Proposal for Termination of TSP Monitoring at CD6a  
Harbourfront Horizon

### 1. Introduction

Construction dust monitoring during the course of construction works are recommended at Harbourfront Horizon (CD6a) to monitor the dust mitigation measures for barging activities and any works at Finger Pier according to the approved KTE EIA Report and the EM&A Manual.

### 2. Construction Programme

According to the latest programme and contractual arrangement, all KTE related construction works at Finger Pier was completed by end December 2013 and the construction site will be handed over to other project under MTR.

### 3. Termination of Monitoring at CD6a

By considering the completion of works at Finger Pier for KTE project, MTR would like to terminate the dust monitoring at CD6a Harbourfront Horizon starting from January 2014. The location of the CD6a could be referred to the figure below. The overall trend of the monitored parameters over the course of the construction works at Finger Pier was shown in the EM&A report for December 2013.

Location of Dust Monitoring Location CD6a at Finger Pier:
