## EXECUTIVE SUMMARY

This Baseline Monitoring Report is a supplementary to the previous finalized Baseline Monitoring Report for the West Kowloon Cultural District project (the “WKCD Project”). Bachy Soletanche – Fujita Corporation Joint Venture has appointed Apex Testing & Certification Limited to undertake the Baseline Monitoring from 08 August 2020 to 23 August 2020 at AM5 and NM5 (where no baseline monitoring was previously carried out) due to the commencement of the Foundation and Excavation and Lateral Support Works for Integrated Basement and Underground Road in Zones 2A at West Kowloon Cultural District (the “Zone 2A Project”). The additional consecutive two days monitoring (22 and 23 August 2020) were necessary to replace the extreme weather days (18 and 19 August 2020) due to the Typhoon occurrence; in order to obtain valid 14 days for baseline monitoring in compliance with the EM&A Manual. The monitoring data obtained on 18 and 19 August have been provided in this report for reference only. These data have not been taken into account for the minimum, maximum, and average estimations.

The baseline air quality (1-hour Total Suspended Particulate (“TSP”) and 24-hour TSP levels) monitoring was conducted at AM5A (which is an alternative monitoring location for AM5). The baseline 1-hour TSP (between 0700-1900 hours) and 24-hour TSP average levels measured at AM5A were  $39\mu\text{g}/\text{m}^3$  and  $17.1\mu\text{g}/\text{m}^3$  respectively. Action Level of the corresponding measurements for 1-hour TSP at 0700 – 1900 was set at  $275\mu\text{g}/\text{m}^3$  and the limit level was  $500\mu\text{g}/\text{m}^3$ . Action Level of the corresponding measurements for 24-hour TSP was set at  $141\mu\text{g}/\text{m}^3$  with the limit level of  $260\mu\text{g}/\text{m}^3$ .

Baseline noise monitoring was also conducted at the monitoring station NM5A (which is an alternative monitoring location for NM5).  $L_{10}$  (30 minutes),  $L_{90}$  (30 minutes) and  $L_{eq}$  (30 minutes) were measured continuously for 12 hours between 0700 and 1900 hours at NM5A. The baseline  $L_{10}$  (30 minutes),  $L_{90}$  (30 minutes) and  $L_{eq}$  (30 minutes) noise average levels measured at NM5A were 65.3 dB(A), 59.6 dB(A) and 63.0 dB(A) (3dB(A) has been added due to the free field measurement condition) respectively. Action level for construction noise is triggered when a documented complaint is received. Limit Level for daytime period (over 07:00 -19:00) at NM5A was set at 75 dB(A).

## 1. INTRODUCTION

### 1.1. Project Background Information

The West Kowloon Cultural District Authority (“WKCD”), empowered by the WKCD Ordinance (Cap. 601), was set up by the Government with the full support of the Legislative Council (LegCo) in October 2008 to take forward the West Kowloon Cultural District (“WKCD”) project.

The WKCD Project is a large cultural project which will deliver new performance and visual arts venues, museums, open spaces, education resources, commercial and retail opportunities. With funding from the Government of the Hong Kong SAR, the WKCD is being developed for the people of Hong Kong and visitors. Its vision is to create a vibrant cultural quarter for Hong Kong where the local arts scene can interact. The WKCD Project will also include a variety of arts and cultural facilities that will produce and host world-class exhibitions, performances, arts and cultural events. The WKCD positions itself as a leading cultural brand of the future.

The WKCD Project is a designated project (DP) under schedule 2 and 3, and an Environmental Permit EP-453/2013/B was issued with respect to the “Under pass Road and Austin Road Flyover serving the WKCD”. The purpose of the Zone 2A Project is to reserve for Integrated Basement (IB) and Underground Road (UR) in Zones 2A at West Kowloon Cultural District (WKCD). The Zone 2A Project involves the foundation and excavation works, excavation and lateral support (ELS) works, road works, drainage diversion works, temporary car parking, environmental monitoring and mitigation measures for the proposed works.

WKCD has appointed Bachy Soletanche – Fujita Corporation Joint Venture (BFJV) as the Contractor of Zone 2A Project and Apex Testing & Certification Limited (Apex) is commissioned by BFJV to undertake the Baseline Monitoring.

### 1.2. Purpose of the Baseline Report

The purpose of the Report is to set out baseline levels for the air quality and noise in accordance with the EM&A Manual for WKCD Project and the Environmental Permit (EP-453/2013/B). The baseline monitoring report is prepared in accordance with the Condition 3.3 of the Environmental Permit (EP-453/2013/B). These baseline levels for the air quality and noise will be used as the basis for compliance check during the impact monitoring at construction stage of the WKCD Project.

Pursuant to the EM&A Manual, AM1 to AM5 are the five designated air quality monitoring locations, and NM1 to NM5 are the five designated noise monitoring locations. The baseline monitoring has been previously carried out at AM1 to AM4 (for air), and at NM1 to NM4 (for noise) in 2014 / 2015 as described below:

<b>Designated Monitoring Stations in EM&amp;A Manual</b>	<b>Baseline Monitoring Period</b>
AM1 – International Commerce Centre	22 July 2014 to 06 August 2014
AM2 - The Harbourside Tower 1	29 July 2014 to 15 August 2014
AM3 - The Victoria Towers - Tower 1	22 July 2014 to 04 August 2014
AM4 - Canton Road Government Primary School	22 July 2014 to 05 August 2014
NM1 – The Harbourside Tower 1	Referenced baseline noise level from the project “Hong Kong Section of Guangzhou-Shenzhen-Hong Kong Express Link (XRL)”
NM2 – The Arch – Sun Tower	
NM3 - The Victoria Towers - Tower 1	22 July 2014 to 14 August 2014, 22 January and 25 January 2015
NM4 - Canton Road Government Primary School	22 July 2014 to 04 August 2014

The baseline monitoring report was previously submitted and approved by EPD.

(Retrieved from <http://ema.westkowloon.hk/baseline/2015.pdf>)

Baseline monitoring at AM5 (AM5A) and NM5 (NM5A) has been conducted from 08 August 2020 to 23 August 2020 due to the development of WKCD Zone 2A. In fact, since the topside developments at West Kowloon Terminus Site (AM5) and the development next to Austin Station (NM5) were still under construction during the previous baseline monitoring in 2014, the baseline monitoring has been not yet conducted at AM5 and NM5. According to the EM&A Manual, Section 2.1.5 (Table 2.1) and Section 3.1.3 (Table 3.1), air quality and noise monitoring at AM5 (AM5A) and NM5 (NM5A) should start after completion of development, subject to the construction programme of XRL and the development.

This report presents the equipment, period, methodology, results and observations for the air quality and noise monitoring during the baseline monitoring at the designated monitoring locations AM5 and NM5 (which are replaced by the alternative locations AM5A and NM5A respectively).

### **1.3. Structure of the Baseline Report**

This Report comprises the following sections:

Section 1: Introduction, project background information, purpose and structure of the report

Section 2: Air Quality, which describes the baseline air quality monitoring

Section 3: Noise, which describes the baseline noise monitoring

Section 4: Revisions for inclusion in the EM&A Manual

Section 5: Conclusions

## 2. AIR QUALITY MONITORING

### 2.1. Monitoring Requirements

In accordance with the EM&A Manual, baseline air quality monitoring is undertaken to establish the baseline air quality levels at the designated monitoring station. Baseline monitoring has been carried out at the alternative locations for the originally designated monitoring stations for 14 consecutive days prior to the commencement of the construction works to obtain daily 24-hour TSP samples. 1-hour sampling has been also done at least 3 times per day while the highest dust impact was expected. Generally, the highest dust impact is expected to be at day-time between 0700-1900 since most of the active construction works are carried out during this period.

There was no construction or dust generation activities in the vicinity (within 500m) of the Project site boundary during the baseline monitoring.

### 2.2. Monitoring Methodology

Air quality was monitored in terms of Total Suspended Solid (TSP). The TSP levels have been measured by following the standard method as set out in High Volume Method for Total Suspended Particulates, Part 50 Chapter 1 Appendix B, Title 40 of the Code of Federal Regulations of the USEPA (HVS method).

#### 24-hour TSP Levels Monitoring Equipment Installation and Preparation

Below key points were followed when positioning the HVS:

- a. a horizontal platform with appropriate support to secure the samplers against gusty wind shall be provided;
- b. no two samplers shall be placed less than 2 meters apart;
- c. the distance between the sampler and an obstacle, such as buildings, must be at least twice the height that the obstacle protrudes above the sampler;
- d. a minimum of 2 meters of separation from walls, parapets and penthouses is required for rooftop samplers;
- e. a minimum of 2 meters separation from any supporting structure, measured horizontally is required;
- f. no furnace or incinerator flue is nearby;
- g. airflow around the sampler is unrestricted;

- h. the sampler is more than 20 meters from the dripline;
- i. any wire fence and gate, to protect the sampler, shall not cause any obstruction during monitoring;
- j. permission must be obtained to set up the samplers and to obtain access to the monitoring station; and
- k. a secured supply of electricity is needed to operate the samplers.

High volume sampler (HVS) in compliance with the following specifications was used for carrying out the 24-hour TSP monitoring:

- a. 0.6-1.7 m<sup>3</sup> /min (20-60 SCFM) adjustable flow range;
- b. equipped with a timing/control device with +/- 5 minutes accuracy for 24 hours operation;
- c. installed with elapsed-time meter with +/- 2 minutes accuracy for 24 hours operation;
- d. capable of providing a minimum exposed area of 406 cm<sup>2</sup> (63 in<sup>2</sup>);
- e. flow control accuracy: +/- 2.5% deviation over 24-hour sampling period;
- f. equipped with a shelter to protect the filter and sampler;
- g. incorporated with an electronic mass flow rate controller or other equivalent devices;
- h. equipped with a flow recorder for continuous monitoring;
- i. provided with a peaked roof inlet;
- j. incorporated with a manometer;
- k. able to hold and seal the filter paper to the sampler housing at horizontal position;
- l. easy to change the filter; and
- m. capable of operating continuously for 24-hour period.

The HVS was equipped with an electronic mass flow controller and calibrated against a traceable standard at regular intervals. All the equipment, calibration kit, filter papers, etc. was clearly labelled.

Initial calibration of dust monitoring equipment was conducted upon installation and thereafter at bi-monthly intervals. The transfer standard is traceable to the internationally recognized primary standard and calibrated annually. All the data was converted into standard temperature and pressure condition.

The flow-rate of the sampler before and after the sampling exercise with the filter in position was verified to be constant.

The instrument was calibrated regularly, and the 1-hour sampling was determined periodically by HVS to check the validity and accuracy of the results measured by direct reading method.

#### Filters Preparation

Filter paper of size 8"x10" was labelled before sampling. It was a clean filter paper with no pin holes, and conditioned in a humidity controlled chamber for over 24-hour and be pre-weighed before use for the sampling.

After sampling, the filter paper loaded with dust was kept in a clean and tightly sealed plastic bag. The filter paper is then returned to the laboratory for reconditioning in the humidity controlled chamber followed by accurate weighing by an electronic balance with a readout down to 0.1 mg. The balance was regularly calibrated against a traceable standard.

All the collected samples will be kept in a good condition for 6 months before disposal.

#### 1-hour TSP Levels Monitoring (Direct Reading Method) Equipment and Procedures

The measuring procedures of 1-hour TSP by a portable dust meter were carried out as follows:

- a. Pull the air sampling inlet cover up;
- b. Change Mode 0 to BG by pushing Timer set switch;
- c. Push Start/Stop switch once.
- d. Confirm reading is 0 to set zero.
- e. Turn knob to SENSI.ADJ and press in.
- f. Push Start/Stop switch once.
- g. Push timer set switch to set measuring time.
- h. Remove the cap and start measurement.

### 2.3. Name of Laboratory and Type of Equipment Used and Calibration and Maintenance

The dust samples handling and analysis was carried out in the laboratory by AQuality Testconsult Limited. The laboratory is accredited by other international accreditation scheme. AQuality Testconsult Limited is accredited under the ILAC MRA scheme and accredited by IAS, which is MRA Partners for HOKLAS. HKAS MRA partners recognize HOKLAS endorsed test certificates as having the same technical validity as certificates endorsed by their respective schemes.

The equipment used for the baseline air quality monitoring programme is listed in **Table 2.3-1** below. The equipment is calibrated annually and properly maintained to ensure proper function. Copies of the calibration certificates of the equipment are enclosed in **Appendix 4**.

**Table 2.3-1 Equipment for Baseline Air Quality Monitoring**

Equipment	Manufacturer/Model	Serial No.	Due Date
High Volume Sampler	Tisch Environmental/ TE-5170	4344	2021-07-19
High Volume Sampler Calibrator	Tisch Environmental/ TE-5025A	3543	2020-11-08
Direct Reading Dust Meter	Met One Instruments/ Aerocet-531S	P21676	2020-11-16

### 2.4. Monitoring Parameters, Date, Frequency and Duration

1-hour and 24-hour TSP levels was measured to indicate the impacts of construction dust on air quality. 1-hour TSP levels was measured by direct reading methods which are capable of producing comparable results as that by the HVS method, to indicate short event impacts.

The baseline air quality monitoring for AM5A (alternative location of the original AM5) was conducted continuously from 08 August 2020 to 23 August 2020 (the monitoring schedule is provided in **Appendix 3**). The additional consecutive two days monitoring (22 and 23 August 2020) were necessary to replace the extreme weather days (18 and 19 August 2020) due to the Typhoon occurrence; in order to obtain valid 14 days baseline monitoring in compliance with the EM&A Manual.

14 days monitoring (10 consecutive days from 8 August to 17 August, and 4 consecutive days from 20 to 23 August) were therefore taken into account at the designated monitoring station to obtain daily 24-hour TSP samples. 1-hour sampling has been also done at least 3 times per day while the highest dust impact was expected.

The monitoring data for air quality monitoring of 1-hour and 24-hour TSP at AM5A on 18 August and 19 August 2020 (extreme weather days) were recorded and provided for reference only, and the regular monitoring period was extended to 23 August 2020. The relevant Tropical Cyclone Warning Signals is provided in **Appendix 9**. **Table 2.4-1** summarizes the parameters, duration and frequencies of air quality monitoring.

**Table 2.4-1 Parameters, Duration and Frequencies of Air Quality Monitoring**

Parameter	Duration	Frequency
1-hour TSP	14 consecutive days	1-hour x 3 times per day
24-hour TSP	14 consecutive days	24 hours per day

## 2.5. Designated and Proposed Alternative Air Monitoring Location

According to the EM&A Manual, AM5 is the designated impact monitoring station (See **Appendix 1**), which has been selected as the representative air sensitive receiver (Topside Developments at West Kowloon Terminus Station) located nearby the Project site. However, MTR declined the access to the designated AM5 location (Refer to rejection letter attached in **Appendix 2**).

Alternative location is therefore proposed in compliance with the requirements of the EM&A Manual. After reviewing all locations in the vicinity of the construction activities, AM5A has been selected as an alternative location for the original AM5 based on the following reasons:

1. AM5A is close to the original sensitive receptor AM5; it is located in front of AM5, and in the same direction to the centre of the WKCD Zone 2A construction site as AM5 (as showed in Figure 2.1 in **Appendix 1**); thus it will likely have the direct impact of construction dusty activities comparable to that at AM5 (please refer to the distances showed in **Appendix 1** and summarized in revised **Table 2.5-2**);

2. Electricity supply is available at AM5A for the air quality monitoring; and
3. Moreover, AM5A is set nearby the hoarding of WKCD Zone 2A site, closer to the major construction dust emission sources (in comparison with the original AM5); and has a more direct line sight to the major dusty site activities with higher exposure (Figure 2.1 in **Appendix 1**).

Thereby, AM5A will not only likely have an air quality impact comparable to that at the original AM5 during the construction activities, but also accurately represent AM5 in case of highest air quality impact. The designated air quality monitoring station listed in EM&A Manual and alternative air quality monitoring location are summarized in **Table 2.5-1** below.

**Table 2.5-1 Air Quality Monitoring Location**

Designated Monitoring Station in EM&A Manual	Proposed Alternative Monitoring Station in Accordance with EM&A Manual	Alternative Monitoring Station
AM5 - Topside Developments at West Kowloon Terminus Site	Yes	AM5A - North of West Kowloon Station's station box (G/F)

In short, the monitoring results at AM5A (an alternative monitoring location proposed by Environmental Team (ET)) can properly monitor the air impact at the original AM5, as previously approved by the Independent Environmental Checker (IEC), WKCDA and the Environmental Protection Department (EPD).

For the above reasons, AM5A is selected to be an alternative monitoring location (baseline and impact monitoring location) for AM5. The description of the alternative station (in terms of distance and direction) is given in **Appendix 1** and summarized in **Table 2.5-2** below.

**Table 2.5-2 Comparison Between Designated and Alternative Air Quality Monitoring Locations**

Station ID	Description	Distance from Centre of Site (m)	Distance from Site Boundary (m)	Direction from Site Boundary	Direct Sight to Project Site
AM5	Topside Developments at West Kowloon Terminus Site	181	80	North	Yes
AM5A	North of West Kowloon Station's station box (G/F)	97	Around 2	North	Yes

Note: Distance of the monitoring station from the Zone 2A Project site, please refer to **Appendix 1**

## 2.6. Baseline Monitoring Observation

The on-site observation in vicinity of the monitoring stations was recorded. A summary of the weather and observation for baseline monitoring works is given in **Table 2.6-1** and **Table 2.6-2** below:

**Table 2.6-1 Weather Condition and Observations During 1-hour TSP Baseline Monitoring Works**

Monitoring Stations	Date																Observations During Baseline Monitoring Works
	August 2020																
	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	
AM5A	F	F	F	C	C <sup>(3)</sup>	C	C	F	C	C	S <sup>(1)</sup>	S <sup>(1)</sup>	C	F	F	F	Road traffic dust at Austin Road <sup>(2)</sup>

Remarks: F: Fine; C: Cloudy; R: Rainy; S: Storm; ■: Sunday

<sup>(1)</sup>: Typhoon Higos hoisted Signal No.1 at 03:40 on 18 August 2020 and moved away from Hong Kong at 13:20 on 19 August 2020. Typhoon Signals No.8 and No.9 were hoisted during the period. The relevant Tropical Cyclone Warning Signals are provided in **Appendix 9**.

<sup>(2)</sup>: Road traffic dust at Austin Road was observed every day during the monitoring period.

<sup>(3)</sup> During the 1-hour TSP monitoring on 12 August 2020, the weather was cloudy at 06:00-20:00.

**Table 2.6-2 Weather Condition and Observations During 24-hour TSP Baseline Monitoring Works**

Monitoring Stations	Date																Observations During Baseline Monitoring Works
	August 2020																
	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23

Remarks: F: Fine; C: Cloudy; R: Rainy; S: Storm;  : Sunday

<sup>(1)</sup>: Typhoon Higos hoisted Signal No.1 at 03:40 on 18 August 2020 and moved away from Hong Kong at 13:20 on 19 August 2020. Typhoon Signals No.8 and No.9 were hoisted during the period. The relevant Tropical Cyclone Warning Signals are provided in **Appendix 9**.

<sup>(2)</sup>: Road traffic dust at Austin Road was observed every day during the monitoring period.

<sup>(3)</sup> During the 24-hour TSP monitoring on 12 August 2020, the weather was rainy at 02:00-06:00, 20:00-00:00.

General meteorological conditions record (wind speed, wind direction and precipitation) are referenced from the Hong Kong Observatory King’s Park meteorological station throughout the baseline monitoring period. The relevant data are provided in **Appendix 5** and **Appendix 9**.

### 2.7. Quality Assurance (QA) / Quality Control (QC) Results and Detection Limits

AQuality Testconsult Limited has a comprehensive quality assurance and quality control programmes. The laboratory is accredited by other international accreditation scheme. AQuality Testconsult Limited is accredited under the ILAC MRA scheme and accredited by IAS, which is MRA Partners for HOKLAS. HKAS MRA partners recognize HOKLAS endorsed test certificates as having the same technical validity as certificates endorsed by their respective schemes. The related supporting documents for AQuality Testconsult Limited are provided in **Appendix 8**.

### 2.8. Results

Baseline air quality monitoring was conducted at AM5A from 08 August 2020 to 23 August 2020 inclusive. The monitoring data obtained on 18 and 19 August 2020 have not been taken into account for the range and average estimation. The baseline monitoring results are summarized in **Table 2.8-1** . All monitoring data of 1-hour and 24-hour TSP are presented in **Appendix 5**.

**Table 2.8-1 Summary of Baseline 1-hour and 24-hour TSP Monitoring Results at AM5A**

Monitoring Parameter	TSP concentration, $\mu\text{g}/\text{m}^3$ (Range)	Average $\mu\text{g}/\text{m}^3$
1-hour TSP	29 - 50	39
24-hour TSP	9.9 - 23	17.1

## 2.9. Action and Limit Levels

The Action and Limit Levels (AL levels) have been set in accordance with the derivation criteria specified in the EM&A Manual. This is shown in **Table 2.9-1**.

**Table 2.9-1 Action and Limit Levels for Air Quality**

Parameter	Action Level	Limit Level
1-hour TSP Level in $\mu\text{g}/\text{m}^3$	For baseline level $\leq 384 \mu\text{g}/\text{m}^3$ , Action level = (130% of baseline level + Limit level)/2 For baseline level $> 384 \mu\text{g}/\text{m}^3$ , Action level = Limit Level	500
24-hour TSP Level in $\mu\text{g}/\text{m}^3$	For baseline level $\leq 200 \mu\text{g}/\text{m}^3$ , Action level = (130% of baseline level + Limit level)/2 For baseline level $> 200 \mu\text{g}/\text{m}^3$ , Action level = Limit Level	260

Following above guidelines, the Action and Limit Levels for air quality impact monitoring have been set, as presented in **Table 2.9-2**. The monitoring data obtained on 18 and 19 August have not been taken into account for the Action Level calculation.

**Table 2.9-2 Action and Limit Levels for 1-hour TSP and 24-hour TSP at AM5A**

Monitoring Parameter	Action Level, $\mu\text{g}/\text{m}^3$	Limit Level, $\mu\text{g}/\text{m}^3$
1-hour TSP	275	500
24-hour TSP	141	260

The Event and Action Plan for Air Quality is given in **Table 2.9-3**.

**Table 2.9-3 Typical Event and Action Plan for Air Quality**

Event	ET Leader	IEC	WKCD	Contractor
Action Level				
1. Exceedance for one sample	1. Identify source, investigate the causes of exceedance and propose remedial measures; 2. Inform IEC and WKCD; 3. Repeat measurement to confirm finding; 4. Increase monitoring frequency to daily.	1. Check monitoring data submitted by ET; 2. Check Contractor's working method.	1. Notify Contractor	1. Rectify any unacceptable practice; 2. Amend working methods if appropriate.
2. Exceedance for two or more consecutive samples	1. Identify source; 2. Inform IEC and WKCD; 3. Advise the WKCD on the effectiveness of the proposed remedial measures; 4. Repeat measurements to confirm findings; 5. Increase monitoring frequency to daily; 6. Discuss with IEC and Contractor on remedial actions required; 7. If exceedance continues, arrange meeting with IEC and WKCD; 8. If exceedance stops, cease additional monitoring.	1. Check monitoring data submitted by ET; 2. Check Contractor's working method; 3. Discuss with ET and Contractor on possible remedial measures; 4. Advise the ET on the effectiveness of the proposed remedial measures; 5. Monitor the implementation of remedial measures.	1. Confirm receipt of notification of failure in writing; 2. Notify Contractor; 3. Ensure remedial measures properly implemented.	1. Submit proposals for remedial to WKCD within three working days of notification; 2. Implement the agreed proposals; 3. Amend proposal if appropriate.
Limit Level				

<p>1. Exceedance for one sample</p>	<p>1. Identify source, investigate the causes of exceedance and propose remedial measures; 2. Inform WKCDA, Contractor and EPD; 3. <p>2. Exceedance for two or more consecutive samples</p>	<p>1. Notify IEC, WKCDA, Contractor and EPD; 2. Identify source; 3. Repeat measurement to confirm findings; 4. Increase monitoring frequency to daily; 5. Carry out analysis of Contractor's working procedures to determine possible mitigation to be implemented; 6. Arrange meeting with IEC and WKCDA to discuss the remedial actions to be taken; 7. Assess effectiveness of Contractor's remedial actions and keep IEC, EPD and WKCDA informed of the results; 8. If exceedance stops, cease additional monitoring.</p>	<p>1. Check monitoring data submitted by ET; 2. Check Contractor's working method; 3. Discuss amongst WKCDA, ET, and Contractor on the potential remedial actions; 4. Review Contractor's remedial actions whenever necessary to assure their effectiveness and advise the WKCDA accordingly; 5. Monitor the implementation of remedial measures.</p>	<p>1. Confirm receipt of notification of failure in writing; 2. Notify Contractor; 3. In consolidation with the IEC, agree with the Contractor on the remedial measures to be implemented; 4. Ensure remedial measures properly implemented; 5. If exceedance continues, consider what portion of the work is responsible and instruct the Contractor to stop that portion of work until the exceedance is abated.</p>	<p>1. Take immediate action to avoid further exceedance; 2. Submit proposals for remedial actions to IEC within three working days of notification; 3. Implement the agreed proposals; 4. Resubmit proposals if problem still not under control; 5. Stop the relevant portion of works as determined by the WKCDA until the exceedance is abated.</p>

### 3. NOISE MONITORING

#### 3.1. Monitoring Requirements

In accordance with the EM&A Manual, baseline noise monitoring is undertaken to establish the baseline noise levels at the designated monitoring station mentioned in the EM&A Manual. The baseline monitoring is carried out in terms of the A-weighted equivalent continuous sound pressure level (Leq). Leq (30 minutes) should be used as the monitoring parameter between 0700 and 1900 hours on normal weekdays. For all other time periods, Leq (5 minutes) should be employed for comparison with the Noise Control Ordinance (NCO) criteria. Supplementary information for data auditing, statistical results such as L10 and L90 should also be obtained for reference.

#### 3.2. Monitoring Methodology

##### Field Monitoring

The monitoring procedures are as follows:

- a. The Sound Level Meter was fixed on a tripod at a height of ~1.2 m above the ground.
- b. The monitoring location should be positioned 1m away from the building façade and +3dB(A) correction should be made to the free field measurement.
- c. Measurements with façade reflection were made at monitoring locations if required.
- d. Parameters such as frequency weighting, the time weighting and the measurement time were set as follows:
  - Frequency weighting: A
  - Time weighting: Fast
  - Time measurement: daily between 0700-1900 hours;
- e. The Sound Level Meter was calibrated by using the Acoustic Calibrator with a sound level of 94 dB at 1000 Hz before and after each noise measurement. If the difference in the calibration level before and after measurement was more than 1.0 dB, the measurement would be considered invalid and repeat of noise measurement would be required after re-calibration or repairing of the equipment.
- f. The wind speed was checked with a portable wind meter.
- g. Site conditions and noise sources were recorded on a standard record sheet.
- h. Noise measurement would be paused for any abnormal influencing noise.

- i. Noise monitoring would not be performed for any presence of fog, rain, wind with a steady speed exceeding 5 m/s, or wind with gusts exceeding 10 m/s.

### 3.3. Type of Equipment Used, Calibration and Maintenance

In reference to the Technical Memorandum (TM) under the NCO, sound level meters in compliance with the International Electrotechnical Commission Publications 651:1979 (Type 1) and 804:1985 (Type 1) specifications should be used for carrying out the noise monitoring.

Immediately prior to, and following each noise measurement, the accuracy of the sound level meter should be checked using an acoustic calibrator generating a known sound pressure level at a known frequency. Noise measurements are only accepted to be valid if the calibration levels from before and after the measurement agree to within 1.0dB.

Measurements shall be recorded to the nearest 0.1dB. The noise monitors are programmed to measure A-weighted equivalent continuous sound pressure level at 30-minute intervals on normal weekdays and at 5-minute interval during other time periods. The noise measurement shall be conducted continuously throughout the measurement period between 0700 and 1900 hours during daytime for 14 consecutive days.

All the equipment and associated instrumentation should be clearly labelled. The equipment used for the baseline monitoring is listed in **Table 3.3-1** below. The equipment shall be calibrated annually and properly maintained to ensure proper function. Copies of the calibration certificates of the noise equipment are enclosed in **Appendix 4**.

**Table 3.3-1 Equipment for Baseline Noise Monitoring**

Equipment	Manufacturer/Model	Serial No.	Due Date
Integrated Sound Level Meter	AWA5661	301134	2020-10-13
Calibrator	Landtek ND9	507258	2020-10-14

### 3.4. Monitoring Parameters, Date, Frequency and Duration

The noise level shall be measured in terms of the A-weighted equivalent continuous sound pressure level (Leq). Leq (30 minutes) shall be used as the monitoring parameter for the time

period between 0700-1900 hours. For all other time periods, Leq (5 minutes) shall be employed for comparison with the NCO criteria.

As supplementary information for data auditing, statistical results such as  $L_{10}$  and  $L_{90}$  shall also be obtained for reference. The baseline noise monitoring for NM5A (alternative location for the original NM5) was conducted from 08 August 2020 to 23 August 2020 (the monitoring schedule is provided in **Appendix 3**). The additional consecutive two days monitoring (22 and 23 August 2020) were necessary to replace the extreme weather days (18 and 19 August 2020) due to the Typhoon occurrence; in order to obtain valid 14 days baseline monitoring in compliance with the EM&A Manual. During baseline monitoring, Leq (30 minutes) measurements have been carried out continuously for 12 hours between 0700-1900 hours for 14 days (10 consecutive days from 8 August to 17 August, and 4 consecutive days from 20 to 23 August).

The noise monitoring data at NM5A on 18 August and 19 August 2020 (extreme weather days) were recorded and provided for reference only, and the regular monitoring period was extended to 23 August 2020. The relevant Tropical Cyclone Warning Signals are provided in **Appendix 9. Table 3.4-1** presents the noise monitoring parameters and frequencies.

**Table 3.4-1 Parameters and Frequencies of Noise Monitoring**

Parameter	Frequency and Period
Leq (30 minutes) ( $L_{10}$ and $L_{90}$ are also record as supplementary information)	Continuously throughout the measurement period for 14 consecutive days Measurement Period: Daytime: 0700-1900 hours on normal weekdays
Leq (5 minutes) ( $L_{10}$ and $L_{90}$ are also record as supplementary information)	Continuously throughout the measurement period for 14 consecutive days Measurement Period: General Holidays and Sundays: 0700-1900 hours

### 3.5. Designated and Alternative Noise Monitoring Location

According to the EM&A Manual, NM5 is the designated impact monitoring station (See **Appendix 1**), which was selected as the representative noise sensitive receiver (Development next to Austin Station) located nearby the Project site. However, Grand Austin property

management office has declined the access to the premises (Refer to rejection letter attached in **Appendix 2**).

Alternative location is therefore proposed in compliance with the requirements of the EM&A Manual requirement. After reviewing all locations in the vicinity of the construction activities, NM5A has been selected as an alternative location for the original NM5 based on the following reasons:

1. NM5A is close to the original sensitive receptor NM5; it is located in front of NM5 and in the same direction to the centre of WKCD Zone 2A site as NM5 (as showed in Figure 3.1 in **Appendix 1**), it will likely have the direct impact of construction noise comparable to that at NM5 (please see the distances showed in **Appendix 1** and summarized in **Table 3.5-2**).
2. NM5A is located outside of West Kowloon Station with no disturbance to the Station’s occupants during noise monitoring activities.
3. Moreover, NM5A is set closer to the WKCD Zone 2A site boundary (in comparison with the original NM5); thus closer to the major construction noise sources (major site activities), and has a more direct line sight to the major site activities with higher exposure to construction noise (see Figure 3.1 in **Appendix 1**). Thereby, NM5A would not only have a noise impact comparable to that at the original NM5 during the construction activities, but also accurately represent NM5 during the highest noise impact.

The designated noise monitoring station listed in EM&A Manual and alternative noise monitoring location are summarized in **Table 3.5-1** below.

**Table 3.5-1 Noise Monitoring Location**

Designated Monitoring Stations in EM&A Manual	Proposed Alternative Monitoring Station in Accordance with EM&A Manual	Alternative Monitoring Station
NM5 - Development next to Austin Station	Yes	NM5A - Pedestrian road (G/F) outside West Kowloon Station

In short, the monitoring results at NM5A (an alternative monitoring location proposed by Environmental Team (ET)) can properly monitor the noise impact at the original NM5 as previously approved by the IEC, WKCD and EPD.

For the above reasons, NM5A is selected to be an alternative monitoring location (both baseline and impact noise monitoring) for NM5. The description of the station is given in **Appendix 1** and summarized in **Table 3.5-2** and **Table 3.5-3** below.

**Table 3.5-2 Comparison Between Designated and Alternative Noise Monitoring Locations**

Station ID	Description	Distance from Centre of Site (m)	Distance from Site Boundary (m)	Direction from Site Boundary	Direct Sight to Project Site
NM5	Development next to Austin Station	279	126	North	Yes
NM5A	Pedestrian road (G/F) outside West Kowloon Station	157	69	North	Yes

Note: Distance of the monitoring station from the Zone 2A Project site, please refer to Appendix 1

**Table 3.5-3 Type of Measurement of Noise Monitoring**

Monitoring Station	Measurement Type
NM5A	Free-field measurement

### 3.6. Baseline Monitoring Observation

The on-site observation in vicinity of the monitoring stations was recorded. A summary of the weather and observation for baseline monitoring works is given in **Table 3.6-1** below:

**Table 3.6-1 Weather Condition and Observation During Baseline Monitoring Works**

Monitoring Stations	Date																Observations During Baseline Monitoring Works
	August 2020																
	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	
AM5A	F	F	F	C	C <sup>(3)</sup>	C	C	F	F	C	S <sup>(1)</sup>	S <sup>(1)</sup>	F	F	F	F	Road traffic noise at Austin Road <sup>(2)</sup>

Remarks: F: Fine; C: Cloudy; R: Rainy; S: Storm; ■: Sunday

<sup>(1)</sup>: Typhoon Higos hoisted Signal No.1 at 03:40 on 18 August 2020 and moved away from Hong Kong at 13:20 on 19 August 2020. Typhoon Signals No.8 and No.9 were hoisted during the period. The relevant Tropical Cyclone Warning Signals is provided in **Appendix 9**.

<sup>(2)</sup>: Road traffic noise at Austin Road was observed every day during the monitoring period.

<sup>(3)</sup> During the noise monitoring on 12 August 2020, the weather was cloudy over 06:00-20:00.

General meteorological conditions record (wind speed, wind direction and precipitation) are referenced from the Hong Kong Observatory King’s Park meteorological station throughout the baseline monitoring period. The relevant data are provided in **Appendix 5** and **Appendix 9**.

### 3.7. Quality Assurance (QA) / Quality Control (QC) Results and Detection Limits

AQuality Testconsult Limited has a comprehensive quality assurance and quality control programmes. The laboratory is accredited by other international accreditation scheme. AQuality Testconsult Limited is accredited under the ILAC MRA scheme and accredited by IAS, which is MRA Partners for HOKLAS. HKAS MRA partners recognize HOKLAS endorsed test certificates as having the same technical validity as certificates endorsed by their respective schemes. The related supporting documents for AQuality Testconsult Limited are provided in **Appendix 8**.

The sound level meter and calibrator were calibrated annually by the manufacturer or a laboratory is accredited by other international accreditation scheme. The sound level meter is calibrated by Centre Testing International Group Co., Ltd. and the calibrator is calibrated by Shenzhen Academy of Metrology and Quality Inspection. The two laboratories are under the ILAC MRA scheme and accredited by CNAS, which is MRA Partners for HOKLAS. HKAS MRA partners will recognize HOKLAS endorsed test certificates as having the same technical validity as certificates endorsed by their respective schemes. Current calibration certificates are provided in **Appendix 8**.

### 3.8. Results

Baseline noise monitoring was conducted at NM5A from 08 August 2020 to 23 August 2020 inclusive. The monitoring data obtained on 18 and 19 August have not been taken into account for the range, minimum, maximum and average levels estimation.

The monitoring data are summarized in **Table 3.8-1**. Graphical presentations of the data are provided in **Appendix 6**.

**Table 3.8-1 Summary of Daytime (0700-1900) Noise Monitoring Results at NM5A**

Daytime 0700-1900 hours on normal weekdays	Range of Noise Level, dB(A)								
	Leq (30min)			L <sub>10</sub> (30min)			L <sub>90</sub> (30min)		
	Average	Max	Min	Average	Max	Min	Average	Max	Min
	60.0	68.5	53.1	62.3	73.1	55.4	56.6	62.3	49.3
	Leq (30min) +3 dB(A)			L <sub>10</sub> (30min) +3 dB(A)			L <sub>90</sub> (30min) +3 dB(A)		
	Average	Max	Min	Average	Max	Min	Average	Max	Min
	63.0	71.5	56.1	65.3	76.1	58.4	59.6	65.3	52.3

Note: A +3 dB(A) façade correction was added to the predicted noise levels to account for the façade effect at NM5A

### 3.9. Action and Limit Levels

The Action and Limit Levels were established in accordance with the EM&A Manual. The baseline noise level shall be referenced during the compliance check in the impact noise monitoring period. **Table 3.9-1** presents the Action and Limit Levels for construction noise.

**Table 3.9-1 Action and Limit Levels for Noise**

Time Period	Action	Limit
0700-1900 hours on normal weekdays	When a valid documented complaint is received.	75* dB(A)

Note: \*70 dB(A) for schools and 65 dB(A) during school examination periods.

If works are to be carried out during restricted hours, the conditions stipulated in the Construction Noise Permit (CNP) issued by the Noise Control Authority have to be followed.

The Event and Action Plan for Construction Noise is given in **Table 3.9-2**.

**Table 3.9-2 Event and Action Plan for Construction Noise**

Event	ET Leader	IEC	WKCD A	Action Contractor
Action Level	<ol style="list-style-type: none"> <li>1. Notify WKCD A, IEC and Contractor;</li> <li>2. Carry out investigation;</li> <li>3. Report the results of investigation to the IEC, WKCD A and Contractor;</li> <li>4. Discuss with the IEC and Contractor on remedial measures required;</li> <li>5. Increase monitoring frequency to check mitigation effectiveness.</li> </ol>	<ol style="list-style-type: none"> <li>1. Review the investigation results submitted by the ET;</li> <li>2. Review the proposed remedial measures by the Contractor and advise the WKCD A accordingly;</li> <li>3. Advise the WKCD A on the effectiveness of the proposed remedial measures.</li> </ol>	<ol style="list-style-type: none"> <li>1. Confirm receipt of notification of failure in writing;</li> <li>2. Limit Level	<ol style="list-style-type: none"> <li>1. Inform IEC, WKCD A, Contractor and EPD;</li> <li>2. Repeat measurements to confirm findings;</li> <li>3. Increase monitoring frequency;</li> <li>4. Identify source and investigate the cause of exceedance;</li> <li>5. Carry out analysis of Contractor’s working procedures;</li> <li>6. Discuss with the IEC, Contractor and WKCD A on remedial measures required;</li> <li>7. Assess effectiveness of Contractor’s remedial actions and keep IEC, EPD and WKCD A informed of the results;</li> <li>8. If exceedance stops, cease additional monitoring.</li> </ol>	<ol style="list-style-type: none"> <li>1. Discuss amongst WKCD A, ET, and Contractor on the potential remedial actions;</li> <li>2. Review Contractor’s remedial actions whenever necessary to assure their effectiveness and advise the WKCD A accordingly.</li> </ol>	<ol style="list-style-type: none"> <li>1. Confirm receipt of notification of failure in writing;</li> <li>2. Notify Contractor;</li> <li>3. In consolidation with the IEC, agree with the Contractor on the remedial measures to be implemented;</li> <li>4. Supervise the implementation of remedial measures;</li> <li>5. If exceedance continues, consider stopping the Contractor to continue working on that portion of work which causes the exceedance until the exceedance is abated.</li> </ol>	<ol style="list-style-type: none"> <li>1. Take immediate action to avoid further exceedance;</li> <li>2. Submit proposals for remedial actions to IEC and WKCD A within 3 working days of notification;</li> <li>3. Implement the agreed proposals;</li> <li>4. Submit further proposal if problem still not under control;</li> <li>5. Stop the relevant portion of works as instructed by the WKCD A until the exceedance is abated.</li> </ol>

#### 4. REVISIONS FOR INCLUSION IN THE EM&A MANUAL

The baseline environmental monitoring was conducted according to the EM&A Manual for air quality and noise.

According to EM&A Manual Section 2.1.5 and Section 3.1.3, the monitoring locations of air quality monitoring and noise monitoring are defined. However, due to premises access contingencies, AM5 and NM5 are relocated to alternative locations as shown in **Table 2.5-1** and **Table 3.5-1**.

The monitoring methodology and parameters monitored are all in line with the EM&A Manual.

## 5. COMMENTS AND CONCLUSION

The baseline environmental monitoring was conducted from 08 August 2020 to 23 August 2020. The baseline monitoring results were used to determine the appropriate Action and Limit Levels with the Limit Levels set against statutory or otherwise agreed limit.

The baseline air quality and noise monitoring was carried out in accordance with the EM&A Manual, in respect of the methodology, equipment, location and monitoring parameters.

Baseline air quality monitoring station AM5 and noise monitoring station NM5 could not be accessed due to rejections from MTR and Grand Austin property management offices. Alternative locations are therefore proposed in compliance with the requirements of the EM&A Manual. After reviewing all locations in the vicinity of the construction activities, AM5A has been proposed as an alternative location for the original AM5 and NM5A has been proposed as an alternative location for the original NM5 by ET and previously approved by IEC, WKCD and EPD.

The baseline air quality (1-hour TSP and 24-hour TSP levels) monitoring was conducted at AM5A (an alternative monitoring location for AM5). The baseline air quality monitoring results for AM5A are considered representative to the ambient air quality conditions of the respective sensitive receiver. The Action and Limit Levels for the air quality are established based on the baseline monitoring results.

Baseline noise monitoring was conducted at monitoring station NM5A (an alternative monitoring location for NM5). The baseline noise monitoring results for NM5A are considered representative to the ambient conditions of the respective sensitive receiver.

In conclusion, the Contractor is advised to be aware of any site practice that may give rise to significant pollution to the existing environment. Implementation of necessary remedial measures should be ensured to rectify the potential impact on sensitive receivers located in the vicinity of the construction area.

Dear Sir,

**West Kowloon Cultural District Authority**  
**Contract No. CC/2018/2A/073: Foundation and Excavation and**  
**Lateral Support Works for Integrity Basement and Underground Road in**  
**Zone 2A of West Kowloon Cultural District**  
**Request Access for Air Monitoring at West Kowloon Terminus**

Your letter of Reference: BFJV/S2013/16085/0012 dated 10 July 2020 in respect of the captioned subject refers.

Please be advised that since the locations of the proposed air monitoring work are within the Express Rail Link West Kowloon Terminus premise which is currently closed and hence cannot be accessed by public. Hence currently we are unable to provide you the necessary access for the air monitoring work.

Should you have any queries, please feel free to contact the undersigned (tel.: 9172 8364, fax no.: 2754 6959 or e-mail: [kmyu@mtr.com.hk](mailto:kmyu@mtr.com.hk)).

Yours faithfully

K M Yu

**Lateral Support Works for Integrated Basement and Underground Road in**  
**Zone 2A of the West Kowloon Cultural District**  
**Request Access for Air Monitoring at West Kowloon Terminus**

We are the main contractor for the project of West Kowloon Cultural District.

To promote well-being of the neighborhood and fulfill in environmental aspect, we would like to request access for baseline and impact air monitoring at your premise with the following details:

Location	Type of Measurement	Parameter	Duration	Period	Frequency
1. Planter Area, Footbridge between Elements and West Kowloon Terminus	Baseline Monitoring, Air Quality	24-hr TSP	14 consecutive days	Start from early July 2020	24 hours per day
		1-hr TSP			3 hours per day
2. Open space at Topside of West Kowloon Terminus	Impact Monitoring, Air Quality	24-hr TSP	Once every 6 days	3 <sup>rd</sup> week of July 2020 - Nov 2022	24 hours per visit
		1-hr TSP			3 hours per visit

Should any further information is required, please feel free to contact our Environmental Engineer – William Chan at 5408 3045.

We look forward to your reply in acknowledgement of this letter.

Thank you.

Yours faithfully,

CL LAW

Dear Ricky

Further to our site visit today (08 July 2020), it is noted that Hong Kong West Kowloon Station was closed due to the COVID-19 pandemic until further notice. The selected location in your drawing was in-accessible now, please consider other location.

Thanks

Dear

The captioned subject refers.

Please be advised that from Railway Protection point of view, we have no objection to the proposal of Air Monitoring.

Please contact our Mr. Dave Fan (Tel.: 6378 9288) to have a site , to identify the exact location , to check the accessibility of the monitoring location and to identify any power source for your equipment, and to inform our XRL Station Controller if deem necessary.

Please also be alerted that the security of the monitoring equipment placing there is your own responsibility.

Dear Yu Sir,

To promote well-being of the neighborhood in environmental aspect, we would like to seek for your advice on site access for baseline and impact air monitoring at your property with the following details:

Location	Type of Measurement	Parameter	Duration	Period	Frequency
1. Planter Area, Footbridge between Elements and West Kowloon Terminus 2. Open space at Topside of West Kowloon Terminus	Baseline Monitoring, Air Quality	24-hr TSP	14 consecutive days	Start from early July 2020	24 hours per day
		1-hr TSP			3 hours per day
	Impact Monitoring, Air Quality	24-hr TSP	Once every 6 days	3 <sup>rd</sup> week of July 2020 - Nov 2022	24 hours per visit
		1-hr TSP			3 hours per visit

Our Environmental Engineer – William Chan (tel. 5408 3045) will contact you directly for more details, thank you.

Best Regards

*Ricky Pang*

Dear Mr. Law,

**Re: Request Access for Noise Monitoring at Grand Austin**

We refer to your email and written request dated 4 July 2020 and 6 July 2020 respectively for the captioned, we regret to inform you that your request for noise monitoring at our premises is declined due to security manpower constraints.

If you require any further information and discussion in this regard, please contact our Assistant Property Manager, Ms. Czerny Wu at 3417 9988 during office hours.

Yours sincerely,

Carmen Lee  
Property Manager

Dear William,

Thank you for your mail and the subsequent conversation this morning. As spoke, we regret to decline as the proposing test period & frequency are quite demanding and it's a bit hard to facilitate under our manpower & security constraint.

Thank you very much again for your understanding.

Best Regards,

**Czerny Wu**

Dear Sir/Madam,

We are the main contractor for the project of West Kowloon Cultural District.

To promote well-being of the neighborhood in environmental aspect, we would like to seek for your advice on site access for baseline and impact noise monitoring at your property with the attached details:

Location	Type of Measurement	Parameter	Duration	Period	Frequency
Open area, 1m away from the façade of the Grand Austin	Baseline Monitoring, Noise	Leq (30 min)	14 consecutive days	6/7 – 20/7	12 hours (0700-1900)
	Impact Monitoring, Noise	Leq (30 min)	Weekly	August 2020 – Nov 2022	30 min (0700-1900)

Should you have any inquiries, please do not hesitate to contact the undersigned.

Regards,

William H. Chan

Environmental Engineer

Bachy Soletanche – Fujita Corporation Joint Venture

# Appendix 3 BASELINE MONITORING SCHEDULE

# August 2020 (Hong Kong)

Sun	Mon	Tue	Wed	Thu	Fri	Sat
26	27	28	29	30	31	1
2	3	4	5	6	7	8 TSP and Noise Baseline Monitoring
9 TSP and Noise Baseline Monitoring	10 TSP and Noise Baseline Monitoring	11 TSP and Noise Baseline Monitoring	12 TSP and Noise Baseline Monitoring	13 TSP and Noise Baseline Monitoring	14 TSP and Noise Baseline Monitoring	15 TSP and Noise Baseline Monitoring
16 TSP and Noise Baseline Monitoring	17 TSP and Noise Baseline Monitoring	18 TSP and Noise Baseline Monitoring	19 TSP and Noise Baseline Monitoring	20 TSP and Noise Baseline Monitoring	21 TSP and Noise Baseline Monitoring	22 TSP and Noise Baseline Monitoring
23 TSP and Noise Baseline Monitoring	24	25	26	27	28	29
30	31	1	2	3	4	5

Note: Typhoon Higos hoisted Signal No. 1 at 03:40 on 18 August 2020 and moved away from Hong Kong at 13:20 on 19 August 2020. Typhoon Signal No. 8 and No. 9 were hoisted during the period. The monitoring data of air quality and noise monitoring at AM5A and NM5A on 18 August and 19 August 2020 are recorded and provided for reference only; these data have not been taken into account.

# Appendix 4 CALIBRATION CERTIFICATES

# TE-5170 Calibration Worksheet

## Site Information

<b>Location:</b> AM5A	Zones 2A at West	<b>Date:</b> 20-Jul-20
<b>Sampler:</b> TE-5170	<b>Site ID:</b> Kowloon Cultural	<b>Tech:</b> CS Tang
	<b>Serial No:</b> 4344	

## Site Conditions

<b>Barometric Pressure (in Hg):</b> 29.83	<b>Corrected Pressure (mm Hg):</b> 758
<b>Temperature (deg F):</b> 86	<b>Temperature (deg K):</b> 303
<b>Average Press. (in Hg):</b> 29.83	<b>Corrected Average (mm Hg):</b> 758
<b>Average Temp. (deg F):</b> 86	<b>Average Temp. (deg K):</b> 303

## Calibration Orifice

<b>Make:</b> Tisch	<b>Qstd Slope:</b> 1.29548
<b>Model:</b> TE-5025A	<b>Qstd Intercept:</b> -0.03015
<b>Serial#:</b> 3543	<b>Date Certified:</b> 8-Nov-19

## Calibration Information

Plate or Test #	H2O (in)	Qstd (m3/min)	I (chart)	IC (corrected)	Linear Regression
1	12.10	2.682	53.0	52.48	<b>Slope:</b> 18.8945 <b>Intercept:</b> 1.3772 <b>Corr. Coeff:</b> 0.9985  <b># of Observations:</b> 5
2	10.30	2.476	48.0	47.53	
3	7.30	2.088	41.0	40.60	
4	4.30	1.608	33.0	32.68	
5	2.20	1.157	23.0	22.77	

## Calculations

$$Qstd = 1/m[\text{sqrt}(H2O(Pa/Pstd)(Tstd/Ta))-b]$$

$$IC = I[\text{sqrt}(Pa/Pstd)(Tstd/Ta)]$$

Qstd = standard flow rate  
 IC = corrected chart response  
 I = actual chart response  
 m = calibrator Qstd slope  
 b = calibrator Qstd intercept  
 Ta = actual temperature during calibration (deg K)  
 Pa = actual pressure during calibration (mm Hg)  
 Tstd = 298 deg K  
 Pstd = 760 mm Hg  
 For subsequent calculation of sampler flow:  
 $1/m((I)[\text{sqrt}(298/Tav)(Pav/760)]-b)$

m = sampler slope  
 b = sampler intercept  
 I = chart response  
 Tav = daily average temperature  
 Pav = daily average pressure

<b>Average I (chart):</b> 40
<b>Average Flow Calculation m3/min</b> 2.00242263
<b>Average Flow Calculation in CFM</b> 70.70554307
<b>Sample Time (Hrs):</b> 1.0
<b>Total Flow in m3/min</b> 120.1453578
<b>Total Flow in CFM</b> 4242.332584

**NOTE: Ensure calibration orifice has been certified within 12 months of use**

# Certificate of Calibration

Customers Ref. \* : A005

**Item Under Calibration (IUC)\***

Equipment No. : N/A  
Manufacturer : Met One Instruments, Inc.  
Model No. : Aerocet-531S  
Serial No. : P21676  
Scale Division : 0.001 mg/m<sup>3</sup>  
Range : 0.001 to 1 mg/m<sup>3</sup>  
Condition of Item : Normal

Date Item Received : 17-Nov-19  
Date Calibrated : 17-Nov-19  
Calibration Location : AQuality Calibration Lab.  
Date of Next Calibration : 16-Nov-20  
Calibrated By : Jessica Liu

**Test Environment**

Ambient Temperature : 26.5 °C to 21.4 °C  
Relative Humidity : 66 % to 87 %

**Calibration Results**

Reference True Reading (mg/m <sup>3</sup> )	Average IUC Reading (mg/m <sup>3</sup> )	Correction (mg/m <sup>3</sup> )	Error of IUC Reading (%)	Expanded Uncertainty (mg/m <sup>3</sup> )	Coverage Factor K
0.062	0.058	0.004	-6.3	0.041	2.0
0.307	0.312	-0.004	1.3	0.053	2.0
0.546	0.577	-0.031	5.3	0.052	2.0

**Remarks**

1. \* Denotes information supplied by customer.  
2. The results relate only to the items calibrated.  
3. The results apply to the items as received.  
4. Correction = Average of (Ref reading - IUC reading)  
5. The technical requirement of laser dust meter. +/- 20% error for the particles concentration.

### CERTIFICATE OF CALIBRATION

Report Number : 1911ICA-4F  
Date of Report : 22-Nov-19  
Page Number : 2 of 2  
Customer \* : Apex Testing & Certification Ltd.  
Customers Ref. \* : A005

#### Details of Calibration

1. The calibration was performed in accordance with AQuality Testconsult Procedure Number ENV-L-003 (in-house method), by comparison with the laboratory's reference equipment which have traceable international standards of measurement.
2. The item under calibration (IUC) was allowed to stabilize in the laboratory for 0.25 hour before commencement of calibration.
3. A set of readings were made at each calibration concentration. The values quoted in the results are the average of each set of readings.
4. The values given in this calibration certificate only relate to the values measured at the time of calibration. Any uncertainties quoted do not include allowance for the capability of any other laboratory to repeat the measurement. The uncertainty quoted relate only to item at time of calibration. AQuality Testconsult Limited is not liable for any loss or damage resulting from the use of this equipment.
5. The identification, calibration certificate numbers for the reference equipment used were as follows :

<u>Equipment Number</u>	<u>Certificate Number</u>	<u>Description</u>
CH-LDM-1	HBW201901312	粉尘测试仪

6. Copies of the Calibration certificates of the reference equipment used in this calibration may be obtained from AQuality Testconsult Limited, if necessary.

一、外观及工作正常性检查： 正常

Appearance and Performance checked: Normal

二、指示声压级调整（1000Hz）：

计权方式	声压级标准值(dB)	调校前声压级示值(dB)	调校后声压级示值(dB)	接受限(dB)
A	94	93.9	未调	93.7~ 94.3

三、频率计权的声信号实验（1000Hz/频率计权:A）：

声压级标准值(dB)	声压级指示值(dB)	误差(dB)	接受限(dB)
44	44.5	+0.5	43.2~ 44.8
54	54.4	+0.4	53.2~ 54.8
64	64.2	+0.2	63.2~ 64.8
74	73.9	-0.1	73.2~ 74.8
84	83.9	-0.1	83.2~ 84.8
94	93.9	-0.1	93.2~ 94.8
104	103.9	-0.1	103.2~ 104.8
114	114.0	0.0	113.2~ 114.8

四、自生噪声：

测试类型	频率计权	实测值(dB)
声信号	A	25.1
	A	20.2
电信号	C	30.5
	Z	31.4

# 校准结果

五、级限性 (频率1000Hz) : 起始点指示声级 90 dB

频率	测量项目	实测值(dB)	接受限(dB)
1000	起始点以上每间隔10dB最大误差	-0.1	± 0.3
	起始点以下每间隔10dB最大误差	0.0	± 0.3
	距上限5dB内每隔1dB最大偏差	+0.1	± 0.3
	距下限5dB内每隔1dB最大偏差	+0.1	± 0.3
8000	起始点以上每间隔10dB最大误差	-0.2	± 0.3
	起始点以下每间隔10dB最大误差	-0.1	± 0.3
	距上限5dB内每隔1dB最大偏差	0.0	± 0.3
	距下限5dB内每隔1dB最大偏差	+0.1	± 0.3

六、频率计权:

1、A计权

频率(Hz)	A计权标准值(dB)	A计权响应(dB)	接受限(dB)
10	-70.4	-71.2	-67.4 ~ ∞
20	-50.5	-50.8	-48.5 ~ -52.5
31.5	-39.4	-39.7	-37.9 ~ -40.9
63	-26.2	-26.3	-25.2 ~ -27.2
125	-16.1	-16.2	-15.1 ~ -17.1
250	-8.6	-8.7	-7.6 ~ -9.6
500	-3.2	-3.3	-2.2 ~ -4.2
1000	0.0	0.0	+0.7 ~ -0.7
2000	+1.2	+1.3	+2.2 ~ +0.2
4000	+1.0	+1.3	+2.0 ~ 0.0
8000	-1.1	-0.4	+0.4 ~ -3.6
16000	-6.6	-9.6	-4.1 ~ -22.6
20000	-9.3	-21.2	-6.3 ~ ∞

# 校准结果

## RESULTS OF CALIBRATION

证书编号 WC19213911151Q07-02  
 Certificate No.

第 5 页 共 7 页

### 2、C计权

频率(Hz)	C计权标准值(dB)	C计权响应(dB)	接受限(dB)
10	-14.3	-15.6	-11.3 ~ ∞
20	-6.2	-6.5	-4.2 ~ -8.2
31.5	-3.0	-3.2	-1.5 ~ -4.5
63	-0.8	-0.8	+0.2 ~ -1.8
125	-0.2	-0.2	+0.8 ~ -1.2
250	0.0	0.0	+1.0 ~ -1.0
500	0.0	0.0	+1.0 ~ -1.0
1000	0.0	0.0	+0.7 ~ -0.7
2000	-0.2	-0.1	+0.8 ~ -1.2
4000	-0.8	-0.5	+0.2 ~ -1.8
8000	-3.0	-2.3	-1.5 ~ -4.5
16000	-8.5	-11.5	-6.0 ~ -24.5
20000	-11.2	-23.1	-8.2 ~ ∞

### 3、Z计权

频率(Hz)	Z计权标准值(dB)	Z计权响应(dB)	接受限(dB)
10	0.0	-1.3	+3.0 ~ ∞
20	0.0	-0.4	+2.0 ~ -2.0
31.5	0.0	-0.2	+1.5 ~ -1.5
63	0.0	-0.1	+1.5 ~ -1.5
125	0.0	0.0	+1.0 ~ -1.0
250	0.0	0.0	+1.0 ~ -1.0
500	0.0	0.0	+1.0 ~ -1.0
1000	0.0	0.0	+0.7 ~ -0.7
2000	0.0	0.0	+1.0 ~ -1.0
4000	0.0	0.0	+1.0 ~ -1.0
8000	0.0	0.0	+1.5 ~ -2.5
16000	0.0	+0.1	+2.5 ~ -16.0
20000	0.0	-0.2	+3.0 ~ ∞

# 校准结果

## RESULTS OF CALIBRATION

第 6 页 共 7 页

证书编号 WC19213911151Q07-02

Certificate No.

七、1kHz处的频率计权:

A计权参考声级(dB)	C频率计权相对A频率计权的偏差(dB)	Z频率计权相对A频率计权的偏差(dB)	接受限(dB)
94	0.0	0.0	±0.2

八、F和S时间计权:

衰减速率(dB/s)	实测值(dB/s)	接受限(dB/s)
快(F)计权	34.6	31.0~38.5
慢(S)计权	4.4	3.6~5.1

九、猝发音响应(A计权):

猝发音持续时间(ms)	$L_{AFmax}-L_A$ 标准值	$L_{AFmax}-L_A$ 指示值	接受限(dB)
200	-1.0	-1.0	-0.5~-1.5
2	-18.0	-18.2	-17.0~-18.5
0.25	-27.0	-27.4	-26.0~-30.0

猝发音持续时间(ms)	$L_{ASmax}-L_A$ 标准值	$L_{SFmax}-L_A$ 指示值	接受限(dB)
200	-7.4	-7.4	-6.9~-7.9
2	-27.0	-27.1	-26.0~-30.0

说明(Notes):

1、依据JJF1059.1-2012测量不确定度评定与表示，本次校准结果的扩展不确定度为：

10Hz~200Hz:  $U=0.5\text{dB}$ ,  $k=2$ ; 250Hz~1.25kHz:  $U=0.4\text{dB}$ ,  $k=2$ ;

1.6kHz~10kHz:  $U=0.4\text{dB}$ ,  $k=2$ ; 12.5kHz~20kHz:  $U=0.6\text{dB}$ ,  $k=2$

According to JJF1059.1-2012 Evaluation and Expression of Uncertainty in Measurement, Expanded uncertainty of

measurement: 10Hz~200Hz:  $U=0.5\text{dB}$ ,  $k=2$ ; 250Hz~1.25kHz:  $U=0.4\text{dB}$ ,  $k=2$ ;

1.6kHz~10kHz:  $U=0.4\text{dB}$ ,  $k=2$ ; 12.5kHz~20kHz:  $U=0.6\text{dB}$ ,  $k=2$

2、校准项目符合1级技术要求

The calibrated items are accord with class 1 technical specifications

3、仪器配传声器型号：AWA14425； 传声器编号：15386

### Data Record Sheet for TSP Monitoring

Monitoring Location		AM5A North of West Kowloon Station's station box (G/F)
Details of Location		AM5A North of West Kowloon Station's station box (G/F)
Sample Identification		200808511
Date & Time of Sampling		18/8/2020
Elapsed-time	Start (hr)	1323.6
Meter Reading	Stop (hr)	1347.6
Total Sampling Time (hr)		24.0
Weather Conditions (Sunny / Fine / Cloudy / Rainy)		Rainy
Rainfall (mm)		50 - 70
Site Conditions		
Initial Flow Rate, Qsi	Pi (hpa)	1006.2
	Ti (°C)	27.3
	Hi (cfm)	40.0
	Qsi (Std. m <sup>3</sup> )	1.13
Final Flow Rate, Qsi	Pi (hpa)	1006.0
	Ti (°C)	26.6
	Hi (cfm)	39.0
	Qsi (Std. m <sup>3</sup> )	1.10
Average Flow Rate (Std. m <sup>3</sup> )		1.12
Total Volume (Std. m <sup>3</sup> )		1609.70
Filter Paper Identification No.		200808511
Initial Wt. of Filter Paper (g)		2.8017
Final Wt. of Filter Paper (g)		2.8405
Measured TSP Level (ug/m <sup>3</sup> )		24.1
Other Dust Emission Source(s) Observed		Nil
Remarks /Other Observations		Nil

Note: Monitoring data on 18 and 19 August 2020 are provided for reference only

# 1-HOURS TSP DATA

**RECORD OF BASELINE DUST MONITORING**

Record Sheet for 1-hour Total Suspended Particulates Monitoring  
(for each measurement)

Contract No. : /

Contract Title. : Foundation and Excavation and Lateral Support Works for Integrated Basement and Underground Road in Zones 2A at West Kowloon Cultural District

Data of Monitoring	08-08-2020	
Monitoring Location	AM5A	
Description of the Location	Far East Consortium Building	
Measurement Method (Direct measurement or High Volume Sampler)	Direct measurement	
Equipment Use (Model and Serial No.)	Met One Instruments/ Aerocet-531S P21676	
Weather Condition	Status	Fine
	Wind Strength (m/s)	<1
Frequency of Monitoring	3x1-hr TSP Monitoring	
Time of Monitoring	Start	14:09
	Finish	15:09
Measured 1-hour TSP( $\mu\text{g}/\text{m}^3$ )	44	16:09
	50	17:09
Site Construction Activities	43

## Mutual Recognition Arrangements (MRA) / Multilateral Recognition Arrangements (MLA)

- ➔ [HOKLAS - Mutual Recognition Arrangements \(MRA\)](#).
- ➔ [HKCAS - Multilateral Recognition Arrangements \(MLA\)](#).
- ➔ [HKIAS - Mutual Recognition Arrangement \(MRA\)](#).

### HOKLAS - Mutual Recognition Arrangements (MRA)

Every effort is made to promote acceptance of test data from accredited laboratories, both internationally and locally. HKAS has concluded mutual recognition arrangements with accreditation bodies listed below by being one of the signatories of the [International Laboratory Accreditation Cooperation Mutual Recognition Arrangement \(ILAC MRA\)](#) and the [Asia Pacific Accreditation Cooperation Mutual Recognition Arrangement \(APAC MRA\)](#) for testing, calibration, medical testing, Proficiency Testing Providers (PTP) and Reference Material Producers (RMP). Click [here](#) to view the up-to-date signatories of ILAC and [here](#) to access the up-to-date signatories of APAC.

Visitors checking the names, logos and accreditation symbols shown on an endorsed certificate or report should note that some of our MRA partners may have their names, logos or accreditation symbols changed recently and test reports or certificates endorsed by displaying their old accreditation symbols may still be valid during the change-over period. For details, please visit their websites or contact them directly.

- [Mutual Recognition Arrangement \(MRA\) Partners for HOKLAS](#)

HKAS MRA partners will recognise HOKLAS endorsed test certificates as having the same technical validity as certificates endorsed by their respective schemes.

### HKCAS - Multilateral Recognition Arrangements

HKAS has been a signatory of [Asia Pacific Accreditation Cooperation Mutual Recognition Arrangement \(APAC MRA\)](#) for Quality Management System (QMS), Environmental Management System (EMS), Food Safety Management System (FSMS), Energy Management System (EnMS), Occupational Health and Safety Management System (OHSMS) certifications, product certifications, and Greenhouse Gas (GHG) validation and verification.

HKAS has also been a signatory of the [International Accreditation Forum Multilateral Recognition Arrangement \(IAF MLA\)](#) for Quality Management System (QMS), Environmental Management System (EMS), Food Safety Management System (FSMS), Energy Management System (EnMS) certifications, product certifications, and Greenhouse Gas (GHG) validation and verification.

Click [here](#) to view the up-to-date signatories of IAF and [here](#) to access the up-to-date signatories of APAC.

- [Mutual / Multilateral Recognition Arrangements \(MRA / MLA\) Partners for HKCAS](#)

### HKIAS - Mutual Recognition Arrangements (MRA)

HKAS has concluded mutual recognition arrangements with accreditation bodies listed below by being one of the signatories of the [International Laboratory Accreditation Cooperation Mutual Recognition Arrangement \(ILAC MRA\)](#) and [Asia Pacific Accreditation Cooperation Mutual Recognition Arrangement \(APAC MRA\)](#) for inspection. Click [here](#) to view the up-to-date signatories of ILAC and [here](#) to access the up-to-date signatories of APAC.

HKAS MRA partners will recognise HKIAS endorsed inspection reports or certificates having the same technical validity as reports or certificates endorsed by their respective schemes.

# CERTIFICATE OF ACCREDITATION

*This is to attest that*

## AQUALITY TESTCONSULT LIMITED

11A&B, KAI FONG GARDEN, PING CHE ROAD  
FANLING, HONG KONG

Calibration Laboratory CL-207

has met the requirements of AC204, IAS Accreditation Criteria for Calibration Laboratories, and has demonstrated compliance with the ISO/IEC Standard 17025:2017, General requirements for the competence of testing and calibration laboratories. This organization is accredited to provide the services specified in the scope of accreditation maintained on the IAS website ([www.iasonline.org](http://www.iasonline.org)).

*This certificate is valid up to December 1, 2020.*

*(See laboratory's scope of accreditation for fields of calibration and accredited calibration.)*

*This accreditation certificate supersedes any IAS accreditation bearing an earlier effective date. The certificate becomes invalid upon suspension, cancellation or revocation of accreditation. See [www.iasonline.org](http://www.iasonline.org) for current accreditation information, or contact IAS at 562-364-8201.*

FANLING, HONG KONG

Testing Laboratory TL-800

has met the requirements of AC89, IAS Accreditation Criteria for Testing Laboratories, and has demonstrated compliance with ISO/IEC Standard 17025:2017, General requirements for the competence of testing and calibration laboratories. This organization is accredited to provide the services specified in the scope of accreditation maintained on the IAS website ([www.iasonline.org](http://www.iasonline.org)).

*This certificate is valid up to August 1, 2020.*

*This accreditation certificate supersedes any IAS accreditation bearing an earlier effective date. The certificate becomes invalid upon suspension, cancellation or revocation of accreditation. See [www.iasonline.org](http://www.iasonline.org) for current accreditation information, or contact IAS at 562-364-8201.*

Tropical Cyclone Warning Signals

## Tropical Cyclone Warning Signals

Searching period : [202008 - 202008]

Signal number : [1.or.higher]

Total number of records : [8]

Intensity	Name	Signal	Start Time		End Time		Duration hh mm
			hh mm	dd/mon/yyyy	hh mm	dd/mon/yyyy	
Tropical Depression	SINLAKU	3	20:40	31/Jul/2020	21:10	01/Aug/2020	24 30
Tropical Depression	SINLAKU	1	21:10	01/Aug/2020	23:15	01/Aug/2020	02 05
Typhoon	HIGOS	1	03:40	18/Aug/2020	14:20	18/Aug/2020	10 40
Typhoon	HIGOS	3	14:20	18/Aug/2020	22:40	18/Aug/2020	08 20
Typhoon	HIGOS	8 NE	22:40	18/Aug/2020	01:30	19/Aug/2020	02 50
Typhoon	HIGOS	9	01:30	19/Aug/2020	07:40	19/Aug/2020	06 10
Typhoon	HIGOS	8 SE	07:40	19/Aug/2020	11:10	19/Aug/2020	03 30
Typhoon	HIGOS	3	11:10	19/Aug/2020	13:20	19/Aug/2020	02 10

Signals No. 5, 6, 7 and 8 were used to signify gales from the NW, SW, NE and SE respectively between 1931 and 1972. To avoid misunderstanding by the public, the Signals No. 5 to 8 were replaced by the Signals No. 8 NW, 8 SW, 8 NE and 8 SE in 1 January 1973. The Signals No. 8 NW, 8 SW, 8 NE and 8 SE between 1946 and 1972 as shown in this database were originally the Signals No. 5 to 8 used at the time.
