## 1.0 Introduction

After excavation of the contaminated soil in accordance with the CAR/RAP for ex-GFS Building (Rev. 2) under Agreement No. CE35/2006(CE) and EP Condition 2.11, confirmation samples (sidewall and base) was undertaken at limits of excavation to confirm that all contaminated soils had been excavated. All confirmation soil samples were tested and analysed by an HOKLAS accredited laboratory and if the analytical results were below the clean up target, removal of contaminated soil was considered complete. If the analytical results exceeded the clean up target, more soil would be excavated and additional confirmation samples would be collected and analysed until all confirmation samples achieved the clean up target.

## 2.0 Action Levels for Excavation

The concerned Action Levels for Soil Excavation is given in Table 1 below:

Table 1 Action Levels for Soil Excavation

| Area            | Excavation Zone | Action Levels           |
|-----------------|-----------------|-------------------------|
| Ex-GFS Building | A               | Phenanthrene (10mg/kg)  |
|                 |                 | Benzo(a)pyrene (1mg/kg) |
|                 |                 | Fluoranthene (10mg/kg)  |
|                 |                 | Pyrene (10mg/kg)        |
|                 | B               | Zinc (500mg/kg)         |
|                 | C               | Cadmium (5mg/kg)        |
|                 |                 | Lead (150mg/kg)         |
|                 |                 | Zinc (500mg/kg)         |
|                 | D               | TPH (1,000mg/kg)        |
|                 | E               | Cadmium (5mg/kg)        |
|                 |                 | Lead (150mg/kg)         |
|                 | F               | Lead (150mg/kg)         |
|                 | G               | Copper (100mg/kg)       |
|                 | H               | Cadmium (5mg/kg)        |
|                 |                 | Nickel (100mg/kg)       |
|                 |                 | Cabalt (50mg/kg)        |

The location plan and the extent of each of the identified contaminated zones are enclosed in Appendix A.

### 3.0 Quantities of Contaminated Soil

About 316m<sup>3</sup> of contaminated soils were excavated from all contamination zones within the ex-GFS building. A summary of the actual quantities of contaminated soil for each individual contaminated zone is provided in Table 2.

Table 2 Summary of Excavation Quantities of Contaminated Soil

| Zone No. | Actual Quantities of Contaminated Soil |     | Remediation Method    |
|----------|--|-----|-----------------------|
|          | Volume (m <sup>3</sup> )               |     |                       |
| A        | 36                                     |     | Biopiling             |
| B        | 36                                     |     | Cement Solidification |
| C        | 36                                     |     | Cement Solidification |
| D        | 36                                     |     | Biopiling             |
| E        | 64                                     |     | Cement Solidification |
| F        | 36                                     |     | Cement Solidification |
| G        | 36                                     |     | Cement Solidification |
| H        | 36                                     |     | Cement Solidification |
|          | TOTAL                                  | 316 |                       |

### 4.0 Methodology for Confirmatory Sampling

Following excavation of contaminated soil, confirmatory soil samples were taken from the sidewall and base of each excavation. One confirmation sample was collected from sidewalls of the excavation with a lateral spacing of not more than 15m. One confirmation sample was collected from the bottom of excavation pits on grid spacing not larger than 15m x 15m (i.e. one sample per every 225m<sup>2</sup>). If the analytical results of the confirmation samples exceeded the clean up target, further excavations beyond the initial contamination boundary either with 1m increment laterally or 0.5m increment vertically would be required until all confirmation samples were below the action levels.

### 5.0 Confirmatory Sampling Results

#### 5.1 Sidewall Samples

Total 32 nos. of sidewall samples were taken for soil confirmatory testing and 4 nos. of sidewall samples were collected in each excavation zones (A-H).

|  | Page : 6 of 8              |

## 5.2 Base Samples

Total 8 nos. of base samples were taken for soil confirmatory testing. 1 no. of base sample was collected in each excavation zones (A-H).

The analytical results of the confirmatory tests for sidewall and base samples indicated that all of the confirmatory soil samples were below the action level and the laboratory testing results were enclosed in Appendix A and the summary of the testing results for confirmatory tests is summarized in Table 3.

Table 3 Summary of Testing Results for Confirmatory Tests

| Zone No. | Excavation Depth (m) | Sample ID  | Result                     | Exceedance |
|----------|----------------------|--|----------------------------|------------|
| A        | 0.25                 | A1-A2/BBC0.25M/23-06-09  | Phenanthrene, mg/kg <0.5   | No         |

### 5.3 Groundwater Samples

No floating free products were observed during soil excavation in Zone A-H and therefore, no groundwater sample was collection in all contamination zones.

### 6.0 Duplicate Soil Sampling Results

1 in 10 nos. of parallel samples for spot checking on the confirmation sampling testing was collected by ET to ensure complete excavation of contaminated soil. The analytical results indicated that the parallel soil samples collected by ET were in line with the original soil samples for confirmation tests. All of the parallel samples were below the relevant Action Levels. The parallel samples were taken at Zone A, B, C, D, E and H and the summary of the testing results of parallel samples collection by ET is summarized in Table 4 and the laboratory results of confirmation samples collected by the Environmental Team (ET) are enclosed in Appendix C.

## 7.0 Conclusions

Approximately 316 cubic meters of contaminated soil was excavated from Zone A, B, C, D, E, F, G and H. A total of 35 soil samples were collected from the sidewalls of all excavation pits and 8 soil samples were collected from the bases of all excavation pits and no groundwater samples were collected. The contaminated soil was then transferred to Biopiling or Cement Solidification area, consistent with the approved remediation methods for further treatment. Since the analytical results of confirmation soil samples were below the relevant Dutch B/C levels, removal of contaminated soils for all contamination areas were considered complete and all identified contaminated areas had been cleaned up.

Remarks:  
BBC = Below Base of Existing Concrete Pavement.  
Due to space constraint within the D.G. Store, 5m X 6m square centered at GFSB-01 may not be feasible.  
The frame for excavation would have to be adjusted on site based on the actual site condition.

### General Comments

This report supersedes any previous report(s) with this reference. Results apply to the sample(s) as submitted. All pages of this report have been checked and approved for release. When date(s) and/or time(s) are shown bracketed, these have been assumed by the laboratory for processing purposes. If the sampling time is displayed as 0:00 the information was not provided by client. The completion date of analysis is: 04-JUN-2009  
Key: LOR = Limit of reporting, CAS Number = CAS registry number from database maintained by Chemical Abstracts Services. The Chemical Abstracts Service is a division of the American Chemical Society.  
Specific comments for Work Order: HK0910651

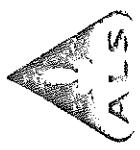

Sample(s) were picked up from client by AL-S Technichem (HK) staff in a chilled condition.

Water sample(s) were filtered prior to dissolved metal analysis.

Soil sample(s) analysed on an as received basis. Result(s) reported on a dry weight basis.

Water sample(s) analysed and reported on an as received basis.

Sample(s) as received, digested by in-house method E-ASTM D3974-81 based on ASTM D3974-81, prior to the determination of metals.

### General Comments

This report supersedes any previous reports(s) with this reference. Results apply to the sample(s) as submitted. All pages of this report have been checked and approved for release. When date(s) and/or time(s) are shown bracketed, these have been assumed by the laboratory for processing purposes. If the sampling time is displayed as 0:00 the information was not provided by client. The completion date of analysis is: 16-JUN-2009  
Key: LOR = Limit of reporting, CAS Number = CAS registry number from database maintained by Chemical Abstracts Services. The Chemical Abstracts Service is a division of the American Chemical Society.  
Specific comments for Work Order: HK0911405

Sample(s) were picked up from client by ALS Technichem (HK) staff in a chilled condition.

Water sample(s) analysed and reported on an as received basis.

Soil sample(s) analysed on an as received basis. Result(s) reported on a dry weight basis.

Sample(s) as received, digested by In-house method E:ASTM D3974-81 based on ASTM D3974-81, prior to the determination of metals.

(Water samples) were filtered prior to dissolved metal analysis.

### General Comments

This report supersedes any previous report(s) with this reference. Results apply to the sample(s) as submitted. All pages of this report have been checked and approved for release. When date(s) and/or time(s) are shown bracketed, these have been assumed by the laboratory for processing purposes. If the sampling time is displayed as 0:00 the information was not provided by client. The completion date of analysis is: 23-JUN-2009  
Key: LOR = Limit of reporting; CAS Number = CAS registry number from database maintained by Chemical Abstracts Services. The Chemical Abstracts Service is a division of the American Chemical Society.  
Specific comments for Work Order: HK0911962

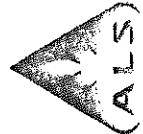

Sample(s) were picked up from client by ALS Technichem (HK) staff in a chilled condition.

Water sample(s) analysed and reported on an as received basis.

Soil sample(s) analysed on an as received basis. Result(s) reported on a dry weight basis.

Water sample(s) were filtered prior to dissolved metal analysis.

Sample(s) as received, digested by In-house method E-ASTM D3974-81 based on ASTM D3974-81, prior to the determination of metals.

### General Comments

This report supersedes any previous report(s) with this reference. Results apply to the sample(s) as submitted. All pages of this report have been checked and approved for release. When date(s) and/or time(s) are shown bracketed, these have been assumed by the laboratory for processing purposes. If the sampling time is displayed as 0:00 the information was not provided by client. The completion date of analysis is: 06-JUL-2009  
Key: LOR = Limit of reporting; CAS Number = CAS registry number from database maintained by Chemical Abstracts Service. The Chemical Abstracts Service is a division of the American Chemical Society.  
Specific comments for Work Order: HK0912998

Sample(s) were picked up from client by ALS Technichem (HK) staff in a chilled condition.

Water sample(s) analysed and reported on an as received basis.

Soil sample(s) analysed on an as received basis. Result(s) reported on a dry weight basis.

Water sample(s) were filtered prior to dissolved metal analysis.

Soil sample(s) as received, digested by in-house method E-ASTM D3974-81 based on ASTM D3974-81, prior to the determination of metals.

### General Comments

This report supersedes any previous report(s) with this reference. Results apply to the sample(s) as submitted. All pages of this report have been checked and approved for release. When date(s) and/or time(s) are shown bracketed, these have been assumed by the laboratory for processing purposes. If the sampling time is displayed as 0:00 the information was not provided by client. The completion date of analysis is: 04-AUG-2009  
Key: LOR = Limit of reporting; CAS Number = CAS registry number from database maintained by Chemical Abstracts Services. The Chemical Abstracts Service is a division of the American Chemical Society.  
Specific comments for Work Order: HK0915494

Soil sample(s) analysed on an as received basis. Result(s) reported on a dry weight basis.

Sample(s) were picked up from client by ALS Technichem (HK) staff in a chilled condition.

Water sample(s) analysed and reported on an as received basis.

### General Comments

This report supersedes any previous report(s) with this reference. Results apply to the sample(s) as submitted. All pages of this report have been checked and approved for release. When date(s) and/or time(s) are shown bracketed, these have been assumed by the laboratory for processing purposes. If the sampling time is displayed as 0:00 the information was not provided by client. The completion date of analysis is:  
27-NOV-2009  
Key: LOR = Limit of reporting; CAS Number = CAS registry number from database maintained by Chemical Abstracts Services. The Chemical Abstracts Service is a division of the American Chemical Society.  
Specific comments for Work Order: HK0924663

Sample(s) were picked up from client by ALS Technichem (HK) staff in a chilled condition.

Water sample(s) analysed and reported on an as received basis.

Soil sample(s) analysed on an as received basis. Result(s) reported on a dry weight basis.

Water sample(s) were filtered prior to dissolved metal analysis.

Sample(s) as received, digested by In-house method E-ASTM D3974-81 based on ASTM D3974-81, prior to the determination of metals.

### General Comments

This report supersedes any previous report(s) with this reference. Results apply to the sample(s) as submitted. All pages of this report have been checked and approved for release. When date(s) and/or time(s) are shown bracketed, these have been assumed by the laboratory for processing purposes. If the sampling time is displayed as 0:00 the information was not provided by client. The completion date of analysis is:

03-DEC-2009

Key: LOR = Limit of reporting; CAS Number = CAS registry number from database maintained by Chemical Abstracts Services. The Chemical Abstracts Service is a division of the American Chemical Society.

Specific comments for Work Order: HK0925087

Samples(s) were picked up from client by ALS Technichem (HK) staff in a chilled condition.

Water sample(s) analysed and reported on an as received basis.

Soil sample(s) analysed on an as received basis. Result(s) reported on a dry weight basis.

This report may not be reproduced except with prior written  
approval from the testing laboratory.

This document has been electronically signed by those names that appear on this report and are the authorised  
signatories. Electronic signing has been carried out in compliance with procedures specified in the Electronic Transactions  
Ordinance of Hong Kong, Chapter 553, Section 6.

Work Order : HK0925924

## General Comments

This report supersedes any previous report(s) with this reference. Results apply to the sample(s) as submitted. All pages of this report have been checked and approved for release. When date(s) and/or time(s) are shown bracketed, these have been assumed by the laboratory for processing purposes. If the sampling time is displayed as 0:00 the information was not provided by client. The completion date of analysis is: 15-DEC-2009

Key: LOR = Limit of reporting; CAS Number = CAS registry number from database maintained by Chemical Abstracts Services. The Chemical Abstracts Service is a division of the American Chemical Society.  
Specific comments for Work Order: HK0925924

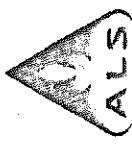

Sample(s) were picked up from client by ALS Technichem (HK) staff in a chilled condition.

Water sample(s) analysed and reported on an as received basis.

Soil sample(s) analysed on an as received basis. Result(s) reported on a dry weight basis.

Water sample(s) were filtered prior to dissolved metal analysis.

Sample(s) as received, digested by In-house method E-ASTM D3974-81 based on ASTM D3974-81, prior to the determination of metals.  
The metal concentrations reported are those determined on the TCLP leachate. Extraction Fluid #2 pH 2.83 - 2.93.

### General Comments

This report supersedes any previous report(s) with this reference. Results apply to the sample(s) as submitted. All pages of this report have been checked and approved for release. When date(s) and/or time(s) are shown bracketed, these have been assumed by the laboratory for processing purposes. If the sampling time is displayed as 0:00 the information was not provided by client. The completion date of analysis is:

12-JAN-2010

Key: LOR = Limit of reporting; CAS Number = CAS registry number from database maintained by Chemical Abstracts Services. The Chemical Abstracts Service is a division of the American Chemical Society.

Specific comments for Work Order: HK1000207

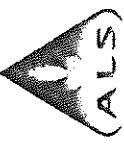

Sample(s) were picked up from client by ALS Technichem (HK) staff in a chilled condition.

Water sample(s) analysed and reported on an as received basis.

Soil sample(s) analysed on an as received basis. Result(s) reported on a dry weight basis.

Water sample(s) were filtered prior to dissolved metal analysis.

Sample(s), as received, digested by in-house method E-ASTM D3974-81 based on ASTM D1974-81, prior to the determination of metals.

# PRELIMINARY REPORT FOR REFERENCE OI.-Y

Page Number : 2 of 7  
Client : KIN WING CONSTRUCTION COMPANY LIMITED  
Work Order : HK1001283

## General Comments

This report supersedes any previous report(s) with this reference. Results apply to the sample(s) as submitted. All pages of this report have been checked and approved for release. When date(s) and/or time(s) are shown bracketed, these have been assumed by the laboratory for processing purposes. If the sampling time is displayed as 0:00 the information was not provided by client. The completion date of analysis is:

22-JAN-2010

Key: LOR = Limit of reporting; CAS Number = CAS registry number from database maintained by Chemical Abstracts Services. The Chemical Abstracts Service is a division of the American Chemical Society.  
Specific comments for Work Order: HK1001283

Sample(s) were picked up from client by ALS Technichem (HK) staff in a chilled condition.

Water sample(s) analysed and reported on an as received basis.

Soil sample(s) analysed on an as received basis. Result(s) reported on a dry weight basis.

Water sample(s) were filtered prior to dissolved metal analysis.

Sample(s) as received, digested by in-house method E-ASTM D3974-81 based on ASTM D3974-81, prior to the determination of metals.

The metal concentrations reported are those determined on the TCLP leachate. Extraction Fluid #1 pH 4.88 - 4.98.

#### Report Comments

This report for AL.S Technichem (HK) Pty Ltd work order reference HK1001417 supersedes any previous reports with this reference. The completion date of analysis is 27-JAN-2010. Results apply to sample(s) as submitted. All pages of this report have been checked and approved for release. When date(s) and/or time(s) are shown bracketed, these have been assumed by the laboratory for process purposes. Abbreviations: CAS number = Chemical Abstract Services number; LOR = Limit of reporting.

Specific comments for Work Order HK1001417 :

Sample(s) were picked up from client by AL.S Technichem (HK) staff in a chilled condition.

Water sample(s) analysed and reported on an as received basis.

Soil sample(s) analysed on an as received basis. Result(s) reported on a dry weight basis.

Water sample(s) were filtered prior to dissolved metal analysis.

Sample(s) as received, digested by in-house method E-ASTM D3974-81 based on ASTM D3974-81, prior to the determination of metals.

### **General Comments**

This report supersedes any previous report(s) with this reference. Results apply to the sample(s) as submitted. All pages of this report have been checked and approved for release. When date(s) and/or time(s) are shown bracketed, these have been assumed by the laboratory for processing purposes. If the sampling time is displayed as 0:00 the information was not provided by client. The completion date of analysis is: 04-JUN-2009  
Key: LOR = Limit of reporting; CAS Number = CAS Registry number from database maintained by Chemical Abstracts Services. The Chemical Abstracts Service is a division of the American Chemical Society.  
Specific comments for Work Order: HK0910651

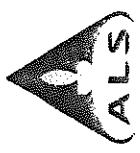

Sample(s) were picked up from client by ALS Technichem (HK) staff in a chilled condition.

Water sample(s) were filtered prior to dissolved metal analysis.

Soil sample(s) analysed on an as received basis. Result(s) reported on a dry weight basis.

Water sample(s) analysed and reported on an as received basis.

Sample(s) as received, digested by In-house method E-ASTM D3974-81 based on ASTM D3974-81, prior to the determination of metals.

### General Comments

This report supersedes any previous reports) with this reference. Results apply to the sample(s) as submitted. All pages of this report have been checked and approved for release. When date(s) and/or time(s) are shown bracketed, these have been assumed by the laboratory for processing purposes. If the sampling time is displayed as 0:00 the information was not provided by client. The completion date of analysis is: 15-JUN-2009 Key: LOR = Limit of reporting; CAS Number = CAS registry number from database maintained by Chemical Abstracts Services. The Chemical Abstracts Service is a division of the American Chemical Society.

Specific comments for Work Order: HK0911206

Sample(s) were picked up from client by ALS Technichem (HK) staff in a chilled condition.

Soil sample(s) analysed on an as received basis. Result(s) reported on a dry weight basis.

Sample(s) as received, digested by In-house method E-ASTM D3974-81 based on ASTM D3974-81, prior to the determination of metals.

This report may not be reproduced except with prior written approval  
from the testing laboratory.

### General Comments

This report supersedes any previous report(s) with this reference. Results apply to the sample(s) as submitted. All pages of this report have been checked and approved for release. When date(s) and/or time(s) are shown bracketed, these have been assumed by the laboratory for processing purposes. If the sampling time is displayed as 0:00 the information was not provided by client. The completion date of analysis is: 23-JUN-2009 Key: LOR = Limit of reporting; CAS Number = CAS registry number from database maintained by Chemical Abstracts Service. The Chemical Abstracts Service is a division of the American Chemical Society.

Specific comments for Work Order: HK0911962

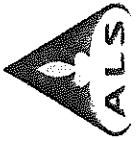

Sample(s) were picked up from client by ALS Technichem (HK) staff in a chilled condition.

Water sample(s) analysed and reported on an as received basis.

Soil sample(s) analysed on an as received basis. Result(s) reported on a dry weight basis.

Water sample(s) were filtered prior to dissolved metal analysis.

Sample(s) as received, digested by In-house method E-ASTM D3974-81 based on ASTM D3974-81, prior to the determination of metals.

### General Comments

This report supersedes any previous report(s) with this reference. Results apply to the sample(s) as submitted. All pages of this report have been checked and approved for release. When date(s) and/or time(s) are shown bracketed, these have been assumed by the laboratory for processing purposes. If the sampling time is displayed as 0:00 the information was not provided by client. The completion date of analysis is: 06-JUL-2009  
Key: LOR = Limit of reporting; CAS Number = CAS registry number from database maintained by Chemical Abstracts Services. The Chemical Abstracts Service is a division of the American Chemical Society.

Specific comments for Work Order: HK0912998

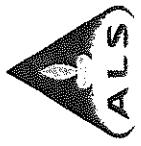

Sample(s) were picked up from client by ALS Technichem (HK) staff in a chilled condition.

Water sample(s) analysed and reported on an as received basis.

Soil sample(s) analysed on an as received basis. Result(s) reported on a dry weight basis.

Water sample(s) were filtered prior to dissolved metal analysis.

Soil sample(s) as received, digested by in-house method E-ASTM D3974-81 based on ASTM D3974-81, prior to the determination of metals.

### General Comments

This report supersedes any previous report(s) with this reference. Results apply to the sample(s) as submitted. All pages of this report have been checked and approved for release. When date(s) and/or time(s) are shown bracketed, these have been assumed by the laboratory for processing purposes. If the sampling time is displayed as 0:00 the information was not provided by client. The completion date of analysis is: 04-AUG-2009  
Key: LOR = Limit of reporting; CAS Number = CAS registry number from database maintained by Chemical Abstracts Services. The Chemical Abstracts Service is a division of the American Chemical Society.

Specific comments for Work Order: HK0915494

Soil sample(s) analysed on an as received basis. Result(s) reported on a dry weight basis.  
Sample(s) were picked up from client by ALS Technichem (HK) staff in a chilled condition.  
Water sample(s) analysed and reported on an as received basis.

This report may not be reproduced except with prior written approval  
from the testing laboratory.

This document has been electronically signed by those names that appear on this report and are the authorised signatories.  
Electronic signing has been carried out in compliance with procedures specified in the Electronic Transactions Ordinance of Hong Kong, Chapter 553, Section 6.

### General Comments

This report supersedes any previous report(s) with this reference. Results apply to the sample(s) as submitted. All pages of this report have been checked and approved for release. When date(s) and/or time(s) are shown bracketed, these have been assumed by the laboratory for processing purposes. If the sampling time is displayed as 0:00 the information was not provided by client. The completion date of analysis is:

27-NOV-2009

Key: LOR = Limit of reporting; CAS Number = CAS registry number from database maintained by Chemical Abstracts Services. The Chemical Abstracts Service is a division of the American Chemical Society.  
Specific comments for Work Order: HK0924653

Sample(s) were picked up from client by ALS Technichem (HK) staff in a chilled condition.

Water sample(s) analysed and reported on an as received basis.

Soil sample(s) analysed on an as received basis. Result(s) reported on a dry weight basis.

Water sample(s) were filtered prior to dissolved metal analysis.

Sample(s) as received, digested by in-house method E-ASTM D3974-81 based on ASTM D3974-81, prior to the determination of metals.

### General Comments

This report supersedes any previous report(s) with this reference. Results apply to the sample(s) as submitted. All pages of this report have been checked and approved for release. When date(s) and/or time(s) are shown bracketed, these have been assumed by the laboratory for processing purposes. If the sampling time is displayed as 0:00 the information was not provided by client. The completion date of analysis is:

03-DEC-2009

Specific comments for Work Order: HK0925087

Sample(s) were picked up from client by ALS Technichem (HK) staff in a chilled condition.

Water sample(s) analysed and reported on an as received basis.

Soil sample(s) analysed on an as received basis. Result(s) reported on a dry weight basis.

This report may not be reproduced except with prior written approval from the testing laboratory.

# PRELIMINARY REPORT FOR REFERENCE OF

Page Number : 2 of 7  
Client : KIN WING CONSTRUCTION COMPANY LIMITED  
Work Order : HK0925924

## General Comments

This report supersedes any previous report(s) with this reference. Results apply to the sample(s) as submitted. All pages of this report have been checked and approved for release. When date(s) and/or time(s) are shown bracketed, these have been assumed by the laboratory for processing purposes. If the sampling time is displayed as 0:00 the information was not provided by client. The completion date of analysis is:

15-DEC-2009

Key: LOR = Limit of reporting; CAS Number = CAS registry number from database maintained by Chemical Abstracts Services. The Chemical Abstracts Service is a division of the American Chemical Society.

Specific comments for Work Order: HK0925924.

Samples(s) were picked up from client by ALS Technichem (HK) staff in a chilled condition.

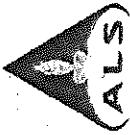

Water sample(s) analysed and reported on an as received basis.

Soil sample(s) analysed on an as received basis. Result(s) reported on a dry weight basis.

Water sample(s) were filtered prior to dissolved metal analysis.

Samples(s) as received, digested by In-house method E-ASTM D3974-81 based on ASTM D3974-81, prior to the determination of metals.

The metal concentrations reported are those determined on the TCLP leachate. Extraction Fluid #2 pH 2.83 - 2.93.

### General Comments

This report supersedes any previous report(s) with this reference. Results apply to the sample(s) as submitted. All pages of this report have been checked and approved for release. When date(s) and/or time(s) are shown bracketed, these have been assumed by the laboratory for processing purposes. If the sampling time is displayed as 0:00 the information was not provided by client. The completion date of analysis is: 12-JAN-2010

Key: LOR = Limit of reporting; CAS Number = CAS registry number from database maintained by Chemical Abstracts Services. The Chemical Abstracts Service is a division of the American Chemical Society.

Specific comments for Work Order: HK1000207

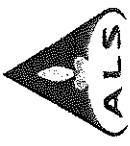

Sample(s) were picked up from client by ALS Technichem (HK) staff in a chilled condition.

Water sample(s) analysed and reported on an as received basis.

Soil sample(s) analysed on an as received basis. Result(s) reported on a dry weight basis.

Water sample(s) were filtered prior to dissolved metal analysis.

Sample(s) as received, digested by In-house method E-ASTM D3974-81 based on ASTM D3974-81, prior to the determination of metals.

## General Comments

This report supersedes any previous report(s) with this reference. Results apply to the sample(s) as submitted. All pages of this report have been checked and approved for release. When date(s) and/or time(s) are shown bracketed, these have been assumed by the laboratory for processing purposes. If the sampling time is displayed as 0:00 the information was not provided by client. The completion date of analysis is:

22-JAN-2010

Key: LOR = Limit of reporting; CAS Number = CAS registry number from database maintained by Chemical Abstracts Services. The Chemical Abstracts Service is a division of the American Chemical Society.  
Specific comments for Work Order: HK1001263

Sample(s) were picked up from client by A.L.S. Technichem (HK) staff in a chilled condition.

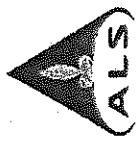

Water sample(s) analysed and reported on as received basis.

Soil sample(s) analysed on an as received basis. Result(s) reported on a dry weight basis.

Water sample(s) were filtered prior to dissolved metal analysis.

Sample(s) as received, digested by In-house method E-ASTM D3974-81 based on ASTM D3974-81, prior to the determination of metals.

The metal concentrations reported are those determined on the TCLP leachate. Extraction Fluid #1 pH 4.88 - 4.98.

### **Report Comments**

This report for ALS Technichem (HK) Pty Ltd work order reference HK1001417 supersedes any previous reports with this reference. The completion date of analysis is 27-JAN-2010. Results apply to sample(s) as submitted. All pages of this report have been checked and approved for release. When date(s) and/or time(s) are shown bracketed, these have been assumed by the laboratory for process purposes. Abbreviations: CAS number = Chemical Abstract Services number. LOR = Limit of reporting.

Specific comments for Work Order HK1001417 :

Water sample(s) analysed and reported on an as received basis.

Soil sample(s) analysed on an as received basis. Result(s) reported on a dry weight basis.

Water sample(s) were filtered prior to dissolved metal analysis.

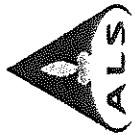

Sample(s) as received, digested by In-house method E-ASTM D3974-81 based on ASTM D3974-81, prior to the determination of metals.
