### **EXECUTIVE SUMMARY**

The construction works of CCGT Unit No. 2 of the Additional Gas-fired Generation Units Project at the Black Point Power Station commenced on 4 June 2020. This is the 76<sup>th</sup> monthly Environmental Monitoring and Audit (EM&A) report presenting the EM&A works carried out during the period from 1 to 31 March 2023 for CCGT Unit No. 2 in accordance with the EM&A Manual and the requirements of EP-507/2016/D and FEP-04/507/2016/D.

# Summary of the Construction Works undertaken during the Reporting Month

The major construction works undertaken during the reporting month include:

### **CCGT Unit No. 2**

- Site Preparation and Mobilization.
- Concreting for permanent structures and plinths.
- Rebar works and Formwork installation.
- Blinding works.
- Backfilling of trench for pipe installation
- Pressure Test for PAB piping.
- Shipment for delivery.

# **Environmental Site Inspection**

For CCGT Unit No.2, joint weekly site inspections were conducted by representatives of the Contractors, CAPCO Project Team and ET on 1, 8, 15, 20 and 30 March 2023. The representative of the IEC joined the site inspection on 8 March 2023. Details of the audit findings and implementation status are presented in **Section 6**.

# **Environmental Exceedance/Non-conformance/Complaint/Summons and Prosecution**

For CCGT Unit No.2:

- No non-compliance event was recorded during the reporting month.
- No complaint was received during the reporting period.
- No summon or prosecution was received in this reporting period.

# INSTALLATION OF ADDITIONAL GAS-FIRED GENERATION UNIT (CCGT UNIT NO.2) AT THE BLACK POINT POWER STATION

Monthly EM&A Report No.76

# **Upcoming Works for the Next Reporting Period**

The major construction works to be undertaken for CCGT Unit No. 2 in the next reporting month include:

# **CCGT Unit No. 2**

- Mobilization and setting up.
- Concreting for permanent structures.
- Rebar works and Formwork installation and foundation works & pits.
- Pressure testing for PAB pipe.
- Casing installation.
- Shipment for delivery.
- Metal works erection and installation.

# 1. INTRODUCTION

The Castle Peak Power Company Limited (CAPCO) is a joint venture between CLP Power Hong Kong Limited (CLP) and China Southern Power Grid Company Limited with CLP as the operator. ERM-Hong Kong, Limited (ERM) and Mott MacDonald Hong Kong Limited were appointed by CAPCO as the Environmental Team (ET) and the Independent Environmental Checker (IEC), respectively, to undertake the Environmental Monitoring and Audit (EM&A) activities for the installation of CCGT Unit No. 2 of the Additional Gas-fired Generation Units Project at the Black Point Power Station (BPPS) ("the Project").

# 1.1 Purpose of the Report

This is the 76<sup>th</sup> EM&A report which summarises the audit findings during the reporting period from 1 to 31 March 2023 for CCGT Unit No. 2.

# 1.2 Structure of the Report

Following this introductory section, the remainder of this *Monthly EM&A Report* is organised as follows:

- Section 2 summarises the background and scope of the project, site description, project
  organisation and contact details, construction programme, construction works undertaken and
  status of the Environmental Permits/Licenses during the reporting period;
- Section 3 presents the environmental monitoring requirements for the Project;
- Section 4 summarises the implementation of environmental protection measures during the reporting period;
- Section 5 summarises the monitoring results obtained in the reporting period;
- Section 6 summarises the audit findings of the weekly site inspections undertaken within the reporting period;
- Section 7 summarises any monitoring exceedance, environmental complaints and summons within the reporting period;
- Section 8 summarises the construction activities and the forecast of environmental impact for the next reporting month; and
- Section 9 provides the conclusion of this Monthly EM&A Report.

# 2. PROJECT INFORMATION

# 2.1 Background

The scope of the Project involves the phased construction and operation of up to two additional combined cycle gas turbine (CCGT) units (with an installed capacity of up to 1,200 MW) at the BPPS. The additional generation units will be of CCGT configuration using natural gas as the primary fuel. It is a Designated Project under the *Environmental Impact Assessment Ordinance* (Cap. 499) (EIAO). The construction of CCGT Unit No. 1 was completed on 31 May 2021. The current EM&A Programme includes CCGT Unit No. 2.

An EIA of the Additional Gas-fired Generation Units Project was prepared in accordance with the *EIA Study Brief* (No. ESB-286/2015) and the *Technical Memorandum of the Environmental Impact Assessment Process* (*EIAO-TM*) and submitted under the EIAO in February 2016 with an Environmental Permit (EP-507/2016) (EP) granted on 14 June 2016.

An application for Variation of Environmental Permit (No. VEP-575/2020) was submitted to EPD on 30 March 2020 to include CCGT Unit No. 2 and the Variation of Environmental Permit (EP-507/2016/C) was granted on 27 April 2020.

Application for Further Environmental Permit (FEP-201/2020) was submitted to EPD on 3 August 2020 and the Further Environmental Permit (FEP-03/507/2016/C) was granted to the Contractor, Gammon Engineering & Construction Company Limited, of the CCGT Unit No. 2 on 28 August 2020. Further Environmental Permit (FEP-04/507/2016/C) was granted to the Contractor, Siemens Energy Limited, of the CCGT Unit No. 2 on 6 August 2021. The Contractor, Gammon Engineering & Construction Company Limited, had completed the early civil works, and the application for surrender of FEP (FEP-03/507/2016/C) was submitted to EPD on 25 November 2021 and approved on 30 November 2021.

Applications for Variation of Environmental Permits were submitted to EPD on 30 November 2021 to cater for the proposed changes of Project site area and cooling tower. The Variation of Environmental Permit (EP-507/2016/D) was granted on 21 December 2021 and the Further Environmental Permit (FEP-04/507/2016/D) was granted to the Contractor, Siemens Energy Limited, of the CCGT Unit No. 2 on 21 December 2021.

# 2.2 General Site Description

The proposed location for the Project is within the existing boundaries of the BPPS site. The size of the land reserved for the additional generation units and the associated facilities (the Project Site) is about 37,300 m<sup>2</sup>. Construction works for CCGT Unit No.2 are currently ongoing at the Project Site.

The location plan of key Project components for CCGT Unit No. 2 is shown in *Appendix A*.

# 2.3 Construction Programme and Activities

A summary of the major construction activities undertaken in this reporting period is shown in *Table* **2.1**. The construction programme for CCGT Unit No. 2 is presented in *Appendix B*.

# Table 2.1 Summary of the Construction Activities Undertaken during the Reporting Month

### **CCGT Unit No. 2**

- Site Preparation and Mobilization.
- Concreting for permanent structures and plinths.
- Rebar works and Formwork installation.
- Blinding works.
- Backfilling of trench for pipe installation
- Pressure Test for PAB piping.
- Shipment for delivery.

# 2.4 Project Organisation

The project organisational chart and contact details for CCGT Unit No. 2 are shown in Appendix C.

# 2.5 Status of Environmental Licenses, Notification and Permits

A summary of the valid permits, licences, and/or notifications on environmental protection for CCGT Unit No.2 is presented in *Table 2.2*.

Table 2.2 Summary of the Status of Valid Environmental Licence, Notification, Permit and Documentations for CCGT Unit No. 2

| Permit/Licences/Notification                                                     | Reference                | Validity Period              | Remarks                                          |

# INSTALLATION OF ADDITIONAL GAS-FIRED GENERATION UNIT (CCGT UNIT NO.2) AT THE BLACK POINT POWER STATION

Monthly EM&A Report No.76

# 3. ENVIRONMENTAL MONITORING REQUIREMENT

# 3.1 Water Quality Monitoring

In accordance with the EM&A Manual, monitoring works are required at a frequency of once per week on the first year of commissioning of the CCGT Unit No.2. The monitoring details including monitoring requirement, locations of monitoring stations will be confirmed and approved by EPD before commissioning of the CCGT Unit No.2.

# 4. IMPLEMENTATION STATUS OF THE ENVIRONMENTAL PROTECTION REQUIREMENTS

# 4.1 Submissions under the Project

The Contractors have implemented all the environmental mitigation measures and requirements as stated in the EIA Report, Environmental Permit (EP) and EM&A Manual for the installation of CCGT Unit No. 2.

The implementation status of the environmental mitigation measures for CCGT Unit No.2 during the reporting period is summarised in *Appendix D*. The status of the required submissions under the EP and EM&A Manual for the Project is presented in *Table 4.1*.

Table 4.1 Status of Required Submission under the CCGT Unit No. 2

| EP Condition                                                                     | Submission                             | Submission Date |
|----------------------------------------------------------------------------------|----------------------------------------|-----------------|
| Condition 3.2 under Environmental Permit No. EP-507/2016/D and FEP-04/507/2016/D | 75 <sup>th</sup> Monthly EM&A Report   | 14 March 2023   |
| Section 15.1 &15.5 of EM&A Manual (AEIAR-197/2016)                               | 25 <sup>th</sup> Quarterly EM&A Report | 21 March 2023   |

# 4.2 Marine Vessel Operation

One vessel for transport of equipment and materials from Siemens were operated on 13 March 2023. In accordance with the Vessel Control Plan prepared for the Project under Condition 2.4 of the EP, an environmental briefing to vessel operators was conducted prior to the vessel operations. The environmental briefing has included the following content:

- Requirements under the EP and Vessel Control Plan;
- General education on local cetaceans;
- Predefined and regular marine travel routes for this Project;
- Vessel speed limit within designated areas and areas identified as high presence of Indo-Pacific humpback dolphin;
- Guidelines for safe vessel operation in the presence of cetaceans;
- Guidelines on effluent /wastewater handling from vessels to prevent avoidable water quality impacts; and
- Policy of no dumping of rubbish, food, oil, or chemicals from vessels.

Details of the monitoring method and procedures have been agreed with the IEC before implementation and communicated with the vessel operators. Warning will be noticed to the vessel operators if the predefined and regular marine travel route is not followed. The record of marine travel routes of the works vessels was provided by the vessel operators for inspection and monitoring purposes. There was no major observation and no non-compliance was recorded.

# 5. MONITORING RESULTS

# **5.1** Waste Management

The waste generated from this Project includes inert construction and demolition (C&D) materials, and non-inert C&D materials. Non-inert C&D materials are made up of general refuse and recyclable wastes such as plastics and paper/cardboard packaging waste. Steel materials generated from the project are also grouped into non-inert C&D materials as the materials were not disposed of with other inert C&D materials.

With reference to relevant handling records and trip tickets of CCGT Unit No. 2, the quantities of different types of waste generated in the reporting month are summarised in *Table 5.1*. Details of waste management data are presented in *Appendix E*.

Table 5.1 Quantities of Waste Generated from CCGT Unit No. 2

| Reporting  |                          |             | Quantity                       |                  |               |                |  |

| March 2023 | 0                        | 0           | 0.076                          | 0.004            | 0.005         | 0.016          |  |

### Notes:

- (a) Inert C&D materials include bricks, concrete, building debris, rubble and excavated spoil.
- (b) The inert C&D materials generated from the Project were sent to Tseung Kwan O Area 137 Fill Bank during the reporting month.
- (c) The general refuse generated from the Project was sent to WENT landfill during the reporting month.
- (d) Chemical waste includes waste oil and spent pipes with lubricating oil. It is assumed density of waste oil to be 0.8 kg/L.
- (e) The cut-off date for waste management data is 31 March 2023.

### 6. ENVIRONMENTAL SITE INSPECTION

For CCGT Unit No.2, joint weekly site inspections were conducted by representatives of the Contractors, CAPCO Project Team and ET on 1, 8, 15, 20 and 30 March 2023. The representative of the IEC joined the site inspection on 8 March 2023. No non-compliance was recorded during the site inspections.

Findings and recommendations for the site inspection in this reporting month are summarised in *Table 6.1*.

Table 6.1 Summary of the findings and recommendation for the site inspection in the Reporting Month

| Month      | Date          | Findings and Recommendations                                                                                                |
|------------|---------------|-----------------------------------------------------------------------------------------------------------------------------|
| March 2023 | 1 March 2023  | There were no major observations.                                                                                           |
|            | 8 March 2023  | The Contractor was reminded to cover the stockpile of dusty materials by impervious sheet.                                  |
|            |               | The Contractor was reminded to store the general refuse properly in enclosed bins/waste skips.                              |
|            |               | The Contractor was reminded to remove the general refuse from waste skips for disposal from time to time.                   |
|            |               | Regarding the plant audit, update of tree label and close monitoring by CAPCO were recommended.                             |
|            | 15 March 2023 | There were no major observations.                                                                                           |
|            | 20 March 2023 | There were no major observations.                                                                                           |
|            | 30 March 2023 | The Contractor was reminded to remove the rainwater entered and incompatible materials from the storage area for chemicals. |

All follow-up actions requested by ET and IEC during the site inspections were undertaken as reported by CAPCO and the Contractor. The abovementioned environmental issues had been addressed and mitigated during the reporting period.

# 7. ENVIRONMENTAL NON-CONFORMANCE

# 7.1 Summary of Monitoring Exceedance

No environmental monitoring is required during construction of CCGT Unit No.2.

# 7.2 Summary of Environmental Non-compliance

No non-compliance event was recorded during the reporting month for CCGT Unit No.2.

# 7.3 Summary of Environmental Compliant

No environmental complaint was received during the reporting month for CCGT Unit No.2.

# 7.4 Summary of Environmental Summon and Successful Prosecution

No summon or prosecution was received during the reporting month for CCGT Unit No.2.

# 8. UPCOMING WORKS FOR THE NEXT REPORTING PERIOD

# 8.1 Construction Activities for the Coming Month

Works to be undertaken for CCGT Unit No. 2 in the next reporting month are summarised in *Table* 8.1

# Table 8.1 Construction Works to be undertaken in the Next Reporting Month

# **CCGT Unit No. 2**

- Mobilization and setting up.
- Concreting for permanent structures.
- Rebar works and Formwork installation and foundation works & pits.
- Pressure testing for PAB pipe.
- Casing installation.
- Shipment for delivery.
- Metal works erection and installation.

Potential environmental impacts arising from the above construction activities are mainly associated with dust, wastewater treatment and waste management.

# 8.2 Construction Programme for the Next Month

The construction programme for CCGT Unit No. 2 for the next reporting month is presented in *Appendix B* respectively.

# INSTALLATION OF ADDITIONAL GAS-FIRED GENERATION UNIT (CCGT UNIT NO.2) AT THE BLACK POINT POWER STATION

Monthly EM&A Report No.76

### 9. CONCLUSIONS

This 76<sup>th</sup> monthly Environmental Monitoring and Audit (EM&A) Report presents the EM&A works carried out during the period from 1 to 31 March 2023 for CCGT Unit No. 2 in accordance with the EM&A Manual and the requirements of EP-507/2016/D and FEP-04/507/2016/D.

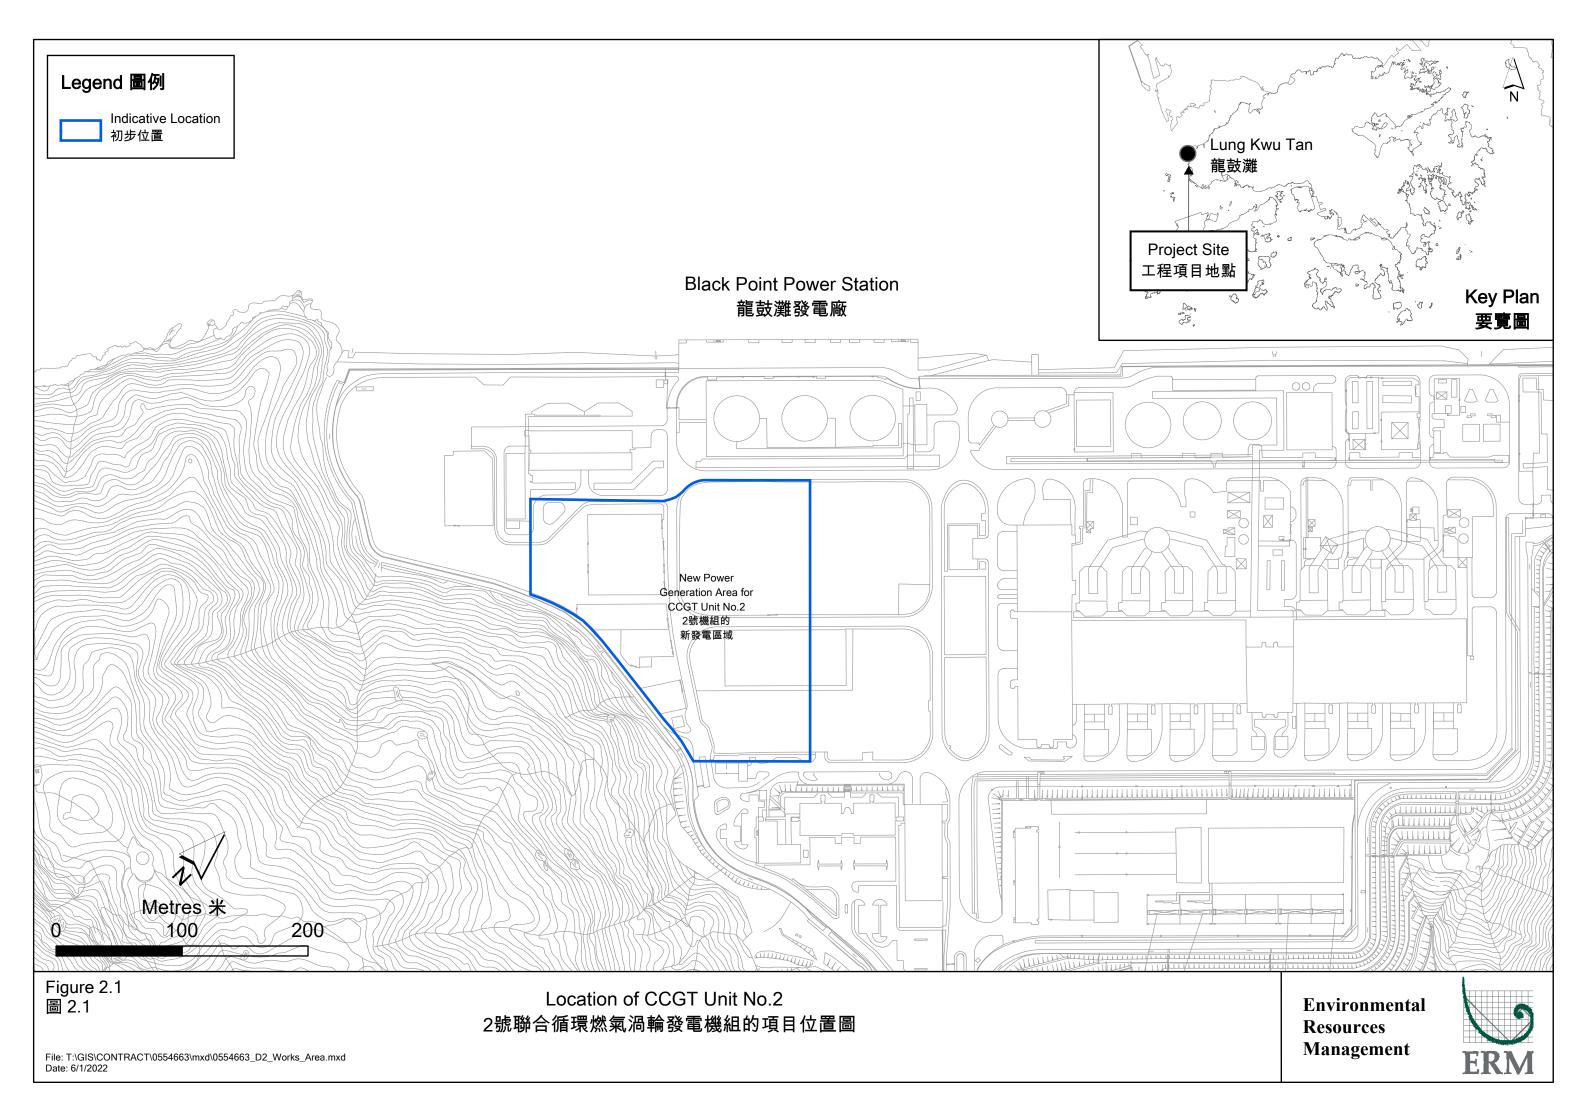

No non-compliance event was recorded during the reporting month.

No environmental complaint, summon or prosecution was received during the reporting month.

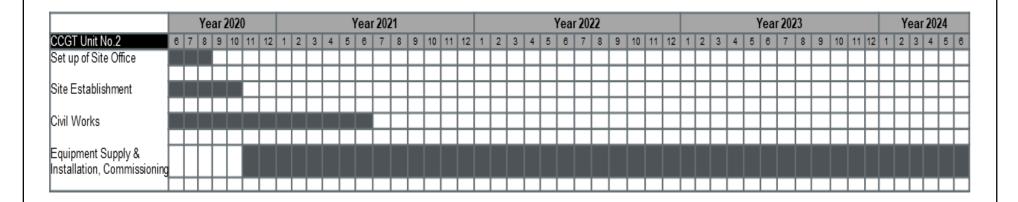

The Contractor have implemented possible and feasible mitigation measures to mitigate the potential environmental impacts during construction. The ET will continue to keep track of the EM&A programme to ensure compliance of environmental requirements and the effectiveness and efficiency of the mitigation measures implemented. If necessary, the Contractor will provide more mitigation measures to further alleviate the impacts.

# **Notes:**

- (1) Inert C&D materials include bricks, concrete, building debris, rubble and excavated spoil.
- (2) Plastics refer to plastic bottles/containers, plastic sheets/foam form packaging material.
- (3) Density Assumption: 1.6(kg/l) for Public Fill and 0.9(kg/l) for General Refuse.
- (4) Chemical waste includes waste oil. Density of waste oil is assumed to be 0.8 kg/L.
- (5) Density of broken concrete is assumed to be  $2.5 \text{ ton/m}^3$ .
- (6) The cut-off date for waste management data is 31 March 2023.
