EXECUTIVE SUMMARY

The site preparation works for the SJC cable network system commenced on 21 June 2012. Atkins China Limited (ACL) has been appointed as the Environmental Team (ET) to undertake environmental management and monitoring work in accordance with the EM&A Manual.

This is the Seventeenth Weekly Environmental Impact Monitoring and Site Audit Report for the works specified in the Environmental Permit (EP-423/2011/A) and Environmental Monitoring and Audit (EM&A) Manual. This report summarises the findings and results of the EM&A during the reporting period of the seventeenth week of works and covers the reporting period 8 October 2012 to 14 October 2012.

Environmental Monitoring and Audit Progress

The EM&A programme have been undertaken in accordance with the approved EM&A Manual. A summary of the monitoring activities performed in the reporting period is summarised below:

- Water quality monitoring was conducted on 11 October 2012 during mid-ebb and mid-flood tide periods.

Exceedance of Action and Limit Levels

No exceedance of action and limit level was recorded during the reporting period.

Complaint Log

No complaints were received in relation to environmental impact during the reporting period.

Site Inspection and Audit

According to the Contractor and based on the site inspection on 23 August 2012. Shore based construction and reinstatements were completed and no more shore-based site activities are anticipated. Therefore, no site inspection during the reporting period was undertaken.

1. INTRODUCTION

1.1 Background of the Project

1.1.1 South-East Asia Japan Cable System (SJC) is a submarine cable system linking South-East Asia to Japan. SJC will provide direct access and diverse routing between Singapore, the Philippines, Hong Kong, China, Brunei and Japan. The cable system will span approx. 8,900km and will be mainly composed of a seven-fibre pair high capacity submarine cable system with a design capacity of 17.9 terabits per second. The project will increase the broadband capacity of Hong Kong.

1.1.2 The Project is classified as a Designated Project under Item C12 of Part I Schedule 2 of the Environmental Impact Assessment Ordinance (EIAO): "*A dredging operation which is (a) less than 500 metres from the nearest boundary of an existing or planned (iii) bathing beach; and (vii) coastal protection area"*.

1.1.3 In accordance with the EIAO, an environmental assessment was undertaken and a Project Profile was submitted to the Environmental Protection Department (EPD) (PP-444/2011) for an Application for Permission to Apply Directly for Environmental Permit for the project (Application No. DIR-213/2011) (DIR). The DIR was granted by EPD on 1st August 2011 with conditions.

1.1.4 Atkins China Limited (ACL) has been appointed as the Environmental Team (ET) to undertake environmental management and monitoring work in accordance with the EM&A Manual and required under the Variation of Environmental Permit (No. EP-423/2011/A) issued to China Telecom (Hong Kong) International Limited in October 2011 for the Project of South-East Asia Japan Cable System (SJC) — Hong Kong Segment.

1.1.5 This is the Seventeenth Weekly Environmental Impact Monitoring and Site Audit Report for the works specified in the Environmental Monitoring and Audit (EM&A) Manual. This report summarises the results and findings of the EM&A during the reporting period 8 October 2012 to 14 October 2012.

1.2 Summary of Impact EM&A Requirements

1.2.1 The EM&A programme requires environmental monitoring for water quality, marine mammals and construction and demolition waste management, as specified in the EM&A Manual. This shall be conducted accordingly.

2. MONITORING RESULTS

2.1 Water Quality

Programme

2.1.1 The water quality monitoring programme for this reporting period is presented in Table 2-1.

Table 2-1 – Water Quality Monitoring Programme

Date of Sampling	Tidal State	Time of Sampling
11 October 2012	Mid-Ebb	07:45-10.25
	Mid-Flood	14:20-17:00

Monitoring Stations

2.1.2 Seventeen water quality monitoring stations were sampled during the impact water quality monitoring (see Figure 2-1) and listed in Table 2-1 as follows. These stations are applicable for works undertaken during installation of the cable in Stanley Bay.

Table 2-2 – Impact Water Quality Monitoring Stations

Monitoring Station	Co-ordinates		Station Purpose
A1	839451	808265	180m from point A
A2	839511	808265	120m from point A
A3	839571	808265	60m from point A
A4	839691	808265	60m from point A
A5	839751	808265	120m from point A

B2	839468	808160	120m from point B
B3	839528	808160	60m from point B
B4	839648	808160	60m from point B
B5	839708	808160	120m from point B
B6	839768	808160	180m from point B
C	840081	808353	Control Station
D1	839429	808641	100m from point D
D2	839540	808552	100m from point D
D3	839453	808443	100m from point D
D4	839344	808531	100m from point D

Methodology

2.1.3 Water quality monitoring was conducted in accordance with the methodology described in the EM&A Manual.

2.1.4 The water quality parameters monitored included dissolved oxygen (DO) (% saturation and mg/L), temperature, turbidity (NTU), salinity and suspended solids

(SS). DO, temperature, turbidity and salinity were measured *in-situ* whereas SS was determined by laboratory analysis.

2.1.5 Laboratory analysis of SS was carried out at ALS Laboratory Group, a recognised HOKLAS accredited laboratory.

Results

2.1.7 The weather during the monitoring period is sunny. The impact monitoring results at each monitoring locations are provided in full in **Annex B**.

2.1.8 The impact monitoring data on 11 October 2012 and laboratory results at each monitoring location are provided in full in **Annex B**. The recorded field transcripts of the impact monitoring data were checked in hard copy with the electronic version of the results and were found to be accurate. The result of the impact monitoring data at each monitoring location are summarised in **Tables 2-3 to 2-6**.

Mid-Ebb and Mid-Flood Results Summary

2.1.9 No DO, Turbidity and SS exceedances were found during the reporting period.

2.2 Marine Mammals

2.2.1 No marine works within marine mammals inspection area in accordance with the EM&A manual were undertaken during the reporting period. Therefore, no marine mammal inspection was conducted during reporting period.

2.3 Construction and Demolition Waste Management

2.3.1 According to the Contractor and based on the site inspection on 23 August 2012. Shore-based construction and reinstatement were completed and no more shore-based site activities are anticipated. Therefore, no construction and demolition waste was generated during reporting period.

3. ENVIRONMENTAL NON-COMPLIANCE AND COMPLAINTS

3.1 Environmental Exceedances

Water Quality

3.1.1 Water quality monitoring was conducted on 11 October 2012. No exceedance of action and limit level was recorded during the reporting period.

3.2 Site Inspections

3.2.1 No shore-based works were undertaken during the reporting period. Therefore, no site inspection was undertaken during the reporting period.

3.3 Environmental Complaint

3.3.1 No complaints were received in relation to environmental impact during the reporting period.

4. FORECAST AND SCHEDULE

4.1 Key Engineering Works for the Coming Week

4.1.1 The construction work for the SJC cable installation within Hong Kong SAR Boundary has been finished on 11 October 2012. No more construction activities are anticipated.

4.2 Monitoring Schedule for the Coming Week

4.2.1 Since the construction of the SJC cable installation within Hong Kong SAR boundary has been completed, this will be the last weekly EM&A report before the cessation of the EM&A programme for construction stage of the Project.

5. CONCLUSION

5.1.1 This is the Seventeenth Weekly Environmental Impact Monitoring and Site Audit Report prepared by Atkins China Limited (ACL), for the consultancy services for the south-East Asia Japan Cable System (SJC) Project. This report been prepared in compliance with the Environmental Permit (EP-423/2011/A) and associated EM&A Manual, and covers the reporting period 8 October 2012 to 14 October 2012.

5.1.2 Water quality monitoring was conducted on 11 October 2012. No exceedance of water quality was recorded in the reporting period.

5.1.3 No shore-based works were undertaken during the reporting period. Therefore, no site inspection was undertaken during the reporting period.

5.1.4 Overall, environmental impacts arising from the project activities have been controlled and properly rectified.

5.1.5 Since the construction of the SJC cable installation within Hong Kong SAR boundary has been completed, this will be the last weekly EM&A report before the cessation of the EM&A programme for construction stage of the Project.

Report Comments

This report for ALS Technichem (HK) Pty Ltd work order reference HK1227116 supersedes any previous reports with this reference. The completion date of analysis is 17-OCT-2012. Results apply to sample(s) as submitted. All pages of this report have been checked and approved for release. When date(s) and/or time(s) are shown bracketed, these have been assumed by the laboratory for process purposes. Abbreviations: CAS number = Chemical Abstract Services number. LOR = Limit of reporting.

Specific comments for Work Order HK1227116 :

Sample(s) were collected by ALS Technichem (HK) staff on 11 October, 2012.

Water sample(s) analysed and reported on an as received basis.

Temperature, Salinity, Dissolved Oxygen and Turbidity were measured on-site by ALS Technichem (HK) staff.

This document has been electronically signed by those names that appear on this report and are the authorised signatories. Electronic signing has been carried out in compliance with procedures specified in the 'Electronic Transactions Ordinance' of Hong Kong, Chapter 553, Section 6.
