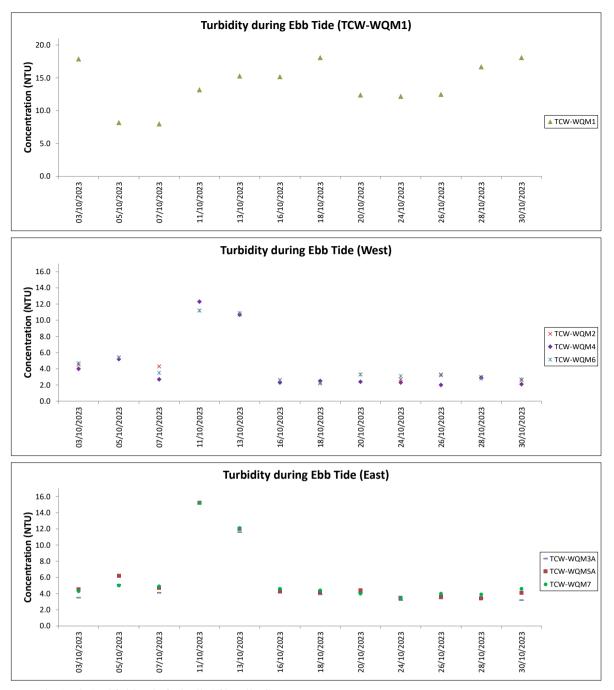

1. Water quality monitoring is arranged at the ebb tide of each monitoring day. Tidal information refers to Chek Lap Kok East provided by the Hong Kong Observatory.

2. Water quality monitoring scheduled on 9 Oct 2023 was cancelled due to the hoisting of the No. 8 Tropical Cyclone Warning Signal.

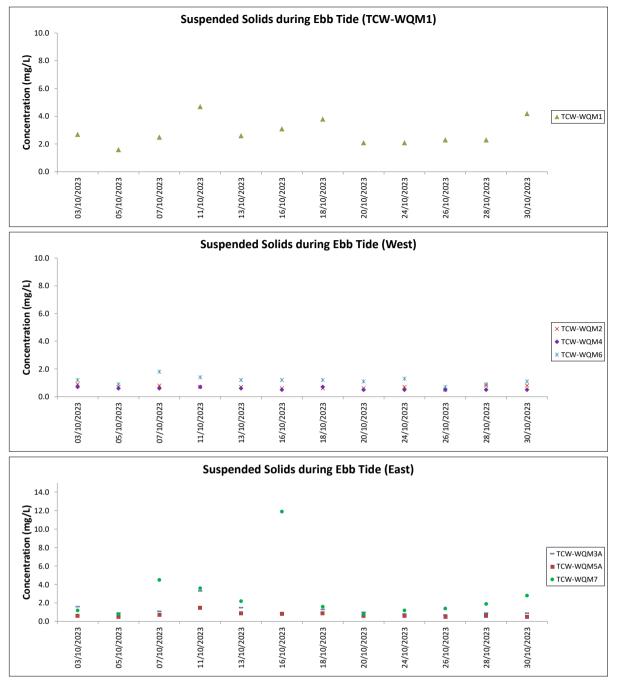

# H4. Water Quality Monitoring Results

The Action and Limit Level of dissolved oxygen can be referred to Table 4.3 of the monthly EM&A report. Note: Major site activities carried out during the reporting period are summarized in Section 1.4 of the monthly EM&A report. Weather conditions during monitoring are presented in the data tables above. QA/ QC requirements as stipulated in the EM&A Manual were carried out during measurement.

The Action and Limit Level of turbidity can be referred to Table 4.3 of the monthly EM&A report. Major site activities carried out during the reporting period are summarized in Section 1.4 of the monthly EM&A report. Weather conditions during monitoring are presented in the data tables above. QA/ QC requirements as stipulated in the EM&A Manual were carried out during measurement. Note:

The Action and Limit Level of suspended solids can be referred to Table 4.3 of the monthly EM&A report. Major site activities carried out during the reporting period are summarized in Section 1.4 of the monthly EM&A report. Weather conditions during monitoring are presented in the data tables above. QA/ QC requirements as stipulated in the EM&A Manual were carried out during measurement. Note:

## **GENERAL COMMENTS**

The performance of the equipment stated in this report is checked with independent reference material and results compared against a calibrated secondary source.

The "Tolerance Limit" quoted is the acceptance criteria applicable for similar equipment used by the laboratory or quoted from relevant international standards.

The "Next Calibration Date" is recommended according to best practice principle as practised by the laboratory or quoted from relevant international standards.

The validity of equipment/ meter performance only applies to the result(s) stated in the report.

This report superseded any previous report(s) with same work order number.

### EQUIPMENT INFORMATION

| Equipment information (Brand name, Model No., Serial No. and Equipment No.) is provided by client. |   |  |  |  |  |

### Tree Schedule for Survey of Plant Species of Conservation Importance

\*Note:

DBH refers to Trunk Diameter at Breast Height

The Tree preservation work commenced in Jul 2022

RPPHK - Species included in AFCD publication "Rare and Precious Plants of Hong Kong (2003)"

Cap.586 - Native plants listed in Protection of Endangered Species of Animals and Plants Ordinance, Cap. 586.

IUCN:VU - "Vulnerable" under IUCN Red List of Threatened Species

# K. Cumulative Statistics on Exceedances, Environmental Complaints, Notifications of Summons and Status of Prosecutions

#### Table K.1: Cumulative Statistics on Exceedances

| Parameter                | Exceedance Level | Total No. Recorded in this Reporting Period <sup>1</sup> | Total No. Recorded since Project Commencement |
|--------------------------|------------------|--|---|
| Air Quality (1-hour TSP) | Action           | 0  | 0   |
|                          | Limit            | 0  | 0   |
| Noise                    | Action           | 0  | 16  |
|                          | Limit            | 0  | 0   |
| Water Quality            | Action           | 0  | 6   |
|                          | Limit            | 0  | 12  |
| Ecology                  | Action           | 0  | 0   |
|                          | Limit            | 0  | 1   |

Remark: (1) Exceedances, which are not project related, are not shown in this table.

#### Table K.2: Cumulative Statistics on Complaints, Notifications of Summons and Successful Prosecutions

| Contract No.             | Reporting Period                              | Cumulative Statistics |                          |              |  |  |  |
|--------------------------|---|-----------------------|--------------------------|--------------|--|--|--|
|                          |   | Complaints            | Notifications of Summons | Prosecutions |  |  |  |
| Contract 5               | This Reporting Period (1 – 31 Oct 2023)       | 0 0                   |                          | 0            |  |  |  |
|                          | Total No. Received since Project Commencement | 11                    | 0                        | 0            |  |  |  |
| Contract 6               | This Reporting Period (1 – 31 Oct 2023)       | 0                     | 0                        | 0            |  |  |  |
|                          | Total No. Received since Project Commencement | 29                    | 0                        | 0            |  |  |  |
| TCW Project <sup>1</sup> | This Reporting Period (1 – 31 Oct 2023)       | 0                     | 0                        | 0            |  |  |  |
|                          | Total No. Received since Project Commencement | 41                    | 0                        | 0            |  |  |  |

Remark: (1) TCW Project includes both Contract 5 and Contract 6.

# L. Monitoring Schedule for the Next Reporting Period
