6 October 2014 By Post

Attn: Mr. Danny Tang

Dear Sir.

Agreement No. CE 8/2009(EP)
Harbour Area Treatment Scheme (HATS) Stage 2A
Independent Environmental Checker for Construction Phase – Investigation

Contract No. DC/2009/23

Upgrading of Preliminary Treatment Works at North Point, Wan Chai East and Central Submission of 14th Quarterly EM&A Report for May to July 2014 (Version 1.0)

We refer to the Quarterly EM&A Report for May to July 2014 (version 1.0) received on 6 October 2014 and we confirm that we have no further comment.

Yours faithfully

for MOTT MACDONALD HONG KONG LIMITED

EXECUTIVE SUMMARY

Introduction

- 1. This is the 14th Quarterly Environmental Monitoring and Audit (EM&A) Report prepared by Cinotech Consultants Limited for DSD Contract No. DC/2009/23 "HATS Stage 2A Upgrading of Preliminary Treatment Works at North Point, Wan Chai East and Central" (The Project) which documents the key information of EM&A and environmental monitoring works by Contract DC/2007/23 HATS Stage 2A with same Environmental Permit (Permit No. EP-322/2008/G).
- 2. The site activities undertaken for in the reporting quarter included:

May 2014:

Wan Chai East PTW:

- ELS work for pile cap;
- Construction of concrete plinth at the inlet pumping station (Civil);
- Pump Replacement Work at the inlet pumping station (E&M);
- Installation of Cable tray in Motor Hall of Inlet Pumping Station (E&M);
- Installation of steel cage and wall opening for sewage pump replacement at flow distribution chamber (Stage 2).

North Point PTW

- T & C of the new FSGT Building (E&M);
- Cable tray and cable laying (E&M);
- Cleaning of the DN1600 pipeline and carry out CCTV;
- Suspension of pump no. 1,2,3, for final connection;
- Enhancement work for Construction of RM 2 at the existing pumping station.

Central PTW

- Substructure construction for FSGT Building;
- Demolition of Existing Fine Screen Chamber, Grit Trap, Medium Screen Channels and Temporary Screening and Grit Handling Area;
- Modification of shoring system for Rising Main No.2;
- Electrical work of sewage pump replacement at inlet pumping station (Sewage pump No.3) (E&M);
- Pre-bore socket H-Pile;
- External wall finishing work.

June 2014:

Wan Chai East PTW:

- ELS work for pile cap;
- Construction of concrete plinth at the inlet pumping station (Civil);
- Pump Replacement Work at the inlet pumping station (E&M);
- Installation of Cable tray in Motor Hall of Inlet Pumping Station (E&M);
- Installation of steel cage and wall opening for sewage pump replacement at flow distribution chamber (Stage 2).

North Point PTW

- T & C of the new FSGT Building (E&M);
- Cable tray and cable laying (E&M);
- Cleaning of the DN1600 pipeline and carry out CCTV;
- Suspension of pump no. 1,2,3, for final connection;
- Enhancement work for Construction of RM 2 at the existing pumping station.

Central PTW

- Substructure construction for FSGT Building;
- Demolition of Existing Fine Screen Chamber, Grit Trap, Medium Screen Channels and Temporary Screening and Grit Handling Area;
- Modification of shoring system for Rising Main No.2;
- Electrical work of sewage pump replacement at inlet pumping station (Sewage pump No.3) (E&M);
- Pre-bore socket H-Pile;
- External wall finishing work.

July 2014:

Wan Chai East PTW:

- Construction of concrete plinth at the inlet pumping station (Civil);
- Pump Replacement Work at the inlet pumping station (E&M);
- Installation of Cable tray in Motor Hall of Inlet Pumping Station (E&M);
- Installation of steel cage and wall opening for sewage pump replacement at flow distribution chamber (Stage 2).

North Point PTW

- T & C of the new FSGT Building (E&M);
- Demolition of Existing Grit Handling Area;
- Suspension of pump no. 1,2,3, for final connection;
- Enhancement work for Construction of RM 2 at the existing pumping station (night works).

Central PTW

- Substructure construction for FSGT Building;
- Demolition of Existing Fine Screen Chamber, Grit Trap, Medium Screen Channels and Temporary Screening and Grit Handling Area;
- Modification of shoring system for Rising Main No.2;
- Electrical work of sewage pump replacement at inlet pumping station (Sewage pump No.3) (E&M);
- Pre-bore socket H-Pile;
- External wall finishing work.

Environmental Monitoring Works

- 3. The environmental monitoring works of the Project was conducted by the ET for the Contract: DC/2007/23 under HATS 2A with same Environmental Permit and in accordance with the EM&A Manual. The monitoring results were checked and reviewed. Site audits were conducted once per week. The implementation of the environmental mitigation measures, Event Action Plans and environmental complaint handling procedures were also checked.
- 4. Summary of the non-compliance of the reporting quarter is tabulated in **Table I**.

Table I Summary Table for Non-compliance Recorded in the Reporting Quarter

Monitoring	Donomoton	No. of Exceedance		No. of Exceedance Due to the Project		A stion Tolvon	
Station	Parameter	Action Level	Limit Level	Action Level	Limit Level	Action Taken	
AM1	1-hr TSP	0	0	0	0	N/A	
AIVII	24-hr TSP	0	0	0	0	N/A	
AM2	1-hr TSP	0	0	0	0	N/A	

Quarterly EM&A Report – May 2014 to July 2014

	24-hr TSP	0	0	0	0	N/A
AM3	1-hr TSP	0	0	0	0	N/A
AMS	24-hr TSP	0	0	0	0	N/A
AM4 2	1-hr TSP	0	0	0	0	N/A
AM4_2	24-hr TSP	0	0	0	0	N/A
NM1	Noise	0	1	0	0	N/A
NM2	Noise	0	5	0	0	N/A
NM3	Noise	0	0	0	0	N/A

Note: Since the site area where air monitoring station AM4 was located had to be returned to DSD for another Works Contract, AM4 was relocated to AM4_2 on 24 September 2012.

1-hour TSP Monitoring

5. All 1-hour TSP monitoring was conducted as scheduled in the reporting quarter. No Action/Limit Level exceedance was recorded.

24-hour TSP Monitoring

6. All 24-hour TSP monitoring was conducted as scheduled in the reporting quarter. No Action/Limit Level exceedance was recorded.

Construction Noise

7. All Construction Noise monitoring was conducted as scheduled in the reporting quarter. No Action Level exceedance was recorded, while six non-project related Limit Level exceedances were recorded during the restricted hour noise monitoring on 6th, 11th and 25th May 2014; 22nd June 2014; 2nd July 2014 by the ET of DC/2007/23 at NM2; and on 29th July 2014 by the ET of DC/2007/23 at NM1. No works were performed by contract DC/2009/23 during these periods of exceedance. Details of the exceedance could be referred to **Appendix B**.

Environmental Licenses and Permits

8. Licenses/Permits granted to the Project include the Environmental Permit (EP) and Registered as a Chemical Waste Producer for North Point, Wan Chai East and Central PTWs sites; water discharge licenses of North Point, Wan Chai East and Central PTWs. Moreover, two Construction Noise Permit (Permit no.: GW-RS0424-14 & GW-RS0643-14) were granted for construction works at North Point PTW and Wan Chai East PTW respectively during this reporting quarter.

Environmental Mitigation Implementation Schedule

9. According to the EIA Report Section 3.74, 4.56, 6.384, 9.154 and 13.44, air quality, noise, water quality, waste management and landscape and visual would be the key environmental issues and mitigation measures shall be implemented during the construction phase. Details of the implementation of mitigation measures are provided in the **Appendix G**.

Key Information in the Reporting Quarter

10. Summary of key information in the reporting quarter is tabulated in **Table II**.

Table II Summary Table for Key Information in the Reporting Quarter

Event	Even	t Details	Action Taken	Status	Remark	
Event	Number	Nature	Action Taken	Status	Kemark	
Complaint received	0		N/A	N/A		
Status of submissions under EP covering the reporting quarter	3	Monthly Environmental Monitoring and Audit Report for May 2014, June 2014 and July 2014	Submitted to EPD	No Comment		
Notifications of any summons & prosecutions received	0		N/A	N/A		

Summary of Complaints and Prosecutions

- 11. No environmentally related summons, prosecutions or complaints were received for the Project in the reporting quarter.
- 12. There were no environmentally related summons, prosecutions or complaints were received since the commencement of the Project. The Complaint Log is presented in **Appendix H.**

Future Key Issues:

13. Major site activities for the coming two months include:

Wan Chai East PTW:

- Construction of concrete plinth at the inlet pumping station (Civil);
- Pump Replacement Work at the inlet pumping station (E&M);
- Installation of Cable tray in Motor Hall of Inlet Pumping Station (E&M);
- Installation of steel cage and wall opening for sewage pump replacement at flow distribution chamber (Stage 2).

North Point PTW

- Demolition of Existing Grit Handling Area;
- Operation and maintain of the new FSGT Building;
- Enhancement work for Construction of RM 2 at the existing pumping station (night works).

Central PTW

- Substructure construction for FSGT Building;
- Electrical work of sewage pump replacement at inlet pumping station (Sewage pump No.3) (E&M);
- Pre-bore socket H-Pile; External wall finishing work.
- 14. The environmental concerns in coming months are mainly surface runoff and waste water control in the wet season. Other concerns including noise generated from construction works; dust emission due to strong wind erosion and vehicle movements, and inappropriate storage of construction equipment within the tree protective zones.

1. INTRODUCTION

Background

- 1.1 The Project 'HATS Stage 2A Upgrading of Preliminary Treatment Works at North Point, Wan Chai East and Central with Contract No: DC/2009/23' mainly comprises the following major works:
 - Decommissioning, demolition and removal of existing structures and buildings, including the associated E&M works:
 - Relocation of sewers, control room, workshop equipment and the associated E&M works;
 and
 - Construction of new buildings and structures.
- 1.2 The general location plan of the Project is shown in **Figure 1**.
- 1.3 The Project is under Harbour Area Treatment Scheme (HATS) Stage 2A and is a designated project (Register No. : AEIAR-121/2008). The environmental permit: (Permit No. EP-322/2008/G) which was issued on 9th May 2014 to the Drainage Services Department (hereinafter called the DSD) as the Permit Holder.
- 1.4 Leader and JEC Joint Venture (hereafter called the LJJV) was commissioned by the DSD to undertake the construction of the Contract No. DC/2009/23 "Upgrading of Preliminary Treatment Works at North Point, Wan Chai East and Central". The date of commencement of construction of the Project is 14th February 2011.
- 1.5 Cinotech Consultants Limited was commissioned by LJJV to undertake the Environmental Monitoring and Audit (EM&A) works for the project and was appointed as the Environmental Team (ET) of the Project under Condition 2.1 of the EP.
- 1.6 This is the 14th quarterly EM&A report summarizing the EM&A works conducted for the Project from May 2014 to July 2014.

Project Organizations

1.7 The contacts of the Project are shown in **Table 1.1** and the organization chart of ET for Contract is shown in **Figure 2**.

Table 1.1 Key Project Contacts

Construction Programme

1.8 The site activities undertaken in the reporting quarter included:

May 2014:

Wan Chai East PTW:

- ELS work for pile cap;
- Construction of concrete plinth at the inlet pumping station (Civil);
- Pump Replacement Work at the inlet pumping station (E&M);
- Installation of Cable tray in Motor Hall of Inlet Pumping Station (E&M);
- Installation of steel cage and wall opening for sewage pump replacement at flow distribution chamber (Stage 2).

North Point PTW

- T & C of the new FSGT Building (E&M);
- Cable tray and cable laying (E&M);
- Cleaning of the DN1600 pipeline and carry out CCTV;
- Suspension of pump no. 1,2,3, for final connection;
- Enhancement work for Construction of RM 2 at the existing pumping station.

Central PTW

- Substructure construction for FSGT Building;
- Demolition of Existing Fine Screen Chamber, Grit Trap, Medium Screen Channels and Temporary Screening and Grit Handling Area;
- Modification of shoring system for Rising Main No.2;
- Electrical work of sewage pump replacement at inlet pumping station (Sewage pump No.3) (E&M);
- Pre-bore socket H-Pile;
- External wall finishing work.

June 2014:

Wan Chai East PTW:

- ELS work for pile cap;
- Construction of concrete plinth at the inlet pumping station (Civil);
- Pump Replacement Work at the inlet pumping station (E&M);
- Installation of Cable tray in Motor Hall of Inlet Pumping Station (E&M);
- Installation of steel cage and wall opening for sewage pump replacement at flow distribution chamber (Stage 2).

North Point PTW

- T & C of the new FSGT Building (E&M);
- Cable tray and cable laying (E&M);
- Cleaning of the DN1600 pipeline and carry out CCTV;
- Suspension of pump no. 1,2,3, for final connection;
- Enhancement work for Construction of RM 2 at the existing pumping station.

Central PTW

- Substructure construction for FSGT Building;
- Demolition of Existing Fine Screen Chamber, Grit Trap, Medium Screen Channels and Temporary Screening and Grit Handling Area;
- Modification of shoring system for Rising Main No.2;
- Electrical work of sewage pump replacement at inlet pumping station (Sewage pump No.3) (E&M);
- Pre-bore socket H-Pile;
- External wall finishing work.

July 2014:

Wan Chai East PTW:

- Construction of concrete plinth at the inlet pumping station (Civil);
- Pump Replacement Work at the inlet pumping station (E&M);
- Installation of Cable tray in Motor Hall of Inlet Pumping Station (E&M);
- Installation of steel cage and wall opening for sewage pump replacement at flow distribution chamber (Stage 2).

North Point PTW

- T & C of the new FSGT Building (E&M);
- Demolition of Existing Grit Handling Area;
- Suspension of pump no. 1,2,3, for final connection;
- Enhancement work for Construction of RM 2 at the existing pumping station (night works).

Central PTW

- Substructure construction for FSGT Building;
- Demolition of Existing Fine Screen Chamber, Grit Trap, Medium Screen Channels and Temporary Screening and Grit Handling Area;
- Modification of shoring system for Rising Main No.2;
- Electrical work of sewage pump replacement at inlet pumping station (Sewage pump No.3) (E&M);
- Pre-bore socket H-Pile;
- External wall finishing work.

Summary of EM&A Requirements

- 1.9 The EM&A programme requires construction phase monitoring for air quality and construction noise, landscape and visual and environmental site audit. The EM&A requirements for each parameter are described in the following sections, including:
 - All monitoring parameters;
 - Action and Limit levels for all environmental parameters;
 - Event Action Plans;
 - Environmental mitigation measures, as recommended in the project EIA study final report;
 - Environmental requirements in contract documents.
- 1.10 The advice on the implementation status of environmental protection and pollution control/mitigation measures is summarized in **Section 4** of this report.
- 1.11 This report presents the monitoring results, observations, locations, equipment, period, for required monitoring parameter namely dust, noise levels, and audit works conducted for the Project from May 2014 to July 2014. For the methodology and QA/QC procedures of the

monitoring parameters, please refer to the monthly reports for the Contract DC/2007/23.

2. AIR QUALITY

Monitoring Requirements

2.1 1-hour and 24-hour TSP monitoring were conducted to monitor the air quality. **Appendix A** shows the established Action/Limit Levels for the environmental monitoring works.

Monitoring Locations

2.2 Four designated monitoring stations, AM1, AM2, AM3 and AM4 were selected for impact dust monitoring for the Project. **Table 2.1** describes the air quality monitoring locations, which are also depicted in **Figure 1**.

Table 2.1 Locations for Air Quality Monitoring

Monitoring Station	Monitored by	Location of Measurement
AM1	DC/2007/23	Chan's Creative School
AM2		Hong Kong & Islands Regional Office, WSD
AM3		Wan Chai East PTW
AM4_2		A Location next to Sheung Wan Fire Station

Note: Since the site area where air monitoring station AM4 was located had to be returned to DSD for another Works Contract, AM4 was relocated to AM4_2 on 24 September 2012.

Monitoring Equipment

2.3 **Table 2.2** summarizes the equipment used in the impact air monitoring programme in the reporting quarter. Copies of calibration certificates can be found in the relevant monthly reports.

Table 2.2 Air Quality Monitoring Equipment

Monitoring Station	Model a	nd Make	
Within ing Station	HVS Sampler	Calibrator	
AM1			
AM2 AM3	GMWS-2310 ACCU-VOL	CM-AIR-43	
	GWWS-2310 ACCU-VOL		
AM4_2			

Note: Since the site area where air monitoring station AM4 was located had to be returned to DSD for another Works Contract, AM4 was relocated to AM4_2 on 24 September 2012.

Monitoring Parameters, Frequency and Duration

2.4 **Table 2.3** summarizes the monitoring parameters and frequencies of impact dust monitoring for the whole construction period.

 Table 2.3
 Impact Dust Monitoring Parameters, Frequency and Duration

Monitoring Station	Parameter	Period	Frequency
All monitoring	1-hour TSP	0700-1900 hrs	3 times/ every 6 days
locations	24-hour TSP	0000-2400 hrs	once in every 6 days

Monitoring Methodology and QA/QC Procedure

2.5 The monitoring methodology and QA/QC procedures are presented in the relevant monthly report for Contract DC/2007/23.

Results and Observations

2.6 **Table 2.4** summarizes the monitoring results at AM1, AM2, AM3 and AM4_2 in reporting quarter.

Table 2.4 Summary of 1-hour and 24-hour TSP Monitoring Result in Reporting Quarter

Reporting Month	Air Quality Monitoring Station	Average µg/m³	Range µg/m³	Action Level µg/m³	Limit Level µg/m³
		1 hour	TSP		
	AM1	103	82 - 127	340	
May 2014	AM2	105	72 - 128	352	
May 2014	AM3	97	65 – 115	355	
	AM4_2	116	78 - 160	393	
	AM1	117	98 - 152	340	
June 2014	AM2	118	98 - 141	352	500
June 2014	AM3	119	93 – 155	355	300
	AM4_2	139	111 - 179	393	
	AM1	114	74 - 172	340	
July 2014	AM2	116	83 - 157	352	
July 2014	AM3	110	83 - 155	355	
	AM4_2	164	114 - 196	393	
		24 hours	s TSP		
	AM1	70	59 - 87	185	
May 2014	AM2	69	63 - 82	182	
May 2014	AM3	63	53 - 82	181	
	AM4_2	79	67 - 95	211	
	AM1	82	75 - 96	185	
June 2014	AM2	78	73 - 82	182	260
June 2014	AM3	79	76 - 84	181	200
	AM4_2	85	70 - 98	211	
	AM1	62	50 - 74	185	
July 2014	AM2	75	57 - 93	182	
July 2014	AM3	76	69 - 82	181	
	AM4_2	91	79 - 102	211	

- 2.7 All 1-hour TSP monitoring was conducted as scheduled in the reporting quarter. No Action/Limit Level exceedance was recorded. Summary of exceedance is presented in **Appendix B.**
- 2.8 All 24-hour TSP monitoring was conducted as scheduled in the reporting quarter. No Action/Limit Level exceedance was recorded. Summary of exceedance is presented in **Appendix B.**
- 2.9 Graphical presentation of Air Quality Monitoring in the reporting quarter is shown in **Appendix C**.
- 2.10 According to field observations during site inspection, the identified dust sources at the monitoring stations were mainly from loading of material, vehicles movement and construction works in site.

3 NOISE

Monitoring Requirements

3.1 Three noise monitoring stations, namely NM1, NM2 and NM3 were designated in the EM&A Manual for impact monitoring. **Appendix A** shows the established Action and Limit Levels for the environmental monitoring works.

Monitoring Locations

3.2 Noise monitoring was conducted at three designated monitoring stations as listed in **Table** 3.1

Table 3.1 Location of Noise Monitoring Stations

Monitoring Station	Monitored By	Location of Measurement
NM1		Chan's Creative School
NM2	DC/2007/23	Hyde Building
NM3		Goldfield Building

Monitoring Equipment

3.3 **Table 3.2** summarizes the noise monitoring equipments used in the reporting quarter. Copies of calibration certificates can be found in the relevant monthly reports.

Table 3.2 Noise Monitoring Equipment

Monitoring Station	Model and Make			
Within ing Station	Sound Level Meter	Calibrator		
NM1				
NM2	Rion NL-31	Rion NC-73		
NM3				

Monitoring Parameters, Frequency and Duration

3.4 Table 3.3 summarizes the monitoring parameters, frequency and total duration of monitoring.

 Table 3.3
 Noise Monitoring Parameters, Frequency and Duration

Monitoring Stations	Parameter	Period	Frequency
	$\begin{array}{c} L_{eq}(30 \text{ min.}) \\ dB(A) \end{array}$	0700-1900 hrs. on weekdays	
NM1	$\begin{array}{c} L_{eq}(5 \text{ min.}) \\ dB(A) \end{array}$	Restricted hours (1900-2300 on all days and 0700-2300 on general holidays and Sundays)	Once per week
NM2 NM3	$\begin{array}{c} L_{eq}(30 \text{ min.}) \\ dB(A) \end{array}$	0700-1900 hrs. on weekdays	

Monitoring Methodology and QA/QC Procedures

3.5 The monitoring methodology and QA/QC procedure could be referring to the monthly reports for Contract DC/2007/23.

Results and Observations

3.6 **Table 3.4** summarizes the monitoring results at NM1, NM2 and NM3 in reporting quarter.

Table 3.4 Summary the Noise Monitoring Results in Reporting Quarter

	For the time period 0700-1900 hrs. on weekdays				
	Monitoring Station	Range, dB(A)	Limit Level ,dB(A)		
		$L_{eq}(30 \text{ min.})$	L _{eq} (30 min.)		
	NM1	68 - 70	70.0 *		
May 2014	NM2	73 - 74	75.0		
	NM3	75 - 75	75.0		
	NM1	69 - 70	70.0 *		
June 2014	NM2	73 - 73	75.0		
	NM3	75 - 75	73.0		
July 2014	NM1	68 - 69	70.0 *		
	NM2	73 - 74	75.0		
	NM3	75 - 75	73.0		

^{* 70} dB(A) was adopted as the Limit Level during school normal teaching period in the reporting period.

3.7 **Table 3.5** summarizes the restricted hours noise monitoring results at NM1 and NM2 in reporting Quarter.

Table 3.5 Summary of Restricted Hours Noise Monitoring Results in Reporting Quarter

Restricted hours (1900-2300 on all days and 0700-2300 on general holidays and Sundays)					
	Monitoring Station	Range, dB(A) L _{eq} (30 min.)	Limit Level ,dB(A) L _{eq} (5 min.)		
May 2014	NM1 NM2	67 - 69 69 - 71	70.0 *		
June 2014	NM1	67 - 69	70.0 *		
June 2014	NM2 NM1	69 - 71 68 - 71	70.0		
July 2014	NM2	69 - 71	70.0 *		

Note: No class was held at the school during all the measurement period

- 3.8 The construction noise monitoring at the designated locations was conducted by the ET of Contract: DC/2007/23 as scheduled in the reporting quarter. The monitoring results could be referring to Annex C6, D6 and E6 of the monthly reports for Contract DC/2007/23.
- 3.9 Piling works were conducted during day time at North Point PTW. No construction work

^{* 70}dB (A) was adopted as the Limit Level during restricted hours in the reporting period.

was conducted during the restricted hours under the Project in the reporting quarter.

- 3.10 No Action Level exceedance was recorded, while six non-project related Limit Level exceedances were recorded during the restricted hour noise monitoring on 6th, 11th and 25^h May 2014; 22nd June 2014; 2nd July 2014 by the ET of DC/2007/23 at NM2; and on 29th July 2014 by the ET of DC/2007/23 at NM1. No works were performed by contract DC/2009/23 during these periods of exceedance. Details of the exceedance could be referred to **Appendix B.**
- 3.11 Graphical presentation of Noise monitoring in the reporting quarter is shown in **Appendix D**.
- 3.12 The major noise sources identified at the designated noise monitoring stations were traffic noise and construction activities.

4 ENVIRONMENTAL AUDIT

Site Audits

- 4.1 Site audits were carried out on a weekly basis to monitor the timely implementation of proper environmental management practices and mitigation measures in the Project site.
- 4.2 14 Environmental site audits were conducted by ET and 3 IEC audits were conducted in the reporting quarter for the project. No non-compliance was observed during the site audits.
- 4.3 Site inspections were undertaken to ensure and check that the implementation and maintenance of landscape and visual mitigation measures are being properly carried out in the reporting quarter in accordance to section 14.1 of the EM&A Manual. No non-compliance was observed during the site inspections.

Review of Environmental Monitoring Procedures

4.4 The monitoring works conducted by the monitoring team of Contract DC/2007/23. The monitoring procedures were reviewed by its ET.

Status of Environmental Licensing and Permitting

4.5 All permits/licenses obtained for the Contract DC/2009/23 are summarized in **Table 4.1**. **Table 4.1** Summary of Environmental Licensing and Permit Status for Contract DC/2009/23

Status of Waste Management

4.6 The amount of wastes generated by the activities of the Project in the reporting quarter is shown in **Table 4.2.**

Table 4.2: Summary of Waste Generated in Reporting Quarter

Reporting	Inert C&D ¹	Other C&D ²	Chemical Waste
Month	Materials ('000 m ³)	Waste ('000 m ³)	('000kg)
May 2014	0.196	15.603	0.40
June 2014	0.087	0.198	0.23
July 2014	0.433	12.883	0

- 1: Inert C&D Materials includes Broken Concrete, Inert C&D waste reused in the Contract/other Project and disposal at Public Fill.
- 2: Other C&D Waste includes Metals, Paper/Cardboard packaging, plastics and other General Refuse.
- 4.7 The waste flow table in the reporting quarter was shown in **Appendix E.**

Implementation Status of Environmental Mitigation Measures

- 4.8 Details of the implementation of mitigation measures are provided in the **Appendix G.**
- 4.9 During the weekly environmental site inspections in the reporting period, no non-conformance was identified. The observations in the site audits for the Projects are summarized in **Table 4.3.**

Table 4.3 Observations of Site Audit

Parameters	Date/Ref. Number	Observations	Follow Up Action
	140509- O01	The water quality of sediment tank at North Point-PTW should be fulfilled the requirement of the WPCO's wastewater discharge license before discharging out. The Contractor was reminded to ensure the pH meter is non-malfunctioned and provide the maintenance of the sediment tank.	The maintenance of the sediment tank was provided and the water quality of sediment tank at North Point-PTW was fulfilled the requirement of the WPCO's wastewater discharge license.
	140509- R02	Reminder: Properly clear the stagnant water in the wheel washing facility regularly at Central-PTW.	The stagnant water in the wheel washing facility was cleared at Central-PTW.
Water Quality	140516- R02	Reminder: Properly clear the stagnant water in the drip tray at Central-PTW.	The stagnant water in the drip tray was cleared at Central-PTW.
	140606- R03	Reminder: Properly clear the stagnant water in the drip tray of the chemical waste storage facility at Central-PTW.	The stagnant water in the drip tray of the chemical waste storage facility was cleared at Central-PTW.
	140613- R06	Reminder: Properly clear the stagnant water at Central-PTW.	The stagnant water was cleared properly at Central-PTW.
	140620- R01	Reminder: Properly clear the stagnant water at North Point-PTW and Wan Chai-PTW.	Please refer to 140627-R04.
	140627- R04	Reminder: Properly clear the stagnant water at Wan Chai-PTW and Central-PTW.	The stagnant water was cleared at Wan Chai-PTW and Central-PTW.

	140627- R06	Reminder: The maintenance of the sediment tank should be provided regularly at North Point-PTW and Wan Chai-PTW.	The maintenance of the sediment tank was provided at North Point-PTW and Wan Chai-PTW.
	140711- R03	Reminder: Properly clear the stagnant water at Wan Chai-PTW and Central-PTW.	The stagnant water was cleared properly at Wan Chai-PTW and Central-PTW.
	140711- R05	Reminder: The bunding should be provided to prevent the muddy water overflowing to the access road at Central-PTW.	The bunding was provided to prevent the muddy water overflowing to the access road at Central-PTW.
	140718- R02	Reminder: Properly clear the oil stained water at Wan Chai-PTW.	The oil stained water was cleared at Wan Chai-PTW.
	140725- O01	The surface runoff and water from the site should be bypassed to the wastewater treatment facility for treatment so that the effluent fulfils the requirement of WPCO's wastewater discharge license before discharge at Central-PTW.	Please refer to 140729-O01.
	140725- R04	Reminder: Properly clear the stagnant water at Wan Chai-PTW.	The stagnant water was cleared at Wan Chai- PTW.
	140729- O01	The surface runoff and water from the site should be bypassed to the wastewater treatment facility for treatment so that the effluent fulfils the requirement of WPCO's wastewater discharge license before discharge at Central-PTW.	The surface runoff and water from the site was bypassed to the wastewater treatment facility for treatment before discharge at Central-PTW.
	140530- R03	Reminder: The bags of cement should be covered entirely at Central-PTW.	The bags of cement were covered entirely at Central-PTW.
	140606- R02	Reminder: The dusty material should be cleared properly or covered with the impervious material to prevent the dust generation at North Point-PTW.	The dusty material was cleared at North Point-PTW.
	140613- R02	Reminder: Properly clear the debris at Wan Chai-PTW.	Please refer to 140620-R02.
Air	140620- R02	Reminder: Properly clear the debris at Wan Chai-PTW.	Please refer to 140627-R03.
Quality	140627- R03	Reminder: The dusty materials and debris should be cleared or covered by impervious materials at North Point-PTW and Wan Chai-PTW.	The dusty materials and debris were cleared and covered by impervious materials at North Point-PTW and Wan Chai-PTW.
	140711- R02	Reminder: The dusty materials should be cleared properly or covered by impervious material at Wan Chai-PTW.	The dusty materials were cleared properly at Wan Chai-PTW.
	140725- R05	Reminder: The dusty materials should be cleared properly or covered by impervious materials to prevent the dust generation at Wan Chai-PTW and Central-PTW.	The dusty materials were sprayed water at Wan Chai-PTW and cleared properly at Central-PTW.

	140729- O03	The odour intensity was detected during the site inspection at North Point-PTW. The Contractor was reminded to provide the appropriate measure to control the odour emission.	The follow up action will be reported during site inspections in August 2014.				
	140502- O01	Oil stain should be cleared form the surface; the excavator should be checked to prevent oil leakage (WCE-PTW).	The temporary chemical container was provided to collect the leaked oil to prevent the oil stain forming on the paved area at Wan Chai-PTW.				
	140502- O02	Chemical containers should be provided with drip tray (Central-PTW).	The chemical containers were not observed at Central-PTW.				
	140502- O03	Drip tray should be properly sealed at the side to prevent oil leakage (Central-PTW).	The drip tray was sealed properly, the oil leakage and oil stain were not observed at Central-PTW.				
	140516- O01	The oil leakage was observed from the equipments at Central-PTW. The Contractor was reminded to keep them in a good condition.	The oil leakage was not observed from one of the equipments at Central-PTW and the other equipment was removed.				
	140530- O02	The oil leakage was observed from the excavator at Central-PTW. The Contractor was reminded to keep it in a good condition.	Please refer to 140606-001.				
	140530- R04	Reminder: The chemical containers should be provided with labels and the drip tray at Central-PTW.	The chemical containers were cleared and not observed at Central-PTW.				
	140606- O01	The oil leakage was observed from the excavators at Central-PTW. The Contractor was reminded to keep them in a good condition.	Please refer to 140613-O01.				
Waste/ Chemical Management	140613- O01	The oil leakage was observed from the excavators at Central-PTW. The Contractor was reminded to keep them in a good condition.	The oil leakage was not observed from the excavators at Central-PTW.				
	140613- R03	Reminder: The chemical containers should be provided with the drip tray at Central-PTW.	The chemical containers were provided w the drip tray at Central-PTW.				
	140613- R04	Reminder: Properly clear the oil stained earth at Central-PTW and the oil stain at Wan Chai-PTW.	The oil stained earth at Central-PTW and the oil stain at Wan Chai-PTW were cleared properly.				
	140613- R05	Reminder: The drip tray should be kept in a good condition at Central-PTW.	The drip tray was kept in a good condition Central-PTW.				
	140620- R03	Reminder: Properly clear the oil stain at Wan Chai-PTW.	The oil stain was cleared at Wan Chai-PTW.				
	140627- O01	The oil leakage was observed from the excavator at Central-PTW. The Contractor was reminded to keep it in a good condition.	The oil leakage was not observed from the excavator at Central-PTW.				
	140627- R02	Reminder: The chemical containers should be provided with the drip tray or cleared properly at Wan Chai-PTW and Central-PTW; and the drip tray should be provided with adequate capacity at Wan Chai-PTW.	Please refer to 140704-R01.				
	140627- R07	Reminder: Properly sort out the construction waste at Wan Chai-PTW.	The skip was labelled for preparing to sort out the construction waste at Wan Chai-PTW.				

	140704- R01	Reminder: The chemical containers should be provided with the drip tray at Central-PTW.	Some of chemical containers were provid with the drip tray and some of chemical containers were cleared properly at Centra PTW.		
	140711- R01	Reminder: The chemical containers should be provided with the drip tray at Central-PTW and the drip tray should be kept in a good condition at North Point-PTW.	The chemical containers were not observed at Central-PTW and the drip tray was kept in a good condition at North Point-PTW.		
	140711- R04	Reminder: The Contractor was reminded to provide adequate container/ skip for construction waste collection at Central-PTW.	The construction waste was cleared and not observed at Central-PTW.		
	140718- R01	Reminder: The chemical containers should be provided with the drip tray at North Point-PTW.	The chemical containers were not observed Central-PTW and the drip tray was kept in good condition at North Point-PTW.		
	140718- R02	Reminder: Properly clear the oil stained water at Wan Chai-PTW.	The oil stained water was cleared at Wan Chai-PTW.		
	140725- O02	The oil leakage from the breaker tip and the air compressors were observed at Central-PTW. The Contractor was reminded to keep them in a good condition and clear the oil stained earth properly.	Please refer to 140729-O02.		
	140729- O02	The oil leakage from the breaker tip and the air compressors were observed at Central-PTW. The Contractor was reminded to keep them in a good condition and clear the oil stained earth properly.	The follow up action will be reported during site inspections in August 2014.		
Noise	140725- O03	The doors of the air compressors should be closed to meet the designed noise emission level at Central-PTW.	The doors of the air compressors were closed to meet the designed noise emission level at Central-PTW.		
	140620- R04	Reminder: Properly place the construction material far away the tree protection area at Wan Chai-PTW.	The construction material was placed outside the fence of the tree protection area at Wan Chai-PTW.		
Landscape	140627- R05	Reminder: Properly clear and place the construction materials far away from the tree protection area at Central-PTW.	Please refer to 140704-R02.		
and Visual	140704- R02	Reminder: Properly clear and place the construction materials far away from the tree protection area at Central-PTW.	Please refer to 140711-R06.		
	140711- R06	Reminder: Properly clear and place the construction materials far away from the tree protection area at Central-PTW.	The construction materials were moved from the tree protection area at Central-PTW.		
Permit/	140523- R01	Reminder: The Environmental Permit should be updated and placed at the site entrance of all PTWs.	Please refer to 140530-O01.		
Licenses	140530- O01	The Environmental Permit should be updated in the full version and placed at the site entrance of all PTWs.	The updated Environmental Permit in the full version was placed at the site entrance of all PTWs.		

140725- R06	Reminder: The Environmental Permit should be displaced at the back site entrance of Central-PTW.	The Environmental Permit was displaced at the back site entrance of Central-PTW.
----------------	--	--

Implementation Status of Event Action Plans

4.10 The Event Action Plans for air quality and noise are presented in **Appendix F.**

1-hr TSP

4.11 No Action/Limit Level exceedance was recorded.

24-hr TSP

4.12 No Action/Limit Level exceedance was recorded.

Construction Noise

4.13 No Action Level exceedance was recorded, while six non-project related Limit Level exceedances were recorded during the restricted hour noise monitoring on 6th, 11th and 25^h May 2014; 22nd June 2014; 2nd July 2014 by the ET of DC/2007/23 at NM2; and on 29th July 2014 by the ET of DC/2007/23 at NM1. No works were performed by contract DC/2009/23 during these periods of exceedance. Details of the exceedance could be referred to **Appendix B**.

Landscape and Visual

4.14 No non-compliance was recorded.

Summary of Complaints and Prosecutions

- 4.15 No environmentally related summons, prosecutions or complaints were received for the Project in the reporting quarter.
- 4.16 There were no environmentally related summons, prosecutions or complaints were received since the commencement of the Project. The Complaint Log is presented in **Appendix H.**

5. FUTURE KEY ISSUES

Key Issues for the Coming Months

- 5.1 Key environmental issues in the coming months include:
 - Generation of dust from stockpiles of excavated and dusty materials, unpaved site area and vehicle movement, roadworks, excavation works and loading and unloading dusty materials on-site;
 - Noise from operation of equipment and machinery on-site;
 - Provision well maintenance on the storage facilities of chemicals/fuel and chemical waste/waste oil on-site;
 - Ponding water generated in pre-drillings;
 - Drainage system should be well designed and maintained to prevent flooding and silty water getting into the public area during and after rainstorm;
 - Silty surface runoff generated from the site area; and
 - Silt and dust getting into the public area by the leaving site vehicles at the site exits without adequate wheel washing facilities.

Construction Program for the Coming Months

5.2 The tentative construction program is provided in **Appendix I.**

6. CONCLUSIONS AND RECOMMENDATIONS

Conclusions

6.1 Environmental monitoring and audit works were performed in the reporting quarter and all monitoring results were checked and reviewed.

1-hour TSP Monitoring

6.2 All 1-hour TSP monitoring was conducted as scheduled in the reporting quarter. No Action/Limit Level exceedance was recorded.

24-hour TSP Monitoring

6.3 All 24-hour TSP monitoring was conducted as scheduled in the reporting quarter. No Action/Limit Level exceedance was recorded.

Construction Noise Monitoring

All construction noise monitoring was conducted as scheduled in the reporting month. No Action Level exceedance was recorded, while six non-project related Limit Level exceedances were recorded during the restricted hour noise monitoring on 6th, 11th and 25th May 2014; 22nd June 2014; 2nd July 2014 by the ET of DC/2007/23 at NM2; and on 29th July 2014 by the ET of DC/2007/23 at NM1. No works were performed by contract DC/2009/23 during these periods of exceedance. Details of the exceedance could be referred to **Appendix B**.

Environmental Audit

6.5 Environmental site audits were conducted as weekly basis in the reporting quarter. No non-compliance was recorded.

Complaint and Prosecution

6.6 No environmentally related summons, prosecutions or complaints were received in the reporting quarter.

Recommendations

6.7 According to the environmental audit performed in the reporting quarter, the following recommendations were made:

Air Quality Impact

- To provide water spraying on dried site areas or materials regularly for demolition activities:
- To provide impervious covers for dusty materials to reduce dust generation; and
- To provide the appropriate measure to control the odour emission.

Noise Impact

- To inspect the noise sources inside the site;
- To follow up any exceedance caused by the construction works;
- To space out noisy equipment and position the equipment as far away as possible from sensitive receivers;
- To provide temporary noise barriers for operations of noisy equipment near the noise sensitive receivers in an appropriate location;
- To provide adequate lubricant on mechanical equipments to reduce frictional noise;
- To ensure the doors of the air compressors are closed; and
- To well maintain the mechanical equipments / machineries to avoid abnormal noise nuisance.

Water Impact

- To avoid accumulation of stagnant / muddy water on site;
- To identify any discharge of wastewater from the construction site;
- To avoid any discharge of wastewater by-pass/ without the desilting facilities from the construction site;
- To avoid water from accumulation on site and carry out larviciding against mosquito breeding for stagnant water when mosquito larvae are observed;
- To avoid the water runoff from the earthworks without the bunding facilities;
- To provide the maintenance of the sediment tank regularly and make sure the sediment tank is non-malfunctioned;
- The discharge quality must meet the requirements specified in the discharge licence; and
- To avoid the surface runoff and water discharge from the site without bypassing to the wastewater treatment facility.

Waste/Chemical Management

- To avoid any discharge or accidental spillage of chemical waste or oil directly from the equipment;
- To well maintain the equipments and drip trays to avoid oil leakage;
- To avoid improper handling or storage of oil drum on site;
- Suitable containers should be used to hold the chemical wastes to avoid leakage or spillage during storage, handling and transport;
- To check for any accumulation of wasted materials or debris on site; and
- To provide adequate skips / containers for waste collection.

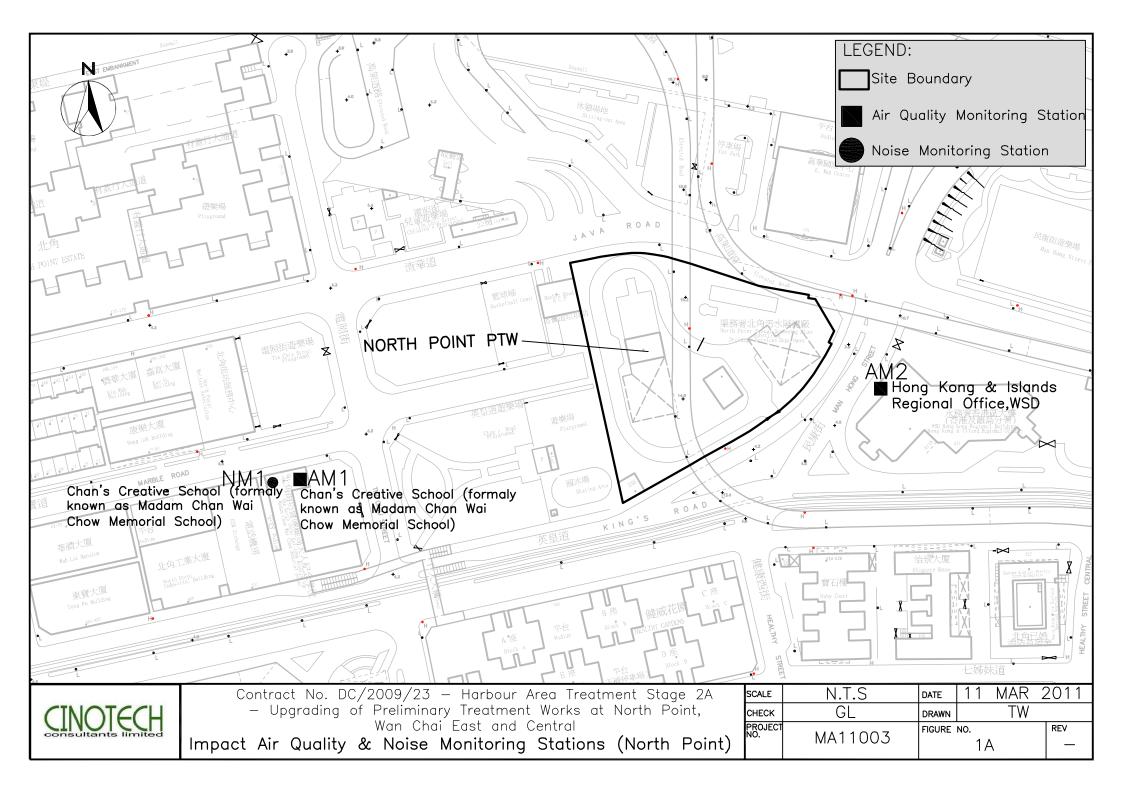

Landscape and Visual

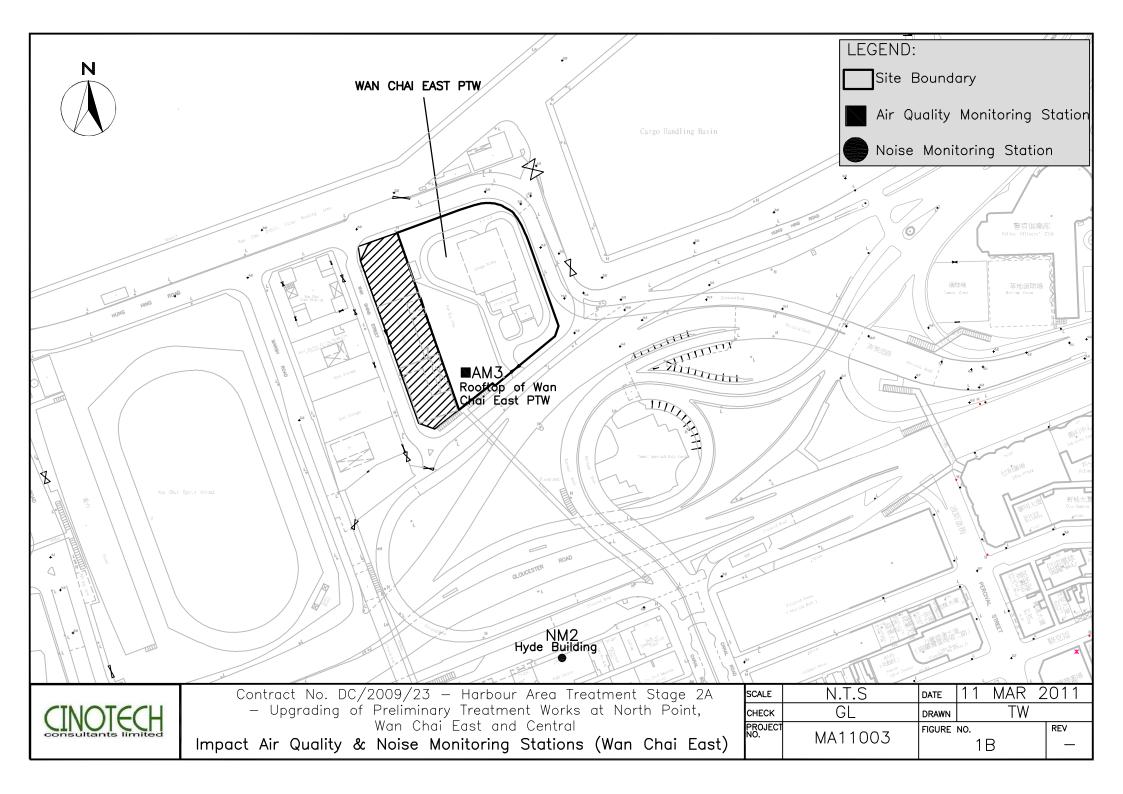

• To avoid any heavy materials placed into tree protection zone.

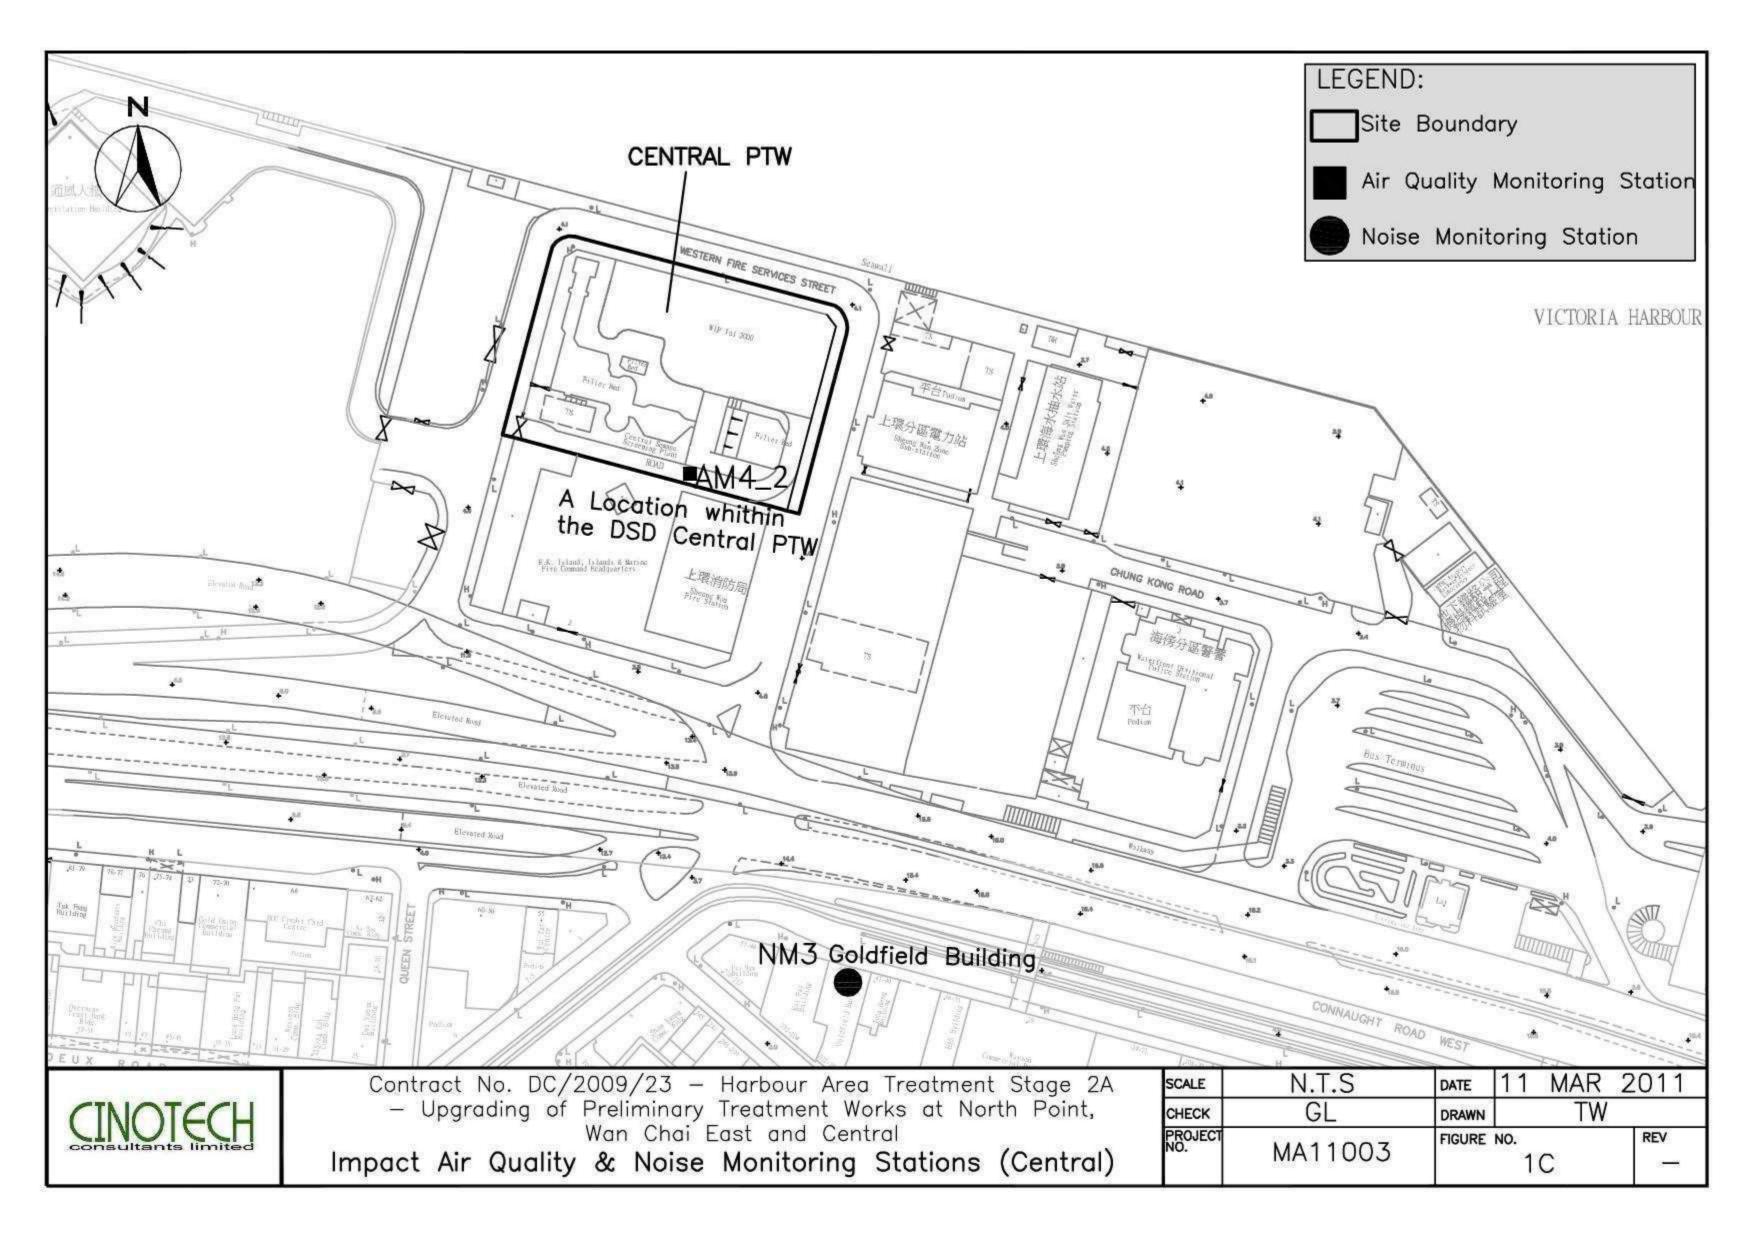

Permit/Licenses

- To place the updated Environmental Permit in the full version at all site entrances for inspection; and
- To displace the Environmental Permit at all site entrance.

QUALITY AND NOISE QUALITY

Appendix A Action and Limit Levels

Table A-1 Action and Limit Levels for 1-Hour TSP and 24-Hour TSP

Manitaning Stations	Action Le	vel (μg/m³)	Limit Level (µg/m³)		
Monitoring Stations	1-hour	24-hour	1-hour	24-hour	
AM1	340	185			
AM2	352	182	500	260	
AM3	355	181	300	200	
AM4_2	393	211			

Table A-2 Action and Limit Level for Construction Noise

Monitoring Stations	Time Period	Action Level	Limit Level in dB(A)	
	0700-1900 hours on normal weekdays		70 *	
NM1	Restricted hours (1900-2300 on all days and 0700-2300 on general holidays and Sundays)	When one documented	70 **	
NM2 and NM3	0700-1900 hours on normal weekdays	complaint is received	75	

Notes: If works are to be carried out during restricted hours, the conditions stipulated in the Construction Noise Permit (CNP) issued by the Noise Control Authority have to be followed.

^{* 70} dB(A) was adopted as the Limit Level during school normal teaching period in the reporting period.

^{** 70} dB(A) was adopted as the Limit Level during restricted hours in the reporting period

APPENDIX B SUMMARY OF EXCEEDANCE

APPENDIX B – SUMMARY OF EXCEEDANCE

Reporting Quarter: May 2014 to July 2014

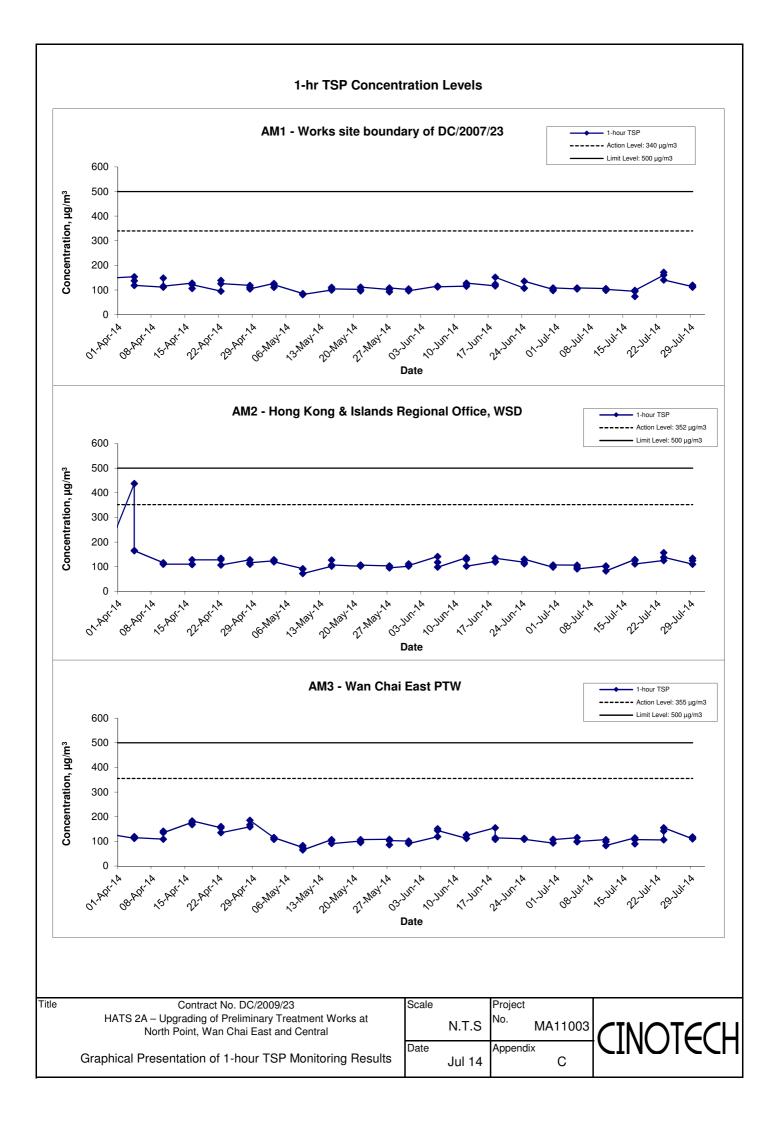

- a) Exceedance Report for 1-hr TSP (NIL)
- b) Exceedance Report for 24-hr TSP (NIL)
- c) Exceedance Report for Construction Noise (6) (3 in May 2014, 1 in June 2014, 2 in July 2014)

No Action Level exceedance was recorded, while three non-Project related Limit Level exceedances were recorded during the restricted hours noise monitoring on on 6th, 11th and 25th May 2014 by the ET of DC/2007/23 at NM2. According to the information provided by the Contractor, no construction works were carried out during the restricted hours period on 6th, 11th and 25th May 2014 at Wan Chai East Preliminary Treatment Works under DC/2009/23.

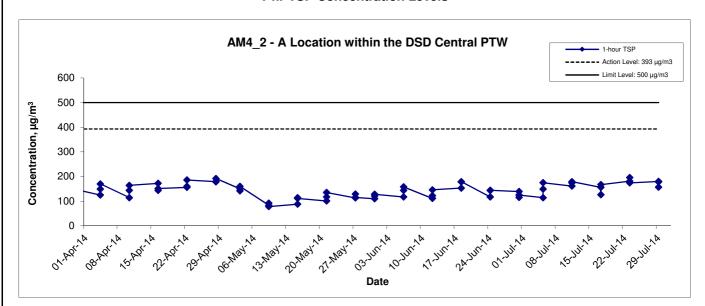

No Action Level exceedance was recorded, while one non-project related Limit Level exceedance was recorded during the restricted hour noise monitoring on 22nd June 2014 by the ET of DC/2007/23 at NM2. According to the information provided by the Contractor, no construction works were carried out during the restricted hours period on 22nd June 2014 at Wan Chai East Preliminary Treatment Works under DC/2009/23.

No Action Level exceedance was recorded, while two non-project related Limit Level exceedances were recorded during the restricted hour noise monitoring on 2nd July 2014 by the ET of DC/2007/23 at NM2 and on 29th July 2014 by the ET of DC/2007/23 at NM1. According to the information provided by the Contractor, no construction works were carried out during the restricted hours period on 2nd July 2014 at Wan Chai East Preliminary Treatment Works and on 29th July 2014 at North Point Preliminary Treatment Works under DC/2009/23.

Notes:

- (1) The performance targets are given in PS Clause 6(14).
- (2) The waste flow table shall also include C&D materials that are specified in the Contract to be imported for use at the site.
- (3) Plastics refer to plastic bottles / containers, plastic sheets / foam from packaging material.
- * (4) The contractor shall also submit the latest forecast of the total amount of C&D materials expected to be generated from the Works, together with a breakdown of the nature where to total amount of C&D materials expected to be generated from the Works is equal to or exceeding 50,000m3. (PS Clause 25.25S (6)(b) referes). [Delete Note (4) and the table above on the forecast, where inapplicable].
 - (5) The assumed density (kg/m³) for both C&D material and general refuse. C&D material 2000kg/m3

G I G Tool / G

General refuse 500kg/m3

(6) Conversion factors for reporting purpose: in-situ: rock = 2.5 tonnes/m3 ; soil = 2.0 tonnes/m3 excavated: rock = 2.0 tonnes/m3 ; soil = 1.8 tonnes/m3 broken concrete and bitumen = 2.4 tonnes/m3 C&D Waste = 0.9 tonnes/m3 bentonite slurry = 2.8 tonnes/m3 Chemical waste 1 Litres = 1 kg

APPENDIX G ENVIRONMENTAL MITIGATION IMPLEMENTATION SCHEDULE (EMIS)

APPENDIX G IMPLEMENTATION SCHEDULE OF ENVIRONMENTAL MITIGATION MEASURES (EMIS)

EIA	Recommended Mitigation Measures	Location of the measure	Implementation Status
Ref.			
A	Air Quality		
3.74	Skip hoist for material transport should be totally enclosed by impervious sheeting.	All construction sites	۸
	Vehicle washing facilities should be provided at every vehicle exit point.		۸
	The area where vehicle washing takes place and the section of the road between the washing facilities and the exit point should be paved with concrete, bituminous materials or hardcore.		٨
	Where a site boundary adjoins a road, streets or other areas accessible to the public, hoarding of not less than 2.4 m high from ground level should be provided along the entire length except for a site entrance or exit.		٨
	Use of regular watering, with complete coverage, to reduce dust emissions from exposed site surfaces and unpaved roads, particularly during dry weather.		۸
	Side enclosure and covering of any aggregate or dusty material storage piles to reduce emissions. Where this is not practicable owing to frequent usage, watering shall be applied to aggregate fines.		*
	Open stockpiles shall be avoided or covered. Where possible, prevent placing dusty material storage piles near ASRs.		۸
	Tarpaulin covering of all dusty vehicle loads transported to, from and between site locations.		۸
	Imposition of speed controls for vehicles on unpaved site roads. Ten kilometers per hour is the recommended limit.		۸
	Every stock of more than 20 bags of cement should be covered entirely by impervious sheeting placed in an area sheltered on the top and the 3 sides.		۸
	Every vehicle should be washed to remove any dusty materials from its body and wheels before leaving the construction sites.		۸
3.74	Instigation of an environmental monitoring and auditing program to monitor the construction process in order to enforce controls and modify method of work if dusty conditions arise.	All construction sites	۸

EIA	Recommended Mitigation Measures	Location of the measure	Implementation Status
Ref.			
В	Airborne Noise		
4.56-	Use of quiet PME, movable barriers and acoustic mats.	All construction sites	٨
4.61			
4.67	Only well-maintained plant shall be operated on-site and plant shall be serviced regularly during the construction program.		۸
	Silencers or mufflers on construction equipment shall be utilized and shall be properly maintained during the construction program.		۸
	Mobile plant, if any, shall be sited as far away from NSRs as possible.		٨
	Machines and plant (such as trucks) that may be in intermittent use shall be shut down between works periods or shall be throttled down to a minimum.		۸
4.67	Plant known to emit noise strongly in one direction shall, wherever possible, be orientated so that the noise is directed away from the nearby NSRs.		۸
	Material stockpiles and other structures shall be effectively utilized, wherever practicable, in screening noise from on-site construction activities.		۸
С	Water Quality		
6.349 to 6.375	Construction Site Runoff and General Construction Activities The mitigation measures as outlined in the ProPECC PN 1/94 Construction Site Drainage should be adopted where applicable.	All construction sites	*
6.376	Effluent Discharge		٨
0.370	There is a need to apply to EPD for a discharge licence for discharge of effluent from the construction site under the WPCO. The discharge quality must meet the requirements specified in the discharge licence. If monitoring of the treated effluent quality from the works areas is required during the construction phase of the Project, the monitoring should be carried out in accordance with the WPCO license which is under the ambit of regional office (RO) of EPD. Minimum distances of 100 m should be maintained between the discharge points of		
0.077	construction site effluent and the existing saltwater intakes. Accidental Spillage of Chemicals		*
6.377	Contractor must register as a chemical waste producer if chemical wastes would be produced from the construction activities. The Waste Disposal Ordinance (Cap 354) and its subsidiary regulations in particular the Waste Disposal (Chemical Waste) (General)		*

EIA	Recommended Mitigation Measures	Location of the measure	Implementation Status
Ref.			
	,		
	Regulation should be observed and complied with for control of chemical wastes.		
6.378	Any service shop and maintenance facilities should be located on hard standings within a bunded area, and sumps and oil interceptors should be provided. Maintenance of vehicles and equipment involving activities with potential for leakage and spillage should only be undertaken within the areas appropriately equipped to control these discharges.		#
6.379	Disposal of chemical wastes should be carried out in compliance with the Waste Disposal Ordinance. The Code of Practice on the Packaging, Labelling and Storage of Chemical Wastes published under the Waste Disposal Ordinance details the requirements to deal with chemical wastes. General requirements are given as follows: • Suitable containers should be used to hold the chemical wastes to avoid leakage or spillage during storage, handling and transport. • Chemical waste containers should be suitably labelled, to notify and warn the personnel who are handling the wastes, to avoid accidents. • Storage area should be selected at a safe location on site and adequate space should be allocated to the storage area.		*
6.380	Construction Works in Close Proximity of Storm Drains or Seafront	All construction sites	۸
	 To minimize the potential water quality impacts from the construction works located at or near any watercourse, the practices outlined below should be adopted where applicable. The use of less or smaller construction plants may be specified to reduce the disturbance to the storm water courses or marine environment. Temporary storage of materials (e.g. equipment, filling materials, chemicals and fuel) and temporary stockpile of construction materials should be located well away from any water courses during carrying out of the construction works. Stockpiling of construction materials and dusty materials should be covered and located away from any water courses. Construction debris and spoil should be covered up and/or disposed of as soon as possible to avoid being washed into the nearby water receivers. Construction activities, which generate large amount of wastewater, should be carried out in a distance away from the waterfront, where practicable. Proper shoring may need to be erected in order to prevent soil/mud from slipping into 		

EIA	Recommended Mitigation Measures	Location of the measure	Implementation Status
Ref.			
	the storm culvert or sea.		
D	Waste Management		
9.107	Reusable steel or concrete panel shutters, fencing and hoarding and signboard should be used as a preferred alternative to items made of wood, to minimise wastage of wood. Attention should be paid to WBTC No. 19/2001 - Metallic Site Hoardings and Signboards to reduce the amount of timber used on construction sites. Metallic alternatives to timber are readily available and should be used rather than new timber. Precast concrete units should be adopted wherever feasible to minimize the use of timber formwork.	All construction sites	۸
9.109	All waste materials should be segregated into categories covering: • excavated materials suitable for reuse on-site; • excavated materials suitable for public filling facilities; • remaining C&D waste for landfill; • chemical waste; and • general refuse for landfill.	All construction sites	۸
9.113	Sort C&D waste from demolition of existing facilities to recover recyclable portions such as metals;		٨
	Segregation and storage of different types of waste in different containers, skips or stockpiles to enhance reuse or recycling of materials and their proper disposal.		*
	Encourage collection of aluminium cans, PET bottles and paper by providing separate labelled bins to enable these wastes to be segregated from other general refuse generated by the work force.		۸
	Any unused chemicals or those with remaining functional capacity shall be recycled.		۸
	Proper storage and site practices to minimise the potential for damage or contamination of construction materials.		٨
9.115	Nomination of an approved person, such as a site manager, to be responsible for good site practices, arrangements for collection and effective disposal to an appropriate facility, of all wastes generated at the site.		٨
	Training of site personnel in proper waste management and chemical waste handling procedures.		۸
9.115	Develop and provide toolbox talk for on-site sorting of C&D materials to enhance worker's awareness in handling, sorting, reuse and recycling of C&D materials.		۸

EIA	Recommended Mitigation Measures Location of th		Implementation Status	
Ref.				
	Provision of sufficient waste disposal points and regular collection of waste.		۸	
	Regular cleaning and maintenance programme for drainage systems, sumps and oil interceptors.		۸	
9.125	Bentonite slurries used in diaphragm wall construction should be reconditioned and reused wherever practicable. The disposal of residual used bentonite slurry should follow the good practice guidelines stated in ProPECC PN 1/94 "Construction Site Drainage"	All construction sites	N/A	
9.131	Adequate number of portable toilets at temporary works areas or the PTWs to ensure that sewage from site staff would be properly collected.		۸	
9.133	General refuse should be stored in enclosed bins, skips or compaction units separating from C&D material and disposed of at designated landfill.		۸	
9.135	The recyclable component of the municipal waste generated by the workforce, such as aluminium cans, paper and cleansed plastic containers should be separated from other waste. Provision and collection of recycling bins for different types of recyclable waste should be set up by the Contractor. The Contractor should also be responsible for arranging recycling companies to collect these materials.		۸	
9.137	If chemical wastes are produced at the construction site, the Contractor would be required to register with the EPD as a chemical waste producer and to follow the guidelines stated in the Code of Practice on the Packaging, Labelling and Storage of Chemical Wastes. Good quality containers compatible with the chemical wastes should be used, and incompatible chemicals should be stored separately. Appropriate labels should be securely attached on each chemical waste container indicating the corresponding chemical characteristics of the chemical waste, such as explosive, flammable, oxidizing, irritant, toxic, harmful, corrosive, etc. The Contractor shall use a licensed collector to transport and dispose of the chemical wastes, to either the approved Chemical Waste Treatment Centre, or another licensed facility, in accordance with the Waste Disposal (Chemical Waste) (General) Regulation.		*	
9.142	Prior to excavation of the marine deposit layer, the deposit should be tested in accordance with the ETWB TC(W) No. 34/2002 and the results should be presented in a Preliminary Sediment Quality Report. The marine deposit should be disposed of at the disposal site designated by the Marine Fill Committee (MFC) or Director of Environmental Protection (DEP) depending on the test results.		N/A	

EIA	Recommended Mitigation Measures	Location of the measure	Implementation Status
