Dear Sirs

Agreement No.: PM 08/2014 Services for Independent Environmental Checker for Construction of Lok Chui Street Sewage Pumping Station Verification of Monthly EM&A Report

We refer to emails of 11, 15 and 22 April 2016 attaching a monthly EM&A Report for the captioned project prepared by the ET.

We have no further comment and hereby verify the monthly EM&A Report in accordance with Clause 3.5 of the Environmental Permit no. EP-068/2000/A.

Please do not hesitate to contact the undersigned at 2618 2836 or Mr Nic Lam should you have any queries.

Yours faithfully ANEWR CONSULTING LIMITED

EXECUTIVE SUMMARY

i. This is the 1st Monthly Environmental Monitoring Audit (EM&A) Monthly Report, it presents the environmental monitoring and audit works for the period from 29 February 2016 to 31 March 2016.

Construction Activities for the Reporting Period

- ii. During this reporting period, the principal work activities within the site included:
 - Hoarding Erection
 - Pre-Drilling
 - Earth Excavation
 - Plant Mobilization

Breaches of Action and Limit Levels for Air Quality

iii. No Action or Limit Level Exceedance of 1-hr TSP monitoring was recorded in the reporting period.

Breaches of Action and Limit Levels for Noise

iv. No exceedance was recorded at all monitoring stations in the reporting period.

Complaint, Notifications of Summons and Successful Prosecutions

v. No Action or Limit Level Exceedance of noise monitoring was recorded in the reporting period.

Reporting Change

vi. There was no reporting change required in the reporting period.

Future Key Issues

Construction Activities for the Coming Reporting Period

- vii. During the coming reporting period, the principal work activities within the site included:
 - Soldier pile work
- viii. Potential environmental impacts due to the construction activities, including air quality, noise, water quality, waste, landscape and visual, will be monitored or reviewed. The ET will continue to implement the environmental monitoring & audit programme in accordance with the EM&A Manual and Environmental Permit requirements. The recommended environmental mitigation measures shall be implemented on site and regular inspections as required will be carried out to ensure that the environmental conditions are acceptable.

1. INTRODUCTION

1.1 Background

- 1.1.1 Contract No. DC/2014/01 Castle Peak Road Trunk Sewer and Tuen Mun Village Sewerage ("the Project") includes the construction of a sewage pumping station at Lok Chui Street near Castle Peak Villas as shown in **Figure 1**.
- 1.1.2 The environmental impact assessment (EIA) report (Tuen Mun Sewerage Eastern Coastal Sewerage Extension) EIA Report (Register No. AEIAR-034/2000) for the Project was approved by Environmental Protection Department (EPD) dated 7 June 2000. The EIA Report involves the construction of four sewage pumping stations at Tai Lam Chung Tsuen, Luen On San Tsuen, Tai Lam Valley and Lok Chui Street near Castle Peak Villas. The scope of this EM&A Manual focuses on the Sewage Pumping Station at Lok Chui Street near Castle Peak Villas in the EIA Report. The Project is designated under Schedule 2, section F3(b) and Q1 of the Environmental Impact Assessment Ordinance (EIAO). EPD subsequently issued the Environmental Permit (EP) EP- 068/2000 on 25 July 2000.
- 1.1.3 A Register of Change to Environmental Permit was submitted to EPD to register any change to the conditions in the EP for adoption of the latest design of the Pumping Station at Lok Chui Street and justify that the latest changes would not violate the conditions as stated in the approved EIA Report and EP based on the latest engineering design information. A Variation of Environmental Permit (VEP) EP-068/2000/A was issued on 10 April 2015 and it is the current permit for the Project.
- 1.1.4 The amended EP (EP-068/2000/A) is the current permit for the Project.
- 1.1.5 In accordance to EP-068/2000/A Condition 2.3 and 2.4, an updated EM&A Manual was duly certified by ETL and verified by IEC and submitted to EPD for approval on 18 January 2016.
- 1.1.6 The construction phase and EM&A programme of the Project commenced on 29 February 2016.
- 1.1.7 This is the 1st monthly EM&A Report which summaries the impact monitoring results and audit findings for the Project within the period from 29 February 2016 to 31 March 2016.

1.3 Construction Programme and Activities

- 1.3.1 The construction phase of the Project under the EP commenced on 29 February 2016.
- 1.3.2 The construction programme of the Project is shown in **Appendix A**.

1.4 Works undertaken during the month

- 1.4.1 During this reporting period, the principal work activities within the site included:
 - Hoarding Erection
 - Pre-Drilling
 - Earth Excavation
 - Plant Mobilization
- 1.4.2 Illustrations of works undertaken during the reporting period are shown in Table 1.2:

1.5 Status of Environmental Licences, Notification and Permits

1.5.1 A summary of the relevant permits, licences and/or notifications on environmental protection for this Contract is presented in **Table 1.3**.

Table 1.3	Status of Environmental Licences, Notification and Permits
-----------	--

Permit / Direction / License	Ref No	Valid From	Valid Till
Environmental Permit	EP-068/2000/A	10/04/2015	N/A
Notification of Works Under APCO	391923	06/08/2015	N/A
Wastewater Discharge Licence	WT00022654-2015	23/10/2015	31/10/2020
Registration as a Chemical Waste Producer	5111-421-S3879-01	02/09/2015	N/A
Billing Account for Disposal of Construction Waste	7022922	06/08/2015	N/A

2. AIR QUALITY

Hong Kong.

2.1 Monitoring Requirement

2.1.1 In accordance with the updated EM&A Manual, for regular impact monitoring, the sampling frequency of at least once per week shall be strictly observed at designated monitoring stations for 1-hr TSP monitoring using the direct reading method.

2.2 Monitoring Equipment and Detection Limits

Email

- 2.2.1 The impact air quality (1-hr TSP) monitoring was performed using the portable TSP Monitors (Sibata Model LD-3B).
- 2.2.2 **Table 2.1** summarizes the detail of monitoring equipment and detection limits:

: mcl@fugro.com.hk

Item	Equipment	Model Number	Serial Number	Measuring accuracy	Measuring range
1	Portable TSP	Sibata Model	577229	±10% of	0.001 –
2	Monitor	LD-3B	597324	calibrated particles	10.00mg/m ³

Table 2.1 Air Quality Monitoring Equipment

2.3 Monitoring Parameters, Frequency and Duration

- 2.3.1 **Table 2.2** summarizes the monitoring parameters, monitoring duration and frequencies of air quality monitoring.
 - Table 2.2
 Monitoring Parameters, Frequency and Duration of Air Quality Monitoring

Parameter	Duration	Frequency		
1-hr TSP	1 hour	At least 3 times in every 6 days		

2.4 Monitoring Locations

2.4.1 In accordance with the updated EM&A Manual, two designated air quality monitoring stations, LC6a and LC9 are selected for the Project Area of constructing a sewage pumping station at Lok Chui Street near Castle Peak Villas as they are the representative air sensitive receivers located near to the Project site. All designated air quality monitoring stations listed in the updated EM&A Manual and the air quality monitoring stations are shown in **Table 2.3** and the monitoring locations are shown in **Figure 2**.

Table 2.3 Air Quality N	Monitoring Locations
-------------------------	----------------------

Monitoring Station	Location
LC6a	The Castle Bay
LC9	Castle Peak Villas Block C

2.5 Monitoring Methodology and QA/QC Procedures

- 2.5.1 The measuring procedures of the 1-hr dust meter are in accordance with the Manufacturer's instruction Manual as follows:
 - Pull up the air sampling inlet cover

Room 723 & 725, 7/F, Block B, Profit Industrial Building, 1-15 Kwai Fung Crescent, Kwai Fong, Hong Kong.

Change the Mode 0 to BG with once

Tel

Fax

- Push Start/Stop switch once
- Turn the knob to SENSI.ADJ and press it
- Push Start/Stop switch once
- Return the knob to the position MEASURE slowly
- Push the timer set switch to set measuring time
- Remove the cap and make a measurement

Maintenance / Calibration

2.5.2 The portable TSP Monitors should be calibrated at 1 year intervals, Current calibration certificates are given in Appendix D.

Results and Observations 2.6

- 2.6.1 The schedule of air quality monitoring and data recovery schedule in reporting period is provided in Appendix E.
- 2.6.2 The weather conditions during the monitoring are provided in Appendix L.
- The monitoring data of 1-hr TSP are summarized in **Table 2.4**. Detailed monitoring data are 2.6.3 presented in Appendix F.

Monitoring Station	Average (µg/m³)	Range (µg/ m³)	Action Level (µg/ m ³)	Limit Level (µg/ m³)
LC6a	84	54-143	344	500
LC9	85	20-168	335	500

Summary of 1-hr TSP Monitoring Results Table2.4

- 2.6.4 The adopted Action and Limit Levels for air quality impact monitoring are presented in Appendix C.
- 2.6.5 The Event and Action Plan for air quality is given in **Appendix J**.
- 2.6.6 No Action or Limit Level Exceedance of 1-hr TSP monitoring was recorded in the reporting period.

Other factor influencing the monitoring results

2.6.7 There were no other noticeable external factors generally affecting the monitoring results in this reporting period.

MateriaLab

3. NOISE

3.1 Monitoring Requirement

3.1.1 In accordance with the updated EM&A Manual, Leq (30min) monitoring is conducted for at least once a week during the construction phase between 0700 and 1900 on normal weekdays at the designated monitoring locations.

3.2 Monitoring Equipment and Detection Limits

- 3.2.1 The sound level meter used in noise monitoring will comply with the International Electrotechnical Commission Publication (IEC) 651:1979 (Type 1) and 804:1985 (Type 1) specifications as referred to in the Technical Memorandum issued under the Noise Control Ordinance (NCO).
- 3.2.2 Sound level calibrator will be used for the on-site calibration of the meter. This calibrator complies with the IEC Publication 942 (1988) Class 1 and ANSI S1.40 1984. Noise measurements were only accepted to be valid if the calibration levels from before and after the measurement agree to within 1.0dB.
- 3.2.3 Measurements shall be recorded to the nearest 1dB(A). This noise monitors are programmed to measure A-weighted equivalent continuous sound pressure level at 30-minute intervals between 0700 and 1900 during the daytime. The noise measurement shall be carried out at each of the designated monitoring stations closest to the areas of active construction works once every week.

3.2.4	Table 3.1 summarizes the detail of monitoring equipment and detection	limits:
-------	---	---------

Item	Equipment Model Number Serial Number			Measuring accuracy	Measuring range	
1	Integrating Sound Level Meter	Casella CEL- 63X Series	3321823	N.A	20-140 dB	
2	Calibrator	Casella CEL- 120/1	5230758	±0.1dB	94/114 dB	
3	Wind Speed Anemometer	Smart Sensor AR816+	N.A	±5%	0-30m/s	

Table 3.1Noise Monitoring Equipment

3.3 Monitoring Parameters and Frequency

3.3.1 **Table 3.2** presents the noise monitoring parameters and frequencies.

Table3.2	Monitoring Parameters and Frequencies of Noise Monitoring

Monitoring Stations	Parameter	Frequency and Period
LC6a & LC9	LAeq _(30min) L10 and L90 will be recorded for reference	At each station at 0700-1900 hours on normal weekdays at a frequency of once a week

Hong Kong.	Email	: mcl@fugro.com.hk

<u>MateriaLab</u>

3.4 Monitoring Locations

3.4.1 Noise monitoring were conducted at two designated monitoring stations as described in **Table 3.3** and the monitoring locations are shown in **Figure 2**.

Table 3.3	Location	of noise	monitoring	station
1 4010 010	Looution	01 110100	monitoring	otation

Monitoring Station	Location
LC6a ¹	The Castle Bay
LC9	Castle Peak Villas Block C

Note:

1. The measurement of sound level is carried out at the fence wall outside the building of the sensitive receiver, a correction should be made to the measured level during impact monitoring in order to represent the actual sound level at the sensitive receiver building façade (Block E6, The Castle Bay).

3.5 Monitoring Methodology and QA/QC Procedures

- 3.5.1 The monitoring procedures are as follows:
 - Monitoring Stations:
 - LC6a: The monitoring station was set at a point 1m from the exterior of the sensitive receiver fence wall and set at a position 1.2m above the ground. Façade measurement is carried out for noise monitoring.
 - LC9: The monitoring station was set at the top of parapet wall of sensitive receivers building and the noise monitoring station is set at a point 1m from the exterior of the sensitive receivers building façade and set at a position 5m above the ground.
 - The battery condition was checked to ensure good functioning of the meter.
 - Parameters such as frequency weighting, the time weighting and the measurement time was set as follows:
 - frequency weighting : A
 - time weighting : Fast
 - measurement time : Leq (30min) was used as the monitoring parameter for the time period between 0700 - 1900 hours on normal weekdays. For all other time periods, Leq (5min) was recorded.
 - Prior to and after noise measurement, the meter was calibrated using the calibrator for 94.0 dB at 1000 Hz. If the difference in the calibration level before and after measurement is more than 1.0 dB, the measurement will be considered invalid and repeat of noise measurement is required after re-calibration or repair of the equipment.
 - The wind speed at the monitoring station was checked with the portable wind meter. Noise monitoring should be cancelled in the presence of fog, rain, and wind with a steady speed exceeding 5 m/s, or wind with gusts exceeding 10 m/s.

Maintenance / Calibration

- 3.5.2 Maintenance and Calibration procedures are as follows:
 - The microphone head of the sound level meter and calibrator should be cleaned with a soft cloth at quarterly intervals.
 - The sound level meter and calibrator should be calibrated annually by a HOKLAS laboratory.
 - Relevant calibration certificates are provided in Appendix D.

Profit Industrial Building,	Tel	: (852)-24508238

3.6 Results and Observations

- 3.6.1 The schedule of noise monitoring and data recovery schedule in reporting period is provided in **Appendix E**.
- 3.6.2 The weather conditions during the monitoring period are provided in **Appendix L**.
- 3.6.3 The noise monitoring data are summarized in **Table 3.4**. Detailed monitoring data are presented in **Appendix G**.

Monitoring		(30min) , dB(A)	Leq (30min)		
Station	Measured	Corrected	Limit Level, dB(A)		
LC6a ¹	66-71	61-66	75		
LC9	64-70	N.A	75		

Table 3.4 Summary of Noise Impact Monitoring Results

Note:

- Leq (30min) was measured at day-time (0700-1900) on normal weekdays.
- A distance correction of -5dB(A) has been applied in monitoring data of LC6a according to baseline monitoring report (Appendix G).
- 3.6.4 The adopted Action and Limit Levels for noise impact monitoring are presented in Appendix C.
- 3.6.5 The Event and Action Plan for noise is given in **Appendix J**.
- 3.6.6 No Action or Limit Level Exceedance of noise monitoring was recorded in the reporting period.

Other factor influencing the monitoring results

3.6.7 There were no other noticeable external factors generally affecting the monitoring results in this reporting period.

4. LANDSCAPE AND VISUAL

4.1 **Audit Requirements**

4.1.1 In accordance with the updated EM&A Manual, the landscape and visual mitigation measures during the construction phase are audited by a Landscape Architect, as a member of the ET, on a regular basis to ensure compliance with the intended aims of the measures. Site inspections are undertaken at least once every two weeks throughout the construction period and once every two months during the operational phase to ensure compliance with the intended aims of the measures.

4.2 **Results and Observations**

- 4.2.1 Site audits were carried out to monitor and audit the implementation of landscape and visual mitigation measures. The summary of the site audits are given in Appendix I.
- 4.2.2 Should non-compliance of the landscape and visual impact occur, action in accordance to the event action plan presented in Appendix J shall be carried out.
- 4.2.3 No non-compliance of the landscape and visual impact was recorded in the reporting month.

: (852)-24508238 : (852)-24508032

5. **ENVIRONMENTAL SITE INSPECTION AND AUDIT**

5.1 **Site Inspection**

- 5.1.1 Weekly site inspections and bi-weekly landscape and visual impact inspections were carried out to monitor the implementation of proper environmental pollution control and mitigation measures for the Project.
- 5.1.2 In the reporting period, site inspections were carried out on 2, 9, 16, 24 and 30 March 2016 and the landscape and visual impact inspections were carried out on 2, 16 and 30 March 2016.
- 5.1.3 The summary of the site audits are given in Appendix I.

6. Advice on the Solid and Liquid Waste Management status

- 6.1.1 The Contractor has been registered as a chemical waste producer for the Project. Construction and demolition (C&D) material sorting was carried out on site. Receptacles were available for general refuse collection.
- 6.1.2 As advised by the Contractor, 100m³ of C&D waste was generated in the reporting month, of which, 100m³ was reused in the Contract. 1m³ general refuse was generated and disposed of in the reporting period. Monthly summary of waste flow table is detailed in **Appendix M**.

Tel : (852)-24508238 Fax : (852)-24508032 Email : mcl@fugro.com.hk

7. ENVIRONMENTAL COMPLAINT AND NON-COMPLIANCE

7.1 Environmental Exceedance

- 7.1.1 No Action or Limit Level Exceedance of 1-hr TSP monitoring was recorded in the reporting period.
- 7.1.2 No Action or Limit Level Exceedance of noise monitoring was recorded in the reporting period.

7.2 Complaints, Notification of Summons and Successful Prosecution

- 7.2.1 No complaints, notification of summons or successful prosecutions were received in the reporting period.
- 7.2.2 Cumulative complaint log, summaries of complaints, notification of summons and successful prosecutions are presented in **Appendix H.**

: (852)-24508238 Fax : (852)-24508032 Email : mcl@fugro.com.hk

8. IMPLEMENTATION STATUS OF ENVIRONMENTAL MITIGATION MEASURES

8.1 **Implementation Status**

The Contractor has implemented environmental mitigation measures and requirements as 8.1.1 stated in the EIA Reports, the EP and the EM&A Manuals. The implementation status of the mitigation measures during the reporting period is summarized in Appendix K.

The copyright of this document is owned by MateriaLab Consultants Ltd. It may not be reproduced except with prior written approval from the Company.

9. FUTURE KEY ISSUES

9.1 Construction Works for the Coming Month

- 9.1.1 During the coming reporting period, the principal work activities within the site included:
 - Soldier pile work

9.2 Key Issues for the Coming Month

- 9.2.1 Potential environmental impacts due to the construction activities, including air quality, noise, water quality, waste, landscape and visual, will be monitored or reviewed. The ET will continue to implement the environmental monitoring & audit programme in accordance with the EM&A Manual and Environmental Permit requirement. The recommended environmental mitigation measures shall be implemented on site and regular inspections as required will be carried out to ensure that the environmental conditions are acceptable.
- 9.2.2 The anticipated impact of principal work activities within the site and the recommended mitigation measures are shown in **Appendix N**.

9.3 Monitoring Schedules for the Coming Months

9.3.1 The tentative schedules for environmental monitoring in the coming months are provided in **Appendix E**.

10. CONCLUSIONS

- 10.1.1 The construction phase and EM&A programme of the Project commenced on 29 February 2016.
- 10.1.2 No Action or Limit Level Exceedance of 1-hr TSP monitoring was recorded in the reporting period.
- 10.1.3 No Action or Limit Level Exceedance of noise monitoring was recorded in the reporting period.
- 10.1.4 In the reporting period, site inspections were carried out on 2, 9, 16, 24 and 30 March 2016 and the landscape and visual impact inspections were carried out on 2, 16 and 30 March 2016.
- 10.1.5 No complaints, notification of summons or successful prosecutions were received in the reporting period.

Summary of Site Audit

Inspection Date	Observation/ Comment	Follow Up Action	Completion Date
02/03/2016	The Contractor was reminded to spray with water on site to prevent dust nuisance.	Regularly spray with water if necessary.	02/03/2016
02/03/2016	Hoarding erection is in progress.	N.A	30/03/2016
24/03/2016	Recycle bin was not provided on site.	The Contractor was reminded to provide recycle bin on site.	01/04/2016
Landscape a	Ind Visual Impact Inspection		
02/03/2016	Hoarding erection is in progress.	N.A	30/03/2016
16/03/2016	Branches of retained trees at the southern boundary of the work site have been pruned.	It is reminded that proper pruning should be conducted and supervised by arboriculture/ tree specialist in accordance with DEVB TCW No. 7/2015 – Tree Preservation.	N.A
16/03/2016	Over 50% of dieback observed in LC-TC06 (R) and LC-TC07 (R)	If the health condition does not improve. Assessment by tree specialist should be conducted to assess the risk of falling during typhoon season. Tree fell application should be prepared if necessary	ASAP
16/03/2016	Temporary concrete ditch is set up to collect discharge, which is close to the tree base of T0479 and T0483.	The thin concrete lay of the temporary ditch should be removed after use. It is reminded that digging near the tree base or spraying of shotcrete on tree trunk should be avoided along the whole construction period.	Once after use of the temporary ditch within Construction Phase
30/03/2016	Tree bark has been ringed at tree base in LC-TC09 (R). The tree is probably dying if it is not dead (Photo reference attached). No new leaves observed in LC- TC06 (R) and LC-TC07 (R)	Assessment by tree specialist should be conducted to assess the risk of falling during typhoon season. Tree fell application should be prepared if necessary.	ASAP

27	10	8	1	1	0	2	1	1	1	2	

Notes:

(1) The performance targets are given in ETWB Technical Circular PS Clause 6(14).

(2) The waste flow table shall also include C&D materials that are specified in the Contract to be imported for use at the Site.

(3) Plastics refer to plastic bottles/containers, plastic sheets/foam from packaging material

(4) *The Contractor shall also submit the latest forecast of the total amount of C&D materials expected to be generated from the Works, together with a breakdown of the nature where the total amount of C&D materials expected to be generated from the Works is equal to or exceeding 50,000 m3. (ETWB Technical Circular PS Clause 5(4)(b) refers). [Delete Note (4) and the table above on the forecast, where inapplicable].
