Attention: Mr. James Kam / Mr. Y. K. Or

Dear Sirs,

**Re: Environmental Permit No. EP-347/2009 and FEP-02/347/2009  
Contract No. SSW306 - Section 2  
Construction of a Secondary Boundary Fence and New Section of Primary  
Boundary Fence and Boundary Patrol Road from Lok Ma Chau Control  
Point to Ng Tung River  
Monthly EM&A Report for May 2010**

Reference is made to the Environmental Team's submission of the draft Monthly EM&A Report for May 2010 (Issue No. 1) by E-mail on 21 June 2010.

We are pleased to inform you that we have no further comments on the captioned report. We write to verify that the captioned submission in accordance with Condition 4.5 of EP-347/2009 and FEP-02/347/2009.

Thank you for your attention and please feel free to contact the undersigned should you have any queries.

Yours faithfully,

David Yeung

## **EXECUTIVE SUMMARY**

Architectural Services Department (ArchSD) has awarded the contract for the Construction of a Secondary Boundary Fence and New Section of Primary Boundary Fence and Boundary Patrol Road - Section 2 Lok Ma Chau Control Point to Ng Tung River. (hereafter referred to as the "Project") to Able Engineering Co. Ltd. ("the Contractor"). The contractor has appointed Allied Environmental Consultants Limited (AEC) as the Environmental Team (ET) to undertake Environmental Monitoring and Audit (EM&A) programme in accordance with the EM&A Manual, the Environmental Permit (EP-329/2009) and Further Environmental Permit (FEP-02/347/2009) for the Project. The site parathion works and EM&A programme commenced on 25<sup>th</sup> March 2010 and the construction works will be commenced on 12<sup>th</sup> April 2010. This report is the third monthly EM&A report, which details the EM&A results recorded during the period from 1<sup>st</sup> May 2010 to 31<sup>st</sup> May 2010.

According to the EM&A Manual, there are total 10 designated noise monitoring locations for the entire Construction of a Secondary Boundary Fence and New Sections of Primary Boundary Fence and Boundary Patrol Road project, where only MTL01 is within 300m from the construction area for Section 2 (Lok Ma Chau Contorl Point to Ng Tung River), thus only MTL01 is covered in this EM&A report for Section 2. Impact noise monitoring for the Project was carried out on 6<sup>th</sup>, 13<sup>th</sup>, 19<sup>th</sup> and 25<sup>th</sup> May 2010. Noise monitoring was conducted within the period of 0700-1900, non-restricted hours.

Noise monitoring results at the monitoring location MTL01, based on the monitoring results, the noise levels comply with the environmental requirements in EM&A Manual. There were no exceedances of the action and limit levels during the reporting month.

Four environmental site inspections were conducted by the Contractor and the ET on 7<sup>th</sup>, 14<sup>th</sup>, 20<sup>th</sup> and 28<sup>th</sup> May 2010. Major findings and deficiency were summarized at *Table 7* of this report. No non-compliance was observed in the reporting month.

There were no environmental complaints received in the reporting month.

No notification of summons or prosecution was received in the reporting month.

A total nos. of 1,463m<sup>3</sup> of general refuse were disposed to NENT Landfill and 4,160m<sup>3</sup> inert C&D waste were disposed to Tuen Mun Area 38 Fill Bank in this reporting period.

Construction activities undertaken in June 2010 will include excavation for footing, reinforcement bar fixing, formwork & concreting for footing, disposal of soil and backfilling trench. Potential environmental impacts include dust generation from the backfilling works; noise from operation of the equipments, C&D materials drop in ponds due to backfilling works, damage to tree branch by power mechanical equipments and the storage of various C&D and chemical wastes. The Contractor should properly implement environmental mitigation measures as per the implementation schedule in the EM&A manual to ensure no adverse environmental impacts to be arisen from the construction works. The Contractor was reminded to maintain good housekeeping at the site.

## 1. PROJECT BACKGROUND

The Frontier Closed Area (FCA) is an integral part of the package of measures for maintaining the integrity of the Hong Kong SAR's boundary with the Mainland and for combating illegal immigration and other cross-boundary criminal activities. Following a recent review, the Government has concluded that with the erection of a secondary boundary fence (SBF) along the boundary patrol road (BPR) and construction of new sections of the BPR and primary boundary fence (PBF) at certain sections along the boundary, the FCA coverage can be substantially reduced without affecting the objective of maintaining the integrity of the boundary. The PBF and SBF will be erected along the northern and southern curbs of the realigned BPR respectively to facilitate the Police in combating cross-boundary criminal activities. The reduced FCA will comprise a narrow strip of land covering the realigned BPR and areas to its north, together with the points of crossing the boundary (i.e. the Boundary Control Points and Sha Tau Kok town). Areas south of the SBF will generally be excised from the FCA. The site location plan is shown in *Figure 1*.

The proposed Secondary Boundary Fence is categorized as a Designated Project (DP) under the Environmental Impact Assessment Ordinance (EIAO) and therefore a detailed Environmental Impact Assessment (EIA- 161/2008) was conducted in year 2009.

An Environmental Permit (EP-347/2009) and a Further Environmental Permit (FEP-02/347/2009) for the construction of the project was issued by Environmental Protection Department in June 2009 and February 2010 respectively.

Architectural Services Department (ArchSD) as the works agent has awarded the construction contract of the Project to Able Engineering Co. Ltd. ("the Contractor"). The Contractor has appointed Allied Environmental Consultants Limited (AEC) as the Environmental Team (ET) to undertake Environmental Monitoring and Audit (EM&A) programme in accordance with the EM&A Manual under the approved EIA report, which details the EM&A requirements for the construction of the Project, the EP-347/2009 and FEP-02/347/2009.

The Construction Programme of the Project is shown in *Appendix A*. The site preparation works and EM&A programme commenced on 25<sup>th</sup> March 2010 and the construction works commenced on 12<sup>th</sup> April 2010. This report is the third monthly EM&A report, which details the EM&A results recorded during the period from 1<sup>st</sup> May 2010 to 31<sup>st</sup> May 2010.

### 1.1 Project Organization and Contact Personnel

Key personnel and contact particulars are summarized in *Table 1*.

Role	Department / Company	Names	Contact Number	Fax Number
Engineer Representative	Mott McDonald Hong Kong Limited	Mr. YK Or	2828 5740	2827 1823
		Mr. Danny Wong	2828 5921	2827 1823

Main Contractor	Able Engineering Co., Limited	Mr. Gavin Lee	9282 8158	2676 7966
Environmental Team Leader	Allied Environmental Consultants Limited	Ms. Grace Kwok	2815 7028	2815 5399
Independent Environmental Checker	ENVIRON Hong Kong Limited	Mr. David Yeung	3743 0788	3548 6988

*Table 1 Contact Details of Key Personnel*

The organizational structure and lines of communication during the construction work with respect to environmental management is given in *Appendix B*.

## 2. CONSTRUCTION WORKS & PROGRAMME

The major works undertaken and/or completed during the monitoring period were site preparation works including the following works items:

- excavation for footing;
- reinforcement bar fixing, formwork & concreting for footing;
- disposal of soil; and
- backfilling trench.

The interrelationship between construction activities and environmental mitigation measures in the reporting month are shown in *Table 2*.

Construction Works	Major Environmental Impact	Mitigation Measures
Excavation for footing.	Air quality, noise impacts and waste management	Water spraying provided, well-maintained and quiet plants were used. Quantities and record of waste transfer should be well-maintained.
Reinforcement bar fixing, formwork & concreting for footing.	Noise quality impacts, water quality impact.	Well-maintained and quiet plants were used. Concrete washing in designated area.
Disposal of soil.	Air quality, waste management	Water spraying provided, Quantities and record of waste transfer should be well-maintained.
Backfilling trench.	Air quality	Water spraying provided

*Table 2 Interrelationship between Construction Activities and Mitigation Measures*

## 3. SUMMARY OF EM&A REQUIREMENT

Weekly site inspection is required for air quality, noise quality, water quality, waste management, ecology, cultural heritage and landscape and visual. The inspection is to ensure mitigation

measures recommended in EIA and EM&A manual implemented during construction phase. Mitigation measures implementation schedule and their status are given in *Appendix F*.

For regular impact noise monitoring, the sampling frequency of at least once a week for a  $L_{eq(30mins)}$ . The Action and Limit Levels for Impact noise are summarized in *Table 3*.

<b>Time Period</b>	<b>Action Level</b>	<b>Limit Level</b>
Daytime (0700-1900) except general holidays and Sunday	When one documented complaint is received.	75 dB(A)
Measurements in $L_{eq}$ (30min)		

*Table 3 Action and Limit Level for Noise Impact Monitoring*

Should non-compliance of the above Action and Limit levels occurs, actions in accordance with the Event and Action Plan in *Table 4*.

<b>Event</b>	<b>Action</b>			
	<b>ET Leader</b>	<b>IEC</b>	<b>ER</b>	<b>Contractor</b>

Review the Contractor's remedial actions whenever necessary to assure their effectiveness and advise ER</li> </ol>	<ol style="list-style-type: none"> <li>1. Confirm receipt of notification of exceedance in writing.</li> <li>2. Notify the Contractor.</li> <li>3. Require the Contractor to propose remedial measures for the analyzed noise problem.</li> <li>4. Ensure remedial measures are</li> </ol>	<ol style="list-style-type: none"> <li>1. Take immediate action to avoid further exceedance.</li> <li>2. Submit proposals for remedial actions to IEC within 3 working days of notification.</li> <li>3. Implement the agreed proposals.</li> <li>4. Resubmit proposals if</li> </ol>

<b>Event</b>	<b>Action</b>			
	<b>ET Leader</b>	<b>IEC</b>	<b>ER</b>	<b>Contractor</b>
	<p>working procedures to determine possible mitigation to be implemented.</p> <p>6. Inform IEC, ER and EPD to causes &amp; actions taken for the exceedances.</p> <p>7. Assess effectiveness of the Contractor's remedial actions and keep IEC, EPD and ER informed of the results.</p> <p>8. If exceedance stops, cease additional monitoring.</p>	<p>accordingly.</p> <p>3. Supervise the implementation of remedial measures.</p>	<p>properly implemented.</p> <p>5. If exceedance continues, consider what activity of the work is responsible and instruct the Contractor to stop that activity of work until the exceedance is abated.</p>	<p>problem still not under control.</p> <p>5. Stop the relevant activity of works as determined by the ER until the exceedance is abated.</p>

*Table 4 Event and Action Plan*

## 4. NOISE MONITORING METHODOLOGY

### 4.1 Noise Monitoring Procedure

Noise monitoring was conducted at the designated noise monitoring location between 0700-1900 hours using a sound level meter which complies with the International Electrotechnical Commission Publications 651:1979 (Type 1) and 804:1985 (Type 1). Noise instrumentation details are given in *Table 5*.

<b>Manufacturer</b>	<b>Type/Model No.</b>	<b>Equipment</b>
RION	Model NL 31	Precision Sound Level Analyser with windshield
RION	Model NC 73	Calibrator

*Table 5 Noise Monitoring Equipment*

Noise levels measurements were recorded in terms of thirty minutes A-weighted equivalent continuous sound pressure level ( $Leq_{(30mins)}$ ) on a weekly basis. The sound level meter was calibrated immediately prior to and following each noise measurement. The meter was mounted on a tripod at a height of 1.2m and the microphone was positioned at 1m away the building façade of the noise monitoring station facing the construction site. The sound level meters, including the calibrators, are verified by the manufacturer every one year to ensure they perform to the same level of accuracy as stated in the manufacturer's specifications. The calibration certificates for the sound level meter and calibrator are given in *Appendix C*.

Noise measurements were not made in the presence of fog, rain, and wind with a steady speed exceeding 5m/s or wind with gusts exceeding 10m/s. The wind speed was checked with a portable anemometer capable of measuring the wind speed in m/s.

#### 4.2 Noise Monitoring Programme

Noise monitoring was conducted at designated noise monitoring locations during construction phase: a village house at Village House at Ma Tso Lung (MTL01) as shown in *Figure 2* on 6<sup>th</sup>, 13<sup>th</sup>, 19<sup>th</sup> and 25<sup>th</sup> May 2010. Details of the noise monitoring stations are shown in *Table 6*. *Appendix D* shows detailed schedule of the monitoring programme in the reporting month and upcoming month.

ID	Monitoring Location	Description of Monitoring Location
MTL01	Village House at Ma Tso Lung	G/F boundary wall of Village House at Ma Tso Lung

*Table 6 Descriptions of Noise Monitoring Locations*

### 5. RESULTS

Noise monitoring results are summarized in *Table 7*. Weather condition during the monitoring period was mainly fine with occasional cloudy. Detailed results and graphical plots of noise monitoring are given in *Appendices E*. There were no exceedances of the action and limit levels during the reporting month.

Location	Date	Weather Condition	Time	L <sub>eq</sub> (30mins)	L <sub>10</sub> (30mins)	L <sub>90</sub> (30mins)	Remarks
MTL01	06-05-10	Fine	09:10 – 09:40	49.1	52.3	45.8	Noise from excavations works by adjacent site, noise from bird.
	13-05-10	Fine	09:10 – 09:40	51.3	53.3	45.8	Noise from excavations works by adjacent site, Traffic noise.
	19-05-10	Cloudy	09:02 – 09:32	51.2	54.3	45.7	Noise from excavations works by adjacent site, noise from bird.
	25-05-10	Sunny	09:10 – 09:40	49.5	52.2	44.8	Noise from excavations works by adjacent site, noise from bird.

*Table 7 Noise Monitoring Results*

## 6. SITE INSPECTION & AUDIT

A total of four site inspections were conducted by the Environmental Team (ET) in this reporting month. Observations by the ET, actions by the Contractor and outcome are summarized in the *Table 8*.

Date	Observations	Action taken by Contractor	Outcome
07 May 2010	Stagnant water was observed in trench.	Remove the stagnant water.	The situation was rectified as observed on 14 May 2010 (Closed).
14 May 2010	Drip tray for fuel tanks was fully filled with sand.	Remove the excessive sand in the drip tray.	The situation was rectified as observed on 20 May 2010 (Closed). The drip tray was partially filled with sand.
	The site vehicles were travelled over 10km/h speed.	Slower the vehicles speed in order to minimize dust generation.	The situation was rectified as observed on 20 May 2010 (Closed).
	The designated road appeared dry.	Increase the frequency of water spraying.	The situation was rectified as observed on 20 May 2010 (Closed).
20 May 2010	Debris of plants was accumulated at the waste storage area.	Remove the accumulated debris.	The situation was rectified as observed on 28 May 2010 (Closed).
28 May 2010	Oil stain was observed at materials storage area.	Remove the oil stain and treat as chemical waste.	The situation was rectified as observed on 4 June 2010 (Closed).
	The designated road appeared dry.	Increase the frequency of water spraying.	The situation was rectified as observed on 4 June 2010 (Closed).

*Table 8 Summary of Site Inspections*

During site inspections in the reporting month, no non-conformance of implementation of environmental mitigation measures was identified. All environmental mitigation measures for construction stages as stated in approved EIA Report, EM&A Manual and EP-347/2009 were carried out properly in the reporting month. The mitigation measures implementation schedule is shown in *Appendix F*.

## 7. NON-COMPLIANCE, COMPLAINTS, NOTIFICATIONS OF SUMMONS AND SUCCESSFUL PROSECUTIONS

In this reporting period, no complaint, notification of summons or prosecution was received. No non-compliance for general works and no non-compliance against EP condition was recorded. The complaint log is appended in *Appendix G*.

## **8. WASTE MANAGEMENT**

There are a total of 4,160m<sup>3</sup> inert C&D waste was disposed to Tuen Mun Area 38 Fill Bank, 0m<sup>3</sup> of metal wastes, 0m<sup>3</sup> of paper and cardboard packing and 1,463m<sup>3</sup> of general refuse were disposed to North East New Territories Landfill. There are a total of 0m<sup>3</sup> of chemical waste was transported off site to Chemical Waste Treatment Centre at Tsing Yi in this reporting period. The monthly Waste Flow Table is given in *Appendix H*.

Good site practice shall be maintained and specific procedures in dealing with different kind of wastes shall be followed during construction. The Contractor shall maintain and record all trip-tickets as stipulated in the Waste Management Plan (WMP) and project EM&A Manual and make a thorough reference from the relevant Legislations and guidelines by the EPD.

## **9. STATUS OF LICENSE AND PERMIT**

A summary of relevant permits, licences, and notifications on environmental protection for the Project is given in *Appendix I*.

## **10. CONCLUSIONS AND FUTURE KEY ISSUES**

Environmental monitoring was carried out for the Construction of a Secondary Boundary Fence and New Section of Primary Boundary Fence and Boundary Patrol Road (Section 2 Lok Ma Chau Control Point to Ng Tung River) in the reporting month. Noise monitoring was conducted at a village house at Ma Tso Lung (MTL01) during the period from 1<sup>st</sup> May 2010 to 31<sup>st</sup> May 2010.

Noise monitoring was conducted at the monitoring location MTL01. All monitoring results complied with the relevant action and limit levels.

A total nos. of 1,463m<sup>3</sup> of general refuse were disposed to NENT Landfill and 4,160m<sup>3</sup> inert C&D waste were disposed to Tuen Mun Area 38 Fill Bank in this reporting period.

Construction activities undertaken in June 2010 will include excavation for footing, reinforcement bar fixing, formwork & concreting for footing, disposal of soil and backfilling trench. Potential environmental impacts include dust generation from the backfilling works, noise from operation of the equipments, C&D materials drop in ponds due to backfilling works, damage to tree branch by power mechanical equipments and the storage of various C&D and chemical wastes. The Contractor should properly implement environmental mitigation measures as per the implementation schedule in the EM&A manual to ensure no adverse environmental impacts to be arisen from the construction works. The Contractor was reminded to maintain good housekeeping at the site.

### *Detail Schedule of Noise Monitoring Programme*

Schedule for noise monitoring programme of Construction of a Secondary Boundary Fence and New Section of Primary Boundary Fence and Boundary Patrol Road (Section 2 Lok Ma Chau Control Point to Ng Tung River)

Monitoring schedule for the reporting month

Date	Start Time
6 <sup>th</sup> May 2010	09:10
13 <sup>th</sup> May 2010	09:10
19 <sup>th</sup> May 2010	09:02
25 <sup>th</sup> May 2010	09:10

Monitoring schedule of the coming month

Date	Time
2 <sup>nd</sup> June 2010	To be confirmed
8 <sup>th</sup> June 2010	To be confirmed
14 <sup>th</sup> June 2010	To be confirmed
24 <sup>th</sup> June 2010	To be confirmed
30 <sup>th</sup> June 2010	To be confirmed

## *Appendix E*

### *Summary and Graphical Plot of Noise Monitoring Record*

**Noise Monitoring Result for Construction of a Secondary Boundary Fence  
and New Section of Primary Boundary Fence and Boundary Patrol Road  
(Section 2 Lok Ma Chau Control Point to Ng Tung River)**

**Month: May 2010**

Date	Time	Leq(30mins) (dB(A))	L10(30mins) (dB(A))	L90(30mins) (dB(A))	Limit Level
6-May-10	09:10 - 09:40	49.1	52.3	45.8	75
13-May-10	09:10 - 09:40	51.3	53.3	45.8	75
19-May-10	09:02 - 09:32	51.2	54.3	45.7	75
25-May-10	09:10 - 09:40	49.5	52.2	44.8	75

*Mitigation Measures Implementation Schedule for  
Construction Stage*

## Appendix F Environmental Mitigation Implementation Schedule

EIA Ref.	EM&A Log Ref.	Recommended Mitigation Measures	Objectives of the Recommended Measures & Main Concerns to address	Who to implement the measure?	Location of the measure	When to implement the measure?	What requirements or standards for the measure to achieve?	Status
<b>Air Quality</b>								
<b>During Construction</b>								
2.5.2	3.2.2	The following good site practice should be implemented:	To minimize construction dust	Contractor	Construction on Work Sites	During Construction	EIAO-TM, Air Pollution Control (Construction Dust) Regulation	^
		<ul style="list-style-type: none"> <li>• any excavated dusty materials or stockpile of dusty materials should be covered entirely by impervious sheeting or sprayed with water so as to maintain the impact entire surface wet, and recovered or backfilled or reinstated within 24 hours of the excavation or unloading;</li> <li>• the working area of excavation should be sprayed with water immediately before, during and immediately after the operations so as to maintain the entire surface wet;</li> <li>• dusty materials carried by vehicle leaving a construction site should be covered entirely by clean impervious sheeting;</li> <li>• the area where vehicle washing takes place and the section of the road between the washing facilities and the exit point should paved with concrete, bituminous materials or hardcore;</li> <li>• the portion of road leading only to a construction site that is within 30m of designated vehicle entrance or exit should be kept clear of dusty materials;</li> </ul>						

Remarks: ^ Implement mitigation measure in the reporting month; X Non-compliance of mitigation measure.  
N/A Not Applicable in the reporting month. \* Not satisfactory but rectified by the contractor

As updated on 21 June 2010

## Appendix F Environmental Mitigation Implementation Schedule

EIA Ref.	EM&A Log Ref.	Recommended Mitigation Measures	Objectives of the Recommended Measures & Main Concerns to address	Who to implement the measure?	Location of the measure	When to implement the measure?	What requirements or standards for the measure to achieve?	Status
		<ul style="list-style-type: none"> <li>• all dusty materials should be sprayed with water prior to any loading, unloading or transfer;</li> <li>• vehicle speed should be limited to 10kph except on completed access roads;</li> <li>• every vehicle should be washed to remove any dusty materials from its body and wheels before leaving the construction sites.</li> </ul>						^
<u>Noise</u>								
<u>During Construction</u>								
3.8.14	4.8.1	The following good site practical should be implemented:	To mitigate construction noise	Contractor	Construction on Work Sites	During Construction	EIAO-TM, NCO	
		<ul style="list-style-type: none"> <li>• The Contractor shall adopt the Code of Practice on Good Management Practice impact to Prevent Violation of the Noise Control Ordinance (Chapter 400) (for Construction Industry) published by EPD;</li> <li>• The Contractor shall observe and comply with the statutory and non-statutory requirements and guidelines;</li> <li>• Before commencing any work, the Contractor shall submit to the Engineer Representative for approval the method of working, equipment and noise mitigation measures intended to be used at the site;</li> </ul>					^	

Remarks: ^ Implement mitigation measure in the reporting month,  
N/A Not Applicable in the reporting month.  
\* Non-compliance of mitigation measure,  
\* Not satisfactory but rectified by the contractor

As updated on 21 June 2010

## Appendix F Environmental Mitigation Implementation Schedule

EIA Ref.	EM&A Log Ref.	Recommended Mitigation Measures	Objectives of the Recommended Measures & Main Concerns to address	Who to implement the measure?	Location of the measure	When to implement the measure?	What requirements or standards for the measure to achieve?	Status
		<ul style="list-style-type: none"> <li>• The Contractor shall devise and execute working methods to minimise the noise impact on the surrounding sensitive uses, and provide experienced personnel with suitable training to ensure that those methods are implemented;</li> <li>• Noisy equipment and noisy activities should be located as far away from the NSRs as is practical;</li> <li>• Unused equipment should be turned off. PME should be kept to a minimum and the parallel use of noisy equipment / machinery should be avoided;</li> <li>• Regular maintenance of all plant and equipment;</li> <li>• Material stockpiles and other structures should be effectively utilised as noise barriers, where practicable.</li> </ul>					^ ^ ^ ^ ^ N/A	

Remarks: ^ Implement mitigation measure in the reporting month;  
 N/A Not Applicable in the reporting month.  
 \* Non-compliance of mitigation measure;  
 \* Not satisfactory but rectified by the contractor

As updated on 21 June 2010

## Appendix F Environmental Mitigation Implementation Schedule

EIA Ref.	EM&A Log Ref.	Recommended Mitigation Measures	Objectives of the Recommended Measures & Main Concerns to address	Who to implement the measure?	Location of the measure	When to implement the measure?	What requirements or standards for the measure to achieve?	Status
3.8.1	4.8.2	Other than good site practice, the Contractor is required to adopt Levels 1 and 2 site-specific direct mitigation measures as specified below during the construction phase.	To mitigate construction noise impact	Contractor	Construction on work sites,	During construction	EIAO-TM, NCO	N/A
-3.8.3	-4.8.3	With construction / demolition work undertaken at a distance of 60m or less to the NSRs, below mitigation measures should be included:  <b>Level 1 – Use of Quiet Plant and Movable Noise Barrier</b> • The Contractor shall obtain particular models of plant that are quieter than standards given in GW-TM. • Purpose-built movable noise barriers should be used to mitigate construction noise directly at sources that are not usually mobile provide that the direct line of sight to the source is blocked.			<a href="#">Figure 4.9</a> shows the typical section of movable noise barrier			

Remarks: ^ Implement mitigation measure in the reporting month. X Non-compliance of mitigation measure.  
 N/A Not Applicable in the reporting month. \* Not satisfactory, but rectified by the contractor.

As updated on 21 June 2010

## Appendix F Environmental Mitigation Implementation Schedule

EIA Ref.	EM&A Log Ref.	Recommended Mitigation Measures	Objectives of the Recommended Measures & Main Concerns to address	Who to implement the measure?	Location of the measure	When to implement the measure?	What requirements or standards for the measure to achieve?	Status
3.8.9	4.8.4	In addition to the use of quiet plant and movable noise barrier, alternative demolition method of existing boundary fence at Section 2-3 shall be used where demolition works would be undertaken at a distance of 12m or less to the NSRs. These particular mitigation measures should be included:	To mitigate noise impact for demolition of existing boundary fence	Contractor	On work sites (Section 2 - 3)	Before the commencement of demolition works	EIAO-TM, NCO ^	

### **Level 2 – Alternative Demolition Method of Existing Boundary Fence**

- The use of welder is recommended to replace the use of hand-held driller.
- The use of hand-held breaker with movable noise barrier is recommended to replace the use of mini-robot mounted breaker, and the duration for the use of hand-held breaker is minimal as only the surface level of the footing to be broken; and
- The removal of the footing of the existing boundary fence should be carried by concrete crusher mini-robot mounted after the surface level broken by hand-held breaker.

Remarks: ^ Implement mitigation measure in the reporting month;  
N/A Not Applicable in the reporting month;

\* Non-compliance of mitigation measure;  
\* Not satisfactory but rectified by the contractor

As updated on 21 June 2010

## Appendix F Environmental Mitigation Implementation Schedule

REMARKS:	N/A	Implement mitigation measure in the reporting month.	Not Applicable in the reporting month.	X	Non-compliance of mitigation measure.
				*	Not satisfactory but rectified by the contractor.

As updated on 21 June 2010

## Appendix F Environmental Mitigation Implementation Schedule

EIA Ref.	EM&A Log Ref.	Recommended Mitigation Measures	Objectives of the Recommended Measures & Main Concerns to address	Who to implement the measure?	Location of the measure	When to implement the measure?	What requirements or standards for the measure to achieve?	Status
		<ul style="list-style-type: none"> <li>• Chemical waste containers shall be labelled with appropriate warning signs in English and Chinese to avoid accidents. there shall also be clear instructions showing what action to take in the event of an accidental;</li> <li>• Storage areas shall be selected at safe locations on site and adequate space shall be allocated to the storage area;</li> <li>• Any construction plant which causes pollution to the water system due to leakage of oil or fuel shall be removed off-site immediately;</li> <li>• Spillage or leakage of chemical waste to be controlled by using suitable absorbent materials;</li> <li>• Chemicals will always be stored on drip trays or in bunded areas where the volume is 110% of the stored volume;</li> <li>• Regular clearance of domestic waste generated in the temporary sanitary facilities to avoid waste water spillage.</li> <li>• Temporary sanitary facilities to be provided for on-site workers during construction.</li> </ul>					^	

Remarks ^ Implement mitigation measure in the reporting month:  
N/A Not Applicable in the reporting month:

X Non-compliance of mitigation measure;

		The Contractor should recycle as much of the C&D materials as possible on-site. Proper segregation of waste on-site will increase the feasibility of certain components of the waste stream by the recycling contractors. Different areas of the worksite shall be designated for such segregation and storage wherever site conditions permit.					^	
		Trip-ticket system should be employed to monitor the disposal of C&D material and solid at public filling facilities and landfills, and to control fly-tipping. Government has established a differentiated charging scheme for the disposal of waste to landfill, construction waste sorting facilities and public fill facilities. This will provide additional incentives to reduce the volume of waste generated and to ensure proper segregation of wastes.						
5.6.13-	6.3.9	<b>Chemical Waste</b>	To avoid chemical leakage	Contractor	Construction on work sites	During construction planning	Code of Practice on the Packaging, Labelling and Storage of Chemical Wastes, Waste Disposal	
5.6.14	6.3.13	For those processes which generate chemical waste, it may be possible to find alternatives which generate reduced quantities or even no chemical waste, or less dangerous types of chemical waste.						

Remarks:

- ^ Implement mitigation measure in the reporting month;
- N/A Not Applicable in the reporting month;
- X Non-compliance of mitigation measure;
- \* Not satisfactory, but rectified by the contractor

As updated on 21 June 2010

## Appendix F Environmental Mitigation Implementation Schedule

EIA Ref.	EM&A Log Ref.	Recommended Mitigation Measures	Objectives of the Recommended Measures & Main Concerns to address	Who to implement the measure?	Location of the measure	When to implement the measure?	What requirements or standards for the measure to achieve?	Status
								^
		1. Integrated design approach - the boundary fence should integrated, as far as technically feasible, with existing built structures such as existing road, footpath and track and embankment of fishponds, river and drainage channel as part of design mitigation measures to reduce the potential cumulative impact of the proposed works. The location and orientation of the police check points should be away from landscape and visually sensitive areas such wetland, fishpond and agricultural field.						
		2. Building massing - the proposed use of simple responsive design for the built structures with a low building height profile to reduce the potential visual mass of the structure within a rural context.						^
		3. Treatment of built structures - the architectural design should seek to reduce the apparent visual mass of the facilities further through the use of natural materials such as wooden frame, vertical greening or other sustainable materials such as recycled plastic.						^

Remarks: ^ Implement mitigation measure in the reporting month, X Non-compliance of mitigation measure.  
 N/A Not Applicable in the reporting month. \* Not satisfactory, but rectified by the contractor

<b>Compensatory Planting Proposals</b>								
Table 7-14	Table 9-2	• Utilise native to Hong Kong will be utilized within the buffer planting areas.	Planting will serve to visually integrate the proposals within the existing landscape framework.	Contractor	Site	Throughout design phase	TM-EIA Annex 18, HKPSG and BD	N/A
OP2		• A qualified or registered landscape architect will be involved in the design, construction supervision and monitoring, and maintenance period to oversee the implementation of the recommended landscape and visual mitigation measures including the tree preservation and landscape works on site.	Provide a linkage with the existing wooded areas creating a more coherent landscape framework whilst also improving the ecological connectivity between existing and proposed woodland habitats.	Contractor	Site	Throughout design phase	TM-EIA Annex 18, HKPSG and BD	^
Table 7-14 OP 2 / 3		• Tree and Shrub Planting – Given the rural nature of the proposed alignment it is recommended that the where possible tree and shrub species which are native to Hong Kong be used. In addition where possible the planting of new trees and shrubs will aim to link together existing woodland areas and small tree groups to improve the connectivity between habitats and create more coherent landscape framework. The planting of small groups of trees along the alignment of the proposed fence will serve to de-emphasise the horizontality of the fence structure and provide for better sense of visual integration with the landscape context. Where practicable vertical greening measures should also be considered on engineering structures.	The planting proposal seeks to compensate for the predicted tree loss.	Contractor	Site	Throughout design phase	TM-EIA Annex 18, HKPSG and BD	^

## Appendix F Environmental Mitigation Implementation Schedule

EIA Ref.	EM&A Log Ref.	Recommended Mitigation Measures	Objectives of the Recommended Measures & Main Concerns to address	Who to implement the measure?	Location of the measure	When to implement the measure?	What requirements or standards for the measure to achieve?	Status
Table 7-14 OP 3	Table 9-2	<ul style="list-style-type: none"> <li>Compensatory Planting Proposals – Given the works extent is largely limited along existing roadside embankment to minimise impact to existing village settlements and valuable landscape resources such as wetland, fishpond, stream course, and existing trees, and considered the importance of tree retention within the works area, new tree planting will concentrate in selected new amenity areas along the alignment, infilling between retained and transplanted trees. The preliminary planting proposals for the proposed works include the planting of some 357 new trees utilising a combination of mature to light standard sized stock (i.e. approximately 15% of mature trees, 75% of standard trees, and 10% light standard trees). These trees will be planted in woodland clumps and small tree groups at strategic locations to de-emphasise the horizontality of the fence alignment. Based on preliminary findings the proposed planting will result in a compensatory planting ratio of 1:1 (new planting: trees recommended for felling). This compares favourably with the report's assertion that some 357 trees would be felled due to the proposed works. With the proposed preservation of existing trees, transplantation of trees in conflict with the proposals and the planting of new trees the project area will contain approximately 2000 trees. Trees forming part of the new planting will provide screening to neighbourhood villagers and will utilise species native to Hong Kong. These proposals will be subject to review at detailed design stage of the project.</li> </ul>	The planting proposal seeks to compensate for the predicted tree loss.
