April 2005

This report has been prepared for Leighton Contractors (Asia) Ltd in accordance with the terms and conditions of appointment for KCRC Light Rail Extension - Civil, Permanent Way, traction Power and Overhead Line dated November 2001. Hyder Consulting Limited cannot accept any responsibility for any use of or reliance on the contents of this report by any third party.

TABLE OF CONTENTS

EXECUTIVE SUMMARY

1. BACKGROUND INFORMATION

- 1.1 Project Information
- 1.2 Construction Programme
- 1.3 Project Organisation and Management

2. SUMMARY OF EM&A REQUIREMENT

- 2.1 Air Quality
- 2.2 Noise
- 2.3 Water Quality

3. SUMMARY OF CONSTRUCTION ACTIVITIES

- 3.1 Construction Activities
- 3.2 EPD Permits/Licences
- 3.3 Environmental Mitigation Implementation Schedule

4. MONITORING RESULTS

- 4.1 Air Quality
- 4.2 Noise
- 4.3 Water Quality
- 4.4 Summary of Exceedances

5. NON-COMPLIANCE AND DEFICIENCY

- 5.1 Site Inspection/Audit by CET
- 5.2 Site Audit by IEC

6. WASTE MANAGEMENT

7. LANDSCAPE AND VISUAL IMPACT

8. CULTURAL HERITAGE

9. COMPLAINT

10. SUMMARY OF NOTIFICATION OF SUMMONS, SUCCESSFUL PROSECUTIONS AND CORRECTIVE ACTIONS

11. FUTURE KEY ISSUES

EXECUTIVE SUMMARY

Leighton, the main Contractor for KCRC Light Rail Extension Contract No. CC230, set up an Environmental Team to undertake the Environmental Monitoring and Audit (EM&A) works in accordance with the EM&A Manual. Hyder has been employed as the Contractor's Environmental Team (CET). This is the monthly EM&A report which summarises the impact monitoring and auditing data for March 2005.

Construction Programme

In Tuen Mun Area (including Lam Tei), major site construction activities undertaken during non-restricted hours in March 2005 included road reinstatement and landscaping works at LT1 & J6 work areas; architectural building works at J6E and San Fat Stop of Tuen Mun, box culvert outlet construction at Tuen Mun River, lifts installation at HSW & Pui To Road, recreational facilities at Siu Hong Court Variation and superstructure work for LT1 footbridge.

Construction activities undertaken during restricted hours in March 2005 included box culvert outlet construction at Tuen Mun Nullah under the Tuen Mun West Rail Station, footbridge construction work at Lam Tei and Remedial Trackwork at Tuen Mun Viaduct and Tin Shui Wai.

EPD Permits/Licences

There were six valid Construction Noise Permits (CNP) during the reporting month.

Air Quality Impact Monitoring

No action / limit level exceedance was recorded in this reporting month. The monitoring results indicate that the construction activities carried out in March 2005 were in full compliance with the air quality criteria for the project.

Noise Impact Monitoring

No exceedance of limit level was recorded during the reporting month. The monitoring results indicate that the construction activities carried out in March 2005 were in full compliance with the noise criteria for the project.

Water Quality Impact Monitoring

No water sample was collected during the reporting month.

Waste Management

4m³ of waste from sewage holding tanks and 60m³ of general office waste were disposed of to Pillar Point Sewage Treatment Works and WENT Landfill respectively in March 2005. In addition, chemical waste included 500 kg spent dry cell batteries were collected by registered Chemical Waste Collector in the reporting month.

Environmental Auditing

The CET site inspections were carried out on 7, 14, 21 and 29 March 2005. All observations, which were recorded in inspection checklists and together with the ET's recommendations, were passed to the Contractor.

Site audit was undertaken by the IEC on 30 March 2005. IEC has no specific observation or comment at either Tuen Mun works area or Lam Tei works area.

Complaints

No complaint was received during the reporting month.

Notification of Summons, Successful Prosecutions and Corrective Actions

No Notification of Summons was received during the reporting month.

Future Key Issues

The major civil construction works for Tin Shui Wai and Tuen Mun have been substantially completed.

The forecast of construction work for the upcoming three months at Lam Tei will be very similar in nature to those carried out during the reporting month. Therefore, the environmental impacts arising from the works are expected to be minimal.

1. BACKGROUND INFORMATION

1.1 PROJECT INFORMATION

The existing Light Rail (LR) system was introduced to serve residents of Tuen Mun and Yuen Long in September 1988 with an initial network of 24km, 6 routes and 41 stops. To cater for the continual development and population growth of the Northwest New Territories, the LR had further expanded in Tuen Mun and Tin Shui Wai in stages since early 1990s. In March 1995, Phase 3 of Tin Shui Wai Extension, the last portion of the existing LR extension works, was put into passenger service. The whole LR network now comprises 32km of double track, 8 routes and 57 stops. The average daily patronage in 1998 was 350,000 including 37,000 on LR feeder bus.

For the study in Tin Shui Wai Reserve Zone and Grade Separation of the LRT with Pui To Road and Tsing Lun Road in Tuen Mun, the light railway in Tin Shui Wai Reserve Zone is approximately 2.6km long and has 6 stops. The grade separation works in Tuen Mun involves elevating the existing trackworks near Junctions J6, Mj7, Mj8 and LT1. The Project sites at Tin Shui Wai, Tuen Mun Pui To Road, Lam Tei and Tin Shui Wai Phase 4 are shown in Figures 1.1, 1.2, 1.3 and 1.4 respectively.

The future horizontal alignment would generally follow the existing alignment. For the viaduct at LT1, a safety enclosure will be provided for the entire viaduct and paved track would be employed due to the constraints imposed by the overhead electricity power lines. Temporary track diversion will be located directly to the west of the existing track. The temporary track will be on ballast and at grade. The works at LT1 are an option under Contract CC230.

For the viaduct section in Pui To Road Grade Separation, a composite structure consisting of a concrete deck supported by steel portals will be adopted. All the steel elements of the portals will be encased in concrete. Except for the track directly underneath the deck of the future West Rail Tuen Mun Station, ballast track will be employed.

Temporary track diversion in Pui To Road will be close to the existing track. All steel elements of the temporary structure will also be encased in concrete.

The proposed light rail extension starts from the West Rail Tin Shui Wai (TIS) Station, runs across Tin Fuk Road at Junction C and extends along Tin Shing Road to Stop 500 at Tin Wing Road. The proposed alignment is approximately 1.5km and has 5 stops. Rectifier station R14 is located about 70m to the east of Junction C. The project site is shown in Figure 1.4.

The track in TIS Phase 4 is on ballast and at-grade for most of the sections, except on the concrete viaduct across Junction C (i.e. the junction between Tin Fuk Road and Tin Shing Road). Direct fixation will be used in the concrete viaduct.

1.2 CONSTRUCTION PROGRAMME

The construction work is commenced in September 2001. The construction period would last for approximately 3 years and would overlap with the construction work for the grade separation in Pui To Road and Tsing Lun Road.

The works programme for the project is to be finalised by the Contractor. The CET Leader shall make reference to the actual works progress and programme during the construction stage to schedule the EM&A works, and the Contractor shall provide the respective information to the CET Leader for formulating the EM&A schedule.

1.3 PROJECT ORGANISATION AND MANAGEMENT

An Environmental Team is set up for the Project construction phase. The organisation and lines of communication with respect to environmental works are shown in Figure 1.5.

In general, CET is responsible for regular on-site monitoring and audits/inspection on environmental issues and for reporting to the Contractor any potential environmental deficiencies. The Independent Environmental Checker (IEC) is responsible for carrying out the formal audit and verifying the overall environmental performance. Finally, the Environmental Manager of KCRC will manage the IEC who would review the reports prior to the submission to EPD.

2. SUMMARY OF EM&A REQUIREMENT

2.1 AIR QUALITY

2.1.1 Air Quality Parameters

Monitoring and audit of the Total Suspended Particulates (TSP) levels shall be carried out by the CET to ensure that any deteriorating air quality could be readily detected and timely action taken to rectify the situation.

1-hour and 24-hour TSP levels will be measured to indicate the impacts of construction dust on air quality. The TSP levels shall be measured by following the standard high volume sampling method as set out in the Title 40 of the Code of Federal Regulations, Chapter 1 (Part 50), Appendix B. Upon approval by the ER, 1-hour TSP levels can be measured by direct reading methods which are capable of producing comparable results as that by the high volume sampling method, to indicate short event impacts.

All relevant data including temperature, pressure, weather conditions, elapsed-time meter reading for the start and stop of the sampler, identification and weight of the filter paper, and other special phenomena and work progress of the concerned site etc. shall be recorded down in details.

2.1.2 Monitoring Equipment/Calibration

High Volume Air Sampler (HVAS) - Model GMW GS2310-105 is used for 24-hour TSP monitoring. It complies with the USEPA specifications in Appendix B Part 5 - Reference Method for the Determination of Suspended Particulate matter in the Atmosphere (High-Volume Method) of the Code of Federal Regulation dated July 1, 1991.

Calibration Kit Model - G2523 are used for calibration of the HVAS. Recalibration will be carried out in accordance with the requirements stated in the manufacturers' operating manual. The calibration worksheets are presented in Appendix I.

2.1.3 Monitoring Locations

Thirteen monitoring locations have been identified for air quality monitoring in the Particular Specification (PS) as part of the contractual requirement. Table 2.1 presents a list of the monitoring locations in the PS and also identified name of these locations. The monitoring locations at Tin Shui Wai, Tuen Mun and Lam Tei are shown in Figures 2.1 to 2.8.

| Figure No. in EIA Report | ASR No. | Description (in accordance with the PS) | Identified Name | Monitoring Equipment Placement |
|--------------------------|---------|---------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------|--------------------------------|
| GSA021/04/D0 3/001 | MA120 | Tin Shui Wai Area 31, Phase 1 Primary School | The HKFYG Lee Shau Kee Primary School <i>(Monitoring Terminated)</i> | Roof (7/F) |
| GSA021/04/D0 3/003 | MA123A | Tin Shui Wai Area 102, Phase 1, Block 4 | Ancillary Facilities Block, Tin Chak Estate (replacement) <i>(Monitoring Terminated)</i> | Roof (7/F) |
| GSA021/04/D0 3/003 | MA129A | Tin Shui Wai Area 102, Phase 5, Block 17 | Ancillary Facilities Block, Tin Yuet Estate (replacement) <i>(Monitoring Terminated)</i> | Roof (7/F) |
| GSA021/04/D0 3/002 | MA155 | Tin Shui Area 30, Kindergarten | Tin Wah Estate-Assembly of God Paul Church Kindergarten <i>(Monitoring Terminated)</i> | Roof (7/F) |
| GSA021/01/D0 3/001 | MA42A | Fire Station and Ambulance Depot | Pui To Road Mj7 – 1-storey Store Room (replacement) | Top of Store Room |
| GSA021/01/D0 3/002 | MA50 | Tuen Mun Town Plaza | Tuen Mun Town Plaza <i>(Monitoring Terminated)</i> | Podium (3/F) |
| GSA021/01/D0 3/001 | MA45 | Tuen Mun Station PDS221 Topside development (future development) | Holy Redeemer Catholic Church (replacement) <i>(Monitoring Terminated)</i> | Roof (7/F) |
| GSA021/02/D0 3/001 | MA65 | 2-storey residential house next to Ng Lau Road | Sun Hing Tsuen, Ng Lau Road. | G/F |
| GSA021/03/D0 3/001 | MA2A | Yiu Foo House, Tin Yiu Estate | Queen Elizabeth Primary School (replacement) <i>(Monitoring Terminated)</i> | Roof (7/F) |
| GSA021/03/D0 3/001 | MA6 | TWGH's Kwok Yat Wai College | TWGH's Kwok Yat Wai College <i>(Monitoring Terminated)</i> | Top of Assembly Hall |
| GSA021/03/D0 3/002 | MA10A | Yau Hong House | Tin Yau Court Car Park (3-storey) (replacement) <i>(Monitoring Terminated)</i> | Roof |
| GSA021/03/D0 3/002 | MA15A | The Church of Christ in China Hong Kong Council Fong Yan Wah School | Tin Yiu Estate II, Yiu Fung House (replacement) <i>(Monitoring Terminated)</i> | G/F |
| GSA021/03/D0 3/004 | MA33 | Queen Elizabeth School Old Student's Association Secondary School | Queen Elizabeth School Old Student's Association Secondary School <i>(Monitoring Terminated)</i> | Top of Assembly Hall |

Note: The major civil construction work for Tin Shui Wai has been substantially completed and therefore the environmental impacts arising from are expected to be minimal. The EPD / KCRC has approved the termination of the air quality monitoring programme for Tin Shui Wai Phase 4 Extension.

Table 2.1 List of Air Quality Monitoring Locations

2.1.4 Action and Limit Levels

The baseline monitoring results form the basis for determining the air quality criteria for the impact monitoring. The CET shall compare the impact monitoring results with air quality criteria set up for 24-hr TSP and 1-hr TSP. Table 2.2 and Table 2.3 show the air quality criteria for 24-hr and 1-hr respectively, namely Action and Limit levels to be used. Should non-compliance of the air quality criteria occurs, the CET, the Engineer and the Contractor shall undertake the relevant action in accordance with the Event Contingency Plan (ECP) in Tables 2.4a and 2.4b.

In addition, the ECP for complaints handling is shown in Table 2.5.

| Level | Total Suspended Particulates ($\mu\text{g m}^{-3}$) |
|----------|-------------------------------------------------------------------------------------------|
| Baseline | Derived from physical measurements prior to construction commencing |
| Action | For baseline $< 108 \mu\text{g m}^{-3}$, average of 130% of baseline and the Limit level |
| | For $108 < \text{baseline} < 154 \mu\text{g m}^{-3}$, $200 \mu\text{g m}^{-3}$ |
| | For Baseline $> 154 \mu\text{g m}^{-3}$, 130% of baseline level |
| Limit | AQO for TSP : $260 \mu\text{g m}^{-3}$ averaged over 24-hours |

Table 2.2 Derivation of Action and Limit Levels for 24-Hour Air Quality Monitoring

| Level | Total Suspended Particulates ($\mu\text{g m}^{-3}$) |
|----------|-------------------------------------------------------------------------------------------|
| Baseline | Derived from physical Measurements prior to construction commencing |
| Action | For baseline $< 154 \mu\text{g m}^{-3}$, average of 130% of baseline and the Limit level |
| | For $154 < \text{baseline} < 269 \mu\text{g m}^{-3}$, $350 \mu\text{g m}^{-3}$ |
| | For baseline $> 269 \mu\text{g m}^{-3}$, 130% of baseline level |
| Limit | $500 \mu\text{g m}^{-3}$ |

Table 2.3 Derivation of Action and Limit Levels for 1-Hour Air Quality Monitoring

| Step | Day | Action | Contractor/ CET | ER | IEC |
|------|-----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|--------|--------|
| 1. | 1 | Identify exceedance from monitoring data and initiate corrective action. Submit data to ER with observed source(s) of pollution. | ■ | | |
| 2. | 1 | Input monitoring data and observed pollution source(s) into WREMS on same day when data is submitted from CET. WREMS will automatically generate a Notice of Exceedance (NOE) and send it to the IEC via email. | | ■ | |
| 3. | 1 | On same day of receipt of the NOE, check monitoring data trend and Contractor's work method. Decide if a formal NOE will be issued. If so, forward the NOE via email to KCRC and ER. If not, close the Exceedance record in the WREMS. | | | ■ □ |
| 4. | 1 | Confirm receipt of NOE to IEC. | | ■ | |
| 5. | 1 | Issue NOE to Contractors and remind their contractual obligations. | | ■ | |
| 6. | 2 | Propose remedial measures to ER within 1 working day of receipt of NOE. | ■ | □ | |
| 7. | 2 | Review and agree the proposed remedial measures and make recommendations where necessary. | | ■ □ | ■ □ |
| 8. | 2 | Implement the proposed remedial measures once they have been agreed. | ■ | | |
| 9. | - | Arrange site visit to ensure implementation of the agreed remedial measures. | | ■ | ■ |
| 10. | - | Increase monitoring frequency to assess effectiveness of remedial measures. (Be specific about the frequency for the different parameters. e.g. once every 3 days for 24-hr dust, daily for 1-hr dust) Submit monitoring data to ER for entering into the WREMS once they are available. | ■ | | |
| 11. | - | If exceedance continues, arrange meeting with Contractor and ER to review the implemented remedial measures and identify further remedial measures. Go to step 8. If exceedance stops for 3 consecutive monitoring, resume normal monitoring frequency. | ■ | ■ □ | ■ |
| 12. | - | Inform IEC the closure of exceedance. | | ■ | |
| 13. | - | Close the exceedance record in the WREMS. | | | ■ |

Table 2.4a Event Contingency Plan for Action Level Exceedance

| Step | Day | Action | Contractor/ CET | ER | IEC |
|------|-----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|--------|--------|
| 1. | 1 | Identify exceedance from monitoring data and initiate corrective action. Submit data to ER with observed source(s) of pollution. | ■ | | |
| 2. | 1 | Input monitoring data and observed pollution source(s) into WREMS on same day when data is submitted from CET. WREMS will automatically generate a Notice of Exceedance (NOE) and send it to the IEC via email. | | ■ | |
| 3. | 1 | On same day of receipt of the NOE, check monitoring data trend and Contractor's work method. Decide if a formal NOE will be issued. If so, forward the NOE via email to KCRC and ER. If not, close the Exceedance record in the WREMS. | | | ■ □ |
| 4. | 1 | Confirm receipt of NOE to IEC on receipt of NOE. | | ■ | |
| 5. | 1 | Issue NOE to Contractors and remind their contractual obligations. | | ■ | |
| 6. | 1 | Take immediate action to avoid further exceedance. | ■ | | |
| 7. | 2 | Propose remedial measures to ER within 1 working days of receipt of NOE. | ■ | □ | |
| 8. | 2 | Review and agree with the proposed remedial measures and make recommendations where necessary. | | ■ □ | ■ □ |
| 9. | 2 | Implement the proposed remedial measures once they have been agreed. | ■ | | |
| 10. | - | Arrange site visit to ensure implementation of agreed remedial measures. | | ■ | ■ |
| 11. | - | Increase monitoring frequency to assess effectiveness of remedial measures. (Be specific about the frequency for the different parameters. e.g. daily for all parameters) Submit monitoring data to ER for entering into the WREMS once they are available. | ■ | | |
| 12. | - | If exceedance continues, arrange meeting with Contractor and ER to review the implemented remedial measures and identify further remedial measures. Go to step 9. If exceedance stops for 3 consecutive monitoring, resume normal monitoring frequency. | ■ | ■ □ | ■ |
| 13. | - | Inform IEC the closure of exceedance. | | ■ | |
| 14. | - | Close the exceedance record in the WREMS. | | | ■ |

Table 2.4b Event Contingency Plan for Limit Level Exceedance

| Step | Day | Action | Contractor/ CET | KCR C | ER | IEC |
|------|-----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|----------|--------|--------|
| 1. | 1 | Party receiving complaint shall create a new complaint record in the WREMS. If the Contractor receives a complaint, the Contractor shall pass the information to the ER for entering into the WREMS. WREMS then automatically sends a Notification of Complaint to KCRC, ER and IEC via email. | ■ | ■ | ■ | |
| 2. | 1 | ER forward the complaint to Contractor/CET if that is not already received by the Contractor. | | ■ | | |
| 3. | 2 | Within 1 working day after the receipt of the Notification of Complaint, provide ER relevant works site information, e.g. types and locations of construction works. | ■ | | □ | |
| 4. | 2 | Investigate the complaint to determine its validity, and to assess whether the source of the problem is due to the works activities. Report the validity of the complaint to KCRC and ER. | | | | ■ □ |
| 5. | 2 | If complaint is valid and due to works, ER shall notify the Contractor. If complaint is invalid or not due to works, Go to Step 11. | | | ■ | |
| 6. | 2 | Propose mitigation measures to ER within 1 working day of the receipt of the Notification. | ■ | | □ | |
| 7. | 2 | Review and agree with the proposed mitigation measures and make recommendations where necessary. | | | ■ □ | ■ □ |
| 8. | 2 | Implement the mitigation measures once they have been agreed. | ■ | | | |
| 9. | 4 | Audit the implementation of the proposed mitigation measures on site within 2 working days after the measures have been agreed. | | | ■ □ | ■ □ |
| 10. | - | Undertake additional monitoring to verify the situation where necessary. | ■ | | | |
| 11. | 4 | Report the investigation results and subsequent actions taken to ER within 2 working days after the implementation of mitigation measures. | ■ | | □ | |
| 12. | 5 | Respond to the complainant within 1 working day after receiving the investigation report. | | ■ | | |
| 13. | 25 | If no further comments or complaints are received from the complainant within 20 working days after responding to the complainant, close the complaint record in the WREMS. If the complainant has further comments or complaints on the same issue, notify other parties on the same day and go to step 2. | | ■ | ■ □ | |

Table 2.5 Event Contingency Plan for Complaints Handling

2.2 NOISE

2.2.1 Noise Parameters

The construction noise level should be measured in terms of equivalent A-weighted sound pressure level (L_{eq}) in decibels (dB). Monitoring of $L_{eq(30 \text{ min})}$ ($6 \times L_{eq(5 \text{ min})}$) is carried at the noise monitoring locations once every week during normal construction working hours (07:00-19:00 hours Monday to Saturday). Restricted hour noise monitoring (19:00-07:00 hours or any time on general holidays including Sunday) in terms of $L_{eq(15 \text{ min})}$ should be undertaken if construction activities are being undertaken during restricted hours under the conditions of valid Construction Noise Permits (CNPs).

The two statistical sound levels L_{10} and L_{90} ; the level exceeded for 10 and 90 percent of the time respectively, is also recorded during monitoring. Major noise sources observed, both on-site and off-site, will be recorded on the data record sheet. All measured data are provided in the electronic format and results are recorded to the nearest 0.1 dB.

2.2.2 Monitoring Methodology

Sound level meters, which comply with the International Electrotechnical Commission (IEC) Publication 651:1979 (Type 1) and 804:1985 (Type 1) specification as referred to the Technical Memorandum (TM) issued under the Noise Control Ordinance (NCO), are used. Continuous baseline noise for the A-weighted levels L_{eq} , L_{10} and L_{90} are measured over a two weeks period, sampling period of 5 minutes is used throughout the monitoring. Average, by sound power, of six consecutive 5 minutes readings is used to provide $L_{eq(30 \text{ min})}$ for non-restricted hours (07:00-19:00 hours Monday to Saturday) and three consecutive $L_{eq(5 \text{ min})}$ reading is used to provide $L_{eq(15 \text{ min})}$ for the restricted period. A facade correction of 3dB(A) will be applied to measurements which are carried out under free field conditions.

During the impact monitoring, parameters such as dates, weather conditions, equipment used, measurement results and major noise sources are recorded on the field data record sheet. In relation to the monitored noise levels, other noise sources such as road traffic may make a significant contribution to the overall noise environment. Therefore, the results of noise monitoring activities will take into account such as influencing factors, which may not have been presented during the baseline monitoring period. All measurements are recorded to the nearest 0.1dB(A).

2.2.3 Monitoring Equipment/Calibration

Bruel & Kjaer (B&K) Precision Integrating Sound Level Meters of Type 2238 in compliance with the International Electrotechnical Commission Publication 651: 1979 (Type 1) and 804: 1985 (Type 1) Specifications, stated in the TM issued under the NCO, are used for impact monitoring.

Prior to and following each noise measurement, the accuracy of the sound level meter is checked using an acoustic calibrator (B&K Type 4231) generating a known sound pressure level at a known frequency. Measurements are considered as valid only if the calibration level from before and after the noise measurement agree to within 1 dB.

2.2.4 Monitoring Locations

Eleven monitoring locations have been identified in the Particular Specification (PS) for noise monitoring as part of the Contractor's contractual requirement. Table 3.1 presents a list of the monitoring locations in the PS and also identified name of these locations. The monitoring locations at Tin Shui Wai, Tuen Mun, Lam Tei and Tin Shui Wai Phase 4 are shown in Figures 2.1 to 2.8.

| Figure No. in EIA Report | NSR No. | Description (in accordance with the PS) | Identified Name | Monitoring Equipment Placement |
|--------------------------|---------|---------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------|
| GSA021/04/D02 /001 | MN120 | Tin Shui Wai Area 31, Phase 1 Primary School | The HKFYG Lee Shau Kee Primary School (Monitoring Terminated) | Roof (7/F) |
| GSA021/04/D02 /003 | MN123A | Tin Shui Wai Area 102, Phase 1, Block 4 | Ancillary Facilities Block, Tin Chak Estate (replacement) (Monitoring Terminated) | Roof (7/F) |
| GSA021/04/D02 /003 | MN129A | Tin Shui Wai Area 102, Phase 5, Block 17 | Ancillary Facilities Block, Tin Yuet Estate (replacement) (Monitoring Terminated) | Roof (7/F) |
| GSA021/04/D02 /002 | MN155 | Tin Shui Area 30, Kindergarten | Tin Wah Estate-Assembly of God Paul Church Kindergarten (Monitoring Terminated) | Roof (7/F) |
| GSA021/01/D02 /002 | MN50 | Tuen Mun Town Plaza | Tuen Mun Town Plaza (Monitoring Terminated) | Podium (3/F) |
| GSA021/01/D02 /001 | MN48 | Tuen Mun Station PDS221 Topside development (future development) | Kam Wah Garden (replacement) (Monitoring Terminated) | Podium (3/F) |
| GSA021/02/D02 /001 | MN65 | 2-storey residential house next to Ng Lau Road | Sun Hing Tsuen, Ng Lau Road | G/F |
| GSA021/03/D02 /001 | MN6 | TWGH's Kwok Yat Wai College | TWGH's Kwok Yat Wai College (Monitoring Terminated) | Top of Assembly Hall |
| GSA021/03/D02 /002 | MN10A | Yau Hong House | Tin Yau Court Car Park (3-storey) (replacement) (Monitoring Terminated) | Roof |
| GSA021/03/D02 /002 | MN15A | The Church of Christ in China Hong Kong Council Fong Yan Wah School | Tin Yiu Estate II – Yiu Fung House (replacement) (Monitoring Terminated) | G/F |
| GSA021/03/D02 /004 | MN33 | Queen Elizabeth School Old Student's Association Secondary School | Queen Elizabeth School Old Student's Association Secondary School (Monitoring Terminated) | Relocated to G/F from original position (top of Assembly Hall) since August 2003 due to works being carried out on the assembly hall building. |

Note: The major civil construction work for Tin Shui Wai has been substantially completed and therefore the environmental impacts arising from are expected to be minimal. The EPD / KCRC has approved the termination of the noise monitoring programme for Tin Shui Wai Phase 4 Extension and for Tin Shui Wai Reserve Zone.

Table 2.6 List of Noise Monitoring Locations

2.2.5 Action and Limit Levels

The Action and Limit Levels for construction noise is shown in Table 2.7. The construction site is located within the designated area EPD/NP/NT-04 and the Area Sensitivity Rating (ASR) is classified as “C”, for urban area which are indirectly affected by the Influencing Factor (IF).

In cases where exceedances of Action level occur, since Action Level is based on receiving documented complaints, ECP for Complaints Handling (Table 2.5) should be implemented. If exceedance of the Limit Level occurs, ECP for Limit Level Exceedance (Table 2.4a) should be implemented.

| Time Period | Action | Limit |
|------------------------------------------------------------------------------|-----------------------------------------------------|-------------------------------------------------------------------------------|
| 0700-1900 on normal weekdays; | When one or more documented complaints are received | 75dB(A)* |
| restricted hours (1900-0700 on any day including general holiday and Sunday) | When one or more documented complaints are received | refer to relevant valid Construction Noise Permit (CNP) listed in Section 3.2 |

Notes: The ASR for the site is classified as “C”, which is for urban area indirectly affected.

*Between 0700-1900 on normal weekdays, the construction noise limit for schools with noise insulation is 80dB(A) during normal term time and 75dB(A) during examination period.

Table 2.7 Action and Limit Levels for Construction Noise, dB(A)

2.3 WATER QUALITY

2.3.1 Water Quality Parameters

Monitoring of the suspended solids (SS) and chemical oxygen demand (COD) were carried out by the CET at designated discharge points once every two months in accordance with the relevant Contractor’s effluent discharge licences issued by EPD.

2.3.2 Monitoring Methodology

Water samples for SS measurements are collected in high density polythene bottles, packed in ice (cooled to 4°C without being frozen), and delivered to a HOKLAS accredited laboratory as soon as possible after collection.

Analysis of SS is carried out in a HOKLAS or other international accredited laboratory. Water samples of about 500ml were collected from the monitoring locations. The SS determination should be conducted within 24 hours after collection of the water samples. The SS determination has followed APHA 19ed 254D or equivalent methods subject to approval of EPD.

2.3.3 Monitoring Locations

The water quality monitoring locations should be set at all discharge points. Due to the nature of work programmes, the discharge points may change from time to time. The actual number of the monitoring stations will depend on the number of the discharge point at a time.

3. SUMMARY OF CONSTRUCTION ACTIVITIES

3.1 CONSTRUCTION ACTIVITIES

Major site construction activities undertaken during non-restricted hours in March 2005 included the following:

Tuen Mun Area (including Lam Tei)

- Road reinstatement and landscaping works in progress at LT1 & J6 work areas;
- Architectural building works at J6E & San Fat Stop of Tuen Mun;
- Box culvert outlet construction at Tuen Mun River;
- Lifts installation at HSW & Pui To Road;
- Recreational facilities at Siu Hong Court Variation; and
- Superstructure work for LT1 footbridge.

Major site construction activities undertaken during restricted hours in March 2005 included the following:

Tuen Mun Area (including Lam Tei)

- Box Culvert Outlet Construction at Tuen Mun Nullah under the Tuen Mun West Rail Station;
- Footbridge Construction Work at Lam Tei;
- Remedial Trackwork at Tuen Mun Viaduct; and
- Remedial Trackwork at Tin Shui Wai.

3.2 EPD PERMITS/LICENCES

There were six valid Construction Noise Permits (CNP) during the reporting month. Appendix H summarizes the Environmental Licences and Construction Noise Permits (CNPs) for the Project.

3.3 ENVIRONMENTAL MITIGATION IMPLEMENTATION SCHEDULE

The schedule for implementation of the construction phase mitigation measures has been extracted from the Contractor's Environmental Management Plan and is presented in Appendix D.

4. MONITORING RESULTS

4.1 AIR QUALITY

Results of 24-hours TSP level are shown in Table 4.1. Detailed results, including weather conditions and the graphical presentations are included in Appendix A.

| Location | Action level (µg/m ³) | Limit level (µg/m ³) | Date | TSP (24hr) (µg/m ³) |
|--------------------------------------|-----------------------------------|----------------------------------|-----------|---------------------------------|
| Store Room-[Fire Station] (MA42A) | 182 | 260 | 7-Mar-05 | 76.86 |
| | | | 14-Mar-05 | 137.25 |
| | | | 21-Mar-05 | 110.12 |
| | | | 29-Mar-05 | 144.95 |
| San Hing Tsuen (MA65) | 200 | 260 | 7-Mar-05 | 134.64 |
| | | | 14-Mar-05 | 137.84 |
| | | | 21-Mar-05 | 148.45 |
| | | | 29-Mar-05 | 134.06 |

Table 4.1 Results of Air Quality Impact Monitoring

No exceedance of Action/Limit Levels was recorded during the reporting month. The monitoring results indicate that the construction activities carried out in March 2005 were in full compliance with the air quality criteria for the project.

4.2 NOISE

Results of noise monitoring are shown in Table 4.2. Detailed data, including weather conditions, monitoring time and graphical presentations are included in Appendix B.

| Location | Date | Limit Level dB(A) | Average Impact noise measurement (30 min.) dB(A) | | |
|--------------------------|-----------|-------------------|--------------------------------------------------|-----------------|-----------------|
| | | | L _{eq(30 min)} | L ₁₀ | L ₉₀ |
| San Hing Tsuen (MN65) | 7-Mar-05 | 75 | 66.8 | 70.1 | 56.7 |
| | 14-Mar-05 | | 68.8 | 71.8 | 57.7 |
| | 21-Mar-05 | | 68.5 | 71.5 | 58.0 |
| | 29-Mar-05 | | 68.9 | 71.1 | 56.6 |

Table 4.2 Results of Noise Impact Monitoring During Non-Restricted Hour

No Exceedance of Action/Limit Level was recorded during the reporting month. The monitoring results indicate that the construction activities carried out in March 2005 were in full compliance with the noise criteria for the project.

4.3 WATER QUALITY

No Water sampling was carried out in this reporting month.

4.4 SUMMARY OF EXCEEDANCES

A summary table of exceedances for the air quality and noise are shown in Table 4.3.

| Exceedance | Total no. of measurement | Action Level Exceedance | % of Action Level Exceedance | Limit Level Exceedance | % of Limit Level Exceedance |
|------------------------------|--------------------------|-------------------------|------------------------------|------------------------|-----------------------------|
| Air Quality | 8 | 0 | 0% | 0 | 0% |
| Noise Non-Restricted hour | 4 | N/A | N/A | 0 | 0% |

Note: "N/A" - no action level for noise monitoring relates to number of documented complaints received.

Table 4.3 Summary of Exceedances

No Notice of Exceedance (NoE) was received in the reporting month.

5. NON-COMPLIANCE AND DEFICIENCY

5.1 SITE INSPECTION/AUDIT BY CET

The CET site inspections were carried out on 7, 14, 21 and 29 March 2005. All observations were recorded in the audit checklists and passed to the Contractor together with the appropriate recommended mitigation measures where necessary. Details of observations/deficiencies and proposed corrective actions are presented in Appendix J.

5.2 SITE AUDIT BY IEC

Site audit was undertaken by the IEC on 30 March 2005. A copy of the site audit checklist and details of observations/deficiencies are presented in Appendix J. IEC has no specific observation or comment at either Tuen Mun works area or Lam Tei works area.

6. WASTE MANAGEMENT

4m³ of waste from sewage holding tanks and 60m³ of general office waste were disposed of to Pillar Point Sewage Treatment Works and WENT Landfill respectively in March 2005. In addition, chemical waste included 500 kg spent dry cell batteries were collected by registered Chemical Waste Collector in the reporting month.

7. LANDSCAPE AND VISUAL IMPACT

Landscape works will be carried out at a later stage of the contract. The progress of trees protection and transplanting programme will be included in the monthly EM&A report when those information is available.

8. CULTURAL HERITAGE

The archaeological watching brief for Tuen Mun area (excluding Lam Tei) and Lam Tei area were completed in November 2002 and August 2003 respectively. The Archaeological Watching Brief Final Report for Tuen Mun area (excluding Lam Tei) and Lam Tei area were submitted to relevant parties in April 2003 and December 2003 respectively.

9. COMPLAINT

No complaint was received during the reporting month.

10. SUMMARY OF NOTIFICATION OF SUMMONS, SUCCESSFUL PROSECUTIONS AND CORRECTIVE ACTIONS

There was no Notification of Summons received during the reporting month.

Appendix K summarizes the information on notification of summons and prosecutions received since the commencement of the Project.

11. FUTURE KEY ISSUES

Appendix L presents the construction programme.

The major civil construction works for Tin Shui Wai and Tuen Mun have been substantially completed.

The forecast of construction work for the upcoming three months at Lam Tei will be very similar in nature to those carried out during the reporting month. Therefore, the environmental impacts arising from the works are expected to be minimal.

A weekly monitoring schedule for the next three months is presented in Appendix F of this report.

12. CONCLUSION

Air quality and noise monitoring has been undertaken in March 2005 in accordance with the contract specific EM&A Manual. No Action/Limit Levels exceedance of air quality and noise was recorded during the reporting month.

No Non-Compliance was issued by the IEC during the monthly site inspection in the reporting month.

Waste from sewage holding tanks, general refuse and chemical waste were properly disposed of during the reporting month.

There was no Notification of Summons / complaint received during reporting month.

Cell shaded with thicker border represents an exceedance of Limit Level

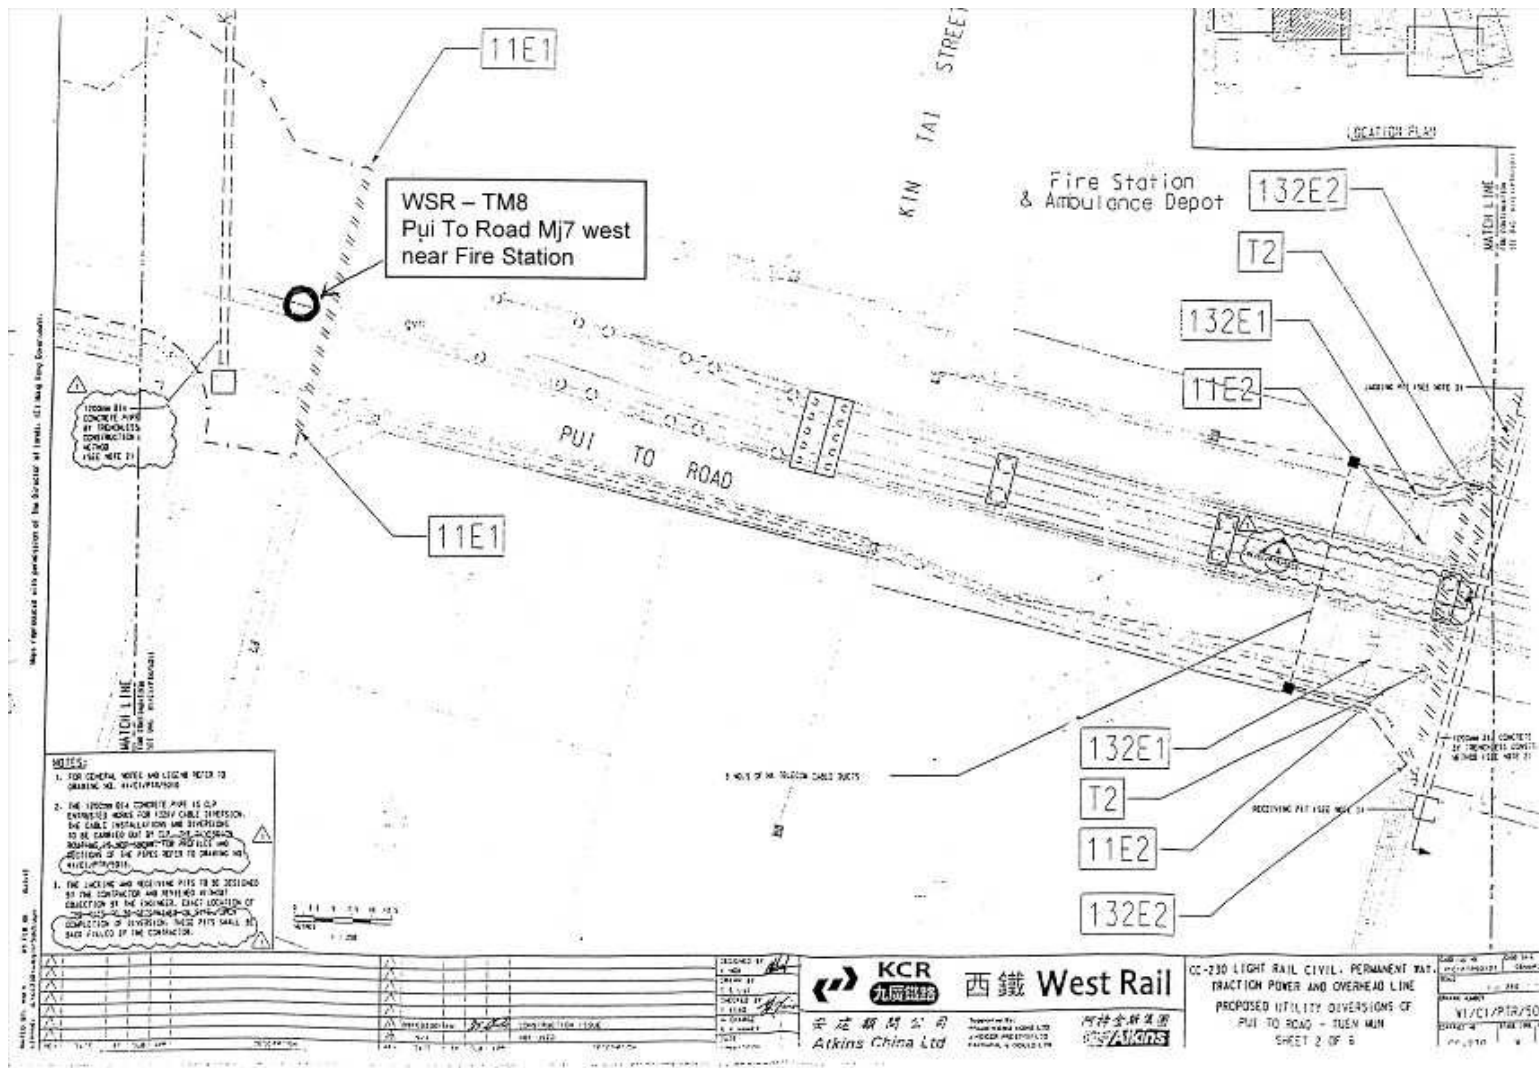

* Measurement undertaken at free field condition and facade correction of 3dB(A) has been applied.

APPENDIX C – EFFLUENT DISCHARGE SAMPLING LOCATION

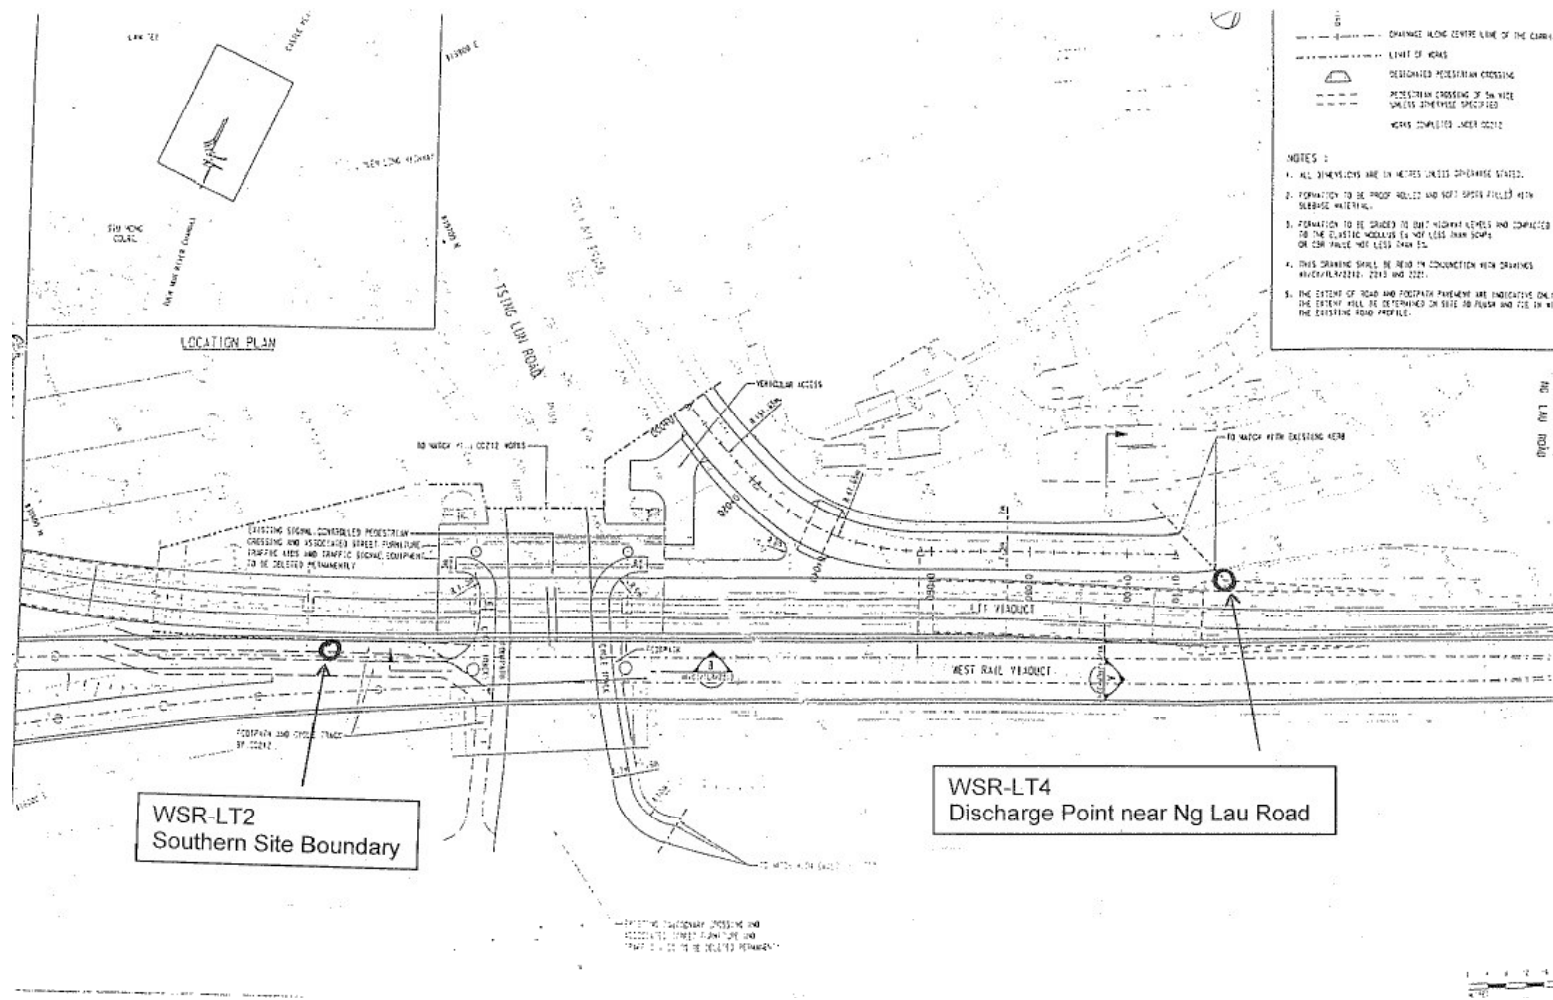

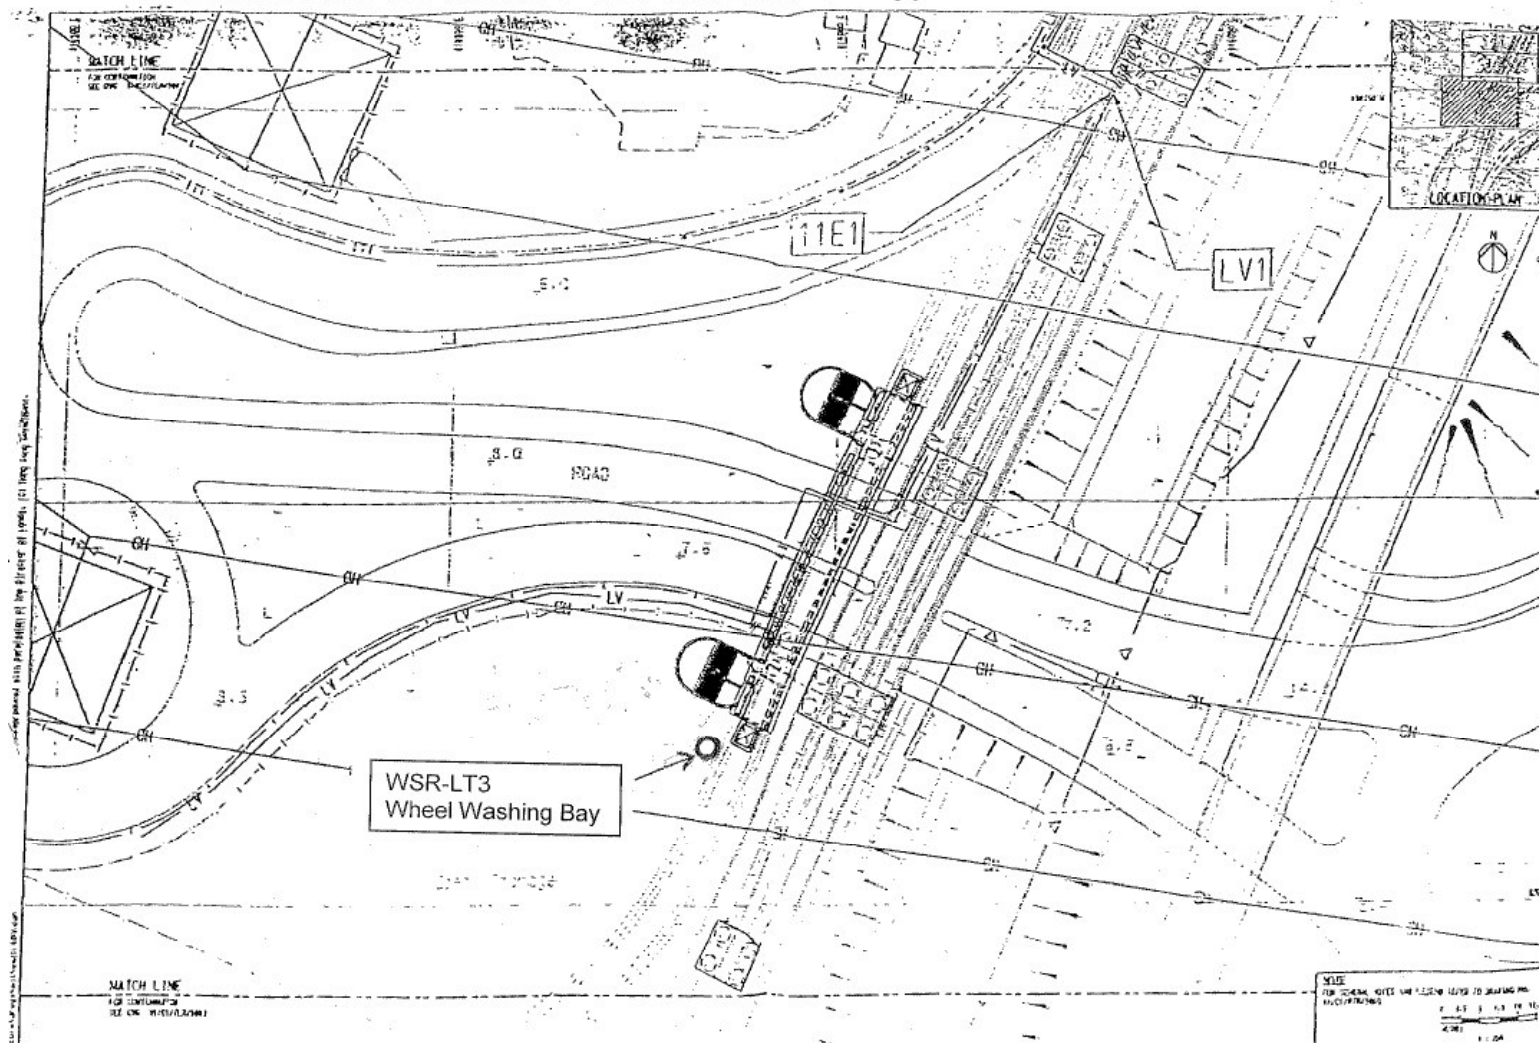

APPENDIX D – ENVIRONMENTAL MITIGATION IMPLEMENTATION SCHEDULE (EMIS)

Part B – Mitigation, Operating Controls, Monitoring and Inspection

1 Environmental Control Plan - Air Pollution Controls

| Item No. | Mitigation, Operation Control, Monitoring and Inspection | Method and Acceptance Criteria | Verification Document | Frequency / Duration | Action By |
|----------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------|-----------------------|-----------------------------------------------|------------------|
| 1 | Mitigation measure – Erect hoarding not less than 2.4m high from ground level along site boundary (except entrances) adjoining street, road and the like and areas accessible to the public (not applicable to hard-paved sites) | As per mitigation description | - | At all times | Site Supervision |
| 2 | Mitigation measure - Any excavated dusty materials or stockpile of dusty materials shall be covered entirely by impervious sheeting or sprayed with water so as to maintain the surface wet | As per mitigation description | - | At all times | Site Supervision |
| 3 | Mitigation measure – Establish vehicle washing facilities at each vehicle exit point from site except where site is completely hard paved | Constructed in accordance with drawings, where appropriate Maintenance of facility in accordance with maintenance schedule | - | At all times whilst site exit point is in use | Site Supervision |
| 4 | Mitigation measure - Every stock of more than 20 bags of cement should be covered entirely by impervious sheeting or placed in an area sheltered on the top and the 3 sides; | As per mitigation description | - | At all times | Site Supervision |
| 5 | Mitigation measure - Cement, or any dusty materials collected by fabric filters or other air pollution control system or equipment should be disposed of in totally enclosed containers; | As per mitigation description | - | At all times | Site Supervision |
| 6 | Mitigation measure - Stockpiles of dusty materials shall be either covered entirely by impervious sheeting, placed in an area sheltered on the top and 3 sides; or sprayed with water so as to maintain the surface wet; | As per mitigation description | - | At all times | Site Supervision |

1 Environmental Control Plan - Air Pollution Controls

| Item No. | Mitigation, Operation Control, Monitoring and Inspection | Method and Acceptance Criteria | Verification Document | Frequency / Duration | Action By |
|----------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------|-----------------------|---------------------------------------|-------------------|
| 7 | Mitigation measure – Carry out regular watering using fine spray or water truck during dry conditions to reduce dust from exposed site surfaces and unpaved roads Frequently water particular dusty construction areas close to the site boundary and sensitive receivers | As per mitigation description | - | At all times during dry conditions | Site Supervision |
| 8 | Mitigation measure – provide wheel wash bay with silt trap and/or high pressure water jet or similar cleaning facility at vehicle entry/exit points to work site areas (except where completely hard paved). | Wheel wash with silt trap and/or high pressure water jet to be provided and hard paving of road between road and exit | - | At all times during dry conditions | Site Supervision |
| 9 | Mitigation measure – water or spray haul roads and work areas, including such activities as concrete drilling and breaking, to suppress dust where necessary (e.g. during dry and windy conditions). | Water spray or similar method | - | At all times during dry conditions | Nominated staff |
| 10 | Mitigating measure – minimise number and size of stockpiles of dusty material and protect when necessary (e.g. windy condition). | As per mitigation description | - | At all times during dry conditions | Supervision staff |
| 11 | Operating control – ensure that trucks delivering ballast are cleaned before loading and material on trucks is covered during transport. | Remove residue and fine materials that could cause dust, use tarpaulin or similar to cover trucks | - | During handling and laying of ballast | Supervision staff |
| 12 | Operating control – check ballast material when received on site to ensure that it is in a dampened state. | In accordance with Receipt Inspection Procedure – QMP 10.1 | - | During handling and laying of ballast | Supervision staff |
| 13 | Operating control – during ballast profiling, spray water on to material to minimise dust generation. | Prepare and follow Method Statement for laying ballast | - | During handling and laying of ballast | Supervision staff |
| 14 | Operating control - cover trucks carrying dusty materials with tarpaulin or similar when transporting materials off site | As per mitigation measure | - | At all times | Supervision staff |
| 15 | Operating control - Construction plant and vehicles are to use vehicle wheel and body washing facilities when leaving the site | Erect notices and include in awareness training for subcontractors | - | At all times | PEC or nominee |

1 Environmental Control Plan - Air Pollution Controls

| Item No. | Mitigation, Operation Control, Monitoring and Inspection | Method and Acceptance Criteria | Verification Document | Frequency / Duration | Action By |
|----------|-----------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------|---------------------------------------------------------|----------------------|
| 16 | Mitigation measures – Control vehicle speeds on site | Establish speed limit signs on site (max 15kph on unpaved road section) Ensure that signs are positioned prominently on site | - | At all times | Nominated site staff |
| 17 | Mitigation measure - Position plant as far as possible from sensitive receiver wherever practicable | As per mitigation measure | - | At all times | Supervision staff |
| 18 | Monitoring – check that mitigation measures and operating controls are effective. | Conduct inspections of each site using checklist | Routine Environmental Monitoring Checklist - | Weekly, following complaint or before extreme weather | PEC or nominee |
| 19 | Monitoring - Periodically check and monitor condition of plant with respect to exhaust emissions. | Observe operating plant to ensure no excessive black smoke (Better than Ringelmann chart no.1) | Routine Environmental Monitoring Checklist - | Weekly or on receipt of complaint or in case of dispute | PEC or nominee |

2 Environmental Control Plan - Water Pollution Controls

| Item No. | Mitigation, Operation Control, Monitoring and Inspection | Method and Acceptance Criteria | Verification Document | Frequency / Duration | Action By |
|----------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------|----------------------------------|------------------------------|
| 1 | Mitigation measures – design temporary drainage system for each site location complete with appropriate facilities to treat water prior to discharge off site from areas such as exposed earth slopes, material stockpiles, wheel wash bays, etc. | In accordance with the guidelines provided in ProPECC PN 1/94 and the Leighton Environmental Management Reference Volume | Layout drawings showing drainage, treatment facilities and discharge points | Following Contract Award | Technical Manager or nominee |
| 2 | Mitigation measures – install temporary site drainage and treatment facilities. | In accordance with design and drawings | - | Once, following design of system | Nominated site staff |
| 3 | Mitigation measures – install oil interceptors into temporary drainage system downstream of any oil/fuel pollution sources. | As per temporary drainage drawing | - | Once, following design of system | Nominated site staff |
| 4 | Mitigation measure and control – install foul water holding tanks for project office facilities | As per site layout drawings, capacity to suit office requirements | - | Once, following design of system | Nominated site staff |
| 5 | Mitigation measure - Incorporate drip trays or similar under major items of static plant and bulk storage of oil, fuel and chemical tanks | Adequate capacity (110% of tank capacity) Good condition / no leakage Valves operating / shut | - | Throughout duration of contract | Foremen Subcontractor |
| 6 | Mitigation measure– provide chemical toilet facilities along site where required | Number to suit site requirements | - | Throughout duration of contract | Nominated site staff |
| 7 | Operating control - arrange regular emptying of holding tanks / chemical toilets by reputable disposal company | In accordance with maintenance schedule | Trip tickets for disposal | Throughout duration of contract | Nominated site staff |
| 8 | Operating controls – clean and maintain temporary site drainage system, site facilities, wheel wash bays and silt / sand traps | In accordance with maintenance schedules to ensure effective operation | - | Throughout duration of contract | Nominated site staff |
| 9 | Operating controls – check drainage at discharge point | In accordance with maintenance schedule to keep clear of debris and silt that could cause flooding | - | Throughout duration of contract | Nominated site staff |

2 Environmental Control Plan - Water Pollution Controls

| Item No. | Mitigation, Operation Control, Monitoring and Inspection | Method and Acceptance Criteria | Verification Document | Frequency / Duration | Action By |
|----------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|-------------------------------------------|-------------------------|
| 10 | Operating controls – ensure that cementitious construction effluent (e.g. concrete truck washout and slurry) is discharged with care to avoid water and soil contamination | Use wash out skips / pits to minimise water and land contamination | - | Throughout duration of contract | Foremen / Subcontractor |
| 11 | Operating controls – carry out site checks following the raising of a rainstorm or typhoon warning | In accordance with environmental emergency procedures (see appendix B, section 5.7). | - | Throughout duration of contract | Nominated site staff |
| 12 | Monitoring and inspection - check effectiveness of mitigation measures | As per checklist requirements | Routine Environmental Monitoring Checklist | Weekly or following complaint | PEC or nominee |
| 13 | Monitoring – Check water quality of effluent discharged from site | Method in accordance with Leighton Environmental Reference Volume to meet quality requirements stated on the Discharge Licence. | Routine Water Quality Monitoring Checklist | Weekly or following complaint | PEC or nominee |
| 14 | Monitoring – sample and test effluent from each discharge point in accordance with the conditions for sampling and testing on the Site Discharge Licence | Sampling and testing in accordance with EM&A Manual Test results to meet Discharge Licence water quality parameters | Test results | As per the Discharge Licence requirements | PEC or nominee |

3 Environmental Control Plan - Noise Control

| Item No. | Mitigation, Operation Control, Monitoring and Inspection | Method and Acceptance Criteria | Verification Document | Frequency / Duration | Action By |
|----------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|-------------------------------------------------------|------------------------------------------------------|
| 1 | Mitigation measures – Use temporary movable noise barriers where cumulative noise impacts due to Leighton construction activities are likely to exceed 75 dB (A) at NSR. (or as modified by baseline results). | Assess cumulative noise levels using methods from the Technical Memorandum and from site measurement Barriers to be sized to shield plant activities from NSRs. Barriers to be positioned as close to plant as is safe and practicable Surface density of barriers to be not less than 7 kg/m ² | - | Throughout grade separation works and | Technical Manager or nominee Production staff |
| 2 | Mitigation measures – Check physical condition of plant and other mechanical equipment with respect to production of noise where appropriate and remove and repair plant and equipment that generates excessive noise. | Plant maintained and in good order No loose fittings Silencers effective | - | All activities throughout the duration of the project | Supervision staff |
| 3 | Mitigation measures – Operation of plant and other mechanical equipment with respect to noise where appropriate and switch off or throttle down equipment while not in use. Valid noise labels should be displayed on handheld breakers and air compressors. | Engine compartment doors shut Static plant located and/or orientated away from sensitive areas Plant shut down when not in use | - | All activities throughout the duration of the project | Supervision staff |
| 4 | Mitigation measure – use of quiet plant where practicable. | Select plant with effective silencers and mufflers to reduce noise levels | - | All activities throughout the duration of the project | Supervision staff |
| 5 | Mitigation measure – reduction in number of plant operating simultaneously and/or in close proximity of critical NSRs | Minimise the number of construction activities being carried out at the same time when near to NSRs. | - | Throughout duration of project | Supervision staff |
| 6 | Mitigation measure – using stockpiles or other structures to screen noisy site activities | Arrange stockpiles or other structures near NSRs to screen noise where practicable | - | Throughout duration of project | Supervision staff |
| 7 | Operating controls – Display Construction Noise Permits on site | Display in accordance with CNP requirement and on notice boards | CNP on display | While CNP is valid | PEC or nominee |

3 Environmental Control Plan - Noise Control

| Item No. | Mitigation, Operation Control, Monitoring and Inspection | Method and Acceptance Criteria | Verification Document | Frequency / Duration | Action By |
|----------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------|--------------------------------------------|--------------------------------------------------------------------------|----------------|
| 8 | Operating controls - Implement contingency plan (EM&A Manual) for construction noise in response to cases of reported exceedances of Maximum Acceptable Impact Level at NSRs | Follow Event Contingency Plan for Construction Noise (see EM&A Manual) | - | Following receipt of reported exceedance, throughout duration of project | PEC or nominee |
| 9 | Monitoring and Inspection – Check the effectiveness of mitigation measures and operating controls | Visual monitoring of activities in accordance with checklist requirements | Routine Environmental Monitoring Checklist | Weekly, or following complaint | PEC or nominee |
| 10 | Monitoring and inspection – check infrastructure and buildings in vicinity of site for any damage caused by plant and equipment or site activity. | Visual monitoring of infrastructure and buildings | Routine Environmental Monitoring Checklist | Weekly, or following complaint | PEC or nominee |

4 Environmental Control Plan - Waste Management

| Item No. | Mitigation, Operation Control, Monitoring and Inspection | Method and Acceptance Criteria | Verification Document | Frequency / Duration | Action By |
|----------|----------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|----------------------------------------|----------------------|
| 1 | Mitigation measure - establish Chemical Waste Storage Facility(s) on site (see Waste Management Plan for details and location maps). | In accordance with Code of Practice on the Packaging, Labelling and Storage of Chemical Wastes. | - | Before production of Chemical Waste | PEC |
| 2 | Mitigation measure – provide and maintain adequate number of waste skips on site to avoid littering and visual impacts. | Adequate capacity | - | Throughout the duration of the project | Supervision staff |
| 3 | Mitigation measure – check that waste skips are being changed in timely manner and that no refuse and food remnants are littering work areas | Adequate capacity for workforce / activities | - | Throughout the duration of the project | Supervision staff |
| 4 | Mitigation measure – check that chemical (waste oil etc) waste drums are available, in use, labelled and suitably stored | In accordance with Code of Practice on the Packaging, Labelling and Storage of Chemical Wastes. | - | Throughout the duration of the project | Supervision staff |
| 5 | Mitigation measure - disposal of chemical waste via licensed waste collectors | In accordance with Code of Practice on the Packaging, Labelling and Storage of Chemical Wastes. | - | Throughout the duration of the project | PEC or nominee |
| 6 | Mitigation measure – ensure that surplus concrete is discharged in a controlled manner | No waste concrete disposed to landfill where practicable | - | Throughout the duration of the project | PEC or nominee |
| 7 | Operating Controls - Where site conditions permit, segregate main waste streams eg steel, inert materials, general waste | Establish site area for storage of scrap Provide space for segregation of waste where practicable | - | Throughout the duration of the project | PEC or nominee |
| 8 | Operating control – Dispose surplus inert excavated material. | Either: Transport to the Western Section of West Rail for reuse, if practicable; or Transport to other land formation sites in the Tuen Mun and Yuen Long areas for reuse; or Transport to public filling areas or barging points. | Trip tickets | Throughout duration of the project | Nominated site staff |

4 Environmental Control Plan - Waste Management

| Item No. | Mitigation, Operation Control, Monitoring and Inspection | Method and Acceptance Criteria | Verification Document | Frequency / Duration | Action By |
|----------|--------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------|-----------------------------------------------|-------------------------------|----------------|
| 9 | Monitoring – check effectiveness of on-going mitigation measures described above and check waste management facilities and general housekeeping. | In accordance with checklist requirements | Routine Environmental Monitoring Checklist | Weekly or following complaint | PEC or nominee |
| 10 | Monitoring - carry out routine inspections of plant and fuel storage to minimise soil and water contamination | No excess oil visible on plant No leakage of trays Valves closed | Routine Environmental Monitoring Checklist | Weekly or following complaint | PEC or nominee |
| 11 | Maintain records of the quantities of wastes generated, recycled and disposed. | Trip ticket system or similar | Monthly Environmental Report and Site Records | Throughout project duration | PEC |

5 Environmental Control Plan - Dangerous Goods and Chemicals Management

| Item No. | Mitigation, Operation Control, Monitoring and Inspection | Method and Acceptance Criteria | Verification Document | Frequency / Duration | Action By |
|----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|-------------------------------|-------------------|
| 1 | Mitigation measure - Provide and maintain suitable storage facilities for dangerous goods as appropriate | In accordance with drawings submitted to Fire Services Department | Site Layout Drawings | Throughout project duration | Safety Manager |
| 2 | Mitigation measure - Provide and maintain suitable facilities for the bulk storage of other chemicals | Provide drip trays with capacity or impervious sheeting with sand | - | Throughout project duration | Supervision staff |
| 3 | Operating control - Establish and maintain an inventory and associated Material Safety Data Sheet for chemicals to be used for construction activities on site. | Obtain from manufacturers and suppliers and maintain inventory and file | Inventory and MSDS records on site | Throughout project duration | Safety Manager |
| 4 | Mitigation Measure - ensure dangerous goods/chemicals are properly stored. | Visual inspection to verify that storage facilities conform to statutory requirements, manufacturers recommendations and the project Waste Management Plan requirements. | - | Throughout project duration | Supervision staff |
| 5 | Mitigation Measure – ensure spill clean-up equipment are available for use. | Visual inspection | - | Throughout project duration | Supervision staff |
| 6 | Monitoring – Check effective implementation of mitigation measures | In accordance with checklist requirements | Routine Environmental Monitoring Checklist | Weekly or following complaint | PEC or nominee |

| 6 Environmental Control Plan - General Housekeeping | | | | | |
|-----------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------|--------------------------------------------|--------------------------------|----------------------|
| Item No. | Mitigation, Operation Control, Monitoring and Inspection | Method and Acceptance Criteria | Verification Document | Frequency / Duration | Action By |
| 1 | Mitigation Measure - Erect and maintain awareness publications (eg posters) on site regarding the dangers of allowing pests to breed. | As per mitigation measure | - | Throughout duration of project | Safety Manager |
| 2 | Mitigating measure – Ensure that no open burning of debris or other matter takes place on site | Awareness training for workforce to ensure legal requirements are known | Training records | Throughout duration of project | PEC / Safety Manager |
| 3 | Mitigation measure – Standing water drained or treated with larvicidal oil. Water containers removed or covered | As per mitigation measure | - | Throughout duration of project | Supervision staff |
| 4 | Monitoring – check site for mosquito breeding areas, food remnants etc. (stagnant standing water) | As per checklist requirement | Routine Environmental Monitoring Checklist | Weekly, or following complaint | PEC or nominee |
| 5 | Monitoring - carry out routine monitoring of site and perimeter to check tidiness and visual impact. | As per checklist requirement | Routine Environmental Monitoring Checklist | Weekly, or following complaint | PEC or nominee |

APPENDIX E - COMPLAINTS LOG

| Date Received | Complainant | Details of the Complaint | Action | Status | Remark |
|---------------|-------------|----------------------------------------------------------|--------|--------|--------|
| | | No complaint was received in the month of September 2001 | | | |
| | | No complaint was received in the month of October 2001 | | | |
| | | No complaint was received in the month of November 2001 | | | |
| | | No complaint was received in the month of December 2001 | | | |
| | | No complaint was received in the month of January 2002 | | | |
| | | No complaint was received in the month of February 2002 | | | |
| | | No complaint was received in the month of March 2002 | | | |
| | | No complaint was received in the month of April 2002 | | | |
| | | No complaint was received in the month of May 2002 | | | |
| | | No complaint was received in the month of June 2002 | | | |
| | | No complaint was received in the month of July 2002 | | | |
| | | No complaint was received in the month of August 2002 | | | |
| | | No complaint was received in the month of September 2002 | | | |
| | | No complaint was received in the month of October 2002 | | | |
| | | No complaint was received in the month of November 2002 | | | |
| | | No complaint was received in the month of December 2002 | | | |
| | | No complaint was received in the month of January 2003 | | | |
| | | No complaint was received in the month of February 2003 | | | |
| | | No complaint was received in the month of March 2003 | | | |
| | | No complaint was received in the month of April 2003 | | | |
| | | No complaint was received in the month of May 2003 | | | |
| | | No complaint was received in the month of June 2003 | | | |
| | | No complaint was received in the month of July 2003 | | | |
| | | No complaint was received in the month of August 2003 | | | |

| Date Received | Complainant | Details of the Complaint | Action | Status | Remark |

APPENDIX G - COMMENTS AND RESPONSE

IEC'S COMMENT ON EM&A REPORT FOR FEBRUARY 2005

No specific comment on the monthly EM&A report (February 2005) was received from KCRC/IEC.

APPENDIX H – LIST OF ENVIRONMENTAL LICENCE/PERMIT

Construction Noise Permit (CNP) Register

Date: 31 March 2005

| ITEM No. | PERMIT No. | PERMIT DESCRIPTION | ISSUE DATE | EXPIRY DATE | ISSUING OFFICE |
|----------|--------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------|---------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| 1 | CNP Application 30 May 01 Permit No. GW-TW0251-01 | Construction Noise Permit (23.00-07.00hrs). LRT crossings for construction plant at Junction Mj7 North – Tuen Mun | 27 June 01 for start 27 June 01 | 27 July 2001 @ 07.00 hrs. | EPD Local Control Office / Territory West; 7 th Floor; Chinachem Tsuen Wan Plaza; 455-457 Castle Peak Road; Tsuen Wan. |
| 2 | CNP Application 4 June 01 Permit No. PP-TW0025-01 | Construction Noise Permit (weekdays 07.00-19.00hrs) Percussive Piling for viaduct foundation works at Junction Mj7 North & West, Tuen Mun. | 29 June 01 for start 29 Mar.02 (6 months) | Cancelled see EPD letter 3 Aug. 01 | EPD Local Control Office / Territory West; 7 th Floor; Chinachem Tsuen Wan Plaza; 455-457 Castle Peak Road; Tsuen Wan. |
| 3 | CNP Application 4 June 01 Permit No. PP-TW0026-01 | Construction Noise Permit (weekdays 07.00-19.00hrs) Percussive Piling for viaduct foundation works at Junction L, Tin Shui Wai Reserve Zone. | 3 July 2001 for six months | Cancelled see EPD letter 3 Aug. 01 | EPD Local Control Office / Territory West; 7 th Floor; Chinachem Tsuen Wan Plaza; 455-457 Castle Peak Road; Tsuen Wan. |
| 4 | CNP Application 13 June 01 Permit No. GW-TW0280-01 | Construction Noise Permit (23.00-07.00hrs). LRT OHL pole relocation (pole No. 300) at Junction 6 East – Pui To Road, Tuen Mun | 13 July 01 for start 14 July 01 | 14 August 2001 @ 07.00 hrs. | EPD Local Control Office / Territory West; 7 th Floor; Chinachem Tsuen Wan Plaza; 455-457 Castle Peak Road; Tsuen Wan. |
| 5 | CNP Application 22 June 01 Permit No. GW-TW0290-01 | Construction Noise Permit (23.00-07.00hrs). To install road markings for traffic diversion at Junction L, Tin Shui Wai Reserve Zone. | 17 July 01 for start 23 July 01 | 31 July 2001 @ 07.00 hrs. | EPD Local Control Office / Territory West; 7 th Floor; Chinachem Tsuen Wan Plaza; 455-457 Castle Peak Road; Tsuen Wan. |
| 6 | CNP Application 29 June 2001 Refused Ref: TW0303-01 | Construction Noise Permit (23.00-07.00hrs). Driving sheet piles and excavating pipe jacking receiving pit at side of LR track at Mj7 north Pui To Road; Tuen Mun. | Refused see EPD letter 30 July 01 | N/A | EPD Local Control Office / Territory West; 7 th Floor; Chinachem Tsuen Wan Plaza; 455-457 Castle Peak Road; Tsuen Wan. |
| 7 | CNP Application 12 July 2001 Permit No. GW-TW0317-01 | Construction Noise Permit (23.00-07.00hrs). LRT Plant crossing for access to hand dug caissons at north east corner of Tuen Mun Town Park; Pui To Road; Tuen Mun. | 8 Aug. 01 for start 8 Sept. 01 | 7 October 2001 @ 05.00 hrs. | EPD Local Control Office / Territory West; 7 th Floor; Chinachem Tsuen Wan Plaza; 455-457 Castle Peak Road; Tsuen Wan. |
| 8 | CNP Application 10 August 2001. Permit No. GW-TW0368-01 | Construction Noise Permit (07.00-19.00hrs Gen. Hol. Inc. Sunday). Bored Piling construction for retaining west bank of Nullah near Police Station; Pui To Road; Tuen Mun. | 30 Aug. 01 for start 2 Sept.01 | 28 February 2002 | EPD Local Control Office / Territory West; 7 th Floor; Chinachem Tsuen Wan Plaza; 455-457 Castle Peak Road; Tsuen Wan. |

| ITEM No. | PERMIT No. | PERMIT DESCRIPTION | ISSUE DATE | EXPIRY DATE | ISSUING OFFICE |
|----------|----------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------|------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| 9 | CNP Application 13 August 2001 Refused Ref: TW0373-01 | Construction Noise Permit (23.00-07.00hrs). Temporary relocation of LR track to allow construction of viaducts at east side of Tuen Mun Town Park (Junction 6 South – Tuen Mun Heung Sze Wui Road). | Refused see EPD letter 10 Sept. 01 | N/A | EPD Local Control Office / Territory West; 7 th Floor; Chinachem Tsuen Wan Plaza; 455-457 Castle Peak Road; Tsuen Wan. |
| 10 | CNP Application 17 August 2001. Refused Ref: TW0387-01 | Construction Noise Permit (19.00-23.00hrs). Temporary relocation of LR track to allow construction of viaducts at east side of Tuen Mun Town Park (Junction 6 South – Tuen Mun Heung Sze Wui Road). | Refused see EPD letter 1 Sept 01 | N/A | EPD Local Control Office / Territory West; 7 th Floor; Chinachem Tsuen Wan Plaza; 455-457 Castle Peak Road; Tsuen Wan. |
| 11 | CNP Application 28 August 2001 Permit No. GW-TW0407-01 | Construction Noise Permit (01.00-05.00hrs). LRT OHL pole relocation at Junction 6 West – Pui To Road, Tuen Mun | 26 Sept. 01 for start 29 Sept.01 | 29 November 2001 | EPD Local Control Office / Territory West; 7 th Floor; Chinachem Tsuen Wan Plaza; 455-457 Castle Peak Road; Tsuen Wan. |
| 12 | CNP Application 10 September 2001 Permit No. GW-TW0432-01 | Construction Noise Permit (01.00-05.00hrs). LRT OHL pole relocation to allow construction of viaducts at east side of Tuen Mun Town Park at Junction 6 South – Tuen Mun Heung Sze Wui Road. | 20 Sept. 01 for start 21 Sept. 01 | 11 December 2001 | EPD Local Control Office / Territory West; 7 th Floor; Chinachem Tsuen Wan Plaza; 455-457 Castle Peak Road; Tsuen Wan. |
| 13 | CNP Application 10 September 2001 Permit No. GW-TW0431-01 | Construction Noise Permit (19.00-07.00hrs on weekdays & 24hrs on general holidays and Sundays). Pipe Jacking for utility diversion at Junction Mj8 – Pui To Road, Tuen Mun industrial area. | 27 Sept. 01 for start 1 Oct. 01 | 9 April 2002 | EPD Local Control Office / Territory West; 7 th Floor; Chinachem Tsuen Wan Plaza; 455-457 Castle Peak Road; Tsuen Wan. |
| 14 | CNP Application 12 September 2001 Permit No. GW-TW0441-01 | Construction Noise Permit (two 36hour periods – end October & mid November 2001). Temporary relocation of LR track to allow construction of viaducts at east side of Tuen Mun Town Park (Junction 6 South – Tuen Mun Heung Sze Wui Road). | 13 Oct. 01 for start 14 Oct. 01 | 23 December 2001 | EPD Local Control Office / Territory West; 7 th Floor; Chinachem Tsuen Wan Plaza; 455-457 Castle Peak Road; Tsuen Wan. |
| 15 | CNP Application 20 September 2001 Permit No. GW-TW0449-01 | Construction Noise Permit (19.00-07.00hrs on weekdays & 24hrs on general holidays and Sundays). Pipe Jacking for utility diversion at road junction East of Kin On Stop on Pui To Road, Tuen Mun industrial area. | 11 Oct. 01 for start 19 Oct. 01 | 5 January 2002 | EPD Local Control Office / Territory West; 7 th Floor; Chinachem Tsuen Wan Plaza; 455-457 Castle Peak Road; Tsuen Wan. |
| 16 | CNP Application 28 September 2001 Permit No. GW-TW0467-01 | Construction Noise Permit (23.00-07.00hrs). Drilling and grouting to provide grout curtain for hand dug caissons at junction of Pui To Road and Tuen Mun Heung Sze Wui Road in Tuen Mun. | 26 Oct. 01 for start 29 Oct. 01 | 29 December 2001 | EPD Local Control Office / Territory West; 7 th Floor; Chinachem Tsuen Wan Plaza; 455-457 Castle Peak Road; Tsuen Wan. |
| 17 | CNP Application 29 September 2001 Refused Ref: TW0470-01 | Construction Noise Permit (19.00-21.00hrs on weekdays & 07.00-21.00hrs on general holidays and Sundays). Construction of CLP Substation at location S3 on Tin Fuk Road in Tin Shui Wai Phase 4 area. | Refused see EPD letter 12 Oct. 01 | N/A | EPD Local Control Office / Territory West; 7 th Floor; Chinachem Tsuen Wan Plaza; 455-457 Castle Peak Road; Tsuen Wan. |

| ITEM No. | PERMIT No. | PERMIT DESCRIPTION | ISSUE DATE | EXPIRY DATE | ISSUING OFFICE |
|----------|---------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------|------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| 18 | CNP Application 16 October 2001 Permit No. GW-TW0501-01 | Construction Noise Permit (00.30-05.30hrs). LRT crossing - Emergency Vehicle Access & construction plant access to Tuen Mun Town Park East of San Fat Stop at Junction 6 West – Pui To Road, Tuen Mun | 12 Nov. 01 for start 15 Nov. 01 | 15 December 2001 | EPD Local Control Office / Territory West; 7 th Floor; Chinachem Tsuen Wan Plaza; 455-457 Castle Peak Road; Tsuen Wan. |
| 19 | CNP Application 18 October 2001 Refused Ref: TW0505-01 | Construction Noise Permit (19.00-21.00hrs). Concreting to bored piles at Junction L; Tin Shui Road in Tin Shui Wai Reserve Zone. | Refused see EPD letter 29 Oct. 01 | N/A | EPD Local Control Office / Territory West; 7 th Floor; Chinachem Tsuen Wan Plaza; 455-457 Castle Peak Road; Tsuen Wan. |
| 20 | CNP Application 29 October 2001 Permit No. GW-TW0522-01 | Construction Noise Permit (Weekdays 01.00-05.00hrs). LRT OHL pole foundation construction and installation of OHL poles at Junction B; Junction of Ping Ha Road and Tin Yiu Road in Tin Shui Wai Phase 4. | 19 Nov. 01 for start 26 Nov. 01 | 23 February 2002 | EPD Local Control Office / Territory West; 7 th Floor; Chinachem Tsuen Wan Plaza; 455-457 Castle Peak Road; Tsuen Wan. |
| 21 | CNP Application 3 November 2001 Permit No. GW-TW0532-01 | Construction Noise Permit (Weekdays 19.00-07.00hrs). Installation of Falsework above road and roundabout to enable construction of new LRT viaduct at Junction L in Tin Shui Wai Reserve Zone. | 30 Nov. 01 for start 01 Jan. 02 | 28 February 2002 | EPD Local Control Office / Territory West; 7 th Floor; Chinachem Tsuen Wan Plaza; 455-457 Castle Peak Road; Tsuen Wan. |
| 22 | CNP Application 10 November 2001 Permit No. GW-TW0566-01 | Construction Noise Permit (Weekdays 01.00-05.00hrs). Light Rail permanent way alterations to facilitate Phase 4 extension of LRT system at Junction B (junction of Ping Ha Road and Tin Yiu Road) in Tin Shui Wai. | 06 Dec. 01 for start 09 Dec. 01 | 09 March 2002 | EPD Local Control Office / Territory West; 7 th Floor; Chinachem Tsuen Wan Plaza; 455-457 Castle Peak Road; Tsuen Wan. |
| 23 | CNP Application 12 November 2001 Withdrawn Ref: TW0565-01 | Construction Noise Permit (Weekdays 23.00-07.00hrs). Removal of existing footbridge and installation of temporary footbridge across LR tracks and Heung Sze Wui Road to facilitate construction of the LRT viaducts at Tuen Mun town centre. | Re-submitted in two parts. | N/A | EPD Local Control Office / Territory West; 7 th Floor; Chinachem Tsuen Wan Plaza; 455-457 Castle Peak Road; Tsuen Wan. |
| 24 | CNP Application 12 November 2001 Withdrawn Ref: TW0564-01 | Construction Noise Permit (Weekdays 19.00-07.00hrs). Load-out of prefabricated footbridge units at Hoi Wah Road (S1), Tuen Mun (for installation across LR tracks and Heung Sze Wui Road). | Withdrawn 06 Dec. 01 at EPD request. | N/A | EPD Local Control Office / Territory West; 7 th Floor; Chinachem Tsuen Wan Plaza; 455-457 Castle Peak Road; Tsuen Wan. |
| 25 | CNP Application 18 December 2001 Permit No. GW-TW0625-01 | Construction Noise Permit (Weekdays 23.00-07.00hrs). Removal of part of existing footbridge and installation of new temporary footbridge across LR tracks and Heung Sze Wui Road to facilitate construction of the LRT viaducts north of Tuen Mun Town Centre Stop. | 21 Dec. 01 for start 21 Dec. 01 | 22 February 2002 | EPD Local Control Office / Territory West; 7 th Floor; Chinachem Tsuen Wan Plaza; 455-457 Castle Peak Road; Tsuen Wan. |
| 26 | CNP Application 21 December 2001 Permit No. GW-TW0629-01 | Construction Noise Permit (07.00-21.00hrs Gen. Hol. Inc. Sunday & weekdays 19.00-23.00hrs). Bored Piling construction for new retaining wall along west bank of Nullah (near Police Station), Pui To Road; Tuen Mun. | 11 Jan. 02 for start 16 Jan. 02 | 15 July 2002 | EPD Local Control Office / Territory West; 7 th Floor; Chinachem Tsuen Wan Plaza; 455-457 Castle Peak Road; Tsuen Wan. |

| ITEM No. | PERMIT No. | PERMIT DESCRIPTION | ISSUE DATE | EXPIRY DATE | ISSUING OFFICE |
|----------|---------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------|------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| 27 | CNP Application 27 December 2001 Permit No. GW-TW0634-01 | Construction Noise Permit (weekdays 23.00-07.00hrs). Water main diversion across of Pui To Rd at Mj7, Tuen Mun (HK Police require road closure at night to minimise traffic disruption). (See re-application on 21 January 01) | 15 Jan. 02 for start 20 Jan.02 | Withdrawn at EPD request 28 Jan 02 | EPD Local Control Office / Territory West; 7 th Floor; Chinachem Tsuen Wan Plaza; 455-457 Castle Peak Road; Tsuen Wan. |
| 28 | CNP Application 31 December 2001 Permit No. GW-TW0639-01 | Construction Noise Permit (weekdays 01.00-05.00 hrs.). Temporary relocation of LR OHL to allow construction of viaducts at J6 east (west of Pui To Road Stop) Tuen Mun. | 14 Jan. 02 for start 28 Jan. 02 | 28 February 2002 | EPD Local Control Office / Territory West; 7 th Floor; Chinachem Tsuen Wan Plaza; 455-457 Castle Peak Road; Tsuen Wan. |
| 29 | CNP Application 31 December 2001 Permit No. GW-TW0638-01 | Construction Noise Permit (weekdays 01.00-05.00 hrs.). Temporary relocation of LR track to allow construction of viaducts at J6 east (west of Pui To Road Stop) Tuen Mun. | 14 Jan. 02 for start 20 Mar. 02 | 30 April 2002 | EPD Local Control Office / Territory West; 7 th Floor; Chinachem Tsuen Wan Plaza; 455-457 Castle Peak Road; Tsuen Wan. |
| 30 | CNP Application 21 January 2002 Permit No. GW-TW0023-02 | Construction Noise Permit (weekdays 23.00-07.00hrs). Water main diversion across of Pui To Rd at Mj7, Tuen Mun (HK Police require road closure at night to minimise traffic disruption). RE-APPLICATION of Permit No. GW-TW0634-01. | 28 Jan. 02 for start 29 Jan. 02 | 20 March 2002 | EPD Local Control Office / Territory West; 7 th Floor; Chinachem Tsuen Wan Plaza; 455-457 Castle Peak Road; Tsuen Wan. |
| 31 | CNP Application 22 January 2002 Permit No. GW-TW0027-02 | Construction Noise Permit (weekdays 01.00-05.00 hrs.). Temporary relocation of LR track to allow construction of viaducts at J6 east (west of Pui To Road Stop) Tuen Mun. PERMIT RENEWAL (GW-TW0638-01). | 11 Feb. 02 for start 18 Feb 02 | 17 May 2002 | EPD Local Control Office / Territory West; 7 th Floor; Chinachem Tsuen Wan Plaza; 455-457 Castle Peak Road; Tsuen Wan. |

APPENDIX I – EQUIPMENT CALIBRATION AND CERTIFICATION RECORD

High Volume Air Sampler Calibration Worksheet

Project Title: CC230 - KCRC LRT Civil, Permanent Way, Traction Power and Overhead Line
Monitoring Location: San Hing Tsuen (MA65)
Date: 31-Jan-05
Time: 15:55

| | |
|-------------------------|----------|
| Sampler Model: | GS2310 |
| Calibrator Orifice no.: | 517N |
| Slope (m): | 2.00063 |
| Intercept (b): | 0.007984 |
| Correction coeff. (r): | 0.999944 |

| | |
|---------------------------------|--------|
| Standard pressure (mmHg) Pstd: | 760.0 |
| Standard temp. (K) Tstd: | 297.18 |
| Calibration pressure (mmHg) Pa: | 763.8 |
| Calibration temp. (K) Ta: | 286.8 |

$$Flow(\text{corrected}) = \sqrt{H \times \frac{P_a}{P_{std}} \times \frac{T_{std}}{T_a}}$$

$$Q_{std} = \frac{1}{m} \times \left(\sqrt{H \times \frac{P_a}{P_{std}} \times \frac{T_{std}}{T_a}} - b \right)$$

| Sample no. | Pressure Drop (H), inch | Flow (corrected), m ³ /min | Actual flow rate (Qstd), m ³ /min | Flow indication (I), arbitrary |
|------------|-------------------------|---------------------------------------|----------------------------------------------|--------------------------------|
| 1 | 13.5 | 3.755 | 1.873 | 50.0 |
| 2 | 11.0 | 3.389 | 1.690 | 44.0 |
| 3 | 7.0 | 2.704 | 1.347 | 34.0 |
| 4 | 5.5 | 2.397 | 1.194 | 28.0 |
| 5 | 4.0 | 2.044 | 1.018 | 24.0 |

Correlation Coefficient: 0.9986

Remark
 Qstd Range 1.1 - 1.7
 IHPa = 0.750062 mmHg

Calibration Certificate

Certificate No. **41836**

Page 1 of 2 Pages

Customer : Hyder Consulting Limited

Address : 3/F, Somerset House, Taikoo Place, 979 King's Road, Quarry Bay, Hong Kong.

Order No. : Q40604

Date of receipt : 19-Apr-04

Item Tested

Description : Sound Level Calibrator

Manufacturer : B&K

Model : Type 4231

Serial No. : 1770806

Test Conditions

Date of Test : 28-Apr-04

Supply Voltage : --

Ambient Temperature : (22.5 ± 2.5)°C

Relative Humidity : (50 ± 20) %

Test Specifications

Calibration check according to customer's requirement.

Calibration procedure : F21, Z02.

Test Results

All results were within the manufacturer's, IEC 942 Class 1 specification.

The results are shown in the attached page(s).

Test equipment used:

| <u>Equipment No.</u> | <u>Cert. No.</u> | <u>Due Date</u> | <u>Traceable to</u> |
|----------------------|------------------|-----------------|---------------------|
| S014 | 30961 | 1-Jun-04 | PRC-NIM |
| S024 | Z02050078 | 29-May-04 | PRC-NIM |
| S041 | 35075 | 2-Dec-04 | PRC-NIM |

The values given in this Calibration Certificate only relate to the values measured at the time of the test and any uncertainties quoted will not include allowance for the equipment long term drift, variations with environmental changes, vibration and shock during transportation, overloading, mis-handling, or the capability of any other laboratory to repeat the measurement. Hong Kong Calibration Ltd. shall not be liable for any loss or damage resulting from the use of the equipment.

The test equipment used for calibration are traceable to national standards/International System of Units (SI).
The test results apply to the above Unit-Under-Test only

 Site PC-230 Contractor Leighton Contractor: Philip, Le

Weather

Condition Sunny Fine Overcast Drizzle Rain Storm Hazy
 Temperature 18 °C Humidity High Moderate Low
 Wind Calm Light Breeze Strong

Water Quality

| | N/A or not observed | Yes | No | Photo/Remarks |
|----------------------------------------------------------------------------------|-------------------------------------|-------------------------------------|--------------------------|---------------|
| Is drainage system adequate? | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | |
| Are there dykes to surround areas of earthworks for flood protection? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Are there temporary ditches for runoff discharge into appropriate watercourse? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| With silt retention pond? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Do permanent drainage channels have: | | | | |
| sediment basin? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| traps and baffles? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Is groundwater pumped out from tunnels discharged via sediment traps/tanks? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Are there sediment tanks for settling runoff prior to disposal? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Constructed from pre-formed individual cells? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Adequate capacity? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Free from silt and sediment? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Are there oil interceptors in drainage system? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Oil and grease removed regularly? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Bypass to prevent flushing during periods of heavy rain? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Is drainage system well maintained? | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | |
| Is exposed earth stabilized after earthworks have been completed? | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | |
| Are exposed slope surfaces covered (by tarpaulin or other means)? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Are open stockpiles of more than 50 m³ covered during rainstorm? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Are manholes covered and sealed? | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | |
| Are vehicles and plant cleaned of earth, mud and debris before leaving the site? | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | |
| Is a wheel washing bay provided at every site exit? | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | |
| Adequately designed? | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | |
| Sand and silt settled out and removed at least weekly? | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | |
| Access road leading to and exiting from wheel wash bay paved? | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | |
| Access road sufficiently backfill toward wheel wash bay? | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | |

} By water hoses

SITE INSPECTION CHECKLIST

| | N/A or not observed | Yes | No | Photo/Remarks |
|------------------------------------------------------------------------------------------------|-------------------------------------|-------------------------------------|--------------------------|----------------------------|
| Modified sections of culverts | | | | |
| Sediment traps installed upstream and downstream of the section? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Vortex tube silt traps installed within the section? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Rainy season | | | | |
| Drainage system adequately designed for storm flow? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Sediment control measures inspected and maintained after rain storms? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Concrete batching plant | | | | |
| Discharge diverted to neutralisation tank? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Discharge treated in neutralisation tank? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Discharge from neutralisation tank routed to silt trap? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Disposal to sewage system? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Are spent bentonite slurries or grouts collected, reconditioned and reused? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Are access roads protected by crushed stone or gravel? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <i>paved with concrete</i> |
| Toilet that connects to foul sewer or chemical toilets provided? | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | |
| Is debris and rubbish on site collected and disposed of properly? | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | |
| Air Quality | | | | |
| Are site vehicles travelling within speed limit of 15 km/hr? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Are site vehicle movements confined to designated haul roads? | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | |
| Is the public road around the site entrance kept clean and free from dust? | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | |
| Are areas of site with regular traffic movement have hard surface? | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | |
| Are the haul roads watered regularly to avoid dust generation? | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | |
| Are unpaved areas watered regularly to avoid dust generation? | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | |
| Do the site vehicles use the wheel wash at the site exits? | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | |
| Are materials transported on trucks covered? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Are all trucks loaded to a level within the side and tail boards? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Are hoarding not less than 2.4 m tall provided beside roads or areas with public access? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Are conveyor belts fitted with windboards, transfer points and hoppers enclosed? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Are bulk fine grained materials stored in closed silos fitted with high level alarm indicator? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Are air vents on cement silos fitted with fabric filters? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Are weigh hoppers vented to suitable filters? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Are there enclosures around the main dust-generating activities? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Is open burning avoided? | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | |
| Are completed earthworks sealed and hydroseeded and planted as soon as practicable? | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | |
| Are vehicles and equipment switched off while not in use? | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | |
| Concrete batching plant or crushing plant | | | | |
| Is 3-sided roofed enclosure with flexible curtain provided for dusty loading of vehicles? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |

 SITE INSPECTION CHECKLIST**

| | N/A or not observed | Yes | No | Photo/Remarks |
|-----------------------------------------------------------|---------------------------------------------------------|-------------------------------------------------------|--------------------------|---------------|
| Are the plant areas frequently cleaned and watered? | | <input type="checkbox"/> | <input type="checkbox"/> | |
| Is dry mix batching carried out in totally enclosed area? | | <input type="checkbox"/> | <input type="checkbox"/> | |
| Observable dust sources | <input type="checkbox"/> Wind erosion | <input type="checkbox"/> Vehicle/equipment movements | | |
| | <input type="checkbox"/> Loading/unloading of materials | <input checked="" type="checkbox"/> Others <u>N/A</u> | | |

Noise

| | | | | |
|-----------------------------------------------------------------------------------------|------------------------------------------------------------------|----------------------------------------------------------------------------|--------------------------|--|
| Are the construction works scheduled to minimize noise nuisance? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Are the works or equipment sited to minimize noise nuisance? | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | |
| Are all plant and equipment well maintained and in good operating condition? | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | |
| Is idle equipment turned off or throttled down? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Are powered mechanical equipment covered or shielded by appropriate acoustic materials? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Are silenced equipment used where practicable? | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | |
| Are noise enclosures, noise barriers, or portable noise barriers used where necessary? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Do air compressors have valid noise labels? | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | |
| Do compressors operate with doors closed? | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | |
| Major noise source(s) | <input checked="" type="checkbox"/> Traffic | <input checked="" type="checkbox"/> Construction activities inside of site | | |
| | <input type="checkbox"/> Construction activities outside of site | <input type="checkbox"/> Others | | |

Waste/Chemical Management

| | | | | |
|---------------------------------------------------------------------|-------------------------------------|-------------------------------------|--------------------------|--|
| General refuse | | | | |
| Accumulation avoided? | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | |
| Receptacles (e.g. rubbish bins) available? | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | |
| Disposed of regularly and properly? | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | |
| Chemical waste, waste oil | | | | |
| Stored properly in designated area? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Disposed of properly? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Chemical/fuel storage area | | | | |
| Is storage area bunded? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Adequate bund capacity? (>110% of the largest tank) | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Area storage areas provided with locks and located on sealed areas? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Construction Waste | | | | |
| Reused where practicable? | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | |
| Disposed of properly? | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | |

KCRC - West Rail

 SITE INSPECTION CHECKLIST

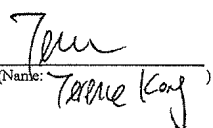

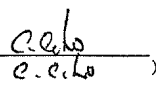

| | N/A or not observed | Yes | No | Photo/Remarks |
|-------------------------------------------------------------------------------------------------------------|-------------------------------------|-------------------------------------|--------------------------|---------------|
| Excavated Material | | | | |
| Appears uncontaminated? (colour, odour) | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | |
| If suspected contaminated, appropriate procedures followed? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Is foam, oil, grease, litter or other objectionable matters in water of nearby drain/sewer avoided? | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | |
| Permits/Licences | | | | |
| Are relevant Environmental Permit(s) posted at all vehicle site entrances/exits? | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | |
| Are Specified Process licences (APCO) available for inspection? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Are Construction Noise Permits available for inspection/posted at site entrance? | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | |
| Is restricted hour noise monitoring conducted where necessary? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Are wastewater discharge licences available for inspection? | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | |
| Are trip tickets for chemical waste disposal available for inspection? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |
| Relevant licence/permit for disposal of construction waste or excavated materials available for inspection? | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | |

Remarks

Lam Tei:
 ① Road work at Ng Lan Road was generally completed. Hydroseeded will be carried out on the coming week. ^{Air & Noise} Monitoring stations at San Hing Tsuen will be proposed to suspend. Minor work was observed near Sin Hong Station. Site inspection will be carried in the coming month.

Tuen Mun:
 ② Following up the previous audit, box culvert at Tuen Mun Nullah was completed. ^{the Contractor intend that minor Air Monitoring} stormdrain works adjacent to Mj7 will be completed at mid-April 2005. station at Pui To Rd ^{will} be proposed to suspend by the end of April 2005.

Next audit: 28 April 2005
