Attention: Mr. Joseph YAN

13 December 2023

Dear Joseph,

# NE/2017/05 Road Widening and Retrofitting Noise Barriers on Tai Po Road (Sha Tin Section) Monthly EM&A Report for November 2023

I refer to the email of the ET regarding to the captioned Monthly EM&A Report with report No. 0064/18/ED/0799A, I have no adverse comment on it and verify this monthly report according to section 1.9 of the Environmental Permit with Permit No. EP- 463/2013/B.

Yours faithfully,

Li Wai Ming Kevin Independent Environmental Checker

#### LIST OF APPENDICES

- Appendix A Construction Programme
- Appendix B Project Organization Chart
- Appendix C Action and Limit Levels for Air Quality and Noise
- Appendix D Calibration Certificates of Monitoring Equipment
- Appendix E Environmental Monitoring Schedules, Examination Schedules and Arrangements on Deferral of Class Resumption for All Schools
- Appendix F Air Quality Monitoring Data
- Appendix G Noise Monitoring Data
- Appendix H Event Action Plans
- Appendix I Waste Flow Table
- Appendix J Environmental Mitigation Implementation Schedule (EMIS)
- Appendix K Weather and Meteorological Conditions during Reporting Month
- Appendix L Cumulative statistics on Environmental Complaints, Notifications of Summons and Successful Prosecutions
- Appendix M Summary of Site Audit in the Reporting Month

#### **EXECUTIVE SUMMARY**

- i. The Civil Engineering and Development Department HKSAR has appointed Fugro Technical Services Limited (FTS) to undertake the Environmental Team services for the Project and implement the EM&A works.
- ii. This Monthly EM&A report presents the environmental monitoring and audit works for the period between 1 November 2023 and 30 November 2023. As informed by the Contractor, major activities in the reporting month were summarized as below table:

Zone 1	Zone 2	Zone 3	Zone 4	Zone 5
<ul> <li>Trial pits excavation</li> <li>Road surface Maintenance</li> <li>Slope Reinstatement and Drainage Works</li> <li>Noise Barrier Erection Works</li> <li>Relocation of Existing Fire Hydrants and relating Watermains</li> <li>Reinstatement of cycling track</li> <li>Construction of Tunnel sign</li> <li>Construction of Transition</li> </ul>	<ul> <li>Trial pits excavation</li> <li>Road surface Maintenance</li> <li>Noise Barrier Erection Works</li> <li>Relocation of Existing Fire Hydrants and relating Watermains</li> <li>Construction of Draw pit and Pillar box</li> <li>Construction of Transition</li> </ul>	<ul> <li>Tree Works (preservation / felling/ pruning/ transplantation)</li> <li>Road surface Maintenance</li> <li>Reinstatement of footpath and cycle track</li> <li>Construction of Retaining Wall</li> <li>Lift no.2 Installation + SR5 Foundation Works + Construction of [former staircase] Abutment Wall</li> <li>Construction Works for N263 &amp; N264 Bridge Deck Widening + Construction of New Abutment Wall + Demolition of Existing Beam/ Slab + Road Diversion + Asphalt Works</li> <li>Construction Works for Lift no.1</li> <li>Construction Works N262 Central median</li> <li>Relocation of Existing Fire Hydrants and relating Watermains</li> <li>Drainage Works + Road diversion+ Asphalt works</li> <li>Pilling Construction Works</li> </ul>	<ul> <li>Road surface Maintenance</li> <li>Noise Barrier Foundation Works</li> <li>Watermains</li> <li>Road Construction (Bitumen paving)</li> <li>Noise Barrier Erection Works</li> <li>Drainage Construction Works</li> <li>Road Construction</li> <li>Drainage Works + Road diversion + Asphalt works</li> </ul>	<ul> <li>Road surface Maintenance</li> <li>Noise Barrier Foundation Works</li> <li>Slope Landscaping Works + Irrigation System for Landscaping + Drainage Works on Slope</li> <li>Noise Barrier Erection Works</li> <li>Reinstatement of cycling track</li> <li>Road Construction (Bitumen paving)</li> <li>Drainage Construction Works</li> </ul>

#### **Breaches of the Action and Limit Levels**

- iii. 24-hour and 1-hour TSP impact monitoring were carried out in the reporting month, no Action / Limit Level exceedance was recorded during the period.
- iv. Day time construction noise monitoring was carried out in the reporting month, no Action / Limit Level exceedance was recorded during the period.
- v. Regular night time noise monitoring was carried out on 2, 9, 14, 23 and 28 November 2023 respectively and no exceedance case was recorded between 2300 and 0700 of the next day during the reporting month.

#### Complaint, Notification of Summons and Successful Prosecution

- vi. Eight complaints were received in the report month. The summaries are listed below:
  - A complaint was received by 1823 (CASE#3-7965710201) on 1st November 2023. The complainant who is concerned about the noise nuisance generated from night-time construction works near Tai Po Road.
  - A complaint was received by 1823 (CASE: 3-7971500925) on 5th November 2023. The complainant who is concerned about the noise nuisance generated from night-time construction works near Tai Po Road.
  - A complaint was received by EPD (EPD ref.: RN26643-23) on 8th November 2023. The complainant who is concerned about the noise nuisance generated from night-time construction works near Tai Po Road.
  - A complaint was received by 1823 (1823 Case: 3-7979040785) on 9<sup>th</sup> November 2023. The complainant who is concerned about the noise nuisance generated from night-time construction works near Tai Po Road.
  - A complaint was received by EPD (EPD ref.: RN26820-23) on 9<sup>th</sup> November 2023. The complainant who is concerned about the noise nuisance generated from night-time construction works near Tai Po Road.
  - A complaint was received by 1823 (CASE: 3-7979906619) on 16<sup>th</sup> November 2023. The complainant who is concerned about the noise nuisance generated from night-time construction works near Tai Po Road.
  - A complaint was received by 1823 (CASE: 3-7979872320) on 20<sup>th</sup> November 2023. The complainant who is concerned about the noise nuisance generated from night-time construction works near Tai Po Road.
  - A complaint was received by 1823 (CASE#3-7956862047) on 30<sup>th</sup> November 2023. The complainant who is concerned about the noise nuisance generated from night-time construction works near Tai Po Road.

#### **Environmental Non-Compliance**

- vii. Three non-compliances were found in the report month. The summaries are listed below:
  - A complaint was received by EPD (EPD ref.: RN26820-23) on 9<sup>th</sup> November 2023. The complainant who is concerned about the noise nuisance generated from night-time construction works near Tai Po Road on 20<sup>th</sup> October 2023.

According to the complainant's video, no acoustic barrier was set up during sheet piling work which did not comply with the requirement listed in the CNP.

A non-compliance was given to the Main Contractor because of the violated of the CNP No.: GW-RN0894-23 condition 3.d.7.

 A complaint was received by 1823 (CASE: 3-7979906619) on 16<sup>th</sup> November 2023. The complainant who is concerned about the noise nuisance generated from night-time construction works near Tai Po Road on 7<sup>th</sup> November 2023.

According to the complainant's video, the excavator was carrying out sheet piling work, an acoustic barrier was set up near the excavator, but the barrier did not effectively screen the excavator and the piling area which did not comply with the requirement listed in the CNP.

A non-compliance was given to the Main Contractor because of the violated of the CNP No.: GW-RN1126-23 condition 3.d.7.

 A complaint was received by 1823 (CASE: 3-7979872320) on 20<sup>th</sup> November 2023. The complainant who is concerned about the noise nuisance generated from night-time construction works near Tai Po Road on 9<sup>th</sup> November 2023.

According to the complainant's video, the excavator was carrying out sheet piling work, acoustic barrier was screened in front of the pilling work area.

As the contractor did not provide adequate noise barriers to shield the excavator, it failed to effectively block the visible from noise sensitive receiver which did not comply with the requirement listed in the CNP.

A non-compliance was given to the Main Contractor because of the violated of the CNP No.: GW-RN1126-23 condition 3.d.7.

#### **Reporting Changes**

viii. There was no reporting change in the reporting month.

#### **Future Key Issues**

ix. The key issues to be considered in the coming reporting month include:

Potential environmental impacts arising from the above construction activities are mainly associated with construction dust, construction noise, water quality, waste management and landscape and visual impact.

#### 1. INTRODUCTION

#### 1.1 Background

- 1.1.1 Contract No. NE/2017/05 Road Widening and Retrofitting Noise Barriers on Tai Po Road (Sha Tin Section) (TPR-ST) (hereafter referred as "the Contract"), is the Works Contract involved the construction of road widening and retrofitting noise barriers on TPR-ST.
- 1.1.2 The Works of road widening on TPR-ST is classified as a designated project (DP) under the Part I of Schedule 2 of the Environmental Impact Assessment Ordinance (EIAO) (Cap. 499). The scale and scope of DP is classified as below:
  - Widening and reconstruction of an approximate 1.2 km long of the existing Tai Po Road (Sha Tin Section) from dual 2-lane to dual 3-lane carriageway; and improvement of the existing Sha Tin Rural Committee Road and its junctions.
- 1.1.3 The Environmental Monitoring and Audit (EM&A) programme under this Contract is governed by the Environmental Permit (EP) (EP No: EP-463/2013/B) and the updated EM&A Manual (Reference No.: 0064/18/ED/0122D). The Works to be executed under this Contract and corresponding EPs include but not be limited to the following main items:
  - (i) Road widening works of TPR-ST:
    - a. widening of TPR-ST of about 1.1 kilometres between Sha Tin Rural Committee Road (STRCR) and Fo Tan Road from dual two-lane to dual three-lane;
    - b.modification to the existing diamond interchange at TPR-ST / STRCR (STRCR Interchange);
    - c. provision of two pedestrian lifts, re-provision of staircase and cycle track ramp at the modified STRCR Interchange;
    - d. modification of existing cycle track subway no. NS30 near Sha Tin Plaza;
    - e. modification of the existing footbridge no. NF40 across TPR-ST near Wo Che Street;
    - f. modification of the existing footbridge no. NF66 near Fung Wo Lane;
    - g. installation of noise mitigation measures between Citylink Plaza and Mei Wo House of Wo Che Estate;
    - h.associated drainage works, waterworks, street lighting works and traffic control and surveillance system (TCSS).
  - (ii) Retrofitting of noise barriers along TPR-ST:
    - (a) western section between Citylink Plaza and Scenery Court;
    - (b) eastern section between Mei Wo House of Wo Che Estate and Fo Tan Road; and
    - (c) associated drainage works, waterworks and street lighting works.
  - (iii) Associated street furniture, road marking, traffic signs, directional signs, services and utilities, and
  - (iv) Associated landscaping works.
- 1.1.4 The location and boundary of the site is shown in **Figure 1**.

- 1.1.5 This Monthly EM&A report is required under EP-463/2013/B Condition 3.4. It is to report the results and findings of the EM&A programme required in the updated EM&A Manual.
- 1.1.6 This is the 60<sup>th</sup> monthly EM&A Report which summarized the impact monitoring results and audit findings for the construction of the road widening and retrofitting noise barriers on Tai Po Road (Sha Tin Section) (TPR-ST) (hereafter referred as "the Project") within the period between 1 November 2023 and 30 November 2023.

#### 1.2 **Project Organization**

- 1.2.1 The project proponent was the Civil Engineering and Development Department, HKSAR (CEDD). AECOM Asia Co. Ltd. (AECOM) was commissioned by CEDD as the Engineer for the Project. Acuity Sustainability Consulting Limited Nature & Technologies (HK) Limited Joint Venture was commissioned as the Independent Environmental Checker (IEC). China railway China Railway First Group Zhen Hua Engineering Joint Venture (CCZJV) was appointed as the main contractor for the construction works under the contract NE/2017/05. Fugro Technical Services Limited (FTS) was appointed as the Environmental Team (ET) by CEDD to implement the EM&A programme for the Project.
- 1.2.2 The organization structure is shown in **Appendix B**. The key personnel contact names and numbers for the Project are summarized in **Table 1.1**.

Party	Position	Name	Telephone		
Project Proponent (CEDD)	Senior Engineer	Mr. Joseph Yan	3152 3551		
Engineer's Representative (AECOM)	Chief Resident Engineer	Mr. Albert Yu	2276 0618		
IEC (Acuity Sustainability Consulting Limited – Nature & Technologies (HK) Limited Joint Venture)	Independent Environmental Checker	Mr. Kevin Li	9779 2247		
Main Contractor (CCZJV)	Site Agent	Mr. S.Y. Wong	9257 8521		
	Environmental Officer	Ms. Ymen Wong	5267 6087		
ET (FTS)	Environmental Team Leader	Mr. Calvin Leung	3565 4441		
	Environmental Team Member	Mr. Toby Wan	3656 4450

#### **1.3** Construction Programme and Activities

- 1.3.1 This project was commenced on 29 November 2018 and the construction works is expected to be completed in year 2023. The construction programme is shown in **Appendix A.**
- 1.3.2 A summary of the major construction activities undertaken in the reporting month were shown in below table:

Zone 1	Zone 2	Zone 3	Zone 4	Zone 5
<ul> <li>Trial pits excavation</li> <li>Road surface Maintenance</li> <li>Slope Reinstatement and Drainage Works</li> <li>Noise Barrier Erection Works</li> <li>Relocation of Existing Fire Hydrants and relating Watermains</li> <li>Reinstatement of cycling track</li> <li>Construction of Tunnel sign</li> <li>Construction of Transition</li> </ul>	<ul> <li>Trial pits excavation</li> <li>Road surface Maintenance</li> <li>Noise Barrier Erection Works</li> <li>Relocation of Existing Fire Hydrants and relating Watermains</li> <li>Construction of Draw pit and Pillar box</li> <li>Construction of Transition</li> </ul>	<ul> <li>Tree Works (preservation / felling/ pruning/ transplantation)</li> <li>Road surface Maintenance</li> <li>Reinstatement of footpath and cycle track</li> <li>Construction of Retaining Wall</li> <li>Lift no.2 Installation + SR5 Foundation Works + Construction of [former staircase] Abutment Wall</li> <li>Construction Works for N263 &amp; N264 Bridge Deck Widening + Construction of New Abutment Wall + Demolition of Existing Beam/ Slab + Road Diversion + Asphalt Works</li> <li>Construction Works for Lift no.1</li> <li>Construction Works for Lift no.1</li> <li>Construction of Existing Fire Hydrants and relating Watermains</li> <li>Drainage Works + Road diversion+ Asphalt works</li> <li>Pilling Construction Works</li> </ul>	<ul> <li>Road surface Maintenance</li> <li>Noise Barrier Foundation Works</li> <li>Watermains</li> <li>Road Construction (Bitumen paving)</li> <li>Noise Barrier Erection Works</li> <li>Drainage Construction Works</li> <li>Road Construction</li> <li>Drainage Works + Road diversion + Asphalt works</li> </ul>	<ul> <li>Road surface Maintenance</li> <li>Noise Barrier Foundation Works</li> <li>Slope Landscaping Works + Irrigation System for Landscaping + Drainage Works on Slope</li> <li>Noise Barrier Erection Works</li> <li>Road Construction (Bitumen paving)</li> <li>Drainage Construction Works</li> </ul>

#### 1.4 Status of Environmental Licenses, Notifications and Permits

1.4.1 A summary of the relevant environmental licenses, permits and/or notifications on environmental protection for this Contract is presented in **Table 1.2**.

#### Table 1.2 Relevant Environmental Licenses, Permits and/or Notifications

Environmental License / Permit / Notification	Reference Number	Valid From	Valid Till
Environmental Permit for whole project	EP-463/2013/B	20/12/2016	Nil
Receipt of the notification of construction dust production	Form NA	27/7/2018	Nil
Construction Waste Disposal Account	7031619	17/8/2018	Nil
Chemical Waste Producer Registration	5318-758-C4314-01	06/11/2018	Nil
Effluent Discharge License (Zone 1 – 5)	WT00032446-2018	09/11/2018	30/11/2023
Effluent Discharge License (Shui Chong Street)	WT00033829-2019	25/06/2019	30/06/2024
Construction Noise Permit for Road Closure, General Night Works (Zone 1 – 5)	GW-RN0970-23	27/09/2023	26/01/2024
Construction Noise Permit for General Night Works at STRCR N264 Area (Zone 3)	GW-RN0923-23	19/09/2023	18/12/2023
Construction Noise Permit for 1900 – 2200 General Night Works (Zone 3 – 5)	GW-RN1126-23	01/11/2023	31/12/2023

#### 2. AIR QUALITY

#### 2.1 Monitoring Requirement

In accordance with the updated EM&A Manuals, 24-hour & 1-hour Total Suspended Particulates (TSP) level at the designated air quality monitoring station are required. Impact 24-hour and 1-hour TSP monitoring should be carried out at least once every 6 days. The Action and Limit Levels of the air quality monitoring are given in **Appendix C**.

#### 2.2 Monitoring Equipment

The 24-hour and 1-hour TSP air quality monitoring was performed using High Volume Air Samplers (HVS) and portable TSP Monitors located at each of the designated monitoring station respectively.

 Table 2.1 and 2.2 summarizes the equipment used in air quality monitoring.

Item	Location	Brand	Model	Equipment	Serial Number
1	AMS4	*Sibata	Model LD-3B	Sibata Portable TSP Monitors	597318
2	AMS7A	*Sibata	Model LD-5R	Sibata Portable TSP Monitors	620407
3	AMS12	*Sibata	Model LD-5R	Sibata Portable TSP Monitors	620408
4	AMS17	*Sibata	Model LD-5R	Sibata Portable TSP Monitors	620480

#### Table 2.1 24-hour TSP Monitoring Equipment

\*Notes: As electricity supply is not available and accessible for the High Volume Samplers (HVS) at AMS 4, 7A, 12 and 17 portable Laser Particle Photometer Monitors will be utilized for 24-hour TSP monitoring instead of High Volume samplers (HVS). The correlation between HVS and the portable Laser Particle Photometer Monitors are presented in Appendix D.

#### Table 2.2 1-hour TSP Monitoring Equipment

Item	Location	Brand	Model	Equipment	Serial Number
1	AMS4	Sibata	Model LD-3B	Sibata Portable TSP Monitors	597318
2	AMS7A	Sibata	Model LD-5R	Sibata Portable TSP Monitors	620407
3	AMS12	Sibata	Model LD-5R	Sibata Portable TSP Monitors	620408
4	AMS17	Sibata	Model LD-5R	Sibata Portable TSP Monitors	620480

#### 2.3 Monitoring Methodology

2.3.1 24-hour TSP air quality monitoring by High Volume Air Samplers (HVS)

#### **HVS Installation**

The following guidelines were adopted during the installation of HVS:

- Sufficient support is provided to secure the samplers against gusty wind.
- No two samplers are placed less than 2 meters apart.
- The distance between the sampler and an obstacle, such as buildings, is at least twice the height that the obstacle protrudes above the sampler.
- A minimum of 2 meters of separation from walls, parapets and penthouses is required for rooftop samples.
- A minimum of 2 meters separation from any supporting structure, measured horizontally is required.
- No furnaces or incineration flues are nearby.

5

- Airflow around the samplers is unrestricted.
- The samplers are more than 20 meters from the drip line.
- Any wire fence and gate, to protect the sampler, should not cause any obstruction during monitoring.

#### Filters Preparation

Fiberglass filters (provided by the HOKLAS accredited laboratory) shall be used (Note: these filters have a collection efficiency of larger than 99% for particles of 0.3 µm diameter). A HOKLAS accredited laboratory (Fugro Technical Services Limited) is responsible for the preparation of 24-hr conditioned and pre-weighed filter papers for monitoring team.

All filters are equilibrated in the conditioning environment for 24 hours before weighing. The conditioning environment temperature is around 25°C and not variable by more than  $\pm$ 3°C; the relative humidity (RH) is < 50% and not variable by more than  $\pm$ 5%. A convenient working RH is 40%.

#### **Operating / Analytical Procedures**

Operating / analytical procedures for the air quality monitoring are highlighted as follows:

- Prior to the commencement of the dust sampling, the flow rate of the HVS are properly set (between 0.6 m<sup>3</sup>/min and 1.7 m<sup>3</sup>/min) in accordance with the EM&A manual. The flow rate shall be indicated on the flow rate chart.
- The power supply shall be checked to ensure the samplers worked properly.
- On sampling, the samplers shall be operated for 5 minutes to establish thermal equilibrium before placing any filter media at the designated air quality monitoring station.
- The filter holding frame is then removed by loosening the four nuts and carefully a weighted and conditioned filter is centered with the stamped number upwards, on a supporting screen.
- The filter shall be aligned on the screen so that the gasket formed an airtight seal on the outer edges of the filter. Then the filter holding frame is tightened to the filter holder with swing bolts. The applied pressure should be sufficient to avoid air leakage at the edges.
- The shelter lid shall be closed and secured with the aluminum strip.
- The timer is then programmed. Information shall be recorded on the record sheet, which included the starting time, the weather condition and the filter number (the initial weight of the filter paper can be found out by using the filter number).
- After sampling, the filter shall be removed and sent to laboratory for weighing. The elapsed time is also recorded.
- Before weighing, all filters are equilibrated in a conditioning environment for 24 hours. The conditioning environment temperature should be between 25°C and 30°C and not vary by more than ±3°C; the relative humidity (RH) should be < 50% and not vary by more than ±5%. A convenient working RH is 40%. Weighing results are returned to MCL for further analysis of TSP concentrations collected by each filter.

#### 2.3.2 24-hour TSP air quality monitoring by portable Laser Particle Photometer Monitors

#### **Operating / Analytical Procedures**

The measuring procedures of the 24-hr dust meter are in accordance with the Manufacturer's instruction Manual as follows:

- Pull up the air sampling inlet cover
- Change the Mode 0 to BG once
- Push Start/Stop switch once
- Turn the knob to SENSI.ADJ and press it
- Push Start/Stop switch once
- Return the knob to the position MEASURE slowly
- Push the timer set switch to set measuring time
- Remove the cap and make a measurement

Calculation of the value of 24-hr TSP concentration is given by the average of 24 calculated 1hr TSP concentration, where the calculated 1-hr TSP concentration is given by the product of the direct reading and the K-factor based on the correlation results between the direct reading meter and high volume sampler.

2.3.3 1-hour TSP air quality monitoring

#### Operating / Analytical Procedures

The measuring procedures of the 1-hr dust meter are in accordance with the Manufacturer's instruction Manual as follows:

- Pull up the air sampling inlet cover
- Change the Mode 0 to BG once
- Push Start/Stop switch once
- Turn the knob to SENSI.ADJ and press it
- Push Start/Stop switch once
- Return the knob to the position MEASURE slowly
- Push the timer set switch to set measuring time
- Remove the cap and make a measurement

#### 2.4 Maintenance / Calibration

2.4.1 24-hour TSP air quality monitoring

The following maintenance / calibration are required for the HVS:

- The high volume motors and their accessories are properly maintained. Appropriate maintenance such as routine motor brushes replacement and electrical wiring checking are made to ensure that the equipment and necessary power supply are in good working condition.
- All HVS shall be calibrated (five point calibration) using Calibration Kit upon installation and thereafter in every 3 months.
- A copy of the calibration certificates for the HVS and calibrator are provided in Appendix D.

- 2.4.2 1-hour TSP air quality monitoring
  - The portable TSP monitor should be calibrated at 1-year intervals.

#### 2.5 Monitoring Locations

2.5.1 The Impact Air Monitoring Stations to be monitored should be selected based on the prevailing wind direction and their proximity to the active construction works. According to the Hong Kong Observatory, wind direction in November 2023 was north, northeast, and east. The most updated locations are summarized in **Table 2.3** and shown in **Figure 2a**.

Table 2.3Location of Air Quality Monitoring Station

Monitoring Station	Location	Land uses
AMS5	Tin Liu	Residential Village
AMS7A	Sheung Wo Che	Residential Village
AMS14	Ha Wo Che	Residential Village
AMS15	Ha Wo Che	Residential Village

#### 2.6 Results and Observations

- 2.6.1 The schedule of air quality monitoring in reporting month is provided in **Appendix E**.
- 2.6.2 No Action / Limit Level exceedance was recorded for 24-hr and 1-hr TSP at AMS 5, 7A, 14 and 15 in the reporting month.
- 2.6.3 During the reporting month, major dust sources included trial pits excavation, piling works, demolition of existing parapet, removal of existing staircase, road surface maintenance and ELS works were observed in the site. Other factors such as road traffic along Tai Po Road may affect the monitoring results.
- 2.6.4 The weather conditions during the monitoring are provided in **Appendix K**.
- 2.6.5 The monitoring data of 24-hr and 1-hr TSP are summarized in **Table 2.4 and 2.5**. Detailed monitoring data are presented in **Appendix F**.

Table 2.4	4 Summary of 24-hr TSP Monitoring Results					
Parameter	Monitoring Station	Limit Level (µg/ m <sup>3</sup> )				
	AMS5	49	38-59	156		
24-hr TSP	AMS7A	53	41-66	171	260	
in µg/m³	AMS14	47	42-53	174	260	
	AMS15	39	31-49	172		

#### Table 2.5 Summary of 1-hr TSP Monitoring Results

Parameter	Monitoring Station	Average (µg/m³)	Range (µg/ m³)	Action Level (μg/ m <sup>3</sup> )	Limit Level (µg/ m <sup>3</sup> )
	AMS5	55	41-69	340	
1-hr TSP	AMS7A	59	42-78	344	500
in µg/m³	AMS14	52	45-60	350	500
_	AMS15	42	33-53	350	

2.6.6 The Event and Action Plan for air quality is given in **Appendix H**.

The copyright of this document is owned by Fugro Technical Services Limited. It may not be reproduced except with prior written approval from the Company.

#### 3. NOISE

#### 3.1 Monitoring Requirement

3.1.1 In accordance with the updated EM&A Manuals, L<sub>eq</sub> (30min) monitoring is conducted for at least once a week during the construction phase between 0700 and 1900 on normal weekdays at the designated monitoring locations.

#### 3.2 Monitoring Equipment

- 3.2.1 The sound level meter used in noise monitoring will comply with the International Electrotechnical Commission Publication 651:1979 (Type 1) and 804:1985 (Type 1) specifications as referred to in the Technical Memorandum issued under the Noise Control Ordinance (NCO).
- 3.2.2 Sound level calibrator will be used for the on-site calibration of the meter. This calibrator complies with the IEC Publication 942 (1988) Class 1 and ANSI S1.40 1984. Noise measurements were only accepted to be valid if the calibration levels from before and after the measurement agree to within 1.0dB.
- 3.2.3 Measurements shall be recorded to the nearest 0.1dB. Sound level meters are programmed to measure A-weighted equivalent continuous sound pressure level at 30-minute intervals between 0700 and 1900 on normal weekdays at least once a week when construction activities are underway.

Table 3.1 summarizes the noise monitoring equipment model being used for this project.

Item	Brand	Model	Equipment	Serial Number
1	Casella	CEL-63X Series	Integrating Sound Level Meter	0873599
2	Casella	CEL-63X Series	Integrating Sound Level Meter	1488271
3	Casella	CEL-63X Series	Integrating Sound Level Meter	1488287
4	Casella	CEL-63X Series	Integrating Sound Level Meter	4181568
5	Casella	CEL-120 Series	Calibrator	2092809
6	Casella	CEL-120 Series	Calibrator	3321858
7	Casella	CEL-120 Series	Calibrator	4358250
8	Casella	CEL-120 Series	Calibrator	5230758

#### Table 3.1 Noise Monitoring Equipment

#### 3.3 Monitoring Parameters and Frequency

**Table 3.2** presents the noise monitoring parameters and frequencies.

#### Table 3.2 Monitoring Parameters and Frequencies of Noise Monitoring

Parameter	Frequency and Period
LAeq (30min)	At each station at 0700-1900 hours on normal weekdays at a frequency
L <sub>10</sub> and L <sub>90</sub> will be recorded for reference	of once a week

#### 3.4 Monitoring Methodology

- 3.4.1 The monitoring procedures are as follows:
  - The monitoring station is set at a point 1m from the exterior of the sensitive receivers building façade and set at a position 1.2m above the ground.
  - The battery condition is checked to ensure good functioning of the meter.
  - Parameters such as frequency weighting, the time weighting and the measurement time are set as follows:
    - frequency weighting : A
    - time weighting : Fast
    - measurement time : Weekly 30 minutes between 0700-1900 on normal weekdays
  - Prior to and after noise measurement, the meter shall be calibrated using the calibrator for 94.0 dB at 1000 Hz. If the difference in the calibration level before and after measurement is more than 1.0 dB, the measurement will be considered invalid and repeat of noise measurement is required after re-calibration or repair of the equipment.
  - Noise monitoring should be cancelled in the presence of fog, rain, and wind with a steady speed exceeding 5 m/s, or wind with gusts exceeding 10 m/s.
  - Noise measurement should be paused during periods of high intrusive noise if possible and observation shall be recorded when intrusive noise is not avoided.
  - At the end of the monitoring period, the Leq, L10 and L90 are recorded. In addition, site conditions and noise sources are recorded on a standard record sheet.

#### 3.5 Maintenance / Calibration

- 3.5.1 Maintenance and Calibration procedures are as follows:
  - The microphone head of the sound level meter and calibrator should be cleaned with a soft cloth at quarterly intervals.
  - The sound level meter and calibrator should be calibrated annually by a HOKLAS laboratory.
  - Relevant calibration certificates are provided in Appendix D.

#### 3.6 Monitoring Locations

3.6.1 According to the updated EM&A Manual, 25 noise monitoring locations were included during the noise monitoring. The monitoring locations are summarized in **Table 3.3** and shown in **Figure 2b**.

Fugro Development Centre, 5 Lok Yi Street, Tai Lam, Tuen Mun, N.T., Hong Kong. Tel : +852 2450 8233 Fax : +852 2450 6138 E-mail : matlab@fugro.com Website : www.fugro.com

Table 3.3	Table 3.3 Location of Noise Monitoring Station			
Monitoring Station	Location	Land Uses	Type of Measurement	
NMS1	Scenery Court	Residential	Façade	
NMS2	Villa Le Parc	Residential	Façade

#### Table 3.3 Location of Noise Monitoring Station

#### 3.7 Results and Observations

- 3.7.1 The schedule of noise monitoring in reporting month is provided in **Appendix E**.
- 3.7.2 The exam schedules of the schools and Arrangements on Deferral of Class Resumption for All Schools are provided in **Appendix E**.
- 3.7.3 During the monitoring month, road traffic along Tai Po Road was observed which may affect the monitoring results.
- 3.7.4 According to the onsite observation, no raining was observed and no wind speed over 5 m/s was measured during the noise monitoring. The weather conditions during the monitoring month are provided in **Appendix K**.
- 3.7.5 The day time noise monitoring data are summarized in **Table 3.4**. Detailed monitoring data are presented in **Appendix G**.

Fugro Development Centre, 5 Lok Yi Street, Tai Lam, Tuen Mun, N.T., Hong Kong. Tel : +852 2450 8233 Fax : +852 2450 6138 E-mail : matlab@fugro.com Website : www.fugro.com

Monitoring Station	L <sub>eq (30min)</sub> Range, dB(A) Construction Noise Level	L <sub>eq (30min)</sub> Limit Level, dB(A)	
NMS1	62.8 - 64.8	75	
NMS2	52.1 – 59.8	75	
NMS3	63.2 - 67.8	75

le 3.5	Summary	of Night	Time Noise Im	pact Monitoring	g Results
--------	---------	----------	---------------	-----------------	-----------

Note: 1. L<sub>eq (15min)</sub> was measured at night-time (2300-0700).

2. If measured noise level (Leq) > limit level, Corrected noise level (CNL) is calculated as:

 $10 \times \log \left[ \left( 10^{\frac{\text{Measured noise level, Leq}}{10}} \right) - \left( 10^{\frac{\text{Baseline noise level}}{10}} \right) \right]$ 

- 3. Detailed analysis of each monitoring location is provided in Appendix G.
- 3.7.7 Day time construction noise monitoring was carried out in the reporting month, no Action / Limit Level exceedance was recorded during the period. For night time noise monitoring, no exceedance case due to construction activity was recorded between 2300 and 0700 of the next day during the reporting month.
- 3.7.8 The Action and Limit Levels for noise impact monitoring have been set and are presented in Appendix C.
- 3.7.9 The Event and Action Plan for noise is given in Appendix H.

#### 4. LANDSCAPE AND VISUAL

#### 4.1 Audit Requirements

- 4.1.1 In accordance with the EM&A Manual, the landscape and visual mitigation measures during the construction phase are primarily due to those associated temporary works for the construction of retrofitting noise barriers/enclosures. To ensure compliance with the intended aims of the measures, weekly site inspections are undertaken throughout the construction period.
- 4.1.2 According to the updated EM&A Manual, measures to mitigate landscape and visual impacts during construction should be checked to ensure compliance with the intended aims of the measures. The progress of the engineering works shall be regularly reviewed onsite to identify the earliest practical opportunities for the landscape works to be undertaken. The ET shall report on the Contractor's compliance on a weekly basis.

#### 4.2 Results and Observations

- 4.2.1 Site audits were carried out to monitor and audit the implementation of landscape and visual mitigation measures. The summary of the site audits is given in **Appendix M**.
- 4.2.2 No non-compliance of the landscape and visual impact was recorded in the reporting month.

#### 5. WASTE MANAGEMENT

#### 5.1 Audit Requirements

- 5.1.1 The effective management of waste arising during the construction phase will be monitored through the site audit programme. Regular audits and site inspections should be carried out to ensure that the recommended good site practices and other mitigation measures are implemented by the Contractor.
- 5.1.2 The audit should look at all aspects of on-site waste management practices including the waste generation, storage, recycling, transport and disposal. The aims of waste audit are:
  - to ensure the waste arising from the works are handled, stored, collected, transferred and disposed of in an environmentally acceptable manner;
  - verify the implementation status and evaluate the effectiveness of the mitigation measures; and
  - to encourage the reuse and recycling of material.

#### 5.2 Results and Observations

- 5.2.1 C&D materials and wastes sorting were carried out on site. Receptacles were available for C&D wastes and general refuse collection.
- 5.2.2 The amount of wastes generated by the site activities in the reporting month is shown in **Appendix I**.

#### 6. SITE INSPECTION

#### 6.1 Site Inspection

- 6.1.1 Site inspections were carried out weekly to monitor the implementation of proper environmental pollution control and mitigation measures for the Project. A summary of the mitigation measures implementation schedule is provided in **Appendix J**.
- 6.1.2 In the reporting month, 5 site inspections were carried out on 2, 9, 16, 23 and 30 November 2023. The site inspection held on 23 November 2023 were joint inspection with the IEC, ER, the Contractor and the ET during the reporting period.
- 6.1.3 The follow-up actions requested by ET and IEC during the site inspections were completed as reported by the Contractor. All the rectifications during the reporting period were fulfilled with the requirement of Proposal of Site Inspection, Deficiency and Remedial Action. No outstanding issues were reported during the reporting month. Details of observations recorded during the site inspections are summarized in **Appendix M**.

#### 7. ENVIRONMENTAL COMPLAINT AND NON-COMPLIANCE

#### 7.1 Environmental Exceedance

- 7.1.1 24-hour and 1-hour TSP impact monitoring were carried out in the reporting month, no Action / Limit Level exceedance was recorded during the period.
- 7.1.2 Day time construction noise monitoring was carried out in the reporting month, no Action / Limit Level exceedance was recorded during the period. Regular night time noise monitoring was carried out on 2, 9, 14, 23 and 28 November 2023 and no exceedance case was recorded between 2300 and 0700 of the next day during the reporting month.

#### 7.2 Complaints, Notification of Summons and Prosecution

- 7.2.1 Eight complaints were received in the report month. The summaries are listed below:
  - A complaint was received by 1823 (CASE#3-7965710201) on 1st November 2023. The complainant who is concerned about the noise nuisance generated from night-time construction works near Tai Po Road.

According to the Main Contractor, the nighttime construction works activities between 25<sup>th</sup> October and 1<sup>st</sup> November 2023 at Zone 3 and 4 included TTA implementation, soil excavation, demolition of concrete slab and road reinstatement.

According to the Main Contractor, acoustic barriers were used during soil excavation, asphalt milling, paving and demolition of concrete slab.

ET checked that the Main Contractor had complied with the conditions listed in CNP No.: GW-RN0970-23. The Main Contractor was reminded to strictly follow and fully comply with the requirement listed in the CNP and the mitigation measures stipulated in the EM&A Manual when carrying out construction activities during the restricted hour. All construction works should be carried out as quickly as possible to minimize the noise nuisance to the sensitive receivers.

• A complaint was received by 1823 (CASE: 3-7971500925) on 5<sup>th</sup> November 2023. The complainant who is concerned about the noise nuisance generated from night-time construction works near Tai Po Road.

According to the Main Contractor, the nighttime construction works activities between 4<sup>th</sup> and 5<sup>th</sup> November 2023 at Zone 5 included TTA implementation and concreting.

According to the Main Contractor, acoustic barriers were used during concreting work.

ET checked that the Main Contractor had complied with the conditions listed in CNP No.: GW-RN0970-23. The Main Contractor was reminded to strictly follow and fully comply with the requirement listed in the CNP and the mitigation measures stipulated in the EM&A Manual when carrying out construction activities during the restricted hour. All construction works should be carried out as quickly as possible to minimize the noise nuisance to the sensitive receivers.

• A complaint was received by EPD (EPD ref.: RN26643-23) on 8<sup>th</sup> November 2023. The complainant who is concerned about the noise nuisance generated from night-time construction works near Tai Po Road.

According to the Main Contractor, the nighttime construction works activities between 7<sup>th</sup> and 8<sup>th</sup> November 2023 at Zone 5 included Sheet pilling, TTA implementation, material loading and unloading and concreting.

According to the Main Contractor, acoustic barriers were used during sheet pilling and concreting activity.

ET checked that the Main Contractor had complied with the conditions listed in CNP No.: GW-RN1126-23 and CNP No.: GW-RN0970-23. The Main Contractor was reminded to strictly follow and fully comply with the requirement listed in the CNP and the mitigation measures stipulated in the EM&A Manual when carrying out construction activities during the restricted hour. All construction works should be carried out as quickly as possible to minimize the noise nuisance to the sensitive receivers.

 A complaint was received by 1823 (1823 Case: 3-7979040785) on 9<sup>th</sup> November 2023. The complainant who is concerned about the noise nuisance generated from night-time construction works near Tai Po Road.

According to the Main Contractor, the nighttime construction works activities on 9<sup>th</sup> November 2023 at Zone 3 included rebar fixing and cutting of sheet piles.

According to the Main Contractor, the workers were briefed before they started the works. Briefing details included handing steel rebar or metal materials must be lightly to reduce noise as practical as possible.

The Main Contractor is reminded to provided acoustic barriers for nighttime work to minimize the noise nuisance as much as possible.

ET checked that the Main Contractor had complied with the conditions listed in CNP No.: GW-RN1126-23. The Main Contractor was reminded to strictly follow and fully comply with the requirement listed in the CNP and the mitigation measures stipulated in the EM&A Manual when carrying out construction activities during the restricted hour. All construction works should be carried out as quickly as possible to minimize the noise nuisance to the sensitive receivers.

 A complaint was received by EPD (EPD ref.: RN26820-23) on 9<sup>th</sup> November 2023. The complainant who is concerned about the noise nuisance generated from night-time construction works near Tai Po Road on 20<sup>th</sup> October 2023.

According to the complainant's video from 1823 (CASE#3-7954061301), no acoustic barrier was set up next to the excavator which did not comply with the requirement listed in the CNP.

According to the Main Contractor, the nighttime construction works activities on 20<sup>th</sup> October 2023 at Zone 5 included Sheet Piling.

ET checked that the Main Contractor did not fully comply with the conditions listed in CNP No.: GW-RN0894-23.

The copyright of this document is owned by Fugro Technical Services Limited. It may not be reproduced except with prior written approval from the Company.

According to the Main Contractor, to prevent further non-complying with the CNP, a CNP briefing was provided to the frontline workers before nighttime work to ensure all requirements listed in the CNP are implemented.

• A complaint was received by 1823 (CASE: 3-7979906619) on 16<sup>th</sup> November 2023. The complainant who is concerned about the noise nuisance generated from night-time construction works near Tai Po Road on 7<sup>th</sup> November 2023.

According to the complainant's video, the excavator was carrying out sheet piling work with a vibratory pile driving hammer on 7<sup>th</sup> November 2023. An acoustic barrier was set up near the excavator, but the barrier did not effectively screen the excavator and the piling area.

ET checked that the Main Contractor did not fully comply with the conditions listed in CNP No.: GW-RN1126-23.

According to the Main Contractor, sheet pilling works would be rescheduled to be conducted on daytime.

• A complaint was received by 1823 (CASE: 3-7979872320) on 20<sup>th</sup> November 2023. The complainant who is concerned about the noise nuisance generated from night-time construction works near Tai Po Road.

According to the complainant's video, the excavator was carrying out sheet piling work on 9<sup>th</sup> November 2023. An acoustic barrier was screened in front of the pilling work area.

As the contractor did not provide adequate noise barriers to shield the excavator, it failed to effectively block the visible from noise sensitive receiver.

ET checked that the Main Contractor did not fully comply with the conditions listed in CNP No.: GW-RN1126-23.

• A complaint was received by 1823 (CASE#3-7956862047) on 30th November 2023. The complainant who is concerned about the noise nuisance generated from night-time construction works near Tai Po Road on 25 October 2023.

ET is carrying out an investigation and the investigation report is expected to be submitted to EPD at the end of December 2023.

- 7.2.2 Cumulative complaint log, summaries of complaints, notification of summons and successful prosecutions are presented in **Appendix L.**
- 7.2.3 Three non-compliances were found in the report month. The summaries are listed below:
  - A complaint was received by EPD (EPD ref.: RN26820-23) on 9th November 2023. The complainant who is concerned about the noise nuisance generated from night-time construction works near Tai Po Road on 20th October 2023.

According to the complainant's video, no acoustic barrier was set up during sheet piling work which did not comply with the requirement listed in the CNP.

The copyright of this document is owned by Fugro Technical Services Limited. It may not be reproduced except with prior written approval from the Company.

A non-compliance was given to the Main Contractor because of the violated of the CNP No.: GW-RN0894-23 condition 3.d.7.

• A complaint was received by 1823 (CASE: 3-7979906619) on 16th November 2023. The complainant who is concerned about the noise nuisance generated from night-time construction works near Tai Po Road on 7th November 2023.

According to the complainant's video, the excavator was carrying out sheet piling work, an acoustic barrier was set up near the excavator, but the barrier did not effectively screen the excavator and the piling area which did not comply with the requirement listed in the CNP.

A non-compliance was given to the Main Contractor because of the violated of the CNP No.: GW-RN1126-23 condition 3.d.7.

• A complaint was received by 1823 (CASE: 3-7979872320) on 20th November 2023. The complainant who is concerned about the noise nuisance generated from night-time construction works near Tai Po Road on 9th November 2023.

According to the complainant's video, the excavator was carrying out sheet piling work, acoustic barrier was screened in front of the pilling work area.

As the contractor did not provide adequate noise barriers to shield the excavator, it failed to effectively block the visible from noise sensitive receiver which did not comply with the requirement listed in the CNP.

A non-compliance was given to the Main Contractor because of the violated of the CNP No.: GW-RN1126-23 condition 3.d.7.

#### 8. IMPLEMENTATION STATUS OF ENVIRONMENTAL MITIGATION MEASURES

#### 8.1 Implementation Status

- 8.1.1 The Contractor has implemented environmental mitigation measures and requirements as stated in the EIA Review Report, the EP and the updated EM&A Manuals. The implementation status of the mitigation measures during the reporting month is summarized in **Appendix J**.
- 8.1.2 According to the environmental audit performed in the reporting month, the following recommendations were made:

Air Quality Impact

- Water spraying should be provided during breaking. (Zone 3, STRCR)
- Water spraying should be provided for the exposed area. (Zone 3, SB) Construction Noise Impact
- No specific observation was identified in the reporting month.

Water Quality Impact

- The dirt at the entrance should be cleared. (Zone 5, CM)
- Spray paint cans should be removed from the sedimentation tank. (Zone 3, SB)
- Earth materials next to the water barriers should be removed. (Zone 3, SB, S05)
- The outlet of the sedimentation tank should be fixed to prevent muddy water leakage. (Zone 3, RW5)

Chemical and Waste Management

- General refuse should be removed. (Zone 5, CM, N4)
- The mud and rock inside the drip tray should be cleared. (Zone 5, NR, N4)
- Construction waste should be cleared. (Zone 3, SB)
- General refuse should be cleared. (Zone 2, Near bus stop)

Land Contamination

- Drip trays should be provided for chemical containers (Zone 5, CM, N4)
- Drip tray should be provided for the chemical containers. (Zone 3, S05)
- Drip trays should be provided for chemical containers. (Zone 3, SB)
- Oil stain should be cleared. (Zone 3, RW5)
- Drip tray should be provided for chemical containers. (Zone 3, SB)

Landscape and Visual Impact

• No specific observation was identified in the reporting month. <u>General Condition</u>

• No specific observation was identified in the reporting month.

Permit / Licenses

- NRMM label should be provided. (Zone 3, S06)
- NRMM labels should be replaced. (Zone 3, SB)

Fugro Development Centre, 5 Lok Yi Street, Tai Lam, Tuen Mun, N.T., Hong Kong. Tel : +852 2450 8233 Fax : +852 2450 6138 E-mail : matlab@fugro.com Website : www.fugro.com

#### 9. FUTURE KEY ISSUES

#### 9.1 Construction Programme for the Next Month

- 9.1.1 During the coming reporting month, the principal work activities within the site include:
  - (1) Road surface Maintenance at Zone 1, 2, 3, 4 and 5
  - (2) Noise Barrier Erection Works at Zone 1, 2, 4 and 5
  - (3) Construction of Transition at Zone 1, 2
  - (4) Construction of Draw pit and Pillar box at Zone 2
  - (5) Tree Works (including preservation / felling/ pruning/ transplantation) at Zone 3
  - (6) Reinstatement of footpath and cycle track at Zone 3
  - (7) Construction of Retaining Wall at Zone 3
  - (8) Lift no.2 Installation + SR5 Foundation Works + Construction of [former staircase] Abutment Wall at Zone 3
  - (9) Construction Works for N263 & N264 Bridge Deck Widening + Construction of New Abutment Wall + Demolition of Existing Beam/ Slab + Road Diversion + Asphalt Works at Zone 3
  - (10)Construction Works for Lift no.1 at Zone 3
  - (11)Construction Works N262 Central median at Zone 3
  - (12)Relocation of Existing Fire Hydrants and relating Watermains at Zone 3
  - (13)Drainage Works + Road diversion+ Asphalt works at Zone 3
  - (14)Road Construction at Zone 4
  - (15) Drainage Construction Works at Zone 4 and 5
  - (16)Noise Barrier Foundation Works at Zone 5

(17)Slope Landscaping Works + Irrigation System for Landscaping + Drainage Works on Slope at Zone 5

#### 9.2 Key Issues for the Coming Month

9.2.1 Potential environmental impacts arising from the above construction activities are mainly associated with construction dust, construction noise, water quality, waste management and landscape and visual impact.

#### 9.3 Monitoring Schedules for the Next Month

9.3.1 The tentative schedules for environmental monitoring in the coming month are provided in **Appendix E**.

#### 10. CONCLUSIONS

- 10.1.1 24-hour and 1-hour TSP impact monitoring were carried out in the reporting month, no Action / Limit Level exceedance was recorded during the period.
- 10.1.2 Day time construction noise monitoring was carried out in the reporting month, no Action / Limit Level exceedance was recorded during the period.
- 10.1.3 Regular nighttime noise monitoring was carried out on 2, 9, 14, 23 and 28 November 2023, respectively and no exceedance case was recorded between 2300 and 0700 of the next day during the reporting month.
- 10.1.4 5 site inspections were carried out on 2, 9, 16, 23 and 30 November 2023. Recommendations on mitigation measures on air quality, water quality, chemical and waste management, land contamination and permit/licenses were given to the Contractor for remediating the deficiencies identified during the site inspections.
- 10.1.5 Eight complaints were received in the report month. The summaries are listed below:
  - A complaint was received by 1823 (CASE#3-7965710201) on 1st November 2023. The complainant who is concerned about the noise nuisance generated from night-time construction works near Tai Po Road.
  - A complaint was received by 1823 (CASE: 3-7971500925) on 5th November 2023. The complainant who is concerned about the noise nuisance generated from night-time construction works near Tai Po Road.
  - A complaint was received by EPD (EPD ref.: RN26643-23) on 8th November 2023. The complainant who is concerned about the noise nuisance generated from night-time construction works near Tai Po Road.
  - A complaint was received by 1823 (1823 Case: 3-7979040785) on 9<sup>th</sup> November 2023. The complainant who is concerned about the noise nuisance generated from night-time construction works near Tai Po Road.
  - A complaint was received by EPD (EPD ref.: RN26820-23) on 9<sup>th</sup> November 2023. The complainant who is concerned about the noise nuisance generated from night-time construction works near Tai Po Road.
  - A complaint was received by 1823 (CASE: 3-7979906619) on 16<sup>th</sup> November 2023. The complainant who is concerned about the noise nuisance generated from night-time construction works near Tai Po Road.
  - A complaint was received by 1823 (CASE: 3-7979872320) on 20<sup>th</sup> November 2023. The complainant who is concerned about the noise nuisance generated from night-time construction works near Tai Po Road.
  - A complaint was received by 1823 (CASE#3-7956862047) on 30<sup>th</sup> November 2023. The complainant who is concerned about the noise nuisance generated from night-time construction works near Tai Po Road.

10.1.6 Three non-compliances were found in the report month. The summaries are listed below:

23

• A complaint was received by EPD (EPD ref.: RN26820-23) on 9th November 2023. The complainant who is concerned about the noise nuisance generated from night-time construction works near Tai Po Road on 20th October 2023.

According to the complainant's video, no acoustic barrier was set up during sheet piling work which did not comply with the requirement listed in the CNP.

A non-compliance was given to the Main Contractor because of the violated of the CNP No.: GW-RN0894-23 condition 3.d.7.

• A complaint was received by 1823 (CASE: 3-7979906619) on 16th November 2023. The complainant who is concerned about the noise nuisance generated from night-time construction works near Tai Po Road on 7th November 2023.

According to the complainant's video, the excavator was carrying out sheet piling work, an acoustic barrier was set up near the excavator, but the barrier did not effectively screen the excavator and the piling area which did not comply with the requirement listed in the CNP.

A non-compliance was given to the Main Contractor because of the violated of the CNP No.: GW-RN1126-23 condition 3.d.7.

• A complaint was received by 1823 (CASE: 3-7979872320) on 20th November 2023. The complainant who is concerned about the noise nuisance generated from night-time construction works near Tai Po Road on 9th November 2023.

According to the complainant's video, the excavator was carrying out sheet piling work, acoustic barrier was screened in front of the pilling work area.

As the contractor did not provide adequate noise barriers to shield the excavator, it failed to effectively block the visible from noise sensitive receiver which did not comply with the requirement listed in the CNP.

A non-compliance was given to the Main Contractor because of the violated of the CNP No.: GW-RN1126-23 condition 3.d.7.

## CALIBRATION CERTIFICATE OF DUST METER

Client : Fugro Technical Services Limited

Project : Calibration Services

#### **Client Supplied Information**

Details of Unit Under Test, UUT -

Description	: Laser Dust Monitor
Manufacturer	: SIBATA
Model No.	: LD-5R
Serial No.	: 620480
Next Calibration Date	: 8-Feb-2024

#### Laboratory Information

Details of Reference Equipment -

Description	: Reference balance	
Equipment ID.	: C-065-5	
Date of Calibration	: 9-Feb-2023	Ambient Temperature : 24 °C
Calibration Location	: Calibration Lab. of FTS	
Method Used	: By direct comparison the we	eight of dust particle trapped in a filter paper using high
	volume sampler (TSP meth	od) for a certain period, with the reading of the UUT. They
	should be placed at the san	ne location and powered on and off at the same time.

#### Calibration Results :

Reference concentration (mg/m <sup>3</sup> )	Total count for 1 hour	CPM (Count per minute)
0.0545	1734	28.90
0.0587	1751	29.18
0.0775	1895	31.58

#### Remarks:

1. The equipment being used in this calibration is traceable to recognized National Standards.

2. The interpolation equation : Concentration  $(mg/m^3) = K \times UUT$  reading (CPM) where K = 0.002127

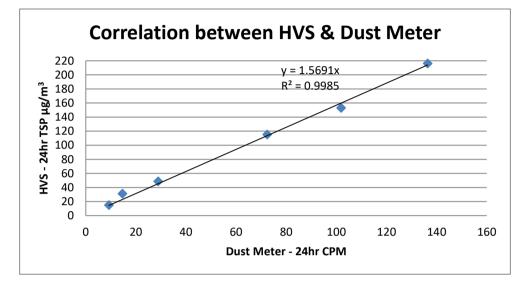

3. Correlation coefficient (r) : 0.9972

Checked by : Date : 26-4-2023	Certified by : KI Keing Date : M-4-2023
CA-R-297 (22/07/2009)	Leung Kwok Tai (Assistant Manager)

#### Remarks :

- 1. The equipment used in this calibration is traceable to recognized National Standards.
- 2. For calibration: Reference SPL are 94, 104 & 114dB, range setting is 20-140dB & time weighting is fast
- 3. The mean value is the average of four measurements.
- 4. The equipment does comply with EN 61672-1: 2003 Class 1 sound level meter for the above measurement.
- 5. The values given in this Calibration Certificate only relate to the values at the time of the test and any uncertainties will not include allowance for the equipment long term drift, variations with environment changes, vibration and shock during tranportation, overloading, mis-handling or the capability of any other laboratory to repeat the measurement.

Details of Reference E				
Description :	B & K	Acoustic Multifunction Ca	alibrator 4226 (Tr	aditional free field setting)
Equipment ID. :	R-108	-1		
Date of Receipt :	14-Jul	-2023		
Date of Calibration :	19-Jul	-2023		
Calibration Location :	Calibr	ation Laboratory of FTS	Ambient Terr	nperature : 20±2 °C
Method Used :	By dir	ect comparison	Relative Hun	nidity : <80% R.H.
As Found :	Functi	ional / Within specs		:
As Left :	Comp	lies with the specification	limits (EN61672	-1:2003 Class 1)
Calibration Results :				

Specification Limit(dB) Mean Value (dB) Parameters 2.6 -0.6 4000Hz 1.1 to -0.4 2.8 2000Hz 1.3 to -1.1 1000Hz 0.0 1.1 to A-weigthing -1.8 -4.6 -3.3 to 500Hz frequency -7.2 -10.0 response -8.8 250Hz to -17.6 -16.2 -14.6 to 125Hz -27.7 -24.7 63Hz -26.3 to 0.0 ± 0.6 94dB-104dB **Differential level** 0.0 ± 0.6 104dB-114dB linearity

#### Remarks :

- 1. The equipment used in this calibration is traceable to recognized National Standards.
- 2. The UUT does comply with EN 61672-1: 2003 Class 1 sound level meter for the above measurement.
- 3. For calibration: Reference SPL are 94, 104 & 114dB, range setting is 20-140dB & time weighting is fast
- 4. The mean value is the average of four measurements.
- 5. The expanded uncertainty of calibration results is 0.6 dB with a coverage factor of 1.98 providing a confidence level of approximate 95%.
- 6. The values given in this Calibration Certificate only relate to the values at the time of the test and any uncertainties will not include allowance for the equipment long term drift, variations with environment changes, vibration and shock during tranportation, overloading, mis-handling or the capability of any other laboratory to repeat the measurement.

Demesi							

Remark 1. Actual monitoring may be subjected to change due to any safety concern or adverse weather condition.

2. The Impact Air Monitoring Stations to be monitored should be selected based on the prevailing wind direction and their proximity to the active construction works.

3. According to the Hong Kong Observatory, anticipated wind directions in November 2023 is north, northeast and east.

4. According to the Contractor, the anticipated major construction activities in the reporting month includes:

- 1 Trial pits excavation at Zone 1 and 2
- 2 Road surface Maintenance at Zone 1, 2, 3, 4 and 5
- 3 Slope Reinstatement and Drainage Works at Zone 1
- 4 Noise Barrier Erection Works at Zone 1, 2, 4 and 5
- 5 Relocation of Existing Fire Hydrants and relating Watermains at Zone 1, 2 and 3
- 6 Reinstatement of cycling track at Zone 1 and 3
- 7 Reinstatement of footpath at Zone 3
- 8 Construction of Tunnel sign at Zone 1
- 9 Construction of Transition at Zone 1 and 2
- 10 Construction of Draw pit and Pillar box at Zone 2
- 11 Tree Works (including preservation / felling/ pruning/ transplantation) at Zone 3
- 12 Construction of Retaining Wall at Zone 3
- 13 Lift no.2 Installation + SR5 Foundation Works + Construction of [former staircase] Abutment Wall at Zone 3
- 14 Construction Works for N263 & N264 Bridge Deck Widening + Construction of New Abutment Wall + Demolition of Existing Beam/ Slab + Road Diversion + Asphalt Works at Zone 3
- 15 Construction Works for Lift no.1 at Zone 3
- 16 Construction Works N262 Central median at Zone 3
- 17 Drainage Works + Road diversion+ Asphalt works at Zone 3
- 18 Pilling Construction Works at Zone 3
- 19 Noise Barrier Foundation Works at Zone 4 and 5
- 20 Road Construction at Zone 4 and 5
- 21 Drainage Construction Works at Zone 4 and 5
- 22 Drainage Works + Road diversion+ Asphalt works at Zone 4
- 23 Slope Landscaping Works + Irrigation System for Landscaping + Drainage Works on Slope at Zone 4

25-Nov-23	13:20	43	47	45	45			Fine
	Average		55					
	Max		69					
	Min		41					

#### AMS7A - Sheung Wo Che

				1-hour TSP (	µg/m³)			
Date	Start Time	1st hr	2nd hr	3rd hr	Average	Action Level	Limit Level	Weather
02-Nov-23	08:09	44	46	42	44			Fine
08-Nov-23	10:08	56	56	56	56			Fine
14-Nov-23	14:00	70	72	70	71	344	500	Fine
20-Nov-23	11:00	47	49	49	48			Fine
25-Nov-23	11:34	76	78	78	77			Fine
•	Average		59					
	Max		78					
	Min		42					

#### AMS14 - Ha Wo Che

	<u>1-hour TSP (µg/m³)</u>							
Date	Start Time	1st hr	2nd hr	3rd hr	Average	Action Level	Limit Level	Weather
02-Nov-23	12:18	47	47	49	48			Fine
08-Nov-23	13:51	56	58	51	55			Fine
14-Nov-23	09:30	56	58	53	56	350	500	Fine
20-Nov-23	08:45	47	45	45	46			Fine
25-Nov-23	13:08	56	58	60	58			Fine
•	Average		52					
	Max		60					
	Min		45					

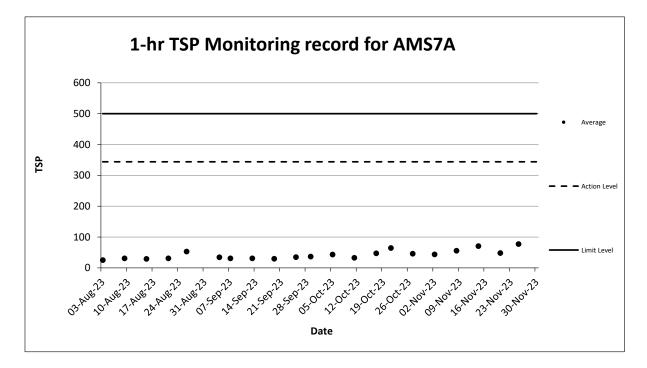

#### AMS 15 - Ha Wo Che

				1-hour TSP (	µg/m³)			
Date	Start Time	1st hr	2nd hr	3rd hr	Average	Action Level	Limit Level	Weather
02-Nov-23	08:24	45	43	43	44			Fine
08-Nov-23	11:37	53	51	51	52			Fine
14-Nov-23	11:35	37	39	41	39	350	500	Fine
20-Nov-23	11:30	41	41	43	42			Fine
25-Nov-23	9:40	37	33	35	35			Fine
	Average		42					
	Max		53					
	Min		33					

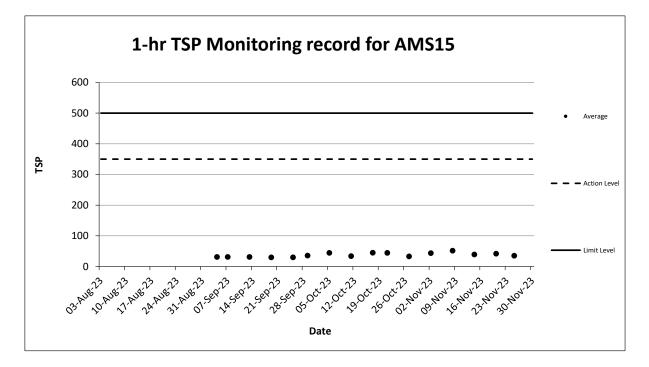

Remark 1. Actual monitoring may be subjected to change due to any safety concern or adverse weather condition.

2. The Impact Air Monitoring Stations to be monitored should be selected based on the prevailing wind direction and their proximity to the active construction works.

Remark

Actual monitoring may be subjected to change due to any safety concern or adverse weather condition.
 The Impact Air Monitoring Stations to be monitored should be selected based on the prevailing wind direction and their proximity to the active construction works.

24-hour TSP Impact Monitoring Result for	
NOD 03-2018 Road Widening and Retrofitting Noise Barriers on Tai Po Road (Sha Tin	Section)

Date and Time TSP Concentration (µg/m<sup>3</sup>) 14-11-23 09:00 64 14-11-23 10:00 62 14-11-23 11:00 66 14-11-23 12:00 68 14-11-23 13:00 68 70 72 14-11-23 14:00 14-11-23 15:00 14-11-23 16:00 70 14-11-23 17:00 68 14-11-23 18:00 68 14-11-23 19:00 66 14-11-23 20:00 62 60 58 53 14-11-23 21:00 14-11-23 22:00 14-11-23 23:00 15-11-23 00:00 53 56 53 15-11-23 01:00 15-11-23 02:00 15-11-23 03:00 49 51 15-11-23 04:00 15-11-23 05:00 53 60 15-11-23 06:00 15-11-23 07:00 60 15-11-23 08:00 62 61 Average Action Level 171 Limit Level 260

Remark 1. Actual monitoring may be subjected to change due to any safety concern or adverse weather condition.

2. The Impact Air Monitoring Stations to be monitored should be selected based on the prevailing wind direction and their proximity to the active construction works.

24-hour TSP Impact Monitoring Result for NOD 03-2018 Road Widening and Retrofitting Noise Barriers on Tai Po Road (Sha Tin Section)

2. The Impact Air Monitoring Stations to be monitored should be selected based on the prevailing wind direction and their proximity to the active construction works.

		complete coverage of active construction area eight times a day.		
		• Effective water sprays shall be used during the delivery and handling of all raw sand and aggregate, and other similar materials, wet dust is likely to be created and to dampen all stored materials during dry and windy weather.	Contractor	Implemented
		• Stockpiles of sand, aggregate or any other dusty materials greater than 20m <sup>3</sup> shall be enclosed on three sides, with walls extending above the pile and 1 meter beyond the front of the pile.	Contractor	Implemented
		<ul> <li>Suitable chemical wetting agent such as dust suppression chemical shall be used on completed cuts and fills to reduce wind erosion.</li> </ul>	Contractor	Not Applicable
		<ul> <li>Areas within the construction site where there is a regular movement of vehicles shall have a paved surface and be kept clear of loose surface material.</li> </ul>	Contractor	Implemented
		• The Contractor shall restrict all motorized vehicles within the construction site, excluding those on public roads, to maximum speed of 20 km per hour and confine haulage and delivery vehicles to designated roadways inside the Site.		Implemented
		<ul> <li>Construction working areas should be restricted to a minimum practicable size.</li> </ul>	Contractor	Implemented
		<ul> <li>The Contractor shall ensure that no earth, rock or debris is deposited on public or private rights of way as result of his activities, including any deposits arising from the movement of plant or vehicles.</li> </ul>	Contractor	Implemented
4.12.1		• The Contractor shall provide a wheel washing facility at the exits from work areas to the satisfaction of the Engineer and to the requirements of the Commissioner of Police. Water in wheel washing facilities and sediment shall be changed and removed respectively at least once a month.	Contractor	Implemented
		• The Contractor shall submit details of the wheel washing facilities, which shall be usable prior to any earthworks excavation activity on the construction site. The Contractor shall also provide a hard-surfaced road between any washing facility and the public road.	Contractor	Implemented
		• In the event of any spoil or debris from construction works being deposited on adjacent land, or steams, or any slit being washed down to any area, then all such spoil, debris or material and silt shall be immediately removed and the affected land and areas restored to their natural state by the Contractor to the satisfaction of the Engineer.	Contractor	Implemented
		<ul> <li>If spoil cannot be immediately transported out of the Site, stockpiles should be stored in sheltered areas.</li> </ul>	Contractor	Implemented
		<ul> <li>Plant and vehicles shall be inspected annually to ensure that they are operating efficiently and that exhaust emissions are not causing a nuisance. All site vehicle exhausts should be directed vertically upwards or directed away from ground.</li> </ul>	Contractor	Implemented

EIA Review Ref	Location	Environmental Protection Measures/	Implementation Agent	Implementation Status in Construction Phase
4.12.1, 4.13.1 and		<ul> <li>Construction dust monitoring shall be carried out at representative monitoring locations during the construction period.</li> </ul>	Contractor	Implemented
Table 8.2		Path for complaints and handling procedures should be set up and implement.	Contractor	Implemented
		<ul> <li>Dark smoke emission shall be control in accordance with the Air Pollution Control (Smoke) Regulation and ETWB TCW 19/2005.</li> </ul>	Contractor	Implemented
NA		<ul> <li>Plant and equipment should be well maintained to prevent dark smoke emission.</li> </ul>	Contractor	Implemented
		<ul> <li>Only approved or exempted Non-road Mobile Machineries (NRMMs) including regulated machines and non-road vehicles with proper labels are allowed to be used in specified activities on-site.</li> </ul>	Contractor	Partially Implemented
	-	Water Quality Measures		
		<ul> <li>Silt-laden surface run-off should be prevented from directly entering the sensitive receivers during the construction works. The mitigation measures described below for the construction phase are in accordance with ProPECC PN 1/94:</li> </ul>		Partially Implemented
	Within the boundaries of all construction sites.	<ul> <li>Construction works should be programmed so as to minimise excavation during the wet season (April to September). If this is not possible then measures should be taken to minimise the areas exposed by covering temporary exposed slopes with tarpaulins or similar material, the protection of temporary road surfaces with gravel or crushed stone and the early reinstatement of final surfaces with hydro seed grass/shrub mixture. This latter measure would have the added benefit of reducing the windblown dust during the dry season. Where temporary covering of slopes is required this should be carried out before the onset of the rainfall or storm.</li> </ul>	Contractor	Implemented
5.7		<ul> <li>Existing and newly constructed open manholes should be covered and sealed to prevent run off and water borne debris entering the drainage network without having previously passed through a sediment trap.</li> </ul>		Implemented
		<ul> <li>Stock piles of construction materials, sand and gravel or excavated material should be covered with tarpaulins prior to rainstorms. The washing of material from the stockpiles directly into the storm drains should be prevented by passing the run off through a sediment trap.</li> </ul>		Implemented
		<ul> <li>The surface water from the site should be discharged into storm water drain after passing through sand and silt traps designed to accommodate the maximum discharge from the site. Within the site channels, bunds or sandbags should be used to direct run off into the traps. Storm water from outwit the site should be prevented from washing over the site by the construction of interceptor channels at the site boundary. Both perimeter channels and the sedimentation traps should be constructed prior to the commencement of site formation and earthworks.</li> </ul>	Contractor	Implemented
		<ul> <li>The efficiency of the interceptor channels, traps and sedimentation chambers should be maintained</li> </ul>	Contractor	Implemented

EIA Review Ref	Location	Environmental Protection Measures/	Implementation Agent	Implementation Status in Construction Phase
		by regular cleaning of accumulated silt and sand. Particular attention should be paid to maintenance following heavy rainfall and immediately after the issue of heavy rainfall warning by the Hong Kong Observatory.		
		<ul> <li>The ingress of rainwater into trenches should be minimised by the construction of bunds to prevent water flowing into the trench and covering by tarpaulins to prevent direct entry. The lengths of excavated trenches should be minimised and backfilled at the earliest opportunity. Water pumped from the trenches should be discharged to the storm water drains following passage through a suitable silt trap.</li> </ul>	Contractor	Implemented
		<ul> <li>Any ground water seeping into any trenches or foundation works should be passed through a silt trap prior to discharge to the storm water drains.</li> </ul>	Contractor	Partially Implemented
		<ul> <li>The water used for the washing down of mixing drums used for onsite batching of concrete and delivery lorries for off-site batched concrete should be recycled whenever possible.</li> <li>Wastewater generated from the washing which is discharged should be passed through a silt trap before discharge to the storm water system.</li> </ul>	Contractor	Not Applicable
		<ul> <li>The wastewater from the washing of the wheels and subframe of vehicles returning from the site onto public roads will contain suspended solids and debris. A washing bay should be provided at the exit from the site and should, where practicable, incorporate water recirculation. Water from the washing bay which is discharged to the storm water system should first be passed through a silt trap which also includes an oil/grease removal weir.</li> </ul>	Contractor	Implemented
		<ul> <li>Plant maintenance areas should be paved to prevent waste oils soaking into the ground. Where possible the area should be undercover to minimise the formation of runoff and any runoff from the paved area passed through an oil trap before being discharged to the storm drains. Fuel storage tanks should be surrounded by bunds with a capacity of at least 150% of the storage capacity. The bunded areas should be able to be drained of rain water through the petrol interceptor and accumulated rain removed at regular intervals.</li> </ul>	Contractor	Partially Implemented
		<ul> <li>Waste oils from the site should be collected and stored for recycling or disposal in accordance with the Waste Disposal Ordinance and absorbent cloths and granules should be available for the cleanup of spillages.</li> </ul>	Contractor	Implemented
		<ul> <li>Sewage from toilets and kitchens should be discharged directly into a foul sewer. If it is not possible to locate the site offices within easy access of a foul sewer a septic tank and soakaway should be constructed before the offices are occupied. Chemical toilets should be emptied on a daily basis and the contents taken to a foul sewer or the Sha Tin Sewage Treatment Works for disposal.</li> </ul>	Contractor	Implemented

#### **Environmental Complaints Log**

Reference No.	Date of Complaint Received	Received From	Received By	Nature of Complaint	Date of Investigation	Investigation summary & Conclusion	Date of Reply
COM-2019- 005	02/02/2019	EPD	CCZJV	Noise	13/02/2019	According to the photo taken from the complainant, the complaint was related to the project. Although the tree felling works were covered by the valid CNP (GW-RN0783-18), Contractor was reminded to strictly follow and fully comply with the CNP conditions and the mitigation measures stipulated in the EM&A Manual when construction activities are operating during restricted hour. Contractor was recommended to increase the frequency of using the electrical chain saw instead of the diesel chain saw for reducing the noise impact. Environmental Team conducted additional ad-hoc noise monitoring on 19:00 14 <sup>th</sup> February 2019 to 07:00 15 <sup>th</sup> February 2019 for evaluate the effectiveness on the proposed mitigation measures. No project-related noise exceedance case on 14-15 Feb 2019 Contractor's night tree-felling and removal works. The proposed mitigation measures were effective for noise impact.	20/02/2019
COM-2019- 006	22/02/2019	Project Hotline of NE/2017/ 05	CCZJV	Noise	26/02/2019	According to the location of complainant from Kwai Wo House, the complaint was related to the project. Although the tree felling works were covered by the valid CNP (GW-RN0783-18), Contractor was reminded to strictly follow and fully comply with the CNP conditions and the mitigation measures stipulated in the EM&A Manual when construction activities are operating during restricted hour. An extended barrier at the top acts as a cantilever shape was recommended to modify the existing semi- enclosure installed in the cherry picker Also, three sides with top as a semi-enclosure to be used and those tree felling activities should be inside the semi-enclosure in the ground slope. The main contractor had been recommended to review their works program and methods of tree felling as to minimize the night time tree felling activities.	04/03/2019
COM-2019- 0010	28/03/2019	Project Hotline of NE/2017/ 05	CCZJV	Noise	28/03/2019	The complaint case should be related to the MTR night time maintenance works. Main Contractor used portable phones and head-set only for communication, and none of loudspeakers were allowed to be used. Main Contractor handled of tree debris	04/04/2019

						into the lorry skip in care when loading. Besides, a layer of soft material (soil/tree debris) was observed leaving inside the skip of the grab lorry to reduce the loading noise. Contractor was reminded to strictly follow and fully comply with the CNP (GW-RN0132-19) conditions and the mitigation measures stipulated in the EM&A Manual when construction activities are operating during restricted hour.	
COM-2019- 0033	26/07/2019	Police visit on- site	CCZJV	Noise	26/07/2019	The complaint is related to the project. The Main Contractor comply with CNP No.: GW-RN0443-19 allowable construction site and within the site boundary to carry out night work on tree felling and the clearance of felled tree debris during the restricted hour. Contractor was reminded to strictly follow and fully comply with the CNP (GW-RN0443-19) conditions and the mitigation measures stipulated in the EM&A Manual when construction activities are operating during restricted hour. Contractor was recommended to increase the frequency of using the electrical chain saw instead of the diesel chain saw for reducing the noise impact. Contractor was reminded to reschedule of tree felling arrangement that most of the fell branches and trunks were temporary laid on slope and arranged to cut smaller on Day Time to minimize the noise nuisance to the nearby NSRs.	30/07/2019
COM-2019- 0045	30/08/2019	1823	CCZJV	Noise	30/08/2019	The complaint is related to the project. Contractor was reminded to strictly follow and fully comply with the CNP (GW-RN0443-19) conditions and the mitigation measures stipulated in the EM&A Manual when construction activities are operating during restricted hour. Contractor should strictly follow the use of acoustic enclosure as in condition 3.d.5. of the CNP during the operation of breaker, hand-held, mass <=10kg (CNP023) shall only be operated inside the acoustic enclosure composed of four side-panels and one top-panel, so that no part of such equipment is visible from any nearby noise sensitive receiver. The panels shall be made of minimum 10mm thick plywood or 1mm thick steel outer skin and minimum 50mm thick sound	19/09/2019

						absorbing lining, or equivalent construction. Contractor was reminded to use portable phones and head-set only for communication, and none of loudspeakers is allowed for night work activities.	
COM-2019- 0056	09/10/2019	Project Hotline of NE/2017/ 05and EPD	CCZJV	Noise	19/10/2019	The complaint of the construction noise especially the breaker noise is project related. Due to the concern of road safety, the Contractor conducted the emergency road repair works under an Emergency Excavation Permit (EXP) of Plan ID: EO13123 issued by Highways Department (HyD). The main contractor's PR / hotline staff was reminded to enhance communication with sufficient information provided for replying any enquiry / complaint in the future. The main contractor was also reminded that noise mitigation measures should be provided as far as practicable subject to the emergency situation. For construction works covered by the CNP issued by EPD, the main contractor should fully complied with the conditions as stipulated and provided all noise mitigation measures as required under the conditions of the CNP. For works subject to the emergency situation, noise mitigation measures such as noise barrier, enclosure etc. should be provided as far as practicable to minimise the noise nuisance to the NSRs.	04/11/2019
COM-2019- 0057	09/10/2019	EPD	CCZJV	Noise	18/10/2019	The complaint of the generator noise nuisance is related to the project. The concerned portable generator is supplying electric power for the Variable Message Sign (VMS) showing the speed limit in 50 km/hr. It is switched on and off manually by manpower, and would only be operated between daytime 07:00-19:00. No construction noise permit (CNP) should be required as the portable generator is not operating in restricted hours. The main contractor was reminded to strictly follow the use of their proposed semi-enclosure as the mitigation measures for the portable generator and the generator operates in daytime 07:00-19:00 only.	21/10/2019

Reference No.	Date of Complaint Received	Received From	Received By	Nature of Complaint	Date of Investigation	Investigation summary & Conclusion	Date of Reply
COM-2019- 0066	06/11/2019	EPD	CCZJV	Noise	07/11/2019	The complaint of the emergency road repair work is related to the project. The works on on 5 <sup>th</sup> November 2019 between 22:00 and 06:00 the next day at southbound slow lane of Tai Po Road outside Wai Wah Centre, including breaking operation. The main contractor should inform the EPD in advance of any emergency opening works of the Project in future to facilitate the effective handling of noise complaint that may arise.	12/11/2019
COM-2020- 0083	29/02/2020	Project email of NE/2017/ 05	CCZJV	Noise and Dust	29/02/2020	The complaint of the dust and noise nuisance near Wai Wah Centre during both the day and night works was at zone 2. The construction works at zone 2 was the mini-piling operation during the day time was same as the complaint. Thus, the complaint in daytime is related to the project. Furthermore, loading and unloading works was carried in night time. Contractor was reminded to enhance the water spray frequency on the construction site for mitigation measures on dust control. Also, Contractor should provide green tarpaulin curtain and additional acoustic Sound Proof Canvas as a secondary layer at the bottom of the mini-pile drilling machine to secure the total enclose condition to minimize the visual and noise impacts to nearby NSRs. ET checked the regular impact air and noise monitoring data, no exceedance case was found on both regular impact air and noise monitoring measurement. The main contractor should carry out further review the effectiveness of the enclosure or noise barrier with their mitigation measure and propose alternative noise mitigation measures to enhance the noise reduction on similar day works or night works in restricted hours.	19/03/2020
COM-2020- 0089	24/03/2020	Project hotline	CCZJV	Noise	24/03/2020	A resident of Wai Wah Centre complained that noise generated from construction activities at night disturbing the nearby resident. According to the Contractor's information, loading/unloading, steel bar cutting, steel plate grinding and asphalt compaction were carried out in the early hours of 24 <sup>th</sup>	07/04/2020

						Mar 2020. The night work activities were within the site boundary. Also, 4 sides with top cover acoustic enclosure for the portable generator was used during the night work. Furthermore, mitigation measures listed in the CNP were implemented for PMEs and works activities. Three sides with top cover enclosure and additional acoustic comprised with 50 mm sound absorbing lining were used for night works activities. ET analysed that the complaint noise source should not be project-related construction noise.	
COM-2020- 0090	27/03/2020	Project hotline	CCZJV	Noise	27/03/2020	Both complaint cases were concerning about the noise nuisance generated from the construction work activities at night time disturbing the nearby Wai Wah Centre residence. According to the Main Contractor, similar nature of major construction works carried out between 03:00 a.m. and 04:00 a.m. on 27 <sup>th</sup> & 28 <sup>th</sup> March 2020 was the asphalt compaction for the road surface remedial works at zone 2 south lane adjacent to Wai Wah Centre. The Main Contractor complied with CNP No.: GW- RN0002-20 that is within the allowable construction site location and within the site boundary to carry out night work on loading	04/05/0000
COM-2020- 0091	28/03/2020	Project hotline	CCZJV	Noise	28/03/2020	and unloading works. ET conduct regular night-time noise monitoring at all monitoring stations between 23:00 26 <sup>th</sup> March 2020 to 04:00 27 <sup>th</sup> March 2020, and between 23:00 2 <sup>nd</sup> April 2020 to 04:00 3 <sup>rd</sup> April respectively. No exceedance cases were found on both ET regular night-time noise monitoring measurement. ET did not remark on-site any noise related to construction works at above noise monitoring nights for which the results were lower than baseline noise level. Hence, ET analysed that the dominant noise source should be road traffic noise but not the project-related construction noise.	04/05/2020
COM-2020- 0093	06/04/2020	Project hotline	CCZJV	Noise	06/04/2020	The complaint case on 6 <sup>th</sup> Apr was received by project hotline. The major construction works between (10:00pm – 11:00pm) on 6 <sup>th</sup> April 2020 was TTA implementation works and asphalt removal works for the road surface remedial work at zone 2 adjacent to Wai Wah Centre. The Main Contractor complied with	28/04/2020

						CNP No.: GW-RN0152-20 that is within the allowable construction site location and within the site boundary to carry out night work on loading and unloading works. The five noise monitoring stations close to the concerned works area are NMS3, NMS4, NMS5A, NMS6A & NMS7, and NMS5A & NMS6A locate nearest to Wai Wah Centre. The night time noise monitoring results measured at NMS3, 4 & 6A were all lower than that of measured in the baseline, two exceedance case were found at NMS 5A especially NMS 5A & NMS 6A monitoring stations where locate at the Wai Wah Centre. The corrected noise level measured at NMS 7 is lower than the night time limit 55dB (A). Therefore, there was no exceedance cases were found on ET regular night-time noise monitoring measurement. ET analyzed that the dominant noise source should be road traffic noise but not the project-related construction noise.	
COM-2020- 0096	20/04/2020	Project hotline	CCZJV	Noise	20/04/2020	A continues complaint were received on 20 Apr and 21 Apr 2020. A resident of Wai Wah Centre filed three complaints about the noise nuisance generated by the nearby construction activities during daytime. Two complaints were made through project hotline on 20 <sup>th</sup> Apr 2020 at 10:57 a.m. and 21 <sup>st</sup> Apr 2020 at 9:03 a.m., while the other one was through project email on 20 <sup>th</sup> Apr 2020 at 12:43 p.m. The noise source(s) of the concerned nuisance during complaint period should be mini piling works, which is opposite to Wai Wah Centre. According to	19/05/2020
COM-2020- 0097	20/04/2020	Project Email	CCZJV	Noise	20/04/2020	the contractor's work schedule, major day work activity was mini- piling operation since early Feb 2020 at zone 2 in central median at non-restricted hours, from Mondays to Saturdays between 0800 and 1800 not including General Holidays. The mini piling operation on 20 <sup>th</sup> & 21 <sup>st</sup> Apr 2020 was carried out at non restricted hours. The limited level of noise generated by the construction of the Project during the non-restricted daytime hours will be 75 dB (A) for dwelling. The mini piling operation on 20 <sup>th</sup> and 21 <sup>st</sup> Apr 2020 was carried out at non restricted hours	10/00/2020

Fugro Development Centre, 5 Lok Yi Street, Tai Lam, Tuen Mun, N.T., Hong Kong.

Reference No.	Date of Complaint Received	Received From	Received By	Nature of Complaint	Date of Investigation	Investigation summary & Conclusion	Date of Reply
COM-2020- 0098	21/04/2020	Project hotline	CCZJV	Noise	21/04/2020	with green tarpaulin curtain and sound proof canvas. The noise level of NMS 5A and NMS 6A on 22 <sup>nd</sup> Apr 2020 were 73.5 dB (A) and 72.6 dB (A) respectively. No noise exceedance was occurred at NMS 5A and NMS 6A. The construction activity on 22 <sup>nd</sup> Apr 2020 was similar to 20 <sup>th</sup> and 21 <sup>st</sup> Apr 2020. Therefore, ET's day-time monitoring result on 22 <sup>nd</sup> April 2020 at NMS5A and NMS6A can act as a reference for impact noise from the similar mini-piling operation on 20 <sup>th</sup> and 21 <sup>st</sup> April 2020. ET analyzed that the dominant noise source should be road traffic noise but not the project-related construction noise.	
COM-2020- 0099	21/04/2020	Project hotline	CCZJV	Noise	21/04/2020	The complaint cases on 21 <sup>st</sup> Apr 2020 was received by project hotline from Police. According to the complainant who is the local resident at Wai Wah Centre, the noise source(s) of the concerned nuisance during night works was at zone 2 is opposite to Wai Wah Centre. The major construction works was road surface remedial work since 15 <sup>th</sup> April 2020 conducted at restricted hours along zone 2 south boundary adjacent to Wai Wah Centre. The Main Contractor complied with CNP No.: GW- RN0152-20 that is within the allowable construction site location and within the site boundary to carry out night work on road surface remedial works. Environmental Team (ET) conduct a regular night-time noise monitoring at all monitoring stations between 23:00 23 <sup>rd</sup> April 2020 to 04:00 24 <sup>th</sup> April 2020. The five noise monitoring stations close to the concerned works area are NMS3, NMS4, NMS5A, NMS6A & NMS7, and NMS5A & NMS6A locate nearest to Wai Wah Centre. There were no exceedance on the night time noise monitoring, especially measured at NMS 5A & NMS 6A where locate at the Wai Wah Centre, the measured result at NMS 5A & 6A were all lower than that of measured in the baseline. Therefore, no exceedance cases were found on ET regular night-time noise monitoring measurement. ET analyzed that the dominant noise source should be road traffic noise but not the project-related construction noise.	05/05/2020

Reference No.	Date of Complaint Received	Received From	Received By	Nature of Complaint	Date of Investigation	Investigation summary & Conclusion	Date of Reply
COM-2020- 0100	23/04/2020	Project hotline	CCZJV	Noise	23/04/2020	The complaint was received via project hotline on 23 <sup>rd</sup> April 2020 at 10:45 a.m. A resident of Wai Wah Centre complained that noise generated from operation of the two piling machines disturbing her daughter's study for DSE examination, and demanding limitation on operation hours of the machines only at two separate periods between 12 noon and 1p.m and 3 p.m. to 6 p.m. According to the Main Contractor, the major construction works at day time (08:00-18:00) on 23 <sup>rd</sup> April 2020 was mini- piling operation at Zone 2 Central Median of Tai Po Road near Wai Wah Centre. According to the photo records of day-time site condition on 23 <sup>rd</sup> April 2020 provided by Main Contractor, the green tarpaulin curtain was provided for the mini-pile drilling machines so that the bottom part of the mini-pile drilling machine was blocked from view of nearby NSR (e.g. residents at Wai Wah Centre) and an additional layer of sound proof canvas was installed at lower level to mitigate the noise from mini-pile drilling operation. The day-time noise monitoring results measured at NMS3, 4, 5A, 6A and 7 were all lower than the limit level, especially NMS 5A & NMS 6A monitoring results show no noise exceedance occurred at both locations. Thus, ET day-time monitoring result on 22 <sup>nd</sup> April 2020 at NMS5 & NMS6 can be act as a reference for impact noise from the similar mini-piling operation activities on 23 <sup>rd</sup> April 2020. Therefore, there was no exceedance cases were found in ET regular day-time noise monitoring measurement. ET analyzed that the dominant noise source should be road traffic noise but not the project-related construction noise.	11/05/2020
COM-2020- 0101	28/04/2020	1823	CCZJV	Noise	28/04/2020	The complainant on via ICC1823 on 28 <sup>th</sup> April 2020 complained about the noise and odor nuisance generated from the night- time asphalt laying construction works at Shatin Rural Committee Road (Zone 3) area. Although the main contractor no work at zone 3, but the major night-time construction works was road surface remedial work which was related to the	15/05/2020

						complainant concerned. The major construction works was road surface remedial work since 15 <sup>th</sup> April 2020 at approved restricted hours along zone 2 south boundary adjacent to Wai Wah Centre. Also, Tai Po Road is the main strategic route, implementation of temporary traffic diversion at day time due to loading and unloading material or plant work or road surface remedial work is not feasible. The lorry had been used in TTA implementation & road opening, portable generator and electric handheld breaker had been used in asphalt removal work, dump truck with grab had been used for loading and unloading of asphalt or rubble, vibratory compactor had been used in asphalt compaction for road surface remedial works on 27^28 April 2020. The Main Contractor complied with CNP No.: GW-RN0152-20 that allowed PME used in Group C or Group F. According to the Main Contractor, advance "Notice to Affected Residents" had been issued and distributed on 26 <sup>th</sup> March 2020 in accordance with the CNP advice that prior notification should be given to nearby residents. Besides, the road re-surfacing work would be carried out at approximately 14 night-time works between 2 <sup>nd</sup> and 28 <sup>th</sup> April 2020 listed in the distributed notices. No exceedance cases were found on ET regular night-time noise monitoring measurement at all noise monitoring stations, especially measured at NMS 5A & NMS 6A where locate close to the works area (Wai Wah Centre in Zone 2), the measured result at NMS 5A & 6A were all lower than that of measured in the baseline. ET analyzed that the dominant noise source should be road traffic noise but not the project-related construction noise.	
COM-2020- 0151	10/11/2020	EPD	CCZJV	Water	10/11/2020	The complainant on 10 <sup>th</sup> November 2020 complained about water discharge onto the traffic lanes of Northbound towards Sha Tin Section of Tai Po Highway. According to the Main Contractor, there is one active site access located at Zone 1 (R1) near Pai Tau, site access no. is N02. Restricted opening hours of the site access Zone 1 (R1) is between 10:00 to 16:00.	27/11/2020

						The operation which might be related to the complaint was water flow from water-filled barriers before the opening of site access and no water spilling onto the traffic lanes from the access area of Zone 1 (R1). The released water was directed towards to the work areas facing Zone 1 (R1) and no water was flowed towards the high-speed road or traffic lanes. ET conducted ad-hoc site inspection on 17 <sup>th</sup> November 2020. ET had no particular findings related to the complaint and conducted trial to open the bottom of the water barrier valve for testing and checking on the water flow to the construction site at Zone 1. Contractor performed well on environmental preventive measures for soil or silt leakage protection as impervious sheet with sand bags had been provided at the site boundary of Zone 3. ET analyzed that released water was directed towards to the work areas facing Zone 1 (R1) and no water was flowed towards the high-speed road or traffic lanes.	
COM-2020- 0152	20/11/2020	1823	CCZJV	Noise	20/11/2020	The complainant on via ICC1823 on 20 <sup>th</sup> November 2020 complained about the noise generated from the night-time asphalt laying construction works between Sha Tin Station and nearby Wo Che Estate. Although the main contractor no work at zone 5, but the major night-time construction works was road surface remedial work which was related to the complainant concerned. According to the Main Contractor, the major construction works was road surface remedial work since 19 <sup>th</sup> November 2020 conducted at restricted hours along zone 3 to zone 4 north bound of Tai Po Road Sha Tin section. 3.20 No exceedance cases were found on ET regular night- time noise monitoring measurement (Appendix F) at all noise monitoring stations. Contractor placed acoustic enclosure "SilentCUBE" with four sides and a top cover at asphalt removal works to mitigate. The Main Contractor was reminded to pay attention to CNP other condition 3.d.3, the electric hand-held breaker shall only be used for carrying out construction work between 22:00 – 23:30 hours. It is prohibited to use the electric	07/12/2020

						hand-held breaker beyond the CNP condition 3.d.3 stated that the using limitation on 23:30. The Main Contractor was reminded to re-arrange their proposed night-time construction activities to fulfill the complainant expectation that noise emitting work should be paused during 00:00 to 06:00 sleeping time.	
COM-2020- 153	26/11/2020	EPD	CCZJV	Water	24/11/2020	According to EPD Mr. Bryan Kwok, EPD carried out a site inspection on 24 November 2020, revealing that muddy effluent was discharged from an outfall at Fo Tan near Jockey Club Ti-I College while construction work of the abovementioned project site at Zone 5 opposite to Wo Che Estate was in progress. EPD team inspected the condition of waste water treatment facilities on site (slope F133) and observed that the water in the first and second sedimentation tanks was muddy; muddy water was observed at the outlet level of the WetSep (waste water treatment plant) though there was no discharge and piling works at the time. EPD team reminded the Main Contractor that effluent does not complied with the discharge license standard should NOT be allowed to discharge. The waste water treatment system should be improved and maintained to ensure the effluent discharge standard. EPD team requested in both works area of Slope F133 and Slope F163 the Main Contractor to locate the network of drainage, connecting manhole(s) and downstream manhole, check if any presence of muddy materials and clear-out. The main contractor was reminded to strictly follow and fully comply with the water discharge license (WT00032446-2018) conditions and the mitigation measures stipulated in the EM&A Manual for effluent discharge on the wastewater treatment system.	23/12/2020
COM-2020- 154	27/11/2020	1823	CCZJV	Noise	30/11/2020	The complaint was received via ICC1823 on 27 <sup>th</sup> November 2020, the complainant expressed concern of construction noise nuisances near Wo Che Estate at around 01:14 am on 27 <sup>th</sup> November 2020. According to the Main Contractor, there were no construction works near Wo Che Estate (Zone 5) on 26^27 November 2020. The major construction works were works	14/12/2020

						related to removal of central median (at night-time) under the approved road closure with CNP no.GW-RN0799-20. According to Main Contractor EO Kimberly, she sent prior notification to the EPD on 20 <sup>th</sup> November 2020 through logging in the webpage of EPD before the commencement of the construction work in relation to the CNP GW-RN0799-20 (conditions 3.d.11 and 4.d.8). The Main Contractor provided photo records showing that mitigation measures of the movable acoustic enclosure "SilentCUBE" with four sides and a top cover were implemented for night work on removal of existing central median: drill hole with percussive drill for temporary steel module spiral installation, drill hole at existing central median with concrete corer and asphalt compaction with portable roller. Main Contractor was reminded to strictly follow and fully comply with the CNP No.: GW-RN0799-20 conditions. 5.11 The Main Contractor was reminded to re-arrange their proposed night-time construction activities to fulfill the complainant expectation that noise emitting work should be paused during 00:00 to 06:00 sleeping time.	
COM-2020- 155	26/11/2020	1823	CCZJV	Dust	30/11/2020	According to the complainant, the dust nuisance concerned at day time was at the slip road to Fo Tan Road near Lok King Street near Zone 5 works area. According to the Main Contractor, the major day time construction works at Zone 5 works area in November were mini-piling works and slope works of soil replacement. Regular movement of vehicle for transportation was also carried out on site. Thus, the complaint was considered to be related to the project. ET conducted regular day-time air quality monitoring in November 2020 and on the 3 <sup>rd</sup> December 2020 at selected air monitoring stations AMS6, 8, 11A & 13 and AMS5, 4A, 7A & 12 respectively. The two air quality monitoring stations closed to the works area at zone 5 (where the complainant concerned of dust nuisance) were AMS12 and AM13; and AMS13 locate nearest to Zone 5. The ET regular air quality results measured at AMS13 and AM12	05/01/2021

Fugro Development Centre, 5 Lok Yi Street, Tai Lam, Tuen Mun, N.T., Hong Kong.

Reference No.	Date of Complaint Received	Received From	Received By	Nature of Complaint	Date of Investigation	Investigation summary & Conclusion	Date of Reply
						in November 2020 and on the 3 <sup>rd</sup> December 2020 show that there was no exceedance case found in air quality monitoring measurement and the results were all below the action level. The Main Contractor was reminded to enhance the mitigation measures in dust control such as increase the water spray frequency at the construction site to suppress dust emission. The Main Contractor proposed to properly maintain the coverings on exposed slopes and keep them in good condition for minimizing dust impact. The Main Contractor proposed to frequently spraying of haul road especially at area where active movement of vehicles and pave the haul road where necessary to reduce dust impact.	
COM-2020- 157	07/12/2020	STDC	CCZJV	Dust	07/12/2020	According to the complainant, the dust nuisance concerned at day time was generated from the construction works area of the Tai Po Road Widening project at Zone 5. According to the Main Contractor, major day time construction works of mini-piling and soil replacement at slopes were carried out at Zone 5 works area in December 2020. There was also regular movement of vehicle for transportation within the works area. Thus, the complaint was considered to be related to the project. ET conducted regular day-time air quality monitoring (Appendix C) on the 3 <sup>rd</sup> , 9 <sup>th</sup> & 15 <sup>th</sup> December 2020 respectively which was close to the date of complaint, at selected air monitoring stations AMS5, AMS4A, AMS7A & AMS12. ET regular day-time air quality monitoring measurement results at air quality monitoring stations AMS12, closest to Zone 5. The ET regular air quality results measured at AM12 on 3 <sup>rd</sup> , 9 <sup>th</sup> & 15 <sup>th</sup> December 2020 show that there was no exceedance case was found in air quality monitoring measurement and the results were all below the action level. The Main Contractor was reminded to reduce the travelling speed of transportation vehicles on site and plan the schedule of delivery transport in order to reduce dust impact. The Main Contractor proposed to continue in maintaining the coverings on exposed slopes in good condition for minimizing dust impact.	29/12/2020

NO.		EPD	CCZJV	Noise	18/12/2020	The Main Contractor proposed to increase water spraying at area where active movements of vehicle transportation occur. The complaint was received via email notification by EPD on 18 <sup>th</sup> December 2020, the complainant expressed concern of construction noise nuisances near Wo Che Estate during night-time on 7^8 & 8^9 December 2020. According to the Main Contractor, the major construction works was removal of central median works since 7'8 & 8'9 December 2020 conducted at restricted hours along Zone 4 central median of Tai Po Road Sha Tin section. Thus, the complaint is considered to be related to the project. 3.4 According to the Main Contractor, portable generator with hand-held breaker had been used for breaking of asphalt (on existing central median adge); lorry with crane, portable generator and concrete corer had been used for remove (lifting) the existing central median and coring of central median joint; dump truck with grab had been used in asphalt compaction; lorry with crane, percussive and hand-held drill and portable generator had been used for installation of temporary steel module between 00:30 to 04:30 am on 7^8 December 2020. The Main Contractor complied with CNP No.: GW-RN0799-20 that allowed the usage of PMEs. The noise emanated from the concrete corer for drilling hole at existing central median and portable roller for asphalt compaction might cause a noise nuisance. To further alleviate the noise nuisance, the Contractor placed acoustic enclosure "SilentCUBE" with four sides and a top cover at removal of existing central median and asphalt compaction works to mitigate as shown in the site condition photo record. No exceedance cases were found on ET regular night-time noise monitoring measurement (Appendix F) at all noise monitoring measurement (Appendix F)	<b>Керіу</b>
						monitoring stations mentioned in above section 3.15 where locate close to the works area (Sha Tin station to nearby Fung Wo Estate in Zone 4), the measured result at NMS16, NMS18

						and NMS26 were lower than that of measured in the baseline. Besides, the measured result after correction of baseline at NMS13, NMS14 and NMS15 were lower than that of the limit level. The Main Contractor was reminded to re-arrange their proposed night-time construction activities especially in quiet construction works to minimize the noise nuisance to nearby residences. The Main Contractor was reminded to re-arrange their proposed night-time construction activities to fulfill the complainant expectation that noise emitting work should be paused during night sleeping time.	
COM-2020- 167	22/02/2021	1823	CCZJV	Dust	22/02/2021	A complainant who did not wish to disclose his identity called 1823 hotline on 22 <sup>nd</sup> February 2021 regarding the dust nuisance at slip road to Fo Tan Road. A repetitive case with reference no. 3-6566315922 was referred to the Main Contractor of the captioned Project and ET on 23 <sup>rd</sup> February 2021. According to the complainant, the dust nuisance concerned at day time was at the slip road to Fo Tan Road near Zone 5 works area. According to the Main Contractor, the major day time construction works at Zone 5 works area in February 2021 was mini-piling works. Regular movement of vehicle for transportation was also carried out on site. Thus, the complaint was considered to be related to the project. The Main Contractor was reminded to reduce the travelling speed of transportation vehicles on site and plan the schedule of delivery transport in order to minimize the dust impact. The Main Contractor proposed to reduce the exposed surface by providing covers or paving (e.g. with cement grout) to the newly excavated slope.	05/03/2021
COM- 2020-168	20/02/2021	1823	CCZJV	Noise	23/02/2021	The complaint was received via 1823 on 20 <sup>th</sup> February 2021 01:00 am concerning about the night-time construction works near Sha Tin Police Station at 19^20 February 2021. According to the Main Contractor, there was night-time construction works near Sha Tin Police Station (Zone 3 & 4) on 19^20 February 2021. The major construction works were lane shifting works conducted on 19^20 February 2021 at night-time under	08/03/2021

						approved road closure setup with in-force Construction Noise Permit (CNP) no.GW-RN0798-020. According to the Main Contractor, since Tai Po Road is the main strategic route, implementation of temporary traffic diversion at day time due to loading and unloading material or plant work or road surface remedial work is not feasible. The concerned night work could only be conducted during off-peak period at night time under temporary traffic diversion to avoid causing traffic congestion. According to the Main Contractor, no concurrent operation of Power Mechanical Equipment (PME) and idling were switched off during the loading and unloading of materials and rubble by manual handling of road surface remedial works. Environmental Team (ET) conduct a regular night-time noise monitoring at all monitoring stations between 23:00 25 <sup>th</sup> February to 03:00 26 <sup>th</sup> February 2021. 3.13 The five noise monitoring stations close to the complaint receiving area of Zone 3 & 4 are NMS13, NMS14, NMS15, NMS16 & NMS26. No exceedance cases were found on ET regular night-time noise monitoring measurement at all noise monitoring stations, especially measured at five noise monitoring station in Zone 3&4), the measured result at NMS15, NMS16 and NMS26 were lower than that of measured in the baseline. Besides, the measured result after correction of baseline at NMS13 and NMS14 were lower than that of the limit level in 55 dB(A). The Main Contractor was reminded to strictly follow and fully comply with the CNP (GW-RN0798-20) conditions and the mitigation measures stipulated in the EM&A Manual when construction activities are operating during the restricted hour.	
COM-2021- 0170	03/03/2021	1823	CCZJV	Dust and Noise	04/03/2021	The complaint on 3rd March 2021 at 1:25 pm complained about the noise, dust nuisance generated and insufficient dust mitigation works during the night-time construction works near King Wo House and Wo Che Estate area. A repetitive case with reference no. 3-6638500887 was referred to the Main Contractor	25/03/2021

						and ET of the captioned project on 4th March 2021. According to the Main Contractor, there was night time road works at King Wo House and Wo Che Estate (Zone 4 & 5) on 3rd March 2021. Thus, the complaint considered to be related to the project. According to ET investigation, the Main Contractor complied with the CNP No.: GW-RN0798-020, with the permission of using Powered Mechanical Equipment (PMEs). No exceedance cases were found on ET regular night-time noise monitoring measurement (Appendix G). The Main Contractor was reminded to close all the doors of the acoustic enclosure, included the "SilentCUBE" for hand-held breaker and metallic enclosure. Consider the dust nuisance, no exceedance cases were found on ET regular air quality monitoring measurement (Appendix F). According to the Main Contractor, vapour was emitted from the bottom of the miller, when the milled asphalt falling from the drop point of the conveyor belt to the dump truck container, fugitive dust was generated. The Main Contractor was reminded to enhance the water spray frequency and keep the road surface wet before milling as the mitigation measures on fugitive dust control.	
COM-2021- 0172	03/03/2021	1823	CCZJV	Noise	08/03/2021	The second complaint was received on 3rd March 2021 at 1:40 pm complained about the noise nuisance generated during the night-time construction works near Shatin Pui Ying College area. A repetitive case with reference no. 3-6638578830 was referred to the Main Contractor and ET on 8th March 2021. According to the main contractor, there was a night-construction activity near Shatin Pui Ying College and Wo Che Estate (Zone 4 & 5). Thus, the complaint considered to be related to the project. According to ET investigation, the Main Contractor complied with the CNP No.: GW-RN0798-020, with the allowed usage of PMEs. No exceedance cases were found on ET regular night-time noise monitoring measurement (Appendix G). The Main Contraction was reminded to strictly follow and fully comply with the CNP No.: GW-RN0798-20 conditions and the mitigation measures	25/03/2021

						stipulated in the EM&A Manual when construction activities were operated during the restricted hour. The contractor was also reminded to use a movable noise barrier/blanket to block the line of sight from the engine or noise emission part to the nearby NSRs when using PMEs.	
COM-2021- 0193	09/05/2021	1823	CCZJV	Noise	17/05/2021	The complaint was first received on 6 <sup>th</sup> May 2021 at 9:27 a.m. via FEHD email. The complaint was then referred to 1823 case: 3-6727963845 on 9 <sup>th</sup> May 2021 at 2:52 p.m. A follow-up complaint was received on 11 <sup>th</sup> May 2021 at 8:20 a.m. The two complaints were referred from 1823 to CEDD on 14 <sup>th</sup> May 2021 at 6:26 p.m. The complaint cases was referred from AECOM to ET on 17 <sup>th</sup> May 2021 at 11:46 a.m. According to the Main Contractor, the major construction works at daytime (08:00-18:00) between 6 <sup>th</sup> to 11 <sup>th</sup> May 2021 near Mei Wo House were soil replacement works (involved excavation, loading and unloading of materials and pour the no fine concrete) at the works area 1 (between Wo Che Estate King Wo House and Shatin Pui Ying school) and demolition of existing central divider works (involved breaking, loading and unloading of materials) at the work area 2 (opposite to Wo Che Estate Man Wo House). The ET regular daytime noise monitoring measurement results of NMS16, NMS17, NMS18, NMS19, NMS20 & NMS26 on 6 <sup>th</sup> , 7 <sup>th</sup> , 12 <sup>th</sup> and 13 <sup>th</sup> May 2021, no exceedance case found. The noise monitoring results were lower than the noise limit of 75 dB(A) Leq (30 minutes) at the facade of dwellings and 70 dB(A) Leq (30 minutes) at the facade of schools (65 dB (A) during examinations). The Main Contractor installed an acoustic blanket, enclosed at the breaker to minimize the noise impacts to nearby NSRs. The Main Contractor was reminded to maintain the newly implemented noise mitigation measure during breaking works. The Main Contractor was reminded to provide additional mitigation measures to minimize the noise nuisance to the NSRs (similar to night-time construction works) during the construction works, for example moveable noise barrier or blanket to block	27/05/2021

						the line of sight from the engine and noise emission parts to the nearby NSRs.	
COM-2021- 0200 and COM-2021- 0202	07/06/2021	1823	CCZJV	Noise	08/06/2021	Ms. So, a resident of Wo Che Estate, Mei Wo House complained about the noise generated from the daytime construction work located outside Mei Wo House, the tunnel entrance (direction towards Fo Tan). Until 7 <sup>th</sup> June 2021, total six complaints were received via 1823 (case: 3-6727963845) from the same complainant. According to the Main Contractor's daytime working schedule from 12 <sup>th</sup> May to 7 <sup>th</sup> June 2021 at zone 5 were soil replacement works (involved excavation, loading and unloading of materials, pour the no fine concrete and formation of haul road) and demolition of existing central divider works (involved loading and unloading of materials, minor breaking and corning operation). According to CEDD, a reply was sent to Ms. So on 27 <sup>th</sup> May 2021. The Resident Site Staff (RSS) of AECOM contacted the complainant on 7 <sup>th</sup> June 2021 night to explain the detail of upcoming construction work. The complainant was also informed that she could contact the RSS directly if she had any further enquiry in future. ET conducted regular daytime noise monitoring at NMS16-20 and NMS26 monitoring stations on 6 <sup>th</sup> , 7 <sup>th</sup> , 12 <sup>th</sup> , 13 <sup>th</sup> , 17 <sup>th</sup> , 18 <sup>th</sup> , 24 <sup>th</sup> , 25 <sup>th</sup> of May and 4 <sup>th</sup> , 5 <sup>th</sup> , 10 <sup>th</sup> , 11 <sup>th</sup> of June 2021. No exceedance case was found and the noise monitoring results were lower than the noise limit of 75 dB(A) Leq (30 minutes) at the facade of dwellings and 70 dB(A) Leq (30 minutes) at the facade of schools (65 dB (A) during examinations). ET reminded the Main Contractor to implement additional mitigation measures to minimize the noise nuisance generated from daytime construction works to the nearby Noise Sensitive Receivers (NSRs). The Main Contractor agreed to install an acoustic blanket, enclosed at the breaker to minimize the noise impact generated from the demolition of central divider works. The Main Contractor was reminded to maintain the noise	22/06/2021

						mitigation measure during the breaking works. The Main Contractor was reminded to provide additional mitigation measures during the construction works to minimize the noise nuisance to the NSRs (similar to nighttime construction works), for example, a temporary moveable noise barrier to lower the noise impact and an acoustic blanket to block the line of sight from the engine and noise emission parts to the nearby NSRs. The Main Contractor was also reminded to display the project hotline number 5613-3367 on-site for public enquiry.	
EN-2021- 0094	26/07/2021	EPD	CCZJV	Air (Odour)	27/07/2021	A resident of Paris Park Villa complained about the poor air quality around his living area between 19th and 26th July 2021. He suspected that the odour nuisance may be generated from the construction site's diesel machineries. The complaint was received by the EPD's Regional Office (North) on 26 <sup>th</sup> July 2021 with reference no.: RN17367-21. According to the Main Contractor's daytime working schedule between 19th July and 26th July 2021 involved: (1) Zone 4 and 5 North boundary, the construction activities involved the formation of temporary access, backfilling works for noise barrier stem wall, loading and unloading works. Excavations were mainly performed in areas EX1 and EX2. (2) Zone 4 and 5 South boundaries, the construction activities involved the noise barrier foundation works and the formation of temporary access. Excavations were mainly performed in areas EX3 and EX4. While rebar fixing and formwork erection were also carried out in EX3 area. For area TW1 in Zone 5 South boundary, tree works were performed. There were no work activities carried out at night-time, Sunday and under the hosting of typhoon signals. According to AECOM's Resident Engineer and the Main Contractor, no particular malpractice was observed during the construction activities at Zone 4 and 5 between 19th and 26th July 2021. According to the Main Contractor, only machineries with valid NRMM labels and regular maintenance are being used on-site. The Main Contractor sent the Ultra-Low Sulphur Diesel	13/08/2021

						(ULSD) sample for laboratory testing since Feb 2019. There is no exceedance of the Sulphur content of more than 0.005% by weight in the past and the latest sample collected on 7 <sup>th</sup> July (Cap. 3111 Air Pollution Control (Fuel Restriction) Regulations). No particular finding on odour nuisance was found by the ET's staff when performing air monitoring in AMS 14 Ha Wo Che (close to 73A Ha Wo Che) on 21st and 22nd July 2021. ET also inspected the construction site on 29th July 2021 (between 9:00 to 10:15 a.m., weekly environmental inspection). There was no particular observation on odour nuisance or diesel smell generated from the Non-Road Mobile Machineries (NRMMs) and construction activities in the North and South boundary at Zone 4 and 5. No dark smoke was observed from the excavator, power generator, pilling and pre-drilling machines under operation.ET inspected the area around Paris Park Villa and Ha Wo Che on 29th July 2021 between 10:30 a.m. to 11:30 a.m. There was no particular finding on odour nuisance in AMS14 Ha Wo Che (close to 73A Ha Wo Che). ET reminded the Main Contractor to strictly implement the air pollution control measures and minimize the air pollution impact generated from the construction work activities. The Main Contractor also is reminded that only approved or exempted NRMMs include regulated machines and non-road vehicles with proper labels are allowed to be used in specific activities on-site. The NRMMs should be well maintained. The Main Contractor was also be reminded that odour emissions from construction sites need to be controlled. Potential emission includes particulate matter, diesel and hazardous chemicals need to be considered for their odour impact. Use of ULSD should be maintained and dark smoke emission should be prevented in accordance with the Air Pollution Control (Smoke) Regulation and ETWB TCW 19/2005. The Main Contractor was also be reminded to display the project hotline number 5613-3367 on- site for public enquiry.

DSD Ref: MS 8/0/CE2815 /0 pt.6	01/09/21	DSD	CCZJV	Water	02/09/21	Drainage Services Department (DSD) issued a notice (Ref: MS 8/0/CE2815/0 pt.6) to the Engineer's Representative (AECOM) after their morning inspection on 1st September 2021 concerning the improperly treated water being discharged from the construction site near Fung Wo Estate of the Project to nearby public stormwater drainage system, and of the consequence of contaminating the watercourse at Shing Mun River. The letter of concern was referred to Environmental Team (ET) on 2nd September 2021 at 3:24 p.m. for investigation. According to the Main Contractor and AECOM, the major construction work at Zone 5 south boundary was mini-pilling works (at the end of August). Two pilling machines were operating either individually or simultaneously. There are approximate 130 nos. of pile planned to be installed, and minipiling works are scheduled to be finished in January 2022. Originally, one WetSep (TW-WS1) and two sedimentation tanks (ST1 and ST2) were provided for handling the wastewater generated from the pilling works and site surface runoff at the zone 5 south boundary. According to the Main Contractor, the sedimentation tanks (ST1 and ST2) were filled with muddy water and silt on 1st September 2021. Observation, reminders and follow-up action were proposed and monitored by the ET on handling the wastewater generated form pilling works and site surface run-off. Moreover, EPIs from EPD conducted the site inspection on 9th and 29th September 2021. The two inspection conducted by the EPIs focused on reviewing the general site condition, wastewater treatment facilities set-up, mitigation measures for preventing muddy water formation, handling the wastewater and surface run-off. Observation, recommendations and reminders proposed by the EPIs and ET are grouped and shown in Appendix M.	20/10/2021

						Rectification have been reported by the Main Contractor according to the observation and recommendation from ET and EPIs on 8th, 17th, 27th September and 6th October 2021. During the 2nd joint site inspection, EPIs agreed the pilling works can be restarted. However, EPIs reminded that the 2nd pilling machine can only be operated until the 2nd WetSep is functioned properly and the effluent quality is acceptable. EPIs mentioned that follow-up inspection expected to be conducted in early or mid-October, focus on inspecting the wastewater treatment efficiency for pilling works, paving of the soil surface, mitigation measures for handling the surface run-off. EPIs also mentioned that surprise inspection may be conducted in the future. According to the AECOM, the pilling work was restarted on 30th September 2021. According to this incident, the Main Contractor was reminded by ET to analyze and review the efficiency of the wastewater treatment system according to the construction activities regularly. The Contractor should provide regular maintenance, water quality testing and related checklist for ET and IEC review during the site inspection. The Main Contractor and related Sub-Contractor was reminded by ET and AECOM that the discharge of effluent needs to fulfil the requirement stated in the Water Discharge License (No. WT00032446 – 2018). AECOM and ET requested the Main Contractor to update the description of the wastewater mitigation measures inside the Environmental Management Plan (EMP) and Environmental Management Plan (EMP) and Environmental Management Plan (EMP) and Environmental Management efficiency of the temporary wastewater treatment facilities, mitigation measures to prevent muddy water treatment facilities, mitigation measures to prevent muddy wat

						generated from soil surface, discharge points and gullies condition. EPIs commented on the mitigation measure around the discharge point near WetSep TW-WS1. The bunding next to the manhole should be rectified to prevent the inflow of muddy water. EPIs reminded that mitigation measures (such as sandbags and bunding) should be provided for enclosing the area near the piling machine. It is for directing the muddy water into the temporary wastewater treatment system. EPIs also reminded regular maintenance of the temporary wastewater treatment system is needed to ensure the effluent's water quality fulfill the standard of the Water Discharge License.	
EPD ref.: RN25674- 21	28/10/21	EPD	CCZJV	Noise	05/11/21	A complaint was received by the EPD Regional Office (North) on 28 <sup>th</sup> October 2021. The complainant concerned about the night- time noise nuisance near Man Wo House, Wo Che Estate from 2:00 to 5:00 a.m. on 25^26 <sup>th</sup> , 26^27 <sup>th</sup> and 27^28 <sup>th</sup> October 2021 (total 3 nights). The complaint was referred from EPD to (ET on 5 <sup>th</sup> November 2021 at 3:35 p.m. The construction work activities were allowed under the in-force CNP no.: GW-RN0600-21 Road Enclosure for General Night Works that was issued by the EPD. According to Main Contractor, the construction work activities were carried out during the permitted hours (00:00-05:00) on 25^26 <sup>th</sup> and 27^28 <sup>th</sup> October 2021. The construction activities were carried out within the allowable location and within the site boundary listed in the CNP. The night-time construction works included Temporary Traffic Arrangement (TTA) implementation, unloading of fill materials, loading and unloading of the lamppost, precast concrete blocks and generator and site clearance. The Main Contractor reported that no night-time construction work was carried out on 26^27 <sup>th</sup> October 2021 at Zone 4 and 5. ET checked the Main Contractor has complied with CNP No.: GW-RN0600-21. The Main Contractor was reminded to strictly	16/11/2021

COM-2021- 0193 and COM-2021- 0202	21/12/21	1823	CCZJV	Noise	23/12/21	Three complaints were received by 1823 from the same complainant (ref: CASE # 3-6727963845 via email) on 21 <sup>st</sup> December 2021 at 8:35 a.m., 22 <sup>nd</sup> December 2021 at 9:18 a.m. and 5:06 p.m. The complainant, Ms. So concerned about the recent day-time noise nuisance generated from day-time construction works from the Tai Po Road (Sha Tin Section) construction site (near Mei Wo House, Wo Che Estate). According to the Main Contractor, the construction works were carried out at day-time (08:00-18:00) between 15 <sup>th</sup> and 22 <sup>nd</sup> December 2021 near Mei Wo House (at Zone 5). The construction work activities included formwork erection, formwork removal, rebar fixing, and concreting works. ET carried out regular day-time noise monitoring on 20 <sup>th</sup> and 21 <sup>st</sup> December 2021 at NMS 16-20 and NMS 26, no exceedance case was found. All the noise monitoring results at the abovementioned stations were lower than the noise limit of 75 dB(A) Leq (30 minutes) at the facade of dwellings and 70 dB(A) Leq (30 minutes) for school. To minimize the noise impact generated from day-time construction works, the Main Contractor reported that they have implemented an additional noise mitigation measure (with temporary noise barriers) for the Mei Wo House, NSR. During the ET weekly environmental inspection on 13 <sup>th</sup> January 2022, the noise barriers were observed as properly installed. Most of the sight from the nearby NSRs for the noise barrier. There is no particular observation about the noise impact generated from the construction activities during the site inspection. ET reminded the Main Contractor to ensure the additional noise barriers were applied properly next to the PMEs and noisy work. The contractor should minimize the noise impact generated from the daily construction works activities as much as possible.	09/02/2022

COM-2023- 385	14/2/23	1823	CCZJV	Noise	14/2/23	A complaint was received by 1823 (CASE#3-7591662478) on 14th February 2023. The complainant is concerned about the noise nuisance generated by the night-time construction works activities near Tai Po Road next to Wo Che Estate. According to the Main Contractor, the night-time construction works included TTA implementation, loading and unloading, pouring non-fine concrete and asphalt paving were carried out between 13th and 14th February 2023. ET checked that the Main Contractor had complied with the conditions listed in CNP No.: GW-RN1176-22. The Main Contractor was reminded to strictly follow and fully comply with the requirement listed in the CNP and the mitigation measures stipulated in the EM&A Manual when carrying out construction activities during the restricted hour. All construction works should be carried out as quickly as possible to minimize the noise nuisance to the sensitive receivers. According to AECOM, the acoustic barrier was not fully used during the whole process of road paving. The Main Contractor was reminded to use the acoustic barrier for blocking the power generating part of the PME to ensure the noise can be minimized.	3/3/23

COM-2023- 403	18/3/2023	1823	CCZJV	Noise	20/3/2023	Two complaints were received by 1823 (CASE#3- 7637259453 & #3-7637259880) on 18th March 2023. The complainant is concerned about the noise nuisance generated by the night-time construction works activities near Tai Po Road on 18th March 2023. According to the Main Contractor, no Power Mechanical Equipment was included in the relevant complainant cases on 18th March 2023. Referring to the complainant's video, the noise was generated when the frontline workers threw the materials from a height to the ground. In addition, the contractor's mitigation measure is not enough to minimize the noise generated. The Main Contractor was reminded to provide more training for frontline workers to ensure that they work with minimum noise. According to the Main Contractor, a night-work foreman was arranged to keep close monitoring the noisy work and ensure the compliance of CNP at night. The Main Contractor was reminded to unload all the construction materials slowly and carefully to minimize the noise generated. ET checked that the Main Contractor had complied with the conditions listed in CNP No.: GW-RN1176-22. The Main Contractor was reminded to strictly follow and fully comply with the requirement listed in the CNP and the mitigation measures stipulated in the EM&A Manual when carrying out construction activities during the restricted hour. All construction works should be carried out as quickly as possible to minimize the noise nuisance to the sensitive receivers.	18/4/2023

COM-2023- 504	14/5/2023	EPD	CCZJV	Noise	23/5/2023	A complaint was received from EPD (EPD ref.: RN12170- 23) on 14th May 2023. The complainant is concerned about the noise nuisance generated by the night-time construction works activities near Lek Yuen Estate after 7:00 p.m. According to the Main Contractor and AECOM information, no construction works were carried out between 19:00 and 22:00. Also, no construction works were carried out at Zone 3 on 12th ^13th May 2023. ET checked that the Main Contractor had complied with the conditions listed in CNP No.: GW-RN0292-23 and CNP no. GW-RN0227-23. The Main Contractor was reminded to strictly follow and fully comply with the requirement listed in the CNP and the mitigation measures stipulated in the EM&A Manual when carrying out construction activities during the restricted hour. All construction works should be carried out as quickly as possible to minimize the noise nuisance to the sensitive receivers. The Main Contractor was reminded to use the allowable PMEs listed in CNP condition 3.d for performing night-time construction works. Mitigation measures need to be applied according to the requirement in conditions 3.d and 4.d. The Main Contractor was also be reminded to pay attention to CNP conditions 3a, 3.d.1, 3.d.5, 3.d.6, 3.d.7 and 3.d.14 for using PMEs and need to provide related noise mitigation measures when carrying out similar night- time construction work activities in the future.	5/6/2023

COM-2023- 510	30/6/2023	1823	CCZJV	Noise	30/6/2023	A complaint was received by 1823 (CASE#3-7780620261) on 30th June 2023. The complainant is concerned about the noise nuisance generated by the night-time construction works activities near Wai Wah Centre. According to the Main Contractor, all crane lorry and dump truck drivers were briefed to load all material at the lower level to minimize noise generation. ET carried out regular night-time noise monitoring on 29th ^ 30th June 2023 at NMS5A, NMS6A and NMS8, no exceedance case was found. All the noise monitoring results at the above-mentioned station were lower than the limit level (55 dB(A)). ET checked that the Main Contractor had complied with the conditions listed in CNP No.: GW-RN0627-23. The Main Contractor was reminded to strictly follow and fully comply with the requirement listed in the CNP and the mitigation measures stipulated in the EM&A Manual when carrying out construction activities during the restricted hour. All constructor was reminded to use the allowable PMEs listed in CNP condition 3.d for performing night-time construction works. Mitigation measures need to be applied according to the requirement in conditions 3.d and 4.d. The Main Contractor was also be reminded to pay attention to CNP conditions 3a, 3.d.1, 3.d.5, 3.d.6, 3.d.7 and 3.d.14 for using PMEs and need to provide related noise mitigation measures when carrying out similar night- time construction work activities in the future.	4/7/2023

EPD ref.: RN16920- 23	19/7/2023	EPD	CCZJV	Muddy Water	19/7/2023	A complaint was received by EPD (EPD ref.: RN16920-23) on 19th July 2023. The complainant who is concerned about the untreated muddy water discharged from the construction site to the Shing Mun River. According to the government's info-map, the drainage network of the concerned water outfall is distributed along the Wo Che Street and construction site area Zone 4 is also covered in the network. According to the Main Contractor, all the work activities were operated with suitable water treatment facilities and no water discharged between 11th July 2023 14th July 2023. According to AECOM photo records on 12th July 2023, a small amount of muddy water leakage through the sandbag bunding into the manhole at Zone 4 was observed. However, the leakage is not sufficient to form the muddy water discharge at Shing Mun River. The Main Contractor was reminded to periodic inspection the site situation to ensure all the mitigation measures are effective. The Main Contractor was reminded that the run-off should be prevented from directly entering the sensitive receivers during the construction works. The Main Contractor was reminded that all wastewater generated on-site should be collected and treated to meet the requirements of the discharge license before being discharged. ET checked that there is no sufficient evidence to prove that the complaint is related to the project. complaint was received by 1823 (CASE#3-7677865059) on 26th July 2023.	26/7/2023

CASE#3- 76778650 59	26/7/2023	1823	CCZJV	Noise	26/7/2023	A complaint was received by 1823 (CASE#3-7677865059) on 26th July 2023. The complainant who is concerned about the noise nuisance generated from night-time construction works near Sui Wo Court. According to the Main Contractor, the hand-held breaker was used inside the acoustic enclosure. According to the Main Contractor and AECOM, acoustic barriers were set up in the direction of Wo Che Estate during the construction activities. However, due to the safety reason, the noise barriers cannot set up in the direction of Sui Wo Court. According to the Main Contractor, refreshment training will be provided to the frontline supervisory staff about the CNP requirements to ensure all the construction activities fulfil all the conditions in the CNP. ET checked that the Main Contractor had complied with the conditions listed in CNP No.: GW-RN0627-23. The Main Contractor was reminded to strictly follow and fully comply with the requirement listed in the CNP and the mitigation measures stipulated in the EM&A Manual when carrying out construction activities during the restricted hour. All construction works should be carried out as quickly as possible to minimize the noise nuisance to the sensitive receivers. The Main Contractor was reminded to use the allowable PMEs listed in CNP condition 3.d for performing night-time construction works. Mitigation measures need to be applied according to the requirement in conditions 3.d and 4.d. CASE#3- 78756157 50	31/8/2023	1823	CCZJV	Muddy Water	4/9/2023	A complaint was received by 1823 (CASE#3-7875615750) on 31st August 2023. The complainant who is concerned about the muddy water flooded out of the construction site. According to the Main Contractor, the muddy water overflow was the result of the frequent rainstorms that occurred. ET checked that the complaint was considered to be related to the project. The Main Contractor was reminded to provide a site channel, bunds or sandbags as a direct runoff into the sediment traps to prevent muddy water directly discharged to the public area. The Main Contractor was reminded to periodic inspections of the site to determine compliance with the functioning of onsite surface water collection channels and sediment traps. The Main Contractor was reminded to review all the capacity of sedimentation tanks on the site to see if they are enough to handle the heavy rain situation. The Main Contractor was reminded that all wastewater generated on-site should be collected and treated to meet the requirements of the discharge license before being discharged.	25/9/2023

CASE#3- 79059701 44	18/9/2023	1823	CCZJV	Noise	18/9/2023	A complaint was received by 1823 (CASE#3-7905970144) on 18th September 2023. The complainant who is concerned about the noise nuisance generated from night- time construction works near Tai Po Road. According to the video provided by the complainant, an excavator was moving at Zone 3. No movable acoustic barriers were set up next to the excavator is observed in the video. According to the Main Contractor, the carriageways were not isolated at that moment. For safety reasons, the acoustic barriers could not be used on the carriageways. In addition, a safety distance must be maintained for the excavator during mobilization. There also cannot be provided acoustic barriers on the other side of the excavator. According to the Main Contractor, the movable acoustic barriers were provided when the excavator conducted loading works. ET checked that the Main Contractor had complied with the conditions listed in CNP No.: GW-RN0627-23. The Main Contractor was reminded to strictly follow and fully comply with the requirement listed in the CNP and the mitigation measures stipulated in the EM&A Manual when carrying out construction activities during the restricted hour. All construction works should be carried out as quickly as possible to minimize the noise nuisance to the sensitive receivers. #### Summary of Site Audit in the Reporting Month

Parameter	Date	Observations and Reminders	Follow-up Action Taken		
Air Quality	23/11/23	Reminder 1: Water spraying should be provided during breaking. (Zone 3, STRCR)	N/A		
	23/11/23	Reminder 2: Water spraying should be provided for the exposed area. (Zone 3, SB)	N/A		
Noise	No specific observation was identified in the reporting month.				
Water Quality	2/11/23	Observation 3: The dirt at the entrance should be cleared. (Zone 5, CM)	Dirt was cleared.		
	9/11/23	Spray paint cans should be removed from the sedimentation tank. (Zone 3, SB)	Spray paint cans was cleared.		
	9/11/23	Observation 3: Earth materials next to the water barriers should be removed. (Zone 3, SB, S05)	Materials was removed.		
	16/11/23	Observation 3: The outlet of the sedimentation tank should be fixed to prevent muddy water leakage. (Zone 3, RW5)	The sedimentation tank was fixed.		
Chemical and Waste Management	2/11/23	Observation 2: General refuse should be removed. (Zone 5, CM, N4)	General refuses were removed.		
	2/11/23	Observation 5: The mud and rock inside the drip tray should be cleared. (Zone 5, NR, N4)	Mud and rocks were cleared.		
	30/11/23	Observation 1: Construction waste should be cleared. (Zone 3, SB)	Waste was cleared.		
	30/11/23	Observation 2: General refuse should be cleared. (Zone 2, Near bus stop)	Waste was cleared.		
Land Contamination	2/11/23	Observation 4: Drip trays should be provided for chemical containers (Zone 5, CM, N4)	Chemical containers were removed.		
	9/11/23	Observation 2: Drip tray should be provided for the chemical containers. (Zone 3, S05)	Chemical containers were removed.		
	16/11/23	Observation 2: Drip trays should be provided for chemical containers. (Zone 3, SB & RW5)	Chemical containers were removed.		
	16/11/23	Observation 4: Oil stain should be cleared. (Zone 3, RW5)	Oil stain was cleared.		
	30/11/23	Reminder 1: Drip tray should be provided for chemical containers. (Zone 2, SB)	N/A		
Landscape and Visual Impact	No specific observation was identified in the reporting month.				
General Condition	No specific observation was identified in the reporting month.
