EXECUTIVE SUMMARY

This is the Monthly Environmental Monitoring and Audit (EM&A) report for Dec 2006 under Contract No. CV/2004/02 – Reconstruction of Wong Shek and Ko Lau Wan Public Piers. This report presents the environmental monitoring and auditing (EM&A) findings based on data and information recorded from the period 1st to 31st Dec 2006 for the construction of Wong Shek Public Pier.

Construction Activities for the Reported Period

During this reporting period, the principal work activities at Wong Shek Pier include:

- Erection of outstanding aluminium claddings and façade for roof system
- Installation of the conduits for the electrical system and lightning protective system
- Installation of the aluminium handrails
- Application of the fire protection coating on the columns of the roofs
- Installation of the fender system
- Construction of the draw-pit and reinstatement work at the approach to the pier was in progress
- Concreting the box out area and grouting the epoxy resin under the column base for roof system
- Casting of seating benches
- Application of cast rough finishes on the staircase

Water Quality Monitoring

4 water quality monitoring events in terms of turbidity, dissolved oxygen, suspended solids, temperature, and salinity was carried out at MW1, MW2, CW1 and CW2 at Wong Shek.

Fluctuations for dissolved oxygen, turbidity and suspended solids resembled those fluctuations at the control stations which indicated that all the exceedances in water quality monitoring were due to natural phenomena and agreed with the changes in the control stations. Causation due to construction activities is unlikely and there were no valid exceedance for this reporting period.

Waste Management

No inert or non-inert C&D material was disposed and no chemical waste was transported off site in this reported period.

Complaints, Notifications of Summons and Successful Prosecutions

There was no complaints, notification of prosecutions or summons in this reporting period.

Site Inspections and Audit

4 site inspections were conducted by the Environmental Team (ET) in this reported period. An audit by the Independent Environmental Checker (IEC) was conducted on 12 Dec 2006 with the Engineers' Representative and the Environmental Team. Major observations are summarised in the following table. Major observations by the ET, actions by the Contractor and outcome are summarized in the following table.

Item	Date	Observations	Action taken by Contractor	Outcome
-	5-Dec	No particular finding	-	-
-	12-Dec	No particular finding	-	-
-	18-Dec	No particular finding	-	-
-	27-Dec	No particular finding	-	-

Future Key Issues

The tentative works activities, predicted impacts and areas of environmental concern for the coming reporting month are summarized in the following table.

Construction Works	Predict Impacts	Proposed Mitigation Measures
Installation of the electrical system and lightning protective system Installation of fender system Installation of the handrail Installation of light toughs and fluorescent light Installation of meter box and notice box	Noise, Waste	• Avoid concurrent noisy operation during timber and steel preparation • Material and waste to be stored properly • No littering in land or sea
Construction of coloured concrete finish Concreting the box out area and grouting the epoxy resin under the column base for roof system Reinstatement of existing pavement Application of the cast rough finishes on the staircase Installation of the stainless steel water downpipe and water gutter Casting of seating benches and installation of fluorscent lights for the benches Removal of temporary unloading point	Water, Noise, Waste	• Avoid concurrent noisy operation during timber and steel preparation • Prohibit on-site concrete truck washing • Avoid chemical spill and provide spill control if necessary

1 INTRODUCTION

1.1 SCOPE OF THE REPORT

Lam Environmental Services (LAM) has been appointed to work as the Environmental Team (ET) for Kin Shing Construction Company Limited to implement the Environmental Monitoring and Audit (EM&A) programme for the Contract No. CV/2004/02 – Reconstruction of Wong Shek and Ko Lau Wan Public Piers.

This report presents the environmental monitoring and auditing work carried out from the period 1st to 30th Dec 2006 for the construction of Wong Shek Public Pier in accordance to Section 26 of the Particular Specification, Project Profile (PP-191/2003) and Environmental Permit (EP-186/2004) for this Project.

The following information relating to this project is documented in the EM&A Manual and, to avoid duplication, it is not presented in detail within the monthly report.

- Event-Action Plans;
- Full set of environmental mitigation measures and;
- Contracted environmental requirements.

1.2 STRUCTURE OF THE REPORT

Section 1 ***Introduction*** – details the scope and structure of the report.

Section 2 ***Project Background*** – summarizes background and scope of the project, site description, project organization and contact details of key personnel, construction programme and works undertaken during the reporting period.

Section 3 ***Implementation Status*** – summarizes the status of Environmental Permits / Licenses, implementation of environmental protection and pollution control / mitigation measures in an updated schedule for the reporting period.

Section 4 ***Monitoring Requirements*** – summarizes all monitoring parameters, monitoring methodology and equipment, monitoring locations, monitoring frequency and programmes.

Section 5 ***Monitoring Results*** – summarizes the monitoring results obtained in the reporting period.

Section 6 **C*ompliance Audit*** – summarizes the auditing of monitoring results, all exceedances environmental parameters.

Section 7 ***Site Inspection and Audit*** – summarizes the findings of weekly site inspections and independent audit undertaken within the reporting period, with a review of any relevant follow-up actions within the reporting period.

Section 8 ***Complaints, Notification of Summons and Prosecution*** – summarizes the complaints, notification of summons and successful prosecution for breaches of environmental legislation and the actions taken within the reporting period.

Section 9 ***Future Key Issues*** – summarizes the upcoming works and a forecast of the environmental impact and monitoring schedule for the next reporting period.

Section 10 ***Conclusion***

2 PROJECT BACKGROUND

2.1 SCOPE OF THE PROJECT AND SITE DESCRIPTION

The works mainly comprise demolition of the existing piers and construction of reinforced concrete piers with roof covers at Wong Shek. The construction of the Project is scheduled to commence in November 2004 for completion in September 2006. The construction period is 630 days for the entire construction.

The site layout plan is shown in ***Figure 2.1***.

2.2 PROJECT ORGANIZATION AND CONTACT PERSONNEL

Civil Engineering Office of Civil Engineering and Development Department is the project proponent. The organization chart for the EM&A programme is attached in ***Appendix A***.

Under the organization chart, Resident Engineer, Contractor, Independent Environmental Checker, Environmental Team are appointed to manage and control environmental issues for the construction phase of CV/2004/02. Overall responsibilities and duties of the team are found in the corresponding EM&A Manual. Key personnel and contact particulars are summarized in ***Table 2.2***:

Table 2.2 Contact Details of Key Personnel

Post	Name	Contact No.	Contact Fax	Mobile No.
Resident Engineer	David C S Leung	2760 5737	2714 2054	9630 1235
Site Agent	W F Lok	2729 6779	2729 7858	9847 8334
Independent Environmental Checker (IEC)	Joseph T L Poon	2452 7140	2450 6138	9450 1968
Environmental Team Leader (ETL)	Raymond Dai	2975 3300	2897 5509	9738 0738

2.3 CONSTRUCTION PROGRAMME AND WORKS

Construction works carried out at Wong Shek Pier during this reporting period are:

- Erection of outstanding aluminium claddings and façade for roof system
- Installation of the conduits for the electrical system and lightning protective system
- Installation of the aluminium handrails
- Application of the fire protection coating on the columns of the roofs
- Installation of the fender system
- Construction of the draw-pit and reinstatement work at the approach to the pier was in progress
- Concreting the box out area and grouting the epoxy resin under the column base for roof system
- Casting of seating benches
- Application of cast rough finishes on the staircase

The master construction programme is given in ***Figure 2.3***.

3 IMPLEMENTATION STATUS

3.1 STATUS OF REGULATORY COMPLIANCE

A summary of the current status on licences and/or permits on environmental protection pertinent to the Project is shown in ***Table 3.1***.

Table 3.1 Cumulative Summary of Valid Licences and Permits

Permits and/or Licences	Reference No.	Issued Date	Expiry Date	Status
Environmental Permit	EP-186/2004/A	28-04-2005	-	Issued on receipt of VEP-171/2005 dated 14-04-2005
Waste Producer Registration	WPN5213-742-K1081-05	12-05-2005	-	Notified
Construction Noise Permit	-	-	-	No valid CNP granted to the Contractor

3.2 IMPLEMENTATION OF POLLUTION CONTROL / MITIGATION MEASURES

The contractor implemented various environmental mitigation measures as recommended in the Particular Specification and the Environmental Permit. The implementation schedule is presented in ***Appendix B***.

4 MONITORING REQUIREMENTS

Locations of environmental monitoring stations are referred in ***Figure 4.1***.

4.1 WATER QUALITY MONITORING

The brief for EM&A works details 4 designated stations to be monitored during the construction period comprising 2 monitoring stations and 2 control stations. These stations have been coded as MW1, MW2, CW1 and CW2 respectively.

Table 4.1a Water Quality Monitoring Stations

Station	HK Metric Grid (Easting / Northing)	Description
MW1	852 789.231E / 832 978.476N	Impact Monitoring
MW2	852 844.187E / 832 878.676N	Impact Monitoring
CW1	852 922.540E / 833 067.718N	Control during mid-flood
CW2	852 992.314E / 832 853.794N	Control during mid-ebb

Monitoring Methodology

Measurements were be taken under two tidal conditions (mid-flood and mid-ebb) at 3 water depths, namely 1m below the water surface, mid-depth and 1m above the seabed, except where the water depth is less than 6m, the mid-depth sample may be omitted. If the water depth is less than 3m, only the mid-depth will be monitored.

Replicate in-situ measurements and samples were collected from each independent sampling event are required for all parameters to ensure a robust statistical interpretable dataset.

Water quality parameter in terms of: dissolved oxygen (mg/L and % saturation), salinity (ppt), turbidity (NTU), and suspended solids (mg/L) were measured in-situ with portable instruments. Other relevant data was also recorded, including the following:

- monitoring station and position;
- time;
- depth of water;
- tidal status;
- water temperature;
- weather conditions including ambient temperature;
- any special phenomena or activities at the construction site.

For the measurement of dissolved oxygen the probe shall be removed from the water column between each duplicate measurement. If the difference between each duplicate measurement is greater than a 25% then the two sets of data shall be rejected and the measurements re-taken.

Suspended solids (SS) were determined in the laboratory at Chai Wan managed by Lam Laboratories Ltd.

Monitoring Equipment

- Sample Bottles: Samples were kept in high density polythene bottles, packed in ice and cooled to 4^{o}C or below, without being frozen, for delivery to the laboratory as soon as possible after collection.
- Thermometer: A standard certified laboratory mercury thermometer with an accuracy of at least 0.5^{o}C was employed, calibrated against a certified thermometer of 0.1^{o}C scale. This thermometer was employed for measuring both ambient and water temperatures.
- Depth Detector: As the depth of water being sampled was generally shallow, too shallow to allow for the use of an echo-sounder, a marked depth gSepe was employed to determine water depth at all designated monitoring stations.

All in-situ monitoring equipment shall be checked, verified and calibrated by Lam laboratory at Chai Wan, a HOKLAS accredited laboratory, prior to use on the Works and subsequently thereafter every three months throughout all stages of the water quality monitoring. Responses of the sensors and electrodes shall be checked with certified standard solutions before each use. Wet bulb calibration for a DO meter shall be carried out before measurement.

For in-situ calibration of field equipment, the BS 1427: 1993 “Guide to Field and on-site test methods for the analysis of waters” shall be observed.

A set of backup monitoring instruments and equipment shall be made available so that the monitoring can proceed uninterrupted in case of apparatus malfunction or if equipment has been returned to the laboratory for calibration.

Current calibration certificates are presented in ***Appendix C***.

Laboratory Analysis

All samples are returned to the laboratory at Chai Wan for the determination of SS under a QA / QC scheme inclusive of blank, duplicate and spike recovery analysis under the requirement of HOKLAS. The laboratory test procedures conform to "Standard Methods for the Examination of Water and Wastewater" published by American Public Health Association (APHA) and United State Environmental Protection Agency (USEPA) test methods are summarized in ***Table 4.3b***.

Table 4.1b Laboratory Test Procedures

Parameter	Methodology	Method Ref.	Detection Limit
SS	Determination of Total Suspended Solids Dried at 103-105℃	APHA 19th Ed. 2540D	2.0 mg/L

4.2 MONITORING PARAMETERS AND FREQUENCY

Water quality monitoring programme has been scheduled according to the requirements stipulated in the EM&A Manual produced for the Project summarized in ***Tables 4.2***.

Table 4.2 Water Quality Monitoring Parameters and Frequencies

Station(s)	Parameter	Frequency
MW1, MW2 CW1, CW2	DO, Temperature, Salinity, Turbidity, Suspended Solids, Water Depth	For piling or demolition works 3 days per week at mid-flood and mid-ebb For marine works other than piling or demolition works 1 day per week at mid-flood and mid-ebb

4.3 WATER QUALITY CRITERIA

Water quality criteria were determined prior to the commencement of the construction of the project for the purpose of impact monitoring. Various levels established based on the results of baseline monitoring and the Event Action Plan stipulated in the EM&A Manual are summarized in ***Tables 4.3***.

Table 4.3 Action and Limit Levels for Water Quality Monitoring

Parameter	Action Level	Target Level
Dissolved Oxygen (Surface, Middle & Bottom)	Surface & Middle For Wong Shek – 6.96 Bottom For Wong Shek – 6.93	Surface & Middle For Wong Shek – 6.69 Bottom For Wong Shek – 6.71
Turbidity (depth-averaged)	For Wong Shek – 1.47 or 120% of upstream control station's Tby at the same tide of same day, whichever is lower	For Wong Shek – 4.05 or 130% of upstream control station's Tby at the same tide of same day, whichever is lower
Suspended Solids (depth-averaged)	For Wong Shek – 6.85 or 120% of upstream control station's SS at the same tide of same day, whichever is lower	For Wong Shek – 8.85 or 130% of upstream control station's SS at the same tide of same day, whichever is lower

Note:

1. *"Depth-averaged" is calculated by taking the arithmetic means of reading all three depths.*
2. *For Dissolved Oxygen, non-compliance of the water quality limits occurs when monitoring result is lower than the limits.*
3. *For Turbidity and Suspended Solid, non-compliance of the water quality limits occurs when monitoring result is higher than the limits.*
4. *All the figures given in the table are used for reference only and the Engineer may amend the figures whenever it is considered as necessary.*

4.4 MONITORING PROGRAMME

Environmental monitoring programme for this reporting period was carried out in accordance with the required monitoring frequency. The actual completion of monitoring work during the reporting period is presented in ***Tables 4.4***.

5 MONITORING RESULTS

5.1 WATER QUALITY MONITORING RESULTS

Water quality monitoring was carried out on 4 occasions at stations MW1, MW2, CW1 and CW2. Calculated water quality monitoring results in this reporting period are reviewed and summarized in ***Tables 5.1a and 5.1b***. Details of measured and tested results can be referred in ***Appendix D***. Graphical trend is presented in ***Figure 5.1a – 5.1h***.

Table 5.1a Water Quality Monitoring Results (mid-flood tide) – Dec 06

Station	Averaged DO Surface & Middle (mg/L)	Averaged DO Bottom (mg/L)	Averaged Turbidity (NTU)	Averaged Suspended Solids (mg/L)
MW1	5.18	4.66	1.14	12.3
MW2	4.91	3.89	1.12	6.7
CW1	4.90	Water depth < 3m	1.19	7.3
CW2	4.62	3.64	1.15	9.7

Table 5.1b Water Quality Monitoring Results (mid-ebb tide) – Dec 06

Station	Averaged DO Surface & Middle (mg/L)	Averaged DO Bottom (mg/L)	Averaged Turbidity (NTU)	Averaged Suspended Solids (mg/L)
MW1	4.96	4.28	1.15	10.3
MW2	4.68	3.66	1.11	11.2
CW1	4.63	Water depth < 3m	1.15	15.7
CW2	4.77	3.61	1.19	11.1

5.2 WASTE MONITORING RESULTS

No inert or non-inert C&D material was disposed and no chemical waste was transported off site in this reported period.

6 COMPLIANCE AUDIT

Results of the calculated water quality results for various are audited against the water quality levels and the number of exceedances are summarized ***Tables 6.1a and 6.1b***. Exceedances caused by natural phenomena namely fluctuation of overall water quality by comparing the graphical trends of monitoring and control stations are eliminated in order to identify the valid exceedance due to construction activities.

Table 6.1a Summary of Water Quality Exceedance (mid-flood tide) – Dec 06

Station	Averaged DO Surface & Middle	Averaged DO Bottom	Averaged Turbidity	Averaged Suspended Solids
MW1	0 (AL); 0 (LL)	0 (AL); 0 (LL)	0 (AL); 0 (LL)	0 (AL); 0 (LL)
MW2	0 (AL); 0 (LL)	0 (AL); 0 (LL)	0 (AL); 0 (LL)	0 (AL); 0 (LL)

Table 6.1b Summary of Water Quality Exceedance (mid-ebb tide) – Dec 06

Station	Averaged DO Surface & Middle	Averaged DO Bottom	Averaged Turbidity	Averaged Suspended Solids
MW1	0 (AL); 0 (LL)	0 (AL); 0 (LL)	0 (AL); 0 (LL)	0 (AL); 0 (LL)
MW2	0 (AL); 0 (LL)	0 (AL); 0 (LL)	0 (AL); 0 (LL)	0 (AL); 0 (LL)

As shown in the graphical trend, the observed trends and exceedances in dissolved oxygen, turbidity and suspended solids at MW1 and MW2 resemble the fluctuations to the respective control stations, possibly due to variation in water current or tidal effect.

No exceedance for turbidity and the observed exceedances for suspended solids is within 11 mg/L, indicating the fluctuation could possibility due to the natural variation around the small values of suspended solids.

To conclude, the fluctuations for dissolved oxygen, turbidity and suspended solids resembled those fluctuations at the control stations which indicated that all the exceedances in water quality monitoring were due to natural phenomena and agreed with the changes in the control stations. Therefore, causation due to CV/2004/02 construction activities is unlikely and there were no valid exceedance for this reporting period.

7 SITE INSPECTION AND AUDIT

The ET undertook site inspection at least once a week. Monthly joint audit was undertaken by the IEC, the ETL, the Engineer and the Contractor.

The ET carried out 4 inspections during this reporting period. An audit was undertaken by the IEC on 12 Dec 2006. The results of these inspections and outcomes are summarized in ***Table 7***.

Table 7 Summary of Environmental Inspection and Audit – Dec 06

Item	Date	Observations	Action taken by Contractor	Outcome
-	5-Dec	No particular finding	-	-
-	12-Dec	No particular finding	-	-
-	18-Dec	No particular finding	-	-
-	27-Dec	No particular finding	-	-

8 COMPLAINTS, NOTIFICATION OF SUMMONS AND PROSECUTION

No complaint, inspection notice, notification of summons or prosecution was received in this reporting period. Complaint log, summaries of cumulative complaints and successful prosecutions are presented in ***Table 8a***, ***Table 8b***, ***Table 8c*** and ***Table 8d*** respectively.

Table 8a Environmental Complaints Log

9 FUTURE KEY ISSUES

The scheduled construction activities and the recommended mitigation measures for the coming month are listed below. The proposed monitoring schedule for the coming reporting period is detailed in ***Appendix E***.

Table 9 Construction Activities and Recommended Mitigation Measures – Jan 2007

Construction Works	Predict Impacts	Proposed Mitigation Measures
Installation of the electrical system and lightning protective system Installation of fender system Installation of the handrail Installation of light toughs and fluorescent light Installation of meter box and notice box	Noise, Waste	• Avoid concurrent noisy operation during timber and steel preparation • Material and waste to be stored properly • No littering in land or sea
Construction of coloured concrete finish Concreting the box out area and grouting the epoxy resin under the column base for roof system Reinstatement of existing pavement Application of the cast rough finishes on the staircase Installation of the stainless steel water downpipe and water gutter Casting of seating benches and installation of fluorscent lights for the benches Removal of temporary unloading point	Water, Noise, Waste	• Avoid concurrent noisy operation during timber and steel preparation • Prohibit on-site concrete truck washing • Avoid chemical spill and provide spill control if necessary

10 CONCLUSION

The EM&A programme was carried out in accordance with the EM&A Manual requirements, minor alterations to the programme proposed in the previous EM&A Report were made in response to changing circumstances.

No exceedance due to construction activities was reported in routine environmental monitoring. Such results indicate that the construction operation generally performed reasonably acceptable against environmental auditing criteria.

In summary, environmental mitigation measures are being satisfactorily implemented within the CV/2004/02 project along with the on-going construction activities.

Appendix B

Implementation Schedule of Mitigation Measures

Implementation Schedule of Mitigation Measures – Wong Shek

Environmental Aspect	No.	Mitigation Measures	Implementation Status	Follow Up action(s)
Air Quality	AQ01	Provide a wash-pit or a wheel washing and/or vehicle cleaning facility at the exits.	Not applicable at this stage	-
	AQ02	Provide a hard surfaced road between the wheel washing facilities and any finished road.	Not applicable at this stage	-
	AQ03	No burning of construction wastes or vegetation shall be allowed on the Site.	Implemented	-
	AQ04	In the process of material handling, any material which has the potential to create dust shall be treated with water or sprayed with wetting agent.	Not applicable at this stage	-
	AQ05	Any vehicle with an open load carrying area used for moving materials which has the potential to create dust shall have properly fitting side and tail boards.	Not applicable at this stage	-
	AQ06	Materials having the potential to create dust shall not be loaded to a level higher than the side and tail boards, and shall be covered by a clean tarpaulin.	Implemented	-
	AQ07	Stockpiles of sand, aggregate and construction and demolition material greater than $20m^3$ shall be enclosed on three sides, with walls extending above the pile and 2 meters beyond the front of the pile.	Not applicable at this stage	-
	AQ08	Water sprays shall be provided and used both to dampen stored materials and when receiving raw materials.	Not applicable at this stage	-
	AQ09	Clean and water the Site to minimize the fugitive dust emissions.	Implemented	-
	AQ10	Furnace, boiler or other plant or equipment or use any fuel that might in any circumstances produce smoke or any other air pollution should not be installed.	Implemented	-
Noise	N01	All plant and equipment to be used on Site are properly maintained in good operating condition and noisy construction activities shall be effectively sound-reduced by means of silencers, mufflers, acoustic linings or shields, acoustic sheds or screens or other means to avoid disturbance to any nearby noise sensitive receivers.	Implemented	-
	N02	No excavator mounted breaker shall be used within 125m from any nearby noise sensitive receivers. Use hydraulic concrete crusher whenever applicable.	Implemented	-
	N03	All construction works should stop on Sundays and General Holidays.	Implemented	-
Water Quality	WQ01	Water in wheel washing facilities shall be changed at frequent intervals and sediments shall be removed regularly.	Not applicable	-
	WQ02	The polluted water from the wheel washing facilities would not be discharged into all existing stream courses/drains and nearby waterbodies.	Not applicable	-
	WQ03	All existing stream courses and drains within, and adjacent to the Site should be kept free from any debris and any excavated materials arising from the Works	Implemented	-
	WQ04	Chemicals and concrete agitator washings should not be deposited in watercourses.	Implemented	-
	WQ05	The effluent shall comply with the standards stated in the "Technical Memorandum on Standards and Effluent discharges into Drainage and Sewerage Systems, Inland and Coastal Waters" for the appropriate Water Control Zone.	Implemented	-
	WQ06	No spoil or debris of any kind is allowed to be pushed, washed down, fall or be deposited on land or on the seabed adjacent to the Site.	Implemented	-
	WQ07	Maintain any existing site drainage system at all times including removal of solids in sand traps, manholes and stream beds.	Implemented	-
	WQ08	Material from any earthworks should not be washed into the drainage system.	Implemented	-
	WQ09	Silt curtain shall be provided during all demolition works and piling works with the Site.	Not applicable at this stage	-

Implementation Schedule of Mitigation Measures – Wong Shek

Environmental Aspect	No.	Mitigation Measures	Implementation Status	Follow Up action(s)
	WQ10	Silt curtain shall be formed from tough, abrasion-resistant permeable membranes suitable for the purpose, supported on floating booms in such a way as to ensure that the passage of turbid water to the surrounding water shall be restricted.	Not applicable at this stage	-
	WQ11	No dredging and spoil dumping shall be conducted.	Not applicable at this stage	-
Ecology	E01	Marker buoys shall be set up to indicate the location of the "Coral Exclusion Zone". All working vessels shall be restricted to encroach the "Coral Exclusion Zone"	Implemented	-
	E02	No overloading of the working barges during operation and no movement of the working barges, particularly close to the pier and shallow areas, during low tide should be allowed.	Not applicable at this stage	-
	E03	No coral shall be enclosed by the silt curtain.	Not applicable at this stage	-
Waste	W01	All excavated materials should be sorted to recover the inert portions for reuse on site or disposal to designated outlets.	Not applicable at this stage	-
	W02	All metals should be recovered on site for collection by recycling contractors.	Implemented	-
	W03	All cardboard and paper packaging should be recovered on site, properly stockpiled in dry condition and covered to prevent cross contamination by other C&D materials.	Implemented	-
	W04	All demolition debris from demolition works should be sorted to recover on site broken concrete, reinforcement bars, mechanical and electrical fittings as well as other building services fittings/materials that have established recycling outlets.	Implemented	-

Appendix C

Calibration Certificates for Monitoring Equipment

Record sheet for calibration of Water Sonde

Item Stock No : 7144 Date of Calibration : 1/11/2006 Procedure Used : IC 34

Temp.: 20°C Operator : Bm Signature : Bm

A Temperature Check

Reference Equipment Used : Mercury-in- Glass thermometer Stock No.: CS 1

Reference Equipment reading : 23.0 °C Sonde reading 23.6 °C

Reference Equipment reading : 23.0 °C Sonde reading : 23.6 °C

(Note: Difference between the two readings to be <0.5°C.)

B DO (% Saturation) Calibration

To be performed in aerated clean sea water before use and checked after use. Difference should be less than 10%.

Laboratory Check

Zero DO check (prepared in clean sea water according to APHA 4500-O G, section 3a.)

probe reading 0.01 %

C Conductivity (Salinity Calibration)

Standards Used : 35 ppt _____ , / ,

Check Standard : 35 ppt Readout Value : 34.24 ppt

Difference between readout value and actual value should be less than 3%.

D Conductivity Calibration

Standards Used : 1 , _____ , _____ (mS/cm) Bm 1/11/06

Check Standard : _____ Readout Value : _____ (mS/cm)

Difference between readout value and actual value should be less than 2%.

E Turbidity Calibration

Standards Used : / , / , / (NTU)

Check Standard : / Readout Value : / (NTU)

Difference between readout value and actual value should be less than 10% .

F pH check

Standard Used : pH 7.00 , pH 10.00 .

Buffer standard : pH 9.00

QC Check Standard : pH 9.182 . Readout Value : pH 9.15

CERTIFICATE OF CALIBRATION

IN - HOUSE

Date Of Issue : Serial No : IC 42b / /EL

Item Being Calibrated : ***Turbidity Standards (Gelex)*** Date Of Calibration : 1/10/2006

Item Stock No : EL471 Operator : [signature]

Environment Temp. °C : 20 °C Procedure No Used : ***IC 42 (Revision No. 0)***

Primary Standards use(20, 100 and 800 NTU Formazin standards prepared fresh.

Ref. Equip.used/ Stock No :

* *

Gelex Standards	Turbidity of standard solution used (NTU)	Measured Value (NTU)	R^2	Requirement R^2
0 - 10 NTU	1	0.98	0.9998	> 0.996
	5	4.78		
	10	9.92		
10 - 100 NTU	20	18.9	0.9997	> 0.996
	50	47.5		
	80	78.6		
100 - 1000 NTU	100	95.3	0.9996	> 0.996
	400	409		
	800	786		

Comments : *The equipment and Gelex Standards complies / does not comply with the Manufacturer's recommendation.*

Monitoring Schedule - Upcoming month

CEDD Construction No. CV/2004/02
Reconstrcution of Wong Shek and Ko Lau Wan Public Piers

Water Quality Monitoring Schedule
January 2007

Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
	1-Jan Public Holiday	2-Jan WQM[3] (Ebb: 11:09) (Flood: 16:43)	3-Jan	4-Jan	5-Jan	6-Jan
7-Jan	8-Jan	9-Jan WQM[3] (Ebb: 16:00) (Flood: 10:37)	10-Jan	11-Jan	12-Jan	13-Jan
14-Jan	15-Jan WQM[3] (Ebb: 09:33) (Flood: 14:00)	16-Jan	17-Jan	18-Jan	19-Jan	20-Jan
21-Jan	22-Jan	23-Jan WQM[3] (Ebb: 15:28) (Flood: 09:42)	24-Jan	25-Jan	26-Jan	27-Jan
28-Jan	29-Jan	30-Jan	31-Jan WQM[3] (Ebb: 11:17) (Flood: 16:34)			

Notes:
1. WQM - water quality monitoring on mid-flood and mid-ebb tides at Wong Shek (CW1, CW2, MW1 & MW2)
2. WQM - water quality monitoring on mid-flood and mid-ebb tides at Ko Lau Wan (CK1, CK2, MK1, MK2, MK3 & MK4)
3. WQM - water quality monitoring on mid-flood and mid-ebb tides at Ko Lau (CK1, CK2, MK1, MK2, MK3 & MK4) and Wong Shek (CW1, CW2, MW1 & MW2))
4. All monitoring shall be carried out once a week from mid-Mar 06 onwards due to completion of piling and demolition works.

EXECUTIVE SUMMARY

This is the Monthly Environmental Monitoring and Audit (EM&A) report for Dec 2006 under Contract No. CV/2004/02 – Reconstruction of Wong Shek and Ko Lau Wan Public Piers. This report presents the environmental monitoring and auditing (EM&A) findings based on data and information recorded from the period 1st to 31st Dec 2006 for the construction of Ko Lau Wan Public Pier.

Construction Activities for the Reported Period

During this reporting period, the principal work activities at Ko Lau Wan Pier include:

- Installation of the electrical system and lightning protective system
- Installation of the fender system and rubber capping
- Installation of permawood on steel frame with final top coating
- Reinstatement of existing paving
- Installation of spider system on steel frame
- Installation of the aluminium roda on steel frame
- Demolition of the villa

Water Quality Monitoring

4 water quality monitoring events in terms of turbidity, dissolved oxygen, suspended solids, temperature, and salinity was carried out at MK1, MK2, MK3, MK4, CK1 and CK2 at Ko Lau Wan.

Fluctuations for dissolved oxygen, turbidity and suspended solids resembled those fluctuations at the control stations which indicated that all the exceedances in water quality monitoring were due to natural phenomena and agreed with the changes in the control stations. Causation due to construction activities is unlikely and there were no valid exceedance for this reporting period.

Waste Management

No inert or non-inert C&D material was disposed and no chemical waste was transported off site in this reported period.

Complaints, Notifications of Summons and Successful Prosecutions

There was no complaints, notification of prosecutions or summons in this reporting period.

Site Inspections and Audit

4 site inspections were conducted by the Environmental Team (ET) in this reported period. An audit by the Independent Environmental Checker (IEC) was conducted on 11 Dec 2006 with the Engineers' Representative and the Environmental Team. Major observations are summarised in the following table. Major observations by the ET, actions by the Contractor and outcome are summarized in the following table.

Item	Date	Observations	Action taken by Contractor	Outcome
-	5-Dec	No particular finding	-	-
-	12-Dec	No particular finding	-	-
-	18-Dec	No particular finding	-	-
-	27-Dec	No particular finding	-	-

Future Key Issues

The tentative works activities, predicted impacts and areas of environmental concern for the coming reporting month are summarized in the following table.

Construction Works	Predict Impacts	Proposed Mitigation Measures
Installation of the electrical system and lightning protective system Installation of fender system and rubber capping Installation of spider system and the glass panel for cover walkways Installation of the handrail Installation of the permawood on steel frame with final top coating Installation of aluminium rods on steel frame Installation of the LED lights	Noise, Waste	• Avoid concurrent noisy operation during timber and steel preparation • Material and waste to be stored properly • No littering in land or sea
Reinstatement of existing pavement Application of the cast rough finishes on the staircase Installation of the stainless steel water downpipe and water gutter Casting of seating benches and installation of fluorscent lights for the benches Construction of the stamped concrete finish on the deck	Water, Noise, Waste	• Avoid concurrent noisy operation during timber and steel preparation • Prohibit on-site concrete truck washing • Avoid chemical spill and provide spill control if necessary

1 INTRODUCTION

1.1 SCOPE OF THE REPORT

Lam Environmental Services (LAM) has been appointed to work as the Environmental Team (ET) for Kin Shing Construction Company Limited to implement the Environmental Monitoring and Audit (EM&A) programme for the Contract No. CV/2004/02 – Reconstruction of Wong Shek and Ko Lau Wan Public Piers.

This report presents the environmental monitoring and auditing work carried out from the period 1st to 31st Dec 2006 for the construction of Ko Lau Wan Public Pier in accordance to Section 26 of the Particular Specification, Project Profile (PP-191/2003) and Environmental Permit (EP-186/2004) for this Project.

The following information relating to this project is documented in the EM&A Manual and, to avoid duplication, it is not presented in detail within the monthly report.

- Event-Action Plans;
- Full set of environmental mitigation measures and;
- Contracted environmental requirements.

1.2 STRUCTURE OF THE REPORT

Section 1 ***Introduction*** – details the scope and structure of the report.

Section 2 ***Project Background*** – summarizes background and scope of the project, site description, project organization and contact details of key personnel, construction programme and works undertaken during the reporting period.

Section 3 ***Implementation Status*** – summarizes the status of Environmental Permits / Licenses, implementation of environmental protection and pollution control / mitigation measures in an updated schedule for the reporting period.

Section 4 ***Monitoring Requirements*** – summarizes all monitoring parameters, monitoring methodology and equipment, monitoring locations, monitoring frequency and programmes.

Section 5 ***Monitoring Results*** – summarizes the monitoring results obtained in the reporting period.

Section 6 **C*ompliance Audit*** – summarizes the auditing of monitoring results, all exceedances environmental parameters.

Section 7 ***Site Inspection and Audit*** – summarizes the findings of weekly site inspections and independent audit undertaken within the reporting period, with a review of any relevant follow-up actions within the reporting period.

Section 8 ***Complaints, Notification of Summons and Prosecution*** – summarizes the complaints, notification of summons and successful prosecution for breaches of environmental legislation and the actions taken within the reporting period.

Section 9 ***Future Key Issues*** – summarizes the upcoming works and a forecast of the environmental impact and monitoring schedule for the next reporting period.

Section 10 ***Conclusion***

2 PROJECT BACKGROUND

2.1 SCOPE OF THE PROJECT AND SITE DESCRIPTION

The works mainly comprise demolition of the existing piers and construction of reinforced concrete piers with roof covers at Ko Lau Wan. The construction of the Project is scheduled to commence in November 2004 for completion in September 2006. The construction period is 630 days for the entire construction.

The site layout plan is shown in ***Figure 2.1***.

2.2 PROJECT ORGANIZATION AND CONTACT PERSONNEL

Civil Engineering Office of Civil Engineering and Development Department is the project proponent. The organization chart for the EM&A programme is attached in ***Appendix A***.

Under the organization chart, Resident Engineer, Contractor, Independent Environmental Checker, Environmental Team are appointed to manage and control environmental issues for the construction phase of CV/2004/02. Overall responsibilities and duties of the team are found in the corresponding EM&A Manual. Key personnel and contact particulars are summarized in ***Table 2.2***:

Table 2.2 Contact Details of Key Personnel

Post	Name	Contact No.	Contact Fax	Mobile No.
Resident Engineer	David C S Leung	2760 5737	2714 2054	9630 1235
Site Agent	W F Lok	2729 6779	2729 7858	9847 8334
Independent Environmental Checker (IEC)	Joseph T L Poon	2452 7140	2450 6138	9450 1968
Environmental Team Leader (ETL)	Raymond Dai	2975 3300	2897 5509	9738 0738

2.3 CONSTRUCTION PROGRAMME AND WORKS

Construction works carried out at Ko Lau Wan Pier during this reporting period are:

- Installation of the electrical system and lightning protective system
- Installation of the fender system and rubber capping
- Installation of permawood on steel frame with final top coating
- Reinstatement of existing paving
- Installation of spider system on steel frame
- Installation of the aluminium roda on steel frame
- Demolition of the villa

The master construction programme is given in ***Figure 2.3***.

3 IMPLEMENTATION STATUS

3.1 STATUS OF REGULATORY COMPLIANCE

A summary of the current status on licences and/or permits on environmental protection pertinent to the Project is shown in ***Table 3.1***.

Table 3.1 Cumulative Summary of Valid Licences and Permits

Permits and/or Licences	Reference No.	Issued Date	Expiry Date	Status
Environmental Permit	EP-186/2004/A	28-04-2005	-	Issued on receipt of VEP-171/2005 dated 14-04-2005
Waste Producer Registration	WPN5213-742-K1081-05	12-05-2005	-	Notified
Construction Noise Permit	-	-	-	No valid CNP granted to the Contractor

3.2 IMPLEMENTATION OF POLLUTION CONTROL / MITIGATION MEASURES

The contractor implemented various environmental mitigation measures as recommended in the Particular Specification and the Environmental Permit. The implementation schedule is presented in ***Appendix B***.

4 MONITORING REQUIREMENTS

Locations of environmental monitoring stations are referred in ***Figure 4.1***.

4.1 WATER QUALITY MONITORING

The brief for EM&A works details 6 designated stations to be monitored during the construction period comprising 4 monitoring stations and 2 control stations. These stations have been coded as MK1, MK2, MK3, MK4, CK1 and CK2 respectively.

Table 4.1a Water Quality Monitoring Stations

Station	HK Metric Grid (Easting / Northing)	Description
MK1	855 212.850E / 835 496.101N	Impact Monitoring
MK2	855 158.643E / 835 539.315N	Impact Monitoring
MK3	855 170.762E / 835 401.962N	Impact Monitoring
MK4	855 108.767E / 835 402.196N	Impact Monitoring
CK1	854 822.145E / 835 428.000N	Control during mid-ebb
CK2	854 996.976E / 835 675.135N	Control during mid-flood

Monitoring Methodology

Measurements were be taken under two tidal conditions (mid-flood and mid-ebb) at 3 water depths, namely 1m below the water surface, mid-depth and 1m above the seabed, except where the water depth is less than 6m, the mid-depth sample may be omitted. If the water depth is less than 3m, only the mid-depth will be monitored.

Replicate in-situ measurements and samples were collected from each independent sampling event are required for all parameters to ensure a robust statistical interpretable dataset.

Water quality parameter in terms of: dissolved oxygen (mg/L and % saturation), salinity (ppt), turbidity (NTU), and suspended solids (mg/L) were measured in-situ with portable instruments. Other relevant data was also recorded, including the following:

- monitoring station and position;
- time;
- depth of water;
- tidal status;
- water temperature;
- weather conditions including ambient temperature;
- any special phenomena or activities at the construction site.

For the measurement of dissolved oxygen the probe shall be removed from the water column between each duplicate measurement. If the difference between each duplicate measurement is greater than a 25% then the two sets of data shall be rejected and the measurements re-taken.

Suspended solids (SS) were determined in the laboratory at Chai Wan managed by Lam Environmental Services Ltd.

Monitoring Equipment

- Sample Bottles: Samples were kept in high density polythene bottles, packed in ice and cooled to 4^{o}C or below, without being frozen, for delivery to the laboratory as soon as possible after collection.
- Thermometer: A standard certified laboratory mercury thermometer with an accuracy of at least 0.5^{o}C was employed, calibrated against a certified thermometer of 0.1^{o}C scale. This thermometer was employed for measuring both ambient and water temperatures.
- Depth Detector: As the depth of water being sampled was generally shallow, too shallow to allow for the use of an echo-sounder, a marked depth gSepe was employed to determine water depth at all designated monitoring stations.

All in-situ monitoring equipment shall be checked, verified and calibrated by Lam laboratory at Chai Wan, a HOKLAS accredited laboratory, prior to use on the Works and subsequently thereafter every three months throughout all stages of the water quality monitoring. Responses of the sensors and electrodes shall be checked with certified standard solutions before each use. Wet bulb calibration for a DO meter shall be carried out before measurement.

For in-situ calibration of field equipment, the BS 1427: 1993 "Guide to Field and on-site test methods for the analysis of waters" shall be observed.

A set of backup monitoring instruments and equipment shall be made available so that the monitoring can proceed uninterrupted in case of apparatus malfunction or if equipment has been returned to the laboratory for calibration.

Current calibration certificates are presented in ***Appendix C***.

Laboratory Analysis

All samples are returned to the laboratory at Chai Wan for the determination of SS under a QA / QC scheme inclusive of blank, duplicate and spike recovery analysis under the requirement of HOKLAS. The laboratory test procedures conform to "Standard Methods for the Examination of Water and Wastewater" published by American Public Health Association (APHA) and United State Environmental Protection Agency (USEPA) test methods are summarized in ***Table 4.3b***.

Table 4.1b Laboratory Test Procedures

Parameter	Methodology	Method Ref.	Detection Limit
SS	Determination of Total Suspended Solids Dried at 103-105℃	APHA 19th Ed. 2540D	2.0 mg/L

4.2 MONITORING PARAMETERS AND FREQUENCY

Water quality monitoring programme has been scheduled according to the requirements stipulated in the EM&A Manual produced for the Project summarized in ***Tables 4.2***.

Table 4.2 Water Quality Monitoring Parameters and Frequencies

Station(s)	Parameter	Frequency
MK1, MK2 MK3, MK4 CK1, CK2	DO, Temperature, Salinity, Turbidity, Suspended Solids, Water Depth	For piling or demolition works 3 days per week at mid-flood and mid-ebb For marine works other than piling or demolition works 1 day per week at mid-flood and mid-ebb

4.3 WATER QUALITY CRITERIA

Water quality criteria were determined prior to the commencement of the construction of the project for the purpose of impact monitoring. Various levels established based on the results of baseline monitoring and the Event Action Plan stipulated in the EM&A Manual are summarized in ***Tables 4.3***.

Table 4.3 Action and Limit Levels for Water Quality Monitoring

Parameter	Action Level	Target Level
Dissolved Oxygen (Surface, Middle & Bottom)	Surface & Middle For Ko Lau Wan – 6.90 Bottom For Ko Lau Wan – 6.75	Surface & Middle For Ko Lau Wan – 6.79 Bottom For Ko Lau Wan – 5.63
Turbidity (depth-averaged)	For Ko Lau Wan – 1.25 or 120% of upstream control station's Tby at the same tide of same day, whichever is lower	For Ko Lau Wan – 1.60 or 130% of upstream control station's Tby at the same tide of same day, whichever is lower
Suspended Solids (depth-averaged)	For Ko Lau Wan – 6.30 or 120% of upstream control station's SS at the same tide of same day, whichever is lower	For Ko Lau Wan – 6.87 or 130% of upstream control station's SS at the same tide of same day, whichever is lower

Note:

1. *"Depth-averaged" is calculated by taking the arithmetic means of reading all three depths.*
2. *For Dissolved Oxygen, non-compliance of the water quality limits occurs when monitoring result is lower than the limits.*
3. *For Turbidity and Suspended Solid, non-compliance of the water quality limits occurs when monitoring result is higher than the limits.*
4. *All the figures given in the table are used for reference only and the Engineer may amend the figures whenever it is considered as necessary.*

4.4 MONITORING PROGRAMME

Environmental monitoring programme for this reporting period was carried out in accordance with the required monitoring frequency. The actual completion of monitoring work during the reporting period is presented in ***Tables 4.4***.

5 MONITORING RESULTS

5.1 WATER QUALITY MONITORING RESULTS

Water quality monitoring was carried out on 4 occasions at stations MK1, MK2, MK3, MK4, CK1 and CK2. Calculated water quality monitoring results in this reporting period are reviewed and summarized in ***Tables 5.1a and 5.1b***. Details of measured and tested results can be referred in ***Appendix D***. Graphical trend is presented in ***Figure 5.1a – 5.1h***.

Table 5.1a Water Quality Monitoring Results (mid-flood tide) – Dec 06

Station	Averaged DO Surface & Middle (mg/L)	Averaged DO Bottom (mg/L)	Averaged Turbidity (NTU)	Averaged Suspended Solids (mg/L)
MK1	4.70	3.77	1.12	9.1
MK2	4.78	3.81	1.14	9.5
MK3	4.77	3.70	1.17	9.8
MK4	4.61	3.81	1.13	10.1
CK1	4.58	3.36	1.17	7.6
CK2	4.61	3.24	1.21	10.4

Table 5.1b Water Quality Monitoring Results (mid-ebb tide) – Dec 06

Station	Averaged DO Surface & Middle (mg/L)	Averaged DO Bottom (mg/L)	Averaged Turbidity (NTU)	Averaged Suspended Solids (mg/L)
MK1	4.69	3.72	1.13	10.4
MK2	4.72	3.63	1.12	10.4
MK3	4.63	3.51	1.09	9.7
MK4	4.60	3.42	1.15	9.4
CK1	4.25	3.10	1.13	11.1
CK2	4.33	3.19	1.17	10.6

5.2 WASTE MONITORING RESULTS

No inert or non-inert C&D material was disposed and no chemical waste was transported off site in this reported period.

6 COMPLIANCE AUDIT

Results of the calculated water quality results for various are audited against the water quality levels and the number of exceedances are summarized ***Tables 6.1a and 6.1b***. Exceedances caused by natural phenomena namely fluctuation of overall water quality by comparing the graphical trends of monitoring and control stations are eliminated in order to identify the valid exceedance due to construction activities.

Table 6.1a Summary of Water Quality Exceedance (mid-flood tide) – Dec 06

Station	Averaged DO Surface & Middle	Averaged DO Bottom	Averaged Turbidity	Averaged Suspended Solids
MK1	0 (AL); 0 (LL)	0 (AL); 0 (LL)	0 (AL); 0 (LL)	0 (AL); 0 (LL)
MK2	0 (AL); 0 (LL)	0 (AL); 0 (LL)	0 (AL); 0 (LL)	0 (AL); 0 (LL)
MK3	0 (AL); 0 (LL)	0 (AL); 0 (LL)	0 (AL); 0 (LL)	0 (AL); 0 (LL)
MK4	0 (AL); 0 (LL)	0 (AL); 0 (LL)	0 (AL); 0 (LL)	0 (AL); 0 (LL)

Table 6.1b Summary of Water Quality Exceedance (mid-ebb tide) – Dec 06

Station	Averaged DO Surface & Middle	Averaged DO Bottom	Averaged Turbidity	Averaged Suspended Solids
MK1	0 (AL); 0 (LL)	0 (AL); 0 (LL)	0 (AL); 0 (LL)	0 (AL); 0 (LL)
MK2	0 (AL); 0 (LL)	0 (AL); 0 (LL)	0 (AL); 0 (LL)	0 (AL); 0 (LL)
MK3	0 (AL); 0 (LL)	0 (AL); 0 (LL)	0 (AL); 0 (LL)	0 (AL); 0 (LL)
MK4	0 (AL); 0 (LL)	0 (AL); 0 (LL)	0 (AL); 0 (LL)	0 (AL); 0 (LL)

As shown in the graphical trend, the observed trends and exceedances in dissolved oxygen, turbidity and suspended solids at MK1, MK2, MK3 and MK4 resemble the fluctuations to the respective control stations, possibly due to variation in water current or tidal effect.

No exceedance for turbidity and the observed exceedances suspended solids is within 12.5 mg/L, indicating the fluctuation could possibility due to the natural variation around the small values of suspended solids.

To conclude, the fluctuations for dissolved oxygen, turbidity and suspended solids resembled those fluctuations at the control stations which indicated that all the exceedances in water quality monitoring were due to natural phenomena and agreed with the changes in the control stations. Therefore, causation due to CV/2004/02 construction activities is unlikely and there were no valid exceedance for this reporting period.

7 SITE INSPECTION AND AUDIT

The ET undertook site inspection at least once a week. Monthly joint audit was undertaken by the IEC, the ETL, the Engineer and the Contractor.

The ET carried out 4 inspections during this reporting period. An audit was undertaken by the IEC on 12 Dec 2006. The results of these inspections and outcomes are summarized in ***Table 7***.

Table 7 Summary of Environmental Inspection and Audit – Dec 06

Item	Date	Observations	Action taken by Contractor	Outcome
-	5-Dec	No particular finding	-	-
-	12-Dec	No particular finding	-	-
-	18-Dec	No particular finding	-	-
-	27-Dec	No particular finding	-	-

8 COMPLAINTS, NOTIFICATION OF SUMMONS AND PROSECUTION

No complaint, inspection notice, notification of summons or prosecution was received in this reporting period. Complaint log, summaries of cumulative complaints and successful prosecutions are presented in ***Table 8a***, ***Table 8b***, ***Table 8c*** and ***Table 8d*** respectively.

Table 8a Environmental Complaints Log

Complaint Log No.	Date of Receipt	Received From and By	Nature of Complaint	Date investigated	Outcome	Date of Reply and to Whom
-	-	-	-	-	-	-

Waste	-	-	-
Total	**-**	**-**	**-**

9 FUTURE KEY ISSUES

The scheduled construction activities and the recommended mitigation measures for the coming month are listed below. The proposed monitoring schedule for the coming reporting period is detailed in ***Appendix E***.

Table 9 Construction Activities and Recommended Mitigation Measures – Jan 2007

Construction Works	Predict Impacts	Proposed Mitigation Measures
Installation of the electrical system and lightning protective system Installation of fender system and rubber capping Installation of spider system and the glass panel for cover walkways Installation of the handrail Installation of the permawood on steel frame with final top coating Installation of aluminium rods on steel frame Installation of the LED lights	Noise, Waste	• Avoid concurrent noisy operation during timber and steel preparation • Material and waste to be stored properly • No littering in land or sea
Reinstatement of existing pavement Application of the cast rough finishes on the staircase Installation of the stainless steel water downpipe and water gutter Casting of seating benches and installation of fluorscent lights for the benches Construction of the stamped concrete finish on the deck	Water, Noise, Waste	• Avoid concurrent noisy operation during timber and steel preparation • Prohibit on-site concrete truck washing • Avoid chemical spill and provide spill control if necessary

10 CONCLUSION

The EM&A programme was carried out in accordance with the EM&A Manual requirements, minor alterations to the programme proposed in the previous EM&A Report were made in response to changing circumstances.

No exceedance due to construction activities was reported in routine environmental monitoring. Such results indicate that the construction operation generally performed reasonably acceptable against environmental auditing criteria.

In summary, environmental mitigation measures are being satisfactorily implemented within the CV/2004/02 project along with the on-going construction activities.

Master Programme

(Version 2)

Contractor: Kin Shing Construction Co. Ltd.
Commencement Date: 15th Nov 2004
Completion Date: 6th Aug 2006
Programme Date: 21st Feb 2005

ID	Task Name	Duration	Start	Finish	Predecessors
103	Relocation	1 day	Fri 06/7/7	Fri 06/7/7	105,93,91,81,109,96
104	Commissioning of the pier	1 day	Sat 06/7/8	Sat 06/7/8	103
105	Demolition of the temporary berth and the existing pier	151 days	Thu 06/3/9	Sun 06/8/6	
106	Survey of existing structures	31 days	Thu 06/3/9	Sat 06/4/8	
107	Design and ICE checking of demolition plan	61 days	Sun 06/4/9	Thu 06/6/8	106
108	Submission for Engineer's comments	30 days	Fri 06/6/9	Sat 06/7/8	107
109	Obtain consent from Country and Marine Park Authority	30 days	Fri 06/6/9	Sat 06/7/8	107
110	Demolition	29 days	Sun 06/7/9	Sun 06/8/6	104,109,108
111	Maintenance Period for the Works	365 days	Mon 06/8/7	Mon 07/8/6	110
112	Section 2 (Ko Lau Wan Public Pier)				
113	Coral Survey	626 days	Mon 04/11/15	Wed 06/8/2	
114	Submission and approval of specialist and method statement	73 days	Mon 04/11/15	Wed 05/1/26	
115	Initial coral survey and approval by AFCD	18 days	Sun 05/2/20	Wed 05/3/9	114,25
116	Coral translocation	4 days	Thu 05/3/10	Sun 05/3/13	115
117	Post translocation survey	4 days	Mon 05/3/14	Thu 05/3/17	116
118	Post pier construction survey	15 days	Wed 06/7/19	Wed 06/8/2	397
119	Temporary cover to existing pier	123 days	Mon 04/11/15	Thu 05/3/17	
120	Design and ICE checking	66 days	Mon 04/11/15	Wed 05/1/19	
121	Submission for Engineer's comment	30 days	Thu 05/1/20	Fri 05/2/18	120
122	Erection	22 days	Sat 05/2/19	Sat 05/3/12	121
123	Certified by ICE and commissioning	5 days	Sun 05/3/13	Thu 05/3/17	122
124	Provision of temporary berth	247 days	Mon 04/11/15	Tue 05/7/19	
125	Design and ICE checking of temporary berth	80 days	Mon 04/11/15	Wed 05/2/2	
126	Submission for Engineer's comment	81 days	Thu 05/2/3	Sun 05/4/24	125
127	Piling (phase 1)	31 days	Mon 05/4/25	Wed 05/5/25	123,126,117,23,30,25,42
128	Piling (Phase 2)	9 days	Fri 05/6/10	Sat 05/6/18	56
129	Deck construction and installation of fenders	25 days	Sun 05/6/19	Wed 05/7/13	128
130	Relocation of navigation light by Marine Dept.	81 days	Mon 05/4/25	Thu 05/7/14	
131	Application to Marine Department	80 days	Mon 05/4/25	Wed 05/7/13	
132	Relocation works	1 day	Thu 05/7/14	Thu 05/7/14	130,131
133	Certified by ICE, testing and commissioning of berth	5 days	Fri 05/7/15	Tue 05/7/19	132
134	Demolition of part of the existing pier	115 days	Mon 05/4/18	Wed 05/8/10	
135	Survey of existing structures	31 days	Mon 05/4/18	Wed 05/5/18	
136	Design and ICE checking of demolition plan	32 days	Thu 05/5/19	Sun 05/6/19	135

Appendix B

Implementation Schedule of Mitigation Measures

Implementation Schedule of Mitigation Measures – Ko Lau Wan

Environmental Aspect	No.	Mitigation Measures	Implementation Status	Follow Up Action(s)
Air Quality	AQ01	Provide a wash-pit or a wheel washing and/or vehicle cleaning facility at the exits.	Not applicable at this stage	-
	AQ02	Provide a hard surfaced road between the wheel washing facilities and any finished road.	Not applicable at this stage	-
	AQ03	No burning of construction wastes or vegetation shall be allowed on the Site.	Implemented	-
	AQ04	In the process of material handling, any material which has the potential to create dust shall be treated with water or sprayed with wetting agent.	Not applicable at this stage	-
	AQ05	Any vehicle with an open load carrying area used for moving materials which has the potential to create dust shall have properly fitting side and tail boards.	Not applicable at this stage	-
	AQ06	Materials having the potential to create dust shall not be loaded to a level higher than the side and tail boards, and shall be covered by a clean tarpaulin.	Not applicable at this stage	-
	AQ07	Stockpiles of sand, aggregate and construction and demolition material greater than 20m3 shall be enclosed on three sides, with walls extending above the pile and 2 meters beyond the front of the pile.	Not applicable at this stage	-
	AQ08	Water sprays shall be provided and used both to dampen stored materials and when receiving raw materials.	Not applicable at this stage	-
	AQ09	Clean and water the Site to minimize the fugitive dust emissions.	Implemented	-
	AQ10	Furnace, boiler or other plant or equipment or use any fuel that might in any circumstances produce smoke or any other air pollution should not be installed.	Implemented	-
Noise	N01	All plant and equipment to be used on Site are properly maintained in good operating condition and noisy construction activities shall be effectively sound-reduced by means of silencers, mufflers, acoustic linings or shields, acoustic sheds or screens or other means to avoid disturbance to any nearby noise sensitive receivers.	Implemented	-
	N02	No excavator mounted breaker shall be used within 125m from any nearby noise sensitive receivers. Use hydraulic concrete crusher whenever applicable.	Implemented	-
	N03	All construction works should stop on Sundays and General Holidays.	Implemented	-
Water Quality	WQ01	Water in wheel washing facilities shall be changed at frequent intervals and sediments shall be removed regularly.	Not applicable at this stage	-
	WQ02	The polluted water from the wheel washing facilities would not be discharged into all existing stream courses/drains and nearby waterbodies.	Not applicable at this stage	-
	WQ03	All existing stream courses and drains within, and adjacent to the Site should be kept free from any debris and any excavated materials arising from the Works	Implemented	-
	WQ04	Chemicals and concrete agitator washings should not be deposited in watercourses.	Implemented	-
	WQ05	The effluent shall comply with the standards stated in the "Technical Memorandum on Standards and Effluent discharges into Drainage and Sewerage Systems, Inland and Coastal Waters" for the appropriate Water Control Zone.	Implemented	-
	WQ06	No spoil or debris of any kind is allowed to be pushed, washed down, fall or be deposited on land or on the seabed adjacent to the Site.	Implemented	-
	WQ07	Maintain any existing site drainage system at all times including removal of solids in sand traps, manholes and stream beds.	Implemented	-
	WQ08	Material from any earthworks should not be washed into the drainage system.	Implemented	-
	WQ09	Silt curtain shall be provided during all demolition works and piling works with the Site.	Not applicable at this stage	-

Implementation Schedule of Mitigation Measures – Ko Lau Wan

Environmental Aspect	No.	Mitigation Measures	Implementation Status	Follow Up Action(s)
	WQ10	Silt curtain shall be formed from tough, abrasion-resistant permeable membranes suitable for the purpose, supported on floating booms in such a way as to ensure that the passage of turbid water to the surrounding water shall be restricted.	Not applicable at this stage	-
	WQ11	No dredging and spoil dumping shall be conducted.	Not applicable at this stage	-
Ecology	E01	Marker buoys shall be set up to indicate the location of the "Coral Exclusion Zone". All working vessels shall be restricted to encroach the "Coral Exclusion Zone"	Implemented	-
	E02	No overloading of the working barges during operation and no movement of the working barges, particularly close to the pier and shallow areas, during low tide should be allowed.	Not applicable at this stage	-
	E03	No coral shall be enclosed by the silt curtain.	Not applicable at this stage	-
Waste	W01	All excavated materials should be sorted to recover the inert portions for reuse on site or disposal to designated outlets.	Implemented	-
	W02	All metals should be recovered on site for collection by recycling contractors.	Implemented	-
	W03	All cardboard and paper packaging should be recovered on site, properly stockpiled in dry condition and covered to prevent cross contamination by other C&D materials.	Implemented	-
	W04	All demolition debris from demolition works should be sorted to recover on site broken concrete, reinforcement bars, mechanical and electrical fittings as well as other building services fittings/materials that have established recycling outlets.	Implemented	-

Appendix C

Calibration Certificates for Monitoring Equipment

Record sheet for calibration of Water Sonde

Item Stock No : 7144 Date of Calibration : 1/11/2006 Procedure Used : IC 34

Temp.: 20°C Operator : Bm Signature : Bm

A Temperature Check

Reference Equipment Used : Mercury-in- Glass thermometer Stock No.: CS 1

Reference Equipment reading : 23.0 °C Sonde reading 23.6 °C

Reference Equipment reading : 23.0 °C Sonde reading : 23.6 °C

(Note: Difference between the two readings to be <0.5°C.)

B DO (% Saturation) Calibration

To be performed in aerated clean sea water before use and checked after use. Difference should be less than 10%.

Laboratory Check

Zero DO check (prepared in clean sea water according to APHA 4500-O G, section 3a.)

probe reading 0.01 %

C Conductivity (Salinity Calibration)

Standards Used : 35 ppt _____ , / ,

Check Standard : 35 ppt Readout Value : 34.24 ppt

Difference between readout value and actual value should be less than 3%.

D Conductivity Calibration

Standards Used : 1 , _____ , _____ (mS/cm) Bm 1/11/06

Check Standard : _____ Readout Value : _____ (mS/cm)

Difference between readout value and actual value should be less than 2%.

E Turbidity Calibration

Standards Used : / , / , / (NTU)

Check Standard : / Readout Value : / (NTU)

Difference between readout value and actual value should be less than 10% .

F pH check

Standard Used : pH 7.00 , pH 10.00 .

Buffer standard : pH 9.00

QC Check Standard : pH 9.182 . Readout Value : pH 9.15

CERTIFICATE OF CALIBRATION

IN - HOUSE

Date Of Issue : Serial No : IC 42b / /EL

Item Being Calibrated : ***Turbidity Standards (Gelex)*** Date Of Calibration : 1/10/2006

Item Stock No : EL471 Operator : [signature]

Environment Temp. °C : 20°C Procedure No Used : ***IC 42 (Revision No. 0)***

Primary Standards usec 20, 100 and 800 NTU Formazin standards prepared fresh.

Ref. Equip.used/ Stock No :

* *

Gelex Standards	Turbidity of standard solution used (NTU)	Measured Value (NTU)	R^2	Requirement R^2
0 - 10 NTU	1	0.98	0.9998	> 0.996
	5	4.78		
	10	9.92		
10 - 100 NTU	20	18.9	0.9997	> 0.996
	50	47.5		
	80	78.6		
100 - 1000 NTU	100	95.3	0.9996	> 0.996
	400	409		
	800	786		

Comments : *The equipment and Gelex Standards complies / does not comply with the Manufacturer's recommendation.*

Monitoring Schedule - Upcoming month

CEDD Construction No. CV/2004/02
Reconstrcution of Wong Shek and Ko Lau Wan Public Piers

Water Quality Monitoring Schedule
January 2007

Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
	1-Jan Public Holiday	2-Jan WQM[3] (Ebb: 11:09) (Flood: 16:43)	3-Jan	4-Jan	5-Jan	6-Jan
7-Jan	8-Jan	9-Jan WQM[3] (Ebb: 16:00) (Flood: 10:37)	10-Jan	11-Jan	12-Jan	13-Jan
14-Jan	15-Jan WQM[3] (Ebb: 09:33) (Flood: 14:00)	16-Jan	17-Jan	18-Jan	19-Jan	20-Jan
21-Jan	22-Jan	23-Jan WQM[3] (Ebb: 15:28) (Flood: 09:42)	24-Jan	25-Jan	26-Jan	27-Jan
28-Jan	29-Jan	30-Jan	31-Jan WQM[3] (Ebb: 11:17) (Flood: 16:34)			

Notes:
1. WQM - water quality monitoring on mid-flood and mid-ebb tides at Wong Shek (CW1, CW2, MW1 & MW2)
2. WQM - water quality monitoring on mid-flood and mid-ebb tides at Ko Lau Wan (CK1, CK2, MK1, MK2, MK3 & MK4)
3. WQM - water quality monitoring on mid-flood and mid-ebb tides at Ko Lau (CK1, CK2, MK1, MK2, MK3 & MK4) and Wong Shek (CW1, CW2, MW1 & MW2))
4. All monitoring shall be carried out once a week from mid-Mar 06 onwards due to completion of piling and demolition works.
