Attention: Mr. C L Lau

Dear Mr. Lau,

**Re: Contract No. CV/2013/06  
Handling of Surplus Public Fill (2014 – 2016)  
Quarterly EM&A Summary Report No. 5 (January to March 2015) for the Tuen  
Mun Area 38 Fill Bank**

Reference is made to your submission of the draft Quarterly EM&A Summary Report No. 5 (January to March 2015) for the TM Area 38 Fill Bank received by E-mail on 16 April 2015 and the subsequent revision on 20 April 2015.

We are pleased to inform you that we have no further comment on the captioned report.

Thank you very much for your attention and please do not hesitate to contact our Jason Lai or the undersigned should you have any queries.

Yours sincerely,

Tony Cheng  
Independent Environmental Checker

## **EXECUTIVE SUMMARY**

This is Quarterly Environmental Monitoring and Audit (EM&A) Summary Report No.5 prepared by ETS-Testconsult Ltd (ET) for the "Contract No. CV/2013/06 Handling of Surplus Public Fill (2014-2016) – Tuen Mun (TM) Area 38 Fill Bank" (The Project).

This report documents the findings of EM&A Works conducted during the operation phase of Fill Bank at Tuen Mun Area 38 from January to March 2015.

### **Site Activities**

As informed by the Contractor, the site activities in this reporting quarter were as below:

- |                      |   |
|----------------------|---|
| <i>January 2015</i>  | <ol style="list-style-type: none"><li>1. Operation of the TM38 Fill Bank</li><li>2. Transferring public fill to vessel and delivering to Taishan and other parties</li><li>3. Repairing of the damaged cladding of tipping hall</li><li>4. Construction of New Tipping Hall</li></ol>   |
| <i>February 2015</i> | <ol style="list-style-type: none"><li>1. Operation of the TM38 Fill Bank</li><li>2. Transferring public fill to vessel and delivering to Taishan and other parties</li><li>3. Repairing of the damaged cladding of tipping hall</li><li>4. Construction of New Tipping Hall</li><li>5. Repairing of Wheel Wash Facility B3.</li></ol>   |
| <i>March 2015</i>    | <ol style="list-style-type: none"><li>1. Operation of the TM38 Fill Bank</li><li>2. Transferring public fill to vessel and delivering to Taishan and other parties</li><li>3. Construction of new recording house at B6</li></ol> |

### **Environmental Monitoring Works**

#### ***Air Monitoring***

No exceedance of Action and Limit levels was recorded for 1-hr and 24-hr TSP monitoring in this quarter.

#### ***Marine Water Quality Monitoring***

According to the summary of marine water monitoring results, no exceedance of Action and Limit levels was recorded in this quarter.

#### ***Noise Monitoring***

No exceedance of Action and Limit levels for noise monitoring was recorded in this quarter.

### **Environmental Complaints, Notification of summons and successful prosecutions**

No complaint, notification of summon and prosecution with respect to environmental issue was received in this quarter.

## 1.0 INTRODUCTION

HKPFH Joint Venture (HKPFH-JV) appointed Environmental Team (ET) of ETS-Testconsult Limited (ETL) to undertake the Environmental Monitoring and Audit (EM&A) for the "Contract No: CV/2013/06 –Handling of Surplus Public Fill (2014-2016) – Tuen Mun (TM) Area 38 Fill Bank" (The Project).

In accordance with the Condition 5 of Part C of Environmental Permit (No.: EP-210/2005/B) (the EP), an EM&A programme as set out in the Project Profile should be implemented. The EM&A programme requires environmental monitoring for air quality, water quality and environmental site inspections for air quality, water quality, landscape and visual, and waste management.

Baseline monitoring was completed in May 2003 by Stanger Asia Ltd. Action and Limit Levels were established for air and water quality parameters based on the baseline monitoring results.

This quarterly report documented the findings of EM&A Works conducted during the operation phase of Fill Bank at Tuen Mun Area 38 from January to March 2015.

## 2.0 PROJECT INFORMATION

### 2.1 Work Programme in this Reporting Quarter

Details of work programme are shown in Appendix G.

### 2.2 Project Organization and Management Structure

The project organization chart is shown in Appendix A.

### 2.3 Contact Details of Key Personnel

The key personnel contact names and telephone numbers are shown in Table 2.1.

Table 2.1 Contact Details of Key Personnel

Organization	Name of Key Staff	Project Role	Tel. No.	Fax No.
CEDD	Simon Leung, Terry Chock, Louis Chan, W F Cheung, Panda Liu, Samson Kwong	Engineer's Representative	2762 5555	2714 0113
IEC (ENVIRON)	Mr Tony Cheng	IEC	3465 2888	3465 2899
Contractor (HKPFH-JV)	Mr. K W Li	Project Manager	9750 6438	2744 6937
ET (ETL)	Mr C. L. Lau	ET Leader	2946 7791	2695 3944

## 3.0 SUMMARY OF EM&A REQUIREMENTS

### 3.1 EM&A Programme

The EM&A programme required environmental monitoring for air, marine water and environmental site inspections for air, marine water, landscape and visual, and waste management. The EM&A requirements for each parameter described in the following sections include:

- All monitoring parameters;
- Monitoring schedules for the reporting month and forthcoming months;
- Action and Limit levels for all environmental parameters;
- Event/Action Plans;
- Environmental mitigation measures, as recommended in the Project EIA study final report; and
- Environmental requirements in contract documents.

The advice on implementation status of environmental protection and pollution control/mitigation measures is summarized in Section 5 of the Report.

### 3.2 Monitoring Stations and Parameters

The EM&A Manual designates several locations to monitor environmental impacts in terms of air quality, noise and water quality due to the Project. The description and detailed locations of monitoring stations for air quality, noise and marine water quality are shown in Figures 1, 2 and 3 and relevant sections of this Report.

### 3.3 Monitoring Methodology and Calibration Details

All monitoring works were conducted and monitoring equipment was calibrated in according with the EM&A Manual.

### 3.4 Environmental Quality Performance Limits (Action/Limit Levels)

The environmental quality performance limits, i.e. Action/Limit Levels (AL Levels) were derived from the baseline monitoring results. If the measured environmental quality parameters exceed the AL Levels, the respective action plan will be implemented. The AL Levels for each monitoring parameter are given in Appendix E. The event action plan is given in Appendix F.

### 3.5 Environmental Mitigation Measures

Relevant mitigation measures were recommended in the EM&A Manual for the Contractor to implement. A list of mitigation measures is given in Appendix H.

## 4.0 MONITORING RESULTS

### 4.1 Air Quality

In accordance with the EM&A Manual, 1-hr and 24-hr TSP air quality monitoring are to be conducted three times and one time per six days correspondingly. In the reporting quarter, no exceedances of Action and Limit levels were recorded for 1-hr and 24-hr TSP monitoring. The monitoring trend of air quality during the reporting quarter are given in Appendix B.

Major dust sources in the Fill Bank were dump truck traffic and hauling activities.

Table 4.1 presents the number of exceedances recorded in each month of the reporting quarter. The number of monitoring event included regular monitoring events and additional ones.

Table 4.1 Summary of Number of Exceedances for 1-hr and 24-hr TSP Monitoring

Monitoring Parameter	Level of Exceedance	January 2015	February 2015	March 2015
24-hr TSP	No of monitoring events	5	4	6
	Action Level	0	0	0
	Limit Level	0	0	0
1-hr TSP	No of monitoring events	17	13	16
	Action Level	0	0	0
	Limit Level	0	0	0

### 4.2 Noise

Since Lands Dept did not approve to carry out noise monitoring at their own area where the noise monitoring stations TM-N1 and TM-N2 located due to the security, noise monitoring carried out at two noise monitoring stations TM-RN1 and TM-RN2 (refer to the figure attached) from 18 December 2007.

No exceedance was recorded in this reporting quarter.

### 4.3 Marine Water Quality

In accordance with the Project Profile, impact marine water quality monitoring was conducted at two control monitoring stations (TM-FC1 and TM-FC2) and two impact monitoring stations (TM-FM1 and TM-FM2) in this quarter.

Impact marine water quality monitoring was conducted three days per week. Measurements were taken at both mid-ebb and mid-flood tides at three depths (i.e. 1m below surface, mid depth and 1m above seabed). The AL Levels are included in Appendix E.

According to the summary of marine water monitoring results, no exceedance of action and limit level was recorded in this quarter. Table 4.2 presents the total number of marine water quality exceedances in the reporting quarter. The trend of marine water quality in the past three months is depicted in Appendix D.

Table 4.2 Total Number of Marine Water Quality Exceedances in this quarter

Parameter	Exceedance Level	January 2015	February 2015	March 2015
Number of monitoring days		13	10	13
Dissolved Oxygen, DO (S&M)	Action	0	0	0
	Limit	0	0	0
Dissolved Oxygen, DO (B)	Action	0	0	0
	Limit	0	0	0
Turbidity	Action	0	0	0
	Limit	0	0	0
Suspended Solids, SS	Action	0	0	0
	Limit	0	0	0

A comparison between the quarterly mean/median of SS and the 1.3 times of the baseline mean was made for each tide at each station. The statistical analysis results are given in Appendix I. Monitoring stations with significant difference ( $p < 0.05$ ) is summarized in Table 4.3.

Table 4.3 Summary of Statistically Significant Results of SS

Monitoring Station		Significant difference?	
		Mid-flood	Mid-ebb
Designated Control Station	FC1	X	X
	FC2	X	X
Designated Monitoring Station	FM1	X	X
	FM2	X	X

## 5.0 INSPECTION RESULTS

### 5.1 Implementation Status of Environmental Mitigation Measures

ET conducted weekly site inspections to monitor the Contractor's implementation of environmental mitigation measures.

Air quality was the major environmental issue in the reporting quarter. The Contractor generally implemented most of the environmental mitigation measures in the reporting quarter. Dump truck traffic was the major dust source in the Fill Bank. Generally, the Contractor implemented adequate dust mitigation measures in the reporting quarter including dampening of haul roads, water spraying on the truckloads, during loading and unloading of material and for crushing plant, operation of automatic wheel washing facilities, dampening of fill material prior to handling or stockpiling, etc.

The major noise source was dump truck traffic in the Fill Bank. All site equipment and machinery were well maintained and no noise nuisance was observed during operating.

Drainage channels and wastewater treatment facilities were found maintained in good condition for merit function. The Contractor arranged site workers to clean up the silt and mud regularly.

Although there were a few observations regarding improper handling of oil drums and chemical containers, such as lack of drip tray and accumulated of stagnant water in the drip tray, the Contractor rectified most of these problems. Besides, the Contractor should provide tarpaulin sheets before repairing and maintenance works and also carry out proper cleaning activities immediately after such works.

Overall site area was found tidy and clean. The Contractor was reminded to collect and dispose of the general refuse and other C&D waste in a timely manner.

## 5.2 Status of Environmental Licensing and Permitting

The status of licences and permits is summarized in Table 5.1.

Table 5.1 Summary of environmental licensing and permit status

Description	Permit No.	Valid Period		Section
		From	To	
Environmental Permit	EP-210/2005/B	08/04/13	---	Issued
Marine Dumping Permit	EP/MD/15-177	01/01/15	31/03/15	Approval for dumping 3,000,000 tons (approximately equal to 1,666,667 cu.m. bulked quantity) of Public Fill (Reclamation Materials) from Tseung Kwan O Area 137 Fill Bank and Tuen Mun Area 38 Fill Bank to designated dumping area at Guanghaiwan of Taishan
Marine Dumping Permit	EP/MD/15-241	01/01/15	31/03/15	Approval for dumping 3,900,000 tons (approximately equal to 2,166,667 cu.m. bulked quantity) of Public Fill (Reclamation Materials) from Tseung Kwan O Area 137 Fill Bank and Tuen Mun Area 38 Fill Bank to designated dumping area at Guanghaiwan of Taishan
Chemical Waste Producer	5296-421-H3555-01	21/01/14	---	Spent battery containing heavy metals and spent lubricating oil
Effluent Discharge License	WT00018973-2014	23/05/14	31/05/19	Discharge of Industrial Trade Effluent arising from public fill reception facilities,
Billing Account for Waste Disposal	7018998	---	---	---

## 5.3 Advice on Solids and Liquid Waste Management Status

Table 5.2 summarizes data on offsite waste disposal in the quarter.

Table 5.2 Estimated Offsite Waste Disposal in the Reporting Quarter

Waste Type	January 2015	February 2015	March 2015
Public Fill (m <sup>3</sup> )	0	0	0
C&D Waste (general refuse) (kg)	0	1870 kg	0
Chemical Waste e.g. Waste oil (L) / Chemical Waste (kg)	0	0	0

## 6.0 NON-COMPLIANCE OF THE ENVIRONMENTAL QUALITY PERFORMANCE LIMITS

### 6.1 Summary of Non-compliance

According to the monitoring results, no action and limit level exceedance was recorded in this quarter.

## 6.2 Review of the Reasons for and the Implications of Non-compliance

Since no non-compliance was recorded in this quarter, no review was required.

## 6.3 Summary of Actions Taken

Since no exceedance was recorded in this quarter, no further action was required.

## 6.4 Summary of Environmental Complaint, Notification of Summon and Successful Prosecution Handling

No complaint, notification of summon and prosecution with respect to environmental issue was received in this quarter.

A summary of environmental complaints and prosecutions was given in Table 6.1.

Table 6.1 Summary of Environmental Complaints and Prosecutions

<i>Period</i>	<i>Complaints logged</i>	<i>Summon served</i>	<i>Successful Prosecution</i>
<i>January 2015</i>	<i>0</i>	<i>0</i>	<i>0</i>
<i>February 2015</i>	<i>0</i>	<i>0</i>	<i>0</i>
<i>March 2015</i>	<i>0</i>	<i>0</i>	<i>0</i>
<i>Cumulative</i>	<i>0</i>	<i>0</i>	<i>0</i>

## 7.0 COMMENTS, CONCLUSIONS AND RECOMMENDATION

Major activity in the Fill Bank was the import and dumping of fill materials in this quarter. Air quality was the major environmental issue in the Fill Bank. Generally, the Contractor implemented most of the mitigation measures to minimize the dust impact.

No exceedance of action and limit levels was recorded for 1-hr and 24-hr TSP monitoring in the reporting quarter.

According to the marine water monitoring results in this quarter, no exceedance of action and limit level was recorded.

The noise level measured at the monitoring station complied with the Limit Level of 65dB(A). No complaint was received regarding noise issue in this reporting month.

No complaint, notification of summon and prosecution with respect to environmental issue was received in this quarter.

According to the ET weekly site inspection and IEC site audits carried out in this quarter, it was indicated that site practices of the Contractor were generally undertaken in an environmentally acceptable manner and the overall site environmental performance was up to standard.

According to the environmental site inspections performed in the reporting quarter, the following recommendations were provided:

### **Air Quality**

- Ensure the frequency of water spraying on haul roads, unloading areas and stockpiles to be sufficient to suppress the dust sources;
- Provide proper maintenance for the powered mechanical equipment and barges to avoid emission of dark smoke;
- Provide water spraying onto the truckloads during inspection of fill material;
- Conduct road sweeping on all paved haul roads and public roads especially outside and near the site egress by the road sweeper. Undertake water spraying on stockpiling area by water bowser;
- Erect adequate speed limit signs to advise the truck drivers of the speed limit;
- Operate mist spraying systems and automatic water sprinklers in the Fill Bank;
- Implement the dust mitigation measures for the construction activities;
- Designate proper haul roads to ensure effective water spraying; and

- Ensure all vehicles to be washed before leaving the site egress by provision, operation and maintenance of automatic wheel washing facilities.

**Noise**

- Conduct noisy activities at a farther location from the NSRs.

**Water Quality**

- Maintain the drainage system, including the trapezoidal channels and permanent desilting chambers regularly; and
- Remove the stagnant water or provide approved pesticides for the stagnant water in the permanent desilting chambers, if any.

**Chemical and Waste Management**

- Remove waste materials from the site to avoid accumulation regularly;
- Handle and store chemical wastes properly;
- Remove unwanted material in the existing stockpiles and avoid further dumping of such material;
- Provide and maintain sufficient drip trays for diesel drums, chemical containers, chemical waste storage drums and diesel operated generator set;
- Maintain good housekeeping at the workshop area;
- Ensure sufficient tarpaulin sheets are provided to cover drip trays; and
- Avoid soil being polluted during oil filling and equipment maintenance; hence, properly remove and store the contaminated soil, if any.

**Landscape and Visual**

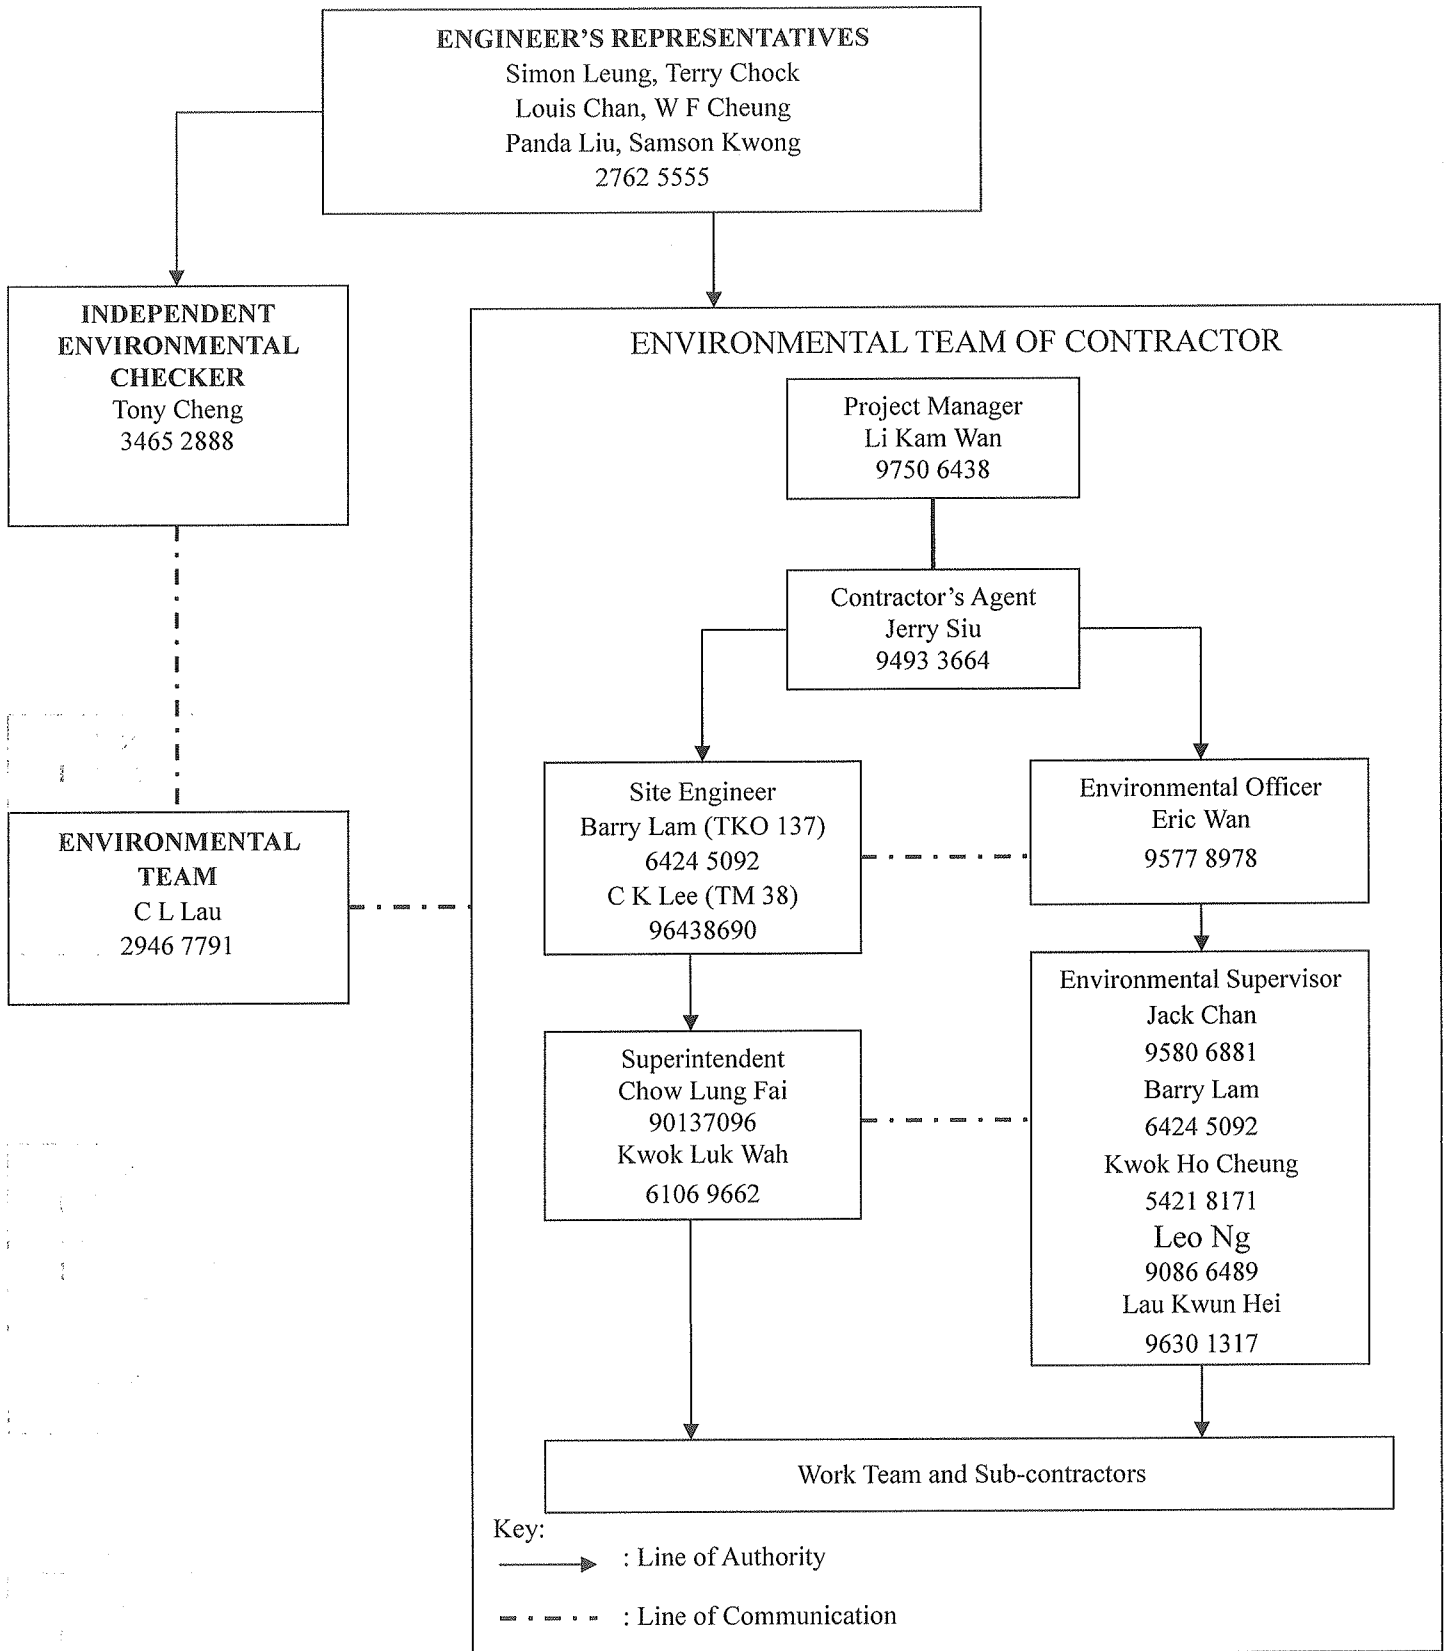

- Provide hydroseeding on the exposed slopes, on which the final profile has been formed;
- Erect all the site hoarding/chaining fences in accordance with agreed design at proper location; and
- Maintain the hydroseeding slopes in accordance with the Landscape Plan.

## **Appendix G**

### **Work Programme**

Master Programme of Contract No. CV/2013/06 - Handling of Surplus Public Fill

Site Location : Tuen Mun Area 38 Fill Bank

ID	Activity	Original Duration	Start	Finish
A1240	Take Over	0	23-Jan-14	
A1220	Operation	1100	23-Jan-14	26-Jan-17
A1250	Hand Over to CEDD	0		26-Jan-17
Stage B1 Surveillance System		120	28-Nov-13	27-May-14
A1190	Submission	30	28-Nov-13	27-Dec-13
A1200	Approval by Engineer	7	28-Dec-13	03-Jan-14
A1210	Installation	64	23-Jan-14	27-May-14
A1230	Hand Over to Engineer	0		27-May-14

## Appendix H

# Implementation Schedule of Environmental Mitigation Measures (EMIS)

### Environmental Mitigation Implementation Schedule

Environmental Protection Measures	Location	Implementation Status			
		Implemented	Partially implemented	Not implemented	Not Applicable
<b>Air Quality</b>					
▪ Dust control / mitigation measures shall be provided to prevent dust nuisance.	All areas	√			
▪ Water sprays shall be provided and used to dampen materials.	All areas	√			
▪ All stockpile of aggregate or spoil should be enclosed or covered and water applied in dry or windy condition.	All areas	√			
▪ Any vehicle with open load carrying area used for moving materials which has the potential to create dust shall have properly fitting side and tail boards. Material having the potential to create dust shall not be loaded to a level higher than the side and tail boards, and shall be covered by a clean tarpaulin.	All areas	√			
▪ Unpaved areas should be watered regularly to avoid dust generation.	Site Egress	√			
▪ The designated site main haul road shall be paved or regular watering.	All haul roads	√			
▪ The public road around the site entrance should be kept clean and free from dust.	All areas	√			
▪ Wheel washing facilities including high-pressure water jet shall be provided at the entrance of work site.	Site Egress	√			
▪ Every vehicle shall be washed to remove any dusty materials from its body and wheels before leaving the fill bank.	Site Egress	√			
▪ The temporary slope surfaces shall be covered with impermeable sheet or sprayed with water.	All areas	√			
▪ Vehicle and equipment should be switched off while not in use.	All areas	√			
▪ All plant and equipment should be well maintained e.g. without black smoke emission.	All areas	√			
▪ Open burning should be prohibited.	All areas	√			
<b>Noise Impact</b>					
▪ The approved method of working, equipment and sound-reducing measures (e.g. use of silenced type of equipment, etc.) shall be adapted.	All areas	√			
▪ Only well maintained plant should be operated on-site and plant should be serviced regularly during the site works.	All areas	√			
▪ Powered mechanical equipment (PME) should be covered or shielded by appropriate acoustic materials.	All areas	√			
▪ Air compressors and hand held breakers should have noise labels.	All areas	√			
▪ Machines and plants that may be in intermittent use should be shut down between work periods or should be throttled down to a minimum.	All areas	√			
▪ Noisy equipment and mobile plant shall always be site away from NSRs.	All areas	√			

Remark: √ = Implemented, ▽ = Partially Implemented, X = Not Implemented, N/A = Not Applicable

	Location	Implementation Status			
		Implemented	Partially implemented	Not implemented	Not Applicable
<b>Water Quality</b>					
• The existing / realigned intercepting channels and the sand / silt removal facilities shall be used and maintained.	All areas	√			
• Temporary intercepting drains should be used at the stockpiling area to divert polluted stormwater to the intercepting channels. Earth bunds and sand bay barriers shall be used to assist the diversion of polluted stormwater to the intercepting channels.	All areas	√			
• The stormwater intercepting system shall be effective to collect of runoff and remove suspended solids before discharge.	All areas	√			
• The material shall be properly covered to prevent washed away especially before rainstorm.	All areas	√			
• Unnecessary water retained in receptacles and standing water should be avoided to prevent mosquito breeding.	All areas		√		
• The temporary slope surfaces shall be covered with impermeable sheet or sprayed with water.	Temporary Slopes	√			
• Existing and newly constructed Catchpits, sand and silt removal facilities and intercepting channels shall be maintained, and the deposited silt and grit shall be removed weekly and on a need basis especially at the onset of and after each rainstorm to ensure that these facilities are functioning properly at all times.	All areas	√			
• A wheel washing bay shall be provided at the site exit and wash-water shall have sand and silt settled out or removed before being discharged into storm drains.	Wheel Washing facility	√			
• The section of construction road between wheel washing bay and the public road shall be paved with concrete, bituminous materials or hardcores to reduce vehicle tracking of soil and to prevent site run-off from entering public road drains.	Site Egress	√			
• Sewage from toilets shall be discharged in to a foul sewer, or chemical toilets shall be provided.	Site Office	√			
• The chemical toilets (if use) shall be provided by a licensed contractor, who will be responsible for disposal and maintenance of these facilities.	All areas	√			
• Tipping halls enclosed with top and 3-side to prevent spillage of material into marine water.	All areas	√			
• Adequate environmental control measures shall be provided to prevent / avoid dropping of fill material into the sea during the transfer.	Along the seafloor	√			
• A waste collection vessel shall be deployed to remove floating debris.	Along the seafloor	√			
<b>Landscape and Visual</b>					
• The maximum stockpiling height at the fill bank shall be limited to a maximum of +40mPD.	All areas	√			
• Surface of outer slopes of the Fill Bank shall preferably be hydroseeded.	Completed slopes	√			
• Stockpile of public fill shall be removed in a sequence to allow the outer hydrseeded to be removed later than other portions as far as practicable.	Completed slopes	√			
• Casuarina equisetifolia were planted as buffer tree along the northern perimeter of the Site. The height of Casuarina equisetifolia was maintained at least 3m above soil level.	Site boundary	√			
• Lighting shall be set to minimise night-time glare.	All areas	√			
<b>Waste Management</b>					
<b>Construction Waste Management</b>					
• Relevant licence / permits for disposal of construction waste or excavated materials available for inspection.	All areas	√			

Remark: √ = Implemented, ∇ = Partially Implemented, X = Not Implemented, N/A = Not Applicable

	Location	Implementation Status			
		Implemented	Partially implemented	Not implemented	Not Applicable
<ul style="list-style-type: none"> <li>Excavated material to be generated from construction works to be re-used on-site as far as practicable to reduce off-site disposal.</li> <li>Mud and debris should be removed from waterworks access roads and associated drainage systems.</li> <li>Segregation and storage of different types of waste in different containers, skips or stockpiles to enhance reuse or recycling of materials and their proper disposal.</li> <li>Prior to disposal of C&amp;D waste, recyclable materials should be salvaged for reuse (such as wood and metal) and inert waste utilised as public fill to minimise the quantity of waste to be disposed of to landfill.</li> <li>In order to monitor the disposal of C&amp;D material and solid wastes at public filling areas and landfills, and to control fly-tipping, a trip-ticket system should be included as one of the contractual requirements.                             <ul style="list-style-type: none"> <li>Any soil contaminated with chemicals/oils shall be removed from site and the void created shall be filled with suitable materials.</li> </ul> </li> </ul>	All areas	√			
	All areas	√			
	All areas	√			
	All areas	√			
	All areas	√			
	All areas	√			
<b>Chemical Waste Management</b>					
<ul style="list-style-type: none"> <li>It is required to register as a chemical waste producer if chemical wastes would be produced from the site activities. The Waste Disposal Ordinance (Cap 354) and its subsidiary regulations in particular the Waste Disposal (Chemical Waste) (General) Regulation should be observed and complied with for control of chemical wastes.</li> <li>After use, chemical wastes (e.g. cleaning fluids, solvents, lubrication oil and fuel) should be handled according to the Code of Practice on the Packaging, Labelling and Storage of Chemical Wastes.</li> <li>Spent chemicals should be stored and collected by an approved operator for disposal at the Chemical Waste Treatment Facility or other licensed facility in accordance with the Chemical Waste (General) Regulation.</li> <li>Chemical wastes should be separated for special handling and appropriate treatment at the Chemical Waste Treatment Facility.</li> <li>Chemical wastes including waste oil should be stored properly in designated areas, e.g. chemical waste storage area.</li> <li>The designated chemical waste storage area should only be used for storing chemical wastes.</li> </ul>	Waste Storage Area	√			
	Waste Storage Area	√			
	Waste Storage Area	√			
	Waste Storage Area	√			
	Waste Storage Area	√			
	Waste Storage Area	√			
	Waste Storage Area	√			
	Waste Storage Area	√			
	Waste Storage Area	√			
<b>The set-up of chemical waste storage area should</b>					
<ul style="list-style-type: none"> <li>Be suitable for the substance they are holding, resistant to corrosion, maintained in a good condition.</li> <li>Be enclosed on at least 3 sides and securely closed.</li> <li>Have an impermeable floor and bunding, of capacity to accommodate 110% of the volume of the largest container or 20% by volume of the chemical waste stored in that area, whichever is the greatest.</li> <li>Have adequate ventilation.</li> <li>Be covered to prevent rainfall entering (water collected within the bund must be tested and disposal as chemical waste if necessary).</li> <li>Be arranged so that incompatible materials are adequately separated.</li> <li>Warning panels should be displayed at the waste storage area.</li> </ul>	Waste Storage Area	√			
	Waste Storage Area	√			
	Waste Storage Area	√			
	Waste Storage Area	√			
	Waste Storage Area	√			
	Waste Storage Area	√			
	Waste Storage Area	√			
	Waste Storage Area	√			

Remark: √ = Implemented, ∇ = Partially Implemented, X = Not Implemented, N/A = Not Applicable

Environmental Protection Measures		Location	Implementation Status			
			Implemented	Partially implemented	Not implemented	Not Applicable
•	Waste storage area should be cleaned and maintained regularly.	Waste Storage Area	√			
•	Chemical waste should be transported by a registered chemical waste collector to a facility licensed to receive chemical waste.	All areas	√			
•	All generators, fuel and oil storage should be within bundle areas.	All areas		√		
•	Oil leakage from machinery, vehicle and plant should be prevented.	All areas	√			
•	In the event of chemical waste / dangerous goods / chemicals spillage or leakage, the procedures as outlined in the Spillage Response Plan should be followed.	All areas	√			
•	The dangerous goods / chemical spillage or leakage procedures (including equipments) should be in place.	All areas	√			
<b>Good Site Practices</b>						
2.2	Nomination of approved personnel, such as site manager, to be responsible for good site practices, arrangements for collection and effective disposal to an appropriate facility, of all wastes generated at the site.	All areas	√			
2.3	Training of site personnel in proper waste management and chemical handling procedures should be provided.	All areas	√			
2.4	Good site practices should be adopted to clean the rubbish and litter on a regular basis so as to prevent the rubbish and litter from dropping into the nearby environment.	All areas	√			
2.5	Proper storage and site practices to minimise the potential for damage or contamination of construction materials.	All areas	√			
2.6	The Environmental Permit should be displaced conspicuously on site.	Site Entrance	√			√
2.7	Construction noise permits should be posted at site entrance or available for site inspection.	Site Entrance				
2.8	Plan and stock construction materials carefully to minimise amount of waste generated and avoid unnecessary generation of waste.	All areas	√			
2.9	Chemical storage area provided with lock and located on sealed areas.	Chemical Storage Area	√			
2.10	All chemicals should be placed at the banded area with adequate band capacity (>110% of largest tank).	Chemical Storage Area	√			
2.11	Any unused chemicals or those with remaining functional capacity should be recycled.	All areas	√			
2.12	Regular cleaning and maintenance programme for waste storage area, drainage systems, silt traps, sumps and oil interceptors.	All areas	√			
•	To encourage collection of aluminium cans by individual collectors, separate labelled bins should be provided to segregate this waste from other general refuse generated by the workforce.	All areas	√			
•	A recording system for the amount of wastes generated, recycled and disposed (including the disposal sites) should be used, e.g. trip ticket system for chemical waste disposal. Quantities could be determined by weighing each load or other suitable methods.	All areas	√			
•	A collection area should be provided where waste can be stored and loaded prior to removal from site. An enclosed and covered area is preferred to reduce the occurrence of 'wind blown' light material. If an open area is unavoidable for the storage or loading/unloading of wastes, then the area should be bunded and all the polluted surface run-off collected within this area should be diverted into wastewater treatment system.	All areas	√			
•	Remove wastes in a timely manner.	All areas		√

(95% CI : 2.704 < Diff < 4.9048)

t-value of difference = 6.776 (12.4 degrees of freedom)  
P = 0.99999 (>0.05)

##### Conclusion:

There is no statistically significant difference between the groups.

## Statistical Analysis of the Trend of Suspended Solids

### For Mid-Ebb Tide

#### Station: TM-FM1

##### t-test

Group Name	N	Missing	Mean	Std Dev	SE
130% Baseline Mean	12	0	7.0008	1.6394	0.4733
Quarterly Mean	36	0	10.2363	0.9269	0.1545

##### Result:

Probability that two variances are equal (f-test) = 0.99505

Difference between means = 3.9296 (Std Dev = 1.8238 and SE = 0.4978)  
(95% CI : 2.9539 < Diff < 4.9053)

t-value of difference = 7.893 (12.9 degrees of freedom)  
P = 1 (>0.05)

##### Conclusion:

There is no statistically significant difference between the groups.

#### Station: TM-FM2

##### t-test:

Group Name	N	Missing	Mean	Std Dev	SE
130% Baseline Mean	12	0	7.2758	1.5293	0.4415
Quarterly Mean	36	0	10.300	0.9938	0.1656

##### Result:

Probability that two variances are equal (f-test) = 0.97395

Difference between means = 3.0242 (Std Dev = 1.7785 and SE = 0.4715)  
(95% CI : 2.1 < Diff < 3.9484)

t-value of difference = 6.414 (13.7 degrees of freedom)  
P = 0.99999 (>0.05)

##### Conclusion:

There is no statistically significant difference between the groups.

## Statistical Analysis of the Trend of Suspended Solids

### For Mid-Ebb Tide

#### Station: TM-FC1

##### t-test

Group Name	N	Missing	Mean	Std Dev	SE
130% Baseline Mean	12	0	7.6392	1.5074	0.4351
Quarterly Mean	36	0	10.4778	0.9163	0.1527

##### Result:

Probability that two variances are equal (f-test) = 0.98766

Difference between means = 2.8386 (Std Dev = 1.7138 and SE = 0.4612)  
(95% CI : 1.9347 < Diff < 3.7425)

t-value of difference = 6.155 (13.3 degrees of freedom)  
P = 0.99999 (>0.05)

##### Conclusion:

There is no statistically significant difference between the groups.

#### Station: TM-FC2

##### t-test

Group Name	N	Missing	Mean	Std Dev	SE
130% Baseline Mean	12	0	6.6950	1.9561	0.5647
Quarterly Mean	36	0	10.3444	0.9640	0.1607

##### Result:

Probability that two variances are equal (f-test) = 0.99935

Difference between means = 3.6494 (Std Dev = 2.1026 and SE = 0.5871)  
(95% CI : 2.4987 < Diff < 4.8001)

t-value of difference = 6.216 (12.3 degrees of freedom)  
P = 0.99999 (>0.05)

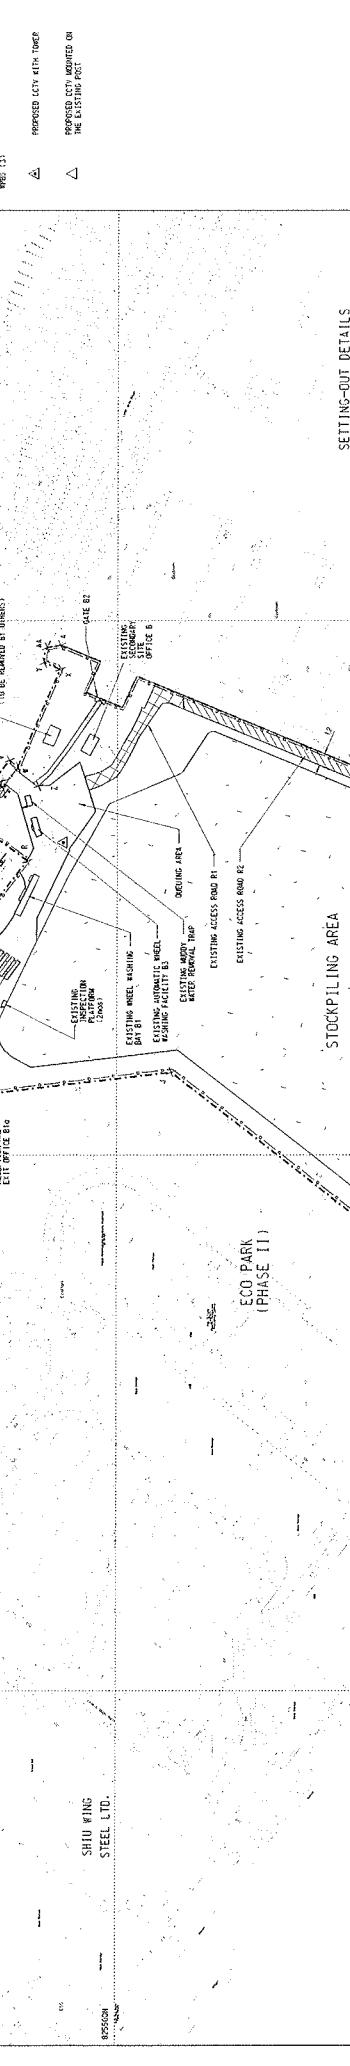

##### Conclusion:

There is no statistically significant difference between the groups.
