EXECUTIVE SUMMARY

This Monthly Environmental Monitoring and Audit (EM&A) Report is prepared for Contract HY/2013/02 "Hong Kong-Zhuhai-Macao Bridge Hong Kong Boundary Crossing Facilities (HKBCF) – Infrastructure Works Stage I (Western Portion)" (hereafter referred to as "the Contract") for the Highways Department of Hong Kong Special Administrative Region (HKSAR). The Contract was awarded to China Harbour Engineering Co., Ltd. (hereafter referred to as "the Contractor") and ETS-Testconsult Limited was appointed as the Environmental Team (ET) by the Contractor.

The Contract is part of Hong Kong-Zhuhai-Macao Bridge HKBCF which is a "Designated Project", under Schedule 2 of the Environmental Impact Assessment Ordinance (EIAO) (Cap 499) and Environmental Impact Assessment (EIA) Report (Register No. AEIAR-145/2009) was prepared for the Project. The current Environmental Permit (EP) No. EP-353/2009/K for HKBCF was issued on 11 April 2016. These documents are available through the EIA Ordinance Register. Site preparation works of the Contract was started on 25 July 2014 and the construction works of the Contract commenced on 24 November 2014.

ETS-Testconsult Limited has been appointed by the Contractor to implement the Environmental Monitoring & Audit (EM&A) programme for the Contract in accordance with the Updated EM&A Manual for HKBCF (Version 1.0) and provide environmental team services to the Contract.

This is the Twenty-fourth Monthly Environmental Monitoring and Audit (EM&A) Report for the Contract which summaries findings of the EM&A works conducted during the reporting period from 01 November 2016 to 30 November 2016.

Site Activities

As informed by the Contractor, site activities were carried out in this reporting month:

- Bored piles works in Portion C & F;
- Pier / Abutment in Portion C & F;
- Pile Cap in Portion C & F;
- Pre-bored H-pile for sign gantries in Portion D;
- Storm drain and water main construction;
- Footing construction of directional signs and duct laying in Portion I & CLP area;
- Marine Delivery of precast segment & Construction of bridge deck in Portion D, A & E
- Marine sediment excavation activities from the land-based works and corresponding disposal at the designated disposal sites.

Environmental Monitoring and Audit Progress

The monthly EM&A programme was undertaken in accordance with the Updated EM&A Manual for HKBCF (Version 1.0). It should be noted that the air quality and noise monitoring works for the Contract are covered by Contract No. HY/2010/02 "Hong Kong-Zhuhai-Macao Bridge HKBCF – Reclamation Works" and Contract No. HY/2011/03 "Hong Kong-Zhuhai-Macao Bridge Hong Kong Link Road – Section between Scenic Hill and HKBCF". The ET of the Contract or another ET of the HZMB project is required to conduct impact air quality monitoring at AMS6 and AMS7, noise monitoring at NMS2 and NMS3B, water quality monitoring show in **Figure 2** and dolphin monitoring show in **Figure 3** as part of EM&A programme if these monitoring stations are no longer covered under Contract No. HY/2010/02 and HY/2011/03. However, this is subject to ENPO's final decision on which ET should carry out the monitoring works at these stations. The dates of site inspection during the reporting period are listed below:

Environmental Site Inspection: 03, 10, 17 & 24 November 2016

Breaches of Action and Limit Levels

Summary of Action and Limit Level exceedance of 1-hr TSP level and 24-hr TSP level at AMS6 shall be referred to the monthly EM&A report prepared by Contract No. HY/2011/03.

There was no Action and Limit Level exceedance of 1-hr TSP level and 24-hr TSP level recorded at station AMS7 by the Environmental Team of Contract No. HY/2010/02 during the reporting period.

There was no Action and Limit Level exceedance for noise recorded at station NMS2 and station NMS3B by the Environmental Team of Contract No. HY/2010/02 during the reporting period.

There was one Action Level exceedance of SS at station SR4(N) during mid-flood tide recorded on 14 November 2016, two Action Level exceedances of SS at station IS10 and SR5 and one Limit Level exceedance of SS at station at SR6 during mid-flood tide recorded on 16 November 2016, five Action Level exceedances of SS at station IS(Mf)11, IS10, SR5, SR6 and SR7 during mid-flood tide recorded on 18 November 2016 and two Action Level exceedances of SS at station SR10A and SR10B(N) during mid-flood tide recorded on 30 November 2016. After investigation, there were concluded that the exceedance was not relevant to this Contract since there was no marine works carried out by this Contract during November 2016. Therefore, it is unlikely that the SS exceedances recorded during mid-flood tide on 14, 16, 18 and 30 November 2016 were contributed by the works under Contract No. HY/2013/02. The Investigation Reports No. 007, 008, 009 and 010 (including the causes of exceedance, action taken and recommendation for mitigation) for Action or Limit Level Non-compliance were provided in **Appendix J**. There was no Action and Limit Level exceedance recorded on other monitoring date at the monitoring stations showed at **Table 4.1** by the Environmental Team of Contract No. HY/2010/02 during the reporting period.

Impact dolphin monitoring results at all transects are reported in the EM&A Report prepared for Contract No. HY/2010/02.

Complaint Log

There was a complaint received by EPD from public on 09 November 2016 and forwarded by EPD to the ENPO on 09 November 2016. Then the ENPO forwarded the complaint by email to the R.E. (AECOM), the Contractor (China Harbour) and the ET (ETS-Testconsult Ltd.) of Contract No. HY/2013/02 at 14:52 on 10 November 2016. The complainant complained that an engineering works vessel named “長盛 308” travelled from Hong Kong – Zhuhai – Macao Bridge near Scenic Hill Site to the coast towards Tung Chung Pier together with muddy water at 09:26 on 07 November 2016.

The above mentioned complaint follow-up inspection was performed by the ET of Contract No. HY/2013/02 on 10 November 2016. The complaint investigation report (Log No. 005) was issued by the ET of Contract No. HY/2013/02 and verified by the IEC/ENPO on 15 November 2016.

According to the investigation, there was no any marine works carried out on 07 November 2016 by Contract No. HY/2013/02. The complaint was found non-related to Contract No. HY/2013/02. The complaint investigation report (Log No. 005) was provided in **Appendix K**.

Notifications of Summons and Successful Prosecutions

There were no notifications of summons or prosecutions received during the reporting period.

Reporting Change

There were no reporting changes during the reporting period.

Future Key Issues

The future key issues to be undertaken in the upcoming month are as follows:

- Bored piles works in Portion C & F;
- Pier / Abutment in Portion C & F;
- Pile Cap in Portion C & F;
- Pre-bored H-pile for sign gantries in Portion D;
- Storm drain and water main construction;

-
- *Retaining wall, slop and earth works*
 - *Footing construction of directional signs, cable trench and ducting;*
 - *Delivery of precast segment & Construction of bridge deck in Portion D, A, E, C & F*
 - *Marine sediment excavation activities from the land-based works and corresponding disposal at the designated disposal sites.*

1. INTRODUCTION

1.1. Basic Project Information

- 1.1.1.** This Monthly Environmental Monitoring and Audit (EM&A) Report is prepared for Contract HY/2013/02 "Hong Kong–Zhuhai–Macao Bridge Hong Kong Boundary Crossing Facilities (HKBCF) – Infrastructure Works Stage I (Western Portion)" (hereafter referred to as "the Contract") for the Highways Department of Hong Kong Special Administrative Region (HKSAR). The Contract was awarded to China Harbour Engineering Co., Ltd. (hereafter referred to as "the Contractor") and ETS-Testconsult Limited was appointed as the Environmental Team (ET) by the Contractor.
- 1.1.2.** The Contract is part of Hong Kong–Zhuhai–Macao Bridge HKBCF which is a "Designated Project", under Schedule 2 of the Environmental Impact Assessment Ordinance (EIAO) (Cap 499) and Environmental Impact Assessment (EIA) Report (Register No. AEIAR-145/2009) was prepared for the Project. The current Environmental Permit (EP) No. EP-353/2009/K for HKBCF was issued on 11 April 2016. These documents are available through the EIA Ordinance Register. Site preparation works of the Contract started on 25 July 2014 and the construction works of the Contract commenced on 24 November 2014. The works area of the Contract is shown in **Appendix A**.
- 1.1.3.** The proposed works under this Contract comprise the following:
- Construction of the viaducts and roads at the western portion of Hong Kong Boundary Crossing Facilities (HKBCF) mainly for connection with the Hong Kong–Zhuhai–Macao Bridge (HZMB), Hong Kong Link Road (HKLR), Hong Kong International Airport (HKIA) and the Tuen Mun-Chek Lap Kok Link (TM-CLKL);
 - Construction of the road modification at the SkyCity Interchange at Airport Island;
 - Construction of associated street lighting, street furniture, road marking, road signage, drainage, sewerage, fresh water and flushing water supply, irrigation, landscape, electrical and mechanical (E&M), utilities and services works;
 - Provisioning of civil engineering works and power supply installation for the Traffic Control and Surveillance System TCSS;
 - Other works in accordance with the Contract.
- 1.1.4.** This is the Twenty-fourth Monthly Environmental Monitoring and Audit (EM&A) Report for the Contract which summaries the audit findings of the EM&A programme during the reporting period from 01 November 2016 to 30 November 2016.

1.2. Project Organization

1.2.1. The project organization structure and lines of communication with respect to the on-site environmental management structure is shown in **Appendix B**. The key personnel contact names and numbers are summarized in **Table 1.1**.

Table 1.1 Contact Information of Key Personnel

Party	Position	Name of Key Staff	Tel. No.	Fax No.
Engineer or Engineer's Representative (AECOM Asia Co. Ltd.)	Resident Engineer	Mr. Dominic Mow	6274 0909	315205116
Environmental Project Office / Independent Environmental Checker (Ramboll Environ Hong Kong Limited)	Environmental Project Office Leader	Mr. Y. H. Hui	3465 2888	3465 2899
	Independent Environmental Checker	Mr. Raymond Dai	3465 2888	3465 2899
	Environmental Site Supervisor	Mr. Ray Yan	5181 8165	3465 2899
Contractor (China Harbour Engineering Co., Ltd.)	Environmental Officer	Mr. Richard Ng	5977 0593	3915 0300
	Assistant Environmental Officer	Mr. Paper Chan	6486 8967	3915 0300
	Environmental Supervisor	Mr. Endy Tse	5512 2662	3915 0300
Environmental Team (ETS-Testconsult Ltd.)	Environmental Team Leader	Mr. C. L. Lau	2946 7791	2695 3944

1.3 Construction Programme

1.3.1 A copy of the Contractor's construction programme is provided in **Appendix C**.

1.4 Construction Works Undertaken During the Reporting Period

1.4.1 A summary of the construction activities undertaken during this reporting period is shown below:

- Bored piles works in Portion C & F
- Pier / Abutment in Portion C & F;
- Pile Cap in Portion C & F ;
- Pre-bored H-pile for sign gantries in Portion D;
- Storm drain and water main construction;
- Footing construction of directional signs and duct laying in Portion I & CLP area;
- Marine Delivery of precast segment & Construction of bridge deck in Portion D, A & E
- Marine sediment excavation activities from the land-based works and corresponding disposal at the designated disposal sites.

2 AIR QUALITY MONITORING

2.1 Monitoring Locations

2.1.1 The air quality monitoring works for the Contract are covered by Contract No. HY/2010/02 Hong Kong-Zhuhai-Macao Bridge HKBCF – Reclamation Works and Contract No. HY/2011/03 Hong Kong-Zhuhai-Macao Bridge Hong Kong Link Road – Section between Scenic Hill and HKBCF. The ET of the Contract or another ET of the HZMB project is required to conduct impact air quality monitoring at AMS6 and AMS7 as part of EM&A programme if these air quality monitoring stations are no longer covered under Contract No. HY/2010/02 and HY/2011/03. **Table 2.1** and **Figure 1** shows the locations of air monitoring stations.

Table 2.1 Air Quality Monitoring Locations

Identification No.	Location Description
AMS6 ⁽¹⁾	Dragonair / CNAC (Group) Building
AMS7 ⁽¹⁾⁽²⁾	Hong Kong SkyCity Marriott Hotel

Remarks:

- (1) The ET of this Contract should conduct impact air quality monitoring at the AMS listed in the table as part of EM&A programme according to latest notification from ENPO when the monitoring station(s) is/are no longer covered by another ET of the HZMB project.
- (2) The air quality monitoring location AMS7A was relocated back to the original monitoring location AMS7 of the updated EM&A Manual started from January 2016.

2.2 Monitoring Requirements

2.2.1 The monitoring requirements, monitoring equipment, monitoring parameters, frequency and duration, monitoring methodology, monitoring schedule, meteorological information are detailed in the monthly EM&A Reports prepared for Contract Nos. HY/2010/02 and HY/2011/03.

2.2.2 The Action and Limit Levels for 1-hr TSP and 24-hr TSP are provided in **Table 2.2** and **Table 2.3** respectively. The Action and Limit Levels of AMS7 are as same as its original levels and AMS7A.

Table 2.2 Action and Limit Levels for 1-hour TSP

Monitoring Station	Action Level, $\mu\text{g}/\text{m}^3$	Limit Level, $\mu\text{g}/\text{m}^3$
AMS6 – Dragnair / SNAC (Group) Building (HKIA)	360	500
AMS7 – Hong Kong SkyCity Marriott Hotel	370	500

Table 2.3 Action and Limit Levels for 24-hour TSP

Monitoring Station	Action Level, $\mu\text{g}/\text{m}^3$	Limit Level, $\mu\text{g}/\text{m}^3$
AMS6 – Dragnair / SNAC (Group) Building (HKIA)	173	260
AMS7 – Hong Kong SkyCity Marriott Hotel	183	260

2.2.3 The event and action plan is provided in **Appendix D**.

2.2.4 If exceedance(s) at these stations is/are recorded by the ET of the Contract or referred by the other ET under the HZMB project to the Contract, the ET of the Contract will carry out an investigation and findings will be reported in the monthly EM&A Report.

2.3 Monitoring Results

- 2.3.1** The monitoring results for AMS6 and AMS7 are reported in the monthly EM&A Reports prepared for Contract Nos. HY/2011/03 and HY/2010/02 respectively.
- 2.3.2** Summary of Action and Limit Level exceedance of 1-hr TSP level and 24-hr TSP level at AMS6 shall be referred to the monthly EM&A report prepared by Contract No. HY/2011/03.
- 2.3.3** There was no Action and Limit Level exceedance of 1-hr TSP level and 24-hr TSP level recorded at station AMS7 by the Environmental Team of Contract No. HY/2010/02 during the reporting period.

3 NOISE MONITORING

3.1 Monitoring Locations

3.1.1 The noise monitoring works for the Contract are covered by Contract No. HY/2010/02 Hong Kong-Zhuhai-Macao Bridge HKBCF – Reclamation Works. The ET of the Contract or another ET of the HZMB project is required to conduct noise monitoring at NMS2 and NMS3B as part of EM&A programme if these monitoring stations are no longer covered under Contract No. HY/2010/02. **Table 3.1** and **Figure 1** shows the locations of noise monitoring stations.

Table 3.1 Construction Noise Monitoring Locations

Identification No.	Location Description
NMS2 ⁽¹⁾	Sea View Crescent
NMS3B ⁽¹⁾⁽²⁾	Site Boundary of Site Office Area at Works Area WA2

Remarks:

- (1) The ET of this Contract should conduct impact noise monitoring at the NMS listed in the table as part of EM&A programme according to latest notification from ENPO when the monitoring station(s) is/are no longer covered by another ET of the HZMB project.
- (2) The Action and Limit Levels for schools will be applied for this alternative monitoring location.

3.2 Monitoring Requirements

3.2.1 The monitoring requirements, monitoring equipment, monitoring parameters, frequency and duration, monitoring methodology, monitoring schedule, meteorological information are detailed in the monthly EM&A Reports prepared for Contract No. HY/2010/02.

3.2.2 The Action and Limit Levels for construction noise are provided in **Table 3.2**

Table 3.2 Action and Limit Levels for Construction Noise

Parameter	Action Level	Limit Level
07:00 – 19:00 hours on normal weekdays	When one documented complaint is received	75 dB(A)*

Notes:

If works are to be carried out during restricted hours, the conditions stipulated in the construction noise permit issued by the Noise Control Authority have to be followed.

* Reduce to 70 dB(A) for schools and 65 dB(A) during school examination period.

3.2.3 The event and action plan is provided in **Appendix D**.

3.2.4 If exceedance(s) at these stations is/are recorded by the ET of the Contract or referred by the other ET under the HZMB project to the Contract, the ET of the Contract will carry out an investigation and findings will be reported in the monthly EM&A Report.

3.3 Monitoring Results

3.3.1 The monitoring results for NMS2 and NMS3B are reported in the monthly EM&A Reports prepared for Contract No. HY/2010/02. There was no exceedance for noise recorded at station NMS2 and station NMS3B by the Environmental Team of Contract No. HY/2010/02 during the reporting period.

4 WATER QUALITY MONITORING

4.1 Monitoring Locations

The water monitoring works for the Contract are covered by Contract No. HY/2010/02 Hong Kong-Zhuhai-Macao Bridge HKBCF – Reclamation Works. The ET of the Contract or another ET of the HZMB project is required to conduct water quality monitoring at fifteen stations (3 Impact Stations, 7 Sensitive Receiver Stations and 5 Control/Far Field Stations) as part of EM&A programme if these monitoring stations are no longer covered under Contract No. HY/2010/02. **Table 4.1** and **Figure 2** shows the locations of water quality monitoring stations.

Table 4.1 Water Quality Monitoring Stations (construction phases)

Station	Description	East	North
IS7	Impact Station (Close to HKBCF construction site)	812244	818777
IS10	Impact Station (Close to HKBCF construction site)	812577	820670
IS(Mf)11	Impact Station (Close to HKBCF construction site)	813562	820716
SR3	Sensitive receivers (San Tau SSSI)	810525	816456
SR4(N)	Sensitive receivers (Tai Ho)	814705	817859
SR5	Sensitive receivers (Artificial Reef in NE Airport)	811489	820455
SR6	Sensitive receivers (Sha Chau and Lung Kwu Chau Marine Park)	805837	821818
SR7	Sensitive receivers (Tai Mo Do)	814293	821431
SR10A ⁽¹⁾	Sensitive receivers (Ma Wan FCZ)1	823741	823495
SR10B(N) ⁽¹⁾	Sensitive receivers (Ma Wan FCZ)2	823683	823187
CS(Mf)3	Control Station	809989	821117
CS(Mf)5	Control Station	817990	821129
CS4	Control Station	810025	824004
CS6	Control Station	817028	823992
CSA ⁽²⁾	Control Station	818103	823064

Note:

(1) Additional monitoring station for Ma Wan FCZ.

(2) Additional control monitoring station for Ma Wan FCZ

Remarks:

The ET of this Contract should conduct impact water quality monitoring at the WQMS listed in the table as part of EM&A programme according to latest notification from ENPO when the monitoring station(s) is/are no longer covered by another ET of the HZMB project. The ET of the Contract shall communicate and share the monitoring data to the ET(s) of other works contracts if the water quality monitoring station(s) is/are as part of EM&A programme.

4.2 Monitoring Requirements

The monitoring requirements, monitoring equipment, monitoring parameters, frequency and duration, monitoring methodology, monitoring schedule, meteorological information are detailed in the monthly EM&A Reports prepared for Contract No. HY/2010/02.

4.2.1 The event and action plan is provided in **Appendix D**.

4.2.2 The Action and Limit Levels for Water Quality are provided in **Table 4.2**

Table 4.2 Action and Limit Levels for Water Quality

Parameters	Action	Limit
DO in mg/L (Surface, Middle & Bottom)	Surface and Middle 5.0 Bottom 4.7	Surface and Middle 4.2 (except 5 mg/L for FCZ) Bottom 3.6
SS in mg/L (depth-averaged) at all monitoring stations and control stations	23.5 and 120% of upstream control station's SS at the same tide of the same day*	34.4 and 130% of upstream control station's SS at the same tide of the same day and 10mg/L for WSD Seawater intakes*
Turbidity in NTU (depth-averaged)	27.5 and 120% of upstream control station's turbidity at the same tide of the same day*	47.0 and 130% of upstream control station's turbidity at the same tide of the same day*

* Remarks: Reference is made to EPD approval of adjustment of water quality assessment criteria issued and became effective on 18 February 2013.

Notes: 1. "depth-averaged" is calculated by taking the arithmetic means of reading of all three depths.

2. For DO, non-compliance of the water quality limits occurs when monitoring result is lower than the limits.

3. For turbidity, SS, non-compliance of the water quality limits occurs when monitoring result is higher than the limits.

4. All the figures given in the table are used for reference only and the EPD may amend the figures whenever it is considered as necessary.

5. The 1%-ile of baseline data for dissolved oxygen (surface and middle) and dissolved oxygen (bottom) are 4.2mg/L and 3.6mg/L respectively.

4.2.3 If exceedance(s) at these stations is/are recorded by the ET of the Contract or referred by the other ET under the HZMB project to the Contract, the ET of the Contract will carry out an investigation and findings will be reported in the monthly EM&A Report.

4.3 Monitoring Result

4.3.1 The monitoring results for the monitoring stations showed in **Table 4.1** are reported in the monthly EM&A Report prepared for Contract No. HY/2010/02. There was one Action Level exceedance of SS at station SR4(N) during mid-flood tide recorded on 14 November 2016, two Action Level exceedances of SS at station IS10 and SR5 and one Limit Level exceedance of SS at station at SR6 during mid-flood tide recorded on 16 November 2016, five Action Level exceedances of SS at station IS(Mf)11, IS10, SR5, SR6 and SR7 during mid-flood tide recorded on 18 November 2016 and two Action Level exceedances of SS at station SR10A and SR10B(N) during mid-flood tide recorded on 30 November 2016.

4.3.2 Exceedances were not due to operation of the works under Contract No. HY/2013/02 because there was no marine works or barge of this Contract worked at HKBCF reclamation site during November 2016. Therefore, it is unlikely that the SS exceedances recorded on 14, 16, 18 and 30 November 2016 during mid-flood tide was contributed by the works under Contract No. HY/2013/02. The water quality mitigation measures as mentioned in EM&A Manual and EP was fully implemented in this Contract which including maintenance of the silt curtain on a daily basis etc. Hence, the exceedance was considered as non-Project related.

4.3.3 After investigation, there was concluded that the exceedance was not relevant to this Contract due to the above mentioned reasons. The Investigation Reports No. 007, 008, 009 and 010 (including the causes of exceedance, action taken and recommendation for mitigation) for Action or Limit Level Non-compliance were provided in **Appendix J**. There was no Action and Limit Level exceedance on other monitoring date was recorded by the Environmental Team of Contract No. HY/2010/02 during the reporting period.

4.3.4 Although the exceedance was not relevant to this Contract, the contractor was reminded to ensure provision of ongoing maintenance to the silt curtains and to carry out maintenance work once defects were found.

5 DOLPHIN MONITORING

5.1 Monitoring Locations

The dolphin monitoring works for the Contract are covered by Contract No. HY/2010/02 Hong Kong-Zhuhai-Macao Bridge HKBCF – Reclamation Works. The ET of the Contract or another ET of the HZMB project is required to conduct dolphin monitoring at 23 transects as part of EM&A programme if these transects are no longer covered under Contract No. HY/2010/02. The dolphin monitoring should adopt line-transect vessel survey method. The survey follows pre-set and fixed transect lines in the two areas defined by AFCD as: Northeast Lantau survey area; and Northwest Lantau survey area. **Figure 3** shows the co-ordinates for the transect lines and layout map.

Remarks:

The ET of this Contract should conduct impact dolphin monitoring as part of EM&A programme according to latest notification from ENPO when the monitoring transect(s) is/are no longer covered by another ET of the HZMB project.

5.2 Monitoring Requirements

The monitoring requirements, monitoring equipment, monitoring parameters, frequency and duration, monitoring methodology, monitoring schedule, meteorological information are detailed in the monthly EM&A Reports prepared for Contract Nos. HY/2010/02.

5.2.1 The event and action plan is provided in **Appendix D**.

5.2.2 The Action and Limit Levels for Chinese White Dolphin Monitoring are provided in **Table 5.1a & Table 5.1b**

Table 5.1a Action and Limit Levels for Chinese White Dolphin Monitoring – Approach to Define Action Level (AL) and Limit Level (LL)

	North Lantau Social Cluster	
	NEL	NWL
Action Level	(STG < 70% of baseline) & (ANI < 70% of baseline)	(STG < 70% of baseline) & (ANI < 70% of baseline)
Limit Level	[(STG < 40% of baseline) & (ANI < 40% of baseline)] AND [(STG < 40% of baseline) & (ANI < 40% of baseline)]	

For North Lantau Social Cluster, action level will be trigger if either NEL or NWL fall below the criteria; limit level will be triggered if both NEL and NWL fall below the criteria.

Table 5.1b Derived Value of Action Level (AL) and Limit Level (LL) for Chinese White Dolphin Monitoring

	North Lantau Social Cluster	
	NEL	NWL
Action Level	(STG < 4.2) & (ANI < 15.5)	(STG < 6.9) & (ANI < 31.3)
Limit Level	[(STG < 2.4) & (ANI < 8.9)] AND [(STG < 3.9) & (ANI < 17.9)]	

5.2.3 If exceedance(s) at these transects is/are recorded by the ET of the Contract or referred by the other ET under the HZMB project to the Contract, the ET of the Contract will carry out an investigation and findings will be reported in the monthly EM&A Report.

5.3 Monitoring Result

The dolphin survey results for all transects are reported in the monthly EM&A Reports prepared for Contract No. HY/2010/02.

6 ENVIRONMENTAL SITE INSPECTION AND AUDIT

6.1 Site Inspection

6.1.1 Site Inspections were carried out on a weekly basis to monitor the implementation of proper environmental pollution control mitigation measures for the project. During the reporting period, site inspections were carried out on 03, 10, 17 & 24 November 2016.

6.1.2 Particular observations during the site inspections are described below:

27 October 2016

- (a) Oil contaminated soil was observed at Portion C. Oil contaminated soil was removed at Portion C. The observation was closed on 03 November 2016.
- (b) Oil container without drip tray was observed at Portion C. The drip tray was provided at Portion C. The observation was closed on 03 November 2016.

03 November 2016

- (a) C & D wastes were observed at Portion C. C & D wastes were collected at Portion C. The observation was closed on 10 November 2016.
- (b) Oil containers without drip tray were observed at Portion C. Drip tray was provided for the oil containers at Portion C. The observation was closed on 10 November 2016.

10 November 2016

- (a) Damaged NRMM label on generator was observed at Portion D. NRMM label on generator was repaired at Portion D. The observation was closed on 17 November 2016.
- (b) C & D materials were observed at Portion D. C & D materials were collected at Portion D. The observation was closed on 17 November 2016.

17 November 2016

- (a) General refuse was observed on bridge surface at Portion D. The general refuse was collected on bridge surface at Portion D. The observation was closed on 24 November 2016.
- (b) Stagnant water was observed on bridge deck surface at Portion D. Stagnant water was cleared on bridge deck surface at Portion D. The observation was closed on 24 November 2016.
- (c) General refuse was observed at Portion D. The general refuse was collected at Portion D. The observation was closed on 24 November 2016.

24 November 2016

- (a) No label for temporary storage of C & D wastes was observed at Portion A. Follow-actions for outstanding observation will be inspected during the next site inspection.

6.2 Advice on the Solid and Liquid Waste Management Status

6.2.1 The Contractor registered as a chemical waste producer for the Contract. Sufficient numbers of receptacles were available for general refuse collection and sorting.

6.2.2 2990 m³ of excavated marine sediment was generated in this reporting period. The excavated marine sediment was stored properly on site during this reporting period until further instruction by the Engineer. The disposal of excavated sediment as per EP-353/2009/K to be implemented subject to confirmation.

6.2.3 Disposal of Marine Sediment

6.2.3.1 For the marine sediment disposal, after the acceptance of the review of the approved Sediment Quality Report (SQR) for this Project under EPD letter dated 19 August 2015, an approval to dispose the marine sediment extracted from bored piling for this Project was then approved under memo from Secretary, Marine Fill Committee of CEDD dated 20 August 2015 for the disposal of marine sediment extracted from bored piling works. The disposal sites allocated to this Project are the Mud Pit CMP2 of the Confined Marine Sediment Disposal Facility to the South of The Brothers (or at the East of Sha

Chau). As advised by CEDD in the memo dated 19 February 2016, from 00:00 on 22 March 2016 onward, the disposal space at CMP2 of the South of The Brothers is closed and all disposal of contaminated sediment is to be carried out at CMP Vd to the East of Sha Chau (ESC). As a practical means, the disposal operation is managed by one contractor who is also responsible for applying dumping permit and its subsequent extension applications from EPD. Contract No. HY/2013/03 has been assigned to coordinate and arrange for disposal of extracted marine sediment from Contract No. HY/2013/02, HY/2013/03 and HY/2013/04.

- 6.2.3.2** For the dumping arrangement, the barge for disposal of marine sediment will moor at the temporary loading and unloading at the east shore of the HKBCF Island, which has been being used by contractor Contract No. HY/2010/02 for reclamation activities. In terms of safety consideration and to avoid mixing of sediment between contracts, each dumping date will be allocated to one Contract. The quantity of marine sediment disposed on each date is from one Contract.
- 6.2.3.3** During dumping, HY/2013/02 is responsible for transporting the marine sediment from his site area to the barge by Land transportation. The estimated quantity of marine sediment in each truck is confirmed by Resident Site Staff of each Contract. The trip tickets for transportation and disposal of marine sediment are collected and checked. Contract No. HY/2013/03 as the dumping permit holder is responsible for reporting to EPD the quantity disposed of as the condition stipulated in the dumping permit.
- 6.2.4** There was no marine sediment extracted from bored piling in this Contract disposed to allocated dumping site via Contract No. HY/2013/03 in this reporting period. The quantity disposed up to end of November 2016 was 16952 m³. The Monthly Summary of Marine sediment disposed to dumping site was provided in **Appendix E** and **Table 6.1**.

Table 6.1 Summary of marine sediment disposed to dumping site via Contract No. HY/2013/03

Month/Year	Quantity disposed (m ³)
January 2016	1272
February 2016	2816
March 2016	600
April 2016	5128
May 2016	0
June 2016	1200
July 2016	728
August 2016	1784
September 2016	2328
October 2016	1096
November 2016	0
Total =	16952

- 6.2.5** The Contractor shall ensure no spilling and overflowing of materials during loading / unloading / transportation is allowed.
- 6.2.6** The monthly summary of waste flow table is detailed in **Appendix E**.
- 6.2.7** The Contractor was reminded that chemical waste containers should be properly treated and stored temporarily in designated chemical waste storage area on site in accordance with the Code of Practice on the Packing, Labelling and Storage of Chemical Waste.
- 6.3 Environmental Licenses and Permits**
- The valid environmental licenses and permits during the reporting period are summarized in **Appendix F**.
- 6.4 Implementation Status of Environmental Mitigation Measures**
- 6.4.1** In response to the site audit findings, the Contractor carried out corrective actions.

- 6.4.2 The Contractor waters 8 times per day on all exposed soil within the project site and associated works areas when construction activities are being undertaken.
- 6.4.3 The Contractor was reminded to provide well-maintained plant operated on-site and plant served regularly;
- 6.4.4 The Contractor was reminded to switch off vehicles and equipment while not in use;
- 6.4.5 The Contractor was reminded to schedule the construction works to minimize noise nuisance etc.
- 6.4.6 The implementation status of Regular Marine Travel Route Plan (RMTRP) was checked by ET. Training material of Regular Marine Travel Route Plan was prepared and given to relevant staff. Those records were kept properly. Since the marine delivery of precast segments was commenced and the RMTRP training was provided for the Captain on 21 July 2016, the Captain was reminded to use regular travel routes in order to minimize the chance of vessel collision and the routes would not go through the dolphin hotspot in Brothers Islands. The marine traffic records and geographical plots of all the vessels tracks to demonstrate the conformance of the vessel to the proposed route in November 2016 would be provided to ER, ETL, IEC/ENPO for checking within the month of December 2016.
- 6.4.7 The tool box training of dolphin was carried out in Dec 2015. According to the action plan and communication flow chart of dolphin instruction, if any dolphin intruded BCF perimeter silt curtain, ETL should be informed. There was no notification received on any dolphin intrusion during the reporting period.
- 6.4.8 A summary of the implementation Schedule of Environmental Mitigation Measures (EMIS) is presented in **Appendix G**. Most of the necessary mitigation measures were implemented properly.
- 6.5 Summary of Exceedance of the Environmental Quality Performance Limit**
- 6.5.1 Summary of Action and Limit Level exceedance of 1-hr TSP level and 24-hr TSP level at AMS6 shall be referred to the monthly EM&A report prepared by Contract No. HY/2011/03.
- 6.5.2 There was no Action and Limit Level exceedance of 1-hr TSP level and 24-hr TSP level recorded at station AMS7 by the Environmental Team of Contract No. HY/2010/02 during the reporting period.
- 6.5.3 There was no Action and Limit Level exceedance for noise recorded at station NMS2 and station NMS3B by the Environmental Team of Contract No. HY/2010/02 during the reporting period.
- 6.5.4 There was one Action Level exceedance of SS at station SR4(N) during mid-flood tide recorded on 14 November 2016, two Action Level exceedances of SS at station IS10 and SR5 and one Limit Level exceedance of SS at station at SR6 during mid-flood tide recorded on 16 November 2016, five Action Level exceedances of SS at station IS(Mf)11, IS10, SR5, SR6 and SR7 during mid-flood tide recorded on 18 November 2016 and two Action Level exceedances of SS at station SR10A and SR10B(N) during mid-flood tide recorded on 30 November 2016. After investigation, there was concluded that the exceedances were not relevant to this Contract since there was no marine works carried out by this Contract during November 2016. Therefore, it is unlikely that the SS exceedances recorded on 14, 16, 18 and 30 November 2016 were contributed by the works under Contract No. HY/2013/02. There was no Action and Limit Level exceedance recorded on other monitoring date at the monitoring stations showed at **Table 4.1** by the Environmental Team of Contract No. HY/2010/02 during the reporting period.
- 6.5.5 Impact dolphin monitoring results at all transects are reported in the EM&A Reports prepared for Contract No. HY/2010/02.
- 6.6 Summary of Complaints, Notification of Summons and Successful Prosecution**
- 6.6.1 There was a complaint received by EPD from public on 09 November 2016 and forwarded by EPD to the ENPO on 09 November 2016. Then the ENPO forwarded the complaint by email to the R.E.

(AECOM), the Contractor (China Harbour) and the ET (ETS-Testconsult Ltd.) of Contract No. HY/2013/02 at 14:52 on 10 November 2016. The complainant complained that an engineering works vessel named “長盛 308” travelled from Hong Kong – Zhuhai – Macao Bridge near Scenic Hill Site to the coast towards Tung Chung Pier together with muddy water at 09:26 on 07 November 2016. The above mentioned complaint follow-up inspection was performed by the ET of Contract No. HY/2013/02 on 10 November 2016. The complaint investigation report (Log No. 005) was issued by the ET of Contract No. HY/2013/02 and verified by the IEC/ENPO on 15 November 2016.

- 6.6.2. According to the investigation, there was no any marine works carried out on 07 November 2016 by Contract No. HY/2013/02. The complaint was found non-related to Contract No. HY/2013/02. The complaint investigation report (Log No. 005) was provided in **Appendix K**.
- 6.6.3. Although this complaint was non-related to Contract No. HY/2013/02, the Contractor of Contract No. HY/2013/02 was reminded to provide appropriate water pollution mitigation measures for the marine working vessels during any marine works, such as remind all Captains of the vessels to avoid arranging vessels to travel in the area during low tide or discharge waste water to the sea etc.
- 6.6.4 There were no notifications of summons or prosecutions received during the reporting period.
- 6.6.5 Statistics on environmental complaints, notifications of summons and successful prosecutions are summarized in **Appendix H**.

7 FUTURE KEY ISSUES

7.1 Construction Programme for the Coming Months

- 7.1.1 As informed by the Contractor, the major construction activities for December 2016 are summarized in **Table 7.1**.

Table 7.1 Construction Activities for Coming Month

Site Area	Description of Activities
Portion C & F	Bored Piles Works
	Pier / Abutment
	Pile Cap
Portion D	Pre-bored H-pile for sign gantries
Portion D, A, E, C & F	Marine delivery of precast segment & Construction of bridge deck
	Footing construction of directional signs and dust laying
	Storm drain and water main construction
	Retaining wall, slop and earth works
	Marine sediment excavation activities from the land-based works and corresponding disposal at the designated disposal sites

7.2 Environmental Site Inspection Schedule for the Coming Month

- 7.2.1 The tentative schedule for weekly site inspections for December 2016 is provided in **Appendix I**.

8 CONCLUSION

8.1 Conclusions

- 8.1.1 The site preparation work of the Contract was started on 25 July 2014 and the construction works of the Contract commenced on 24 November 2014.
- 8.1.2 Summary of Action and Limit Level exceedance of 1-hr TSP level and 24-hr TSP level at AMS6 shall be referred to the monthly EM&A report prepared by Contract No. HY/2011/03.

- 8.1.3 There was no Action and Limit Level exceedance of 1-hr TSP level and 24-hr TSP level recorded at station AMS7 by the Environmental Team of Contract No. HY/2010/02 during the reporting period.
- 8.1.4 There was no Action and Limit Level exceedance for noise recorded at station NMS2 and station NMS3B by the Environmental Team of Contract No. HY/2010/02 during the reporting period.
- 8.1.5 There was one Action Level exceedance of SS at station SR4(N) during mid-flood tide recorded on 14 November 2016, two Action Level exceedances of SS at station IS10 and SR5 and one Limit Level exceedance of SS at station at SR6 during mid-flood tide recorded on 16 November 2016, five Action Level exceedances of SS at station IS(Mf)11, IS10, SR5, SR6 and SR7 during mid-flood tide recorded on 18 November 2016 and two Action Level exceedances of SS at station SR10A and SR10B(N) during mid-flood tide recorded on 30 November 2016. After investigation, there was concluded that the exceedances were not relevant to this Contract since there was no marine works carried out by this Contract during November 2016. Therefore, it is unlikely that the SS exceedances recorded on 14, 16, 18 and 30 November 2016 were contributed by the works under Contract No. HY/2013/02. There was no Action and Limit Level exceedance recorded on other monitoring date at the monitoring stations showed at **Table 4.1** by the Environmental Team of Contract No. HY/2010/02 during the reporting period. The Investigation Reports No. 007, 008, 009 and 010 (including the causes of exceedance, action taken and recommendation for mitigation) for Action or Limit Level Non-compliance were provided in **Appendix J**. Although the exceedances were not relevant to this Contract, the Contractor was reminded to ensure provision of ongoing maintenance to the silt curtains and to carry out maintenance work once defects were found.
- 8.1.6 Impact dolphin monitoring results at all transects are reported in the EM&A Reports prepared for Contract No. HY/2010/02.
- 8.1.7 There was a complaint received by EPD from public on 09 November 2016 and forwarded by EPD to the ENPO on 09 November 2016. Then the ENPO forwarded the complaint by email to the R.E. (AECOM), the Contractor (China Harbour) and the ET (ETS-Testconsult Ltd.) of Contract No. HY/2013/02 at 14:52 on 10 November 2016. The complainant complained that an engineering works vessel named “長盛 308” travelled from Hong Kong – Zhuhai – Macao Bridge near Scenic Hill Site to the coast towards Tung Chung Pier together with muddy water at 09:26 on 07 November 2016. After the investigation, the complaint was found non-related to Contract No. HY/2013/02.
- 8.1.8 There were no notifications of summons or prosecutions received during the reporting period.

Remarks:

*Transect 10 is now 3.6km in length due to the HKBCF construction site.

^Coordinates for transect lines 1, 2, 7, 8, 9 and 11 have been updated in respect to the Proposal for Alteration of Transect Line for Dolphin Monitoring approved by EPD on 19 August 2015. The total transect length for both NEI and NWL combined is 108km.

Oct	0	0	0	0	0	0.666	0	0	0	0	0.0650	
Nov	0	0	0	0	0	5.359	0	0.18	7.55	0	0.0715	
Dec												
Total	0	0	0	0	0	31.244	6.326	0.6985	16.3	0	0.5330	

Notes:

(1) The waste flow table shall also include C&D materials that are specified in the Contract to be imported for use at the Site.

(2) Plastics refer to plastic bottles/containers, plastic sheets/ foam from packaging materials.

(3) Broken concrete for recycling into aggregates.

Monthly Summary of Marine Sediment for 2016

Month	a. Volume of Marine Sediment Generated (m ³)	b. Volume of Marine Sediment Disposed (m ³)	c. Estimated Volume of Marine Sediment Stored on Site (m ³) ⁽²⁾
Jan	4029 ⁽¹⁾	1272	2757
Feb	1133	2816	1074
Mar	414	600	888
Apr	4240	5128	0
May	1020	0	1020
Jun	1097	1200	917
Jul	957	728	1146
Aug	953	1784	315
Sep	2013	2328	0
Oct	1096	1096	0
Nov	2990	0	2990
Dec			
Total	19942	16952	2990

Note:

(1) 2771 m³ Marine Sediment Generated has been brought forward from previous year

(2) c = (c in previous month + a - b)

10	Construction Noise Permit under NCO for HKBCF (Western Portion)	License No.: GW-RS1125-16	25 Oct 2016	10 Nov 2016	11 Apr 2017	Permit approved

Appendix G

Implementation Schedule for Environmental Mitigation Measures (EMIS)

Environmental Mitigation Implementation Schedule – Hong Kong Boundary Crossing Facilities (Superstructures and Infrastructures)

EIA Ref.	EM&A Log Ref	Environmental Mitigation Measures	Objectives of the Recommended Measures & Main Concerns to address	Who to implement the measures?	Location	When to implement the measures?	What requirements or standards for the measure to achieve?	Implementation Status
Air Quality								
S5.5.6.1 of HKBCFEIA	A1	1) The contractor shall follow the procedures and requirements given in the Air Pollution Control (Construction Dust) Regulation	Good construction site practices to control the dust impact at the nearby sensitive receivers to within the relevant criteria	Contractor	All construction sites	Construction stage	To control the dust impact to within the HKAQO and TM-EIA criteria(Ref. 1-hr and 24 hr TSP levels are $500\mu\text{g}\text{m}^{-3}$ and $260\mu\text{g}\text{m}^{-3}$ respectively)	V
S5.5.6.2 of HKBCFEIA and S4.8.1 of TKCLKLEIA	A2	2) Proper watering of exposed spoil should be undertaken throughout the construction phase: Any excavated or stockpile of dusty material should be covered entirely by impervious sheeting or sprayed with water to maintain the entire surface wet and then removed or backfilled or reinstated where practicable within 24 hours of the excavation or unloading; Any dusty materials remaining after a stockpile is removed should be wetted with water and cleared from the surface of roads; A stockpile of dusty material should not be extended beyond the pedestrian barriers, fencing or traffic cones. Where practicable, vehicle washing facilities with high pressure water jet should be provided at every discernible or designated vehicle exit point. The area where vehicle washing takes place and the road section between the washing facilities and the exit point should be paved with concrete, bituminous materials or hardcores; When there are open excavation and reinstatement works, hoarding of not less than 2.4m high should be provided as far as practicable along the site boundary with provision for public crossing. Good site practice shall also be adopted by the Contractor to ensure	Good construction site practices to control the dust impact at the nearby sensitive receivers to within the relevant criteria	Contractor	All construction sites	Construction stage	To control the dust impact to within the HKAQO and TM-EIA criteria(Ref. 1-hr and 24 hr TSP levels are $500\mu\text{g}\text{m}^{-3}$ and $260\mu\text{g}\text{m}^{-3}$ respectively)	V

EIA Ref.	EM&A Log Ref.	Environmental Mitigation Measures	Objectives of the Recommended Measures & Main Concerns to address	Who to implement the measures?	Location	When to implement the measures?	What requirements or standards for the measure to achieve?	Implementation Status
		<p>the conditions of the hoardings are properly maintained throughout the construction period;</p> <p>The portion of any road leading only to construction site that is within 30m of a vehicle entrance or exit should be kept clear of dusty materials;</p> <p>Surfaces where any pneumatic or power-driven drilling, cutting, polishing or other mechanical breaking operation takes place should be sprayed with water or a dust suppression chemical continuously;</p> <p>Any area that involves demolition activities should be sprayed with water or a dust suppression chemical immediately prior to, during and immediately after the activities so as to maintain the entire surface wet;</p> <p>Where a scaffolding is erected around the perimeter of a building under construction, effective dust screens, sheeting or netting should be provided to enclose the scaffolding from the ground floor level of the building, or a canopy should be provided from the first floor level up to the highest level of the scaffolding;</p> <p>Any skip hoist for material transport should be totally enclosed by impervious sheeting;</p> <p>Every stock of more than 20 bags of cement or dry pulverised fuel ash (PFA) should be covered entirely by impervious sheeting or placed in an area sheltered on the top and the 3 sides;</p> <p>Cement or dry PFA delivered in bulk should be stored in a closed silo fitted with an audible high level alarm which is interlocked with the material filling</p>						

EIA Ref.	EM&A Log Ref	Environmental Mitigation Measures	Objectives of the Recommended Measures & Main Concerns to address	Who to implement the measures?	Location	When to implement the measures?	What requirements or standards for the measure to achieve?	Implementation Status
		<p>line and no overfilling is allowed;</p> <p>Loading, unloading, transfer, handling or storage of bulk cement or dry PFA should be carried out in a totally enclosed system or facility, and any vent or exhaust should be fitted with an effective fabric filter or equivalent air pollution control system; and</p> <p>Exposed earth should be properly treated by compaction, turfing, hydroseeding, vegetation planting or sealing with latex, vinyl, bitumen, shotcrete or other suitable surface stabiliser within six months after the last construction activity on the construction site or part of the construction site where the exposed earth lies.</p>						
S5.5.6.3 of HKBCFEIA and S4.8.1 of TKCLKLEIA	A3	3) The Contractor should undertake proper watering on all exposed spoil and associated work areas (with at least 8 times per day) throughout the construction phase.	Control construction dust	Contractor	All construction sites	Construction stage	To control the dust impact	V
S5.5.6.4 of HKBCFEIA	A4	4) Engineer to incorporate the controlled measures into the Particular Specification (PS) for the civil work. The PS should also draw the contractor's attention to relevant latest Practice notes issued by EPD.	Control construction dust	Engineer	All construction sites	Design Stage	Air pollution Control (Construction Dust) Regulation	V
S5.5.6.4 of HKBCFEIA and S4.11 of TKCLKLEIA	A5	5) Implement regular dust monitoring under EM&A programme during the construction stage.	Monitor the 24hr and 1hr TSP levels at the representative dust monitoring stations to ensure compliance with relevant criteria throughout the construction period.	referred by the other ET under the project to the Contract	Selected representative dust monitoring station	Construction stage	<ul style="list-style-type: none"> - Air Pollution Control (Construction Dust) Regulation - To control the dust impact to within the HKAQO and TM-EIA criteria (Ref. 1-hr and 24 hr TSP levels are 500$\mu\text{g}/\text{m}^3$ and 260$\mu\text{g}/\text{m}^3$ respectively) 	V

EIA Ref.	EM&A Log Ref	Environmental Mitigation Measures	Objectives of the Recommended Measures & Main Concerns to address	Who to implement the measures?	Location	When to implement the measures?	What requirements or standards for the measure to achieve?	Implementation Status
S5.5.7.1 of HKBCFEIA	A6	<p>The following mitigation measures should be adopted to prevent fugitive dust emissions for concrete batching plant:</p> <p>Loading, unloading, handling, transfer or storage of any dusty materials should be carried out in totally enclosed system;</p> <p>All dust-laden air or waste gas generated by the process operations should be properly extracted and vented to fabric filtering system to meet the emission limits for TSP;</p> <p>Vents for all silos and cement/ pulverised fuel ash (PFA) weighing scale should be fitted with fabric filtering system;</p> <p>The materials which may generate airborne dusty emissions should be wetted by water spray system;</p> <p>All receiving hoppers should be enclosed on three sides up to 3m above unloading point;</p> <p>All conveyor transfer points should be totally enclosed;</p> <p>All access and route roads within the premises should be paved and wetted; and</p> <p>Vehicle cleaning facilities should be provided and used by all concrete trucks before leaving the premises to wash off any dust on the wheels and/or body.</p>	<p>Monitor the 24hr and 1hr TSP levels at the representative dust monitoring stations to ensure compliance with relevant criteria throughout the construction period.</p>	Contractor	Selected representative dust monitoring station	Construction stage	<p>Air Pollution Control (Construction Dust) Regulation</p> <p>- To control the dust impact to within the HKAQO and TM-EIA criteria(Ref. 1-hr and 24 hr TSP levels are 500$\mu\text{g}/\text{m}^3$ and 260$\mu\text{g}/\text{m}^3$ respectively)</p>	N/A

EIA Ref.	EM&A Log Ref	Environmental Mitigation Measures	Objectives of the Recommended Measures & Main Concerns to address	Who to implement the measures?	Location	When to implement the measures?	What requirements or standards for the measure to achieve?	Implementation Status
S5.5.2.7 of HKBCFEIA	A7	<p>The following mitigation measures should be adopted to prevent fugitive dust emissions at barging point:</p> <p>All road surface within the barging facilities will be paved;</p> <p>Dust enclosures will be provided for the loading ramp.</p> <p>Vehicles will be required to pass through designated wheels wash facilities; and</p> <p>Continuous water spray at the loading points.</p>	Control construction dust	Contractor	All construction sites	Construction stage	Air Pollution Control (Construction Dust) Regulation	N/A (Construction in process)
Construction Noise (Air borne)								
S6.4.10 of HKBCFEIA	N1	<p>1) Use of good site practices to limit noise emissions by considering the following:</p> <p>only well-maintained plant should be operated on-site and plant should be serviced regularly during the construction programme;</p> <p>machines and plant (such as trucks, cranes) that may be in intermittent use should be shut down between work periods or should be throttled down to a minimum;</p> <p>plant known to emit noise strongly in one direction, where possible, be orientated so that the noise is directed away from nearby NSRs;</p> <p>silencers or mufflers on construction equipment should be properly fitted and maintained during the construction works;</p>	Control construction airborne noise by means of good site practices	Contractor	All construction sites	Construction stage	Noise Control Ordinance	V

EIA Ref.	EM&A Log Ref	Environmental Mitigation Measures	Objectives of the Recommended Measures & Main Concerns to address	Who to implement the measures?	Location	When to implement the measures?	What requirements or standards for the measure to achieve?	Implementation Status
		mobile plant should be sited as far away from NSRs as possible and practicable; material stockpiles, mobile container site officer and other structures should be effectively utilised, where practicable, to screen noise from on-site construction activities.						
S6.4.11 of HKBCFEIA	N2	2) Install temporary hoarding located on the site boundaries between noisy construction activities and NSRs. The conditions of the hoardings shall be properly maintained throughout the construction period.	Reduce the construction noise levels at low-level zone of NSRs through partial screening	Contractor	All construction sites	Construction stage	<ul style="list-style-type: none"> - Noise Control Ordinance Annex 5, TM_EIA 	V
S6.4.12 of HKBCFEIA	N3	3) Install movable noise barriers (typically density 14kg/m ²), acoustic mat or full enclosure close to noisy plants including air compressor, generators, saw.	Screen the noisy plant items to be used at all construction sites	Contractor	For plant items listed in Appendix 6D of the EIA report at all construction sites	Construction stage	<ul style="list-style-type: none"> - Noise Control Ordinance Annex 5, TM_EIA - 75dB(A) for residential premises - The movable barrier should achieve at least 5 dB(A) and the full enclosure should be designed to achieve 10dB(A) 	N/A
S6.4.13 of HKBCFEIA	N4	4) Select "Quiet plants" which comply with the BS 5228 Part 1 or TM standards.	Reduce the noise levels of plant items	Contractor	For plant items listed In Appendix 6D of the EIA report at all construction sites	Construction stage	<ul style="list-style-type: none"> - Noise Control Ordinance Annex 5, TM_EIA 	V
S6.4.14 of HKBCFEIA	N5	5) Sequencing operation of construction plants where practicable.	Operate sequentially within the same work site to reduce the construction airborne noise	Contractor	All construction sites where practicable	Construction stage	<ul style="list-style-type: none"> - Noise Control Ordinance Annex 5, TM_EIA 	V

EIA Ref.	EM&A Log Ref	Environmental Mitigation Measures	Objectives of the Recommended Measures & Main Concerns to address	Who to implement the measures?	Location	When to implement the measures?	What requirements or standards for the measure to achieve?	Implementation Status
S5.1 of TMCLKLEIA	N6	6) Implement a noise monitoring under EM&A programme.	Monitor the construction noise levels at selected representative locations	Referred by the other ET under the HZMB project to the Contract.	Selected representative noise monitoring station	Construction stage	<ul style="list-style-type: none"> - Noise Control Ordinance Annex 5, TM_EIA - 75dB(A) for residential premises 	V
Sediment								
S7.3	S1	1) The requirements as recommended in ETWB TC 34/2002 Management of Dredged/Excavated Sediment shall be included in the Particular Specification as appropriate.	Develop sediment disposal arrangement	Engineer	All construction site areas	Design stage	<ul style="list-style-type: none"> - Waste Disposal Ordinance ETWB TC 34/2002 	V
	S2	Before re-deposition the contaminated sediment, a layer of geotextile shall be placed at the bottom of the sheet pile cellular structures to avoid direct contact of the contaminated sediment and the bottom sediment.	Develop sediment disposal arrangement	Engineer	All construction site areas	Design stage	<ul style="list-style-type: none"> - Waste Disposal Ordinance ETWB TC 34/2002 	V
	S3	A minimum of 2m thick sand fill or public fill shall be placed on top of the contaminated sediment to protect and cover the sediment after redeposition.	Develop sediment disposal arrangement	Engineer	All construction site areas	Design stage	<ul style="list-style-type: none"> - Waste Disposal Ordinance ETWB TC 34/2002 	V
	S4	The contaminated sediment shall not be disturbed after re-deposition. No piling works or deep foundation which may disturb the contaminated sediment is allowed within the cellular structures.	Develop sediment disposal arrangement	Engineer	All construction site areas	Design stage	<ul style="list-style-type: none"> - Waste Disposal Ordinance ETWB TC 34/2002 	V

EIA Ref.	EM&A Log Ref	Environmental Mitigation Measures	Objectives of the Recommended Measures & Main Concerns to address	Who to implement the measures?	Location	When to implement the measures?	What requirements or standards for the measure to achieve?	Implementation Status
Waste management (Construction Waste)								
S12.6 of TMCLKLEIA	WM1	The Contractor shall identify a coordinator for the management of waste.	Proper implementation of WMP	Contractor	Contractor All construction sites	Construction stage		V
S12.6 of TMCLKLEIA	WM2	The Contractor shall apply for and obtain the appropriate licenses for the disposal of public fill, chemical waste and effluent discharges.	Proper control of wastes disposal in accordance to relevant ordinances	Contractor	All construction sites	Construction Stage	<ul style="list-style-type: none"> - Land (Miscellaneous Provisions) - Ordinance (Cap28); - Waste Disposal Ordinance (Cap 354); - Dumping at Sea Ordinance (Cap 466); - Water Pollution Control Ordinance. 	V
S12.6 of TMCLKLEIA	WM3	EM&A of waste handling, storage, transportation, disposal procedures and documentation through the site audit programme shall be undertaken.	Ensure proper implementation mitigation measures stated in WMP	Contractor	All construction sites		Construction stage	V
S8.3.8 of HKBCFEIA and S12.6 of TMCLKLEIA	WM4	<u>Construction and Demolition Material</u> The following mitigation measures should be implemented in handling the waste: Maintain temporary stockpiles and reuse excavated fill material for backfilling and reinstatement; Carry out on-site sorting;	Good site practice to minimize and recycle the C&D material as far as practicable so as to reduce the amount for final disposal	Contractor	All construction site areas	Construction stage	<ul style="list-style-type: none"> - Land (Miscellaneous Provisions) - Ordinance - Waste Disposal Ordinance - ETWB TC 19/2005 	V

EIA Ref.	EM&A Log Ref	Environmental Mitigation Measures	Objectives of the Recommended Measures & Main Concerns to address	Who to implement the measures?	Location	When to implement the measures?	What requirements or standards for the measure to achieve?	Implementation Status
		<p>Make provisions in the Contract documents to allow and promote the use of recycled aggregates where appropriate;</p> <p>Adopt 'Selective Demolition' technique to demolish the existing structures and facilities with a view to recovering broken concrete effectively for recycling purpose, where possible;</p> <p>Implement a trip-ticket system for each works contract to ensure that the disposal of C&D materials are properly documented and verified;</p> <p>Implement an enhanced Waste Management Plan similar to ETWBTC (Works) No. 19/2005 – "Environmental Management on Construction Sites" to encourage on-site sorting of C&D materials and to minimize their generation during the course of construction;</p> <p>In addition, disposal of the C&D materials onto any sensitive locations such as agricultural lands, etc. should be avoided. The Contractor shall propose the final disposal sites to the Project Proponent and get its approval before implementation;</p> <p>The surplus surcharge should be transferred to a fill bank.</p>						
S8.3.9 - S8.3.11 of HKBCFEIA and S12.6 of TMCLKLEIA	WM5	<p><u>C&D Waste</u></p> <p>Standard formwork or pre-fabrication should be used as far as practicable in order to minimise the arising of C&D materials. The use of more durable formwork or plastic facing for the construction works should be considered. Use of wooden hoardings should not be used, as in other projects.</p> <p>Metal hoarding and falsework should be used to enhance the possibility of</p>	<p>Good site practice to minimize and recycle the C&D material as far as practicable so as to reduce the amount for final disposal</p>	Contractor	All construction sites	Construction stage	<ul style="list-style-type: none"> - Land (Miscellaneous Provisions) Ordinance - Waste Disposal Ordinance - ETWB TC 19/2005 	V

EIA Ref.	EM&A Log Ref	Environmental Mitigation Measures	Objectives of the Recommended Measures & Main Concerns to address	Who to implement the measures?	Location	When to implement the measures?	What requirements or standards for the measure to achieve?	Implementation Status
		<p>recycling. The purchasing of construction materials will be carefully planned in order to avoid over ordering and wastage.</p> <p>The Contractor should recycle as much of the C&D materials as possible on-site. Public fill and C&D waste should be segregated and stored in different containers or skips to enhance reuse or recycling of materials and their proper disposal. Where practicable, concrete and masonry can be crushed and used as fill. Steel reinforcement bar can be used by scrap steel mills. Different areas of the sites should be considered for such segregation and storage.</p>

		<p>Sufficient dustbins shall be provided for storage of waste as required under the Public Cleansing and Prevention of Nuisances By-laws. In addition, general refuse shall be cleared daily and shall be disposed of to the nearest licensed landfill or refuse transfer station.</p> <p>All waste containers shall be in a secure area on hardstanding.</p>						
Water Quality (Construction Phase)								
	W1	<p>Mitigation during the marine works to reduce impacts to within acceptable levels have been recommended and will comprise a series of measures that restrict the method and sequencing of dredging/backfilling, as well as protection measures. Details of the measures are provided below:</p> <p>No dredging works of marine sediment shall be carried out the Project except for the construction of box culverts and seawalls at Portion D.</p> <p>Reclamation filling for the Project shall not proceed until at least 200m of leading seawall at the reclamation area formed above +2.2mPD, unless otherwise agreement was obtained from EPD, except for the 300m gaps for marine access. All underwater filling works shall be carried out behind seawalls to avoid dispersion of suspended solids outside the Project limit;</p> <p>Except for the filling of the cellular structures, not more than 15% public fill shall be used for reclamation filling below +2.5mPD during construction of the seawall;</p> <p>After the seawall is completed except for</p>	To control construction water quality	Contractor	During dredging and filling	Construction stage	TM-EIAO	V

EIA Ref.	EM&A Log Ref	Environmental Mitigation Measures	Objectives of the Recommended Measures & Main Concerns to address	Who to implement the measures?	Location	When to implement the measures?	What requirements or standards for the measure to achieve?	Implementation Status
		<p>the 300m marine access as indicated in the EPs, not more than 30% public fill shall be used for reclamation filling below +2.5mPD, unless otherwise agreement from EPD was obtained;</p> <p>No more than 2 grab dredgers with a maximum daily dredging rate of 12,000m³ shall be employed for dredging operation at Portion D of the Project;</p> <p>4-1</p> <p>Upon completion of 200m leading seawall, no more than a total of 60 filling barge trips per day shall be made with a cumulative maximum daily filling rate of 60,000 m³ for HKBCF and TMCLKL southern landfill reclamation during the filling operation; and</p> <p>Upon completion of the whole section of seawall except for the 300m marine access as indicated in the EPs, no more than a total of 190 filling barge trips per day shall be made with a cumulative maximum daily filling rate of 190,000 m³ for the remaining filling operations for HKBCF and TMCLKL southern landfill reclamation.</p> <p>Closed grabs should be used for sediment dredging to reduce sediment loss when lifting the grabs to the barges. Only grab dredgers shall be used for dredging works of the Project;</p> <p>All mechanical grabs shall be designed and maintained to avoid spillage;</p> <p>The moving speed of construction vessels in the dredging area should be reduced to prevent disturbance to the seabed generating sediment plumes;</p> <p>Floating type silt curtains shall be installed enclosing the entire reclamation site at all time. Staggered layers of silt curtain shall</p>						

EIA Ref.	EM&A Log Ref	Environmental Mitigation Measures	Objectives of the Recommended Measures & Main Concerns to address	Who to implement the measures?	Location	When to implement the measures?	What requirements or standards for the measure to achieve?	Implementation Status
		<p>be provided to prevent sediment loss at navigation accesses. The length of each staggered layers shall be at least 200m;</p> <p>The cage-type silt-curtain with steel enclosure is proposed to be installed to enclose local pollution caused by the grab dredging.</p> <p>The grab dredging work should be carried out within the cage-type silt curtain;</p> <p>Single layer silt curtain to be applied around the North-east airport water intake;</p> <p>The silt-curtains should be maintained in good condition to ensure the sediment plume generated from dredging and filling be confined effectively within the site boundary.</p> <p>The dredging and filling works shall be scheduled to spread the works evenly over a working day;</p> <p>Cellular structure shall be used for seawall construction;</p> <p>A layer of geotextile shall be placed on top of the seabed before any filling activities take place inside the cellular structures to form the seawall;</p> <p>The conveyor belts shall be fitted with windboards and conveyor release points shall be covered with curtain to prevent any spillage of filling materials onto the surrounding waters;</p> <p>An additional layer of silt curtain shall be installed near the active stone column installation points. A layer of geotextile with stone blanket on top shall be placed on the seabed prior to stone column installation</p>						

EIA Ref.	EM&A Log Ref	Environmental Mitigation Measures	Objectives of the Recommended Measures & Main Concerns to address	Who to implement the measures?	Location	When to implement the measures?	What requirements or standards for the measure to achieve?	Implementation Status
		<p>works. Stone blanket -> with silt curtain.</p> <p>In addition, dredging operations should be undertaken in such a manner as to minimize resuspension of sediments. Standard good dredging practice measures should, therefore, be implemented including the following requirements which should be written into the dredging and filling contract.</p> <ol style="list-style-type: none"> 1. Trailer suction hopper dredgers shall not allow mud to overflow; 2. Use of Lean Material Overboard (LMOB) systems shall be prohibited; 3. Mechanical grabs shall be designed and maintained to avoid spillage and should seal tightly while being lifted; 4. Barges and hopper dredgers shall have tight fitting seals to their bottom openings to prevent leakage of material; 5. Any pipe leakages shall be repaired quickly. Plant should not be operated with leaking pipes; 6. Loading of barges and hoppers shall be controlled to prevent splashing of dredged material to the surrounding water. Barges or hoppers shall not be filled to a level which will cause overflow of materials or pollution of water during loading or transportation; 7. Excess material shall be cleaned from the decks and exposed fittings of barges and hopper dredgers before the vessel is moved; 8. Adequate freeboard shall be maintained on barges to reduce the likelihood of decks being washed by wave action; 9. All vessels shall be sized such that adequate clearance is maintained between vessels and the sea bed at all states of the tide to ensure that undue turbidity is not generated by turbulence from vessel movement or propeller

*Monitoring was undertaken by the E.T. of Contract No. HY/2010/02

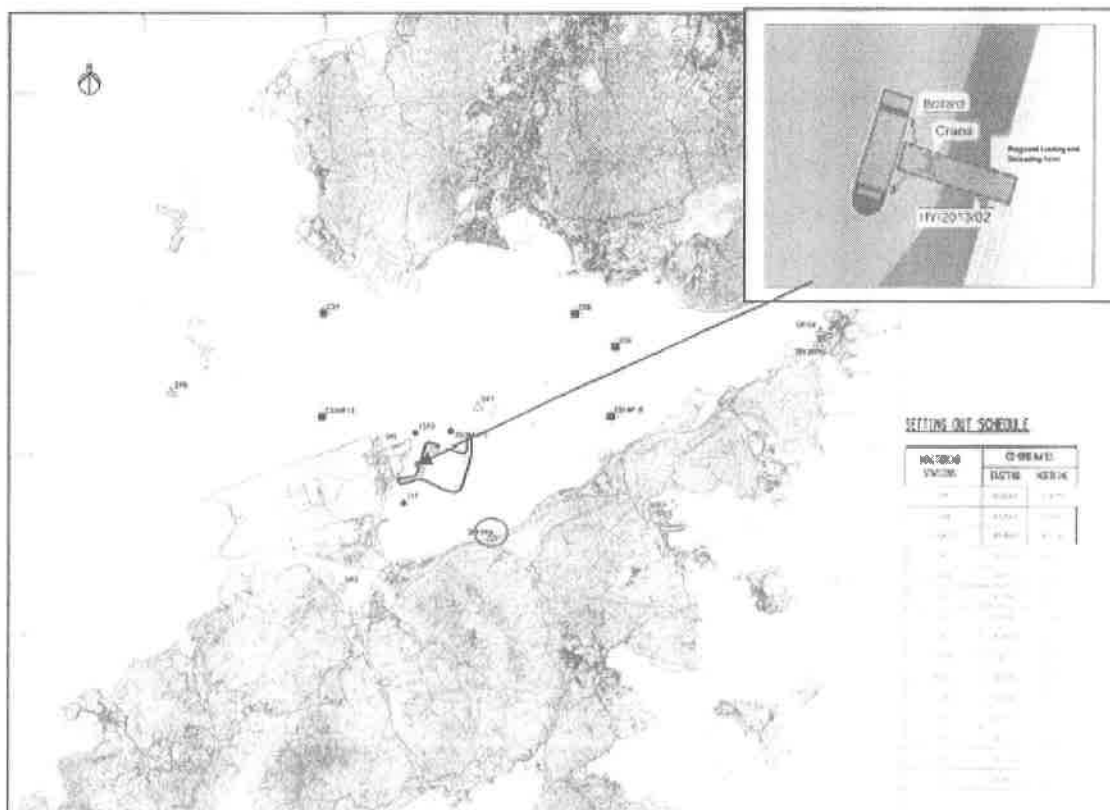

Figure 1 Location of Water Quality Monitoring Stations

Contract No. HY/2013/02
Hong Kong-Zhuhai-Macao Bridge
Hong Kong Boundary Crossing Facilities –Infrastructure Works Stage I (Western Portion)
Investigation Report on Action Level or Limit Level Non-compliance

Investigation Results:

a) Causes of exceedance

Exceedance was not due to operation of the works under Contract No. HY/2013/02 because:

- It was confirmed that there was no marine works or barge of this Contract worked at HKBCF reclamation site near the sea area or area near the monitoring station SR4(N) from 01 November 2016 to the water quality monitoring period on 14 November 2016 under Contract No. HY/2013/02 so that it was unlikely to generate suspended solids in the marina water to cause the SS exceedance recorded at the monitoring station SR4(N) during mid-flood tide on 14 November 2016. Figure 1 showing the location of the Water Quality Monitoring Station where recorded exceedance and all relevant WQM stations.
- The exceedance was recorded during flood tide in which the direction of flow was flowing from east to west and the monitoring station SR4(N) is located at upstream of the works area of this Contract. Therefore, it is unlikely that the SS exceedance recorded at SR4(N) during mid-flood tide on 14 November 2016 was contributed by the works under Contract No. HY/2013/02.
- The water quality mitigation measures as mentioned in EM&A Manual and EP was fully implemented in this Contract which including maintenance of the silt curtain on a daily basis etc. The exceedance was considered as non-Project related.

b) Action required under the action plan

Refer to Table 9.4 of the updated EM&A Manual for HKBCF.

c) Action taken under the action plan

1. Not applicable as SS was not measured in situ;
2. After considered the above mentioned investigation results, it appears that it was unlikely that the SS exceedance was attributed to the above mentioned work site of this Contract;
3. The exceedance was informed by IEC and ER;
4. Monitoring data, all plant, equipment and Contractor's working methods were checked;

d) ET's conclusions and recommendations for mitigation

- All relevant water quality mitigation measurement was checked to be fully implemented.
- The Contractor was reminded to ensure all construction activities that generate wastewater with high concentrations of suspended solids (SS) should be collected to sedimentation tanks or package treatment systems for proper treatment prior to disposal.
- The Contractor was reminded to ensure that all silt removal facilities, channels and manholes shall be maintained and any deposited silt and grit shall be removed regularly.

e) Contractor's actions to implement the mitigation

- All construction activities that generate wastewater with high concentrations of suspended solids (SS) like wheel washing etc. was collected to sedimentation tanks or package treatment systems for proper treatment prior to

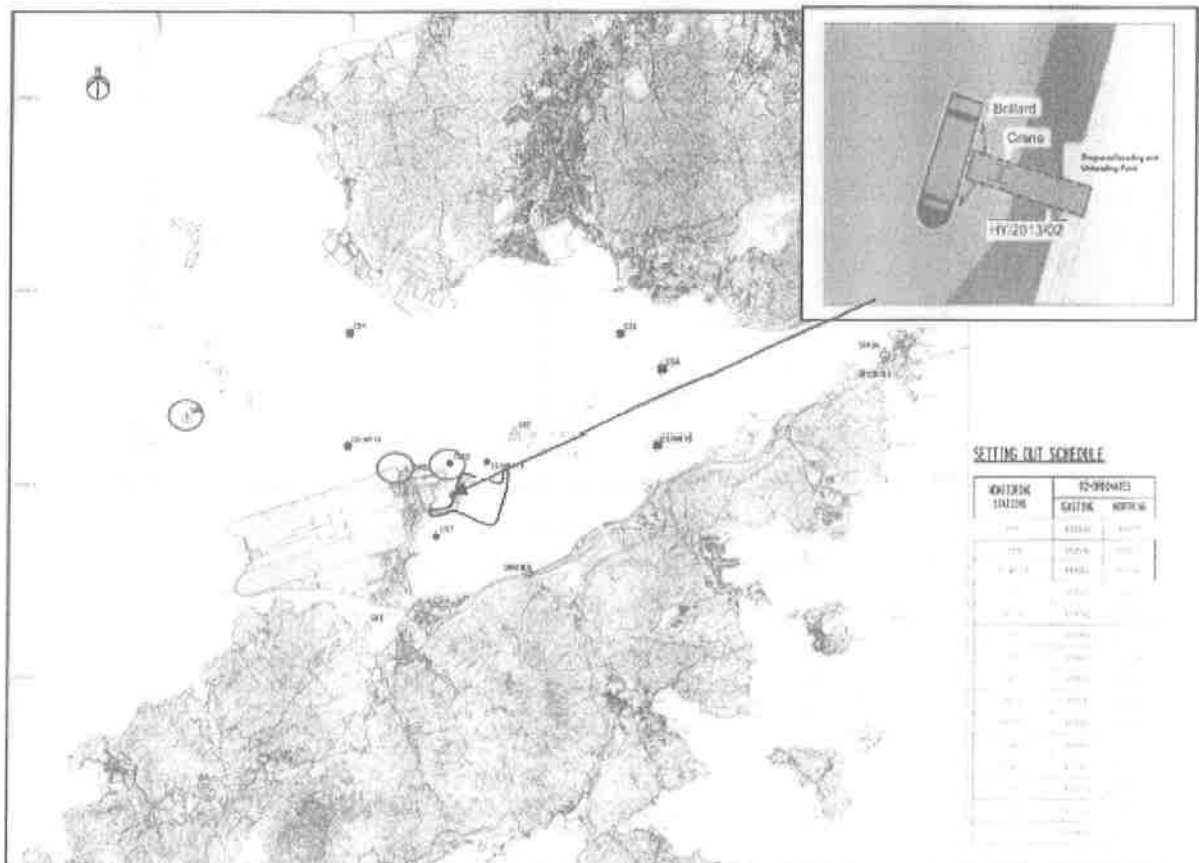

Figure 1 Location of Water Quality Monitoring Stations

Contract No. HY/2013/02
Hong Kong-Zhuhai-Macao Bridge
Hong Kong Boundary Crossing Facilities –Infrastructure Works Stage I (Western Portion)
Investigation Report on Action Level or Limit Level Non-compliance

Investigation Results:

a) Causes of exceedances

Exceedances were not due to operation of the works under Contract No. HY/2013/02 because:

- It was confirmed that there was no marine works or barge of this Contract worked at HKBCF reclamation site near the sea area or area near the monitoring stations IS10, SR5 and SR6 from 01 November 2016 to the water quality monitoring period on 16 November 2016 under Contract No. HY/2013/02 so that it was unlikely to generate suspended solids in the marine water to cause the SS exceedances recorded at the monitoring stations IS10, SR5 and SR6 during mid-flood tide on 16 November 2016. Figure 1 showing the location of the Water Quality Monitoring Stations where recorded exceedances and all relevant WQM stations.
- The water quality mitigation measures as mentioned in EM&A Manual and EP was fully implemented in this Contract which including maintenance of the silt curtain on a daily basis etc. The exceedances were considered as non-Project related.

b) Action required under the action plan

Refer to Table 9.4 of the updated EM&A Manual for HKBCF.

c) Action taken under the action plan

1. Not applicable as SS was not measured in situ;
2. After considered the above mentioned investigation results, it appears that it was unlikely that the SS exceedance was attributed to the above mentioned work site of this Contract;
3. The exceedance was informed by IEC and ER;
4. Monitoring data, all plant, equipment and Contractor's working methods were checked;
5. Since it is considered that the SS exceedance is unlikely to be project related, actions 5-7 under the EAP are considered not applicable.

d) ET's conclusions and recommendations for mitigation

- All relevant water quality mitigation measurement was checked to be fully implemented.
- The Contractor was reminded to ensure all construction activities that generate wastewater with high concentrations of suspended solids (SS) should be collected to sedimentation tanks or package treatment systems for proper treatment prior to disposal.
- The Contractor was reminded to ensure that all silt removal facilities, channels and manholes shall be maintained and any deposited silt and grit shall be removed regularly.

e) Contractor's actions to implement the mitigation

- All construction activities that generate wastewater with high concentrations of suspended solids (SS) like wheel washing etc. was collected to sedimentation tanks or package treatment systems for proper treatment prior to disposal.
- All silt removal facilities, channels and manholes was maintained and any deposited silt and grit was removed regularly.

Report No. 009

Contract No. HY/2013/02
Hong Kong-Zhuhai-Macao Bridge
Hong Kong Boundary Crossing Facilities –Infrastructure Works Stage I (Western Portion)
Investigation Report on Action Level or Limit Level Non-compliance

Report No. 009

Monitoring Date 18-Nov-16

The Action and Limit Levels of suspended solids (SS) determined from baseline monitoring data is reproduced below:

Monitoring Parameter	Action Level (AL)	Limit Level (LL)
Depth averaged SS (in mg/L)	23.5	34.4

Mid-Flood tide

Suspended Solids (SS) (In mg/L)

Monitoring Station	Monitoring time	Measured depth averaged	Level Exceeded
IS(Mf)11	10:13	31.8	Action
IS10	10:25	28.8	Action
SR5	10:33	33.4	Action
SR6	11:22	26.1	Action
SR7	10:04	24.5	Action

*Monitoring was undertaken by the E.T. of Contract No. HY/2010/02

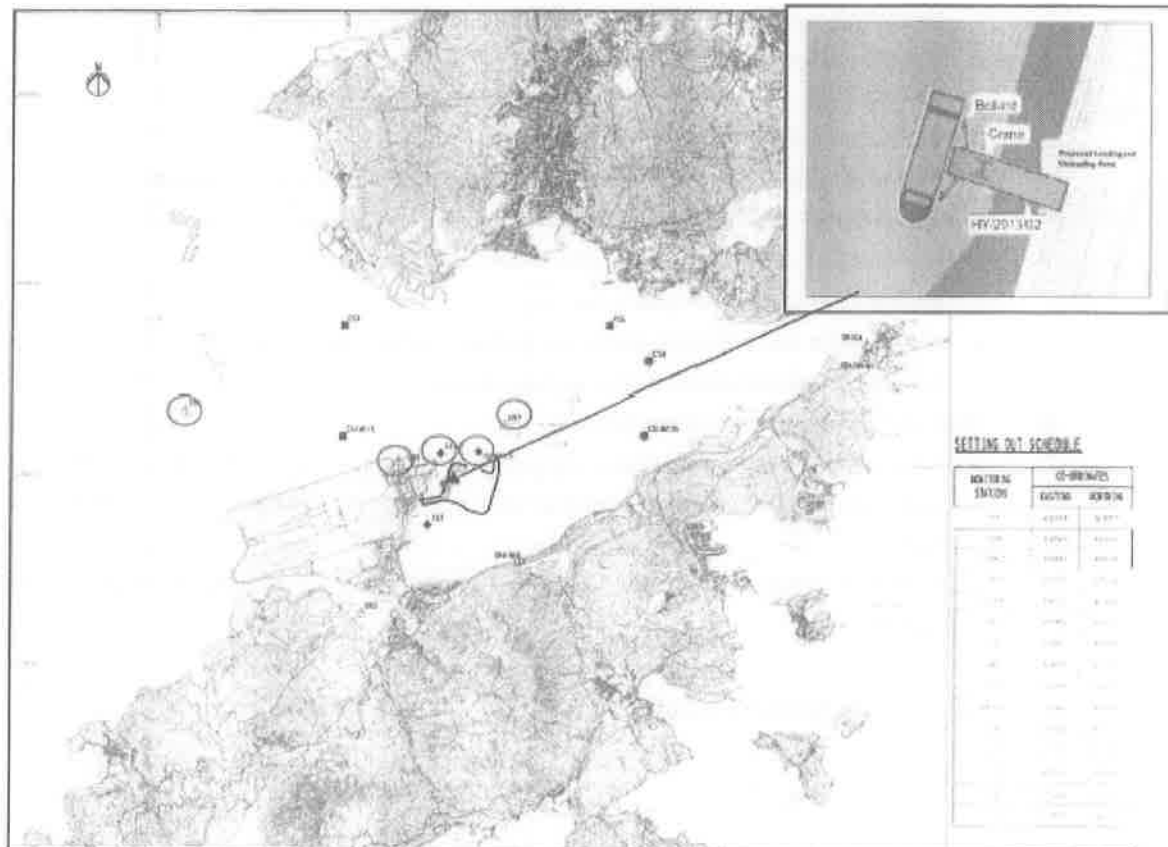

Figure 1 Location of Water Quality Monitoring Stations

Contract No. HY/2013/02
Hong Kong-Zhuhai-Macao Bridge
Hong Kong Boundary Crossing Facilities –Infrastructure Works Stage II (Western Portion)
Investigation Report on Action Level or Limit Level Non-compliance

Investigation Results:

a) Causes of exceedances

Exceedances were not due to operation of the works under Contract No. HY/2013/02 because:

- It was confirmed that there was no marine works or barge of this Contract worked at HKBCF reclamation site near the sea area or area near the monitoring stations IS(Mf)11, IS10, SR5, SR6 and SR7 from 01 November 2016 to the water quality monitoring period on 18 November 2016 under Contract No. HY/2013/02 so that it was unlikely to generate suspended solids in the marine water to cause the SS exceedances recorded at the monitoring stations IS(Mf)11, IS10, SR5, SR6 and SR7 during mid-flood tide on 18 November 2016. Figure 1 showing the location of the Water Quality Monitoring Stations where recorded exceedances and all relevant WQM stations.
- The water quality mitigation measures as mentioned in EM&A Manual and EP was fully implemented in this Contract which including maintenance of the silt curtain on a daily basis etc. The exceedances were considered as non-Project related.

b) Action required under the action plan

Refer to Table 9.4 of the updated EM&A Manual for HKBCF.

c) Action taken under the action plan

1. Not applicable as SS was not measured in situ;
2. After considered the above mentioned investigation results, it appears that it was unlikely that the SS exceedance was attributed to the above mentioned work site of this Contract;
3. The exceedance was informed by IEC and ER;
4. Monitoring data, all plant, equipment and Contractor's working methods were checked;

d) ET's conclusions and recommendations for mitigation

- All relevant water quality mitigation measurement was checked to be fully implemented.
- The Contractor was reminded to ensure all construction activities that generate wastewater with high concentrations of suspended solids (SS) should be collected to sedimentation tanks or package treatment systems for proper treatment prior to disposal.
- The Contractor was reminded to ensure that all silt removal facilities, channels and manholes shall be maintained and any deposited silt and grit shall be removed regularly.

e) Contractor's actions to implement the mitigation

- All construction activities that generate wastewater with high concentrations of suspended solids (SS) like wheel washing etc. was collected to sedimentation tanks or package treatment systems for proper treatment prior to disposal.
- All silt removal facilities, channels and manholes was maintained and any deposited silt and grit was removed regularly.

Appendix K

Complaint Investigation Report

ETS-Testconsult Ltd – Environmental Team (ET)			
Complaint Investigation Report			
Contract No. HY/2013/02 - Hong Kong- Zhuhai- Macao Bridge Hong Kong Boundary Crossing Facilities – Infrastructure Works Stage I (Western Portion)			
Details of the Complaint			Log No. : 005
Date	09 November 2016	Time	---
Location			
Hong Kong – Zhuhai – Macao Bridge near Scenic Hill Site to coast towards Tung Chung Pier			
Circumstances:			
One complaint was received by EPD from public on 09 November 2016 and was forwarded by EPD to the ENPO on 09 November 2016. Then the ENPO forwarded the complaint by email to the R.E. (AECOM), the Contractor (China Harbour) and the ET (ETS-Testconsult Ltd.) of Contract No. HY/2013/02 at 14:52 on 10 November 2016. The complainant complained that an engineering works vessel named “長盛 308” travelled from Hong Kong – Zhuhai – Macao Bridge near Scenic Hill Site to the coast towards Tung Chung Pier together with muddy water at 09:26 on 07 November 2016..			
Follow action(s)			
Follow up by	Environmental Team of Contract No. HY/2013/02	Date	10 November 2016
Details of Follow up action(s)			
After received the details of the complaint from the ENPO on 10 November 2016, the ET of Contract No. HY/2013/02 have performed a follow-up investigation on 10 November 2016 to investigate this event. The investigation was included to check that if any marine works was carried out by the Contractor of Contract No. HY/2013/02 in the morning on 07 November 2016. After checked with the Contractor of Contract No. HY/2013/02, there was no any marine works carried out on 07 November 2016. Hence, the complaint was found non-related to Contract No. HY/2013/02. Although this complaint was non-related to Contract No. HY/2013/02, the Contractor of Contract No. HY/2013/02 was reminded to provide appropriate water pollution mitigation measures for the marine working vessels during any marine works, such as remind all Captains of the vessels to avoid arranging vessels to travel in the area during low tide or discharge waste water to the sea etc.			
Details of Action(s) Taken by the Contactor of Contract No. HY/2013/02			
1. Provide appropriate instruction to all Captains of the vessels to avoid arranging vessels to travel in the area during low tide; 2. To remind all Captains of the vessels to avoid to discharge waste water to the sea.			
Conclusion			
Refer to the above mentioned inspection, since there was no any marine carried out on 07 November 2016, the complaint was found non-related to Contract No. HY/2013/02. Although this complaint was non-related to Contract No. HY/2013/02, the Contractor of Contract No. HY/2013/02 was reminded to provide appropriate water pollution mitigation measures for the marine working vessels during any marine works.
