## **EXECUTIVE SUMMARY**

### **Introduction**

- A1. The Project, Integrated Waste Management Facility (IWMF), is a Designated Project under the Environmental Impact Assessment Ordinance (Cap. 499) (EIAO) and is currently governed by a Further Environmental Permit (FEP No. FEP-01/429/2012/A) for the construction and operation of the Project.
- A2. In accordance with the Updated Environmental Monitoring and Audit (EM&A) Manual for the Project, EM&A works for marine water quality, noise, waste management and ecology should be carried out by Environmental Team (ET), Acuity Sustainability Consulting Limited (ASCL), during the construction phase of the Project.
- A3. This is the 50<sup>th</sup> Monthly EM&A Report, prepared by ASCL, for the Project summarizing the monitoring results and audit findings of the EM&A programme at and around Shek Kwu Chau (SKC) during the reporting period from 1 August to 31 August 2022.

### **Summary of Main Works Undertaken & Key Mitigation Measures Implemented**

- A4. Key activities carried out in this reporting period for the Project included the following:
- Reclamation Area:
    - Reclamation works
    - Installation of Instrumentation
    - Site Investigation works for foundation
    - Foundation works (including Driven H Pile, Socketed H Pile and Bored Pile)
    - Pile cap construction
    - Structural steel work
  - Seawall Portion:
    - Installation of Chinese Pod
    - Caisson extension works, from +3mPD to +6mPD, at Seawall A and B
    - Construction of wave wall along the vertical seawall
- A5. The major environmental impacts brought by the above construction activities include:
- Deterioration of water quality of nearby water body by reclamation
- A6. The key environmental mitigation measures implemented for the Project in this reporting period associated with the construction activities include:
- Reduction of noise from equipment and machinery on-site;
  - Sorting, recycling, storage and disposal of general refuse and construction waste;
  - Management of chemicals and avoidance of oil spillage on-site;

- Confirmation of the absence of silt content in the rock filling material and the filling work is properly conducted;
- Dust suppression measures for exposed earth surface and stockpile of dusty material; and
- Site runoff control measure during rainstorm.

### **Summary of Exceedance & Investigation & Follow-up**

- A7. The EM&A works for water quality, construction waste, marine mammal and White-Bellied Sea Eagle (WBSE) were conducted during the reporting period in accordance with the Updated EM&A Manual.
- A8. No exceedance of the Action or Limit Levels in relation to noise, construction waste and WBSE was recorded in the reporting month.
- A9. The scheduled noise monitoring on 12&13 August 2022 was cancelled due to the due to the emergency operation of Shek Kwu Chau Treatment and Rehabilitation Centre.
- A10. During the reporting period, one (1) of the general water quality monitoring results of suspended solids (SS) obtained had exceeded Action Level. Three (3) of general water quality monitoring results of SS obtained during the reporting period had exceeded the Limit Level. Investigations were carried out for each exceedance during the reporting period. No project-related Action Level & Limit Level exceedance was recorded from 1 August 2022 to 31 August 2022. The scheduled water quality monitoring event on 10 August 2022 was cancelled due to adverse weather under tropical storm Mulan. A supplementary water quality monitoring event was conducted on 14 August 2022. The scheduled water quality monitoring event for flood tide on 24 August 2022 was cancelled due to adverse weather under severe tropical storm Ma-on.
- A11. Weekly site inspections of the construction work by ET were carried out on 2, 9, 15, 23, 30 August 2022 to audit the mitigation measures implementation status. Monthly joint site inspection was carried out on 23 August 2022 by ET and IEC. Observations were recorded in the site inspection checklists and provided to the contractors together with the appropriate follow-up actions where necessary.

### **Complaint Handling and Prosecution**

- A12. No project-related environmental complaint was received during the reporting period.
- A13. Neither notifications of summons nor prosecution was received for the Project.

### **Reporting Change**

- A14. There was no change to be reported that may affect the on-going EM&A programme.

### **Summary of Upcoming Key Issues and Key Mitigation Measures**

- A15. Key activities anticipated in the next reporting period for the Project will include the following:

- Reclamation Area:
  - Reclamation works
  - Installation of Instrumentation
  - Site Investigation works for foundation
  - Foundation works (including Driven H Pile and Socketed H Pile)
  - Pile cap construction
  - Structural steel work
- Seawall Portion:
  - Installation of Chinese Pod
  - Caisson extension works, from +3mPD to +6mPD, at Seawall A and B
  - Construction of wave wall along the vertical seawall

A16. The major environmental impacts brought by the above construction activities will include:

- Deterioration of water quality of nearby water body by reclamation.

A17. The key environmental mitigation measures for the Project in the coming reporting period associated with the construction activities will include:

- Reduction of noise from equipment and machinery on-site;
- Sorting, recycling, storage and disposal of general refuse and construction waste;
- Management of chemicals and avoidance of oil spillage on-site, especially under heavy rains and adverse weather;
- Confirmation of the absence of silt content in the rock filling material and the filling work is properly conducted;
- Dust control of exposed soil surface and stockpile of dusty material at reclaimed area;
- Dust suppression measures for exposed earth surface and stockpile of dusty material;
- Site runoff control measure during rainstorm; and
- Dust and noise control of foundation works.

## 1. BASIC PROJECT INFORMATION

### 1.1 Background

- 1.1.1 The Government of Hong Kong SAR will develop the Integrated Waste Management Facilities (IWMF) Phase 1 (hereafter “the Project”) with incineration to achieve substantial bulk reduction of unavoidable municipal solid waste (MSW) and to recover energy from the incineration process. The IWMF will be on an artificial island to be formed by reclamation at the south-western coast of Shek Kwu Chau. Keppel Seghers – Zhen Hua Joint Venture (KSZHJV) was awarded the contract under Contract No. EP/SP/66/12 Integrated Waste Management Facilities Phase 1 to construct and operate the Project.
- 1.1.2 An environmental impact assessment (EIA) study for the Project has been conducted and the EIA Report was approved under the Environmental Impact Assessment Ordinance on 17 January 2012. An Environmental Permit (EP) (EP No.: EP-429/2012) was granted to EPD on 19 January 2012 for the construction and operation of the Project. Subsequently, the EP was amended (EP No.: EP-429/2012/A) and a further EP (FEP) (EP No.: FEP-01/429/2012/A) was granted to the Keppel Seghers – Zhen Hua Joint Venture (KSZHJV) on 27 December 2017.
- 1.1.3 A further EP (FEP) (EP No.: FEP-02/429/2012/A) on Submarine Cable for the Development of the Project was granted to CLP Power Hong Kong Limited (CLP) on 17 Jan 2020.
- 1.1.4 The key design and construction elements of the Project include the Design and the Works including but not limited to the design, engineering procurement, construction, testing and commissioning of the Facility including:
- Ground Treatment works;
  - Seawall and Breakwater construction;
  - Non-dredged Reclamation;
  - Other Marine works and Harbour and Port Facilities;
  - Site formation;
  - Municipal Solid Waste (MSW) Treatment Processes;
  - Energy Recovery for Power Generation and Surplus Electricity export;
  - Wastewater treatment process;
  - Desalination and water treatment process;
  - Civil works;
  - Building and Structural works;
  - Electrical and Mechanical works;
  - Building Services;
  - Architectural and Landscaping works; and
  - All other design and works required for the operation and maintenance of the Facility according to the Contract requirements.

1.1.5 The location of the IWMF near Shek Kwu Chau (SKC) and general layout of IWMF are shown in **Figure 1.1** and **Figure 1.2** respectively.

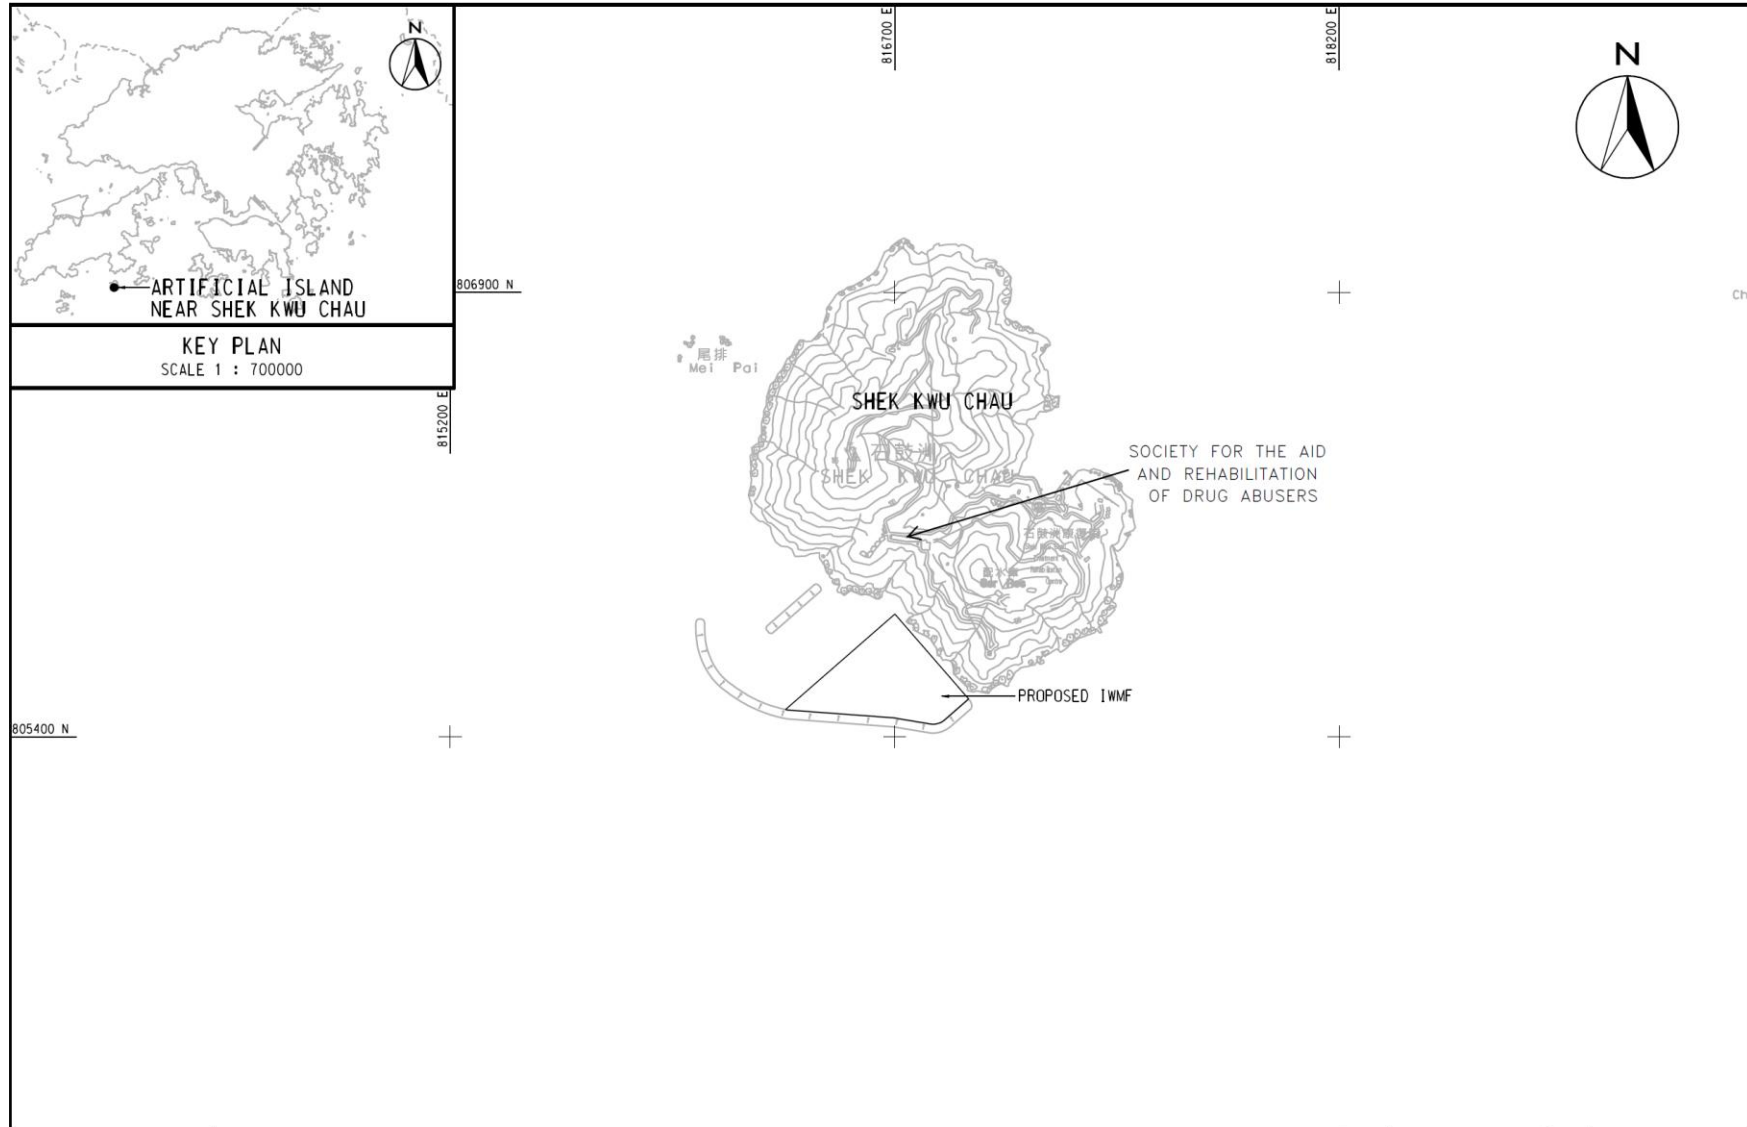

Figure 1.1 Location of the IWMF at the Artificial Island near SKC

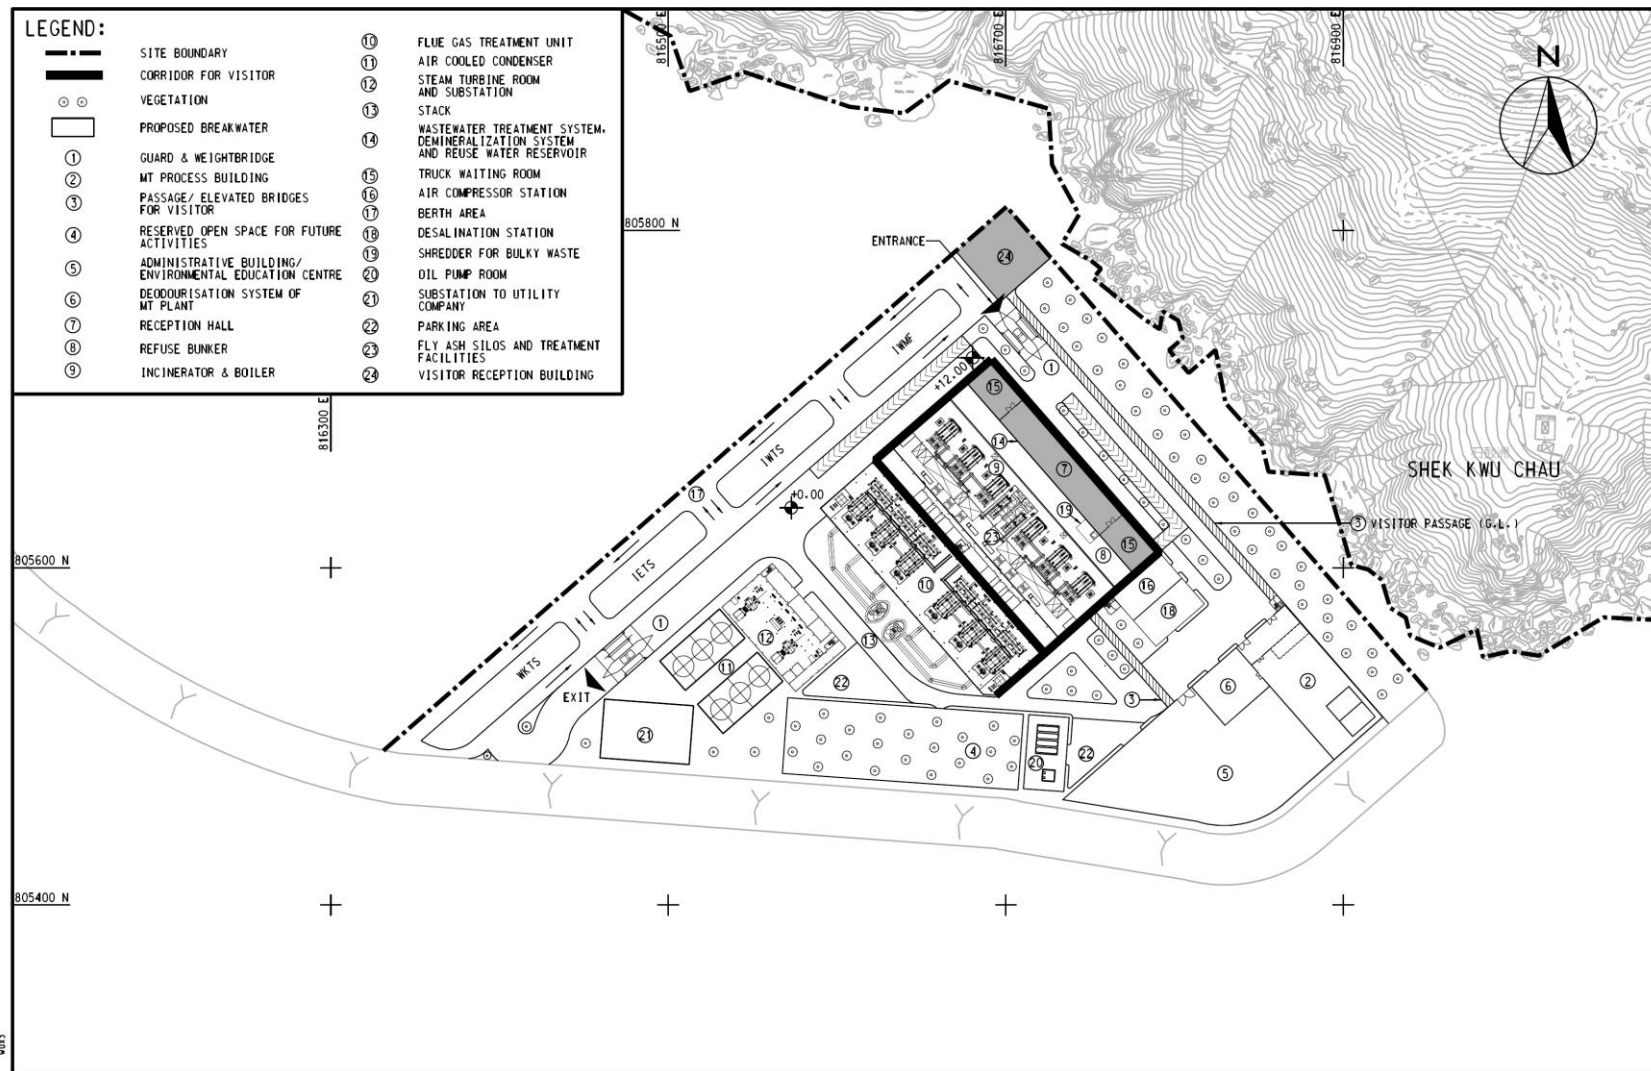

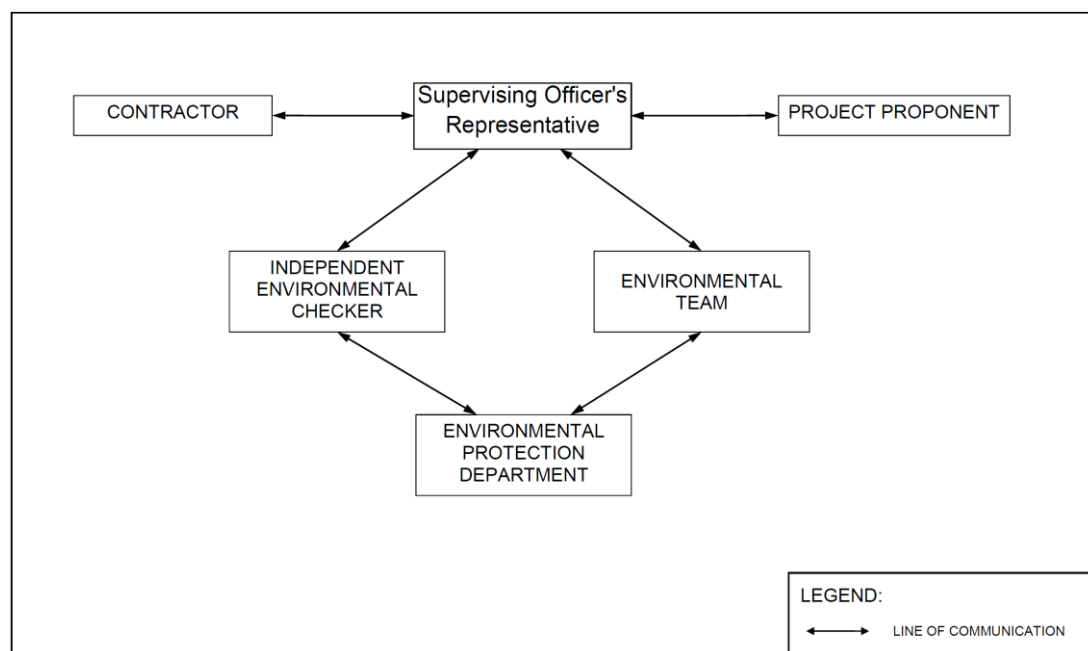

Figure 1.2 General Layout of the IWMF at the Artificial Island near SKC

## 1.2 The Reporting Scope

1.2.1 This is the 50<sup>th</sup> Monthly EM&A Report for the Project which summarizes the key findings of the EM&A programme during the reporting period from 1 August 2022 to 31 August 2022.

## 1.3 Project Organization

1.3.1 The Project Organization structure for Construction Phase is presented in **Figure 1.3**.

**Figure 1.3 Project Organization Chart**

1.3.2 Contact details of the key personnel are presented in **Table 1.1** below:

**Table 1.1 Contact Details of Key Personnel**

| Party                                    | Position                          | Name       | Telephone no. |
|--|-----------------------------------|------------|---------------|
| Keppel Seghers – Zhen Hua Joint Venture  | Project Manager                   | Kenny Yu   | 2192-0606     |
| Acuity Sustainability Consulting Limited | Environmental Team Leader         | F.C. Tsang | 2698-6833     |
| ERM-Hong Kong, Limited                   | Independent Environmental Checker | Mandy To   | 2271-3000     |

#### 1.4 Summary of Construction Works

1.4.1 Details of the major construction activities undertaken in this reporting period are shown in **Table 1.2** and **Figure 1.4** below. The construction programme is presented in **Appendix A**.

**Table 1.2 Summary of the Construction Activities Undertaken during the Reporting Month**

| Location of works | Construction activities undertaken   | Remarks on progress   |
|-------------------|--|---|
| Reclamation area  | <ul style="list-style-type: none"> <li>• Reclamation works</li> <li>• Installation of Instrumentation</li> <li>• Site Investigation works for foundation</li> <li>• Foundation works (including Driven H Pile and Socketed H Pile)</li> <li>• Foundation works (Bored Pile)</li> <li>• Pile cap construction</li> <li>• Structural steel work</li> </ul> | <ul style="list-style-type: none"> <li>• On-going</li> <li>• On-going</li> <li>• On-going</li> <li>• On-going</li> <li>• Completed</li> <li>• On-going</li> <li>• On-going</li> </ul> |
| Seawall portion   | <ul style="list-style-type: none"> <li>• Installation of Chinese Pod</li> <li>• Caisson extension works, from +3mPD to +6mPD, at Seawall A and B</li> <li>• Construction of wave wall along the vertical seawall</li> </ul>  | <ul style="list-style-type: none"> <li>• On-going</li> <li>• On-going</li> <li>• On-going</li> </ul>  |

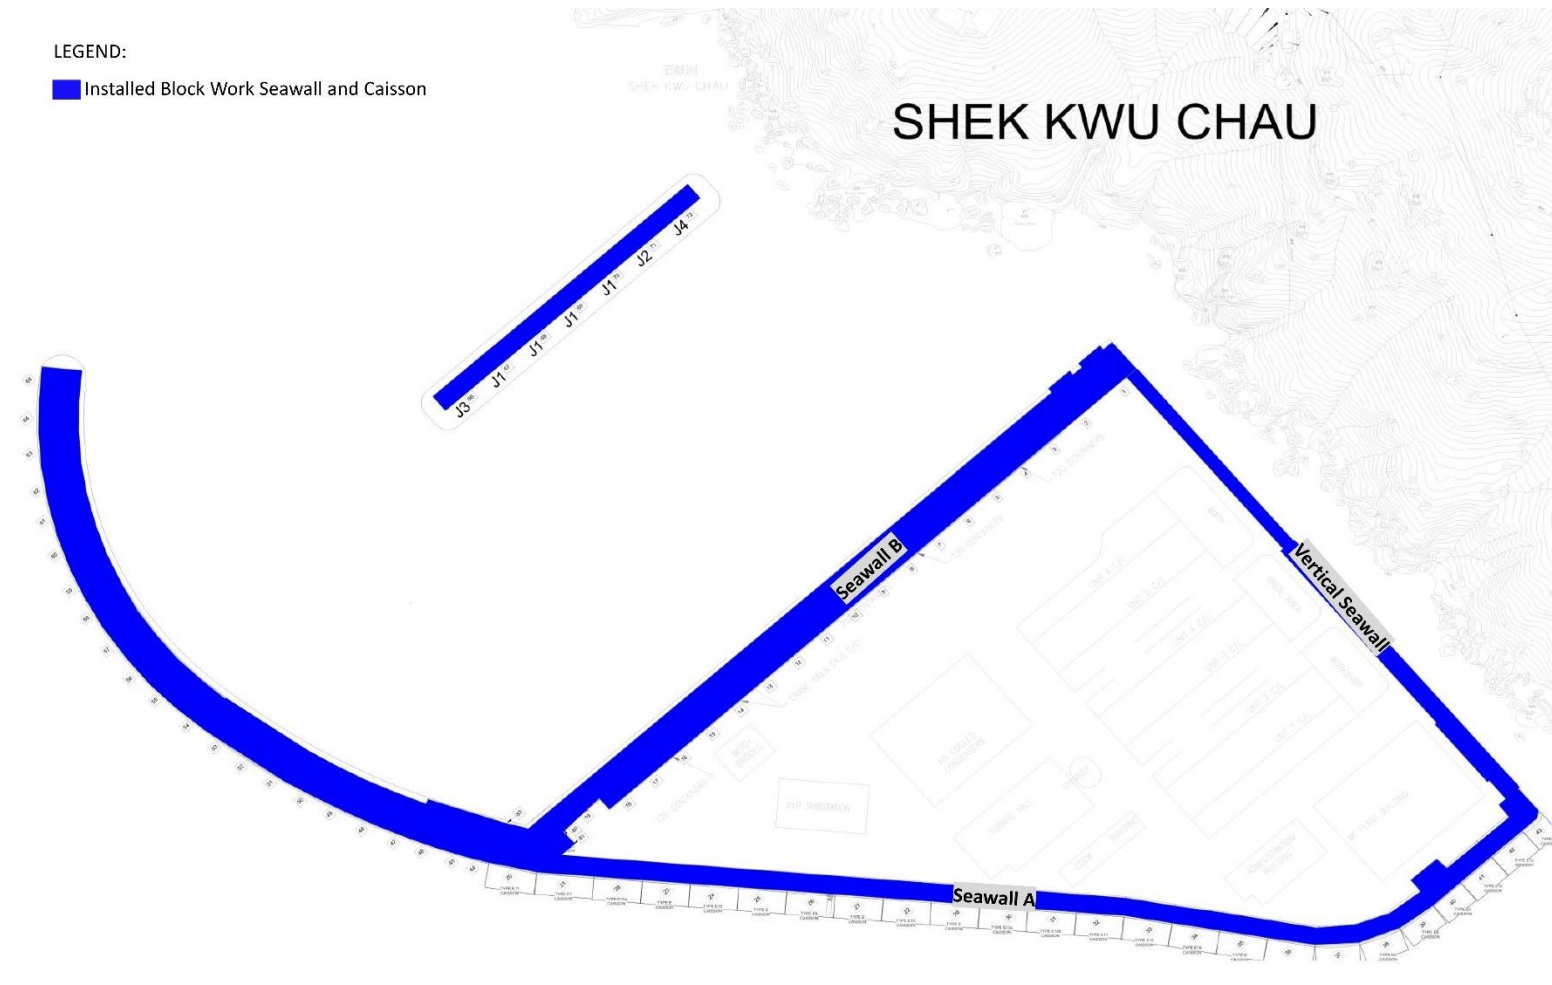

Figure 1.4 Location of Major Construction Activities Undertaken during the Reporting Month

## 1.5 Summary of Environmental Status

1.5.1 A summary of the valid permits, licences, and /or notifications on environmental protection for this Project is presented in **Table 1.3**

**Table 1.3 Summary of the Status of Valid Environmental Licence, Notification, Permit and Documentations**

| Permit/ Licences/ Notification  | Reference            | Validity Period         | Remarks   |
|---|----------------------|-------------------------|---|
| Variation of Environmental Permit   | EP-429/2012/A        | Throughout the Contract |   |
| Further Environmental Permit  | FEP-01/429/2012/A    | Throughout the Contract |   |
| Notification of Construction Works under the Air Pollution Control (Construction Dust) Regulation (Form NA) | Ref No.: 428778      | 15/12/2017 – 22/09/2024 |   |
| Wastewater Discharge Licence  | WT00039438-2021      | 15/02/2022 – 28/02/2027 |   |
| Chemical Waste Producer Registration  | WPN0017-933-K3301-01 | Throughout the Contract |   |
|   | WPN5213-961-K3301-02 | Throughout the Contract |   |
|   | WPN5296-839-K3301-03 | Throughout the Contract |   |
| Construction Noise Permit (24 hours)  | GW-RS0251-22         | 13/04/2022–12/10/2022   | Portion 1, 1A & 1B, supersede by GW-RS0727-22 on 31 August 2022 |
|   | GW-RS0727-22         | 31/08/2022–28/02/2023   | Portion 1, 1A & 1B  |
| Construction Noise Permit (Percussive piling)   | PP-RS0010-22         | 06/05/2022–05/11/2022   | Portion 1   |
| Billing Account for Disposal of Construction Waste  | A/C No.:7029768      | Throughout the Contract |   |

1.5.2 The status for all environmental aspects is presented in **Table 1.4**.

**Table 1.4 Summary of Status for Key Environmental Aspects under the Updated EM&A Manual**

| <b>Parameters</b>  | <b>Status</b>   |
|--|---|
| <b>Water Quality</b>   |   |
| Baseline Monitoring under Updated EM&A Manual and Detailed Plan on DCM | The baseline water quality monitoring result has been reported in Baseline Monitoring Report and submitted to EPD under FEP Condition 3.4   |
| Impact Monitoring  | On-going  |
| Post DCM Monitoring  | All DCM was completed on 14 October 2020, regular DCM monitoring for further 4 weeks (i.e form 16 October 2020 to 14 November 2020) was completed according to the approved Detailed Plan on Deep Cement Mixing |
| Initial Intensive DCM Monitoring                                       | Conducted from 11 February 2019 to 10 March 2019, had not been resumed since there was no DCM related parameter exceeding the AL/LL.  |
| Baseline Water Quality of wet season                                   | Completed over 13 August 2018 to 7 September 2018   |
| <b>Noise</b>   |   |
| Baseline Monitoring  | The baseline noise monitoring result has been reported in Baseline Monitoring Report and submitted to EPD under FEP Condition 3.4   |
| Impact Monitoring  | On-going  |
| <b>Waste Management</b>  |   |
| Mitigation Measures in Waste Monitoring Plan                           | On-going  |
| <b>Coral</b>   |   |
| Pre-translocation Survey and Coral Mapping                             | The Coral Translocation Plan was submitted and approved by EPD under EP Condition 2.12  |
| Coral Translocation  | Completed on 28 March 2018  |
| Post-Translocation Coral Monitoring                                    | Survey affected by missing of translocated and tagged coral colonies after typhoons in September 2018, completed on 28 March 2019.  |
| Pre-construction Coral Survey and Tagging                              | Completed on 26 June 2018   |
| Tagged Coral Monitoring  | Survey obstructed due to missing of tagged coral colonies after typhoons in September 2018  |
| Coral Survey and Re-tagging  | Re-tagging at Indirect Impact Site was conducted on 23 November and Re-tagging at Control Site was conducted on 3 December 2018.  |
| Post Re-tagging Coral Monitoring                                       | On-going  |
| <b>Marine Mammal</b>   |   |
| Vessel-based Line-transect Survey Baseline Monitoring                  | The baseline marine mammal monitoring result has been reported in Baseline Monitoring Report and submitted to EPD under FEP Condition 3.4   |
| Vessel-based Line-transect Survey Impact Monitoring                    | On-going  |
| Land-based Theodolite Tracking   | 30 days of theodolite surveys were started on 21 Feb 2019 and completed in May 2019.  |
| Passive Acoustic Monitoring  | 30 days of PAM surveys were started on 1 May 2019 and completed by the end of May 2019.   |

| Parameters  | Status   |
|---|--|
| <b>White-bellied Sea Eagle</b>  |  |
| Baseline Monitoring   | The baseline WBSE monitoring result has been reported in Baseline Monitoring Report and submitted to EPD under FEP Condition 3.4   |
| Impact Monitoring   | On-going   |
| <b>Environmental Audit</b>  |  |
| Site Inspection covering Measures of Air Quality, Noise Impact, Water Quality, Waste, Ecological Quality, Fisheries, Landscape and Visual | On-going   |
| Mitigation Measures in Marine Mammal Watching Plan (MMWP)   | Installation of caisson No.19 was completed on 18 March 2021, which the reclamation area had been totally enclosed by permanent structure. Floating type silt curtain at marine access was removed on 18 March 2021. No enclosed area shall be formed by deployment of silt curtain for the remaining works programme. |
| Mitigation Measures in Detailed Monitoring Programme on Finless Porpoise (DMPFP)  | Installation of caisson No.19 was completed on 18 March 2021, which the reclamation area had been totally enclosed by permanent structure. Floating type silt curtain at marine access was removed on 18 March 2021. No enclosed area shall be formed by deployment of silt curtain for the remaining works programme. |
| Mitigation Measures in Vessel Travel Details  | On-going   |
| Daily Site Audit and Monitoring for Dredging Work   | Completed  |

1.5.3 Other than the EM&A work by ET, environmental briefings, trainings and regular environmental management meetings were conducted, in order to enhance environmental awareness and closely monitor the environmental performance of the contractors.

1.5.4 The EM&A programme has been implemented in accordance with the recommendations presented in the approved EIA Report and the Updated EM&A Manual. A summary of implementation status of the environmental mitigation measures for the construction phase of the Project during the reporting period is provided in **Appendix B**.

## 2. MARINE WATER QUALITY MONITORING

### 2.1 Water Quality Requirements

- 2.1.1 To ensure no adverse water quality impact, water quality monitoring is recommended to be carried out at the nearby water sensitive receivers (WSRs) during construction phase including proposed reclamation, breakwater construction, etc.
- 2.1.2 In accordance with the Updated EM&A Manual, impact water quality monitoring were conducted 3 days per week at mid-flood and mid-ebb tide to obtain impact water quality levels at the eleven monitoring stations during general water quality monitoring for the reporting period.

### 2.2 Water Quality Parameters, Time, Frequency

- 2.2.1 Dissolved Oxygen (DO), Turbidity, Suspended Solids (SS), Salinity and pH have been undertaken at the eleven monitoring stations during general water quality monitoring.
- 2.2.2 DO, temperature, salinity, turbidity and pH have been measured in-situ and the SS, has been assayed in a HOKLAS laboratory.
- 2.2.3 In associate with the water quality parameters, other relevant data were also measured, such as monitoring location/position, time, water depth, sampling depth, tidal stages, weather conditions and any special phenomena or work underway nearby were also recorded. The monitoring schedule is provided in **Appendix C**.
- 2.2.4 Impact water quality monitoring was conducted 3 days per week in the reporting period. All parameters were monitored during mid-flood and mid-ebb tides at three water depths for general water quality monitoring. The interval between two sets of monitoring has not been less than 36 hours.
- 2.2.5 **Table 2.1** summarizes the monitoring parameters, frequency and duration of the impact water quality monitoring during construction phase.

**Table 2.1 Water Quality Monitoring Parameters, Frequency and Duration**

| Parameter, unit   | Frequency   | No. of Depths   |
|---|---|---|
| <ul style="list-style-type: none"> <li>• Water Depth (m)</li> <li>• Temperature (°C)</li> <li>• Salinity (ppt)</li> <li>• pH (pH unit)</li> <li>• Dissolved Oxygen (DO) (mg/L and % of saturation)</li> <li>• Turbidity (NTU)</li> <li>• Suspended Solids (SS), mg/L</li> </ul> | General water quality monitoring :<br>3 days per week, at mid-flood and mid-ebb tides | 3 water depths: 1m below sea surface, mid-depth and 1m above sea bed.<br><br>If the water depth is less than 3m, mid-depth sampling only.<br>If water depth less than 6m, mid-depth may be omitted. |

### 2.3 Water Quality Monitoring Locations

2.3.1 Impact water quality monitoring was conducted at eleven monitoring locations (B1-B4, H1, C1, C2, F1, CR1, CR2 & M1) during general water quality monitoring in the reporting period as shown in **Figure 2.1**. As per the relocation proposal verified by IEC and approved by EPD, the monitoring location C1, C2, S2, F1 are relocated at C1A, C2A, S2A, F1A as equivalent points respectively to clear up the concerns from stakeholders.

Figure 2.1 Water monitoring locations at Artificial Island near SKC

2.3.2 B1 to B4 are located at 4 beaches respectively at the southern shore of Lantau Island. Monitoring station H1 is located at the horseshoe crab habitat at northern SKC, while CR1 and CR2 are located at the coral communities at southwestern shore of SKC. Monitoring station F1 is located at the Cheung Sha Wan Fish Culture Zone while monitoring station M1 is located at Tung Wan at Cheung Chau. Monitoring station F1A is relocated for F1 at the Cheung Sha Wan Fish Culture Zone. S1, S2 and S3 are located at the northern landing site, midway and southern landing site of the proposed submarine cable, respectively. S2A is the relocated monitoring station of S2 which represents the midway landing site of the proposed submarine cable. S1, S2/S2A and S3 are required for monitoring due to the laying of submarine cable. Control stations C1 and C2 at far field locations are for comparison. Control stations C1A and C2A are relocated for C1 and C2 respectively as equivalent far field locations for comparison.

2.3.3 Fourteen monitoring stations are listed in **Table 2.2**.

**Table 2.2 – Locations of Marine Water Quality Stations**

| Monitoring station | Description  | Easting | Northing |
|--------------------|--|---------|----------|
| B1                 | Beach – Cheung Sha Lower                                   | 813342  | 810316   |
| B2                 | Beach – Pui O  | 815340  | 811025   |
| B3                 | Beach – Yi Long Wan  | 817210  | 808395   |
| B4                 | Beach – Tai Long Wan                                       | 817784  | 808682   |
| H1                 | Horseshoe Crab – Shek Kwu Chau                             | 816477  | 806953   |
| C1                 | Control Station <small>(note i)</small>                    | 810850  | 806288   |
| C1A                | Relocated Control Station                                  | 812823  | 806300   |

- iv. Relocated to F1A in Mar 2019

## 2.4 Impact Monitoring Methodology

- 2.4.1 General water quality monitoring was conducted three days per week, at mid-flood and mid-ebb tides, at the designated water quality monitoring stations during the reporting period.
- 2.4.2 The interval between 2 sets of monitoring was not less than 36 hours. Sampling was collected at three water depths, namely, 1m below water surface, mid-depth and 1m above seabed, except where the water depth is less than 6m, the mid-depth was omitted. If the water depth was less than 3m, only the mid-depth station was monitored.
- 2.4.3 All observations and results were presented in **Appendix D**. Duplicate in-situ measurements and water sampling were carried out in each sampling event. The monitoring probes were retrieved out of water after the first measurement and then redeployed for the second measurement. When the difference in value between the first and second readings of DO or turbidity is more than 25% of the value of the first reading, the reading would be discarded and further readings would be taken.

### In-situ Measurement

- 2.4.4 Levels of DO, pH, temperature, turbidity and salinity would be measured in-situ by portable and weatherproof measuring instrument, e.g. YSI ProDSS and Horiba U-53 Multiparameter complete with cable and sensor. (Refer to <http://www.ysi.com/ProDSS> for YSI ProDSS technical specification and [https://static.horiba.com/fileadmin/Horiba/Products/Process\\_and\\_Environmental/Water\\_Pollution/Instruction\\_Manuals/U-50/U-50\\_SS\\_E.pdf](https://static.horiba.com/fileadmin/Horiba/Products/Process_and_Environmental/Water_Pollution/Instruction_Manuals/U-50/U-50_SS_E.pdf) for Horiba U-53 technical specification). Water current velocity and water current direction would be measured by portable and weatherproof current meter, e.g. SonTek Hydrosurveyor (Refer to <https://www.sontek.com/hydrosurveyor> for SonTek Hydrosurveyor M9 technical specification). Parameters measured by in-situ measurement is tabulated in **Table 2.3**

**Table 2.3 – Parameters Measured by In-situ Measurement**

| Parameter               | Resolution | Range       |
|-------------------------|------------|-------------|
| Temperature             | 0.1 °C     | -5-70 °C    |
| Dissolved Oxygen (DO)   | 0.01 mg/L  | 0-50.0 mg/L |
| Turbidity               | 0.1 NTU    | 0-1000 NTU  |
| pH                      | pH 0.01    | pH 0-14     |
| Salinity                | 0.01 ppt   | 0-40 ppt    |
| Water Current Velocity  | 0.001m/s   | ±20m/s      |
| Water Current Direction | ±1°        | ±2°         |

### Laboratory Analysis

- 2.4.5 Analysis of SS shall be carried out in a HOKLAS accredited laboratory, as shown in **Appendix E**. Sufficient water samples shall be collected at the monitoring stations for carrying out the laboratory determinations. The determination work shall be started within 24 hours after collection of the water samples. Analytical methods and detection limits for SS is presented in **Table 2.4**.

**Table 2.4 – Analytical Methods Applied to Water Quality Samples**

| Parameter            | Analytical method        | Detection Level |
|----------------------|--------------------------|-----------------|
| Suspended Solids, SS | APHA 2540 D <sup>i</sup> | 1 mg/L          |

Footnote:

- i. “APHA 2540 D” stands for American Public Health Association Standard Methods for the Examination of Water and Wastewater, 23<sup>rd</sup> Edition.

### Field Log

2.4.6 Other relevant data was recorded, such as: monitoring location / position, time, water depth, weather conditions and any special phenomena underway near the monitoring station.

## 2.5 Monitoring Equipment

2.5.1 Equipment used in the impact water quality monitoring programme is summarized in **Table 2.5** below. Calibration certificates for the water quality monitoring equipment are attached in **Appendix F**.

**Table 2.5 Impact Water Quality Monitoring Equipment**

| Monitored Parameter                         | Equipment              | Brand and Model                           |
|---|------------------------|---|
| DO, Temperature, Salinity, pH and Turbidity | Multi-functional Meter | Horiba U-53<br>YSI ProDSS Multi Parameter |
| Coordinates                                 | Positioning Equipment  | Garmin GPSMAP 78s                         |
| Water depth                                 | Water Depth Detector   | Hummingbird 160 Portable                  |
| SS  | Water Sampler          | Wildco 2 L Water Sampler with messenger   |

### 2.5.2 Dissolved Oxygen and Temperature Measuring Equipment

The instrument is a portable and weatherproof DO probe mounted on the multi-functional meter complete with cable and sensor and is powered by a DC supply source. The equipment was capable of measuring:

- A DO level in the range of 0 - 50 mg/L; and
- Temperature of -5 - 70 degree Celsius.

### 2.5.3 Turbidity Measurement Instrument

The instrument is a portable and weatherproof turbidity-measuring probe mounted on the multi-functional meter and is powered by a DC supply source. The instrument is equipped with a photoelectric sensor which is capable of measuring turbidity between 0 – 1000 NTU.

### 2.5.4 pH Measurement Instrument

The probe consists of a potentiometer, a glass electrode, a reference electrode and a temperature-compensating device mounted on the multi-functional meter. It is readable to 0.1 pH in a range of 0 to 14. Standard buffer solutions of at least pH 7 and pH 10 were used for calibration of the instrument before and after use.

### 2.5.5 Salinity Measurement Instrument

A portable salinometer mounted on the multi-functional meter capable of measuring salinity in the range of 0-40 parts per thousand (ppt) was provided for measuring salinity of the water at each monitoring location.

### 2.5.6 Sampler

The water sampler comprises a transparent PVC cylinder, with a capacity of not less than 2 litres, which can be effectively sealed with latex cups at both ends. The sampler has a positive latching system to keep it open and prevent premature closure until released by a messenger when the sampler is at the selected water depth.

### 2.5.7 Sample Containers and Storage

Water samples for SS were stored in high density polythene bottles with no preservative added, packed in ice (cooled to 4°C without being frozen) and delivered to the laboratory and analysed as soon as possible after collection. Sufficient volume of samples was collected to achieve the detection limit stated in **Table 2.4**.

### 2.5.8 Water Depth Detector

A portable, battery-operated echo sounder was used for the determination of water depth at each designated monitoring station. This unit could either be hand-held or affixed to the bottom of the work boat, if the same vessel is to be used throughout the monitoring programme.

### 2.5.9 Monitoring Position Equipment

Hand-held digital Differential Global Positioning System (DGPS) with way point bearing indication and Radio Technical Commission for maritime (RTCM) Type 16 error message ‘screen pop-up’ facilities (for real-time auto-display of error messages and DGPS corrections from the Hong Kong Hydrographic Office) was provided and used to ensure that the water sampling locations were correct during the water quality monitoring work.

## 2.6 Maintenance and Calibration

2.6.1 The multi-functional meters were checked and calibrated before use. Multi-functional meters were certified by a laboratory accredited under HOKLAS or any other international accreditation scheme, and subsequently re-calibrated at three monthly intervals throughout all stages of the water quality monitoring. Responses of sensors and electrodes were checked with certified standard solutions before each use. Wet bulb calibration for a DO meter was carried out before commencement of monitoring and after completion of all measurements each day. Calibration was not conducted at each monitoring location as daily calibration is adequate for the type of DO meter employed.

2.6.2 Sufficient stocks of spare parts were provided and maintained for replacements when necessary. Backup monitoring equipment was prepared for uninterrupted monitoring during equipment maintenance or calibration during monitoring.

## 2.7 Action and Limit Levels

2.7.1 The Action and Limit Levels have been set based on the derivation criteria specified in the Updated EM&A Manual and Detailed DCM Plan, as shown in **Table 2.6** below.

**Table 2.6 Criteria of Action and Limit Levels for Water Quality**

| Parameters                                  | Action  | Limit   |
|---|---|---|
| <b>Construction Phase Impact Monitoring</b> |   |   |
| DO in mg/L                                  | ≤ 5 %-ile of baseline data  | ≤ 4   |
| SS in mg/L                                  | ≥ 95 %-ile of baseline data or 120% of control station's SS at the same tide of the same day of measurement, whichever is higher        | ≥ 99 %-ile of baseline data or 130% of control station's SS at the same tide of the same day of measurement, whichever is higher        |
| Turbidity in NTU                            | ≥ 95 %-ile of baseline data or 120% of control station's turbidity at the same tide of the same day of measurement, whichever is higher | ≥ 99 %-ile of baseline data or 130% of control station's turbidity at the same tide of the same day of measurement, whichever is higher |
| Temperature in °C                           | 1.8°C above the temperature recorded at representative control station at the same tide of the same day                                 | 2°C above the temperature recorded at representative control station at the same tide of the same day                                   |

2.7.2 Based on the baseline monitoring data and the derivation criteria specified above, the Action/Limit Levels have been derived and are presented in **Table 2.7** and **Table 2.8** for both dry seasons (October – March) and wet seasons (April – September).

**Table 2.7 Derived Action and Limit Levels for Water Quality Monitoring (Dry Season)**

| Parameters                                  | Action  | Limit  |
|---|---|--|
| <b>Construction Phase Impact Monitoring</b> |   |  |
| DO in mg/L                                  | ≤ 7.13  | ≤ 4  |
| SS in mg/L                                  | ≥ 8 or 120% of control station's SS at the same tide of the same day of measurement, whichever is higher          | ≥ 10 or 130% of control station's SS at the same tide of the same day of measurement, whichever is higher          |
| Turbidity in NTU                            | ≥ 5.6 or 120% of control station's turbidity at the same tide of the same day of measurement, whichever is higher | ≥ 12.8 or 130% of control station's turbidity at the same tide of the same day of measurement, whichever is higher |
| Temperature in °C                           | 1.8°C above the temperature recorded at representative control station at the same tide of the same day           | 2°C above the temperature recorded at representative control station at the same tide of the same day              |

Notes:

- i. "Depth-averaged" is calculated by taking the arithmetic means of reading of all three depths.
- ii. For DO, non-compliance of the water quality limits occurs when monitoring result is lower than the limits.
- iii. For turbidity, SS and Salinity, non-compliance of the water quality limits occurs when monitoring result is higher than the limits.

**Table 2.8 Derived Action and Limit Levels for Water Quality (Wet Season)**

| Parameters                                  | Action  | Limit   |
|---|---|---|
| <b>Construction Phase Impact Monitoring</b> |   |   |
| DO in mg/L                                  | ≤ 5.28  | ≤ 4   |
| SS in mg/L                                  | ≥ 12 or 120% of control station's SS at the same tide of the same day of measurement, whichever is higher         | ≥ 14 or 130% of control station's SS at the same tide of the same day of measurement, whichever is higher         |
| Turbidity in NTU                            | ≥ 4.0 or 120% of control station's turbidity at the same tide of the same day of measurement, whichever is higher | ≥ 4.3 or 130% of control station's turbidity at the same tide of the same day of measurement, whichever is higher |
| Temperature in °C                           | 1.8°C above the temperature recorded at representative control station at the same tide of the same day           | 2°C above the temperature recorded at representative control station at the same tide of the same day             |

Notes:

- i. "Depth-averaged" is calculated by taking the arithmetic means of reading of all three depths.
- ii. For DO, non-compliance of the water quality limits occurs when monitoring result is lower than the limits.
- iii. For turbidity, SS and Salinity, non-compliance of the water quality limits occurs when monitoring result is higher than the limits.

2.7.3 If exceedances were found during water quality monitoring, the actions in accordance with the Event and Action Plan shall be carried out according to **Appendix G**.

## 2.8 Monitoring Results and Observations

2.8.1 As confirmed by the Contractor on 14 October 2020, all DCM works was completed on 14 October 2020, the post DCM water quality monitoring was completed for further 4 weeks (i.e. from 16 October 2020 to 14 November 2020) according to the approved Detailed Plan on Deep Cement Mixing. As all DCM work and post DCM water quality monitoring were completed, no water quality monitoring was conducted at S1, S2A and S3 during the reporting period. General water quality monitoring at all the eleven monitoring stations were conducted on 1, 3, 5, 8, 12, 14, 16, 18, 20, 22, 24, 26, 29 and 31 August 2022 during the reporting period.

2.8.2 Monitoring results of 6 key parameters: Salinity, DO, turbidity, SS, pH and temperature in this reporting period, are summarized in **Table 2.9**, and details results are presented in **Appendix D**.

**Table 2.9 Summary of Impact Water Quality Monitoring Results**

| Locations |      | Parameters     |                         |        |      |                 |                         |           |

Notes:

- i. "Avg", "Min" and "Max" is the average, minimum and maximum respectively of the data from measurements conducted under mid-flood and mid-ebb tides at three water depths, except that of DO where the data for "Surface & Middle" and "Bottom" are calculated separately.
- ii. As all DCM works and post DCM water quality monitoring were completed, no water quality monitoring was conducted at S1, S2A and S3 in the report period.
- iii. As all DCM works were completed on 14 October 2020, no water quality monitoring for total alkalinity was conducted in the report period.

- 2.8.3 During the reporting period, one (1) of the general water quality monitoring results of suspended solids (SS) obtained had exceeded Action Level. Three (3) of general water quality monitoring results of SS obtained during the reporting period had exceeded the Limit Level. Investigations were carried out for each exceedance during the reporting period.
- 2.8.4 No project-related Action Level & Limit Level exceedance was recorded from 1 August 2022 to 31 August 2022.
- 2.8.5 The scheduled water quality monitoring event on 10 August 2022 was cancelled due to adverse weather under tropical storm Mulan. A supplementary water quality monitoring event was conducted on 14 August 2022.
- 2.8.6 The scheduled water quality monitoring event for flood tide on 24 August 2022 was cancelled due to adverse weather under severe tropical storm Ma-on.
- 2.8.7 Details of the exceedance are presented in **Section 8**.
- 2.8.8 Mitigation measures minimizing the adverse impacts on water quality implemented are listed in the implementation schedule given in **Appendix B**.

### 3. NOISE MONITORING

#### 3.1 Monitoring Requirements

- 3.1.1 To ensure no adverse noise impact, noise monitoring is recommended to be carried out at the nearby noise sensitive receivers (NSRs) during construction phase.
- 3.1.2 In accordance with the Updated EM&A Manual, baseline noise level at the noise monitoring stations was established as presented in the Baseline Monitoring Report. Impact noise monitoring was conducted once per week in the form of 30-minutes measurements  $L_{eq}$ ,  $L_{10}$  and  $L_{90}$  levels recorded at each monitoring station between 0700 and 1900 hours on normal weekdays.
- 3.1.3 In accordance with the Updated EM&A Manual, additional weekly impact monitoring should be carried out during respective restricted hours period (1900 – 0700 hours) if the construction works were conducted at evening and night time. Additional weekly noise monitoring was conducted once per week in the form of 5-minutes measurements  $L_{eq}$ ,  $L_{10}$  and  $L_{90}$  levels recorded at each monitoring station between 1900 and 0700 hours as well as public holidays and Sundays.

#### 3.2 Noise Monitoring Parameters, Time, Frequency

- 3.2.1 Impact noise monitoring was conducted weekly in the reporting period between 0700 and 1900 hours on normal weekdays. Additional impact noise monitoring was conducted weekly in the reporting period between 1900-0700 hours on all days as well as public holidays and Sundays.
- 3.2.2 Construction noise level measured in terms of the A-weighted equivalent continuous sound pressure level ( $L_{Aeq}$ ).  $L_{eq\ 30min}$  was used as the monitoring parameter for the time period between 0700 and 1900 hours on normal weekdays.  $L_{eq\ 5min}$  was used as the monitoring parameter for the time period between 1900 and 0700 hours as well as public holidays and Sundays. **Table 3.1** summarizes the monitoring parameters, frequency and duration of the impact noise monitoring and additional impact noise monitoring. The monitoring schedule is provided in **Appendix C**.

**Table 3.1 Noise Monitoring Parameters, Time, Frequency and Duration**

| Monitoring Station                 | Time  | Duration  | Parameters                     |
|------------------------------------|---|---|--------------------------------|
| M1/ N_S1,<br>M2/ N_S2,<br>M3/ N_S3 | Day time:<br>0700-1900 hrs<br>(during normal weekdays)  | Once per week<br>$L_{eq\ 5min}/L_{eq\ 30min}$<br>(average of 6 consecutive $L_{eq\ 5min}$ ) | $L_{eq}$ , $L_{10}$ & $L_{90}$ |
|                                    | Evening time:<br>1900-2300 hrs<br>(including normal weekdays, also public holidays and Sundays) | Once per week<br>$L_{eq\ 5min}$ (3 sets of $L_{eq\ 5min}$ )                                 | $L_{eq}$ , $L_{10}$ & $L_{90}$ |
|                                    | Night time:<br>2300-0700 hrs<br>(including normal weekdays, also public holidays and Sundays)   | Once per week<br>$L_{eq\ 5min}$ (3 sets of $L_{eq\ 5min}$ )                                 | $L_{eq}$ , $L_{10}$ & $L_{90}$ |

### 3.3 Noise Monitoring Locations

3.3.1 Three noise monitoring locations for impact monitoring and additional impact monitoring at the nearby sensitive receivers are shown in **Figure 3.1**.

**Figure 3.1 Noise monitoring locations at SKC**

3.3.2 M1, M2 and M3 are Shek Kwu Chau Treatment and Rehabilitation Centre Hostel 1, 2 and 3 respectively of The Society for the Aid and Rehabilitation of Drug Abusers (SARDA) located at southern part of Shek Kwu Chau.

3.3.3 Measurements at M1 & M3 were conducted at a point 1m from the exterior of the sensitive receivers building façade and at a position 1.2m above the ground. Measurement setup at M3 has been varying with minor adjustment to minimize the disturbance to the users of Treatment Centre. Measurement at M2 was conducted at a point 1m from building façade of the ceiling of 1st floor level for avoidance of mutual disturbance with users of Treatment Centre. The minor adjustment of monitoring locations, which were in favour to mutual convenience with the users of Treatment Centre, were found with no effect on monitoring result based on on-site observation and experience from the Baseline monitoring of the Project. The noise monitoring stations are summarized in **Table 3.2** below.

**Table 3.2 Noise Monitoring Location**

| Station | NSR ID in EIA Report | Noise Monitoring Location                                | Type of sensitive receiver(s) | Measurement Type |
|---------|----------------------|--|-------------------------------|------------------|
| M1      | N_S1                 | Shek Kwu Chau Treatment & Rehabilitation Centre Hostel 1 | Residential                   | Façade           |
| M2      | N_S2                 | Shek Kwu Chau Treatment & Rehabilitation Centre Hostel 2 | Residential                   | Façade           |
| M3      | N_S3                 | Shek Kwu Chau Treatment & Rehabilitation Centre Hostel 3 | Residential                   | Façade           |

#### 3.4 Impact Monitoring Methodology

3.4.1 At each designated monitoring location, measurements of six 5-minute A-weighted equivalent sound pressure level [ $L_{eq\ 5min}$ ] was carried out between 0700 and 1900 hours for daytime measurements on a normal weekdays (excluding Sunday or general holiday). The measured six impact noise levels at each monitoring location shall then be averaged in logarithmic scale and expressed in terms of the 30-minute A-weighted equivalent continuous sound pressure level ( $L_{eq\ 30min}$ ) for the time period between 0700 and 1900 hours on normal weekdays.

3.4.2 At each designated monitoring location, measurements of three 5-minute A-weighted equivalent sound pressure level [ $L_{eq\ 5min}$ ] was carried out between 1900 and 0700 hours for evening time and night time measurements.

3.4.3 The monitoring procedures are as follows:

- The microphone head of the sound level meter was normally positioned 1 m exterior of the noise sensitive façade and lowered sufficiently so that the building's external wall acts as a reflecting surface.
- If there is a problem with the access to the normal monitoring position, an alternative may be chosen and appropriate correction would be applied according to acoustic principle when necessary. For reference, +3 dB(A) correction would be made for free-field measurements.
- The battery condition was checked to ensure good functioning of the meter.
- Parameters such as frequency weighting, the time weighting and the measurement time were set as follows:
  - Frequency weight: A
  - Time weighting: Fast
  - Measurement time: 5 minutes

- Prior to and after noise measurement, the meter was calibrated using the calibrator for 94.0 dB at 1000Hz. If the difference in the calibration level before and after measurement is more than 1.0 dB, the measurement was considered invalid and repeat of noise measurement was required after re-calibration or repair of the equipment.
- Noise monitoring was carried out for 30 minutes by sound level meter. At the end of the monitoring period, noise levels in terms of  $L_{eq}$ ,  $L_{10}$  and  $L_{90}$  were recorded. In addition, site conditions and noise sources were recorded when the equipment was checked and inspected.
- All the monitoring data within the sound level meter system was downloaded through the computer software.

### 3.5 Monitoring Equipment

3.5.1 Integrated sound level meter was used for the noise monitoring. The meter shall comply with the International Electrotechnical Commission Publications 651: 1979 (Type 1) and 804: 1985 (Type 1) specifications.

3.5.2 Equipment used in the impact noise monitoring programme is summarized in **Table 3.3** below. Calibration certificates for the noise monitoring equipment are attached in **Appendix H**.

**Table 3.3 Impact Noise Monitoring Equipment**

| Equipment         | Brand and Model |
|-------------------|-----------------|
| Sound Level Meter | SVANTEK 971     |
| Sound Calibrator  | SVANTEK SV 33B  |

### 3.6 Maintenance and Calibration

3.6.1 The maintenance and calibration procedures were as follows:

- The microphone head of the sound level meter and calibrator were cleaned with a soft cloth at quarterly intervals.
- The sound level meter and calibrator were checked and calibrated at yearly intervals
- Immediately prior to and following each noise measurement, the accuracy of the sound level meter shall be checked using an acoustic calibrator generating a known sound pressure level at a known frequency. Measurements may be accepted as valid only if the calibration levels from before and after the noise measurement agree to within 1.0dB.

### 3.7 Action and Limit Levels

3.7.1 The Action/Limit Levels in line with the criteria of Practice Note for Professional Persons (ProPECC PN 2/93) “Noise from Construction Activities – Non-statutory Controls” and Technical Memorandum on Environmental Impact Assessment Process issued by HKSAR Environmental Protection Department [“EPD”] under the Environmental Impact Assessment Ordinance, Cap 499, S.16 is presented in **Table 3.4**.

**Table 3.4 Action and Limit Levels for Noise per Updated EM&A Manual**

| <b>Time Period</b>               | <b>Action</b>                             | <b>Limit (dB(A))</b> |
|----------------------------------|---|----------------------|
| 0700-1900 hrs on normal weekdays | When one documented complaint is received | 75 dB(A)             |

Notes: If works are to be carried out during restricted hours, the conditions stipulated in the Construction Noise Permit (CNP) issued by the Noise Control Authority have to be followed.

3.7.2 If exceedances were found during noise monitoring, actions in accordance with the Event and Action Plan shall be carried out according to **Appendix I**.

### 3.8 Monitoring Results and Observations

3.8.1 Impact monitoring for noise impact for daytime was carried out on 1, 19, 22, 29 August 2022. Impact monitoring for noise impact for evening time and night time was carried out on 1&2, 19&20, 22&23 and 29&30 August 2022. The impact noise levels at Noise Monitoring Stations at SKC (i.e. M1/N\_S1 to M3/N\_S3) are summarized in **Table 3.6**, **Table 3.7** and **Table 3.8** respectively. Details of noise monitoring results are presented in **Appendix J**.

3.8.2 The scheduled noise monitoring on 12&13 August 2022 was cancelled due to the emergency operation of Shek Kwu Chau Treatment and Rehabilitation Centre.

3.8.3 Major construction activity, major noise source and extreme weather which might affect the results were recorded during the impact monitoring.

3.8.4 According to our field observations, the major noise source identified at the noise monitoring station in the reporting month are summarised in **Table 3.5**. Sound from the intermittent piling work was the noticeable noise source for monitoring stations M1, M2 and M3. Air conditioning units were also observed nearby monitoring stations M3.

**Table 3.5 Summary of Field Observation**

| <b>Monitoring Station</b> | <b>Major Noise Source</b>                                |
|---------------------------|--|
| M1                        | Sound from the intermittent piling work                  |
| M2                        | Sound from the intermittent piling work                  |
| M3                        | Sound from the intermittent piling work, air-conditioner |

3.8.5 No data from impact monitoring during daytime has exceeded the stipulated limit level at 75 dB(A).

**Table 3.6 Summary of Impact Noise Monitoring Results during Day Time (0700 – 1900 hours)**

| Location | Measured Noise Level in dB(A) |                          |                          |
|----------|-------------------------------|--------------------------|--------------------------|
|          | Range of $L_{eq\ 30min}$      | Range of $L_{10\ 30min}$ | Range of $L_{90\ 30min}$ |
| M1       | 61.5 – 65.8                   | 65.0 – 68.9              | 53.4 – 61.9              |
| M2       | 56.2 – 60.8                   | 58.5 – 63.8              | 52.2 – 56.0              |
| M3       | 56.5 – 63.2                   | 58.1 – 65.0              | 51.4 – 61.4              |

3.8.6 Applicable mitigation measures for construction works are fully implemented as shown in **Appendix B**, where double-glazed windows and air conditioning system were also installed and confirmed operable for the NSRs (N\_S1, N\_S2 & N\_S3).

3.8.7 During the noise monitoring event, frontline staff of ET had inquired the treatment centre users on any noise disturbance from the construction activities at evening and night time, where no complaint and adverse opinions was received.

3.8.8 Where site inspection and auditing on Contractor’s record have shown that the conditions stipulated in the Construction Noise Permit (CNP) issued by the Noise Control Authority for construction works during restricted hours were followed, no inappropriate practice was spotted during evening time and night time construction works. Thus, the stipulated requirement on noise impact control during night time and evening time was achieved.

**Table 3.7 Summary of Additional Impact Noise Monitoring Results during Evening Time (1900 – 2300 hours)**

| Location | Measured Noise Level in dB(A) |                         |                         |
|----------|-------------------------------|-------------------------|-------------------------|
|          | Range of $L_{eq\ 5min}$       | Range of $L_{10\ 5min}$ | Range of $L_{90\ 5min}$ |
| M1       | 50.0 – 58.8                   | 50.7 – 61.2             | 49.3 – 53.9             |
| M2       | 53.2 – 57.8                   | 53.9 – 59.2             | 52.2 – 55.9             |
| M3       | 49.0 – 57.5                   | 51.5 – 58.4             | 46.4 – 56.7             |

**Table 3.8 Summary of Additional Impact Noise Monitoring Results during Night Time (2300 – 0700 hours)**

| Location | Measured Noise Level in dB(A) |                         |                         |
|----------|-------------------------------|-------------------------|-------------------------|
|          | Range of $L_{eq\ 5min}$       | Range of $L_{10\ 5min}$ | Range of $L_{90\ 5min}$ |
| M1       | 46.3 – 54.8                   | 46.7 – 56.7             | 45.8 – 52.1             |
| M2       | 51.7 – 55.4                   | 52.0 – 58.0             | 50.6 – 53.9             |
| M3       | 41.6 – 57.1                   | 42.5 – 57.5             | 40.2 – 56.6             |

## 4. WASTE

4.1 The waste generated from this Project includes inert construction and demolition (C&D) materials, and non-inert C&D materials. Non-inert C&D materials are made up of general refuse, vegetative wastes and recyclable wastes such as plastics and paper/cardboard packaging waste. Steel materials generated from the project are also grouped into non-inert C&D materials as the materials were not disposed of with other inert C&D materials.

4.2 As advised by the Contractor, 13,249.4m<sup>3</sup> C&D material was generated on site in the reporting month and reused in other projects. For C&D waste, 76,030.0kg metals were generated and collected by registered recycling collector. 1887.0kg of paper was collected by the registered recycling collector. No plastic waste was collected by registered recycling collector. No chemical waste was collected by the licensed chemical waste collector. 117.0m<sup>3</sup> of other types of wastes (e.g. general refuse) was disposed of at designated landfill. No fill sand public fill was imported during the reporting period. 24,521.0m<sup>3</sup> of fill rock was imported respectively during the reporting period.

4.3 Chemical waste generated from land-based construction activities was stored in the chemical waste cabinet for temporary storage.

4.4 With reference to relevant handling records and trip tickets of this Project, the quantities of different types of waste generated in the reporting month are summarised in **Table 4.1**. Details of cumulative waste management data are presented as a waste flow table in **Appendix K**.

4.5 Although there is not much waste generation anticipated in the coming month from the Project, the Contractor is advised to sort and store any solid and liquid waste on-site properly prior to disposal.

**Table 4.1 Quantities of Waste Generated from the Project during August 2022**

| Reporting Month          | Actual Quantities of Inert C&D Materials Generated Monthly |  |                          |                          |                          |               |             |             | Actual Quantities of C&D Wastes Generated Monthly |                             |                       |                |                          |  |
|--------------------------|--|--|--------------------------|--------------------------|--------------------------|---------------|-------------|-------------|---|-----------------------------|-----------------------|----------------|--------------------------|--|
|                          | Total Quantity Generated                                   | Hard Rock and Large Broken Concrete (see Note 1) | Reused in the Contract   | Reused in other Projects | Disposed as Public Fill  | Imported Fill |             |             | Metals  | Paper / cardboard packaging | Plastics (see Note 2) | Chemical Waste |                          | Others, e.g. general refuse (see Note 3) |
|                          |  |  |                          |                          |                          | Sand          | Public Fill | Rock        |   |                             |                       | (in ,000kg)    | (in ,000L)               |  |
| (in ,000m <sup>3</sup> ) | (in ,000m <sup>3</sup> )                                   | (in ,000m <sup>3</sup> )                         | (in ,000m <sup>3</sup> ) | (in ,000m <sup>3</sup> ) | (in ,000m <sup>3</sup> ) |               |             | (in ,000kg) | (in ,000kg)                                       | (in ,000kg)                 | (in ,000kg)           | (in ,000L)     | (in ,000m <sup>3</sup> ) |  |
| Aug 2022                 | 13.2494  | 0  | 0                        | 13.2494                  | 0                        | 0             | 24.5210     | 76.0300     | 1.8870  | 0                           | 0                     | 0              | 0                        | 0.1170                                   |

- Notes: (1) Broken concrete for recycling into aggregates.  
 (2) Plastics refer to plastic bottles/ containers, plastic sheets/ foam from packaging materials.  
 (3) Use the conversion factor: 1 full load of dumping truck being equivalent to 6.5m<sup>3</sup> by volume.

## 5. CORAL

### 5.1 Coral Monitoring Requirements

5.1.1 To monitor the health condition of corals during different phases, corals located within areas likely to be affected by the Project, corals located at control sites (areas unlikely to be affected by the Project), the trans-located coral colonies as well as the tagged natural coral colonies at the recipient site were chosen, in order to identify any adverse indirect impact from the marine works. The size, percentage cover and health condition of corals (i.e. any sign of abnormal appearance, such as layer of mucus, bleaching, partial mortality etc.) at representative transects should be recorded during each monitoring.

### 5.2 Coral Monitoring Parameters, Time, Frequency

5.2.1 Rapid Ecological Assessment (REA) survey was conducted on 26 June 2018 at the suggested control site and indirect impact site within two weeks before commencement of the construction work which was 29 June 2018. 10 selected hard coral colonies with the similar species were tagged at both control and indirect impact sites. Following coral translocation in the recipient site R3, 16 coral colonies attached to rocks less than 50 cm in diameter were translocated and tagged, as well as 10 selected natural coral colonies, at the recipient site. One additional REA survey was conducted in December 2018 to further assess the seabed condition at Indirect Impact Site after Typhoon Mangkhut.

5.2.2 Tagged coral colonies at the suggested control site and indirect impact site are being monitored weekly for the first month and followed by monthly monitoring for two months. Quarterly monitoring will be carried out after the first three-month of monthly monitoring until the completion of marine works and bi-annual monitoring will be carried out after the completion of marine works. The selected Control Site is located at Yuen Kong Chau of Soko Islands about 7 km away from the project area. Tagged coral colonies at the proposed recipient site are being monitored quarterly for one year. The selected recipient site R3 is located at the opposite side of the Project area at about 2 km away. The detailed survey of the Control Site and Impact Site were conducted before the commencement of the Construction Phase.

5.2.3 Monitoring recorded the following parameters (using the same methodology adopted during the pre-translocation survey); the size, presence, health conditions (percentage of mortality/bleaching) and percentage of sediment of each tagged coral colony. The general environmental conditions including weather, sea, and tidal conditions of impact site, control site and recipient site were monitored.

5.2.4 **Table 5.1** summarizes the monitoring locations, time and frequency of the tagged coral colonies monitoring. The monitoring schedule is provided in **Appendix C**.

**Table 5.1 Tagged Coral Monitoring Locations, Time and Frequency**

| Monitoring Location  | Monitoring Month/Year  | Frequency   | No. of Monitoring Survey |
|--|--|---|--------------------------|
| 10 selected hard coral colonies at control site / indirect impact site                               | 1 <sup>st</sup> Month  | Weekly Survey   | 4                        |
|  | 2 <sup>nd</sup> to 3 <sup>rd</sup> Months  | Monthly Survey  | 2                        |
|  | 4 <sup>th</sup> Month (postponed to 5 <sup>th</sup> month due to diver accident in Shek Kwu Chau in October 2018)  | Re-tagging of Coral Colonies in Indirect Impact Site after Typhoon Mangkhut |                          |
|  | 4 <sup>th</sup> Month (postponed to 5 <sup>th</sup> month due to diver accident in Shek Kwu Chau in October 2018 and further postpone to 6 <sup>th</sup> month due to adverse weather)   | Re-tagging of Coral Colonies in Control Site after Typhoon Mangkhut         |                          |
|  | 5 <sup>th</sup> Month (postponed to 6 <sup>th</sup> month due to diver accident in Shek Kwu Chau and further postponed to 7 <sup>th</sup> month due to delay of re-tagging activities at both Indirect Impact Site and Control Site)     | Post Re-tagging Monthly Survey  | 1                        |
|  | 7 <sup>th</sup> to 51 <sup>st</sup> Months (postponed to 8 <sup>th</sup> to 76 <sup>th</sup> month due to diver accident in Shek Kwu Chau in October 2018)   | Quarterly Survey  | 15                       |
|  | 52 <sup>nd</sup> to 76 <sup>th</sup> Months (The marine construction work is anticipated to be completed by September 2022, the frequency of monitoring will be changed to bi-annual with reference to the Updated EM&A Manual (Rev.E) ) | Bi-annually Survey  | 4                        |
| 16 translocated hard coral colonies and 10 selected natural hard coral colonies at recipient site R3 | 1 <sup>st</sup> Year   | Quarterly Survey  | 4                        |

### 5.3 Coral Monitoring Locations

5.3.1 Location of the ten tagged coral colonies at each of the proposed indirect impact site (re-tagging after typhoon Mangkhut), control site (baseline) and recipient site R3 (translocation) are shown in **Figure 5.1**, **Figure 5.2** and **Figure 5.3** respectively:

**Figure 5.1 Tagged Natural Corals at Indirect Impact Site Near SKC for re-tagging after typhoon Mangkhut**

**Figure 5.2 Tagged Natural Corals at Control Site Near Yuen Kong Chau for re-tagging after typhoon Mangkhut**

**Figure 5.3 Tagged Translocation Corals at Recipient Site R3 near SKC**

5.3.2 The GPS coordinates of the tagged coral colonies, retagged coral colonies and recipient site were shown in **Table 5.2**, **Table 5.3** and **Table 5.4** respectively.

**Table 5.2 Tagged Natural Corals during Baseline and Re-tagged Natural Corals after Typhoon Manghkut at Control Site near Yuen Long Chau**

| Coral # | GPS Coordinates |                |
|---------|-----------------|----------------|
| 1       | N22°09'45.96"   | E113°54'57.81" |
| 2R      | N22°11'29.12"   | E113°59'09.01" |
| 3       | N22°09'45.81"   | E113°54'57.78" |
| 4       | N22°09'45.70"   | E113°54'57.95" |
| 5R      | N22°11'29.10"   | E113°59'09.18" |
| 6       | N22°09'45.75"   | E113°54'58.02" |
| 7R      | N22°11'29.17"   | E113°59'08.86" |
| 7       | N22°09'45.65"   | E113°54'57.94" |
| 8       | N22°09'45.53"   | E113°54'57.90" |
| 9       | N22°09'46.23"   | E113°54'54.70" |
| 10R     | N22°11'29.18"   | E113°59'08.91" |

Notes:

- i. The re-tagged corals were marked as ##R.

**Table 5.3 Re-tagged Natural Corals after Typhoon Mangkut at Indirect Impact Site near SKC**

| Coral # <sup>note i</sup> | GPS Coordinates |                |
|---------------------------|-----------------|----------------|
| 11R                       | N22°11'29.14"   | E113°59'08.92" |
| 12R                       | N22°11'29.12"   | E113°59'09.01" |
| 13R                       | N22°11'29.11"   | E113°59'09.07" |
| 14R                       | N22°11'29.13"   | E113°59'09.12" |
| 15R                       | N22°11'29.10"   | E113°59'09.18" |
| 16R                       | N22°11'29.07"   | E113°59'09.23" |
| 17R                       | N22°11'29.17"   | E113°59'08.86" |
| 18R                       | N22°11'29.14"   | E113°59'08.94" |

| 20R                       | N22°11'29.18"   | E113°59'08.91" |

Notes:

- i. The re-tagged corals were marked as ##R.

**Table 5.4 GPS Coordinates of Recipient Site R3**

| Site | GPS Coordinates |             |
|------|-----------------|-------------|
| R3   | N22°11'43.69"   | E113°28.99" |

#### 5.4 Impact Monitoring Methodology

##### 5.4.1 Health status of coral was assessed by the following criteria:

- Hard coral: Percentage of surface area exhibiting partial mortality and blanched/bleached area of each coral colony and degree of sedimentation.

#### 5.5 Action and Limit Levels

##### 5.5.1 Monitoring result was reviewed and compared against the below Action Level and Limit Level (AL/LL) as set with the below **Table 5.5** and **Table 5.6**.

**Table 5.5 Action and Limit Levels for Construction Phase Coral Monitoring**

| <b>Parameter</b> | <b>Action Level</b>   | <b>Limit Level</b>   |
|------------------|---|--|
| Mortality        | If during Impact Monitoring a 15% increase in the percentage of partial mortality on the corals occurs at more than 20% of the tagged indirect impact site coral colonies that is not recorded on the tagged corals at the control site, then the Action Level is exceeded. | If during Impact Monitoring a 25% increase in the percentage of partial mortality on the corals occurs at more than 20% of the tagged indirect impact site coral colonies that is not recorded on the tagged corals at the control site, then the Limit Level is exceeded. |

**Table 5.6 Action and Limit Levels for Post-Translocation Coral Monitoring**

| <b>Parameter</b> | <b>Action Level</b>  | <b>Limit Level</b>  |
|------------------|--|---|
| Mortality        | If during Post-Translocation Monitoring a 15% increase in the percentage of partial mortality on the corals occurs at more than 20% of the translocated coral colonies that is not recorded on the original corals in the recipient site, then the Action Level is exceeded. | If during Post-Translocation Monitoring a 25% increase in the percentage of partial mortality on the corals occurs at more than 20% of the translocated coral colonies that is not recorded on the original corals in the recipient site, then the Limit Level is exceeded. |

5.5.2 If exceedance was found during coral monitoring. The actions in accordance with the Event and Action Plan should be carried out according to **Appendix L**.

#### 5.6 Monitoring Results and Observations

5.6.1 No coral monitoring survey had been done during the reporting period and the 15<sup>th</sup> quarterly coral monitoring during construction phase at both Indirect Impact Site and Control Site would be scheduled in September 2022.

## 6. MARINE MAMMAL

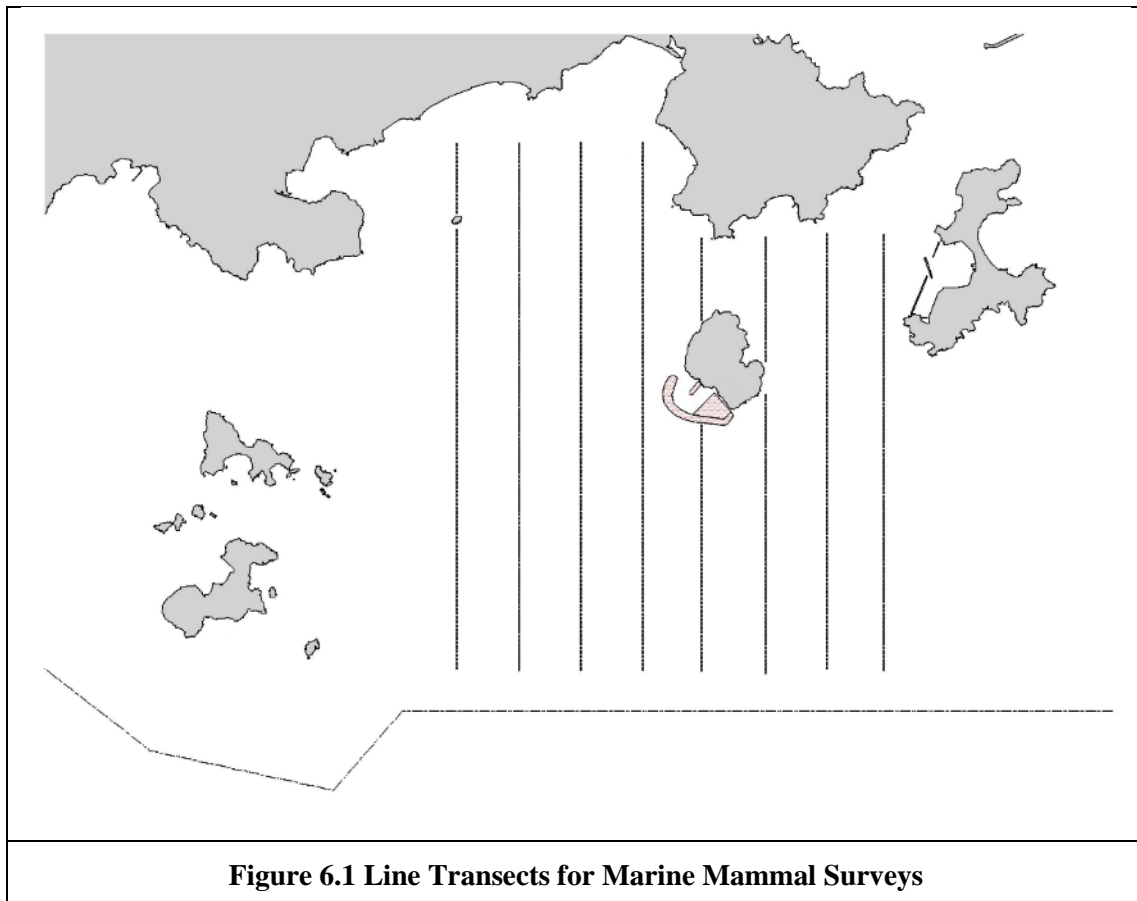

### 6.1 Monitoring Requirements

- 6.1.1 The marine mammal monitoring programme would focus on Finless Porpoise, as the study area near Shek Kwu Chau has been identified as a hotspot for this species, while the Chinese White Dolphins rarely occurred there in the past.
- 6.1.2 The monitoring will verify the predicted impacts on marine mammals and examine whether the mitigation measures recommended in the EIA report have been effectively implemented to protect marine mammals from negative impacts from construction activities.
- 6.1.3 The Vessel-based Line-transect Survey, the Passive Acoustic Monitoring and the Land-based Theodolite Tracking will be conducted to provide systematic, quantitative measurements of occurrence, encounter rate, habitat use, movement and behavioural patterns of marine mammals within or near the Project Area during construction and operational phases.
- 6.1.4 The mammal monitoring works during construction consist of the following three survey methods:
- Vessel-based Line-transect Survey – to monitor the occurrence of Finless Porpoises (and Chinese White Dolphins) in the study area during construction works, by comparing with the findings of the pre-construction marine mammal monitoring;
  - Passive Acoustic Monitoring – to study the usage of the Project Area and two control sites in South Lantau Waters by Finless Porpoise during construction works, in reference with the baseline findings of the pre-construction marine mammal monitoring; and
  - Land-based Theodolite Tracking – to study the movement and behavioral pattern of Finless Porpoise within and around the Project Area during construction works.
- 6.1.5 The marine mammal observation works of Marine Mammal Exclusion Zone (MMEZ) and Marine Mammal Watching as two of the specific mitigation measures recommended in the approved EIA report shall be fully and properly implemented for the Project to minimize disturbance on Finless Porpoise during construction and operational phases.

### 6.2 Survey Methods

#### 6.2.1 Vessel-based Line-transect Survey

- 6.2.1.1 For the vessel-based marine mammal surveys, the monitoring team adopted the standard line-transect method (Buckland et al. 2001) as same as that adopted during the EIA study and pre-construction phase monitoring to allow fair comparison of marine mammal monitoring results.
- 6.2.1.2 Eight transect lines are set at Southeast Lantau survey area, including Shek Kwu Chau, waters between Shek Kwu Chau and the Soko Islands, inshore waters of Lantau Island (e.g. Pui O Wan) as well as southwest corner of Cheung Chau as shown in **Figure 6.1** below:

6.2.1.3 The surveys should cover all 4 seasons in order to take natural fluctuation and seasonal variations into account for data analysis of distribution, encounter rate, density and habitat use of both porpoises and dolphins (if any). In comparison to the baseline monitoring results, results from the analysed construction phase monitoring data would allow the detection of any changes of their usage of habitat, in response to the scheduled construction works. The monitoring surveys shall be conducted throughout the construction phase involving marine construction work with the frequency shown in **Table 6.1** below:

**Table 6.1 Vessel-based Line-transect Survey Frequency**

| Season          | Months  | Frequency       |
|-----------------|---|-----------------|
| Peak Season     | December, January, February, March, April & May   | Twice per month |
| Non-peak Season | June, July, August, September, October & November | Once per month  |

6.2.1.4 For each vessel survey, a 15-m inboard vessel with an open upper deck (about 4.5 m above water surface) would be used to make observations from the flying bridge area. Two experienced marine mammal observers (a data recorder and a primary observer) would make up the on-effort survey team, and the survey vessel would transit different transect lines at a constant speed of 13-15 km per hour. The data recorder shall search with unaided eyes and fill out the datasheets, while the primary observer shall search for dolphins and porpoises continuously through 7 x 50 marine binoculars. Both observers shall search the sea ahead of the vessel, between 270° and 90° (in relation to the bow, which is defined as 0°). Two additional experienced observers shall be available on the boat to work in shift (i.e. rotate every 30 minutes) in order to minimize fatigue of the survey team members. All observers shall be

experienced in small cetacean survey techniques and identifying local cetacean species with extensive training by marine mammal specialist of the ET.

- 6.2.1.5 During on-effort survey periods, the survey team shall record effort data including time, position (latitude and longitude), weather conditions (Beaufort sea state and visibility), and distance travelled in each series (a continuous period of search effort) with the assistance of a handheld GPS (Garmin eTrex Legend). Data including time, position and vessel speed would also be automatically and continuously logged by handheld GPS throughout the entire survey for subsequent review.
- 6.2.1.6 When porpoises or dolphins are sighted, the survey team shall end the survey effort, and immediately record the initial sighting distance and angle of the porpoise or dolphin group from the survey vessel, as well as the sighting time and position. Then the research vessel shall be diverted from its course to approach the animals for species identification, group size estimation, assessment of group composition, behavioural observations, and collection of identification photos (feasible only for Chinese White Dolphin). The perpendicular distance (PSD) of the porpoise or dolphin group to the transect line would then be calculated from the initial sighting distance and angle, which shall be used in the line-transect analysis for density and abundance estimation.
- 6.2.1.7 The line-transect survey data shall be integrated with a Geographic Information System (GIS) to visualize and interpret different spatial and temporal patterns of porpoise and dolphin distribution using their sighting positions collected from vessel surveys. Location data of porpoise and dolphin groups would be plotted on map layers of Hong Kong using a desktop GIS (e.g. ArcView© 3.1) to examine their distribution patterns in details. The encounter rate could be used as an indicator to determine areas or time periods of importance to porpoises within the study area. For encounter rate analysis of finless porpoises, only survey data collected under Beaufort 2 or below condition would be used for encounter rate analysis.
- 6.2.1.8 To take into account of the variations of survey effort across different sections within survey area, the quantitative grid analysis of habitat use would be conducted to examine finless porpoise usage among 1-km<sup>2</sup> grids within the Southeast Lantau survey area. For the grid analysis, SPSE (sighting density) and DPSE (porpoise density) values would be deduced for evaluation on level of porpoise usage. First, positions of on-effort porpoise sightings from the study period are plotted onto 68 grids (1 km x 1 km each) within the survey area. Sighting density grids and porpoise density grids shall then be normalized with the amount of survey effort conducted within each grid. The total amount of survey effort spent on each grid shall be calculated by examining the survey coverage on each line-transect survey to determine how many times the grid had been surveyed during study period. With the amount of survey effort calculated for each grid, the sighting density and porpoise density of each grid shall be further normalized (i.e. divided by the unit of survey effort).
- 6.2.1.9 The newly-derived unit for sighting density was termed SPSE, representing the number of on-effort sightings per 100 units of survey effort. In addition, the derived unit for actual porpoise density was termed DPSE, representing the number of dolphins/porpoise per 100 units of survey effort. Among the 1-km<sup>2</sup> grids that were partially covered by land, the percentage of sea area was calculated using GIS tools, and their SPSE and DPSE values were adjusted accordingly. The following formulae shall be used to estimate SPSE and DPSE in each 1-km<sup>2</sup> grid within the study area:

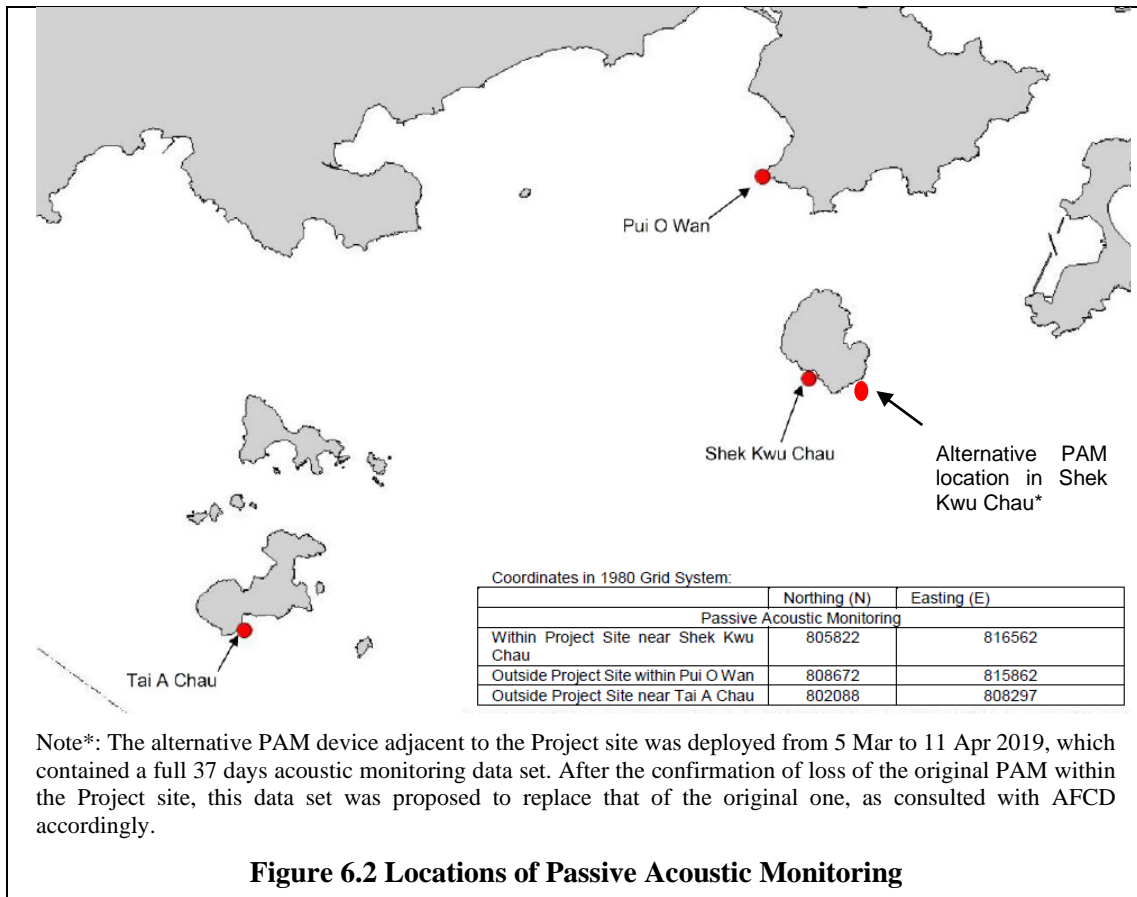

$$SPSE = ((S / E) \times 100) / SA\%$$

$$DPSE = ((D / E) \times 100) / SA\%$$

where S = total number of on-effort sightings  
 D = total number of dolphins/porpoises from on-effort sightings  
 E = total number of units of survey effort  
 SA% = percentage of sea area

### 6.2.2 Passive Acoustic Monitoring (PAM)

The PAM aims to study the usage of an area by Finless Porpoise by using an array of automated static porpoise detectors (e.g. C-POD) which would be deployed at different locations to detect the unique ultra-high frequency sounds produced by Finless Porpoise. During the construction period, the PAM survey will be conducted including placement of two passive porpoise detectors outside the Project Area as control site (i.e. within Pui O Wan and to the south of Tai A Chau) and one porpoise detector within the Project Area (i.e. near Shek Kwu Chau) as shown in **Figure 6.2** below.

6.2.3 These three detectors will be deployed on-site to carry out 24-hours monitoring for a period listed as **Table 6.2** below during the construction phase.

**Table 6.2 PAM Deployment Period**

| Season      | Months   | Deployment Period   |
|-------------|--|---|
| Peak Season | December, January, February, March, April or May | At least 30 days during the peak months of porpoise occurrence in South Lantau waters |

6.2.3.1 The automated static porpoise detectors shall detect the presence and number of finless porpoise and Chinese White Dolphins respectively over the deployment period, with the false signal such as boat sonar and sediment transport noise distinguished and filtered out. The detectors shall be deployed and retrieved by professional dive team on the seabed of the three selected location shown in **Figure 6.2**. During each deployment, the C-POD unit serial numbers as well as the time and date of deployments shall be recorded. Information including the GPS positions and water depth at each of the deployment locations shall also be obtained.

6.2.3.2 The diel patterns (i.e. 24-hour activity pattern) of finless porpoise occurrence among the three sites at Shek Kwu Chau, Tai A Chau and Pui O Wan shall be analyzed. Peaks and troughs of finless porpoise occurrence per hour of day would be identified and compared with the results obtained from pre-construction monitoring.

#### 6.2.4 Land-based Theodolite Tracking

6.2.4.1 The Land-based Theodolite Tracking study would use the same station as in the AFCD monitoring study (same as the baseline monitoring location), which is situated at the southwest side of Shek Kwu Chau (GPS position: 22°11.47' N and 113°59.33' E) as shown in below **Figure 6.3**. The station was selected based on its height above sea level (at least 20 metres), close proximity to shore, and relatively unobstructed views of the entire Project Area to the southwest of Shek Kwu Chau. The height of the Shek Kwu Chau Station established by the HKCRP team is 74.6 m high at mean low water, and only a few hundred metres to the IWMF reclamation site, which is ideal for the purpose for the present behavioural and movement monitoring of finless porpoises as well during construction phase considering there as an un-obstructed vantage point at a height above the Project Site.

**Figure 6.3 Locations of Land-based Theodolite Tracking**

During the construction phase, Land-based Theodolite Tracking will be carried out for approximately six hours of tracking for each day of field work for a period listed as **Table 6.3** below, preferably at the initial stage of the construction period (i.e. December 2018 to May 2019).

**Table 6.3 Land-based Theodolite Tracking Survey Period**

| Season      | Months   | Survey Period  |
|-------------|--|--|
| Peak Season | December, January, February, March, April or May | 30 days during the peak months of porpoise occurrence in South Lantau waters |

6.2.4.2 The monitoring period for land-based theodolite tracking will be proposed to be overlapped with the PAM. The monitoring team consists of one experienced theodolite operator and at least two field observers for assistance. To conduct theodolite tracking, the observers will search systematically for Finless Porpoise using the unaided eye and 7 x 50 handheld binoculars on each survey day throughout the study area. When an individual or group of porpoises is located, a theodolite tracking session will be initiated and focal follow methods will be used to track the porpoise(s). Behavioural state data (i.e. resting, milling, travelling, feeding and socializing) shall also be recorded every 5 minutes for the focal individual or group. Positions of porpoises and boats shall be measured using a digital theodolite connected to a laptop computer. This tracking survey was conducted during the peak season between December 2018 and May 2019 for 30 surveys spanning across 15-16 weeks during the peak season to provide good temporal coverage during the initial stage of the construction period.

### 6.3 Specific Mitigation Measures

#### 6.3.1 Monitored exclusion zones

6.3.1.1 A MMEZ with 250 m distance from silt curtain shall be established during the above situation. If 3 or more construction vessels are required with MMO's duty and operating in close proximity, for the purpose of avoiding accidental entrance to the works area by Marine Mammal, a cluster MMEZ plan will be implemented to form a MMEZ with 250 m distance from the boundary of a work area as indicated in Figure 1 for reference. A team of MMO (i.e. at least two MMOs per day/night shift teams) would be arranged at the out-lying construction vessels to form the cluster MMEZ. The MMEZ serves as a monitoring approach to provide appropriate and immediate actions once finless porpoise or Chinese White Dolphin is sighted within the MMEZ. All MMEZ will be monitored by competent Marine Mammal Observers (MMOs) to be provided by the Environmental Team for the IWMF and trained by the Marine Mammal Monitoring Specialist of the ET who is independent from KSZHJV. The marine mammal observer(s) shall be independent of the construction contractor and shall form part of the Environmental Team and have the power to call-off construction activities.

6.3.1.2 According to the Condition 2.25 of the FEP, MMEZ should be implemented during the installation/re-installation/relocation process of floating type silt curtains in order to avoid the accidental entrance and entrapment of marine mammals within the silt curtains. Also, marine construction works expected to produce underwater acoustic disturbance as per Condition 2.27 of the FEP, especially within December and May, would require the implementation of MMEZ, which currently all those specific construction activities have been replaced by less acoustically disturbing construction methods such as Deep Cement Mixing (DCM) and Precast Concrete

Blocks Installation as discussed in Section 5.3 of the Detailed Monitoring Programme on Finless Porpoise, however, MMEZ would also be implemented for precautionary purpose for DCM works.

6.3.1.3 A MMEZ with 250 m distance from the boundary of a work area shall be established during the above situation. A typical MMEZ is indicated in **Figure 6.4** for reference. The MMEZ serves as a monitoring approach to provide appropriate and immediate actions once finless porpoise or Chinese White Dolphin is sighted within the MMEZ. All MMEZ will be monitored by competent Marine Mammal Observers (MMOs) to be provided by the Environmental Team (ET) for the IWMF and trained by the Marine Mammal Monitoring Specialist of the ET who is independent from KSZHJV.

**Figure 6.4 Illustration of Typical MMEZ**

6.3.1.4 Prior to the commencement of construction activity, our MMOs shall ensure the boundary of a marine work area and setting up of the MMEZ for the work area and get access to the monitoring location on a barge or a lookout point where there is no

obstructed views for monitoring the MMEZ during the construction activity. The MMEZ shall be scanned thoroughly by a MMO for any presence of marine mammal e.g. finless porpoise for an initial period of 30 minutes. Construction activity shall only be commenced after the MMO has confirmed that the MMEZ is clear of the marine mammal for the initial period of 30 minutes. The MMO shall then inform the construction superintendent through mobile phone or handheld transceivers to certify the commencement of construction activity. The MMEZ monitoring shall be carried on throughout the period for all active construction activities requiring implementation of MMEZ.

- 6.3.1.5 When any mammal marine, e.g. Finless Porpoise, is detected by the MMO within the MMEZ during construction, the MMO shall inform the construction superintendent immediately through mobile phone or handheld transceivers to cease construction activity within the MMEZ. Construction activity shall not be re-commenced until the MMO confirms that the MMEZ is continuously clear of marine mammal for a period of 30 minutes. The MMO shall then inform the construction superintendent through mobile phone or handheld transceivers to certify the re-commencement of construction activity.
- 6.3.1.6 As there could be a number of Contractors working at the same time within a work area for the IWMF project, a full contact list of MMEZ monitoring team members of the ET and the relevant responsible construction superintendents of the Contractor at the site shall be prepared, updated regularly and circulated to all parties involved in the MMEZ monitoring. With a full contact list, our MMOs shall be able to find out the contacts of corresponding persons in case of marine mammal sighting within and near the MMEZ or emergent occurrence of any unpredictable impact on marine mammal.
- 6.3.1.7 If a marine mammal is still observed in close vicinity but outside the MMEZ, the MMO shall inform the construction superintendent about the presence of marine mammal. The MMO shall remain in position and closely observe the movement of the marine mammal as well as searching for the appearance of any other marine mammal within the MMEZ. No matter the marine mammal is observed within or in close vicinity but outside the MMEZ, the construction superintendent or relevant persons shall inform all vessel captains involved in construction activities around the MMEZ to pay special attention of the presence of the marine mammal in order to reduce chance of collision with them. In case of injury or live-stranded marine mammal being found within the MMEZ, the marine mammal observer shall immediately inform the construction superintendent to suspend construction activities within the works area and contact AFCD through “1823” marine mammal stranding hotline.
- 6.3.2 Marine mammal watching plan
- 6.3.2.1 Upon the completion of silt curtain installation/re-installation/relocation, the marine works would be conducted within an enclosed environment within the silt curtain. Subsequently, Visual Inspection of the Waters Surrounded by Silt Curtains (Section 2.1, MMWP) and Regular Inspection of Deployed Silt Curtain (Section 2.2, MMWP) inspection under Marine Mammal Watching Plan would be implemented (where applicable, Marine Mammal Exclusion Zone shall be conducted at the meantime).
- 6.3.2.2 Before commencement of dredging/sand blanket laying work at each designated area, a trained MMO shall check whether position frame silt curtains are ready, well prepared and operated without any obvious damage. Also, the MMO shall confirm the presence of the relevant frontline staff of the main contractor or its sub-

contractors and engineers on board to ensure the effective communication, coordination and implementation of the response plan in relation to any incidents involving marine mammals within the waters surrounded by the position frame type silt curtains and the work areas. Also, there are lookout points at an elevated level on each barge, clear and safe access at the edges of the derrick lighter/ flag-top barge for inspection during dredging/sand blanket laying works, provision of sufficient lighting is required if working at night.

- 6.3.2.3 During the operation, the inspection will be conducted daily. The MMO will walk along the edge of derrick lighter (DL) and flag-top barge (FB) along the position frame silt curtain or proper location without obstacles where appropriate to inspect the position frame silt curtain with naked eyes, the MMO will check that the position frame silt curtains are maintained in the correct positions with no obvious defects / entanglement and there is no observable muddy water passing through the position frame silt curtain system. Any floating refuse trapped by the silt curtain shall be removed as part of the regular inspection. For night inspection, spotlight will be used to provide sufficient brightness to assist the inspection in dark condition.
- 6.3.2.4 For the re-deployment of the localized silt curtains (frame-type, cage-type or enclosed floating-type silt curtains), MMO will conduct visual inspection to confirm that there is no presence of marine mammal within the localized silt curtains (frame-type, cage-type or enclosed floating-type silt curtains). Visual inspection will be conducted every hour by MMO for confirming that there is no marine mammal observed in the surrounding area of the deployed silt curtain during re-deployment of localized silt curtains (frame-type, cage-type or enclosed floating-type silt curtains). The duration will be subject to various conditions, e.g. weather or angle of observation. The works can only commence after confirming that the surrounding waters of the localized silt curtains do not contain any marine mammal. Thereafter, frontline staff, i.e. foremen, site agent, superintendents and engineers will assist our MMO in implementing the plan from the active work fronts within the waters surrounded by the silt curtains throughout the work period. The MMO will conduct regular check to observe the presence of any marine mammal around the localized silt curtain or being trapped by the localized silt curtain daily. The MMOs will also check if the localized silt curtains are in correct positions.
- 6.3.2.5 The MMO shall fill up our Marine Mammal Sighting Record Sheet. After inspection, those records should be kept properly and submitted to the project team. In case there is any marine mammal being found, the MMO should carry out the response actions and communicate with relevant parties to stop and then resume work after the discovered marine mammal leaves. After lifting up and mobilization of silt curtain, the MMO will repeat the procedures of regular and visual inspection until the end of the construction works.
- 6.3.2.6 Each lookout point will have an unobstructed view to waters around the DL and FB. The MMO will move around the DL and FB to establish a clear and unobstructed view as much as they can without compromising the safety concern. When appropriate, the lookout point can be replaced by a proper location if unobstructed view can be assured.
- 6.3.2.7 Installation of caisson No.19 was completed on 18 March 2021, which the reclamation area had been totally enclosed by permanent structure. Floating type silt curtain at marine access was removed on 18 March 2021. No enclosed area shall be formed by deployment of silt curtain for the remaining works programme.

## 6.4 Results and Observations

### 6.4.1 Vessel-based Line-transect Survey

6.4.1.1 The monthly surveys were conducted on 2 August 2022. As this is the designated off-peak season (June - November), one survey was completed. A total of 39.0 km on effort (transects only) survey length was completed, 100% of which was conducted at Beaufort Sea State 2 or better (**Table 6.4**). No on-effort finless porpoise sighting was recorded.

**Table 6.4 Summary of Vessel-based Line-transect Survey Effort**

| Date          | Area* | Beaufort | Effort (km) | Season | Vessel       | Effort Type** |
|---------------|-------|----------|-------------|--------|--------------|---------------|
| 2 August 2022 | SEL   | 0        | 7.3         | SUMMER | SEAMAR<br>HK | P             |
|               |       | 1        | 31.7        |        |              |               |

\* As shown in **Figure. 6.1**

\*\* P (from AFCD) denotes the ON EFFORT survey on the transect line, not the adjoining passages

6.4.1.2 A review of the long term AFCD marine mammal monitoring programme, the EIA and pre-construction baseline monitoring was conducted. Pre-construction baseline monitoring and the EIA were both conducted during the peak porpoise months, Feb-Apr 2018 and Dec-May 2008-09, respectively, and could not be compared directly to August data. The AFCD long term monitoring data can be compared directly to August 2022 Impact Survey results. Impact monitoring data are also included for reference. The August 2018, 2019, 2020 & 2021 impact survey results could be compared directly to August 2022 impact survey results. It was noted that the 2<sup>nd</sup>, 14<sup>th</sup>, 26<sup>th</sup> & 38<sup>th</sup> month of impact monitoring is August 2018, 2019, 2020 & 2021 respectively and these data were included.

6.4.1.3 A review of the Beaufort Sea State in August survey conditions between 2009 and 2017 (only data available from AFCD at times of writing; AFCD 20181; 20172; 20163; 20154; 20145; 20136; 20127; 20118; 20109) show that between 9.6% and 60.7% of survey effort has been conducted at Beaufort Sea State 2 or better in the past. For this project in August 2022, 100% of the survey was conducted at Beaufort Sea State 2 or better and, as such, survey conditions surpassed those of previous AFCD surveys.

A review of the porpoise sightings in the survey area for August between 2010 and 2017, no effort was recorded in 2010 and 2014) indicates that it is rare to record sightings in this month. For all weather conditions, and for the eight years data available, zero (0) sighting was recorded in five years (2009, 2011, 2013, 2016 and 2017 conducted by AFCD), one (1) sighting was recorded in one year (2015 conducted by AFCD) and five (5) sighting was recorded in one year (2012 conducted by AFCD). In August 2012, of the five (5) sightings recorded, four (4) were on the same day and three (3) of these were made at the same location and within 27 minutes of each other. Such a cluster of sightings, so close in time and space, is not a usual occurrence. Effort varied between years and sightings varied between 0.0 and 4.2 per 40 km (eqv. Average 0.01 sightings km<sup>-1</sup>). In August 2018, 2019 and 2021, the first three years of impact monitoring, 0 encounter rates were also recorded. The August 2022 encounter rate of 0 is typical of this month.

6.4.1.4 The impacts of the Project on marine mammals as predicted in the EIA were that construction activities would cause individuals to move away from the area. The month of August has shown consistent absence of porpoise prior to project commencement (only 2 years of 8 record sightings). August is considered to be off-

peak season for porpoise, as indicated in the long term monitoring sightings data published by AFCD, although porpoise (and a solitary dolphin) were sighted in the survey area in July 2022 which was unusual. It is noted that there are low numbers of vessels in the area due to Covid-19 restrictions, however, marine construction works, for other projects, are ongoing in the area adjacent to this Project site and are therefore, likely impacting porpoise presence and behaviour.

#### 6.4.2 PAM and Land-based Theodolite Tracking

6.4.2.1 30 days of PAM surveys were started on 1 May 2019 and completed in the end of May 2019. Multiple PAM systems were deployed at three sites. The PAM system located at the IWMF was lost, however, an alternative data set had been identified. The PAM systems at the two control sites Tai A Chau and Pui O were recovered on 3 August 2019. A summary of marine mammal detections showed that porpoise were recorded every day of deployment at each site, but at varying frequencies. The detailed theodolite result was presented in 17<sup>th</sup> Monthly EM&A report (November 2019) while detailed PAM result was presented in 18<sup>th</sup> Monthly EM&A report (December 2019).

6.4.2.2 For the baseline study, the Detection Positive Minutes (DPM) for each site was 11,160 (Shek Kwu Chau), 16,089 (Tai A Chau) and 3645 (Pui O Wan), totalling 30,894 DPM across all three sites, compared to DPMs of 4740 (Shek Kwu Chau), 7725 (Tai A Chau) and 23,986 (Pui O Wan), totalling 36,451 DPM, for the impact phase study. As the impact phase study was longer than the baseline study, it is not appropriate to directly compare total counts of DPM, however, the DPM rate (the average number of detections per day) for each site can be more directly compared. During the baseline study, Shek Kwu Chau averaged 338.2 DPM per day compared to 124.8 DPM per day, during the impact phase study. This showed a decrease in the daily average of porpoise detection at Shek Kwu Chau. During the baseline study, Tai A Chau averaged 487.6 DPM per day compared to 179.7 DPM per day, during the impact phase study. This showed a decrease in the daily average of porpoise detection at Tai A Chau. During the baseline study, Pui O Wan averaged 98.5 DPM per day compared to 557.8 DPM per day, during the impact phase study. This showed a significant increase in the daily average of porpoise detections at Pui O Wan.

6.4.2.3 Overall, the PAM study showed that porpoise continue to consistently utilise the Shek Kwu Chau habitat immediately adjacent to the IWMF construction activities, although to a lesser degree than that prior to construction activities. In addition, the Pui O Wan site, which is 2.5 km away from the IWMF construction area, was also consistently utilised during the impact phase PAM study. A continued assessment of fine scale habitat use, particularly through PAM which yielded large quantities of data, would allow a more comprehensive assessment of the EIA predictions.

6.4.2.4 Theodolite surveys were completed in May 2019. In total, 34 days of theodolite tracking were completed between February and May 2019, comprising 167 hours and 49 minutes of observation. No Chinese white dolphin was observed and only one finless was recorded. The finless porpoise encounter rate was calculated as 0.006 finless porpoise per hour, in all weather conditions.

6.4.2.5 A total of 2620 vessels of ten different types were observed and tracked within or in the proximity of the IWMF construction site. These comprised fishing boats (236), speed boats (29), container boats (155), government boats (22), high speed ferries (53), others (13) and IWMF-Related construction platforms (974), tug boats (240),

transportation boats (363), construction boats (531) and approximately 8 buoys were present marking the site boundary.

6.4.2.6 The baseline theodolite tracking was conducted immediately prior to and during the site preparation activities of the site. The baseline data records a decrease in porpoise sightings as site preparation activities commenced and notes that the decrease was most likely due to the onset of site preparation activities. The impact theodolite tracking conducted for this study records a marked increase in the number of Project related vessels and platforms and, in agreement with baseline conclusions, shows a concomitant decrease in finless porpoise sightings.

#### 6.4.3 Specific Mitigation Measures

6.4.3.1 Trainings for the MMO were provided by the ET prior to the monitoring of the Marine Mammal Exclusion Zone (MMEZ) for installation/ re-installation/ relocation process of silt curtains, with a cumulative total of 98 individuals being trained and the training records kept by the ET.

## 7. WHITE-BELLIED SEA EAGLE

### 7.1 Monitoring Requirement

- 7.1.1 On Shek Kwu Chau Island, a nest of WBSE is located about 60 m above ground within a hillside shrubland habitat, 130 m in-land from shore, about 550 m away from the proposed reclaimed land, with no human access. 3 phases monitoring programme will be comprised of pre-construction phase, construction phase and operation phase.
- 7.1.2 The Pre-Construction WBSE monitoring was started on 30 January 2018 and the location of WBSE nest was confirmed on 21 February 2018 and it is located at the western part of SKC Island (**Figure 7.1**). Two adults and two chicks were also recorded on 5<sup>th</sup> March 2018 survey till the end of the Pre-construction monitoring on 15<sup>th</sup> May 2018. Construction Phase monitoring were carried out followed by the commencement of the Construction Phase on 28<sup>th</sup> June 2018.

### 7.2 WBSE Monitoring Parameters, Time, Frequency

- 7.2.1 The objective of the construction phase monitoring should be to verify the utilisation of the area by WBSE, their responses to construction disturbance, as well as the effectiveness of the proposed mitigation measures. Throughout the construction phase, field surveys should be conducted twice per month during their core breeding season (from December to May), and once per month outside their core breeding season (from June to November). The monitoring frequency should be increased to weekly during the incubation period of each year. In order to confirm their foraging ground near the construction site, it is necessary to conduct daily monitoring during the first week of nestling period in each year.
- 7.2.2 Since the location of the WBSE nest was located at the southwest of SKC within the hillside shrubland, it is impossible to observe the eggs during incubation period. Therefore, monitoring with increased frequency during incubation period will be continued until chick was seen in the nest. Daily monitoring of 7-day consecutive monitoring will be carried out once any chick is recorded during the monitoring day. The monitoring schedule during the reporting period is provided in **Appendix C**.

### 7.3 Monitoring Location

- 7.3.1 Since there are no suitable land footings along the coast of SKC, only boat surveys were conducted. On Shek Kwu Chau Island, a nest of WBSE is located about 60 m above ground within a hillside shrubland habitat, 130 m in-land from shore, about 550 m away from the proposed reclaimed land, with no human access.

### 7.4 Monitoring Methodology

- 7.4.1 Information to be collected included feeding, perching/roosting, preening, soaring, flying, nesting and territorial guarding and the time spent on each activity. The responses and reactions to any disturbance to the WBSEs were also recorded and examined in conjunction with the construction noise and/or other events in the vicinity. Other disturbances such as weather condition, or invasion by other fauna species were also recorded.
- 7.4.2 Binocular, scope, camera, lens and GPS device used are summarized as **Table 7.1** below:

**Table 7.1 List of Equipment Used during Construction Phase Monitoring**

| Equipment   | Quantity |
|---|----------|
| Swarovski EL 8.5 x 42 Binocular                     | 1        |
| Swarovski EL Range 8 x 42 Binocular                 | 1        |
| Swarovski ATX 25-60 x 85 Spotting Scope             | 1        |
| Canon 1Dx Mark II Camera                            | 1        |
| Canon EF300mm F2.8 Lens with Canon 2x Teleconverter | 1        |
| Canon PowerShot G7X Camera                          | 1        |
| Garmin GPSMAP 64S                                   | 1        |

7.4.3 If event such as absence of White-bellied Sea Eagle during a whole day of monitoring was found during WBSE monitoring, the actions in accordance with the Event and Action Plan should be carried out according to **Appendix M**.

#### 7.5 Results and Observations

7.5.1 To verify the utilization of the area by WBSE, their responses to construction disturbance, as well as the effectiveness of the proposed mitigation measures. Since there is no landing point long the western part of SKC, boat survey were used for the monitoring survey. The WBSE, monitoring survey was carried out in the morning. The weather condition of monitoring survey was shown in **Table 7.2**.

| Date                         | Condition   | Temperature (°C) |
|------------------------------|---|------------------|
| 29 <sup>th</sup> August 2022 | - Southeast force 3<br>- Mainly cloudy with a few showers.<br>Sunny intervals during the day. | 33               |

7.5.2 During the monitoring survey, the two adult WBSEs and one juvenile were recorded staying around the new nest (**Figure 7.1**). No abnormal behaviors of the adults and chick were recorded.

7.5.3 All marine works during the monitoring period did not show any effect to the WBSE.

7.5.4 No disturbances from anthropogenic activities on the island were recorded during the monitoring survey. However, fishing boats were observed moving close to the shore. No invasion of other fauna species was recorded.

7.5.5 There was no sign of using the construction site as a foraging ground.

7.5.6 A construction phase monitoring will be continued once per month outside their core breeding season (between June to November) in order to monitor the utilization of the area by WBSE and their responses to construction disturbance.

**Figure 7.1 Location of WBSE Nest on SKC**

7.5.7 Photo record of WBSE from the survey in this reporting month is shown below:

Juvenile WBSE recorded near the nest on 29<sup>th</sup> August 2022

Adult WBSE staying near the nest on 29<sup>th</sup> August 2022

**Figure 7.2 Photo Records of WBSE on SKC during the Reporting Period**

## 8. SUMMARY OF MONITORING EXCEEDANCE, COMPLAINTS, NOTIFICATION OF SUMMONS AND PROSECUTIONS

8.1 The Environmental Complaint Handling Procedure is shown in **Figure 8.1**.

**Figure 8.1 Environmental Complaint Handling Procedures**

**Table 8.1 Summary of SS Compliance Status at Impact Stations (Mid-Ebb Tide)**

| Date                         | B1       | B2       | B3       | B4       | CR1      | CR2      | F1A      | H1       | S1       | S2A      | S3       | M1       |
|------------------------------|----------|----------|----------|----------|----------|----------|----------|----------|----------|----------|----------|----------|

8.2 During the reporting period, one (1) of the general water quality monitoring results of suspended solids (SS) obtained had exceeded Action Level. Three (3) of general water quality monitoring results of SS obtained during the reporting period had exceeded the Limit Level. Investigations were carried out for each exceedance during the reporting period.

8.3 No project-related Action Level or Limit Level exceedance of regular water quality monitoring was recorded from the 1 August 2022 to 31 August 2022 as shown in **Appendix N** and no exceedance of the Action and Limit Levels of the regular WBSE monitoring was recorded during the reporting period.

8.4 The scheduled water quality monitoring event on 10 August 2022 was cancelled due to adverse weather under tropical storm Mulan. A supplementary water quality monitoring event was conducted on 14 August 2022.

8.5 The scheduled water quality monitoring event for flood tide on 24 August 2022 was cancelled due to adverse weather under severe tropical storm Ma-on.

8.6 No notification of summons and prosecution was received in the reporting period.

8.7 Statistics on complaints, notifications of summons and successful prosecutions are summarized in **Appendix O**.

## 9. EM&A SITE INSPECTION

9.1 Site inspections were carried out on a weekly basis to monitor the implementation of proper environmental pollution control and mitigation measures under the Contract. In the reporting period, site inspections were carried out on 02, 09, 15, 23, 30 August 2022 at the site portions listed in **Table 9.1** below.

**Table 9.1 Site Inspection Record**

| Date           | Inspected Site Portion                    | Time                |
|----------------|---|---------------------|
| 02 August 2022 | Portion 1, 1A & 1B (near SKC)             | 11:30 AM – 12:30 PM |
| 09 August 2022 | Portion 8 (TKO sorting area)              | 10:15 AM – 10:45 AM |
| 15 August 2022 | Portion 9 (New site office at Siu Ho Wan) | 10:05 AM – 11:00 AM |
| 23 August 2022 | Portion 1, 1A & 1B (near SKC)             | 10:30 AM – 11:30 AM |
| 30 August 2022 | Portion 1, 1A & 1B (near SKC)             | 11:00 AM – 12:00 NM |

9.2 One joint site inspection with IEC was carried out on 23 August 2022.

9.3 Environmental deficiencies were observed during weekly site inspection. Key observations during the site inspections of the reporting period are summarized in **Table 9.2**.

**Table 9.2 Site Observations**

| Date                                | Environmental Observations  | Follow-up Status  |
|-------------------------------------|---|---|
| 02 August 2022<br>(Site inspection) | <u>Observation(s) and Recommendation(s)</u><br>1. At caisson 3, soil at the edge of caisson should be removed, stockpile of dusty material should be covered with impervious sheeting.<br>2. No noise emission label was presented on air compressor YAO80.<br>3. The faded NRMM label of generator 3872573 should be replaced. | 1. At caisson 3, soil at the edge of caisson had been removed, stockpile of dusty material had been covered with impervious sheeting.<br>2. Noise emission label had been presented on air compressor YAO80.<br>3. The faded NRMM label of generator 3872573 had been replaced. |
| 09 August 2022<br>(Site inspection) | <u>Observation(s) and Recommendation(s)</u><br>Nil  | Nil   |
| 15 August 2022<br>(Site inspection) | <u>Observation(s) and Recommendation(s)</u><br>Nil  | Nil   |
| 23 August 2022<br>(Site inspection) | <u>Observation(s) and Recommendation(s)</u><br>1. No NRMM label was presented on generator 2329.  | 1. NRMM label had been posted on generator 2329.  |
| 30 August 2022<br>(Site inspection) | <u>Observation(s) and Recommendation(s)</u><br>1. At work area of Hua Hang (華航), chemical in-use should be placed on drip tray, the empty bottle should be stored inside chemical waste cabinet or separately stored for recycling.   | 1. At work area of Hua Hang (華航), the chemical had been separately stored for off-site reuse.   |

| <b>Date</b> | <b>Environmental Observations</b>  | <b>Follow-up Status</b>   |
|-------------|--|---|
|             | 2. At work area of Hua Hang (華航), stagnant water inside drip tray should be removed. | 2. At work area of Hua Hang (華航), stagnant water inside drip tray had been removed. |

9.4 The Contractor had rectified all the observations identified during environmental site inspections in the reporting period.

9.5 According to the EIA Study Report, Environmental Permit, contract documents and Updated EM&A Manual, the mitigation measures detailed in the documents are implemented as much as practical during the reporting period. An updated Implementation Status of Environmental Mitigation Measures (EMIS) is provided in **Appendix B**.

## 10. FUTURE KEY ISSUES

10.1 Works to be undertaken in the next reporting month are:

- Reclamation Area:
  - Reclamation works
  - Installation of Instrumentation
  - Site Investigation works for foundation
  - Foundation works (including Driven H Pile and Socketed H Pile)
  - Pile cap construction
  - Structural steel work
- Seawall Portion:
  - Installation of Chinese Pod
  - Caisson extension works, from +3mPD to +6mPD, at Seawall A and B
  - Construction of wave wall along the vertical seawall

10.2 Potential environmental impacts arising from the above construction activities are mainly associated with water quality, construction noise, waste management and ecology.

10.3 The key environmental mitigation measures for the Project in the coming reporting period expected to be associated with the construction activities include:

- Reduction of noise from equipment and machinery on-site;
- Sorting, recycling, storage and disposal of general refuse and construction waste;
- Management of chemicals and avoidance of oil spillage on-site, especially under heavy rains and adverse weather;
- Confirmation of the absence of silt content in the rock filling material and the filling work is properly conducted;
- Dust control of exposed soil surface and stockpile of dusty material at reclaimed area;
- Dust suppression measures for exposed earth surface and stockpile of dusty material;
- Site runoff control measure during rainstorm; and
- Dust and noise control of foundation works.

10.4 The tentative schedule of regular construction noise, water quality and ecology monitoring in the next reporting period is presented in **Appendix P**. The regular construction noise, water quality and ecology monitoring will be conducted at the same monitoring locations in the next reporting period.

## **11. CONCLUSION AND RECOMMENDATIONS**

11.1 This 50<sup>th</sup> monthly Environmental Monitoring and Audit (EM&A) Report presents the EM&A works undertaken during the period from 1 August to 31 August 2022, in accordance with the Updated EM&A Manual and the requirement under EP-429/2012/A and FEP-01/429/2012/A.

11.2 Construction noise, water quality, construction waste, marine mammal and WBSE monitoring were carried out in the reporting period. No project-related exceedance of the Action and Limit Level was recorded from 1 August to 31 August 2022.

11.3 Weekly environmental site inspections were conducted during the reporting period. Environmental deficiencies were observed during site inspection and were rectified.

11.4 According to the environmental site inspections performed in the reporting month, the Contractor was reminded to pay attention on the proper storage of the chemicals, presenting valid NRMM and noise emission label on powered mechanical equipment and dust control measure by covering the stockpile of dusty material with impervious sheeting.

11.5 No environmental complaint was received in the reporting period.

11.6 No notification of summon or prosecution was received since commencement of the Contract.

11.7 The ET will keep track of the construction works to confirm compliance of environmental requirements and the proper implementation of all necessary mitigation measures.

| S5b.8.1.3 | There is a need to apply to EPD for a discharge license for discharge of effluent from the construction site under the WPCO. The discharge quality must meet the requirements specified in the discharge license. All the run-off and wastewater generated from the works areas should be treated so that it satisfies all the standards listed in the TM-DSS. The beneficial uses of the treated effluent for other on-site activities such as dust suppression and general cleaning etc., can minimize water consumption and reduce the effluent discharge volume. If monitoring of the treated effluent quality from the works areas is required during the construction phase of the Project, the monitoring should be carried out in accordance with the relevant WPCO license which is under the ambit of regional office of EPD. | Work site / During the construction period | Contractor           |                        | ✓ |   |     | EIAO-TM; ProPECC PN 1/94; WPCO      | Discharge License was issued on 15/02/2022                        |
| S5b.8.1.4 | <u>Accidental Spillage</u><br>Contractor must register as a chemical waste producer if chemical wastes would be produced from construction activities. The Waste Disposal Ordinance (Cap 354) and its subsidiary regulations in particular the Waste Disposal (Chemical Waste) (General) Regulation should be observed and complied with for control of chemical wastes.  | Work site / During the construction period | Contractor           |                        | ✓ |   |     | EIAO-TM; ProPECC PN 1/94; WPCO; WDO | Deficiency of Mitigation Measures but rectified by the Contractor |
| S5b.8.1.5 | Maintenance of vehicles and equipment involving activities with potential for leakage and spillage should only be undertaken within the areas which   | Work site / During the construction period | Contractor           |                        | ✓ |   |     | EIAO-TM; ProPECC PN 1/94; WPCO; WDO | Implemented   |

Remarks:  
1. Daytime Noise Monitoring (07:00-1900), Evening Time Noise Monitoring (1900-2300), Night Time Noise Monitoring (2300-0700)  
2. Water Quality Monitoring for S1,S2 and S3 will only conduct during DCM works, refer to Detailed DCM Plan

Note:  
\* - as per Marine Department Notice No 107 of 2018, all vessels employed for the works should stay in the works area outside the hours of works (0700 to 2300). Due to safety concern, Water Quality Monitoring would start at 0800.  
# - Prioritized routing, Mid-Ebb: C1→S3→CR2→CR1→H1→Remaining stations and Mid-Flood: C2→CR1→S3→CR2→H1→Remaining stations  
\$ - Since predicted tide is shorter than 3.5 hours, method of 90% tidal period as monitoring time is approached.  
& - Due to safety concern for sampling event in night-time, method of 90% tidal period as monitoring time is approached and end at 1900.  
^ - The noise monitoring event on 12/8/2022 was cancelled due to the emergency operation of Shek Kwu Chau Treatment and Rehabilitation Centre.  
% - The impact water monitoring event on 10/8/2022 and flood tide on 24/8/2022 was cancelled due to the adverse weather under typhoon.

## Appendix D Water Quality Monitoring Data

Integrated Waste Management Facilities, Phase 1

Remark:

Note 1: Measurements of turbidity would be rounding to 0.1 NTU for proven accuracy as per the equipment specs during utilization of data.

# Salinity (Depth-averaged) during MID-FLOOD

# Salinity (Depth-averaged) during MID-EBB

## Dissolved Oxygen (Surface & Middle) during MID-FLOOD

Note:

1. The Action and Limit Level of dissolved oxygen can be referred to **Table 2.8** of the monthly EM&A report.

## Dissolved Oxygen (Surface & Middle) during MID-EBB

Note:

1. The Action and Limit Level of dissolved oxygen can be referred to **Table 2.8** of the monthly EM&A report.

## Dissolved Oxygen (Bottom) during MID-FLOOD

Note:

1. The Action and Limit Level of dissolved oxygen can be referred to **Table 2.8** of the monthly EM&A report.

## Dissolved Oxygen (Bottom) during MID-EBB

Note:

1. The Action and Limit Level of dissolved oxygen can be referred to **Table 2.8** of the monthly EM&A report.

## Turbidity (Depth-averaged) during MID-FLOOD

Note:

1. The Action and Limit Level of turbidity can be referred to **Table 2.8** of the monthly EM&A report.

## Turbidity (Depth-averaged) during MID-EBB

Note:

1. The Action and Limit Level of turbidity can be referred to **Table 2.8** of the monthly EM&A report.

## Suspended Solids (Depth-averaged) during MID-FLOOD

Note:

1. The Action and Limit Level of suspended solids can be referred to **Table 2.8** of the monthly EM&A report.

## Suspended Solids (Depth-averaged) during MID-EBB

Note:

1. The Action and Limit Level of suspended solids can be referred to **Table 2.8** of the monthly EM&A report

## Temperature (Depth-averaged) during MID-FLOOD

Note:

1. The Action and Limit Level of temperature can be referred to **Table 2.8** of the monthly EM&A report.

## Temperature (Depth-averaged) during MID-EBB

Note:

1. The Action and Limit Level of temperature can be referred to **Table 2.8** of the monthly EM&A report.

## Appendix E HOKLAS Laboratory Certificate

Hong Kong Accreditation Service  
香港認可處

**Certificate of Accreditation**  
認可證書

*This is to certify that*  
特此證明

**ALS TECHNICHEM (HK) PTY LIMITED**

11/F., Chung Shun Knitting Centre, 1-3 Wing Yip Street, Kwai Chung, New Territories, Hong Kong  
香港新界葵涌永業街1-3號忠信針織中心11樓

*has been accepted by the HKAS Executive, on the recommendation of the Accreditation Advisory Board, as a  
為香港認可處執行機關根據認可諮詢委員會建議而接受的*

**HOKLAS Accredited Laboratory**  
「香港實驗所認可計劃」認可實驗所

*This laboratory meets the requirements of ISO / IEC 17025 : 2005 – General requirements for the competence  
此實驗所符合ISO / IEC 17025 : 2005 – 《測試及校正實驗所能力的通用規定》所訂的要求。  
of testing and calibration laboratories and it has been accredited for performing specific tests or calibrations as  
這項認可資格演示在指定範疇所需的技術能力及實驗所質量管理體系的運作

## Appendix F Water Quality Equipment Calibration Certificate

專業化驗有限公司

QUALITY PRO TEST-CONSULT LIMITED

Unit 10, 14/F, Wah Wai Centre, 38-40 Au Pui Wan St., Fotan, Hong Kong

Email: info@qualityprotest.com; Website: www.qualityprotest.com

Tel: (852) 3956 8717; Fax: (852) 3956 3928

## REPORT OF EQUIPMENT PERFORMANCE CHECK/ CALIBRATION

Test Report No. : R-BB080029  
Date of Issue : 05 August 2022  
Page No. : 1 of 2

### PART A - CUSTOMER INFORMATION

Acuity Sustainability Consulting Limited  
Unit E, 12/F, Ford Glory Plaza 37-39 Wing Hong Street, Cheung Sha Wan  
Kowloon (HK) Hong Kong

### PART B - SAMPLE INFORMATION

Name of Equipment : HORIBA U-53  
Manufacturer : HORIBA  
Serial Number : PPHNOMXY  
Date of Received : 02 August 2022  
Date of Calibration : 04 August 2022  
Date of Next Calibration : 03 November 2022  
Request No. : D-BB080029

### PART C - REFERENCE METHODS/ DOCUMENTS FOR THE CALIBRATION

| Test Parameter   | Reference Method  |
|------------------|---|
| pH value         | APHA 21e 4500 H+  |
| Temperature      | Section 6 of international Accreditation New Zealand Technical Guide no. 3 Second edition March 2008: Working Thermometer Calibration Procedure |
| Salinity         | APHA 21e 2520B  |
| Dissolved oxygen | APHA 21e 4500 O   |
| Turbidity        | APHA 21e 2130B  |

### PART D - CALIBRATION RESULT

#### (1) pH value

| Target (pH unit) | Display Reading (pH unit) | Tolerance | Result       |
|------------------|---------------------------|-----------|--------------|
| 4.00             | 3.99                      | -0.01     | Satisfactory |
| 7.42             | 7.27                      | -0.15     | Satisfactory |
| 10.01            | 9.84                      | -0.17     | Satisfactory |

Tolerance of pH value should be less than  $\pm 0.2$  (pH unit)

#### (2) Temperature

| Reading of Ref. thermometer (°C) | Display Reading (°C) | Tolerance | Result       |
|----------------------------------|----------------------|-----------|--------------|
| 18.0                             | 18.3                 | 0.3       | Satisfactory |
| 27.0                             | 26.8                 | -0.2      | Satisfactory |
| 32.0                             | 31.9                 | -0.1      | Satisfactory |

Tolerance of Temperature should be less than  $\pm 2.0$  (°C)

#### (3) Salinity

| Expected Reading (g/L) | Display Reading (g/L) | Tolerance (%) | Result       |
|------------------------|-----------------------|---------------|--------------|
| 10                     | 10.60                 | 6.00          | Satisfactory |
| 20                     | 21.97                 | 9.85          | Satisfactory |
| 30                     | 32.96                 | 9.87          | Satisfactory |

Tolerance of Salinity should be less than  $\pm 10.0$  (%)

## REPORT OF EQUIPMENT PERFORMANCE CHECK/ CALIBRATION

Test Report No. : R-BB080029

Date of Issue : 05 August 2022

Page No. : 2 of 2

### (4) Dissolved oxygen

| Expected Reading ( mg/L ) | Display Reading ( mg/L ) | Tolerance | Result       |
|---------------------------|--------------------------|-----------|--------------|
| 7.76                      | 7.69                     | -0.07     | Satisfactory |
| 5.19                      | 5.06                     | -0.13     | Satisfactory |
| 2.88                      | 2.49                     | -0.39     | Satisfactory |
| 0.07                      | 0.21                     | 0.14      | Satisfactory |

Tolerance of Dissolved oxygen should be less than  $\pm 0.5$  ( mg/L )

### (5) Turbidity

| Expected Reading ( NTU ) | Display Reading ( NTU ) | Tolerance ( % ) | Result       |
|--------------------------|-------------------------|-----------------|--------------|
| 0                        | 0.00                    | --              | Satisfactory |
| 10                       | 9.87                    | -1.30           | Satisfactory |
| 20                       | 19.9                    | -0.50           | Satisfactory |
| 100                      | 101                     | 1.00            | Satisfactory |
| 800                      | 805                     | 0.60            | Satisfactory |

Tolerance of Turbidity should be less than  $\pm 10.0$  ( % )

### Remark(s)

- The "Date of Next Calibration" is recommended according to best practice principals as practiced by QPT or quoted form relevant international standards.
- The results relate only to the calibrated equipment as received
- The performance of the equipment stated in this report is checked with independent reference material and results compared against a calibrated secondary source.
- "Displayed Reading" denotes the figure shown on item under calibration/ checking regardless of equipment precision or significant figures.
- The "Tolerance Limit" mentioned is the acceptance criteria applicable for similar equipment used by Quality Pro Test-Consult Ltd. or quoted form relevant international standards.

## REPORT OF EQUIPMENT PERFORMANCE CHECK/ CALIBRATION

**Test Report No.** : R-BB070028  
**Date of Issue** : 13 July 2022  
**Page No.** : 1 of 2

### PART A - CUSTOMER INFORMATION

Acuity Sustainability Consulting Limited  
 Unit E, 12/F, Ford Glory Plaza 37-39 Wing  
 Hong Street, Cheung Sha Wan  
 Kowloon (HK) Hong Kong  
 Attn :

### PART B - SAMPLE INFORMATION

Name of Equipment : YSI ProDSS (Multi-Parameters)  
 Manufacturer : YSI (a xylem brand)  
 Serial Number : 22C106561  
 Date of Received : 08 July 2022  
 Date of Calibration : 11 July 2022  
 Date of Next Calibration : 10 October 2022

### PART C - REFERENCE METHODS/ DOCUMENTS FOR THE CALIBRATION

| <u>Test Parameter</u> | <u>Reference Method</u>   |
|-----------------------|---|
| Turbidity             | APHA 21e 2130B  |
| Dissolved oxygen      | APHA 21e 4500 O   |
| pH value              | APHA 21e 4500 H+  |
| Salinity              | APHA 21e 2520B  |
| Temperature           | Section 6 of international Accreditation New Zealand Technical Guide no. 3 Second edition March 2008: Working Thermometer Calibration Procedure |

### PART D - CALIBRATION RESULT

#### (1) Turbidity

| Expected Reading ( NTU ) | Display Reading ( NTU ) | Tolerance ( % ) | Result       |
|--------------------------|-------------------------|-----------------|--------------|
| 0                        | 0.13                    | --              | Satisfactory |
| 10                       | 9.91                    | -0.90           | Satisfactory |
| 20                       | 19.52                   | -2.40           | Satisfactory |
| 100                      | 96.50                   | -3.50           | Satisfactory |
| 800                      | 783.45                  | -2.10           | Satisfactory |

Tolerance of Turbidity should be less than  $\pm 10.0$  ( % )

#### (2) Dissolved oxygen

| Expected Reading ( mg/L ) | Display Reading ( mg/L ) | Tolerance | Result       |
|---------------------------|--------------------------|-----------|--------------|
| 7.71                      | 7.67                     | -0.04     | Satisfactory |
| 4.57                      | 4.88                     | 0.31      | Satisfactory |
| 2.73                      | 2.67                     | -0.06     | Satisfactory |
| 0.05                      | 0.26                     | 0.21      | Satisfactory |

Tolerance of Dissolved oxygen should be less than  $\pm 0.5$  ( mg/L )

#### (3) pH value

| Target ( pH unit ) | Display Reading ( pH unit ) | Tolerance | Result |
|--------------------|-----------------------------|-----------|--------|
|--------------------|-----------------------------|-----------|--------|

## REPORT OF EQUIPMENT PERFORMANCE CHECK/ CALIBRATION

Test Report No. : R-BB070028

Date of Issue : 13 July 2022

Page No. : 2 of 2

| Target (pH unit) | Display Reading (pH unit) | Tolerance | Result       |
|------------------|---------------------------|-----------|--------------|
| 4.00             | 3.97                      | -0.03     | Satisfactory |
| 7.42             | 7.49                      | 0.07      | Satisfactory |
| 10.01            | 10.07                     | 0.06      | Satisfactory |

Tolerance of pH value should be less than  $\pm 0.2$  (pH unit)

### (4) Salinity

| Expected Reading (g/L) | Display Reading (g/L) | Tolerance (%) | Result       |
|------------------------|-----------------------|---------------|--------------|
| 10                     | 9.72                  | -2.80         | Satisfactory |
| 20                     | 20.35                 | 1.75          | Satisfactory |
| 30                     | 31.26                 | 4.20          | Satisfactory |

Tolerance of Salinity should be less than  $\pm 10.0$  (%)

### (5) Temperature

| Reading of Ref. thermometer ( $^{\circ}\text{C}$ ) | Display Reading ( $^{\circ}\text{C}$ ) | Tolerance | Result       |
|--|--|-----------|--------------|
| 16.0   | 15.8                                   | -0.2      | Satisfactory |
| 26.0   | 25.7                                   | -0.3      | Satisfactory |
| 32.1   | 32.0                                   | -0.1      | Satisfactory |

Tolerance of Temperature should be less than  $\pm 2.0$  ( $^{\circ}\text{C}$ )

### Remark(s)

## REPORT OF EQUIPMENT PERFORMANCE CHECK/ CALIBRATION

Test Report No. : R-BB060031

Date of Issue : 17 June 2022

Page No. : 2 of 2

| TARGET ( PH UNIT ) | DISPLAY READING ( PH UNIT ) | TOLERANCE | RESULT       |
|--------------------|-----------------------------|-----------|--------------|
| 4.00               | 4.00                        | 0.00      | Satisfactory |
| 7.42               | 7.42                        | 0.00      | Satisfactory |
| 10.01              | 10.16                       | 0.15      | Satisfactory |

Tolerance of pH value should be less than  $\pm 0.2$  ( pH unit )

### (4) Salinity

| EXPECTED READING ( G/L ) | DISPLAY READING ( G/L ) | TOLERANCE ( % ) | RESULT       |
|--------------------------|-------------------------|-----------------|--------------|
| 10                       | 9.04                    | -9.60           | Satisfactory |
| 20                       | 18.93                   | -5.35           | Satisfactory |
| 30                       | 29.25                   | -2.50           | Satisfactory |

Tolerance of Salinity should be less than  $\pm 10.0$  ( % )

### (5) Temperature

| READING OF REF. THERMOMETER ( °C ) | DISPLAY READING ( °C ) | TOLERANCE | RESULT       |
|------------------------------------|------------------------|-----------|--------------|
| 16.0                               | 16.07                  | 0.07      | Satisfactory |
| 24.0                               | 23.99                  | -0.01     | Satisfactory |
| 34.0                               | 33.73                  | -0.27     | Satisfactory |

Tolerance of Temperature should be less than  $\pm 2.0$  ( °C )

### Remark(s)

- The "Date of Next Calibration" is recommended according to best practice principals as practiced by QPT or quoted form relevant international standards.
- The results relate only to the calibrated equipment as received
- The performance of the equipment stated in this report is checked with independent reference material and results compared against a calibrated secondary source.
- "Displayed Reading" denotes the figure shown on item under calibration/ checking regardless of equipment precision or significant figures.

| Limit level being exceeded by more than one consecutive sampling days | <p>Identify source(s) of impact; Inform IEC, Contractor and EPD;<br/>                     Check monitoring data, all plant, equipment and Contractor's working methods.<br/>                     Discuss mitigation measures with IEC, SO and Contractor.<br/>                     Ensure mitigation measures are implemented;<br/>                     Increase the monitoring frequency to daily until no exceedance of Limit level for two consecutive days.<br/>                     (The above actions should be taken within 1 working day after Limit Level being exceeded by two consecutive sampling days)</p> | <p>Discuss with ET and Contractor on the mitigation measures;<br/>                     Review proposals on mitigation measures submitted by Contractor and advise the SO accordingly;<br/>                     Assess the effectiveness of the implemented mitigation measures.<br/>                     (The above actions should be taken within 1 working day after Limit Level being exceeded by two consecutive sampling days)</p> | <p>Discuss with IEC, ET and Contractor on the proposed mitigation measures;<br/>                     Request Contractor to critically review the working methods;<br/>                     Make agreement on the mitigation measures to be implemented.<br/>                     Assess the effectiveness of the implemented measures.<br/>                     Consider and instruct, if necessary, the Contractor to slow down or to stop all or part of the marine work until no exceedance of Limit level.<br/>                     (The above actions should be taken within 1 working day after Limit Level being exceeded by two consecutive sampling days)</p> | <p>Inform the SO and confirm notification of the non-compliance in writing;<br/>                     Rectify unacceptable practice;<br/>                     Check all plant and equipment;<br/>                     Consider changes of working methods;<br/>                     Discuss with ET, IEC and SO and propose mitigation measures to IEC and SO within 3 working days;<br/>                     Implement the agreed mitigation measures;<br/>                     As directed by the SOR, to slow down or to stop all or part of the marine work or construction activities.<br/>                     (The above actions should be taken within 1 working day after Limit Level being exceeded by two consecutive sampling days)</p> |

## Appendix H Noise Monitoring Equipment Calibration Certificate

# Certificate of Calibration

for

**Description:** *Sound Level Meter*  
**Manufacturer:** *SVANTEK*  
**Type No.:** *971 (Serial No.: 96063)*  
**Microphone:** *ACO 7052 E (Serial No.:78092)*  
**Preamplifier:** *SVANTEK SV 18 (Serial No.:97278)*

**Submitted by:**

**Customer:** *Acuity Sustainability Consulting Limited*  
**Address:** *Unit E, 12/F., Ford Glory Plaza,  
Nos. 37-39 Wing Hong Street,  
Cheung Sha Wan, Kowloon, Hong Kong*

Upon receipt for calibration, the instrument was found to be:

- Within**
- Outside**

the allowable tolerance.

The test equipment used for calibration are traceable to National Standards via:

- The Government of The Hong Kong Special Administrative Region Standard & Calibration Laboratory

**Date of receipt:** 21 June 2022

**Date of calibration:** 27 June 2022

**Date of NEXT calibration:** 26 June 2023

**Calibrated by:**   
Calibration Technician

**Certified by:**   
Mr. Tang Cheuk Hang  
Quality Manager

**Date of issue:** 27 June 2022

Certificate No.: APJ22-029-CC001

**1. Calibration Precaution:**

- The unit-under-test (UUT) was allowed to stabilize in the laboratory for over 24 hours, and switched on to warm up for over 10 minutes before the commencement of the test.
- The results presented are the mean of 3 measurements at each calibration point.

**2. Calibration Conditions:**

Air Temperature: 24.2 °C  
 Air Pressure: 1004 hPa  
 Relative Humidity: 60.8 %

**3. Calibration Equipment:**

|                          | Type     | Serial No. | Calibration Report Number | Traceable to |
|--------------------------|----------|------------|---------------------------|--------------|
| Multifunction Calibrator | B&K 4226 | 2288467    | AV200041                  | HOKLAS       |

**4. Calibration Results**

Sound Pressure Level

Reference Sound Pressure Level

## 5. Calibration Results Applied

The results apply to the particular unit-under-test only. All calibration points are within manufacture's specification as IEC 61672 Class 1.

Uncertainties of Applied Value:

|        |         |        |
|--------|---------|--------|
| 94 dB  | 31.5 Hz | ± 0.10 |
|        | 63 Hz   | ± 0.05 |
|        | 125 Hz  | ± 0.05 |
|        | 250 Hz  | ± 0.05 |
|        | 500 Hz  | ± 0.05 |
|        | 1000 Hz | ± 0.05 |
|        | 2000 Hz | ± 0.05 |
|        | 4000 Hz | ± 0.05 |
|        | 8000 Hz | ± 0.10 |
| 104 dB | 1000 Hz | ± 0.05 |
| 114 dB | 1000 Hz | ± 0.05 |

The uncertainties are evaluated for a 95% confidence level.

### Note:

The values given in this certification only related to the values measured at the time of the calibration and any uncertainties quoted will not allow for the equipment long-term drift, variations with environmental changes, vibration and shock during transportation, overloading, mis-handling, or the capability of any other laboratory to repeat the calibration. (A+A)\*L shall not be liable for any loss or damage resulting from the use of the equipment.

for

**Description:** *Sound Level Meter*  
**Manufacturer:** *SVANTEK*  
**Type No.:** *971 (Serial No.: 96062)*  
**Microphone:** *ACO 7052 E (Serial No.:79778)*  
**Preamplifier:** *SVANTEK SV 18 (Serial No.:97276)*

**Submitted by:**

**Customer:** *Acuity Sustainability Consulting Limited*  
**Address:** *Unit E, 12/F., Ford Glory Plaza,  
Nos. 37-39 Wing Hong Street,  
Cheung Sha Wan, Kowloon, Hong Kong*

Upon receipt for calibration, the instrument was found to be:

- Within (31.5 Hz to 4k Hz)**  
 **Outside**

the allowable tolerance.

The test equipment used for calibration are traceable to National Standards via:

- The Government of The Hong Kong Special Administrative Region Standard & Calibration Laboratory

**Date of receipt: 21 June 2022**

**Date of calibration: 27 June 2022**

**Date of NEXT calibration: 26 June 2023**

**Calibrated by:**   
\_\_\_\_\_ **Calibration Technician**

**Certified by:**   
\_\_\_\_\_ **Mr. Tang Cheuk Hang**  
**Quality Manager**

**Date of issue: 27 June 2022**

**Certificate No.: APJ22-029-CC002**

Page 1 of 4

**Calibration Precaution:**

- The unit-under-test (UUT) was allowed to stabilize in the laboratory for over 24 hours, and switched on to warm up for over 10 minutes before the commencement of the test.
- The results presented are the mean of 3 measurements at each calibration point.

**1. Calibration Conditions:**

Air Temperature: 24.2 °C  
 Air Pressure: 1004 hPa  
 Relative Humidity: 60.8 %

**2. Calibration Equipment:**

|                          | Type     | Serial No. | Calibration Report Number | Traceable to |

#### 4. Calibration Results Applied

The results apply to the particular unit-under-test only. All calibration points are within manufacture's specification as IEC 61672 Class 1.

Uncertainties of Applied Value:

|        |         |        |
|--------|---------|--------|
| 94 dB  | 31.5 Hz | ± 0.15 |
|        | 63 Hz   | ± 0.05 |
|        | 125 Hz  | ± 0.05 |
|        | 250 Hz  | ± 0.05 |
|        | 500 Hz  | ± 0.05 |
|        | 1000 Hz | ± 0.05 |
|        | 2000 Hz | ± 0.05 |
|        | 4000 Hz | ± 0.10 |
| 104 dB | 1000 Hz | ± 0.05 |
| 114 dB | 1000 Hz | ± 0.05 |

The uncertainties are evaluated for a 95% confidence level.

Note:

The values given in this certification only related to the values measured at the time of the calibration and any uncertainties quoted will not allow for the equipment long-term drift, variations with environmental changes, vibration and shock during transportation, overloading, mis-handling, or the capability of any other laboratory to repeat the calibration. (A+A)\*L shall not be liable for any loss or damage resulting from the use of the equipment.

**Submitted by:**

**Customer:** *Acuity Sustainability Consulting Limited*  
**Address:** *Unit 1908, Nos. 301-305 Castle Peak Road, Kwai Chung, N.T.*

Upon receipt for calibration, the instrument was found to be:

- Within (31.5 Hz to 4000Hz)  
 Outside

the allowable tolerance.

The test equipment used for calibration are traceable to National Standards via:

- The Government of The Hong Kong Special Administrative Region Standard & Calibration Laboratory

**Date of receipt:** 9 March 2022

**Date of calibration:** 11 March 2022

Calibrated by:   
Calibration Technician

Certified by:   
Mr. Ng Yan Wa  
Laboratory Manager

**Date of issue:** 11 March 2022

Certificate No.: APJ21-163-CC001

Page 1 of 4

**1. Calibration Precaution:**

- The unit-under-test (UUT) was allowed to stabilize in the laboratory for over 24 hours, and switched on to warm up for over 10 minutes before the commencement of the test.
- The results presented are the mean of 3 measurements at each calibration point.

**2. Calibration Conditions:**

Air Temperature: 23 °C  
 Air Pressure: 1006 hPa  
 Relative Humidity: 65 %

**3. Calibration Equipment:**

|                          | Type     | Serial No. | Calibration Report Number | Traceable to |
|--------------------------|----------|------------|---------------------------|--------------|
| Multifunction Calibrator | B&K 4226 | 2288467    | AV200041                  | HOKLAS       |

## 5. Calibration Results Applied

The results apply to the particular unit-under-test only. All calibration points are within manufacture's specification as IEC 61672 Class 1.

Uncertainties of Applied Value:

|        |         |        |
|--------|---------|--------|
| 94 dB  | 31.5 Hz | ± 0.05 |
|        | 63 Hz   | ± 0.05 |
|        | 125 Hz  | ± 0.05 |
|        | 250 Hz  | ± 0.05 |
|        | 500 Hz  | ± 0.05 |
|        | 1000 Hz | ± 0.05 |
|        | 2000 Hz | ± 0.05 |
|        | 4000 Hz | ± 0.05 |
| 104 dB | 1000 Hz | ± 0.05 |
| 114 dB | 1000 Hz | ± 0.05 |

The uncertainties are evaluated for a 95% confidence level.

### Note:

The values given in this certification only related to the values measured at the time of the calibration and any uncertainties quoted will not allow for the equipment long-term drift, variations with environmental changes, vibration and shock during transportation, overloading, mis-handling, or the capability of any other laboratory to repeat the calibration. (A+A)\*L shall not be liable for any loss or damage resulting from the use of the equipment.

## CALIBRATION CERTIFICATE

### Certificate Information

Date of Issue 27-Apr-2022

Certificate Number MLCN220926S

### Customer Information

Company Name Acuity Sustainability Consulting Limited  
Address Unit C, 11/F., Ford Glory Plaza,  
Nos. 37-39 Wing Hing Street,  
Cheung Sha Wan, Kowloon, HK

### Equipment-under-Test (EUT)

Description Sound Calibrator  
Manufacturer Svantek  
Model Number SV 33B  
Serial Number 83042  
Equipment Number --

### Calibration Particular

Date of Calibration 27-Apr-2022  
Calibration Equipment 4231(MLTE008) / AV200063 / 23-Jun-23  
1357(MLTE190) / MLEC21/05/02 / 26-May-22

Calibration Procedure MLCG00, MLCG15

|                        |            |                   |                  |
|------------------------|------------|-------------------|------------------|
| Calibration Conditions | Laboratory | Temperature       | 23 °C ± 5 °C     |
|                        |            | Relative Humidity | 55% ± 25%        |
| EUT                    |            | Stabilizing Time  | Over 3 hours     |
|                        |            | Warm-up Time      | Not applicable   |
|                        |            | Power Supply      | Internal battery |

Calibration Results Calibration data were detailed in the continuation pages.  
All calibration results were within EUT specification.

### Approved By & Date

K.O. Lo

27-Apr-2022

### Statements

- \* Calibration equipment used for this calibration are traceable to national / international standards.
- \* The results on this Calibration Certificate only relate to the values measured at the time of the calibration and the uncertainties quoted will not include allowance for the EUT long term drift, variation with environmental changes, vibration and shock during transportation, overloading, mishandling, misuse, and the capacity of any other laboratory to repeat the measurement.
- \* MaxLab Calibration Centre Limited shall not be liable for any loss or damage resulting from the use of the EUT.
- \* The copy of this Certificate is owned by MaxLab Calibration Centre Limited. No part of this Certificate may be reproduced without the prior written approval of MaxLab Calibration Centre Limited.

Unit B, 9/F., Baldwin Industrial Bldg., 16-18 Wah Sing Street, Kwai Chung, N.T., Hong Kong Tel: (852) 2116 1380 Fax: (852) 2264 6480 Email: info@maxlab.com.hk

## Appendix I Event / Action Plan for Noise Exceedance

| Event                       | Actions to be taken by Environmental Team as immediate as practicable  | Actions to be taken by Independent Environmental Checker as immediate as practicable  | Actions to be taken by Supervising Officer's Representative as immediate as practicable   | Actions to be taken by Contractor as immediate as practicable  |
|-----------------------------|--|---|---|--|
| Action Level being exceeded | <ol style="list-style-type: none"> <li>1. Notify IEC and Contractor;</li> <li>2. Carry out investigation;</li> <li>3. Report the results of investigation to the IEC, SO and Contractor;</li> <li>4. Discuss with the IEC and Contractor on remedial measures required;</li> <li>5. Increase monitoring frequency to check mitigation effectiveness. (The above actions should be taken within 2 working days after the exceedance is identified)</li> </ol>   | <ol style="list-style-type: none"> <li>1. Review the investigation results submitted by the ET;</li> <li>2. Review the proposed remedial measures by the Contractor and advise the SO accordingly;</li> <li>3. Advise the SO on the effectiveness of the proposed remedial measures. (The above actions should be taken within 2 working days after the exceedance is identified).</li> </ol> | <ol style="list-style-type: none"> <li>1. Confirm receipt of notification of failure in writing;</li> <li>2. Notify Contractor;</li> <li>3. In consolidation with the IEC, agree with the Contractor on the remedial measures to be implemented;</li> <li>4. Supervise the implementation of remedial measures. (The above actions should be taken within 2 working days after the exceedance is identified).</li> </ol>  | <ol style="list-style-type: none"> <li>1. Submit noise mitigation proposals to IEC and SO;</li> <li>2. Implement noise mitigation proposals. (The above actions should be taken within 2 working days after the exceedance is identified)</li> </ol>   |
| Limit Level being exceeded  | <ol style="list-style-type: none"> <li>1. Inform IEC, SO, Contractor and EPD;</li> <li>2. Repeat measurements to confirm findings;</li> <li>3. Increase monitoring frequency;</li> <li>4. Identify source and investigate the cause of exceedance;</li> <li>5. Carry out analysis of Contractor's working procedures;</li> <li>6. Discuss with the IEC, Contractor and SO on remedial measures required;</li> <li>7. Assess effectiveness of Contractor's remedial actions and keep IEC, EPD and SO informed of the results;</li> <li>8. If exceedance stops, cease additional monitoring. (The above actions should be taken within 2 working days after the exceedance is identified)</li> </ol> | <ol style="list-style-type: none"> <li>1. Discuss amongst SO, ET, and Contractor on the potential remedial actions;</li> <li>2. Review Contractor's remedial actions whenever necessary to assure their effectiveness and advise the SO accordingly. (The above actions should be taken within 2 working days after the exceedance is identified)</li> </ol>                                  | <ol style="list-style-type: none"> <li>1. Confirm receipt of notification of failure in writing;</li> <li>2. Notify Contractor;</li> <li>3. In consolidation with the IEC, agree with the Contractor on the remedial measures to be implemented;</li> <li>4. Supervise the implementation of remedial measures;</li> <li>5. If exceedance continues, consider stopping the Contractor to continue working on that portion of work which causes the exceedance until the exceedance is abated. (The above actions should be taken within 2 working days after the exceedance is identified)</li> </ol> | <ol style="list-style-type: none"> <li>1. Take immediate action to avoid further exceedance;</li> <li>2. Submit proposals for remedial actions to IEC and SO within 3 working days of notification;</li> <li>3. Implement the agreed proposals;</li> <li>4. Submit further proposal if problem still not under control;</li> <li>5. Stop the relevant portion of works as instructed by the SO until the exceedance is abated. (The above actions should be taken within 2 working days after the exceedance is identified)</li> </ol> |

## Appendix J Noise Monitoring Data

Location: Shek Kwu Chau Treatment & Rehabilitation Centre Hostel 1 (M1 / N\_S1)

Monitoring date: 01, 19, 22, 29 August 2022 (Daytime)  
 01&02, 19&20, 22&23, 29&30 August 2022 (Evening & Night time)

Parameter :  $L_{eq\ 30min}$  (Daytime),  $L_{eq\ 5min}$  (Evening & Night time)

Noise source other than construction activities from the Project: Nil

Noise Monitoring Data:

| Date        | Start time |   | End time | Weather | $L_{eq\ 30min}$ dB(A) / $L_{eq\ 5min}$ dB(A) | Sound Level Meter Used       | Calibrator Used          |
|-------------|------------|---|----------|---------|--|------------------------------|--------------------------|
| 01 Aug 2022 | 13:04      | - | 13:34    | Sunny   | 65.8   | SVAN 971 (Serial No. 103482) | Svantek SV33B (No.83042) |

- Notes:
- (1) Broken concrete for recycling into aggregates.
  - (2) Plastics refer to plastic bottles/ containers, plastic sheets/ foam from packaging materials.
  - (3) Use the conversion factor : 1 full load of dumping truck being equivalent to 6.5m<sup>3</sup> by volume.
  - (4) Use the conversion factor: sand density = 1.6T/m<sup>3</sup>, public fill density = 1.8T/m<sup>3</sup> and rock density = 2T/m<sup>3</sup>

- Notes:
- (1) Broken concrete for recycling into aggregates.
  - (2) Plastics refer to plastic bottles/ containers, plastic sheets/ foam from packaging materials.
  - (3) Use the conversion factor : 1 full load of dumping truck being equivalent to 6.5m<sup>3</sup> by volume.
  - (4) Use the conversion factor: sand density = 1.6T/m<sup>3</sup>, public fill density = 1.8T/m<sup>3</sup> and rock density = 2T/m<sup>3</sup>

- Notes:
- (1) Broken concrete for recycling into aggregates.
  - (2) Plastics refer to plastic bottles/ containers, plastic sheets/ foam from packaging materials.
  - (3) Use the conversion factor : 1 full load of dumping truck being equivalent to 6.5m<sup>3</sup> by volume.
  - (4) Use the conversion factor: sand density = 1.6T/m<sup>3</sup>, public fill density = 1.8T/m<sup>3</sup> and rock density = 2T/m<sup>3</sup>

Monthly Summary Waste Flow Table for 2021 (year)

Project : Integrated Waste Management Facilities, Phase 1

Contract No.: EP/SP/66/12

| Month     | Actual Quantities of Inert C&D Materials Generated Monthly |  |                          |                          |                                      |                                 |  |                                 | Actual Quantities of C&D Wastes Generated Monthly |                            |                       |                |            |  |
|-----------|--|--|--------------------------|--------------------------|--------------------------------------|---------------------------------|--|---------------------------------|---|----------------------------|-----------------------|----------------|------------|--|

- Notes:
- (1) Broken concrete for recycling into aggregates.
  - (2) Plastics refer to plastic bottles/ containers, plastic sheets/ foam from packaging materials.
  - (3) Use the conversion factor : 1 full load of dumping truck being equivalent to 6.5m<sup>3</sup> by volume.
  - (4) Use the conversion factor: sand density = 1.6T/m<sup>3</sup>, public fill density = 1.8T/m<sup>3</sup> and rock density = 2T/m<sup>3</sup>.

Monthly Summary Waste Flow Table for 2022 (year)

Project : Integrated Waste Management Facilities, Phase 1

Contract No.: EP/SP/66/12

| Month     | Actual Quantities of Inert C&D Materials Generated Monthly |  |                          |                                       |                                      |                                 |  |                                 | Actual Quantities of C&D Wastes Generated Monthly |                            |                       |                |            |  |
|-----------|--|--|--------------------------|---------------------------------------|--------------------------------------|---------------------------------|--|---------------------------------|---|----------------------------|-----------------------|----------------|------------|--|
|           | Total Quantity Generated                                   | Hard Rock and Large Broken Concrete (see Note 1) | Reused in the Contract   | Reused in other Projects (see Note 4) | Disposed as Public Fill (see Note 4) | Imported Fill Sand (see Note 4) | Imported Fill Public fill (see Note 4) | Imported Fill Rock (see Note 4) | Metals  | Paper/ cardboard packaging | Plastics (see Note 2) | Chemical Waste |            | Others, e.g. general refuse (see Note 3) |

- Notes:
- (1) Broken concrete for recycling into aggregates.
  - (2) Plastics refer to plastic bottles/ containers, plastic sheets/ foam from packaging materials.
  - (3) Use the conversion factor : 1 full load of dumping truck being equivalent to 6.5m<sup>3</sup> by volume.
  - (4) Use the conversion factor: sand density = 1.6T/m<sup>3</sup>, public fill density = 1.8T/m<sup>3</sup> and rock density = 2T/m<sup>3</sup>.

## Appendix L Event / Action Plan for Coral Monitoring

| Event                   | Action   |  |   |  |
|-------------------------|--|--|---|--|
|                         | ET Leader  | IEC  | SO  | Contractor   |
| Action Level Exceedance | 1. Check monitoring data<br>2. Inform the IEC, SO ,and Contractor of the findings;<br>3. Increase the monitoring to at least once a month to confirm findings;<br>4. Propose mitigation measures for consideration | 1. Discuss monitoring with the ET and the Contractor;<br>2. Review proposals for additional monitoring and any other measures submitted by the Contractor and advise the SO accordingly. | 1. Discuss with the IEC additional monitoring requirements and any other measures proposed by the ET;<br>2. Make the agreement on the measures to be implemented. | 1. Inform the SO and confirm notification of the non-compliance in writing;<br>2. Discuss with the ET and the IEC and propose measures to the IEC and the SO;<br>3. Implement the agreed measures. |
| Limit Level Exceedance  | 1. Undertake Steps 1-4 as in the Action Level Exceedance. If further exceedance of Limit Level, propose enhancement measures for consideration.  | 1. Discuss monitoring with the ET and the Contractor;<br>2. Review proposals for additional monitoring and any other measures submitted by the Contractor and advise the SO accordingly. | 1. Discuss with the IEC additional monitoring requirements and any other measures proposed by the ET;<br>2. Make the agreement on the measures to be implemented. | 1. Inform the SO and confirm notification of the non-compliance in writing;<br>2. Discuss with the ET and the IEC and propose measures to the IEC and the SO;<br>3. Implement the agreed measures. |

## Appendix M Event / Action Plan for White-Bellied Sea Eagle

| Event  | Action   |   |  |
|--|--|---|--|
|  | Environmental Team   | Audit Team  | Contractor                                     |
| Absence of White-bellied Sea Eagle during a whole day of monitoring. | <p>Inform audit team.</p> <p>Increase monitoring frequency to daily.</p> | <p>Inform site engineer and contractor.</p> <p>If the absence remains:</p> <ul style="list-style-type: none"> <li>• Review construction activities and noise monitoring records of the associated period;</li> <li>• Identify potential causes of the absence;</li> <li>• Propose remedial measures, such as change of construction method and sequence;</li> <li>• Confirm the feasibility of the proposed remedial measures with site engineer and contractor;</li> <li>• Discuss with environmental team about the effectiveness of the proposed remedial measures.</li> </ul> | <p>Implement the agreed remedial measures.</p> |

## Appendix N Exceedance Report

## Statistical Summary of Exceedances in the Reporting Period

| Water Quality (Regular Monitoring) |                |             |       |
|------------------------------------|----------------|-------------|-------|
| Location                           | Action Level   | Limit Level | Total |
| B1                                 | 0              | 0           | 0     |
| B2                                 | 1              | 0           | 1     |
| B3                                 | 0              | 1           | 1     |
| B4                                 | 0              | 1           | 1     |

Remarks:  
1. Daytime Noise Monitoring (07:00-1900), Evening Time Noise Monitoring (1900-2300), Night Time Noise Monitoring (2300-0700)  
2. Water Quality Monitoring for S1,S2 and S3 will only conduct during DCM works, refer to Detailed DCM Plan

Note:  
\* - as per Marine Department Notice No 107 of 2018, all vessels employed for the works should stay in the works area outside the hours of works (0700 to 2300). Due to safety concern, Water Quality Monitoring would start at 0800.  
# - Prioritized routing, Mid-Ebb: C1→S3→CR2→CR1→H1→Remaining stations and Mid-Flood: C2→CR1→S3→CR2→H1→Remaining stations  
\$ - Since predicted tide is shorter than 3.5 hours, method of 90% tidal period as monitoring time is approached.  
& - Due to safety concern for sampling event in night-time, method of 90% tidal period as monitoring time is approached and end at 1900.
