By E-mail

Dear Sir,

RE: CONTRACT NO. 7/WSD/21 INDEPENDENT ENVIRONMENTAL CHECKER FOR ENVIRONMENTAL MONITORING AND AUDIT FOR SIU HO WAN WATER TREATMENT WORKS EXTENSION MONTHLY ENVIRONMENTAL MONITORING AND AUDIT REPORT – MAY 2023

I refer to the Monthly Environmental Monitoring and Audit Report – May 2023 (Report No.: TCS01196/22/600/R0057v2) received on 12 June 2023 by the Environmental Team (ET), Action-United Environmental Services & Consulting (AUES) via email. In accordance with Condition 4.4 of Environmental Permit No.EP-207/2005/A, I hereby verify the captioned report.

Yours faithfully,

For and on behalf of **Allied Environmental Consultants Ltd.**

Joanne NG Independent Environmental Checker

EXECUTIVE SUMMARY

- ES.01. Water Supplies Department (WSD) is the Proponent of the Works Contract 7/WSD/21 "Construction of Siu Ho Wan Water Treatment Works Extension and Siu Ho Wan Raw Water Booster Pumping Station" (hereinafter named as the "Works Contract"). Under this Works Contracts, the works mainly comprise of increasing the water treatment capacity of Siu Ho Wan water treatment works (SHW WTW) from 150,000m³ per day to 300,000m³ per day within the existing water treatment works compound, by constructing new water treatment facilities and a new laboratory building and modifying the existing associated facilities; and constructing a new raw water booster pumping station at Siu Ho Wan to increase the raw water transfer capacity from Tai Lam Chung Reservoir to SHW WTW.
- ES.02. According to the Environmental Impact Assessment Ordinance (EIAO), the proposed Siu Ho Wan Water Treatment Works Extension is a Designated Project under Schedule 2, which shall be implemented under the Environmental Permit EP-207/2005/A *(hereinafter called the "EP")*. Besides, the works for Siu Ho Wan Raw Water Booster Pumping Station is a non-designated project which mentioned in Section 1.10 of Environmental Monitoring and Audit (EM&A) Manual.
- ES.03. On 20 March 2022, *China Road and Bridge Corporation* (hereinafter called the "Main *Contractor*") awarded the *Works Contracts* 7/*WSD*/21. According to EM&A Manual, only air quality monitoring is required to be conducted which related to the works area under *Contracts* 7/*WSD*/21 during construction phase of the SHW WTW Extension. Moreover, site inspection and audit is required under the EM&A program to ensure the recommended environmental mitigation measures are implemented properly and effective.
- ES.04. The Main-*Contractor* appointed Action-United Environmental Services & Consulting (AUES) as the Environmental Team of the Project (hereinafter referred as the "ET") to implement air quality monitoring as well as associated duties in accordance with the EM&A Manual stipulation.
- ES.05. As advised by the *Contractor*, the major construction works under Works Contract was commenced on 24 May 2022. This is the *13th* Monthly EM&A Report presenting monitoring results and inspection finding for the Project for the reporting period from *1 to 31 May 2023*.

ENVIRONMENTAL MONITORING AND AUDIT ACTIVITIES

ES.06. Environmental monitoring activities under the EM&A programme for the Contract in the Reporting Month are summarized in the following table.

Issues	Environmental Monitoring Parameters / Inspection	Sessions
Air Quality	24-Hour TSP	5
Inspection /	ET Regular Environmental Site Inspection	5
Audit	Joint site audit with <i>Project Manager</i> 's Delegate and IEC	1

ACTION AND LIMIT LEVELS EXCEEDANCE

ES.07. In the Reporting Month, no air quality monitoring exceedance was recorded.

SITE INSPECTION

ES.08. In the Reporting Month, joint site inspections to evaluate the site environmental performance had been carried out by the representatives of the *PMD*, ET and the *Contractor* on 2, 9, 16, 23 and 30 May 2023. Joint site inspection with *PMD*, ET, IEC and the *Contractor* was carried out on 16 May 2023. No non-compliance was recorded during the site inspections.

ENVIRONMENTAL COMPLAINT

ES.09. In the Reporting Month, no environmental complaint was received.

NOTIFICATION OF SUMMONS AND SUCCESSFUL PROSECUTIONS

ES.010. In the Reporting Month, no prosecution or notification of summons was received.

REPORTING CHANGE

ES.011. There is no reporting change made for this monthly report.

FUTURE KEY ISSUES

- ES.012. Special attention should be paid on the potential construction dust impact since most of the construction sites are adjacent to Siu Ho Wan Sewage Treatment Works. The *Contractor* should fully implement the construction dust mitigation measures as appropriately.
- ES.013. Due to wet season has approached, the *Contractor* was reminded that all effluent discharge shall fulfill the requirement of Discharge Licence under the Water Pollution Control Ordinance.
- ES.014. All other mitigation measures recommended in the Implementation Schedule for Environmental Mitigation Measures of the EM&A Manual should be properly implemented and maintained as far as practicable.

1 INTRODUCTION

1.1 PROJECT BACKGROUND

- 1.1.1 Water Supplies Department (WSD) is the Proponent of the Works Contract 7/WSD/21 Construction of Siu Ho Wan Water Treatment Works Extension and Siu Ho Wan Raw Water Booster Pumping Station (hereinafter named as the "Works Contract"). The Project works predicted by WSD will be undertaken about 34 months. Layout plan of the Project is shown in Appendix A.
- 1.1.2 According to the Environmental Impact Assessment Ordinance (EIAO), the proposed Siu Ho Wan Water Treatment Works Extension is a Designated Project under Schedule 2, which shall be implemented under the Environmental Permit EP-207/2005/A *(hereinafter called the "EP")*. Besides, the works for Siu Ho Wan Raw Water Booster Pumping Station is a non-designated project which mentioned in Section 1.10 of Environmental Monitoring and Audit (EM&A) Manual.
- 1.1.3 The Works Contract construction activities mainly include:
 - a. Extension of the existing Siu Ho Wan WTW within the existing Siu Ho Wan WTW compound from a capacity of 150,000 m³/day to 300,000 m³/day
 - b. Uprating of the treated/fresh water pumping capacity in the existing Siu Ho Wan Raw Water and Fresh Water Pumping Station within the existing Siu Ho Wan WTW compound from a capacity of 150,000 m³/day to 300,000 m³/day
 - c. Construction of the proposed Siu Ho Wan Raw Water Booster Pumping Station and the laying of the associated water mains
- 1.1.4 On 20 March 2022, *China Road and Bridge Corporation* (hereinafter called the "Main *Contractor*") awarded the Works Contracts 7/WSD/21. According to EM&A Manual, only air quality monitoring is required to be conducted which related to the works area under Contracts 7/WSD/21 during construction phase of the SHW WTW Extension. Moreover, site inspection and audit is required under the EM&A program to ensure the recommended environmental mitigation measures are implemented properly and effective.
- 1.1.5 The Main-*Contractor* appointed Action-United Environmental Services & Consulting (AUES) as the Environmental Team of the Project (hereinafter referred as the "ET") to implement air quality (baseline and impact) monitoring as well as associated duties in accordance with the EM&A Manual stipulation.
- 1.1.6 Some design changes of the Project have been identified after the EIA stage for betterment in the design development. Some of these changes requires supplementary environmental review to address their likely environmental impacts and to identify any additional mitigation measures required for compliance with the EIAO. Supplementary environmental review has been performed for the changes and the review results are presented in the "Review Report on Environmental Impact Assessment (Review Report on EIA)" prepared under "Agreement No. CE 82/2017 (WS)". Having reviewed the Review Report on EIA, no changes to the environmental monitoring requirement in the EM&A Manual are proposed for the work of SHW WTW Extension.
- 1.1.7 According to the approved EM&A Manual, only air quality is required to be monitored during the construction phase of the Project. As part of the EM&A program, baseline monitoring is required to determine the ambient environmental conditions. Pursuant to the EM&A Manual, baseline environmental monitoring is required to be conducted prior to commencement of the construction works under the Project. Baseline air quality monitoring was conducted from 8 to 21 April 2022. During the baseline monitoring period, no major construction activities under the Project was observed.
- 1.1.8 As advised by the *Contractor*, the major construction works under Works Contract was commenced on 24 May 2022. This is the *13th* Monthly EM&A Report presenting monitoring results and inspection finding for the Project for the reporting period from *1 to 31 May 2023*.

1.2 REPORT STRUCTURE

- 1.2.1 The Monthly EM&A Report is structured into the following sections:-
 - Section 1 Introduction
 - Section 2 Project Organization and Construction Progress
 - Section 3 Summary of Impact Monitoring Requirements
 - Section 4 Air Quality Monitoring
 - Section 5 Waste Management
 - Section 6 Site Inspections
 - Section 7 Environmental Complaints and Non-Compliances
 - Section 8 Implementation Status of Mitigation Measures
 - Section 9 Conclusions and Recommendations

2 PROJECT ORGANISATION AND CONSTRUCTION PROGRESS

2.1 **PROJECT ORGANISATION**

2.1.1 The project organization is shown in *Appendix B*. The roles and responsibilities of the various parties involved in the EM&A process and the organizational structure of the organizations responsible for implementing the EM&A programme are outlined below.

Water Supplies Department (WSD)

2.1.2 WSD is the Project Proponent and the Permit Holder of the EP of the development of the Project and will assume overall responsibility for the project. An Independent Environmental Checker (IEC) shall be employed by WSD to audit the results of the EM&A works carried out by the ET.

Environmental Protection Department (EPD)

2.1.3 EPD is the statutory enforcement body for environmental protection matters in Hong Kong.

Project Manager's Delegate (PMD)

- 2.1.4 The *PM*D is responsible for overseeing the construction works and for ensuring that the works are undertaken by the *Contractor* in accordance with the specification and contract requirements. The duties and responsibilities of the *PD*M with respect to EM&A are:
 - Supervise the *Contractor*'s activities and ensure that the requirements in the EM&A Manual are fully complied with;
 - Inform the *Contractor* when action is required to reduce impacts in accordance with the Event and Action Plans;
 - Comply with the agreed Event Contingency Plan in the event of any exceedance.

The Contractor

- 2.1.5 The Main *Contractor* is responsible perform construction works and for ensuring that the works are undertaken compliance with the specification and contract requirements. The duties and responsibilities of the Main *Contractor* with respect to EM&A are:
 - Employ an ET to undertake monitoring, laboratory analysis and reporting of environmental monitoring and audit;
 - Provide information / advice to the ET regarding works activities which may contribute, or be continuing to the generation of adverse environmental conditions;
 - Submit proposals on mitigation measures in case of exceedances of Action and Limit levels in accordance with the Event and Action Plans;
 - Implement measures to reduce impact whenever Action and Limit levels are exceeded;
 - Implement the corrective actions instructed by *PM*D;
 - Accompany joint site audit undertaken by the ET; and
 - Adhere to the procedures for carrying out complaint investigation.

Environmental Team (ET)

- 2.1.6 The ET is responsible perform implementation EM&A programmes of the Contract Works as stipulated in the Updated EM&A Manual ensure the works are fully compliance with environmental regulations. The duties and responsibilities of the ET with respect to EM&A are:
 - Set up all the required environmental monitoring stations;
 - Monitor various environmental parameters as required in the EM&A Manual;
 - Analyze the EM&A data and review the success of EM&A programme to cost effectively confirm the adequacy of mitigation measures implemented and the validity of the EIA predictions and to identify any adverse environmental impacts arising;
 - Carry out site inspection to investigate and audit the *Contractor*'s site practice, equipment and work methodologies with respect to pollution control and environmental mitigation, and take proactive actions to pre-empt problems;
 - Audit and prepare audit reports on the environmental monitoring data and site environmental conditions;

Report on the EM&A results to the IEC, *Contractor*, the *PM*D and EPD or its delegated representative;

AUFS

- Recommend suitable mitigation measures to the *Contractor* in the case of exceedance of Action and Limit levels in accordance with the Event and Action Plans;
- Undertake regular and ad-hoc on-site audits / inspections and report to the *Contractor* and the ER of any potential non-compliance; and
- Follow up and close out non-compliance actions.

Independent Environmental Checker (IEC)

- 2.1.7 The duties and responsibilities of IEC with respect to EM&A are:
 - Review the EM&A works performed by the ET (at not less than monthly intervals);
 - Audit the monitoring activities and results (at not less than monthly intervals);
 - Report the audit results to the *PM*D and EPD in parallel;
 - Review the EM&A reports (monthly summary reports) submitted by the ET;
 - Review the proposal on mitigation measures submitted by the *Contractor* in accordance with the Event and Action Plans;
 - Check the mitigation measures submitted by the *Contractor* in accordance with the Event and Action Plans;
 - Check the mitigation measures that have been recommended in the EIA and this Manual, and ensure they are properly implemented in a timely manner, when necessary;
 - Report the findings of site inspections and other environmental performance reviews to *PM*D and EPD;
 - Coordinate the monitoring and auditing works for all the on-going contracts in the area in order to identify possible sources / causes of exceedances and recommend suitable remedial actions where appropriate; and
 - Coordinate the assessment and response to complaints / enquires from locals, green groups, district councils or the public at large.

2.2 CONSTRUCTION PROGRESS

- 2.2.1 The major construction activities conducted under the Contract in the Reporting Period are listed below. The 3-month rolling construction programme is shown in *Appendix C*.
 - Concreting of slab at +7.20mPD was completed at portion BPS-1.
 - Installation of steel formwork for BPS bearing wall at portion BPS-1 was in progress.
 - DMA installation works were in progress at portion BPS-1.
 - Installation of lateral support works were in progress at portion WTW-1.
 - Plant trial for submitted concrete mix was in progress.
 - Erection of tower crane TC2 was completed at portion WTW-7.
 - Construction of mass concrete wall works were in progress at portion WTW-2.
 - Trial for earth rod installation at RWBPS.
 - E&M modification works at existing Chemical Building.

2.3 SUMMARY OF ENVIRONMENTAL PERMITS AND LICENCES

2.3.1 Summary of the relevant permits, licences, and/or notifications on environmental protection for the Project are presented in *Table 2-1*.

 Table 2-1
 Status of Environmental Licences and Permits of the Contract

		Licence/Permit Status			
Item	Description	Reference No./ License No./ Account No.	Approval Date	Expiry Date	Status
1	Air Pollution Control (Construction Dust)	Ref: 477913	23 Mar 2022	N/A	Valid

		Licence/Permit Status				
Item	Description	Reference No./ License No./ Account No.	Approval Date	Expiry Date	Status	
	Regulation					
2	Waste Disposal Regulation – Billing Account for Disposal of Construction Waste	EPD Ref. No: RS02509 Acc. No.: 7043631	08 Apr 2022	N/A	Valid	
3	Chemical Waste Producer Registration	5213-961-C4701-01	31 May 2022 /31 May 2023*	N/A	Valid	
4	Water Pollution Control Ordinance – Discharge Licence	WT00041885-2022	8 Sep 2022	30 Sep 2027	Valid	
5	Construction Noise Permit	GW-RS0188-23	18 Mar 2023	17 Sep 2023	Valid	

* New Chemical Waste Producer Registration was issued by EPD on 31 May 2023 as Contractor's address has updated.

3 SUMMARY OF IMPACT MONITORING REQUIREMENTS

3.1 GENERAL

- 3.1.1 Only air quality monitoring is required to carry out related to Works contracts 7/WSD/21 during the construction phase to ensure the dust mitigation measures and performance properly implementation.
- 3.1.2 The other environmental monitoring for Works Area of Pui O was related to other Works Contracts and will be implemented by other appointed ET.
- 3.1.3 According to the Review Report on EIA, no changes to the environmental monitoring requirement in the EM&A Manual are proposed for the work of SHW WTW Extension. Air quality monitoring work will be implemented according to the EM&A Manual.

3.2 MONITORING PARAMETERS

- 3.2.1 The EM&A program of construction phase monitoring shall cover the following environmental issues:Air quality;
- 3.2.2 A summary of impact monitoring parameters is presented in *Table 3-1*:

Table 3-1Summary of Monitoring Parameters

Environmental Issue	Parameters
Air Quality	 1-hour TSP by Real-Time Portable Dust Meter(as required in case of complaints); and 24-hour TSP by High Volume Air Sampler.

3.3 MONITORING LOCATIONS

3.3.1 According to the Review Report on EIA, air quality monitoring work should be implemented according to the EM&A Manual. As stated in Section 4 of EM&A Manual, there was only one air quality monitoring station designated under SHW WTW Extension. The air quality monitoring locations is listed in *Table 3-2*.

Table 3-2Designated Air Quality Monitoring Stations

Monitoring Station Identification No	Location
SHWAB	Siu Ho Wan WTW Administration Building

3.4 MONITORING FREQUENCY AND PERIOD

3.4.1 The requirements of impact monitoring are stipulated in *Sections 2.1.9* of the approved EM&A Manual and presented as follows.

<u>Air Quality Monitoring</u>

- 3.4.2 Frequency of impact air quality monitoring is as follows:
 - 1-hour TSP 3 times every six days (as required in case of complaints)
 - 24-hour TSP Once every 6 days during course of works.

3.5 MONITORING EQUIPMENT

<u>Air Quality Monitoring</u>

- 3.5.1 The 24-hour and 1-hour TSP levels shall be measured by following the standard high volume sampling method as set out in the *Title 40 of the Code of Federal Regulations, Chapter 1 (Part 50), Appendix B.* If the ET proposes to use a direct reading dust meter to measure 1-hour TSP levels, it shall submit sufficient information to the IEC to approve.
- 3.5.2 The filter paper of 24-hour TSP measurement shall be determined by HOKLAS accredited laboratory.

3.5.3 All equipment to be used for air quality monitoring are listed in below table.

Table 3-3Air Quality Monitoring Equipment

Equipment	Model		
24-Hr TSP			
High Volume Air Sampler	TISCH High Volume Air Sampler, HVS Model TE-5170*		
Calibration Kit	TISCH Model TE-5025A*		
1-Hour TSP			
Portable Dust Meter	Sibata LD-3B Laser Dust monitor Particle Mass Profiler & Counter / SidePak TM Personal Aerosol Monitor AM510		

* Instrument was used in the Reporting Period and the calibration certificate could be referred in Appendix E.

3.6 MONITORING PROCEDURES

<u>1-hour TSP</u>

- 3.6.1 Operation of the 1-hour TSP meter will follow manufacturer's Operation and Service Manual.
- 3.6.2 The 1-hour TSP monitor, brand named "Sibata LD-3B Laser Dust monitor Particle Mass Profiler & Counter" is a portable, battery-operated laser photometer. The 1-hour TSP meter provides a real time 1-hour TSP measurement based on 900 light scattering. The 1-hour TSP monitor consists of the following:
 - a. A pump to draw sample aerosol through the optic chamber where TSP is measured;
 - b. A sheath air system to isolate the aerosol in the chamber to keep the optics clean for maximum reliability; and
 - c. A built-in data logger compatible with Windows based program to facilitate data collection, analysis and reporting.
- 3.6.3 The 1-hour TSP meter to be used will be within the valid period, calibrated by the manufacturer prior to purchasing. Span check and BG of the instrument will be performed before each monitoring event. A valid calibration certificate is attached in *Appendix E*.

24-hour TSP

- 3.6.4 The equipment used for 24-hour TSP measurement is the High Volume Sampler (hereinafter the "HVS") brand named TISCH, Model TE-5170 TSP High Volume Air Sampler, which complied with *EPA Code of Federal Regulation, Appendix B to Part 50*. The HVS consists of the following:
 - a. An anodized aluminum shelter;
 - b. A 8"x10" stainless steel filter holder;
 - c. A blower motor assembly;
 - d. A continuous flow/pressure recorder;
 - e. A motor speed-voltage control/elapsed time indicator;
 - f. A 7-day mechanical timer, and
 - g. A power supply of 220v/50 Hz
- 3.6.5 For HVS for 24-hour TSP monitoring, the HVS is mounted in a metallic cage with a top for protection and also it is sat on the existing ground or the roof of building. The flow rate of the HVS between 0.6m³/min and 1.7m³/min will be properly set in accordance with the manufacturer's instruction to within the range recommended in *EPA Code of Federal Regulation, Appendix B to Part 50*. Glass Fiber Filter 8" x 10" of TE-653 will be used for 24-Hour TSP monitoring and would be supplied by laboratory. The general procedures of sampling are described as below:-
 - A horizontal platform with appropriate support to secure the samples against gusty wind should be provided;
 - Installed with elapsed-time meter with ± 2 minutes accuracy for 24 hours operation;

- Equipped with a timing/control device with \pm 5 minutes accuracy for 24 hours operation;
- With flow control accuracy for $\pm 2.5\%$ deviation over 24-hour sampling period;
- No two samplers should be placed less than 2 meters apart;
- The distance between the sampler and an obstacle, such as building, must be at least twice the height that the obstacle protrudes above the sample;
- A minimum of 2 meters of separation from any supporting structure, measured horizontally is required;
- Before placing any filter media at the HVS, the power supply will be checked to ensure the sampler work properly;
- The filter paper will be set to align on the screen of HVS to ensure that the gasket formed an air tight seal on the outer edges of the filter. Then filter holder frame will be tightened to the filter hold with swing bolts. The holding pressure should be sufficient to avoid air leakage at the edge.
- The mechanical timer will be set for a sampling period of 24 hours (00:00 mid-night to 00:00 mid-night next day). Information will be recorded on the field data sheet, which would be included the sampling data, starting time, the weather condition at current and the filter paper ID with the initial weight;
- After sampling, the filter paper will be collected and transfer from the filter holder of the HVS to a sealed envelope and sent to a local HOKLAS accredited laboratory for quantifying.
- 3.6.6 All the sampled 24-hour TSP filters will be kept in normal air conditioned room conditions, i.e. 70% HR (Relative Humidity) and 25°C, for six months prior to disposal.
- 3.6.7 The HVS used for 24-hour TSP monitoring will be calibrated before the commencement for sampling, and after in two months interval with the manufacturer's instruction using the NIST-certified standard calibrator (Tisch Calibration Kit Model TE-5025A) to establish a relationship between the follow recorder meter reading in cfm (cubic feet per minute) and the standard flow rate, Qstd, in m^3/min . Motor brushes of HVS will be regularly replaced of about five hundred hours per time. Valid certificates of the calibration kit and HVS are attached in *Appendix E*.

3.7 DERIVATION OF ACTION/LIMIT (A/L) LEVELS

3.7.1 The baseline results form the basis for determining the environmental acceptance criteria for the impact monitoring. According to the approved Environmental Monitoring and Audit Manual, the air quality criteria were set up, namely Action and Limit levels are listed in *Tables 3-4*.

Table 3-4Action and Limit Levels of Air Quality

Monitoring Station	Action Level (µg /m ³)		Limit Level (µg/m ³)	
Monitoring Station	1-hour TSP	24-hour TSP	1-hour TSP	24-hour TSP
SHWAB	291	170	500	260

3.8 METEOROLOGICAL INFORMATION

3.8.1 The meteorological information including wind direction, wind speed, humidity, rainfall, air pressure and temperature is extracted from the Chek Lap Kok Station. Meteorological data are attached in *Appendix J*.

3.9 DATA MANAGEMENT AND DATA QUALITY ASSURANCE / QUALITY CONTROL (QA/QC)

- 3.9.1 All monitoring data were handled by the ET's in-house data recording and management system.
- 3.9.2 The monitoring data recorded in the equipment were downloaded directly from the equipment at each monitoring day or after completion of baseline measurement. The downloaded monitoring data were input into a computerized database properly maintained by the ET. The laboratory results were input directly into the computerized database and checked by personnel other than those who input the data.
- 3.9.3 For monitoring parameters that require laboratory analysis, the local laboratory shall follow the QA/QC requirements as set out under the HOKLAS scheme for the relevant laboratory tests.

4 AIR QUALITY MONITORING

4.1 GENERAL

- 4.1.1 The air quality monitoring schedule is presented in *Appendix* G and the monitoring results are summarised in the following sub-sections.
- 4.1.2 In the reporting Period, no air quality complaint was received, thus no 1-hour TSP monitoring required to conduct according to *Section 2.19* of the approved EM&A Manual.

4.2 AIR MONITORING RESULTS

4.2.1 In the Reporting Period, a total of 5 events 24-hour TSP monitoring were carried out and the monitoring results are summarized in *Table 4-1*. The detailed 24-hour monitoring data are presented in *Appendix H* and the relevant graphical plots are shown in *Appendix I*.

Table 4-1Summary of 24-hour TSP Monitoring Result – SHWAB

24-hour TSP (µg/m³)		
Date	Meas. Result	
5-May-23	36	
11-May-23	59	
17-May-23	27	
23-May-23	76	
29-May-23	93	
Average	58	
(Range)	(27 - 93)	

- 4.2.2 As shown in *Tables 4-1*, all the 24-hour TSP monitoring results were below the Action/Limit Levels. No Notification of Exceedance (NOE) was issued in this Reporting Period.
- 4.2.3 The meteorological data during the impact monitoring days are summarized in *Appendix J*.

5 WASTE MANAGEMENT

5.1 GENERAL WASTE MANAGEMENT

5.1.1 Waste management was carried out in accordance with the Waste Management Section in the Environmental Management Plan for the Contract.

5.2 **RECORDS OF WASTE QUANTITIES**

- 5.2.1 All types of waste arising from the construction works are broadly classified into the following:
 - Insert construction and demolition (C&D) material; and
 - C&D waste.
- 5.2.2 The quantities of waste for disposal in this Reporting Month under the Contract are summarised in *Tables 5-1* and *5-2* and the Waste Flow Table as shown in *Appendix K*. Whenever possible, materials were reused on-site as far as practicable.

Table 5-1Summary of Quantities of Inert C&D Materials for the Contract

Туре	Quantity in Reporting Month	Disposal / Dumping Ground		
Reused in this Contract (Inert) (in T)	0	NA

6 SITE INSPECTIONS

6.1 **REQUIREMENTS**

6.1.1 According to the EM&A Manual, the programme of environmental site inspection shall be formulation by ET Leader. Weekly environmental site inspections were carried out to confirm the environmental performance.

6.2 FINDINGS / DEFICIENCIES DURING THE REPORTING MONTH

6.2.1 In the Reporting Month, joint site inspections to evaluate the site environmental performance were carried out by the representatives of the *PMD*, ET and the *Contractor* on *2*, *9*, *16*, *23 and 30 May 2023*. Joint site inspection with *PMD*, ET, IEC and the *Contractor* was carried out on *16 May 2023*. No non-compliance was recorded.

6.2.2 The findings / deficiencies observed during the weekly site inspections are listed in *Table 6-1*.

Deta Findings / Deficionaios Follow Un Status										
Date	Findings / Deficiencies	Follow-Up Status								
2 May 2023	 The <i>Contractor</i> should place chemical inside drip tray. (OLB) The <i>Contractor</i> should cover the sandy stockpile properly to avoid dust generation. (WT-W7) The <i>Contractor</i> was reminded to maintain the water spraying system properly. 	 The chemical container was placed inside drip tray. The sandy stockpile was covered properly with imprevious sheet. Reminder only. 								
9 May 2023	 Earth material should be removed from haul road. (WTB) The <i>Contractor</i> was reminded to remove any stagnant water on site regularly. 	Earth material was removed.Reminder only.								
	• The <i>Contractor</i> was reminded to keep good housekeeping on site.	• Reminder only.								
16 May 2023	• The <i>Contractor</i> was reminded to remove stagnant water to prevent drain blockage and enhance house-keeping.	• Reminder only.								
23 May 2023	• Stagnant water should be removed after rainy days. (BPS)	• Stagnant water was removed.								
30 May 2023	• The <i>Contractor</i> should place chemical inside drip tray and remove to chemical storage area.	• Chemical containers were removed from site area.								
	 The <i>Contractor</i> was reminded to spray water regularly to reduce dust impact. The <i>Contractor</i> was reminded to 	Reminder only.Reminder only.								
	 The Contractor was reminded to maintain water spraying system. 	• Kenninder onny.								

Table 6-1Site Observations for the Contract

7 ENVIRONMENTAL COMPLAINTS AND NON-COMPLIANCES

7.1 Environmental Complaints, Summons and Prosecutions

- 7.1.1 There was no environmental complaint, prosecution or notification of summons received in the Reporting Month.
- 7.1.2 The statistical summary table of the environmental complaints, summons and prosecution are presented in *Tables 7-1*, 7-2 and 7-3. Detailed complaint log for the Contract is presented in *Appendix L*.

Table 7-1Statistical Summary of Environmental Complaints

Donorting Month	ŀ	Environmental Compla	int Statistics
Reporting Month	Frequency	Cumulative	Project related complaint
24 May 2022 to 30 April 2023	0	0	0
1 to 31 May 2023	0	0	0

Table 7-2 Statistical Summary of Environmental Summons

Reporting Month]	Environmental Summo	ns Statistics

8 IMPLEMENTATION STATUS OF MITIGATION MEASURES

8.1 GENERAL REQUIREMENTS

- 8.1.1 The environmental mitigation measures recommended in the ISEMM in the EM&A Manual covered the issues of dust, noise, water, waste, land contamination and ecology and they are summarised and presented in *Appendix M*.
- 8.1.2 The Contract works under the Project shall be implementing the required environmental mitigation measures according to the EM&A Manual as subject to the site conditions. Environmental mitigation measures generally implemented by the Contract and the implementation status are shown in *Appendix M*.

8.2 TENTATIVE CONSTRUCTION ACTIVITIES IN THE COMING MONTH

- 8.2.1 According to the information provided by the *Contractor*, the major construction activities under the Contract in the coming month are listed below:
 - Concreting works for the structure of BPS at portion BPS-1
 - Installation of DMA units for BPS at portion BPS-1
 - Installation of lateral support and excavation works at WTB
 - Installation of lateral support and excavation works at OLB.
 - Construction of tower crane at OLB.
 - Excavation and pipelaying works for DN1200 watermain.

8.3 KEY ISSUES FOR THE COMING MONTH

- 8.3.1 Special attention should be paid on the potential construction dust impact since most of the construction sites are adjacent to Siu Ho Wan Sewage Treatment Works. The *Contractor* should fully implement the construction dust mitigation measures as appropriately.
- 8.3.2 Due to wet season has approached, the *Contractor* was reminded that all effluent discharge shall fulfill the requirement of Discharge Licence under the Water Pollution Control Ordinance.
- 8.3.3 All other mitigation measures recommended in the Implementation Schedule for Environmental Mitigation Measures of the EM&A Manual should be properly implemented and maintained as far as practicable.

9 CONCLUSIONS AND RECOMMENDATIONS

9.1 CONCLUSIONS

- 9.1.1 As advised by the *Contractor*, the major construction works under Works Contract was commenced on 24 May 2022. This is the *13th* Monthly EM&A Report presenting monitoring results and inspection finding for the Project for the reporting period from *1 to 31 May 2023*.
- 9.1.2 In the Reporting Period, no 24-hour TSP monitoring results triggered the Action/Limit level was recorded. No NOE or the associated corrective actions were therefore issued.
- 9.1.3 In the Reporting Month, joint site inspections to evaluate the site environmental performance had been carried out by the representatives of the *PMD*, ET and the *Contractor* on 2, 9, 16, 23 and 30 May 2023. Joint site inspection with *PMD*, ET, IEC and the *Contractor* was carried out on 16 May 2023. No non-compliance was recorded during the site inspections.
- 9.1.4 In the Reporting Month, no environmental complaint, prosecution or notification of summons was received. In addition, no emergency event related to violation of environmental legislation for illegal dumping and landfilling was received.

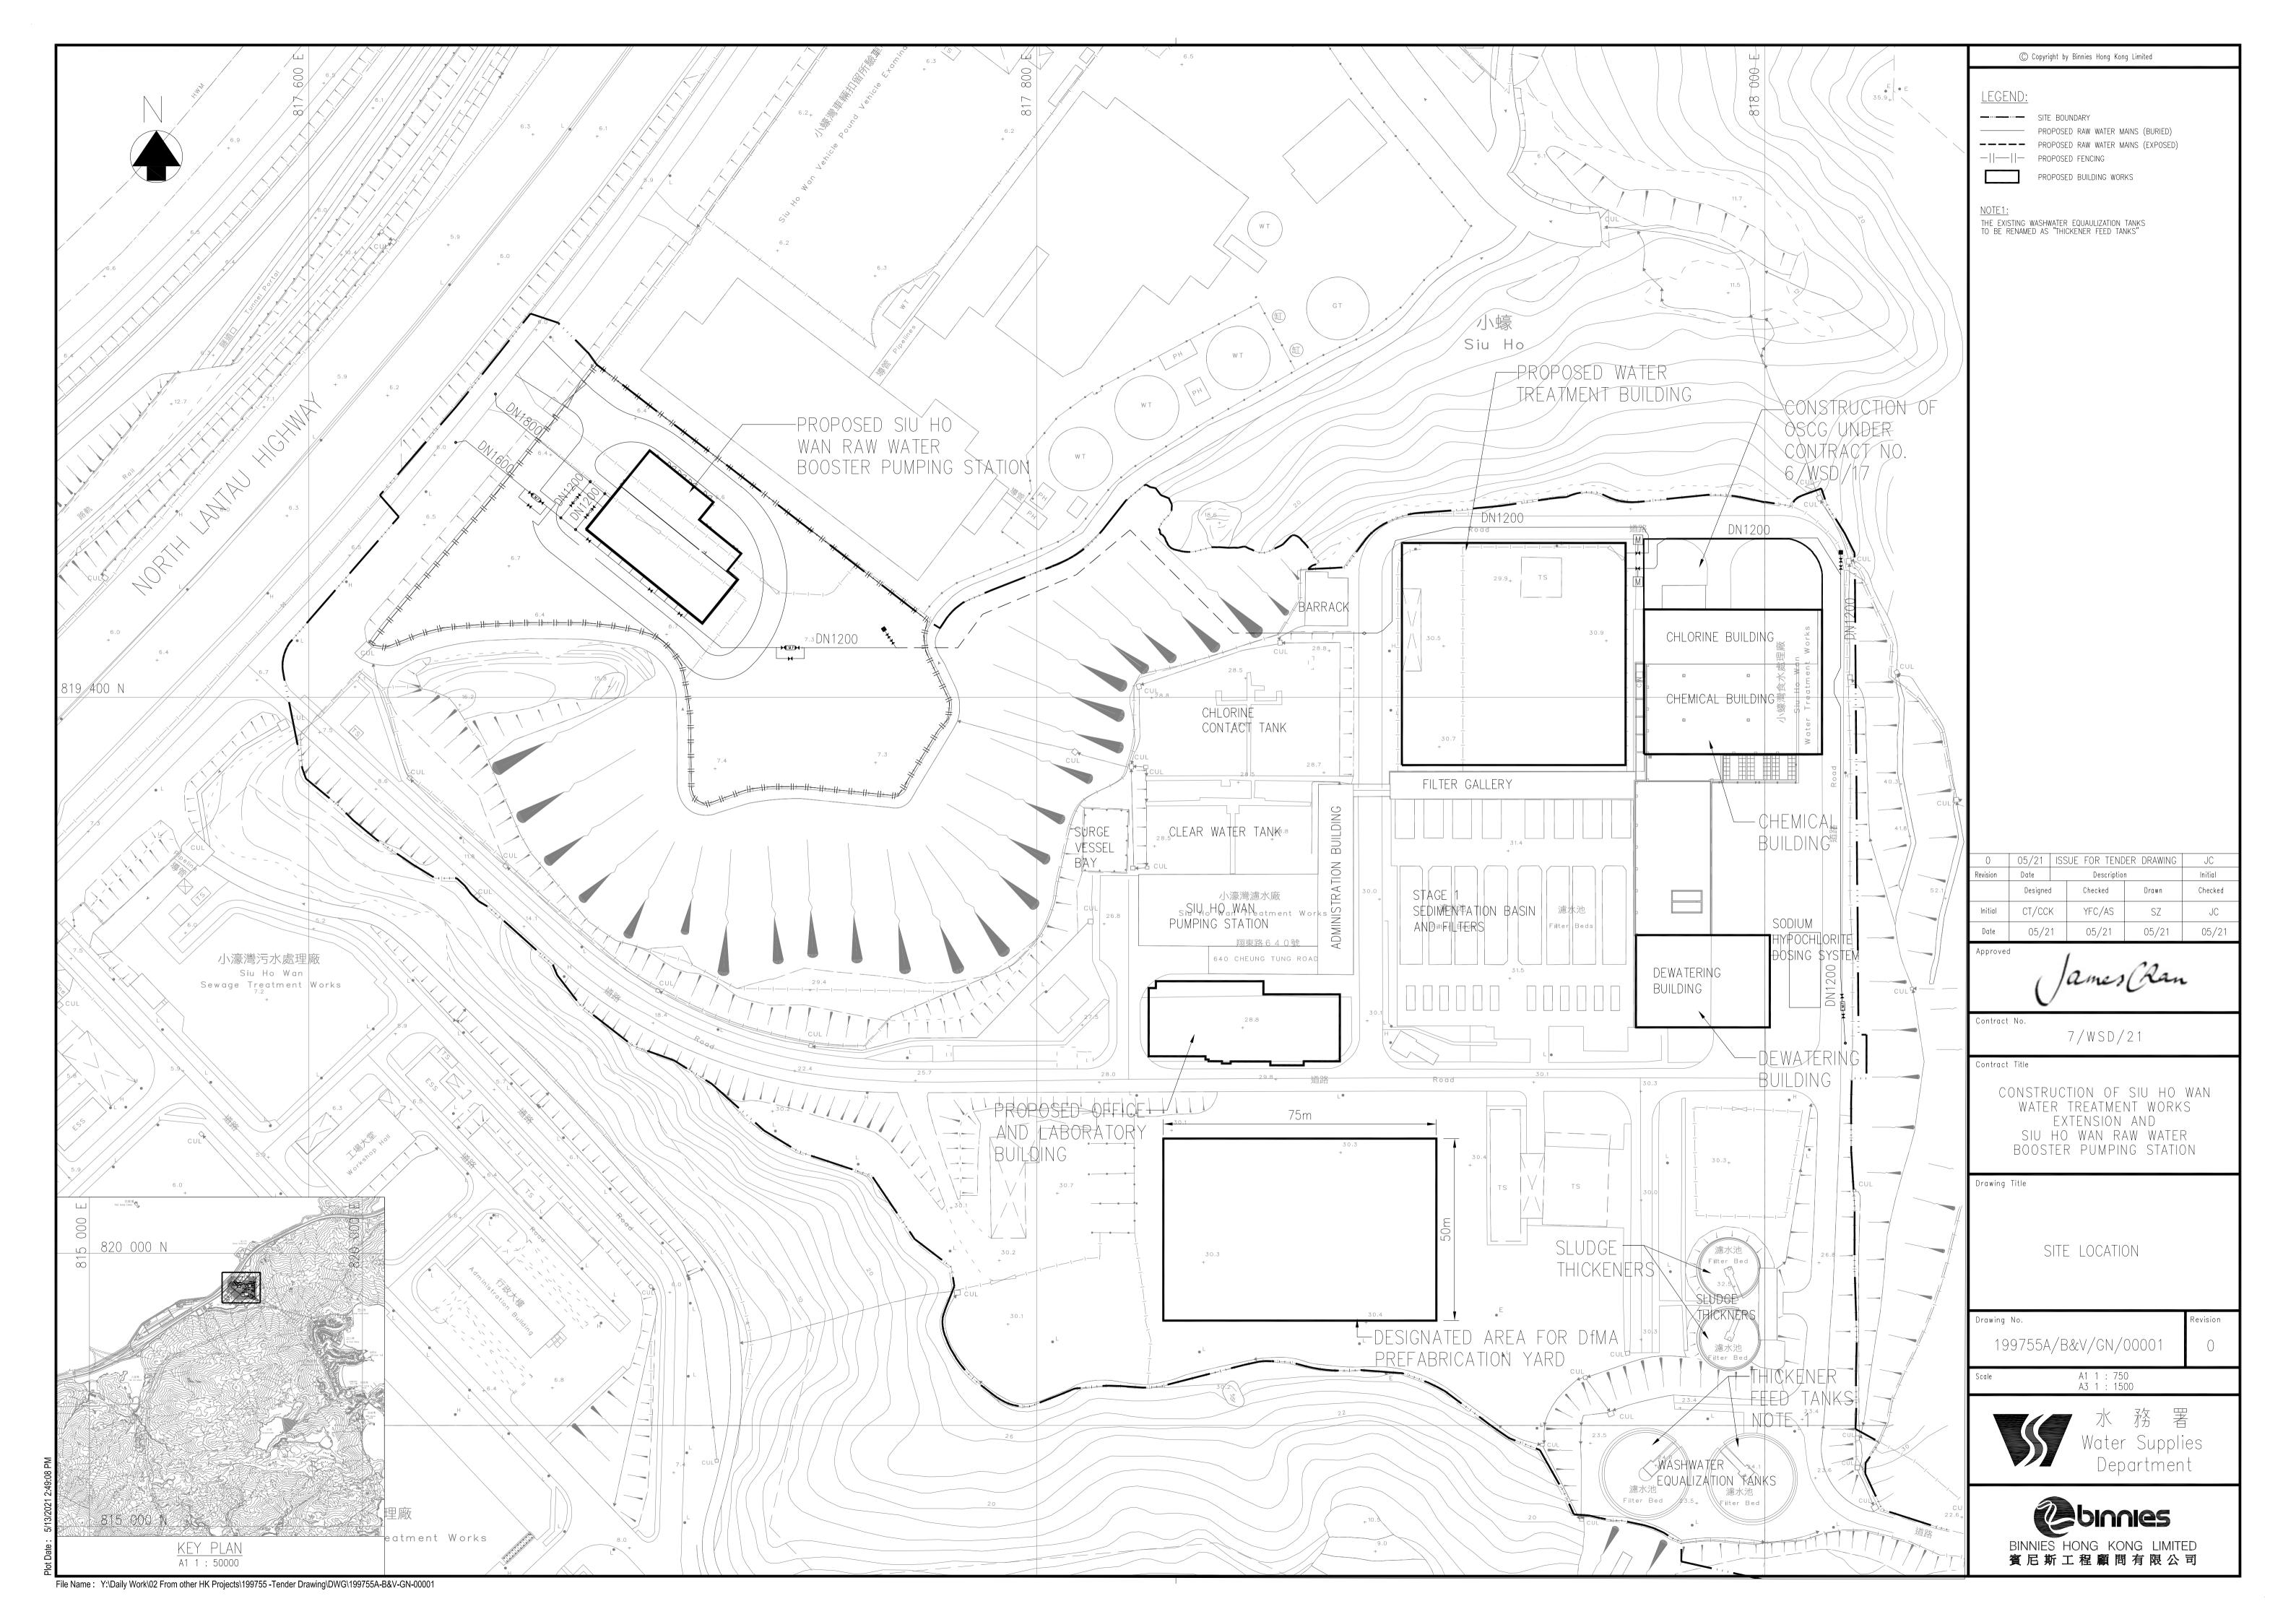

9.2 **RECOMMENDATIONS**

- 9.2.1 Special attention should be paid on the potential construction dust impact since most of the construction sites are adjacent to Siu Ho Wan Sewage Treatment Works. The *Contractor* should fully implement the construction dust mitigation measures as appropriately.
- 9.2.2 Due to wet season has approached, the *Contractor* was reminded that all effluent discharge shall fulfill the requirement of Discharge Licence under the Water Pollution Control Ordinance.
- 9.2.3 All other mitigation measures recommended in the Implementation Schedule for Environmental Mitigation Measures of the EM&A Manual should be properly implemented and maintained as far as practicable.

Implementation Schedule for Environmental Mitigation Measures

Environmental Mitigation Implementation Schedule for Air Quality Control

EIA	Environmental Protection Measures	Location/Tim	Implementa	Implem	entation S	Stages*	Relevant Legislation	
Ref		ing	tion Agent	D	С	0	& Guidelines	
Construction	Phase (Air Quality Control)							
\$3.8	 Dust mitigation measures stipulated in the Air Pollution Control (Construction Dust) Regulation shall be incorporated to control dust emission. Notice shall be given to authority prior to commencing of work. Relevant control measures include: watering on the work sites at Siu Ho Wan WTW twice a day; skip hoist for material transport shall be totally enclosed by impervious sheeting; vehicle washing facilities shall be provided at every vehicle exit point; the area where vehicle washing takes place and the section of the road between the washing facilities and the exit point shall be paved with concrete, bituminous materials or hardcores; every main haul road shall be scaled with concrete and kept clear of dusty materials or sprayed with water so as to maintain the entire road surface wet; every stock of more than 20 bags of cement shall be covered entirely by impervious sheeting placed in an area sheltered on the top and the three sides; all dusty materials shall be sprayed with water prior to any loading, unloading or transfer operation so as to maintain the dusty materials wet; every vehicle shall be washed to remove any dusty materials from its body and wheels before leaving the construction sites; the dusty materials stockpiled on site shall be covered; and the load of dusty materials carried by vehicle leaving a construction site shall be covered entirely by clean impervious sheeting to ensure dust materials do not leak from the vehicle. 	Work site / during construction period.	Contractor		V		Air Pollution Control (Construction Dust) Regulation	
Operation Ph	nase(Air Quality)		1				1	
NA	NA	NA	NA	NA	NA	NA	NA	
Construction	Phase (Noise Control)							
S4.8.1	Use of silenced PME	Work site close to all NSRs	Contractor		1		NCO, EIAO-TM	
S4.8.6	 Good Site Practices: Only well-maintained plant should be operated on-site and plant should be serviced regularly during the construction program. Mobile plant, if any, should be sited as far away from NSRs as possible. Machines and plant (such as trucks) that may be in intermittent use should be shut down between work periods or should be throttled down to a minimum. Plant known to emit noise strongly in one direction should, wherever possible, be orientated so that the noise is directed away from the nearby NSRs. Material stockpiles and other structures should be effectively utilised, wherever practicable, in screening noise from on-site construction activities. Silencers or mufflers on construction equipment should be utilised and should be properly maintained during the construction programme. 	Work site close to all NSRs / throughout the construction period.	Contractor		1		NCO, EIAO-TM	

WSD Contract No.: 7/WSD/21 - Construction of Siu Ho Wan Water Treatment Works Extension and Siu Ho Wan Raw Water Booster Pumping Station

Monthly Environmental Impact Monitoring and Audit Report (May 2023)

EIA	Environmental Protection Measures	Location/Tim	Implementa	Implementation Stag		Stages*	Relevant Legislation	
Ref		ing	tion Agent	Ď	С	0	& Guidelines	
Operation P	hase(Noise Control)	·			•			
NA	NA	NA	NA	NA	NA	NA	NA	
Construction	1 Phase (Water Quality Control)							
\$5.7.2	 Construction Site Runoff and Drainage Before commencing any site formation work, all sewer and drainage connections shall be sealed to prevent debris, soil, sand etc. from entering public sewers/drains. Sand/silt removal facilities such as sand traps, silt traps and sediment basins shall be provided to remove sand/silt particles from runoff to meet the requirements of the Technical Memorandum standard under the Water Pollution Control Ordinance. The design of silt removal facilities shall be based on the guidelines provided in ProPECC PN 1/94. All drainage facilities and erosion and sediment control structures shall be inspected monthly and maintained to ensure proper and efficient operation at all times and particularly during rainstorms. Water pumped out from foundation excavations shall be discharged into silt removal facilities. Exposed soil surfaces shall be protected by paving or fill material as soon as possible to reduce the potential of soil erosion. Open stockpiles of construction materials or construction wastes on-site of more 	Work site / During the construction period	Contractor		Ň		ProPECC PN 1/94; WPCO	
	than 50m3 shall be covered with tarpaulin or similar fabric during rainstorms.							
\$5.7.3	 General Construction Activities Debris and rubbish generated on-site shall be collected, handled and disposed of properly to avoid entering the nearby watercourses and storm water drains. Stockpiles of cement and other construction materials shall be kept covered when not being used. 	Work site / During the construction period	Contractor		√		ProPECC PN 1/94; WPCO	
S5.7.4	• Oils and fuels shall only be used and stored in designated areas which have pollution prevention facilities. All fuel tanks and storage areas shall be provided with locks and be sited on sealed areas, within bunds of a capacity equal to 110% of the storage capacity of the largest tank. The bund shall be drained of rainwater after a rain event.	Work site / During the construction period	Contractor		1			
\$5.7.5	 Sewage from Construction Workforce Temporary sanitary facilities, such as portable chemical toilets, shall be employed on-site. A licensed contractor shall be responsible for appropriate disposal and maintenance of these facilities. 	Work site / During the construction period	Contractor		1		WPCO	
Operation P	hase(Water Quality Control)							
NA	NA	NA	NA	NA	NA	NA	NA	
Construction	n Phase (Ecology)							
S.6.9.3	 Mitigation to minimise impacts on vegetation in woodland All trees shall be preserved as far as possible, especially species of high conservation or amenity value. Recommendations to be provided in the Tree Survey Report to mitigate impacts on trees shall be followed. Where trees are to be preserved in-situ, but are likely to be disturbed from works activities, protective fencing/hoarding shall be carefully set up around the affected trees (refer to 	Worksiteparticularlywoodland/Duringdesignphaseandconstructionperiod	WSD/ Contractor	V	1		EIAO

	Station in order to visually merge the proposed structures into the surrounding landscape.						
Operation I	Phase(Landscape and Visual Impact)						

WSD Contract No.: 7/WSD/21 - Construction of Siu Ho Wan Water Treatment Works Extension and Siu Ho Wan Raw Water Booster Pumping Station

Monthly Environmental Impact Monitoring and Audit Report (May 2023)

EIA	Environmental Protection Measures	Location/Tim	Implementa	Implementation Stages*			Relevant Legislation	
Ref		ing	tion Agent	D	С	0	& Guidelines	
S7.9	 New compensatory planting works shall be carried out as early as possible in the construction period which allow maximum time for establishment and more mature trees when the works completed. Landscape or compensatory planting shall be provided where appropriate for enhancing greening and achieving visual screening. In this aspect, compensatory tree planting shall be considered. Selection of plant species shall match with the surrounding vegetation type and form for consistency of landscape resources and visual comfort, for matching with the local habitat. Tree planting shall be firstly considered when the amenity area or slope is feasible for planting trees so as to provide visual screening. 	During operation phase	Contractor			V	EIAO-TM	
S7.9	 Planting area of approximately 2000 to 3000mm wide where fast growing tall trees with dense foliage shall be provided along the site boundary of Siu Ho Wan Raw Water Booster Pumping Station for visual screening. For planting close to or surrounded by natural terrain, compensatory planting should be arranged in a semi natural manner where feasible in order to blend the new planting into natural environment. The newly planted trees, shrubs and grassed areas are maintained throughout the first 12 months of the operation stage. 	During operation phase	Contractor			V	EIAO-TM	
Waste Mana	gement							
\$10.5.1 - \$10.5.3	 Good Site Practices Good site practices during the construction activities include: Nomination of approved personnel, such as a site manager, to be responsible for good site practices and making arrangements for collection of all wastes generated at the site and effective disposal to an appropriate facility. Training of site personnel in proper waste management and chemical waste handling procedures. Provision of sufficient waste disposal points and regular collection for disposal. Appropriate measures to minimise windblown litter and dust during transportation of waste by either covering trucks or by transporting wastes in enclosed containers. Regular cleaning and maintenance programme for drainage systems, sumps and oil interceptors. A Waste Management Plan shall be prepared and submitted to the Engineer for approval. One may make reference to ETWB TCW No. 15/2003 for details. A recording system for the amount of wastes generated, recycled and disposed (including the disposal sites) shall be proposed. In order to monitor the disposal of C&D material at public filling areas and to control fly tipping, a trip-ticket system shall be included as one of the contractual requirements to be implemented by an Environmental Team undertaking the Environmental Monitoring and Audit work. One may make reference to WBTC No. 21/2002 for details. 	Work site / During the construction period	Contractor				Waste Disposal Ordinance (Cap.54) WBTC No.21/2002, ETWB TCW No. 15/2003	
S10.5.4	Waste Reduction Measures Waste reduction is best achieved at the planning and design stage, as well as by ensuring the implementation of good site practices. Recommendations to achieve waste reduction	Work site / During planning & design stage, and construction	WSD/Contracto r	V	1		WBTC No.4/98, ETWB TCW No. 15/2003	

Monthly Environmental Impact Monitoring and Audit Report (May 2023)

EIA	Environmental Protection Measures	Location/Tim	Implementa	Implem	entation S	tages*	Relevant Legislation
Ref		ing	tion Agent	Ď	С	0	& Guidelines
	 include: Segregation and storage of different types of waste in different containers, skips or stockpiles to enhance reuse or recycling of materials and their proper disposal. Separate labelled bins shall be provided to segregate aluminium cans from other general refuse generated by the work force, and to encourage collection of by individual collectors. Any unused chemicals or those with remaining functional capacity shall be recycled. Maximising the use of reusable steel formwork to reduce the amount of C&D material. Proper storage and site practices to minimise the potential for damage or contamination of construction materials. Plan and stock construction materials carefully to minimise amount of waste 	stage					
S10.5.9	generated and avoid unnecessary generation of waste. <i>General Refuse</i> General refuse shall be stored in enclosed bins or compaction units separate from C&D material. A reputable waste collector shall be employed by the contractor to remove general refuse from the site, separately from C&D material.	Work site / During the construction period	Contractor		1		Public Health and Municipal Services Ordinance (Cap. 132)
\$10.5.7	Construction & Demolition (C&D) Material When disposing C&D material at a public filling area, it shall be noted that the material shall only consist of soil, rock, concrete, brick, cement plaster/mortar, inert building debris, aggregates and asphalt. The material shall be free from marine mud, household refuse, plastic, metals, industrial and chemical waste, animal and vegetable matter, and other material considered to be unsuitable by the Filling Supervisor.	Work site / During the construction period	Contractor		1		WBTC No. 4/98, 21/2002, 25/99, 12/2000 ETWB TCW No. 15/2003
S10.5.8	<i>Chemical Wastes</i> If chemical wastes are produced at the construction site, the <i>Contractor</i> would be required to register with the EPD as a Chemical Waste Producer and to follow the guidelines stated in the Code of Practice on the Packaging, Labelling and Storage of Chemical Wastes. Good quality containers compatible with the chemical wastes shall be used. Appropriate labels shall be securely attached on each chemical waste container indicating the corresponding chemical characteristics of the chemical waste, such as explosives, flammable, oxidizing, irritant, toxic, harmful, corrosive, etc. The Contractor shall use a licensed collector to transport and dispose of the chemical wastes generated at the Chemical Waste Treatment Centre at Tsing Yi, or other licenced facility, in accordance with the Waste Disposal (Chemical Waste) (General) Regulation. All chemical wastes shall be removed from the waterworks installations at the first instance.	Work site / During the construction period	Contractor		V
