**Attn: Ms. TAM Im Fei**

Dear Ms. TAM,

**Agreement No. WD/01/2020  
Development of Lok Ma Chau Loop: Main Works Package 1 – Independent  
Environmental Checker**

**Verification of Quarterly EM&A Report (April to June 2023)**

Reference is made to the Quarterly Environmental Monitoring and Audit (EM&A) Report of certified by the Environmental Team Leader in August 2023. We hereby verify the captioned submission in accordance with Clause 14.4 of the EM&A Manual for the project of Development of Lok Ma Chau Loop.

Should you have any query, please feel free to contact the undersigned.

Yours faithfully,  
For and On Behalf Of

| Appendix O | Monitoring Schedule for the Present and Next Reporting Quarter |

**EXECUTIVE SUMMARY****Introduction**

1. This is the 18<sup>th</sup> Quarterly Environmental Monitoring and Audit (EM&A) Report prepared for the project with Environmental Permit No.: EP-477/2013/A - Development of Lok Ma Chau Loop (hereinafter called “the Project”). This report documents the findings of Environmental Monitoring and Audit (EM&A) work conducted in the period from 1<sup>st</sup> April to 30<sup>th</sup> June 2023.

**Summary of Construction Works undertaken during the Reporting Quarter**

2. During the reporting quarter, the following Works Contracts were undertaken for the Project:
  - Contract No. YL/2020/01 – Development of Lok Ma Chau Loop: Main Works Package 1 – Contract 1 Site Formation and Infrastructure Works inside Lok Ma Chau Loop and Western Connection Road Phase 1 (hereinafter called the “Contract 1”)
  - Contract No.: YL/2020/02 – Development of Lok Ma Chau Loop: Main Works Package 1 – Contract 2 Western Connection Road Phase 2, Connection Roads to Fanling / San Tin Highway and Direct Road Link Phase 1 (hereinafter called the “Contract 2”)
  - Contract No.: YL/2021/01 – Development of Lok Ma Chau Loop: Main Works Package 1 – Contract 3 Direct Road Link Phase 2

**Environmental Monitoring and Audit Works**

3. Environmental monitoring for the Project was performed in accordance with the EM&A Manual and the monitoring results were checked and reviewed. Site Inspections/Audits were conducted once per week. The implementation of the environmental mitigation measures, Event Action Plans and environmental complaint handling procedures were also checked.
4. Summary of the environmental exceedances of the reporting quarter for the Project is tabulated in **Table I**.

**Table I Summary Table for Events Recorded in the Reporting Quarter**

| Environmental Monitoring | Parameter                         | No. of Non-Project related Exceedances |             | No. of Exceedance related to the Construction Works of the Project |             | Action Taken        |
|--------------------------|-----------------------------------|--|-------------|--|-------------|---------------------|
|                          |                                   | Action Level                           | Limit Level | Action Level   | Limit Level |                     |
| Air Quality              | 1-hr TSP                          | 0                                      | 0           | 0  | 0           | N/A                 |
|                          | 24-hr TSP                         | 0                                      | 0           | 0  | 0           | N/A                 |
| Construction Noise       | Daytime<br>L <sub>eq(30min)</sub> | 1                                      | 0           | 0  | 0           | Refer to Appendix M |
| Water Quality            | DO                                | 0                                      | 6           | 0  | 0           | Not required        |
|                          | Turbidity                         | 0                                      | 3           | 0  | 0           | Not required        |

| Environmental Monitoring | Parameter | No. of Non-Project related Exceedances |             | No. of Exceedance related to the Construction Works of the Project |             | Action Taken |
|--------------------------|-----------|--|-------------|--|-------------|--------------|
|                          |           | Action Level                           | Limit Level | Action Level   | Limit Level |              |
| Water Quality            | SS        | 0                                      | 2           | 0  | 0           | Not required |

### Air Quality

5. All construction air quality monitoring including 1-hour TSP and 24-hour TSP monitoring was conducted as scheduled in the reporting quarter. No Action/Limit Level exceedance was recorded.

### Construction Noise

6. All construction noise monitoring was conducted as scheduled in the reporting quarter. One Action Level exceedance was recorded due to one noise complaint was received in the period of 0700-1900 hrs on normal weekdays in the reporting quarter. No Limit Level exceedance was recorded.

### Water Quality

7. All water quality monitoring was conducted as scheduled in the reporting quarter. Six (6) Limit Level exceedances of DO, three (3) Limit Level exceedances of Turbidity and two (2) Limit Level exceedances of Suspended Solids were recorded. After investigation, the exceedances were non-project related.

### Ecological Monitoring

#### LMC Loop

##### *Avifauna (Flight Line Survey)*

8. Avifauna monitoring was conducted as scheduled in the reporting quarter. Flight lines recorded were in general concentrated mainly on LMC Meander and adjacent areas including Ecological Area Zone (EA Zone) and along Shenzhen River. It demonstrates that the large waterbirds prefer using the flight line corridor above the LMC Meander as well as the unaffected Shenzhen River instead of the centre of LMC Loop.

##### *Mammals*

9. According to Clause 11.4.1.2 of EM&A Manual, the objective of mammals monitoring is to monitor the connectivity between the existing reed marsh and the EA. In view of current site condition of Loop, the connectivity between the existing reed marsh and the EA Zone has been fenced off due to other project's land occupier.
10. In addition, the 12-month establishment period of EA zone has also been completed. The mammals monitoring in the Loop has therefore been temporarily suspended since March 2022 and will be resumed subject to the site condition.

*Western Connection Road**Avifauna (Flight Line Survey)*

11. Avifauna monitoring was conducted as scheduled in the reporting quarter. Flight lines recorded were in general concentrated mainly on LMC Meander and adjacent areas including Ecological Area Zone (EA Zone) and along Shenzhen River. It demonstrates that the large waterbirds prefer using the flight line corridor above the LMC Meander as well as the unaffected Shenzhen River instead of the centre of LMC Loop.

*Avifauna (Pond 12)*

12. Avifauna survey at Pond 12 was conducted as scheduled in the reporting quarter. Weekly count of birds using the Pond was recorded. No significant impact of construction activities on bird use of the pond was observed.

*Herptofauna*

13. Herptofauna survey was conducted as scheduled in the reporting quarter. It was observed that the shallow agricultural ponds where Chinese Bullfrog was recorded have been altered into relatively dry agricultural lands, which may have an effect on the local Chinese Bullfrog population. However, no significant impact of construction activities on this species was observed.

*Aquatic fauna*

14. Aquatic fauna survey was conducted as scheduled in the reporting quarter. No significant impact of construction activities on the stream was observed.

**Contaminated Soil Remediation**

15. Decontamination for five arsenic-contaminated zones (LD01 - LD05) identified in LMC Loop was completed and the final Remediation Report was submitted and approved by EPD in accordance with Condition 2.16 of the EP-477/2013/A under Contract No. YL/2017/03.
16. No work related to land contamination was conducted in the reporting quarter.

**Environmental Non-Compliance**

17. No environmental non-compliance was recorded in the site inspections during the reporting quarter.

**Environmental Complaint**

18. Two (2) environmental complaints related to construction noise were received in the reporting quarter. The Complaint Log is presented in **Appendix M**.

**Notification of Summons and Successful Prosecutions**

19. No notification of summons or successful environmental prosecutions was received in the reporting quarter.

**Reporting Change**

20. This report has been prepared in compliance with the reporting requirements for the Quarterly

EM&A Report as required by the EM&A Manual for Development of Lok Ma Chau Loop (EM&A Manual). No reporting change was made in the reporting quarter.

### **Future Key Issues**

21. The major site activities for the coming three months include:

Contract No. YL/2020/01 – Development of Lok Ma Chau Loop: Main Works Package 1 – Contract 1 – Site Formation and Infrastructure Works inside Lok Ma Chau Loop and Western Connection Road Phase 1

- (a) Wetland Compensation Establishment Works and Ecological Monitoring.
- (b) Additional Ground Investigation.
- (c) Deep Cement Mixing Work for Western Connection Road.
- (d) Structure Construction for Box Culverts and Retaining wall at WCR.
- (e) Drainage Works and Roadworks.
- (f) Woodland Compensation Works.

Contract No.: YL/2020/02 – Development of Lok Ma Chau Loop: Main Works Package 1 – Contract 2 Western Connection Road Phase 2, Connection Roads to Fanling / San Tin Highway and Direct Road Link Phase 1

Section 1

- (a) Tree Felling and Site Clearance along RW8 area and immediate vicinity. Forming of temporary carriageway to divert traffic.
- (b) Demolition of Subway Cycle Track Bay 12, 13, & 14 and to exposed and protect 132kv cables.
- (c) Excavation and lateral support for RW9 Bay 1 to Bay 4.
- (d) Construction of retaining wall RW9, complete wall stem from bay5 to bay16.
- (e) Commence construction of retaining wall RW8.
- (f) Retaining wall RW10 start implementation of TTA.
- (g) Slope Works for F26 and F23 slope benching and fill slope to required profile.

Section 2A

- (h) Complete all RC block removal works at BPW1.
- (i) Complete all slopes trimming works at CS1 and CS2.
- (j) Site Clearance at LMC Road Zone 3, Zone 4, Zone 5 and Zone 6.
- (k) Liaison with utility companies for utility diversion.
- (l) RW6 ELS works and construction of concrete structure.
- (m) RW6A pipe piling works.
- (n) RW – CTWR ELS works and construction of concrete structure.
- (o) DN700 watermain laying works.
- (p) Noise Barrier NB16 ELS works and construction of concrete structure (Bay 1, Bays 4-6).
- (q) UU works along Lok Ma Chau Road.

Section 2B

- (r) EIBC foundation work – total 8 nos. of bored piles.
- (s) Manual survey and vibration monitoring in MTR Tunnel.

Section 2C

- (t) Bored pile and socketed H-Pile for Bridge ST01 and CTFB (ST01-P05 & FBP05, EIBC).
- (u) Construction of Pier at ST01-P02 & P03.
- (v) Construction of FBA02 and FBP06 Pile caps.
- (w) Construction of Pile Cap and Pier at ST01-P04 and P06.

Section 3

- (x) Access forming and timber platform installation for predrilling at DRL-P08.
- (y) Bored pile for Bridge DRL-P02, P03 and P11.
- (z) Construction of Pile Cap and Pier at DRL-P12 & P13.
- (aa) Construction of temporary working platform for DRL-P06, P07 and P08 in Eash Nullah.

Section 5

- (bb) Construction of Pai Lau Columns, Structure and Finishes

Contract No.: YL/2021/01 – Development of Lok Ma Chau Loop: Main Works Package 1 – Contract 3 Direct Road Link Phase 2

- (a) LMC Station Structural Steel Fabrication.
- (b) LMC Station Structural Openings for E&M Diversion.
- (c) ELS Works at Elevated PTI.
- (d) UU Diversion for Watermain (MTR) and Drainage Diversion at Elevated PTI.
- (e) Bored Piling Works at Double-deck Footbridge.

22. Potential environmental impacts arising from the above construction activities are mainly associated with construction dust, noise, water quality, waste management and ecology.

## 1 INTRODUCTION

- 1.1 Wellab Limited (WELLAB) was appointed by the Civil Engineering and Development Department (CEDD) under Service Contract No. WD/04/2020 as the Environmental Team to undertake the Environmental Monitoring and Audit (EM&A) programme for the Works Contracts under Main Works Package 1 and the remaining works under Contract No. YL/2017/03 – Development of Lok Ma Chau Loop: Land Decontamination and Advance Engineering Works to ensure that the environmental performance of the Works Contracts comply with the requirements specified in the Environmental Permit (EP), Environmental Monitoring & Audit (EM&A) Manual, Environmental Impact Assessment (EIA) Report of the Project and other relevant statutory requirements.

### **Purpose of the report**

- 1.2 This is the 18<sup>th</sup> Quarterly EM&A Report which summarises the impact monitoring results and audit findings for the EM&A programme during the reporting period from April to June 2023.

### **Structure of the report**

- 1.3 The structure of the report is as follows:

Section 1: **Introduction** - purpose and structure of the report.

Section 2: **Project Information** – summarises background and scope of the Project, site description, project organisation and contact details, construction programme, the construction works undertaken and the status of Environmental Permits/Licences during the reporting period.

Section 3: **Environmental Monitoring and Audit Requirement** – summarises monitoring location and parameters, monitoring programmes, monitoring frequencies, Action and Limit Levels, Event / Action Plans, and Site Audit inspection.

Section 4: **Monitoring Results** – summarises the monitoring results in the reporting quarter.

Section 5: **Environmental Site Inspection** – summarises the audit findings of the weekly site inspections undertaken within the reporting period.

Section 6: **Non-Compliance of the Environmental Quality Performance Limits (Action and Limit)** – summarises any monitoring exceedance, environmental complaints, environmental summons and successful prosecutions within the reporting period.

Section 7: **Future Key Issues** – summarises the impact forecast and monitoring schedule for the next three months.

Section 8: **Conclusions and Recommendations**

## 2 PROJECT INFORMATION

### Background

- 2.1 The development at Lok Man Chau (LMC) Loop is one of the ten major infrastructure projects for economic growth of the Hong Kong Special Administrative Region (HKSAR). The HKSAR Government would work with the Shenzhen authorities to tap the land resources of the LMC Loop to meet future development needs and consolidate the strategic position of both cities in the Pan-Pearl River Delta region. The Project is to develop LMC Loop with higher education as the leading land use, complemented by high-tech research and development facilities and cultural and creative industries.
- 2.2 The planning and engineering study for the Loop development is a designated project (DP) classified under Item 1 Schedule 3 of the Environmental Impact Assessment (EIA) Ordinance (Cap. 499). In October 2013, the EIA Report (AEIAR-176/2013) of the Project was approved by the Director of Environmental Protection pursuant to the EIA Ordinance in accordance with the EIA Study Brief (No. ESB-201/2008 and ESB-238/2011) and the Technical Memorandum on Environmental Impact Assessment Process (EIAO-TM). The Environmental Permit (EP) (EP no.: EP-477/2013) was also granted in November 2013.
- 2.3 Pursuant to Section 13 of the EIAO, the Director of Environmental Protection amends the Environmental Permit (No. EP-477/2013) based on the Application No. VEP- 595/2021 and the environmental Permit (Permit No. E EP-477/2013/A) was issued on 12<sup>th</sup> August 2021 for Development of Lok Ma Chau Loop.
- 2.4 The Loop development is implemented by three works packages in stages, namely: Advance Works, Main Works Package 1 (MWP1) and Main Works Package 2 (MWP2).
- 2.5 Contract No. YL/2017/03 – Development of Lok Ma Chau Loop: Land Decontamination and Advance Engineering Works (hereinafter called the “Contract”) was awarded to Sang Hing – Kuly Joint Venture (hereinafter called the “Contractor 1”) in June 2018 for the Advance Works.
- 2.6 For MWP1, there is a total of 5 Works Contracts and the contract packaging is shown below:
  - 1) Contract 1 – Development of Lok Ma Chau Loop: Main Works Package 1 – Contract 1 – Site Formation and Infrastructure Works inside Lok Ma Chau Loop and Western Connection Road Phase 1
  - 2) Contract 2 – Development of Lok Ma Chau Loop: Main Works Package 1 – Contract 2 Western Connection Road Phase 2, Connection Roads to Fanling / San Tin Highway and Direct Road Link Phase 1
  - 3) Contract 3 – Development of Lok Ma Chau Loop: Main Works Package 1 – Contract 3 – Direct Road Link Phase 2
  - 4) Contract 4 - Development of Lok Ma Chau Loop: Main Works Package 1 – Contract 4 – Fresh Water Service Reservoir and Associated Waterworks
  - 5) Contract 5 - Development of Lok Ma Chau Loop: Main Works Package 1 – Contract 5 – Landscaping Works within Lok Ma Chau Loop

- 2.7 Contract No. YL/2020/01 – Development of Lok Ma Chau Loop: Main Works Package 1 – Contract 1 – Site Formation and Infrastructure Works inside Lok Ma Chau Loop and Western Connection Road Phase 1 (hereinafter called the “Contract 1”) was awarded to CRCC-Kwan Lee-Paul Y. JV (hereinafter called the “Contractor 2”) in July 2021.
- 2.8 Contract No.: YL/2020/02 – Development of Lok Ma Chau Loop: Main Works Package 1 – Contract 2 Western Connection Road Phase 2, Connection Roads to Fanling / San Tin Highway and Direct Road Link Phase 1 (hereinafter called the “Contract 2”) was awarded to China Road and Bridge Corporation (hereinafter called the “Contractor 3”) in September 2021.
- 2.9 During the reporting quarter, the following Works Contracts were undertaken for the Project:
- Contract No. YL/2020/01 – Development of Lok Ma Chau Loop: Main Works Package 1 – Contract 1 Site Formation and Infrastructure Works inside Lok Ma Chau Loop and Western Connection Road Phase 1 (hereinafter called the “Contract 1”)
  - Contract No.: YL/2020/02 – Development of Lok Ma Chau Loop: Main Works Package 1 – Contract 2 Western Connection Road Phase 2, Connection Roads to Fanling / San Tin Highway and Direct Road Link Phase 1 (hereinafter called the “Contract 2”)
  - Contract No.: YL/2021/01 – Development of Lok Ma Chau Loop: Main Works Package 1 – Contract 3 Direct Road Link Phase 2 (Contract 3)
- 2.10 The layout of the construction works and the scope of works under the Contracts are summarised in **Table 2.1**.

**Table 2.1 Site Layout and Scope of Works under the Contracts**

| Contract(s)   | Scope of Works  | Site Layout Plan |
|---|---|------------------|
| Contract No. YL/2017/03 – Development of Lok Ma Chau Loop: Land Decontamination and Advance Engineering Works (Completed) | a) Land decontamination treatment within the Loop;<br>b) Establishment of an Ecological Area (EA) within the Loop;<br>c) Construction of a temporary access to the Loop;<br>d) Minor improvement works to Ha Wan Tsuen East Road and other ancillary works;<br>e) Construction of temporary noise barriers and miscellaneous road works along Lok Ma Chau Road;<br>f) Ground treatment works to the first batch of land parcels within the Loop for development of buildings and associated facilities for Phase 1 of the Hong Kong – Shenzhen Innovation and Technology Park and development of the western electricity substation; and<br>g) Implementation of environmental mitigation measures for the works mentioned in the items (a) to (f) above. | Figure 1a        |
| Contract No. YL/2020/01 – Development of Lok Ma Chau Loop: Main Works   | a) Ground treatment and site formation works;<br>b) Construction of carriageway, footpaths,   | Figure 1b        |

| Contract(s)  | Scope of Works   | Site Layout Plan |
|--|--|------------------|
| Package 1 – Contract 1<br>Site Formation and Infrastructure Works inside Lok Ma Chau Loop and Western Connection Road Phase 1  | <ul style="list-style-type: none"> <li>c) Construction of Western Connection Road Phase 1 through widening of existing Ha Wan Tsuen East Road, which includes construction of footpath, cycle track, slopes, retaining walls and a vehicular bridge over the old Shenzhen River meander;</li> <li>d) Provision of other infrastructures, including a tertiary sewage treatment works and sewerage system, water supply system, drainage system, and other associated works; and</li> <li>- Environmental mitigation measures including about 18 ha offsite wetland compensation and about 1.3 ha offsite woodland compensation.</li> </ul>   |                  |
| Contract No.: YL/2020/02 – Development of Lok Ma Chau Loop: Main Works Package 1 – Contract 2<br>Western Connection Road Phase 2, Connection Roads to Fanling / San Tin Highway and Direct Road Link Phase 1 | <ul style="list-style-type: none"> <li>a) Construction of Western Connection Road Phase 2 through widening of a section of existing Lok Ma Chau Road;</li> <li>b) Construction of Direct Road Link Phase 1 comprising a viaduct of about 720m long; construction of slip roads connecting Lok Ma Chau Road and Fanling Highway / San Tin Highway including a viaduct of about 340 m long;</li> <li>c) Construction of a cycle track cum footbridge;</li> <li>d) Construction of associated works including road improvement works, footpaths, cycle tracks, slopes, retaining walls, water supply system and drainage system; and</li> <li>(a) Provision of noise barriers.</li> </ul>                       | Figure 1b        |
| Contract No.: YL/2021/01 – Development of Lok Ma Chau Loop: Main Works Package 1 – Contract 3<br>Direct Road Link Phase 2  | <ul style="list-style-type: none"> <li>a) Construction of an elevated public transport interchange of an approximate area of 5,700 square metres above the existing Lok Ma Chau Spur Line Public Transport Interchange;</li> <li>b) Construction of an approximately 90 metres long double-deck footbridge and a lift tower of approximately 21 metres in height with three lifts and three escalators connecting the elevated public transport interchange mentioned above to the MTR Lok Ma Chau Station;</li> <li>c) Associated modification works within the MTR Lok Ma Chau Station; and</li> <li>e) Associated roadworks, landscaping, electrical and mechanical works and ancillary works.</li> </ul> | Figure 1b        |

**Contracts Organization**

- 2.11 There are different parties with different levels of involvement in the Contracts organization. The key personnel contact names and numbers are summarised in **Table 2.2**.

**Table 2.2 Key Contacts of the Project**

| Organization                             | Project Role      | Contact Person                        | Tel No.   | Fax No.   |
|--|-------------------|---------------------------------------|-----------|-----------|
| CEDD                                     | Project Proponent | Mr. Davy KS CHAN                      | 24176370  | 2412 0358 |

**Summary of Construction Works Undertaken during Reporting Quarter**

2.12 The major site activities undertaken in the reporting quarter included:

Contract No. YL/2020/01 – Development of Lok Ma Chau Loop: Main Works Package 1 – Contract 1 – Site Formation and Infrastructure Works inside Lok Ma Chau Loop and Western Connection Road Phase 1

| <b>Month(s)</b>   | <b>Major Site Activities</b>   |
|-------------------|--|
| <b>April 2023</b> | <ul style="list-style-type: none"> <li>(a) Wetland Compensation Establishment Works and Ecological Monitoring</li> <li>(b) Additional Ground Investigation</li> <li>(c) Deep Cement Mixing Work for Vehicular Bridge over the Old Shenzhen River Meander and Western Connection Road</li> <li>(d) Piling Construction for Vehicular Bridge over the old Shenzhen River Meander</li> <li>(e) Structure Construction for Box Culverts and WCR</li> <li>(f) Drainage Works and Roadworks</li> <li>(g) Woodland Compensation Works</li> </ul>  |
| <b>May 2023</b>   | <ul style="list-style-type: none"> <li>(a) Wetland Compensation Establishment Works and Ecological Monitoring</li> <li>(b) Additional Ground Investigation</li> <li>(c) Deep Cement Mixing Work for Vehicular Bridge over the Old Shenzhen River Meander and Western Connection Road</li> <li>(d) Structure Construction for Box Culverts and WCR</li> <li>(e) Drainage Works and Roadworks</li> <li>(f) Woodland Compensation Works</li> </ul>  |
| <b>June 2023</b>  | <ul style="list-style-type: none"> <li>(a) Wetland Ecological Monitoring Wetland Compensation Establishment Works and Ecological Monitoring</li> <li>(b) Ground Investigation Works, Deep Cement Mixing works, Piling works and Excavation and Lateral Support Cofferdam Construction for Vehicular Bridge over the Old Shenzhen River Meander</li> <li>(c) Excavation and Lateral Support (ELS) for Box Culvert A and C</li> <li>(d) Excavation and Lateral Support (ELS) Cofferdam Construction and Underground Utilities (UU) installation for Road L1</li> <li>(e) Deep Cement Mixing works for Western Connection Road</li> </ul> |

Contract No.: YL/2020/02 – Development of Lok Ma Chau Loop: Main Works Package 1 – Contract 2 Western Connection Road Phase 2, Connection Roads to Fanling / San Tin Highway and Direct Road Link Phase 1

| <b>Month(s)</b>   | <b>Major Site Activities</b>  |
|-------------------|---|
| <b>April 2023</b> | <p><u>Section 1</u></p> <ul style="list-style-type: none"> <li>(a) Tree Felling and Site Clearance along RW8 area and immediate vicinity. Forming of temporary carriageway to divert traffic.</li> <li>(b) Demolition of Subway Cycle Track Bay 12, 13, &amp; 14, and to exposed and protect 132kv cables.</li> <li>(c) Excavation and lateral support for RW9 Bay 1 to Bay 4</li> <li>(d) Construction of retaining wall RW9 base slab Bays 5, 7, 9 and 11 and wall stem Bay 8 to 16</li> <li>(e) Commence construction of retaining wall RW8</li> <li>(f) Complete Interim watermain along TAR1 (under KD2)</li> </ul> <p><u>Section 2A</u></p> |

| Month(s) | Major Site Activities   |
|----------|---|
|          | <p>(g) Continue Bored Piling for Retaining Wall BPW1</p> <p>(h) Trim slope of CS1 and removal of piling platform for Retaining Wall BPW1</p> <p>(i) Site Clearance at LMC Road Zone 3, Zone 4, Zone 5 and Zone 6</p> <p>(j) Trial Pit to expose and shift existing Utilities in Zone 4</p> <p>(k) Liaison with utility companies for utility diversion</p> <p>(l) UU works along Lok Ma Chau Road</p> <p><u>Section 2B</u></p> <p>(m) Preparation Works for EIBC foundation works</p> <p>(n) Preparation works for Nullah Diversion to Facilitate ST01-B01 Bored Piling</p> <p><u>Section 2C</u></p> <p>(o) Bored pile and socketed H-Pile for Bridge ST01 and CTFB (ST01-P05 &amp; FBP05, EIBC)</p> <p>(p) Backfill and construction of Pier at ST01-P02 &amp; P03</p> <p>(q) Construction of FBA02 and FBP06 Pile caps</p> <p>(r) Construction of Pile Cap and Pier at ST01-P04 and P06</p> <p><u>Section 3</u></p> <p>(s) Ground investigation / Pre-drilling and Trial Pits for Bridge DRL</p> <p>(t) Bored pile for Bridge DRL</p> <p>(u) ELS to Cofferdam, Pile Trimming/Treatment for DRL-P12 &amp; P13</p> <p>(v) Commence construction of Pile Cap and Pier at DRL-P12 &amp; P13</p> <p>(w) Forming site access for piling of DRL-P02 &amp; P03</p> <p><u>Section 5</u></p> <p>(x) Construction of Pai Lau Columns, Structure and Finishes</p>   |
| May 2023 | <p><u>Section 1</u></p> <p>(a) Tree Felling and Site Clearance along RW8 area and immediate vicinity. Forming of temporary carriageway to divert traffic</p> <p>(b) Demolition of Subway Cycle Track Bay 12, 13, &amp; 14</p> <p>(c) Excavation and lateral support for RW9 Bay 1 to Bay 4</p> <p>(d) Construction of retaining wall RW9 base slab Bays 1 to 4 and wall stem Bay 1 to 16</p> <p>(e) Commence construction of retaining wall RW8</p> <p>(f) Complete Interim watermain along TAR1 (KD2)</p> <p><u>Section 2A</u></p> <p>(g) Continue Bored Piling for Retaining Wall BPW1</p> <p>(h) Trim slope of CS1 and removal of piling platform for Retaining Wall BPW1</p> <p>(i) Site Clearance at LMC Road Zone 3, Zone 4, Zone 5 and Zone 6</p> <p>(j) Trial Pit to expose and shift existing Utilities in Zone 4</p> <p>(k) Liaison with utility companies for utility diversion</p> <p>(l) UU works along Lok Ma Chau Road</p> <p><u>Section 2B</u></p> <p>(m) Preparation Works for EIBC foundation works</p> <p>(n) Preparation works for Nullah Diversion to Facilitate ST01-B01 Bored Piling</p> <p><u>Section 2C</u></p> <p>(o) Bored pile and socketed H-Pile for Bridge ST01 and CTFB (ST01-P05 &amp; FBP05, EIBC)</p> <p>(p) Backfill and construction of Pier at ST01-P02 &amp; P03</p> <p>(q) Construction of FBA02 and FBP06 Pile caps</p> <p>(r) Construction of Pile Cap and Pier at ST01-P04 and P06</p> |

| Month(s)         | Major Site Activities  |
|------------------|--|
|                  | <p><u>Section 3</u></p> <p>(s) Ground investigation / Pre-drilling and Trial Pits for Bridge DRL</p> <p>(t) Bored pile for Bridge DRL</p> <p>(u) ELS to Cofferdam, Pile Trimming/Treatment for DRL-P12 &amp; P13</p> <p>(v) Construction of Pile Cap and Pier at DRL-P04, P05, P12 &amp; P13</p> <p>(w) Forming site access for piling of DRL-P02 &amp; P03</p> <p><u>Section 5</u></p> <p>(x) Construction of Pai Lau Structure and Finishes</p>  |
| <b>June 2023</b> | <p>(a) Tree felling works</p> <p>(b) Pre-drilling works</p> <p>(c) Socketed H-pile at Staircase &amp; FBA-01 in CTFB and AP04, Approach Ramp &amp; Abutment DRL-A01 in DRL, and H-pile of FBA-01</p> <p>(d) Demolition of Existing Structures</p> <p>(e) DDA for Full-span erection of ST01</p> <p>(f) Retaining Wall BPW1 Bored Piling works, slope profile trimming works and upper concrete block wall removed</p> <p>(g) Bored pile works at ST01, CTFB and DRL, and DRL-P11-01, 02, DRL-P06-01 and DRL-P04-01</p> <p>(h) Retaining Wall RW9-Construction of base slab Bay 16 to Bay 5, construction of Wall Stem Bay 16 – 13, Bay 11, Bay 8 &amp; Bay 7, and backfilling for Bay 16-Bay 14</p> <p>(i) Trial pit to expose 132kV powerline and sheet piling for subway demolition works</p> <p>(j) Construction of Pai Lau 2nd concrete of Canopy, the last top of superstructure formwork is in progress and concrete pouring</p> <p>(k) TTA along footpath in Lok Ma Chau Road</p> <p>(l) ELS for Pile Cap of ST01-P04 and ST01-P06</p> <p>(m) Pile Cap of DRL-P12 cast completed. Pile Cap of DRL-P13 formwork erection is in progress. Bore Piling works of DRL-P11-01 and 02 are in progress, to be completed cast in Jun 2023. Bore Pile DRL-P02-02, DRL-P03-02, DRL-P05-02 are completed cast in report duration</p> <p>(n) Enhanced Integrated Structure – Concrete Block wall erection and Breaking existing box culvert preparation works</p> <p>(o) Retaining Wall RW – CTWR sheet piling work</p> <p>(p) Retaining Wall RW6A – Bamboo works platform erection work</p> |

Contract No.: YL/2021/01 – Development of Lok Ma Chau Loop: Main Works Package 1 – Contract 3 Direct Road Link Phase 2

| Month(s)          | Major Site Activities  |
|-------------------|--|
| <b>April 2023</b> | <p>(a) LMC Station L1 Structural Opening for E&amp;M Diversion</p> <p>(b) UU Diversion for Watermain (MTR) and Drainage Diversion at EPTI</p> <p>(c) Traffic, Drainage and Road Lighting Diversion for Stage 2 Works at DDFB</p> |
| <b>May 2023</b>   | <p>(a) LMC Station L1 Structural Opening for E&amp;M Diversion</p> <p>(b) UU Diversion for Watermain (MTR) and Drainage Diversion at EPTI</p> <p>(c) Traffic, Drainage and Road Lighting Diversion for Stage 2 Works at DDFB</p> |
| <b>June 2023</b>  | <p>(a) Underground Utility detection</p> <p>(b) Pre-drilling</p>   |

| Month(s) | Major Site Activities   |

### Summary of EM&A Requirements

2.14 The EM&A programme requires construction noise monitoring, air quality monitoring, water quality monitoring, ecological monitoring and environmental site audits. The EM&A requirements are described in the following sections, including:

- All monitoring parameters;
- Action and Limit levels for all environmental parameters;
- Event / Action Plans;
- Environmental mitigation measures, as recommended in the Project EIA study final report; and
- Environmental requirements in contract documents.

### 3 ENVIRONMENTAL MONITORING AND AUDIT REQUIREMENT

#### Monitoring Parameters and Monitoring Locations

##### *Air Quality Monitoring*

- 3.1 In accordance with the EM&A Manual, impact 1-hour and 24-hour TSP monitoring was conducted to monitor the air quality for the Project. The locations of monitoring stations are shown in **Figure 2**. **Table 3.1** describes the locations of the air quality monitoring stations.

**Table 3.1 Location of Air Quality Monitoring Stations**

| Monitoring Station  | Location  |
|---------------------|---|
| DMS-1a (see Note 1) | Village House along Ha Wan Tsuen East Road                      |
| DMS-2A (see Note 2) | Village House along Lok Ma Chau Road                            |
| DMS-2B (see Note 3) | Site boundary near Village House along Lok Ma Chau Road         |
| DMS-3               | Village House along Old Border Road                             |
| DMS-4A (see Note 4) | Hong Kong Police Force, Lok Ma Chau Operation Base at Horn Hill |

Notes:

1. In view of the disturbance concerned by the villagers near the original air quality monitoring location DMS-1, an alternative location (DMS-1a) was proposed which was verified by IEC and agreed by EPD.
2. Monitoring at DMS-2 (originally proposed in the approved EM&A Manual) was denied during the baseline monitoring. An alternative location (DMS-2A) was proposed, verified by IEC and agreed by EPD.
3. Alternative location (DMS-2B) was proposed due to DMS-2A is situated within the site area for upcoming road widening works which was verified by IEC and agreed by EPD.
4. Proposed replacement monitoring location for Air Sensitive Receiver (ASR) MTL-20 – Village house in Ma Tso Lung (DMS-4A) as no work would be conducted near ASR MTL-20 due to exclusion of the original Eastern Connection Road (ECR) which was verified by IEC and agreed by EPD.

- 3.2 **Table 3.2** summarises the monitoring parameters and frequencies of impact air quality monitoring during the Works Contracts activities.

**Table 3.2 Impact Air Quality Monitoring Parameters, Frequency and Duration**

| Parameters | Frequency           |
|------------|---------------------|
| 1-hr TSP   | Three times/ 6 days |
| 24-hr TSP  | Once per 6 days     |

##### *Noise Monitoring*

- 3.3 In accordance with the EM&A Manual, construction noise monitoring was conducted to monitor the construction noise arising from the construction activities. The locations of the monitoring stations are shown in **Figure 3**. **Table 3.3** describes the locations of the noise monitoring stations.
- 3.4 **Table 3.4** summarises the monitoring parameters and frequencies of construction noise monitoring during the Works Contracts activities.

**Table 3.3 Location of Noise Monitoring Stations**

| Monitoring Station | Location  | Measurement            |
|--------------------|---|------------------------|
| NMS-1              | Village house in Ha Wan Tsuen                                   | Façade Measurement     |
| NMS-2              | Village house along existing Ha Wan Tsuen                       | Free Field             |
| NMS-3              | Village house along Old Border Road                             | Free Field             |
| NMS-4A(see Note 1) | Hong Kong Police Force, Lok Ma Chau Operation Base at Horn Hill | Free Field measurement |

Note:

- (a) Proposed replacement monitoring location for Noise Sensitive Receiver (NSR) MTL-20 – Village house in Ma Tso Lung (NMS-4A) as no work would be conducted near NSR MTL-20 due to exclusion of the original ECR.

**Table 3.4 Noise Monitoring Parameters, Duration and Frequency**

| Monitoring Station                | Parameter  | Duration                            | Frequency     |
|-----------------------------------|--|-------------------------------------|---------------|
| NMS-1<br>NMS-2<br>NMS-3<br>NMS-4A | L10(30 min.) dB(A)<br>L90(30 min.) dB(A)<br>Leq(30 min.) dB(A)<br>(as six consecutive<br>Leq, 5min readings) | 0700-1900 hrs on normal<br>weekdays | Once per week |

Remarks:

A-weighted equivalent continuous sound pressure level ( $L_{eq}$ ). It is the constant noise level which, under a given situation and time period, contains the same acoustic energy as the actual time-varying noise level.

$L_{10}$  is the level exceeded for 10% of the time. For 10% of the time, the sound or noise has a sound pressure level above  $L_{10}$ .

$L_{90}$  is the level exceeded for 90% of the time. For 90% of the time, the noise level is above this level.

### *Water Quality Monitoring*

- 3.5 In accordance with the EM&A Manual, impact water quality monitoring was conducted to monitor the water quality for the Project. The locations of the monitoring stations are shown in **Figure 4**. **Table 3.5** describes the locations of the water quality monitoring stations.
- 3.6 Based on the updated construction programme under Contract No. YL/2017/03, the water-based construction works for temporary vehicular bridge was completed on 7<sup>th</sup> April 2021 and the completion was confirmed by Engineer Representative under Contract No. YL/2017/03 via email dated 15<sup>th</sup> June 2021. The additional monitoring station, BS1, was therefore proposed to be deleted from the water quality monitoring programme starting from 28<sup>th</sup> June 2021. Other water quality monitoring stations remain unchanged. This Proposal for Update of Water Quality Monitoring Stations was verified by IEC and agreed by EPD via email dated 22<sup>nd</sup> June 2021.

**Table 3.5 Location of Water Quality Monitoring Stations**

| Monitoring Station | Location                                     | Nature of the Location                                   |
|--------------------|--|--|
| CS1                | Control Station at Old Shenzhen River        | Control Station at Meander                               |
| IS1                | Impact Station at Old Shenzhen River         | Impact Station at Meander                                |
| IS2                | Impact Station at Old Shenzhen River         | Impact Station at Meander                                |
| IS4                | Impact Station at Ping Hang Stream           | Reference Station  |
| CS5                | Control Station at south of Lung Hau         | Control Station for IS6                                  |
| IS6                | Impact Station near Lung Hau Road            | Impact Station   |
| <sup>(1)</sup> BS1 | Impact Station at Old Shenzhen River Meander | Additional impact station for temporary vehicular bridge |

Note:

1. Terminated starting from 28<sup>th</sup> June 2021 according to Proposal for Update of Water Quality Monitoring Stations (approved by EPD on 22<sup>nd</sup> June 2021).

- 3.7 **Table 3.6** summarises the monitoring parameters, monitoring depths and frequency of the water quality monitoring during the Works Contracts activities.

**Table 3.6 Water Quality Monitoring Parameters, Depths and Frequency**

| Monitoring Station                | Parameter (unit)  | Depth  | Frequency  |
|-----------------------------------|---|--|--|
| CS1, IS1, IS2, IS4, CS5, IS6, BS1 | <ul style="list-style-type: none"> <li>• Temperature(°C)</li> <li>• pH (pH unit)</li> <li>• turbidity (NTU)</li> <li>• water depth (m)</li> <li>• salinity (ppt)</li> <li>• DO (mg/L and % of saturation)</li> <li>• SS (mg/L)</li> </ul> | <ul style="list-style-type: none"> <li>• 3 water depths: 1m below water surface, mid-depth and 1m above river bed.</li> <li>• If the water depth was less than 3m, mid-depth sampling only.</li> <li>• If water depth was less than 6m, mid-depth might be omitted.</li> </ul> | <ul style="list-style-type: none"> <li>• 3 days per week during the construction period of the Contract</li> </ul> |

#### Monitoring Methodology and Calibration Details

- 3.8 Monitoring works/equipment were conducted/calibrated regularly in accordance with the EM&A Manual. Copies of calibration certificates could be referred to the relevant Monthly EM&A Reports.

#### Environmental Quality Performance Limits (Action and Limit Levels)

- 3.9 The environmental quality performance limits i.e. Action and Limit Levels were derived from the baseline monitoring results. Should the measured environmental quality parameters exceed the Action/Limit Levels, the respective action plans would be implemented. The Action/Limit Levels for each environmental parameter are given in **Appendix A**.

#### Landscape and Visual

- 3.10 Inspection of the implementation of landscape and visual mitigation measures was conducted during weekly site audit. Most of the necessary mitigation measures have been implemented and recommended follow-up actions have been discharged by the Contractors. Details of the audit findings and implementation status are summarised in **Appendix K** and **Appendix J**.

#### Ecology Monitoring

##### LMC Loop

##### *Avifauna (Flight Line Survey)*

- 3.11 Avifauna monitoring was carried out on a monthly basis to identify the number and species composition of birds using the flight line and monitor if there was any impact from construction works. The flight line corridor survey work was carried out at the Lok Ma Chau Lookout, according to Section 11.4.1.1 of the EM&A Manual.

##### *Mammals*

- 3.12 Monitoring of mammals was also required for Eurasian Otter, other mammals and dogs during the site formation and establishment period of Ecological Area, to observe the connectivity between the existing reed marsh and the Ecological Area, and if there was any sign of otter and

mammals around the Ecological Area.

- 3.13 In view of current site condition of Loop, the connectivity between the existing reed marsh and the EA Zone has been fenced off due to other project's land occupier. In addition, 12-month establishment period of EA zone has also been completed.
- 3.14 The mammals monitoring in the Loop was therefore temporarily suspended since March 2022 and will be resumed subject to the site condition.

#### Western Connection Road

##### *Avifauna (Flight Line Survey)*

- 3.15 Refer to Section 3.11.

##### *Avifauna (Pond 12)*

- 3.16 Pond 12 avifauna survey was required to be carried out on a weekly basis to identify the number and species composition of birds using Pond 12, according to Section 11.4.2.1 of the EM&A Manual. Location of Pond 12 is shown in **Figure 5a**.

##### *Herpetofauna*

- 3.17 Herpetofauna monitoring of the only herpetofauna species of conservation interest in the area around Pond 12, the Chinese Bullfrog, was required to be conducted once monthly during wet season (March to October), including both day-time and night-time survey. The purpose of the survey is to ensure the abundance of the Chinese Bullfrog in the area of Pond 12, LMC Tsuen, and nearby wetlands is not affected by the construction works. The monitoring was conducted according to Section 11.4.2.2 of the EM&A Manual. Location of the Herpetofauna survey transect is shown in **Figure 5b** for reference.

##### *Aquatic Fauna*

- 3.18 Monthly surveys of the population of Rose Bitterling at streams and associated ponds south of Lung Hau Road, weekly *in-situ* monitoring of water quality and whole site audit were required to ensure the population of Rose Bitterling at the stream and associated ponds south of Lung Hau Road as well as the water quality at the area where Rose Bitterling is present are not affected by construction works. Weekly *in-situ* monitoring of water quality in LMC Meander was also required during the construction phase and the first 12 months of operation. The monitoring was conducted according to Section 11.4.2.3 of the EM&A Manual.
- 3.19 Monitoring of Rose Bitterling and *in-situ* monitoring of water quality were conducted at the stream and associated ponds south of Lok Ma Chau Road where Rose Bitterling is present. There were 4 sampling points along the stream, and 4 sampling points at the ponds. The sampling locations are shown in **Figure 5c**.
- 3.20 *In-situ* monitoring of water quality in LMC Meander was conducted at 3 monitoring stations, including CS1, IS1 and IS2, as stated in Section 6.3 of the EM&A Manual. The monitoring stations are shown in **Figure 4**.
- 3.21 Measurements for *in-situ* monitoring of water quality included temperature, pH, salinity, turbidity and dissolved oxygen. Monitoring works/equipment were conducted/calibrated regularly in accordance with the EM&A Manual. Copies of calibration certificates were

provided in relevant Monthly EM&A Reports.

### **Land Contamination**

- 3.22 According to Section 8.2 of EM&A Manual and the details of the remediation and associated testing referred to in Chapter 8 of the EIA Report (AEIAR-176/2013), five (5) arsenic-contaminated zones were identified within the Loop. Based on the Contract requirements, “Solidification / Stabilisation” was the recommended treatment method to remediate all contaminated soils and Portland cement was proposed to be used for the contaminated soil treatment.
- 3.23 Trial of CS/S was undertaken between April and June 2019 and the second trial was conducted in August 2019. According to trial performance results, cement / soil ratios of 10% and 7.5% could achieve the remediation target and these ratios had been adopted for the subsequent remediation work. The proposed cement/soil ratios were accepted by relevant parties before the remediation work started. The contaminated soil excavation and remediation commenced on site in mid-July 2019.
- 3.24 As advised by the Contractor, Decontamination for all hot spots (LD01 – LD05) was completed and backfilling of treated soil was completed on 31<sup>st</sup> May 2021. After completion of remediation works at each hot spots, Interim Remediation Reports (IRR) was prepared by the Land Contamination Specialist and submitted to EPD in accordance with Condition 2.16 of the EP-477/2013/A. The status of IRRs is summarised below:
- (a) IRR for hot spot LD-001 endorsed by EPD on 6<sup>th</sup> January 2020
  - (b) IRR for hot spot LD-003 endorsed by EPD on 18<sup>th</sup> March 2020
  - (c) IRR for hot spot LD-002 commented by EPD on 3<sup>rd</sup> September 2020 and resubmitted by Contractor on 16<sup>th</sup> September 2020
  - (d) IRR for hot spot LD-005 endorsed by EPD on 23<sup>rd</sup> October 2020
  - (e) Final Remediation Report including the result of hotspots LD-004 was submitted to EPD on 28<sup>th</sup> June 2021. The final Remediation Report was approved by EPD with minor comments in August 2021.
- 3.25 No work related to land contamination was conducted in the reporting quarter.

### **Site Audit Summary**

- 3.26 Site audit was carried out on a weekly basis to monitor and audit the timely implementation of proper environmental management practices and mitigation measure of the Project. The observations and recommendations made during the reporting period are summarised in **Appendix K**.

### **Environmental Mitigation Measures**

- 3.27 Relevant mitigation measures as recommended in the project EIA report have been stipulated in the Project EM&A Manual for the Contractors to implement. A summary of the Environmental Mitigation Implementation Schedule (EMIS) is given in **Appendix J**.

### **Status of Waste Management**

- 3.28 The amount of wastes generated by the major site activities of this Project during the reporting quarter is shown in **Appendix L**.

## 4 MONITORING RESULTS

### Monitoring Schedule

4.1 The environmental monitoring schedules in the reporting quarter are presented in **Appendix O**.

### Weather Conditions

4.2 The details of weather conditions for each individual monitoring session were presented in relevant monthly EM&A reports.

4.3 The weather conditions and wind data in the reporting quarter is summarised in **Appendix G**.

### Air Quality

#### *1-hour and 24-hour TSP Monitoring*

4.4 All construction air quality monitoring was conducted as scheduled during the reporting quarter.

4.5 No Action/Limit Level exceedance was recorded in this reporting quarter. A summary of exceedance is attached in **Appendix I**.

4.6 **Table 4.1** and **Table 4.2** summarise the air quality monitoring results which are extracted from the monthly reports for this Project. The graphical presentations of the air quality monitoring results are shown in **Appendix B** and **Appendix C**.

**Table 4.1 Summary of 1-hour TSP Monitoring Results in Reporting Quarter**

| Reporting Months | Air Quality Monitoring Station | Average $\mu\text{g}/\text{m}^3$ | Range $\mu\text{g}/\text{m}^3$ | Action Level $\mu\text{g}/\text{m}^3$ | Limit Level $\mu\text{g}/\text{m}^3$ |
|------------------|--------------------------------|----------------------------------|--------------------------------|---------------------------------------|--------------------------------------|
| April 2023       | DMS – 1a                       | 78.6                             | 32.4 – 130.7                   | 353                                   | 500                                  |
|                  | DMS – 2B                       | 77.0                             | 41.2 – 140.4                   | 370                                   |                                      |
|                  | DMS – 3                        | 107.1                            | 53.7 – 181.9                   | 351                                   |                                      |
|                  | DMS – 4A                       | 87.8                             | 31.3 – 172.0                   | 350                                   |                                      |
| May 2023         | DMS – 1a                       | 75.9                             | 23.4 – 126.6                   | 353                                   |                                      |
|                  | DMS – 2B                       | 71.2                             | 25.3 – 124.2                   | 370                                   |                                      |
|                  | DMS – 3                        | 83.2                             | 26.3 – 154.2                   | 351                                   |                                      |

### Construction Noise

- 4.7 All construction noise monitoring was conducted as scheduled in the reporting quarter.
- 4.8 One Action Level exceedance was recorded due to one noise complaint received during 0700-1900 hrs on normal weekdays in the reporting quarter. No Limit Level exceedance was recorded. A summary of exceedance is attached in **Appendix I**.
- 4.9 **Table 4.3** summarises the noise monitoring results which were extracted from the monthly reports for this Project. The graphical presentations of the construction noise monitoring results are shown in **Appendix D**.

**Table 4.3 Summary of Noise Monitoring Results in Reporting Quarter**

| Reporting Months | Monitoring Station | Average $L_{\text{eq}}$ (30 min), dB(A) | Range $L_{\text{eq}}$ (30 min), dB(A) | Action Level                              | Limit Level, dB(A) |
|------------------|--------------------|---|---------------------------------------|---|--------------------|
| April 2023       | NMS-1              | 60.7                                    | 59.1 – 62.3                           | When one documented complaint is received | 75.0               |
|                  | NMS-2              | 71.2                                    | 68.6 – 72.7                           |   |                    |
|                  | NMS-3              | 59.5                                    | 51.5 – 63.9                           |   |                    |
|                  | NMS-4A             | 50.7                                    | 50.1 – 51.6                           |   |                    |
| May 2023         | NMS-1              | 62.2                                    | 57.0 – 65.5                           |   |                    |
|                  | NMS-2              | 71.2                                    | 70.2 – 72.7                           |   |                    |
|                  | NMS-3              | 58.6                                    | 57.5 – 60.1                           |   |                    |
|                  | NMS-4A             | 54.4                                    | 51.4 – 56.7                           |   |                    |
| June 2023        | NMS-1              | 60.9                                    | 58.0 – 64.1                           |   |                    |
|                  | NMS-2              | 70.5                                    | 69.0 – 72.5                           |   |                    |
|                  | NMS-3              | 59.5                                    | 58.0 – 61.2                           |   |                    |
|                  | NMS-4A             | 55.4                                    | 55.2 – 55.8                           |   |                    |

Remark: +3dB(A) façade correction included

If works are to be carried out during restricted hours, the conditions stipulated in the construction noise permit issued by the Noise Control Authority have to be followed.

### Water Quality

- 4.10 All water quality monitoring was conducted as scheduled in the reporting quarter.
- 4.11 No water quality monitoring was conducted at IS6 in the reporting quarter since the channel was dry. Water quality monitoring station, IS6 would be further reviewed and a proposal for any alternative monitoring location including justification will be submitted for approval from IEC and EPD.
- 4.12 No water quality monitoring was conducted at IS4 during the periods from 15<sup>th</sup> to 17<sup>th</sup> April 2023, 2<sup>nd</sup> to 6<sup>th</sup> May 2023, and 27<sup>th</sup> May 2023 as the stream were dry due to dry weather.

- 4.13 Six (6) Limit Level exceedances of DO, three (3) Limit Level exceedances of Turbidity and two (2) Limit Level exceedances of Suspended Solids were recorded on 19<sup>th</sup> and 21<sup>st</sup> April 2023 and on 8<sup>th</sup> May 2023. After investigation, the exceedances were non-project related.
- 4.14 According to the investigation, the exceedances are considered not related to the Project due to the following reasons:
- 1) No water-based construction activity was conducted.
  - 2) No pollution discharge from construction activity (YL/2020/01) nearby was observed.
  - 3) Control Station's Turbidity / SS values already exceed the Action or Limit Levels on 19<sup>th</sup> April 2023.
  - 4) Water quality mitigation measures as recommended in the EIA Report / EM&A Manual were implemented by the Contractor properly. Silt curtain was deployed to surround the works area and the concrete bund with sump pit and water pump were provided for pumping the collected site runoff to the wetsep for treatment before discharging out. Exposed slope surface was also covered with tarpaulin sheet to avoid discharge of muddy surface runoff.
  - 5) No adverse water quality due to contract works was observed at the exceeded station(s).
  - 6) Other(s):
    - (a) Stagnant water condition was observed to cause the lower DO.
    - (b) Rainfall in Northern District was recorded before the water quality monitoring on the day's exceedances were recorded. Influx of muddy water was observed from Shenzhen River to the old Shenzhen River meander as well as the monitoring station, IS2 during the monitoring.
- 4.15 Photo records were provided in relevant monthly EM&A reports. A summary of exceedance is attached in **Appendix I**.
- 4.16 **Table 4.4** summarises the water quality monitoring results which were extracted from the monthly reports for this Project. The graphical presentations of the water quality monitoring results are shown in **Appendix E**.

**Table 4.4 Summary of Water Quality Monitoring Results in Reporting Quarter**

| Reporting Months | Monitoring Station | Average (Depth average) | Range       | Action Level            | Limit Level             |
|------------------|--------------------|-------------------------|-------------|-------------------------|-------------------------|
| DO (mg/L)        |                    |                         |             |                         |                         |
| April 2023       | IS1                | 6.0                     | 1.4 – 8.3   | 7.0 / NA <sup>(4)</sup> | 6.8 or 4 <sup>(4)</sup> |

|                  | IS4                | 16.5                    | 5.5 – 51.0   | <u>155</u>   | <u>175</u>  |

Notes:

- (1) Depth-averaged was calculated by taking the arithmetic means of reading of all three depths
- (2) For DO, non-compliance of the water quality limit would occur when monitoring result at impact stations was lower than the limit.
- (3) For SS & turbidity, non-compliance of the water quality limits would occur when monitoring result at impact stations was higher than the limits.
- (4) The proposal of adopting 4 mg/L as the Limit Level of DO for the period from April to September due to seasonal change of DO was accepted by EPD via email on 10<sup>th</sup> Dec 2019.

## Ecological Monitoring

### LMC Loop

#### *Avifauna (Flight Line Survey)*

- 4.17 Monthly flight line survey was conducted by ET as scheduled in the reporting quarter. The flight line survey was carried out on 21<sup>st</sup> April 2023, 19<sup>th</sup> May 2023 and 16<sup>th</sup> June 2023.
- 4.18 **Table 4.5** shows the summary of flight line survey results including the number of birds observed and the number of bird-flights for the species in the reporting quarter.
- 4.19 In the reporting quarter, flight lines recorded were in general concentrated mainly on LMC Meander and adjacent areas including Ecological Area Zone (EA Zone) and along Shenzhen River. It demonstrates that the large waterbirds prefer using the flight line corridor above the LMC Meander as well as the unaffected Shenzhen River instead of the centre of LMC Loop.
- 4.20 The distribution of flight line usage in the reporting quarter is shown in **Appendix F**.

#### *Mammals*

- 4.21 In view of current site condition of Loop, the connectivity between the existing reed marsh and the EA Zone has been fenced off due to other project's land occupier. In addition, 12-month establishment period of EA zone has also been completed.
- 4.22 The mammals monitoring in the Loop was therefore temporarily suspended since March 2022 and will be resumed subject to the site condition.

**Table 4.5 Summary of Flight Line Survey Results in the Reporting Quarter**

| Species                         | Apr 2023       |              | May 2023       |              | Jun 2023       |              |
|---------------------------------|----------------|--------------|----------------|--------------|----------------|--------------|
|                                 | Birds Observed | Bird-flights | Birds Observed | Bird-flights | Birds Observed | Bird-flights |
| Little Egret 小白鷺                | 132            | 1,350        | 26             | 256          | 18             | 186          |
| Great Egret 大白鷺                 | 59             | 610          | 38             | 419          | 28             | 309          |
| Chinese Pond Heron 池鷺           | 3              | 26           | 6              | 59           | 7              | 65           |
| Cattle Egret 牛背鷺                | --             | --           | 1              | 11           | --             | --           |
| Black-crowned Night Heron<br>夜鷺 | --             | --           | 2              | 13           | 3              | 31           |
| Grey Heron 蒼鷺                   | 2              | 22           | 2              | 22           | 1              | 9            |
| <b>Total</b>                    | <b>196</b>     | <b>2,008</b> | <b>75</b>      | <b>780</b>   | <b>57</b>      | <b>600</b>   |

Western Connection Road*Avifauna (Flight Line Survey)*

4.23 Refer to Sections 4.15 to 4.18.

*Avifauna (Pond 12)*

4.24 Pond 12 avifauna surveys were carried out weekly as scheduled in the reporting quarter. The date of avifauna survey was shown in **Table 4.6**.

**Table 4.6 The Date of Avifauna Survey in the Reporting Quarter**

| Month           | Dates of Pond 12 Avifauna Survey   |
|-----------------|--|
| <b>Apr 2023</b> | 3 <sup>rd</sup> , 13 <sup>th</sup> , 19 <sup>th</sup> and 26 <sup>th</sup>                   |
| <b>May 2023</b> | 3 <sup>rd</sup> , 8 <sup>th</sup> , 17 <sup>th</sup> and 25 <sup>th</sup>                    |
| <b>Jun 2023</b> | 1 <sup>st</sup> , 5 <sup>th</sup> , 14 <sup>th</sup> , 23 <sup>rd</sup> and 26 <sup>th</sup> |

4.25 **Table 4.7** shows the monitoring results during construction works as compared against the results before the commencement of works of the day. The monitoring results indicated Pond 12 was utilized by waterbird and wetland-dependent species in the reporting quarter during the monitoring. No significant impact of construction activities on bird use of the pond was observed.

**Table 4.7 Summary of Avifauna Monitoring Results at Pond 12**

| Report Month    | Number of Species   |                     | Abundance           |                     |
|-----------------|---------------------|---------------------|---------------------|---------------------|
|                 | Before Construction | During Construction | Before Construction | During Construction |
| <b>Apr 2023</b> | 17                  | 21                  | 77                  | 114                 |
| <b>May 2023</b> | 18                  | 22                  | 61                  | 149                 |
| <b>Jun 2023</b> | 19                  | 33                  | 85                  | 172                 |

*Herpetofauna*

- 4.26 Herpetofauna survey was conducted as scheduled on 19<sup>th</sup> April, 25<sup>th</sup> May and 14<sup>th</sup> June 2023.
- 4.27 No potential impact due to the construction activities of Western Connection Road was identified during the survey of Chinese Bullfrog in the reporting quarter. It was observed that the shallow agricultural ponds where Chinese Bullfrog were recorded has been altered into relatively dry agricultural lands, which may have an effect on the local Chinese Bullfrog population.

*Aquatic Fauna*

- 4.28 Aquatic fauna survey was conducted as scheduled in the reporting quarter. The monthly aquatic fauna survey was carried out on 26<sup>th</sup> April, 8<sup>th</sup> May and 23<sup>rd</sup> June 2023 while *in-situ* water monitoring for aquatic fauna at the stream and associated ponds south of Lok Ma Chau Road was shown in **Table 4.8**.

**Table 4.8 Date of Water Quality Monitoring for Aquatic Fauna in the Reporting Quarter**

| Month      | Dates of Water Quality Monitoring at the Stream and Associated Ponds South of Lung Hau Road  |
|------------|--|
| April 2023 | 3 <sup>rd</sup> , 12 <sup>th</sup> , 19 <sup>th</sup> and 26 <sup>th</sup>                   |
| May 2023   | 2 <sup>nd</sup> , 8 <sup>th</sup> , 15 <sup>th</sup> , 24 <sup>th</sup> and 31 <sup>st</sup> |
| June 2023  | 5 <sup>th</sup> , 16 <sup>th</sup> , 23 <sup>rd</sup> and 28 <sup>th</sup>                   |

- 4.29 One (1) Limit Level exceedance of DO, two (2) Limit Level exceedances of Turbidity and one (1) Limit Level exceedance of Suspended Solids were recorded at IS2 on 19<sup>th</sup> and 21<sup>st</sup> April 2023 respectively. In addition, one (1) Limit Level exceedance of DO was recorded at IS1 and one (1) Limit Level exceedance of DO, one (1) Limit Level exceedance of Turbidity, one (1) Limit Level exceedance of Suspended Solids were recorded at IS2 on 8<sup>th</sup> May 2023. After investigation, the exceedances were non-project related.
- 4.30 No potential impact due to the runoff from the construction activities of the Western Connection Road was identified during the survey of Aquatic Fauna in the reporting quarter. In addition, no deterioration in the water quality due to the construction activities of the Western Connection Road was observed.
- 4.31 Relevant Monthly EM&A Reports could be referred to for the ecological monitoring photo records and results.

## 5 ENVIRONMENTAL SITE INSPECTION

### Site Audits

- 5.1 Site audits were carried out by ET on weekly basis in the reporting quarter to monitor the timely implementation of proper environmental management practices and mitigation measures on the project site. No non-conformance was identified and the observation and recommendations made in each individual site audit session in the reporting period are summarised in **Appendix K**.

### Implementation Status of Environmental Mitigation Measures

- 5.2 According to the EIA Report, Environmental Permit and the EM&A Manual of the Project, the mitigation measures detailed in the documents are recommended to be implemented during the construction phase. An updated summary of the Environmental Mitigation Implementation Schedule (EMIS) is provided in **Appendix J**.

### Solid and Liquid Waste Management Status

- 5.3 In accordance with the EM&A Manual, waste management was audited during weekly site audit to determine if wastes are being managed in accordance with the Waste Management Plan (WMP) prepared for the Project and the relevant legislative and contractual requirements. Waste management practice including waste handling, storage, transportation and disposal were audited.
- 5.4 The Contractors are advised to minimize the wastes generated through the recycling or reusing. All mitigation measures stipulated in the EM&A Manual and waste management plans shall be fully implemented. The status of implementation of waste management and reduction measures are summarised in **Appendix J**.
- 5.5 Waste generated from this Project includes inert C&D materials and non-inert C&D materials. Non-inert C&D materials are made up of general refuse and waste that cannot be reused or recycled and has to be disposed of at the designated landfill sites. The amount of wastes generated by the construction works of the Project during the reporting quarter is shown in **Appendix L**.

## **6 NON-COMPLIANCE (EXCEEDANCES) OF THE ENVIRONMENTAL QUALITY PERFORMANCE LIMITS (ACTION AND LIMIT LEVELS)**

### **Summary of Exceedances**

- 6.1 Environmental monitoring works were performed in the reporting quarter and all monitoring results were checked and reviewed. A summary of exceedance is attached in **Appendix I**.
- 6.2 No exceedance of Action/Limit Level of air quality was recorded in the reporting quarter.
- 6.3 One Action Level exceedance on construction noise was recorded due to the noise complaint received during 0700-1900 hrs on normal weekdays in the reporting quarter. No Limit Level exceedance was recorded.
- 6.4 Six (6) Limit Level exceedances of DO, three (3) Limit Level exceedances of Turbidity and two (2) Limit Level exceedances of Suspended Solids were recorded. After investigation, the exceedances were non-project related.

### **Summary of Environmental Non-Compliance**

- 6.5 No environmental non-compliance was recorded in the reporting quarter. The observations and recommendations made in each individual site audit session were presented in **Appendix K**.

### **Summary of Environmental Complaint**

- 6.6 There were two environmental complaints related to construction noise received in the reporting quarter. The Cumulative Complaint Log since the commencement of the Project is attached in **Appendix M**.

### **Summary of Environmental Summon and Successful Prosecution**

- 6.7 There was no successful environmental prosecution or notification of summons received in the reporting quarter. The Cumulative Log for environmental summon and successful prosecution since the commencement of the Project is presented in **Appendix N**.

### **Event and Action Plan**

- 6.8 Should any project related non-compliance of the criteria occur, action in accordance with the Action Plan in **Appendix H** shall be carried out.

## 7 FUTURE KEY ISSUES

### Key Issues in the Coming Three Months

7.1 The major construction activities undertaken in the coming three months will include:

Contract No. YL/2020/01 – Development of Lok Ma Chau Loop: Main Works Package 1 – Contract 1 – Site Formation and Infrastructure Works inside Lok Ma Chau Loop and Western Connection Road Phase 1

- (a) Wetland Compensation Establishment Works and Ecological Monitoring.
- (b) Additional Ground Investigation.
- (c) Deep Cement Mixing Work for Western Connection Road.
- (d) Structure Construction for Box Culverts and Retaining wall at WCR.
- (e) Drainage Works and Roadworks.
- (f) Woodland Compensation Works.

Contract No.: YL/2020/02 – Development of Lok Ma Chau Loop: Main Works Package 1 – Contract 2 Western Connection Road Phase 2, Connection Roads to Fanling / San Tin Highway and Direct Road Link Phase 1

#### Section 1

- (a) Tree Felling and Site Clearance along RW8 area and immediate vicinity. Forming of temporary carriageway to divert traffic.
- (b) Demolition of Subway Cycle Track Bay 12, 13, & 14 and to exposed and protect 132kv cables.
- (c) Excavation and lateral support for RW9 Bay 1 to Bay 4.
- (d) Construction of retaining wall RW9, complete wall stem from bay5 to bay16.
- (e) Commence construction of retaining wall RW8.
- (f) Retaining wall RW10 start implementation of TTA.
- (g) Slope Works for F26 and F23 slope benching and fill slope to required profile.

#### Section 2A

- (h) Complete all RC block removal works at BPW1.
- (i) Complete all slopes trimming works at CS1 and CS2.
- (j) Site Clearance at LMC Road Zone 3, Zone 4, Zone 5 and Zone 6.
- (k) Liaison with utility companies for utility diversion.
- (l) RW6 ELS works and construction of concrete structure.
- (m) RW6A pipe piling works.
- (n) RW – CTWR ELS works and construction of concrete structure.
- (o) DN700 watermain laying works.
- (p) Noise Barrier NB16 ELS works and construction of concrete structure (Bay 1, Bays 4-6).
- (q) UU works along Lok Ma Chau Road.

#### Section 2B

- (r) EIBC foundation work – total 8 nos. of bored piles.
- (s) Manual survey and vibration monitoring in MTR Tunnel.

Section 2C

- (t) Bored pile and socketed H-Pile for Bridge ST01 and CTFB (ST01-P05 & FBP05, EIBC).
- (u) Construction of Pier at ST01-P02 & P03.
- (v) Construction of FBA02 and FBP06 Pile caps.
- (w) Construction of Pile Cap and Pier at ST01-P04 and P06.

Section 3

- (x) Access forming and timber platform installation for predrilling at DRL-P08.
- (y) Bored pile for Bridge DRL-P02, P03 and P11.
- (z) Construction of Pile Cap and Pier at DRL-P12 & P13.
- (aa) Construction of temporary working platform for DRL-P06, P07 and P08 in Eash Nullah.

Section 5

- (bb) Construction of Pai Lau Columns, Structure and Finishes

Contract No.: YL/2021/01 – Development of Lok Ma Chau Loop: Main Works Package 1 – Contract 3 Direct Road Link Phase 2

- (a) LMC Station Structural Steel Fabrication.
- (b) LMC Station Structural Openings for E&M Diversion.
- (c) ELS Works at Elevated PTI.
- (d) UU Diversion for Watermain (MTR) and Drainage Diversion at Elevated PTI.
- (e) Bored Piling Works at Double-deck Footbridge.

7.2 Potential environmental impacts arising from the above construction activities are mainly associated with construction dust, noise, water quality, waste management and ecology. Relevant Monthly EM&A Reports could be referred to for the proactive Environmental Protection Proforma summarising the major site activities, potential environmental impacts and recommended mitigation measures for the coming months.

**Monitoring Schedule**

7.3 The environmental monitoring schedules for the next reporting quarter are presented in **Appendix O**.

## 8 CONCLUSIONS AND RECOMMENDATIONS

### Conclusions

- 8.1 This Quarterly EM&A Report presents the EM&A work undertaken in April to June 2023 in accordance with EM&A Manual.
- 8.2 Environmental monitoring and audit works were performed in the reporting quarter and all monitoring results were checked and reviewed.

#### Air Quality Monitoring

- 8.3 All construction air quality monitoring including 1-hour TSP and 24-hour TSP monitoring was conducted as scheduled in the reporting quarter. No Action/Limit Level exceedance was recorded.

#### Construction Noise Monitoring

- 8.4 All construction noise monitoring was conducted as scheduled in the reporting quarter. One Action Level exceedance was recorded due to the noise complaint received in the reporting quarter. No Limit Level exceedance was recorded.

#### Water Quality Monitoring

- 8.5 All water quality monitoring was conducted as scheduled in the reporting quarter. Six (6) Limit Level exceedances of DO, three (3) Limit Level exceedances of Turbidity and two (2) Limit Level exceedances of Suspended Solids were recorded. After investigation, the exceedances were non-project related.

#### LMC Loop

##### *Avifauna (Flight Line Survey)*

- 8.6 Avifauna monitoring was conducted as scheduled in the reporting quarter. Flight lines recorded were in general concentrated mainly on LMC Meander and adjacent areas including EA Zone and along Shenzhen River. It demonstrates that the large waterbirds prefer using the flight line corridor above the LMC Meander as well as the unaffected Shenzhen River instead of the centre of LMC Loop.

##### *Mammals*

- 8.7 According to Clause 11.4.1.2 of the EM&A Manual, the connectivity between the existing reed marsh and the EA Zone has been fenced off due to other project's land occupier.
- 8.8 In addition, the 12-month establishment period of EA zone has been completed. The mammals monitoring in the Loop was therefore temporarily suspended in the reporting quarter and will be resumed subject to the site condition.

Western Connection Road*Avifauna (Flight Line Survey)*

- 8.9 Avifauna monitoring was conducted as scheduled in the reporting quarter. Flight lines recorded were in general concentrated mainly on LMC Meander and adjacent areas including EA Zone and along Shenzhen River. It demonstrates that the large waterbirds prefer using the flight line corridor above the LMC Meander as well as the unaffected Shenzhen River instead of the centre of LMC Loop.

*Avifauna (Pond 12)*

- 8.10 Avifauna survey at Pond 12 was conducted as scheduled in the reporting quarter. Weekly count of birds using the Pond was recorded. No significant impact of construction activities on bird use of the pond was observed.

*Herptofauna*

- 8.11 Herptofauna survey was conducted as scheduled in the reporting quarter. It was observed that the shallow agricultural ponds where Chinese Bullfrog was recorded have been altered into relatively dry agricultural lands, which may have an effect on the local Chinese Bullfrog population. However, no significant impact of construction activities on this species was observed.

*Aquatic fauna*

- 8.12 Aquatic fauna survey was conducted as scheduled in the reporting quarter. No significant impact of construction activities on the stream was observed.

Land Contamination

- 8.13 Decontamination for five arsenic-contaminated zones (LD01 - LD05) identified in LMC Loop was completed and the final Remediation Report was submitted and approved by EPD in accordance with Condition 2.16 of the EP-477/2013/A under Contract No. YL/2017/03.
- 8.14 No work related to land contamination was conducted in the reporting quarter.

Environmental Site inspections

- 8.15 Environmental site inspections were conducted as weekly basis in the reporting quarter. No environmental non-compliance was recorded.

Environmental Complaint and Successful Prosecution

- 8.16 Two (2) environmental complaints related to construction noise were received in the reporting quarter.
- 8.17 No notification of summons or successful prosecutions related to environmental was received in the reporting quarter.

## Recommendations

- 8.18 The mitigation measures recommended in the EIA report and EM&A Manual are considered effective and efficient in minimizing environmental impacts due to construction of the Project during the reporting quarter. The EM&A programme implemented by the ET has effectively monitored the environmental impacts arising from the construction activities and ensure the proper implementation of mitigation measures.
- 8.19 The effectiveness and efficiency of the EM&A programme will be continuously reviewed. The EM&A programme will be improved if deficiencies of the existing EM&A programme are identified.
- 8.20 According to the environmental audits performed in the reporting quarter, the following recommendations were provided to remediate any potential impacts due to the Project:

### *Air Quality Impact*

- To provide the dust suppression measures such as water spraying on all haul roads, exposed work site areas and dust generation works;
- To provide and maintain the impervious material to cover the stockpile of dusty materials;
- To design, establish and properly use the wheel washing facilities at the site exits;
- To pave the site exits / entrances;
- To provide proper maintenance for machinery to prevent emission of black smoke; and
- To inspect NRMM labels which should be displayed for all regulated machines.

### *Construction Noise Impact*

- To inspect the noise sources inside the site;
- To space out noisy equipment and position the equipment as far away as possible from sensitive receivers;
- To provide and maintain properly temporary noise barriers or other appropriate sound reduction measures for operations of noisy equipment near the noise sensitive receivers, if necessary.

### *Water Impact*

- To check the silt curtain regularly, ensure the works area are completely surrounded, and prevent any surface runoff discharge into the old Shenzhen River meander or stream;
- To review and implement temporary drainage system;
- To identify any wastewater discharges from site;
- To remove the sand, floating rubbish or dusty material away from the EA zone, old Shenzhen River meander or stream;
- To divert all the water generated from construction site to de-silting facilities with enough handling capacity before discharge;
- To provide protection along the works boundary to avoid mud from falling into the nullah nearby;
- To review the capacity of de-silting facilities for discharge and update maintenance records of wastewater treatment facilities;
- To ensure the drainage facilities are probably maintained and not be clogged with sediment to avoid overflow;

- To cover the exposed slope surfaces by tarpaulin or other means;
- To designate the area for wheel washing and set up the associated drainage for water from a wheel wash;
- To pave the exit points and ensure vehicles leaving the site are free from debris of dirt; and
- To implement the effective water quality mitigation measures according to the site drainage plan, and review the site drainage plan measures as appropriate.

#### *Ecology Impact*

- To maintain properly the 3m high olive-green fence around the construction site and review the height of the green fence along the works of meander bridge;
- To provide and maintain visual barrier along Ha Wan Tsuen Road;
- To ensure the powered mechanical equipment for construction works only during the period 9am to 5pm at and near the old Shenzhen River meander and other identified important ecologically sensitive areas, if any; and
- To prevent any surface runoff discharge into the stream and clear up any construction materials at the streams.

#### *Waste/Chemical Management*

- To check for any accumulation of waste materials or rubbish on site and remove them promptly;
- To carry out inspection of dump trucks at site exit to ensure inert and non-inert C&D materials are properly segregated before delivering off site;
- To avoid any discharge or accidental spillage of chemical waste or oil directly from the equipment and the site;
- To maintain the drip tray well and/or provide tarpaulin sheet properly for equipment to prevent oil and chemical leakage; and
- To avoid improper handling, storage and dispose of oil drums or chemical containers on site.

#### *Landscape and Visual*

- To erect and maintain the protection fencing and tree protection zone around the preserved trees; and
- To regularly clear the construction materials within the tree protection zone.

#### *Permits/Licences*

- To display the Environmental Permit conspicuously on site.

**APPENDIX A  
ACTION AND LIMIT LEVELS**

---

---

## Appendix A - Action and Limit Levels

**Table A-1 Action and Limit Levels for 1-Hour TSP**

| Location | Action Level, $\mu\text{g}/\text{m}^3$ | Limit Level, $\mu\text{g}/\text{m}^3$ |
|----------|--|---------------------------------------|
| DMS – 1a | 353                                    | 500                                   |
| DMS – 2A | 370                                    |                                       |
| DMS – 3  | 351                                    |                                       |
| DMS – 4A | 350                                    |                                       |

**Table A-2 Action and Limit Levels for 24-Hour TSP**

| Location | Action Level, $\mu\text{g}/\text{m}^3$ | Limit Level, $\mu\text{g}/\text{m}^3$ |
|----------|--|---------------------------------------|
| DMS – 1  | 184                                    | 260                                   |
| DMS – 2A | 166                                    |                                       |
| DMS – 3  | 166                                    |                                       |
| DMS – 4A | 152                                    |                                       |

**Table A-3 Action and Limit Levels for Construction Noise**

| Time Period                      | Action Level                              | Limit Level |
|----------------------------------|---|-------------|
| 0700-1900 hrs on normal weekdays | When one documented complaint is received | 75 dB(A) *  |

Noted: If works are to be carried during restricted hours, the conditions stipulated in the construction noise permit issued by the Noise Control Authority have to be followed.

(\*) reduce to 70 dB(A) for schools and 65 dB(A) during school examination periods.

**Table A-4 Action and Limit Levels for Water Quality**

| <b>Parameter (unit)</b> | <b>Water Depth</b> | <b>Action Level</b>   | <b>Limit Level</b>  |
|-------------------------|--------------------|---|---|
| DO (mg/L)               | Depth average      | IS1: <u>7.0 / NA</u> <sup>(4)</sup><br>IS2: <u>5.3 / NA</u> <sup>(4)</sup><br>IS4: <u>4.1 / NA</u> <sup>(4)</sup><br>IS6: <u>5.9</u><br>BS1: <u>3.9 / NA</u> <sup>(4)</sup> | IS1: <u>6.8 or 4</u> <sup>(4)</sup><br>IS2: <u>5.2 or 4</u> <sup>(4)</sup><br>IS4: <u>3.8 or 4</u> <sup>(4)</sup><br>IS6: <u>5.8</u><br>BS1: <u>3.7 or 4</u> <sup>(4)</sup> |
| Turbidity (NTU)         | Depth average      | IS1: <u>27.7</u><br>IS2: <u>35.5</u><br>IS4: <u>70.9</u><br>BS1: <u>29.9</u>  | IS1: <u>29.9</u><br>IS2: <u>38.1</u><br>IS4: <u>74.6</u><br>BS1: <u>32.6</u>  |
|                         |                    | IS6: 120% of upstream control station (CS5)   | IS6: 130% of upstream control station (CS5)   |
| SS (mg/L)               | Depth average      | IS1: <u>28.0</u><br>IS2: <u>39.8</u><br>IS4: <u>155</u><br>BS1: <u>36.5</u>   | IS1: <u>28.8</u><br>IS2: <u>41.2</u><br>IS4: <u>175</u><br>BS1: <u>36.9</u>   |
|                         |                    | IS6: 120% of upstream control station (CS5)   | IS6: 130% of upstream control station (CS5)   |

Note:

- (1) Depth-averaged was calculated by taking the arithmetic means of reading of all three depths
- (2) For DO, non-compliance of the water quality limit would occur when monitoring result at impact stations was lower than the limit.
- (3) For SS & turbidity, non-compliance of the water quality limits would occur when monitoring result at impact stations was higher than the limits.
- (4) The proposal of adopting 4 mg/L as the Limit Level of DO for the period from April to September due to seasonal change of DO was accepted by EPD via email on 10 Dec 2019.

**APPENDIX H**  
**EVENT ACTION PLANS**

---

---

## Appendix H      Event / Action Plan for Air Quality

| EVENT   | ACTION   |  |   |  |
|---|--|--|---|--|
|   | ET   | IEC  | ER  | CONTRACTOR   |
| <b>ACTION LEVEL</b>                               |  |  |   |  |
| 1. Exceedance for one sample                      | 1. Identify source, investigate the causes of exceedance and propose remedial measures;<br>2. Inform IEC,ER and Contractor;<br>3. Repeat measurement to confirm finding; and<br>4. Increase monitoring frequency to daily.   | 1. Check monitoring data submitted by ET;<br>2. Check Contractor's working method; and<br>3. Review and advise the ET and ER on the effectiveness of the proposed remedial measures.   | 1. Notify Contractor.   | 1. Identify source, investigate the causes of exceedance and propose remedial measures<br>2. Rectify any unacceptable practice and implement remedial measures; and<br>3. Amend working methods agreed with ER if appropriate.   |
| 2. Exceedance for two or more consecutive samples | Identify source, investigate the causes of exceedance and propose remedial measures;<br>2. Inform IEC,ER and Contractor;<br>3. Advise the ER and Contractor on the effectiveness of the proposed remedial measures;<br>4. Repeat measurements to confirm findings;<br>5. Increase monitoring frequency to daily;<br>6. Discuss with IEC, ER and Contractor on remedial actions required;<br>7. If exceedance continues, arrange meeting with IEC and ER; and<br>8. If exceedance stops, cease additional monitoring. | 1. Check monitoring data submitted by ET;<br>2. Check Contractor's working method;<br>3. Discuss with ET and Contractor on possible remedial measures;<br>4. Advise the ET and ER on the effectiveness of the proposed remedial measures; and<br>5. Supervise Implementation of remedial measures. | 1. Confirm receipt of notification of failure in writing;<br>2. Notify Contractor; and<br>3. Supervise and ensure remedial measures properly implemented. | 1. Identify source, investigate the causes of exceedance and propose remedial measures<br>2. Submit proposals for remedial actions to ER with a copy to ET and IEC within 3 working days of notification;<br>3. Implement the agreed proposals; and<br>4. Amend proposal if appropriate. |

| EVENT  | ACTION   |   |  |   |
|--|--|---|--|---|
|  | ET   | IEC   | ER   | CONTRACTOR  |
| <b>LIMIT LEVEL</b>                               |  |   |  |   |
| 1.Exceedance for one sample                      | <p>Identify source, investigate the causes of exceedance and propose remedial measures;</p> <p>2. Inform ER, Contractor, IEC and EPD;</p> <p>3. Repeat measurement to confirm finding;</p> <p>4. Increase monitoring frequency to daily;</p> <p>5. Assess effectiveness of Contractor's remedial actions and keep IEC, EPD and ER informed of the results.</p>   | <p>1. Check monitoring data submitted by ET;</p> <p>2. Check Contractor's working method;</p> <p>3. Discuss with ET, ER and Contractor on possible remedial measures;</p> <p>4. Advise the ER and ET on the effectiveness of the proposed remedial measures;</p> <p>5. Supervise implementation of remedial measures.</p>                                   | <p>1. Confirm receipt of notification of failure in writing;</p> <p>2. Notify Contractor; and</p> <p>3. Supervise and ensure remedial measures properly implemented.</p>   | <p>1. Identify source, investigate the causes of exceedance and propose remedial measures;</p> <p>2. Take immediate action to avoid further exceedance;</p> <p>3. Submit proposals for remedial actions to ER with a copy to ET and IEC within 3 working days of notification;</p> <p>4. Implement the agreed proposals; and</p> <p>5. Amend proposal if appropriate.</p>   |
| 2.Exceedance for two or more consecutive samples | <p>Notify IEC, ER, Contractor and EPD;</p> <p>2. Identify source;</p> <p>3. Repeat measurement to confirm findings;</p> <p>4. Increase monitoring frequency to daily;</p> <p>5. Carry out analysis of Contractor's working procedures to determine possible mitigation to be implemented;</p> <p>6. Arrange meeting with IEC, Contractor and ER to discuss the remedial actions to be taken;</p> <p>7. Assess effectiveness of Contractor's remedial actions and keep IEC, EPD and ER informed of the results;</p> | <p>1. Check monitoring data submitted by ET;</p> <p>2. Check Contractor's working method;</p> <p>3. Discuss amongst ER, ET, and Contractor on the potential remedial actions;</p> <p>4. Review Contractor's remedial actions whenever necessary to assure their effectiveness and advise the ER accordingly; and</p> <p>5. Supervise the implementation</p> | <p>1. Confirm receipt of notification of failure in writing;</p> <p>2. Notify Contractor;</p> <p>3. In consultation with the ET and IEC, agree with the Contractor on the remedial measures to be implemented;</p> <p>4. Supervise and ensure remedial measures properly implemented; and</p> <p>5. If exceedance continues,</p> | <p>1. Identify source, investigate the causes of exceedance and propose remedial measures;</p> <p>2. Take immediate action to avoid further exceedance;</p> <p>3. Submit proposals for remedial actions to ER with a copy to ET and IEC within 3 working days of notification;</p> <p>4. Implement the agreed proposals;</p> <p>5. Resubmit proposals if problem still not under control;</p> <p>6. Stop the relevant portion of works as</p> |

| EVENT | ACTION   |                       |   |  |
|-------|--|-----------------------|---|--|
|       | ET   | IEC                   | ER  | CONTRACTOR   |
|       | 8. If exceedance stops, cease additional monitoring. | of remedial measures. | consider what portion of the work is responsible and instruct the Contractor to stop that portion of work until the exceedance is abated. | determined by the ER until the exceedance is abated. |

## Event / Action Plan for Construction Noise

| EVENT        | ACTION   |  |   |  |
|--------------|--|--|---|--|
|              | ET   | IEC  | ER  | CONTRACTOR   |
| Action Level | <p>Notify IEC, ER and Contractor;</p> <p>2. Carry out investigation;</p> <p>3. Report the results of investigation to the IEC, ER and Contractor;</p> <p>4. Discuss with the Contractor and formulate remedial measures;</p> <p>5. Increase monitoring frequency to check mitigation effectiveness.</p>  | <p>1. Review the analysed results submitted by the ET;</p> <p>2. Review the proposed remedial measures by the Contractor and advise the ER accordingly;</p> <p>3. Supervise the implementation of remedial measures.</p>   | <p>1. Confirm receipt of notification of failure in writing;</p> <p>2. Notify Contractor;</p> <p>3. Require Contractor to propose remedial measures for the analysed noise problem;</p> <p>4. Ensure remedial measures are properly implemented</p>   | <p>1. Submit noise mitigation proposals to IEC and ER;</p> <p>2. Implement noise mitigation proposals.</p>   |
| Limit Level  | <p>. Identify source;</p> <p>2. Inform IEC, ER, EPD and Contractor;</p> <p>3. Repeat measurements to confirm findings;</p> <p>4. Increase monitoring frequency;</p> <p>5. Carry out analysis of Contractor's working procedures to determine possible mitigation to be implemented;</p> <p>6. Inform IEC, ER and EPD the causes and actions taken for the exceedances;</p> <p>7. Assess effectiveness of Contractor's remedial actions and keep IEC, EPD and ER informed of the results;</p> <p>8. If exceedance stops, cease additional monitoring.</p> | <p>1. Discuss amongst ER, ET, and Contractor on the potential remedial actions;</p> <p>2. Review Contractors remedial actions whenever necessary to assure their effectiveness and advise the ER accordingly;</p> <p>3. Supervise the implementation of remedial measures.</p> | <p>1. Confirm receipt of notification of failure in writing;</p> <p>2. Notify Contractor;</p> <p>3. Require Contractor to propose remedial measures for the analysed noise problem;</p> <p>4. Ensure remedial measures properly implemented;</p> <p>5. If exceedance continues, consider what portion of the work is responsible and instruct the Contractor to stop that portion of work until the exceedance is abated.</p> | <p>1. Take immediate action to avoid further exceedance;</p> <p>2. Submit proposals for remedial actions to IEC within 3 working days of notification;</p> <p>3. Implement the agreed proposals;</p> <p>4. Resubmit proposals if problem still not under control;</p> <p>5. Stop the relevant portion of works as determined by the ER until the exceedance is abated.</p> |

## Event and Action Plan for Water Quality

|  | <b>Action</b>  |   |  |   |
|--|--|---|--|---|
| <b>Event</b>   | <b>ET</b>  | <b>IEC</b>  | <b>ER</b>  | <b>Contractor</b>   |
| Action level being exceeded by one sampling day                      | <ol style="list-style-type: none"> <li>1. Inform IEC, Contractor and ER;</li> <li>2. Check monitoring data, all plant, equipment and Contractor's working methods; and</li> <li>3. Discuss remedial measures with IEC and Contractor and ER.</li> </ol>  | <ol style="list-style-type: none"> <li>1. |----------|--------------------|--|--|---|-----------------------------|---------------------------------------|---|
|          |                    | <p>system will be undertaken by the contractor prior to the commencement of construction.</p> <ul style="list-style-type: none"> <li>• Diversion of natural stormwater should be provided as far as possible. The design of temporary on-site drainage should prevent runoff going through site surface, construction machinery and equipments in order to avoid or minimize polluted runoff. Sedimentation tanks with sufficient capacity, constructed from pre-formed individual cells of approximately 6 to 8 m3 capacities, are recommended as a general mitigation measure which can be used for settling surface runoff prior to disposal. The system capacity shall be flexible and able to handle multiple inputs from a variety of sources and suited to applications where the influent is pumped.</li> <li>• The dikes or embankments for flood protection should be implemented around the boundaries of earthwork areas. Temporary ditches should be provided to facilitate the runoff discharge into an appropriate watercourse, through a silt/sediment trap. The silt/sediment traps should be incorporated in the permanent drainage channels to enhance deposition rates.</li> <li>• The design of efficient silt removal facilities should be based on the guidelines in Appendix A1 of ProPECC PN 1/94. The detailed design of the sand/silt traps should be undertaken by the contractor prior to the commencement of construction.</li> <li>• Construction works should be programmed to minimize surface excavation works during the rainy seasons (April to September). All exposed earth areas should be completed and vegetated as soon as possible after earthworks have been completed. If excavation of soil</li> </ul> |  |   |                             |                                       | <p style="text-align: center;">*</p> <p style="text-align: center;">#</p> <p style="text-align: center;">*</p> <p style="text-align: center;">^</p> |

**APPENDIX K  
SITE AUDIT SUMMARY**

---

---

**Appendix K: Site Audit Summary****Table K-1: Observations and Recommendations of Site Audit in April 2023**

| <b>Parameters</b>                  | <b>Date</b> | <b>Observations and Recommendations</b>   | <b>Follow-up</b>   |
|------------------------------------|-------------|---|--|
| <b>Contract No. YL/2020/01</b>     |             |   |  |
| <i>Air Quality</i>                 | 19/04/2023  | The idle stockpiles of dusty materials at Pond 10 should be covered with tarpaulin sheet esp. during rainstorm.               | The idle stockpiles of dusty materials were covered with tarpaulin sheet by the Contractor as observed during follow-up audit session on 26/04/2023. |
| <i>Noise</i>                       | --          | No major environmental deficiency was identified during the reporting month.  | --   |
| <i>Water Quality</i>               | 12/04/2023  | To enhance the bund surrounding the DCM works at WCR.   | The bund surrounding the DCM works has been enhanced by the Contractor as observed during follow-up audit session on 19/04/2023.                     |
|                                    | 26/04/2023  | The collected muddy water should be diverted to the proper treatment facilities before discharging out (near meander bridge). | The collected water was properly diverted to the treatment facilities as observed during follow-up audit session on 03/05/2023.                      |
| <i>Waste / Chemical Management</i> | --          | No major environmental deficiency was identified during the reporting month.  | --   |
| <i>Land Contamination</i>          | --          | No major environmental deficiency was identified during the reporting month.  | --   |
| <i>Landscape and Visual</i>        | --          | No major environmental deficiency was identified during the reporting month.  | --   |
| <i>Ecology</i>                     | --          | No major environmental deficiency was identified during the reporting month.  | --   |
| <i>Fisheries</i>                   | --          | No major environmental deficiency was identified during the reporting month.  | --   |
| <i>Permits/Licences</i>            | --          | No major environmental deficiency was identified during the reporting month.  | --   |
| <b>Contract No. YL/2020/02</b>     |             |   |  |
| <i>Air Quality</i>                 | 03/04/2023  | To provide maintenance to the crane emitting black smoke at Reed bed 3A.  | No further black smoke emission was observed from the crane after maintenance by the Contractor as observed during follow-up audit session on        |

| <b>Parameters</b>                  | <b>Date</b> | <b>Observations and Recommendations</b>   | <b>Follow-up</b>  |
|------------------------------------|-------------|---|---|
|                                    |             |   | 12/04/2023.   |
|                                    | 12/04/2023  | Three sides enclosures with top shelter should be provided for the cement debagging works at CS1..                        | Cement debagging works have been completed and the equipment for such works have also been removed by the Contractor as observed during follow-up audit session on 19/04/2023.          |
| <i>Noise</i>                       | --          | No major environmental deficiency was identified during the reporting month.  | --  |
|                                    | 03/04/2023  | To provide bunding around site boundary and exit at TAR1.   | Sand bag bund was provided along the site boundary the Contractor as observed during follow-up audit session on 12/04/2023.   |
| <i>Water Quality</i>               | 19/04/2023  | The exposed slope protection works should be enhanced to avoid the discharge of muddy runoff to the nearby Reedbed 3A.    | The exposed slope was covered properly and concrete bund was erected along the site boundary for protection by the Contractor as observed during follow-up audit session on 26/04/2023. |
|                                    | 26/04/2023  | The stockpiles of dusty materials at near the nullah at Fu Tai Site Area should be covered properly with tarpaulin sheet. | The stockpiles of dusty materials have been covered with tarpaulin sheet by the Contractor as observed during follow-up audit session on 10/05/2023.                                    |
| <i>Waste / Chemical Management</i> | 26/04/2023  | The chemical containers at Fu Tai Site Area and Reedbed 3 should be stored properly with drip tray.                       | The chemical containers have been removed off site by the Contractor as observed during follow-up audit session on 03/05/2023.  |
| <i>Land Contamination</i>          | --          | No major environmental deficiency was identified during the reporting month.  | --  |
| <i>Landscape and Visual</i>        | --          | No major environmental deficiency was identified during the reporting month.  | --  |
| <i>Ecology</i>                     | 19/04/2023  | The construction materials at the stream at Fu Tai site area should be cleared.   | The construction materials at the stream have been cleared by the   |

| Parameters                         | Date       | Observations and Recommendations  | Follow-up  |
|------------------------------------|------------|---|--|
|                                    |            |   | Contractor as observed during follow-up audit session on 26/04/2023.   |
| <i>Fisheries</i>                   | --         | No major environmental deficiency was identified during the reporting month.                                  | --   |
| <i>Permits/Licences</i>            | --         | No major environmental deficiency was identified during the reporting month.                                  | --   |
| <b>Contract No. YL/2021/01</b>     |            |   |  |
| <i>Air Quality</i>                 | 17/04/2023 | The broken dust screen surrounding the potential dust generation works should be replaced at EEAA.            | The torn dust screen has been replaced by the Contractor as observed during follow-up audit session on 24/04/2023.   |
| <i>Noise</i>                       | --         | No major environmental deficiency was identified during the reporting month.                                  | --   |
| <i>Water Quality</i>               | 12/04/2023 | To update the CNP and wetsepre records were also updated by the maintenance records at EEAA.                  | The updated CNP was displayed and the wetsep maintenance records were also updated by the Contractor as observed during follow-up audit session on 17/04/2023. |
|                                    | 17/04/2023 | The temporary storage of excavated materials should be covered and kept away from the nearby gullies at EEAA. | Excavated material have been covered with tarpaulin sheets by the Contractor as observed during follow-up audit session on 24/04/2023.                         |
|                                    | 24/04/2023 | To enhance water mitigation measures around EEAA to prevent surface runoff from flowing out of site area.     | Excavated material have been covered with tarpaulin sheets by the Contractor as observed during follow-up audit session on 03/05/2023.                         |
| <i>Waste / Chemical Management</i> | --         | No major environmental deficiency was identified during the reporting month.                                  | --   |
| <i>Land Contamination</i>          | --         | No major environmental deficiency was identified during the reporting month.                                  | --   |
| <i>Landscape and Visual</i>        | --         | No major environmental deficiency was identified during the reporting month.                                  | --   |
| <i>Ecology</i>                     | --         | No major environmental deficiency was   | --   |

| Parameters              | Date       | Observations and Recommendations   | Follow-up  |
|-------------------------|------------|--|--|
|                         |            | identified during the reporting month.                                       |  |
| <i>Fisheries</i>        | --         | No major environmental deficiency was identified during the reporting month. | --   |
| <i>Permits/Licences</i> | 12/04/2023 | To update the CNP and wetsep maintenance records at EEAA.                    | The updated CNP was displayed and the wetsep maintenance records were also updated by the Contractor as observed during follow-up audit session on 17/04/2023. |

**Table K-2: Observations and Recommendations of Site Audit in May 2023**

| Parameters                         | Date       | Observations and Recommendations  | Follow-up  |
|------------------------------------|------------|---|--|
| <b>Contract No. YL/2020/01</b>     |            |   |  |
| <i>Air Quality</i>                 | 22/05/2023 | The stockpiles of dusty materials at WCR should be covered with tarpaulin sheet completely.                                 | Stockpiles of dusty material at WCR have been covered by the Contractor as observed during follow-up audit session on 31/05/2023.  |
|                                    | 31/05/2023 | Dusty stockpile at Pond 10 should be covered with tarpaulin sheets.   | The dusty stockpile at Pond 10 has been covered with tarpaulin sheets by the Contractor as observed during follow-up audit session on 07/06/2023.  |
| <i>Noise</i>                       | --         | No major environmental deficiency was identified during the reporting month.  | --   |
| <i>Water Quality</i>               | 10/05/2023 | The site access road leading to outside the works area and away from the wheel washing facilities should be paved at Box C. | The site access road leading to outside the works area and away from the wheel washing facilities has been paved by the Contractor as observed during follow-up audit session on 17/05/2023. |
|                                    | 17/05/2023 | The site exit / entrance at Box C should be paved.  | The site exit / entrance at Box C has been paved as observed during follow-up audit session on 22/05/2023.   |
| <i>Waste / Chemical Management</i> | 22/05/2023 | To designate the temporary waste storage area at near site office.  | General waste storage area near site office has been set up by the   |

| Parameters                     | Date       | Observations and Recommendations  | Follow-up   |
|--------------------------------|------------|---|---|
|                                |            |   | Contractor as observed during follow-up audit session on 31/05/2023.  |
| <i>Land Contamination</i>      | --         | No major environmental deficiency was identified during the reporting month.  | --  |
| <i>Landscape and Visual</i>    | --         | No major environmental deficiency was identified during the reporting month.  | --  |
| <i>Ecology</i>                 | --         | No major environmental deficiency was identified during the reporting month.  | --  |
| <i>Fisheries</i>               | --         | No major environmental deficiency was identified during the reporting month.  | --  |
| <i>Permits/Licences</i>        | --         | No major environmental deficiency was identified during the reporting month.  | --  |
| <b>Contract No. YL/2020/02</b> |            |   |   |
| <i>Air Quality</i>             | 03/05/2023 | The stockpiles of dusty materials at near the nullah at Fu Tai Site Area should be covered properly with tarpaulin sheet.         | The stockpiles of dusty materials have been covered with tarpaulin sheet by the Contractor as observed during follow-up audit session on 10/05/2023.      |
|                                | 10/05/2023 | The idle stockpiles of dusty materials at LCS should be covered properly with tarpaulin sheet.                                    | The idle stockpiles of dusty materials have been covered with tarpaulin sheet by the Contractor as observed during follow-up audit session on 17/05/2023. |
|                                | 31/05/2023 | Machinery at TAR1 should be maintained to prevent black smoke emission.   | No further dark smoke was observed after checking and maintained as observed during follow-up audit session on 07/06/2023.                                |
| <i>Noise</i>                   | 24/05/2023 | The temporary noise barrier (TNB9) should be checked to ensure the location and required length are comply with the EP condition. | The location and the length of the TNB9 were observed complied with the EP condition during follow-up audit session on 31/05/2023.                        |
| <i>Water Quality</i>           | 03/05/2023 | The protective bund along the bottom of water barriers at RW9 should be properly maintained and enhanced.                         | The damaged sand bags along the bottom of water barriers have been replaced by the Contractor as  |

| Parameters                         | Date       | Observations and Recommendations   | Follow-up  |
|------------------------------------|------------|--|--|
|                                    |            |  | observed during follow-up audit session on 10/05/2023.   |
|                                    | 17/05/2023 | The muddy surface runoff should be properly collected and pumping to the treatment facilities before discharging out at LCS. | Follow up action is needed for this item in the next audit session.  |
|                                    | 31/05/2023 | The muddy water at the sedimentation tank should be pumping to the wetsept for treatment regularly (CS1).                    | The muddy water at the sedimentation tank has been pumped to the wetsep for treatment regularly by the Contractor as observed during follow-up audit session on 07/06/2023 |
| <i>Waste / Chemical Management</i> | 17/05/2023 | The handrail at the nullah at LCS should be removed.   | Follow up action is needed for this item in the next audit session.  |
| <i>Land Contamination</i>          | --         | No major environmental deficiency was identified during the reporting month.   | --   |
| <i>Landscape and Visual</i>        | --         | No major environmental deficiency was identified during the reporting month.   | --   |
| <i>Ecology</i>                     | --         | No major environmental deficiency was identified during the reporting month.   | --   |
| <i>Fisheries</i>                   | --         | No major environmental deficiency was identified during the reporting month.   | --   |
| <i>Permits/Licences</i>            | 10/05/2023 | The Environmental Permit should be displayed conspicuously on site. Reedbed 3A.  | The Environmental Permit has been displayed conspicuously on site by the Contractor as observed during follow-up audit session on 17/05/2023.                              |
| <b>Contract No. YL/2021/01</b>     |            |  |  |
| <i>Air Quality</i>                 | 3/05/2023  | Dust screen should be provided on the site boundary hoarding next to the drilling rig outside of the public washrooms.       | Dust screen has been provided on the site boundary hoarding next to the drilling rig by the Contractor as observed during follow-up audit session on 10/05/2023.           |
| <i>Noise</i>                       | 24/05/2023 | To enhance the noise mitigation  | The acoustic blanket has been  |

| <b>Parameters</b>                  | <b>Date</b> | <b>Observations and Recommendations</b>  | <b>Follow-up</b>   |
|------------------------------------|-------------|--|--|
|                                    |             | measures for the piling equipment at EEAA.   | erected next to the piling equipment by the Contractor as observed during follow-up audit session on 29/05/2023. The effectiveness of the noise mitigation will be further reviewed from time to time subject to the updated site condition. |
| <i>Water Quality</i>               | 15/05/2023  | To enhance water mitigation measures at the site boundary next to the stockpiles to prevent muddy runoff from flowing out of site.             | A sandbag bund was placed along the site boundary and the exposed soil surface has been covered with tarpaulin sheet as observed during follow-up audit session on 24/05/2023.   |
|                                    | 15/05/2023  | Broken sandbags at the site exit should be replaced.   | Broken sandbags have been replaced by the Contractor as observed during follow-up audit session on 24/05/2023.   |
| <i>Waste / Chemical Management</i> | 15/05/2023  | The hammer drills should be placed on impervious tarpaulin sheets to prevent contamination from oil leakages.                                  | The hammer drill was placed on impervious tarpaulin sheets to prevent contamination from oil leakages by the Contractor as observed during follow-up audit session on 24/05/2023.  |
|                                    | 29/05/2023  | The breaker with disconnected fuel pipe should be placed on the impermeable sheeting to avoid the land contamination from oil leakage at EEAA. | The breaker had been placed on top of impermeable sheeting to prevent leakage by the Contractor as observed during follow-up audit session on 05/06/2023.  |
|                                    | 29/05/2023  | The water barriers at near the drainage channel at EEAA should be removed.   | Follow up action is needed for this item in the next audit session.  |
| <i>Land Contamination</i>          | --          | No major environmental deficiency was identified during the reporting month.   | --   |
| <i>Landscape and</i>               | --          | No major environmental deficiency was--  | --   |

|--------------------------------------|------------|--|--|
| <b>Contract No. YL/2020/01</b>       |            |  |  |
| <i>Air Quality and Water Quality</i> | 7/06/2023  | The site exit / entrance at WCR (near Pond 10) should be paved.  | The site exit / entrance has been paved by the Contractor as observed during follow-up audit session on 14/06/2023.  |
|                                      | 21/06/2023 | Dust suppression measures and water quality mitigation measures should be provided for the dusty materials stockpiling site at Zone 4.       | Follow up action is needed for this item in the following audit sessions of the next reporting period.   |
| <i>Noise</i>                         | --         | No major environmental deficiency was identified during the reporting month.   | --   |
| <i>Water Quality</i>                 | 7/06/2023  | The silt curtain deployment at DCM7 should be reviewed and enhanced and the works area should also be surrounded by silt curtain completely. | Double layer silt curtain has been deployed to enclose the works area by the Contractor as observed during follow-up audit session on 14/06/2023.                            |
|                                      | 21/06/2023 | The silt curtain should be deployed to enclose the works area of meander bridge without gap.   | The silt curtain were properly maintained as observed during follow-up audit session on 5/07/2023. The effectiveness of which would be reviewed regularly by the Contractor. |
| <i>Waste / Chemical Management</i>   | --         | No major environmental deficiency was identified during the reporting month.   | --   |
| <i>Land Contamination</i>            | --         | No major environmental deficiency was identified during the reporting month.   | --   |
| <i>Landscape and</i>                 | --         | No major environmental deficiency was  | --   |

| Parameters                     | Date       | Observations and Recommendations   | Follow-up   |
|--------------------------------|------------|--|---|
| <i>Visual</i>                  |            | identified during the reporting month.   |   |
| <i>Ecology</i>                 | 28/06/2023 | Provide maintenance to the green fence at Pond 12 and meander bridge works area.   | Follow up action is needed for this item in the following audit sessions of the next reporting period.  |
| <i>Fisheries</i>               | --         | No major environmental deficiency was identified during the reporting month.   | --  |
| <i>Permits/Licences</i>        | --         | No major environmental deficiency was identified during the reporting month.   | --  |
| <b>Contract No. YL/2020/02</b> |            |  |   |
| <i>Air Quality</i>             | --         | No major environmental deficiency was identified during the reporting month.   | --  |
| <i>Noise</i>                   | --         | No major environmental deficiency was identified during the reporting month.   | --  |
| <i>Water Quality</i>           | 7/06/2023  | The existing drainage channel at Fu Tai Site Area should be cleared and protected.   | The drainage channel was cleared and exposed slopes nearby have been covered by the Contractor as observed during follow-up audit session on 21/06/2023.  |
|                                | 7/06/2023  | The muddy water surface runoff should be properly collected and pumping to the treatment facilities before discharging out at LCS.   | The geotextile screen was provided at the outfall as observed during follow-up audit session on 21/06/2023. The effectiveness of the mitigation measures will be reviewed from time to time subject to the site condition.  |
|                                | 14/06/2023 | Muddy water was observed outside the site exit at the public road. The Contractor was reminded to provide mitigation measures to avoid the discharge of muddy water directly and wheel wash water should be properly collected and treated before discharging out. (TAR1). | Sand bag bund was provided and no further muddy water was observed outside the site exit at the public road during follow-up audit session on 21/06/2023. The effectiveness of mitigation measures will be reviewed from time to time subject to the site condition |
|                                | 14/06/2023 | The wetsep should be provided at RW9   | Water pump was provided to  |

| <b>Parameters</b>                  | <b>Date</b> | <b>Observations and Recommendations</b>                                       | <b>Follow-up</b>   |
|------------------------------------|-------------|---|--|
|                                    |             | according to the approved effluent discharge license.                         | pump out the muddy water to the retention pond inside the site and no site discharge was observed during follow-up audit session on 21/06/2023. According to the Contractor, wetsep will be arranged on site as soon as possible which will be further inspected once available. |
| <i>Water Quality</i>               | 28/06/2023  | Provide maintenance to water mitigation measures at site exit. (Reed bed 3A). | Geotextile and sandbags were maintained properly by the Contractor as observed during follow-up audit session on 5/07/2023.  |
| <i>Waste / Chemical Management</i> | 7/06/2023   | The handrail at the nullah at LCS should be removed.                          | The handrails at nullah have been removed by the Contractor as observed during follow-up audit session on 14/06/2023.  |
|                                    | 14/06/2023  | The water filled barriers should be removed away from the nullah at TAR1.     | The water filled barriers at the nullah have been cleared by the Contractor as observed during follow-up audit session on 21/06/2023.  |
| <i>Land Contamination</i>          | --          | No major environmental deficiency was identified during the reporting month.  | --   |
| <i>Landscape and Visual</i>        | 14/06/2023  | The retained trees should be properly protected at Fu Tai site area.          | The retained trees have been protected by the water filled barriers as observed during follow-up audit session on 21/06/2023.  |
| <i>Ecology</i>                     | --          | No major environmental deficiency was identified during the reporting month.  | --   |
| <i>Fisheries</i>                   | --          | No major environmental deficiency was identified during the reporting month.  | --   |
| <i>Permits/Licences</i>            | --          | No major environmental deficiency was identified during the reporting month.  | --   |
| <b>Contract No. YL/2021/01</b>     |             |   |  |

| <b>Parameters</b>                  | <b>Date</b> | <b>Observations and Recommendations</b>  | <b>Follow-up</b>   |
|------------------------------------|-------------|--|--|
| <i>Air Quality</i>                 | 19/06/2023  | NRMM label should be provided for the excavator mounted breaker.   | NRMM label has been displayed on the excavator mounted breaker as observed during follow-up audit session on 26/06/2023.   |
| <i>Noise</i>                       | 19/06/2023  | Noise mitigation measures should be provided for the metal collision noise from the chains during sheet piling works and breaker during rock breaking works. | Noise mitigation measures have been provided to mitigate the metal collision noise from the chains by the Contractor during sheet piling works and breaker during rock breaking works as observed during follow-up audit session on 26/06/2023.                                      |
| <i>Water Quality &amp; Ecology</i> | 19/06/2023  | The nullah should be properly protected to avoid the soil and muddy surface runoff from the nearby works area getting into the nullah.                       | The sand bag bund has been erected to enclose the works and the nearby exposed site area has also been covered with tarpaulin sheet by the Contractor to avoid the generation of muddy water and discharging to the nullah as observed during follow-up audit session on 26/06/2023. |
| <i>Waste / Chemical Management</i> | 5/06/2023   | The water barriers at near the drainage channel at EEAA should be removed.   | Water barriers at near the drainage channel have been removed by the Contractor as observed during follow-up audit session on 12/06/2023.  |
|                                    | 5/06/2023   | Drip trays should be provided for chemical containers.   | Drip tray has been provided for the container by the Contractor as observed during follow-up audit session on 12/06/2023.  |
|                                    | 12/06/2023  | Construction waste should be collected in designated area and disposed of regularly.   | The construction wastes have been cleared properly by the Contractor as observed during follow-up audit session on 19/06/2023.   |
| <i>Land Contamination</i>          | --          | No major environmental deficiency was  | --   |

| <b>Parameters</b>           | <b>Date</b> | <b>Observations and Recommendations</b>                                      | <b>Follow-up</b> |
|-----------------------------|-------------|--|------------------|
|                             |             | identified during the reporting month.                                       |                  |
| <i>Landscape and Visual</i> | --          | No major environmental deficiency was identified during the reporting month. | --               |
| <i>Fisheries</i>            | --          | No major environmental deficiency was identified during the reporting month. | --               |
| <i>Permits/Licences</i>     | --          | No major environmental deficiency was identified during the reporting month. | --               |

| Total     | 8.665  | 0.000                                      | 0.000                          | 0.000                           | 8.665                          | 5.382                    | 0.019   | 0.784                             | 0.026       | 1.100       | 0.000          | 0.324                          |

### Remarks:

1. Assume the density of soil fill=2.0 tonnes/m<sup>3</sup>
2. Assume the density of rock and broken concrete=2.5 tonnes/m<sup>3</sup>
3. Assume the density of refuse = 1.5 tonnes/m<sup>3</sup>
4. The inert C&D material except slurry and bentonite are disposed at Tuen Mun 38
5. The slurry and bentonite are disposed at Tseung Kuwn O 137.
6. The non-inert C&D wastes, including general refuse are disposed at NENT

Note:

1. For non-inert portion of C&D material, assume the density of 1 m<sup>3</sup> general refuse is equal to 200 kg.
2. For inert portion of C&D material, assume 6 m<sup>3</sup> per each full-filled dump truck.
3. All values are round off to the third decimal places.

### Remarks:

1. Assume the density of soil fill=2.0 tonnes/m<sup>3</sup>
2. Assume the density of rock and broken concrete=2.5 tonnes/m<sup>3</sup>
3. Assume the density of refuse = 1.5 tonnes/m<sup>3</sup>
4. The inert C&D material except slurry and bentonite are disposed at Tuen Mun 38
5. The non-inert C&D wastes, including general refuse are disposed at NENT

| COM-2021-10-01 | 11 October 2021   | EPD             | EPD File Ref.: N07/RN/00 024120-21 | <p>EPD received a public complaint on 11 October 2021. The complainant alleged the following:</p> <p>(a) Discharge of muddy water from construction sites of “Development of Lok Ma Chau Loop” project to Shenzhen River in the morning of 8 October 2021; and,</p> <p>(b) Use of powered mechanical equipment (including excavators and dump trucks) in the construction sites of “Development of Lok Ma Chau Loop” project on Sunday.</p> | <p>(a) <u>Water Quality</u><br/>Non-project related<br/>According to the interim report, wastewater treatment facilities and relevant mitigation measures were properly implemented and there is no direct evidence to demonstrate the muddy discharge was induced by the Contract.<br/>Further preventive measures, such as increasing the height of the temporary drainage by using sandbag and providing the earth bund with geo-textile along the site boundary, were implemented on 12 October 2021 in order to avoid muddy water from leaking into Shen Zhen River.</p> <p>(b) <u>Noise</u><br/>Project related<br/>Typhoon No. 8 (Tropical cyclone: Lion Rock) was hoisted on 9 October 2021. Severe rainfall was recorded due to the adverse weather. To avoid leakage of the muddy water into the meander of the Shenzhen River, JV mobilized an excavator and dump truck to clear the blockage as an emergency measure.<br/>ET reminded the Contractor to update the site drainage</p> | Interim report was submitted to EPD on 29 Oct 2021 |

| COM-2022-01-01 | 2 January 2022    | EPD             | EPD File Ref.: N06/RN/00000184-22 | EPD received a public complaint by phone in Jan 2022 regarding noise from general construction work associated with the Lok Ma Chau Loop Development Project being carried out on 2.1.2022 at around 15:30 hours (i.e. within the restricted hours on Sunday). | <p>According to the location under complaint, the work was likely carried out within the work site of “Direct Road Link to MTR Lok Ma Chau Station” and/or “Western Connection Road”. Therefore, interim reports were submitted by Contract No.: YL/2020/01 and YL/2020/02 respectively:-</p> <p><u>Contract No.: YL/2020/01</u></p> <p>According to the site diary, no construction work was carried out during restricted hours at the location under complaint for YL/2020/01 on 2 January 2022. For prevention measure, Permit –to –Work system has been implemented for all the construction works being conducted in the restricted hours to enhance site control. All the construction works need to inform JV at least one day in advance.</p> <p>In addition, all staff and workers involved in the site operation during the restricted hours have to obtain a valid site pass and display to the security guards when entering site area for the enhancement of the site security system.</p> <p>Based on the above information and investigation findings, the noise complaint is not related to the</p> | Interim report was submitted to EPD on 14 Feb 2022 |

| Log Ref.       | Date of Complaint | Complaint Route | Reference No.              | Details of Complaint   | Investigation Finding   | Status   |
|----------------|-------------------|-----------------|----------------------------|--|---|--|
|                |                   |                 |                            |  | <p>construction works of the Contract YL/2020/01.</p> <p><u>Contract No.: YL/2020/02</u><br/>According to the site diary, no construction work was carried out during restricted hours at the location under complaint on 2 January 2022 for YL/2020/02. Nevertheless, construction team was reminded to strictly follow the requirement stated in the issued construction noise permit when construction work is required during restricted hours.</p> <p>Based on the above information and investigation findings, the noise complaint is not related to the construction works of the Contract YL/2020/02.</p>  |  |
| COM-2022-04-01 | 4 April 2022      | 1823            | 1823 Case no: 3-7155426748 | The complainant concerned about the muddy surface runoff arising from the construction works of “Development of Lok Ma Chau Loop” project. at Lok Ma Chau Road near Ha Wan Tsuen Road. | <p>According to the interim report, no construction works was carried out at the location of complaint which is outside the site boundary of the Project from 1st April to 4th April 2022. Appropriate water quality mitigation measures have been properly implemented on site and there is no direct evidence to demonstrate the muddy discharge was inducted by the Project.</p> <p>Further preventive measures, such as set up a monitoring point at the exit of the site to check the wheels of the vehicles are clean enough so that no mud and grit adhered to the wheels of the trucks when leaving the site. In addition, sprinkler truck will be only operated at appropriate location within the project site to avoid nuisance to the public road user.</p> | Final reply to 1823 on 12 April 2022. Interim report prepared by Contractor was agreed by IEC and ET |

| Log Ref. | Date of Complaint | Complaint Route | Reference No. | Details of Complaint | Investigation Finding  | Status |
|----------|-------------------|-----------------|---------------|----------------------|--|--------|
|          |                   |                 |               |                      | <p>blocks of Shenzhen City. The generators used on site were Quality Powered Mechanical Equipment (QPME).</p> <p>According to the calculation by the Contractor during the non-restricted hour on 6 May (Saturday), the mitigated noise level at the nearest residential building in Shenzhen based on the SWL of PME's used were below 75dB(A).</p> <p>All construction works performed during the restricted hours were reviewed and no non-compliance was identified. A refresher training on a CNP compliance was provided to relevant frontline staff and workers on 12 May 2023. The deployment of the temporary noise barriers would be reviewed from time to time to cater for the changing site conditions.</p> |        |
