## 1. Introduction

The Environmental Impact Assessment (EIA) Report (Register No.: AEIAR-196/2016) prepared for the “Tung Chung New Town Extension” (hereinafter referred to as “the Project”) has been approved by the Director of Environmental Protection, and an Environmental Permit (EP) (Permit No.: EP-519/2016) has been issued for the project under the Environmental Impact Assessment Ordinance.

The submission of Management Organizations has been prepared in accordance with Condition 2.11 of the EP, which includes the following information:

- (a) the management organization of the main construction companies and/or any form of joint ventures associated with the construction of the Project;
- (b) the management organization of the Environmental Team (ET); and
- (c) the management organization of the independent Environmental Checker (IEC) and the supporting team.

The development of Tung Chung New Town Extension (TCNTE), comprising Tung Chung East (TCE) and Tung Chung West (TCW), is a mega-scale and complex project aiming to provide land to meet the future housing economic and social development needs of Hong Kong. Due to the fact that the proposed works are geographically separated, the implementation of mega-scale Project is divided into two packages, namely TCE and TCW respectively. In accordance with the tight delivery programme, the Project will be implemented in phases under separate contracts for the developments of TCE and TCW. This submission only covers the management organizations for TCW. Management Organizations for TCE can be found at dedicated project website: <http://env.tcnte.hk/ep-submissions.html>.

This submission will be updated when there are any changes of the management organizations for TCW.
