Date: 13 March 2024

Attention: Mr Felix Yu

**BY EMAIL & POST**  
**(email: csyu03@dsd.gov.hk)**

Dear Sirs

Contract No. CPW 02/2023  
Independent Environmental Checker Services for  
Relocation of Sha Tin Sewage Treatment Works to Caverns  
Verification of Monthly EM&A Report (February 2024)

We refer to the email of 11 March 2024 attaching Monthly EM&A Report (February 2024) for the captioned project prepared by the ET.

I have no comment and hereby verify the captioned report in accordance with Clause 3.5 of the Environmental Permit no. EP-533/2017/A.

Should you have any queries regarding the above, please do not hesitate to contact the undersigned on 2618 2831.

Yours faithfully  
ANewR CONSULTING LIMITED

Louis Kwan  
Independent Environmental Checker

KSYL/lsm

# Document Control

## Document Information

Project Title	Contract No. CPW 01/2023 for Relocation of Sha Tin Sewage Treatment Works to Caverns
Document Title	Monthly Environmental Monitoring & Audit Report – February 2024
Fugro Project No.	0039/23
Fugro Document No.	0039/23/ED/0235
Issue Number	00

## Client Information

Client	Drainage Services Department
Client Address	44/F, Revenue Tower, 5 Gloucester Road, Wan Chai, Hong Kong
Client Contact	Mr Felix C S Yu

## Project Team

Initials	Name	Role	Signature
WS	Wingo So	Environmental Team Leader	
CL	Calvin Leung	Deputy Environmental Team Leader	
TW	Toby Wan	Deputy Environmental Team Leader

## EXECUTIVE SUMMARY

- i. This is the Environmental Monitoring and Audit (EM&A) Monthly Report of Relocation of Sha Tin Sewage Treatment Works to Caverns – Site Preparation and Access Tunnel Construction under Environmental Permit no. EP-533/2017/A (Hereafter as “the Project”). This is the 60<sup>th</sup> EM&A report presenting the environmental monitoring findings and information recorded during the period of 1 February to 29 February 2024. The cut-off date of reporting is at the end of each reporting month.
- ii. In the reporting month, the principal work activities of individual contracts are included as follow:

### Contract no. DC/2020/05 –

### Relocation of Sha Tin Sewage Treatment Works to Caverns – Main Caverns Construction

(The contract was commenced on 5 July 2021)

- Slope stabilization works
- Tunneling works
- Retaining wall construction
- Operation of rock crushing plant
- TBM Tunneling and Pipe Jacking
- Preservation and protection of existing trees
- Ventilation shaft excavation

### Contract no. DC/2023/12 –

### Relocation of Sha Tin Sewage Treatment Works to Caverns – Ancillary Buildings, Cavern

### Ventilation System and Associated Works

(The contract was commenced on 1 August 2023)

- Trial pits at P9
- Construction of wastewater drainage and watermains at Mui Tsz Lam Road

### Air Quality Monitoring

- iii. 1-hour TSP monitoring was conducted at AM1, AM2, AM3(B), AM4, AM5 and ASR51 on 2, 8, 14, 20 and 26 February 2024 in the reporting period.
- iv. No action or limit level exceedances were determined in the reporting period.

### Noise Monitoring

- v. Noise monitoring was conducted at CM1, CM2(B), CM3, CM4 and CM5 on 2, 8, 14, 20 and 26 February 2024 in the reporting period.
- vi. No action or limit level exceedances were determined in the reporting period.
- vii. Additional weekly noise monitoring from 19:00 to 23:00 was carried out at CM4 on 2, 8, 14, 20 and 26 February 2024 with respect to the restricted hour works under CNP GW-RW0559-23, GW-RN1053-23, GW-RN1290-23 and GW-RN0101-24. All the results are within or below the baseline level range after baseline correction.

- viii. Additional weekly night time noise monitoring from 23:00 to 07:00 on next day was carried out at CM4 on 2, 9, 14, 20 and 26 February 2024 with respect to the restricted hour works under CNP GW-RW0559-23, GW-RN1053-23, GW-RN1290-23 and GW-RN0101-24. All the results are within or below the baseline level range after baseline correction.

#### APS Monthly Performance Test

- ix. APS monthly performance test was conducted at ASR52 & ASR55 on on 19, 20 and 21 February 2024 in this reporting period.
- x. The effectiveness of APS at Model Train Shop, Nana Café, Lantau Link Visitor Centre and Workshop Office were considered satisfactory and no additional units of APS were recommended to be deployed at the above-mentioned ASRs.

#### Complaints, Notifications of Summons and Successful Prosecutions

- xi. No environmental complaint was received in the reporting period.
- xii. No notification of summons and successful prosecutions were received in the reporting month.

#### Reporting Changes

- xiii. The Ecological Monitoring Report is attached in the **Appendix 1.1**.

#### Future Key Issues

- xiv. In coming reporting months, the scheduled construction activities and the recommended mitigation measures are listed as follows:

Key Construction Works	Recommended Mitigation Measures
<b><u>Contract no. DC/2020/05</u></b>	
<ul style="list-style-type: none"> <li>• Slope stabilization works</li> <li>• Tunneling works</li> <li>• Retaining wall construction</li> <li>• Operation of rock crushing plant</li> <li>• TBM Tunneling and Pipe Jacking</li> <li>• Preservation and protection of existing trees</li> <li>• Ventilation shaft excavation</li> <li>• Overhead Ventilation Dust (OHVD)</li> </ul>	<ul style="list-style-type: none"> <li>• Dust control during dust generating works;</li> <li>• Implementation of proper noise pollution control;</li> <li>• Provision of protection to ensure no runoff out of site area or direct discharge into public drainage system;</li> <li>• Direct impact to plant species of conservation importance recorded in the vicinity of the construction sites shall be avoided;</li> <li>• Excavation materials shall be well covered; and</li> <li>• Mitigation measures to dust and noise control should be provided to construction of noise barrier, bored piling, Installation of noise barrier.</li> </ul>
<b><u>Contract no. DC/2023/12</u></b>	
<ul style="list-style-type: none"> <li>• Trial pits at P9</li> <li>• Construction of wastewater drainage and watermains at Mui Tsz Lam Road</li> <li>• Marine G.I</li> <li>• Pre-drilling at P10C</li> </ul>	<ul style="list-style-type: none"> <li>• Dust control during dust generating works;</li> <li>• Implementation of proper noise pollution control;</li> <li>• Provision of protection to ensure no runoff out of site area or direct discharge into public drainage system;</li> <li>• Direct impact to plant species of conservation importance recorded in the vicinity of the construction sites shall be avoided;</li> <li>• Excavation materials shall be well covered; and</li> <li>• Mitigation measures to dust and noise control should be provided to construction of noise barrier, bored piling, Installation of noise barrier.</li> </ul>

# 1. Introduction

## 1.1 Scope of the Report

- 1.1.1 Fugro Technical Services Limited (FTS) has been appointed as the Environmental Team (ET) by Drainage Services Department (DSD) under Environmental Permit (EP) no. EP-533/2017/A to implement the Environmental Monitoring and Audit (EM&A) programme as stipulated in the EM&A Manual of the approved Environmental Impact Assessment (EIA) Report for Relocation of Sha Tin Sewage Treatment Works to Caverns – Site Preparation and Access Tunnel Construction (Register No.: AEIAR-202/2016).
- 1.1.2 In accordance with Clause 3.5 stated in EP-533/2017/A, 4 hard copies and 3 electronic copies of the Monthly EM&A Report shall be submitted to the Director within 2 weeks after the end of each reporting month throughout the entire construction period.
- 1.1.3 In accordance with Section 13.4.1.1 of the Project EM&A Manual, the Monthly EM&A Report should be prepared and submitted to the Contractor, the IEC, the ER and EPD within 10 working days at the end of each reporting month, with the first report due the month after construction commences.

## 1.2 Structure of the Report

**Section 1 Introduction** – details the scope and structure of the report.

**Section 2 Project Background** – summarizes background and scope of the project, site description, and project organization and contact details of key personnel during the reporting period.

**Section 3 Status of Regulatory Compliance** – summarizes the status of valid Environmental Permits / Licenses during the reporting period.

**Section 4 Monitoring Requirements** – summarizes all monitoring parameters, monitoring methodology and equipment, monitoring locations, monitoring frequency, criteria and respective event and action plan and monitoring programmes.

**Section 5 Monitoring Results** – summarizes the monitoring results obtained in the reporting period.

**Section 6 Land Decontamination** – summarizes the status of land decontamination works at the VDC site.

**Section 7 Compliance Audit** – summarizes the auditing of monitoring results, all exceedances environmental parameters.

**Section 8 Environmental Site Audit** – summarizes the findings of weekly site inspections undertaken within the reporting period, with a review of any relevant follow-up actions within the reporting period.

**Section 9 Complaints, Notification of summons and Prosecution** – summarizes the cumulative statistics on complaints, notification of summons and prosecution

**Section 10 Conclusion**

## 2. Project Background

### 2.1 Background

- 2.1.1 The Relocation of Sha Tin Sewage Treatment Works (STSTW) to Caverns (the Project) is implemented so as to release the existing site, of a size about 28 hectares, for other uses.
- 2.1.2 In May 2012, Drainage Services Department (DSD), the Project Proponent commenced a detailed feasibility study on "Relocation of Sha Tin Sewage Treatment Works to Caverns" (the Feasibility Study). The findings of Feasibility Study affirmed that relocating the STSTW to caverns to be constructed at Nui Po Shan of A Kung Kok is technically feasible and financially viable.
- 2.1.3 The Project is a Designated Project (DP) under the Environmental Impact Assessment Ordinance (EIAO). An application for an Environmental Impact Assessment (EIA) Study Brief under section 5(1)(a) of the EIAO was submitted on 12 May 2014 with a Project Profile (No. PP-508/2014) for the Project. An EIA Study Brief (No. ESB-273/2014) was issued in June 2014. An EIA for the Project was then undertaken, as part of the Assignment, in accordance with this EIA Study Brief and the Technical Memorandum on Environmental Impact Assessment Process (EIAO-TM). The location of the Project is shown [Figure 2.1](#).

### 2.2 Scope of the Project and Site Description

- 2.2.1 The Project covers the following DP elements as specified in Schedule 2 of the EIAO (Cap.499):

Table 2.1 Schedule 2 Designated Projects under this Project

Item	Designated Project	EIAO Reference
<b>DP1</b>	Sewage treatment works with an installed capacity of more than 15,000 m <sup>3</sup> per day under Item F.1	Schedule 2, Part I,
<b>DP2</b>	Sewage treatment works under Item F.2 <ul style="list-style-type: none"> <li>• With an installed capacity of more than 5,000 m<sup>3</sup> per day; and</li> <li>• A boundary of which is less than 200m from the nearest boundary of an existing or planned residential area, educational institution and health care institution.</li> </ul>	Schedule 2 Part I
<b>DP3</b>	An activity for the reuse of treated sewage effluent from a treatment plant under Item F.4	Schedule 2 Part I
<b>DP4</b>	Underground rock caverns under Item Q.2	Schedule 2 Part I
<b>DP5</b>	An explosives depot in a stand-alone, purpose built building under Item K.10	Schedule 2 Part I;
<b>DP6</b>	Decommissioning of an explosives depot under Item 11	Schedule 2 Part II

## 2.3 Project Organization and Contact Personnel

2.3.1 Drainage Services Department is the overall project controllers for the Project. For the construction phase of the Project, Project Engineer, Contractor(s), Environmental Team and Independent Environmental Checker are appointed to manage and control environmental issues.

2.3.2 The proposed project organization and lines of communication with respect to environmental protection works are shown in **Figure 2.2**. Key personnel and contact particulars is summarized in **Table 2.2**:

Table 2.2 Contact Details of Key Personnel

Party	Role / Post	Name	Contact No.	Contact Fax
<b>AECOM</b>	Principal Resident Engineer	Mr. Peter POON	9861 8654	2251 0693
	Construction Manager	S. Y. TSZ	9078 0458	
	Site Agent	Mr. KONG Ming, Elvis	9186 2081	
<b>China State – Alchmex Joint Venture (CSAJV) (DC/2020/05)</b>	Environmental Officer	Mr. LAM Moon Lin	9489 4641	3914 5951
		Mr. Michael Tsang	9277 4956	
	Environmental Supervisor	TSANG Chiu Fat	9137 8733	
		CHAN Chin Ming	9128 9993	
		IP Tat Hing	9600 8900	
		Tiffany Yeung	6761 8726	
<b>China State – Alchmex Joint Venture (CSAJV) (DC/2023/12)</b>	Project Manager	Dave Chan	9027 4422	2252 9319
	Site Agent	Thomson Leung	6433 9285	
	Environmental Officer	Yolanda Gao	9664 4436	
	Environmental Supervisor	Tina Zhuang	5649 5837	
<b>ANewR Consulting Limited (ANewR)</b>	Independent Environmental Checker (IEC)	Mr. Louis KWAN	2618 2831	3007 8648
<b>Fugro Technical Services Limited (Fugro)</b>	Environmental Team Leader (ETL)	Mr. Alvin Yu (until 15 Feb 2024)	3565 4373	2694 0659
		Mr. Wingo So (from 16 Feb 2024)	9558 3402	

## 2.4 Construction Activities

2.4.1 In the reporting month, the principal work activities of individual contracts are included as follow:

Contract no. DC/2020/05 –

Relocation of Sha Tin Sewage Treatment Works to Caverns – Main Caverns Construction

(The contract was commenced on 5 July 2021)

- Slope stabilization works
- Tunneling works
- Retaining wall construction
- Operation of rock crushing plant
- TBM Tunneling and Pipe Jacking
- Preservation and protection of existing trees
- Ventilation shaft excavation

Contract no. DC/2023/12 –

Relocation of Sha Tin Sewage Treatment Works to Caverns – Ancillary Buildings, Cavern Ventilation System and Associated Works

(The contract was commenced on 1 August 2023)

- Trial pits at P9
- Construction of wastewater drainage and watermains at Mui Tsz Lam Road

2.4.2 In coming reporting months, the scheduled construction activities of individual contracts are listed as follows:

Contract no. DC/2020/05 –

Relocation of Sha Tin Sewage Treatment Works to Caverns – Main Caverns Construction

- Slope stabilization works
- Tunneling works
- Retaining wall construction
- Operation of rock crushing plant
- TBM Tunneling and Pipe Jacking
- Preservation and protection of existing trees
- Ventilation shaft excavation
- Overhead Ventilation Dust (OHVD)

Contract no. DC/2023/12 –

Relocation of Sha Tin Sewage Treatment Works to Caverns – Ancillary Buildings, Cavern Ventilation System and Associated Works

- Trial pits at P9
- Construction of wastewater drainage and watermains at Mui Tsz Lam Road
- Marine G.I
- Pre-drilling at P10C

### 3. Status of Regulatory Compliance

#### 3.1 Status of Environmental Licensing and Permitting under the Project

3.1.1 A summary of the current status on licences and/or permits on environmental protection pertinent to the Project is shown in **Table 3.1**.

Table 3.1 Summary of the current status on licences and/or permits

Permits and/or Licences	Reference No.	Valid Date (dd-MM-yyyy)	Expiry Date (dd-MM-yyyy)	Status
<b>Contract no. DC/2020/05</b>				
Environmental Permit	EP-533/2017/A	11/08/2022	N/A	Valid
Notification of Works Under APCO (Main Site in Ma On Shan)	469268	08/07/2021	N/A	Valid
Notification of Works Under APCO (WA3 & WA4 in Tsing Yi)	477699	15/03/2022	N/A	Valid
Licence for the Conduct of a Specified Process (WA3 & WA4 in Tsing Yi)	L-11-55(01)	26/09/2022	25/09/2024	Valid
Registration as a Chemical Waste Producer (Main Site in Ma On Shan)	5117-756-C4617-01	02/08/2021	N/A	Valid
Registration as a Chemical Waste Producer (WA3 in Tsing Yi)	8335-351-C4742-01	21/09/2022	N/A	Valid
Billing account under Waste Disposal Ordinance	7041077	22/07/2021	N/A	Valid
Discharge Licence (Main Site in Ma On Shan)	WT00040534-2022	15/11/2022	30/04/2027	Valid
Discharge Licence (WA3 in Tsing Yi)	WT00042574-2022	07/12/2022	31/12/2027	Valid
Construction Noise Permit (Tunnel)	GW-RN1290-23	01/12/2023	31/03/2024	Valid
Construction Noise Permit (Portion 11)	GW-RN1053-23	08/10/2023	07/03/2024	Valid
Construction Noise Permit (WA3 & WA4)	GW-RW0559-23	01/09/2023	29/02/2024	Valid
Construction Noise Permit (P6A)	GW-RN1077-23	20/10/2023	19/02/2024	Expired
Construction Noise Permit (P6A)	GW-RN0101-24	20/02/2024	19/06/2024	Valid
<b>Contract no. DC/2023/12</b>				
Environmental Permit	EP-533/2017/A	11/08/2022	N/A	Valid
Notification of Works Under APCO	495674	07/08/2023	N/A	Valid
Billing account under Waste Disposal Ordinance	7048254	14/08/2023	N/A	Valid
Registration as a Chemical Waste Producer	5213-753-C4536-02	27/11/2023	N/A	Valid

#### 3.2 Status of Submission under the EP-533/2017/A

3.2.1 A summary of the current status on submission under EP-533/2017/A is shown in **Table 3.2**.

Table 3.2 Summary of Submission Status Under EP-533/2017/A

EP Condition	Submission	Date of Submission (dd-MM-yyyy)
<b>Contract no. DC/2018/05 and DC/2020/05</b>		
<b>Condition 1.12</b>	Notification of Commencement Date of Works	18/02/2019
<b>Condition 2.1</b>	Notification of EPD of Community Liaison Group	18/04/2019
<b>Condition 2.12</b>	Management Organization of Main Construction Companies	18/04/2019
<b>Condition 2.14</b>	Submission of Detailed Vegetation Survey Report and Protection and Transplantation Proposal	18/04/2019
<b>Condition 2.15</b>	Woodland Compensation Plan	26/08/2021
<b>Condition 2.18</b>	Submission of Landscape & Visual Mitigation and Tree Preservation Plan(s)	18/04/2019
<b>Condition 2.2</b>	Notification of EPD of telephone hotline	18/04/2019

<b>EP Condition</b>	<b>Submission</b>	<b>Date of Submission (dd-MM-yyyy)</b>
<b>Condition 2.21</b>	Submission of Supplementary Contamination Assessment Plan (CAP)	10/09/2020
<b>Condition 2.21</b>	Submission of Supplementary Contamination Assessment Plan (CAP) for Sha Tin Sewage Treatment Works (For the Areas of Mechanical Workshop, Chemical Waste Area, Scrap Iron Storage Area and Chemical Waste Collection Tank, Dangerous Goods and Chemical Waste Sore, ENV-G04, ENV-G07, ENV-G14 and ENV-G28)	25/11/2021
<b>Condition 2.22</b>	Submission of Measures to Mitigate Traffic Noise from Ma On Shan Road	18/04/2019
<b>Condition 2.29</b>	Commissioning Test Report for Air Purification System Installed at Air Sensitive Receivers	13/12/2022
	Revised Commissioning Test and Updated Implementation Plan	07/06/2023
<b>Condition 3.1</b>	Proposal for Commencement of Construction Phase Air Quality Monitoring in Phases	17/04/2019
<b>Condition 3.1</b>	Proposal for Alternative Sampling Method for Construction Phase Air Quality Monitoring (1-hr TSP)	16/04/2019
<b>Condition 3.1</b>	Proposal for Proposed Fine Adjustment for Air and Noise Monitoring Stations at Kowloon City Baptist Church Hay Nien Primary School & Updated EM&A Manual	06/03/2020
<b>Condition 3.1</b>	Temporary suspension of EM&A Programme during 29 Jan 2020 to 2 Feb 2020	28/02/2020
<b>Condition 4.2</b>	Dedicated internet website	22/05/2019
<b>Condition 3.4</b>	Baseline Noise Monitoring Report	11/08/2021
<b>Condition 3.4</b>	Baseline Air Quality Monitoring Report for the Rock Processing Plant at Ngau Kok Wan	03/11/2022

## 4. Monitoring Requirements

### 4.1 Air Monitoring

#### Air Quality Monitoring Stations

- 4.1.1 Air monitoring stations AM1 and AM2 were setup and commencement of monitoring on 12 April 2019 while AM4 and AM5 were setup and commencement of monitoring on 3 May 2019 and 18 April 2019 respectively.
- 4.1.2 Based on the Project baseline report, the air quality monitoring station AM3, Ma On Shan Tsung Tsin Secondary School was relocated to AM3(A), Kowloon City Baptist Church Hay Nien Primary School. A change of the monitoring location in subsequent impact monitoring for AM3(A) - Kowloon City Baptist Church Hay Nien Primary School was identified necessary as access was not granted for setting up the onsite monitoring station. The new monitoring location AM3(B) – ground level of outside A Kung Kok Street Garden for impact air quality monitoring station was proposed based on the criteria as stated in section 2.2.4.2 and 2.2.4.3 of EM&A Manual by ET and approved by ER and verified by IEC and submitted to EPD for agreement on 5 September 2019. The proposal for proposed fine adjustment for air monitoring station at Kowloon City Baptist Church Hay Nien Primary School was agreed by EPD on 17 December 2020 and the air quality monitoring for the station AM3(B) was commenced on 18 December 2020.
- 4.1.3 Air quality monitoring for the station AM6 was commenced on 2 November 2021 since the demolition of DSD staff quarter and ended on 31 December 2021. The proposal was verified by IEC and approved by EPD on 9 May 2019.
- 4.1.4 Air quality monitoring station ASR51 at WA3 was recommended in the supporting document for application for variation of Environmental Permit (EP-533/2017/A issued on 11 August 2022) and the associated air quality monitoring was commenced on 19 August 2022.
- 4.1.5 The updated air monitoring stations for the Project are listed and shown in **Table 4.1** and **Figure 4.1**.

Table 4.1 Air Monitoring Station

<b>Monitoring Station ID</b>	<b>Monitoring Location</b>	<b>Level (in terms of no. of floor)</b>
<b>AM1</b>	Ah Kung Kok Fishermen Village	G/F
<b>AM2</b>	Block H, Kam Tai Court	Roof
<b>AM3(B)</b>	Outside A Kung Kok Street Garden	G/F
<b>AM4</b>	Wellborn Kindergarten	G/F
<b>AM5</b>	The Neighbourhood Advice-Action Council Harmony Manor	Roof
<b>ASR51</b>	The Hong Kong Yaumati Ferry Company Ltd. Administrative Building	G/F

### Air Monitoring Parameters, Frequency and Duration

- 4.1.6 One-hour TSP levels should be measured to indicate the impacts of construction dust on air quality.
- 4.1.7 The sampling frequency of at least three times in every six-days should be undertaken when the highest dust impact occurs.
- 4.1.8 Portable direct reading dust meter was proposed to use for 1-hour TSP level instead of HVS to undertaking the air quality monitoring for the project as shown in **Table 4.1**. The proposal was verified by IEC on 8 March 2023 and submitted to EPD on 14 March 2023.

### Sampling Procedure and Monitoring Equipment

#### 4.1.9 Monitoring Procedures

- a) Check the calibration period of portable direct reading dust meter prior to monitoring (The direct reading dust meter was calibrated at 2-years interval and checked with High Volume Sampler (HVS) yearly.)
- b) Record the site condition near / around the monitoring stations.
- c) Install the portable direct reading dust meter to the monitoring location.
- d) Slide the power switch to turn the power on.
- e) Check of portable direct reading dust meter to ensure the equipment operation in normal condition.
- f) Select the period of measurement to 60mins.
- g) Check and set the correct time.
- h) Select the appropriate unit display for the equipment.
- i) Slide the power switch to turn the power off when the monitoring period ended (3 times 1 hour TSP monitoring per day).
- j) Uninstall the portable direct reading dust meter
- k) Collected the sampled data for analysis.
- l) Remark: Procedures (c) to (h) may be different subject to the brands and models of portable direct reading dust meter

#### 4.1.10 Maintenance and Calibration

- a) The direct reading dust meter was calibrated at 2-years interval and checked with High Volume Sampler (HVS) yearly to determine the accuracy and validity of the results measured.
- b) Checking of direct reading dust meter will be carried out in order to determine the conversion factor between the direct reading dust meter and the standard equipment, HVS. The comparison check is to be considered valid based on correlation coefficient checked by HOKLAS laboratory.

- 4.1.11 The 1-hour TSP air quality monitoring was performed by using portable direct reading dust meters at each designated monitoring station. The brand and model of the equipment are given in **Table 4.2**.

Table 4.2 Air Quality Monitoring Equipment

Equipment	Brand and model
Portable direct reading dust meter	Sibata, Model LD-5R

- 4.1.12 The calibration certificates of the monitoring equipment are attached in [Appendix 4.2](#).

#### Wind Data

- 4.1.13 The representative wind data from Sha Tin HKO Automatic Weather Station was obtained covering the 1-hr TSP monitoring periods for stations of AM1, AM2, AM3(B), AM4 & AM5. And wind data from Tsing Yi HKO Automatic Weather Station was obtained covering the 1-hr TSP monitoring periods for station of ASR51. The wind data were extracted and shown in [Appendix 4.3](#).

#### Event and Action Plan

- 4.1.14 The Action and Limit levels for construction air quality are defined in [Table 4.3](#) and [Appendix 4.1](#). Should non-compliance of the air quality criteria occur, action in accordance with the Event and Action Plan in [Appendix 7.1](#) shall be carried out.

Table 4.3 Action and Limit Level for Air Quality Monitoring

Monitoring Locations	1-hour TSP Level in mg/m <sup>3</sup>	
	Action Level	Limit Level
<b>AM1</b>	294	500
<b>AM2</b>	325	500
<b>AM3(B)</b>	360	500
<b>AM4</b>	297	500
<b>AM5</b>	349	500
<b>ASR51</b>	310	500

## 4.2 Noise Monitoring

### Noise Monitoring Stations

- 4.2.1 Noise monitoring stations CM4 and CM5 were setup and commencement of monitoring on 13 April 2019 and 18 April 2019 respectively. Noise monitoring for stations CM1 and CM3 were commenced on 2 May 2019.
- 4.2.2 Based on the Project baseline report, the noise monitoring station CM2, Ma On Shan Tsung Tsin Secondary School was relocated to CM2(A), Kowloon City Baptist Church Hay Nien Primary School. A change of the monitoring location in subsequent impact monitoring for CM2(A) - Kowloon City Baptist Church Hay Nien Primary School was identified necessary as access was not granted for setting up the onsite monitoring station. The new monitoring location CM2(B) – ground level of outside A Kung Kok Street Garden for impact noise monitoring station was proposed by ET and approved by ER and verified by IEC and submitted to EPD for agreement on 5 September 2019. The proposal was agreed by EPD on 17 December 2020 and the noise monitoring for station CM2(B) was commenced on 18 December 2020.
- 4.2.3 Noise monitoring for stations DM1, DM2 and DM3 were commenced on 2 November 2021 and ended on 31 December 2021.
- 4.2.4 The updated noise monitoring stations for the Project are listed and shown in [Table 4.4](#) and [Figure 4.2](#).

Table 4.4 Noise Monitoring Station

<b>Monitoring Station ID</b>	<b>Monitoring Location</b>	<b>Measurement Type</b>	<b>Level (in terms of no. of floor)</b>
<b>CM1</b>	Wellborn Kindergarten	Free field	G/F
<b>CM2(B)</b>	Outside A Kung Kok Street Garden	Free field	G/F
<b>CM3</b>	S.K.H. Ma On Shan Holy Spirit Primary School	Façade	Roof
<b>CM4</b>	Ah Kung Kok Fishermen Village	Free field	G/F
<b>CM5</b>	The Neighbourhood Advice-Action Council Harmony Manor	Façade	Roof

### Noise Monitoring Parameters, Frequency and Duration

- 4.2.5 Noise monitoring shall be carried out at all the designated monitoring stations. The monitoring frequency shall depend on the scale of the construction activities. The following is an initial guide on the regular monitoring frequency for each station on a weekly basis when noise generating activities are underway:

- One set of measurements between 0700-1900 hours on normal weekdays;
- One set of measurements between 1900-2300 hours;
- One set of measurements between 2300-0700 hours of next day; and

- One set of measurements between 0700-2300 hours on holidays (six consecutive Leq/5min readings).

- 4.2.6 If construction works are extended to include works during the hours of 1900-0700, additional weekly impact monitoring shall be carried out during evening and night-time works for the latter 3 sets of measurements specified in Section 4.2.4 above, one set of measurements shall at least include 6 consecutive Leq (5min) results.
- 4.2.7 Supplementary information for data auditing, statistical results such as L10 and L90 shall also be obtained for reference.
- 4.2.8 If a school exists near the construction activity, noise monitoring shall be carried out at the monitoring stations for the schools during the examination periods. The ET leader shall liaise with the school’s personnel and the examination authority to ascertain the exact dates and times of all examination periods during the course of the contract.

Monitoring Equipment

- 4.2.9 Noise monitoring was performed using sound level meter at the designated monitoring locations. The sound level meters shall comply with the International Electrotechnical Commission Publications 651:1979 (Type 1) and 804:1985 (Type 1) specifications. Acoustic calibrator shall be deployed to check the sound level meters at a known sound pressure level. Brand and model of the equipment is given in **Table 4.5**.

Table 4.5 Noise Monitoring Equipment

<b>Equipment</b>	<b>Brand and Model</b>
Integrated Sound Level Meter	Casella, CEL-63X Series
Acoustic Calibrator	Casella, CEL-120/1

- 4.2.10 The calibration certificates of the noise monitoring equipment are attached in **Appendix 4.2**.

Sampling Procedure and Monitoring Equipment

4.2.11 Monitoring Procedure

- a) The monitoring station shall normally be at a point 1m from the exterior of the sensitive receiver’s building façade and be at a position 1.2m above the ground.
- b) Façade measurements were made at the monitoring locations. For free-field measurement, a correction factor of +3 dB (A) would be applied.
- c) The battery condition was checked to ensure the correct functioning of the meter.
- d) Parameters such as frequency weighting, the time weighting and the measurement time were set as follows:
  - Frequency weighting: A,
  - Time weighting: Fast,
  - Measurement time set: continuous 5 mins
- e) Prior and after to the noise measurement, the meter was checked using the acoustic calibrator for 94dB (A) at 1000 Hz. If the difference in the calibration level before and after measurement was more

than ±1 dB (A), the measurement would be considered invalid and repeat of noise measurement would be required after re-calibration or repair of the equipment.

- f) Noise measurements shall not be made in fog, rain, wind with a steady speed exceeding 5m/s or wind with gusts exceeding 10m/s. The wind speed shall be checked with a portable wind speed meter capable of measuring the wind speed in m/s.

4.2.12 Maintenance and Calibration

- a) The microphone head of the sound level meter was cleaned with soft cloth at regular intervals.
- b) The sound level meter and calibrator were calibrated at yearly intervals.

Event and Action Plan

4.2.13 Noise Standards for Daytime Construction Activities are specified under EIAO-TM. The Action and Limit levels for construction noise are defined in **Table 4.6** and **Appendix 4.1**. Should non-compliance of the criteria occurs, action in accordance with the Event and Action Plan in **Appendix 7.1** shall be carried out.

Table 4.6 Action and Limit Level for Noise Monitoring

Monitoring Station	Action Level	Limit Level (dB(A))		
		0700-1900 hrs on normal weekdays	0700-2300 hrs on holidays (including Sundays); and 1900-2300 hrs on all days <sup>2</sup>	2300-0700 hrs of all days <sup>2</sup>
<b>CM1</b>	When one documented complaint is received	65 / 70 <sup>1</sup>	60 / 65 / 70 <sup>3</sup>	45 / 50 / 55 <sup>3</sup>
<b>CM2(B)</b>		65 / 70 <sup>1</sup>		
<b>CM3</b>		65 / 70 <sup>1</sup>		
<b>CM4</b>		75		
<b>CM5</b>		75		

Remark 1: Limit level of CM1, CM2(B) and CM3 reduce to 65 dB (A) during examination periods if any.

Remark 2: Construction noise during restricted hours is under the control of Noise Control Ordinance Limit Level to be selected based on Area Sensitivity Rating.

Remark 3: Limit Level for restricted hour monitoring shall act as reference level only. Investigation would be conducted on CNP compliance if exceedance recorded during restricted hour noise monitoring period.

### 4.3 APS Performance Test

4.3.1 According to EP Condition 2.29(ii) of EP-533/2017/A, monthly performance test shall be carried out in the following month of the Air Purification System (APS) commissioning test, in order to monitor the effectiveness of the APS in removing NO<sub>2</sub> at the designated air sensitive receivers (ASR) as described in the Environmental Review Report (ERR) submitted under the application for Variation of EP (Application No.: VEP-618/2022).

4.3.2 The commissioning test was carried out for a duration of 24 hours at Model Train Shop (ASR55), Lantau Link Visitor Centre (ASR55), Nana Café (ASR55) and Workshop Office (ASR52) on 19 to 20, 20 to 21, 26 to 27 (for Nana Café & Workshop Office) September 2022, respectively, the Commissioning Test Report (CTR) was then submitted to EPD on 3 November 2022. Since the owner of premises (Model Train Shop) requested to reduce the APS units due to the space constraints. The measurement was re-carried out in 21 to 22 November 2022 by using one APS unit for commissioning test. The CTR was submitted to EPD on 13 December 2022 for approval (Ref: LES/J2021-03/CS/L062).

4.3.3 The ASRs of the APS Performance Test are listed and shown in [Table 4.7](#) and [Figure 4.2](#).

Table 4.7 ASR of the APS Performance Test

ASR ID	Location of ASR
ASR52	North West Tsing Yi Interchange Maintenance Workshops
ASR55	Lantau Link Visitor Centre
	Nana Café
	Model Train Shop

#### Monitoring Equipment

4.3.4 The monitoring equipment used for the APS Performance Test are listed in [Table 4.8](#).

Table 4.8 NO<sub>2</sub> Monitoring Equipment

Equipment	Serial Number
Aeroqual AQS1 Urban Air Quality Monitor	AQS1 17082022-2139
	AQS1 17082022-2140
	AQS1 17082022-2141
	AQS1 17082022-2142

4.3.5 The calibration certificates of the NO<sub>2</sub> monitoring equipment are attached in [Appendix 4.2](#).

#### Sampling Procedure

4.3.6 The monthly performance tests will be carried out in accordance with the measurement method as described in Appendix 3.8E of the ERR submitted under the application for Variation of EP (Application No.: VEP-618/2022) which is extracted below:

- a) Measure the ambient NO<sub>2</sub> concentration at indoor and outdoor simultaneously at the ASRs.

- b) Measure hourly NO<sub>2</sub> concentration in 24 hours to capture daily fluctuation on the measurement day.
- c) Compare the NO<sub>2</sub> concentration at indoor and outdoor, and determine the effectiveness of the APS.
- d) Measurement duration: 1 day.

**Maintenance and Contingency Plan**

4.3.7 Maintenance and contingency plan described in Appendix 3.8E of the ERR submitted under the application for Variation of EP (Application No.: VEP-618/2022) which is extracted below:

- a) If the NO<sub>2</sub> removal efficiency of the Air Purifier is lower than 60% after the ad-hoc maintenance work for any malfunction of the equipment or regular maintenance work by replacement of filters, another Air Purifier shall be deployed for treatment of air pollutants.
- b) 1 no. spare unit is ready for immediate replacement of malfunctioned Air Purifier upon notification.
- c) Regular maintenance schedule: The HEPA filter shall be replaced every six months while the NCCO filter shall be replaced every three years under normal operational conditions insider the premises.

4.3.8 The responsibilities of relevant parties presented in **Table 4.9** as per Appendix 3.8E of the ERR submitted under the application for Variation of EP (Application No.: VEP-618/2022):

Table 4.9 Responsibilities Matrix

<b>Actions</b>	<b>Responsible Parties</b>
Implementation Plan	The Contractor (Contract No. DC/2020/05)
Commissioning Test Plan	The Environmental Team ( <i>for measurement</i> )
Performance Test Plan	The Contractor (Contract No. DC/2020/05) ( <i>for follow-up actions</i> )
Maintenance and Contingency Plan	The Contractor (Contract No. DC/2020/05)

## 5. Monitoring Results

5.1.1 The environmental monitoring will be implemented based on the division of works areas of each designed projects. Overall layout showing work areas and monitoring stations is shown in [Figure 2.1](#) and [Figure 4.1-4.3](#) respectively.

5.1.2 The environment monitoring schedules for reporting month and coming month are presented in [Appendix 5.1](#).

### 5.1 Air Monitoring Results

5.1.1 1-hour TSP monitoring was conducted at AM1, AM2, AM3(B), AM4, AM5 and ASR51 on 2, 8, 14, 20 and 26 February 2024 in the reporting period.

5.1.2 No action or limit level exceedances were determined in the reporting period.

5.1.3 Details of air monitoring results and graphical presentation is shown in [Appendix 5.2](#).

### 5.2 Noise Monitoring Results

5.2.1 Noise monitoring was conducted at CM1, CM2(B), CM3, CM4 and CM5 on 2, 8, 14, 20 and 26 February 2024 in the reporting period.

5.2.2 No action or limit level exceedances were determined in the reporting period.

5.2.3 Additional weekly noise monitoring from 19:00 to 23:00 was carried out at CM4 on 2, 8, 14, 20 and 26 February 2024 with respect to the restricted hour works under CNP GW-RW0559-23, GW-RN1053-23, GW-RN1290-23 and GW-RN0101-24. All the results are within or below the baseline level range after baseline correction.

5.2.4 Additional weekly night time noise monitoring from 23:00 to 07:00 on next day was carried out at CM4 on 2, 9, 14, 20 and 26 February 2024 with respect to the restricted hour works under CNP GW-RW0559-23, GW-RN1053-23, GW-RN1290-23 and GW-RN0101-24. All the results are within or below the baseline level range after baseline correction.

5.2.5 Details of noise monitoring results and graphical presentation is shown in [Appendix 5.3](#).

### 5.3 APS Performance Test Results

5.3.1 APS monthly performance test was conducted at ASR52 & ASR55 on 19, 20 and 21 February 2024 in this reporting period. Rock crushing activities at the rock crushing plant were undertaken within the reporting period.

5.3.2 APS performance test results measured in this reporting period are reviewed and summarized in [Table 5.1](#). Details of APS Performance Test results is shown in [Appendix 5.4](#).

Table 5.1 APS Performance Test Results

ASR	Location of ASR	Monitoring Date	Measured Daily Average of Indoor NO <sub>2</sub> Concentration (µg/m <sup>3</sup> )	Measured Daily Average of Outdoor NO <sub>2</sub> Concentration (µg/m <sup>3</sup> )	NO <sub>2</sub> Removal Efficiency (%)
ASR52	Workshop Office	20/02/2024	21.5	38.3	43.9
		21/02/2024			
	Lantau Link Visitor Centre	20/02/2024	15.3	32.9	53.5
		21/02/2024			
ASR55	Nana Café	19/02/2024	30.0	36.9	18.7
		20/02/2024			
	Model Train Shop	19/02/2024	2.7	38.0	92.9
		20/02/2024			

- 5.3.3 Based on the results presented in [Table 5.1](#), The NO<sub>2</sub> removal efficiency for Model Train Shop (ASR55) was over 60% which is one of the criteria for determination of effectiveness of the APS at ASR while that of the rest (i.e. Workshop Office, Lantau Link Visitor Centre and Nana Café) was below the criterion of 60% or above. Nevertheless, it should be noted that the daily average of Indoor NO<sub>2</sub> were found to be below another criterion of 40 µg/m<sup>3</sup> for all ASRs.
- 5.3.4 Based on the above-mentioned findings, the effectiveness of APS at Model Train Shop, Nana Café, Lantau Link Visitor Centre and Workshop Office were considered satisfactory and no additional units of APS were recommended to be deployed at the above-mentioned ASRs.

## 5.4 Waste Management

5.4.1 The quantities of waste for disposal in the Reporting Period are summarized in **Table 5.2** and the Monthly Summary Waste Flow Table are shown in **Appendix 5.5**. Whenever possible, materials were reused on-site as far as practicable.

Table 5.2 Summary of Waste Disposal

### Contract no. DC/2020/05

Waste Type	Quantity this month	Cumulative Quantity-to-Date	Disposal / Dumping Grounds	Remarks:
Inert C&D materials disposed, m <sup>3</sup>	867	24,070	Fill Bank at Tuen Mun Area 38	--
	557	109,430	Lam Tei Quarry & CEDD Contract No. NE/2015/01	Alternative Disposal Ground

## 6. Land Contamination

- 6.1.1 Remediation report (RR) for Ex-Sha Tin Vehicle Detention Centre (VDC) was accepted by EPD on 23 April 2021 and placed in the EIAO Register Office for public information.
- 6.1.2 The confirmatory sampling for DSD staff quarter at existing STSTW was completed.
- 6.1.3 Land decontamination work for the DSD staff quarter at existing STSTW started on 16 June 2021, the Remediation Report was submitted to EPD for approval on 9 September 2021.
- 6.1.4 The Remediation Report was accepted by EPD on 8 November 2021.

## 7. Compliance Audit

- 7.1.1 The Event Action Plan for construction noise, air quality are presented in [Appendix 7.1](#).
- 7.1.2 The summary of exceedance is presented in [Appendix 7.2](#).

### 7.1 Air Monitoring

- 7.1.1 No action or limit level exceedances were determined in the reporting period at stations of AM1, AM2, AM3(B), AM4, AM5 and ASR51.

### 7.2 Noise Monitoring

- 7.2.1 No action or limit level exceedances were determined in the reporting period for the stations of CM1, CM2(B), CM3, CM4 and CM5.
- 7.2.2 Additional weekly noise monitoring from 19:00 to 23:00 was carried out at CM4 on 2, 8, 14, 20 and 26 February 2024 with respect to the restricted hour works under CNP GW-RW0559-23, GW-RN1053-23, GW-RN1290-23 and GW-RN0101-24. All the results are within or below the baseline level range after baseline correction.
- 7.2.3 Additional weekly night time noise monitoring from 23:00 to 07:00 on next day was carried out at CM4 on 2, 9, 14, 20 and 26 February 2024 with respect to the restricted hour works under CNP GW-RW0559-23, GW-RN1053-23, GW-RN1290-23 and GW-RN0101-24. All the results are within or below the baseline level range after baseline correction.

### 7.3 Review of the Reasons for and the Implications of Non-compliance

- 7.3.1 No environmental non-compliance was recorded in the reporting month.

### 7.4 Summary of action taken in the event of and follow-up on non-compliance

- 7.4.1 There was no particular action taken since no non-compliance was recorded in the reporting period.

## 8. Environmental Site Audit

### Weekly Site Inspection

- 8.1.1 Contract no. DC/2020/05: The Environmental Team (ET) conducted weekly site inspections for the Contract on 8, 15, 22 and 29 February 2024. IEC attended the joint site inspection on 8, 15, 22 and 29 February 2024.
- 8.1.2 Contract no. DC/2023/12: The Environmental Team (ET) conducted weekly site inspections for the Contract on 5, 14, 21 and 28 February 2024. IEC attended the joint site inspection on 5, 14, 21 and 28 February 2024.

### Landscape Site Audit

- 8.1.3 Within this reporting month, bi-weekly landscape site audits were conducted on 6 and 20 February 2024.

### Ecology Site Audit

- 8.1.4 Within this reporting month, monthly ecology site audits were conducted on 6 February 2024.
- 8.1.5 The summary of inspection is presented in **Appendix 8.1**.

## 9. Complaints, Notification of Summons and Prosecution

- 9.1.1 No environmental complaint was received in the reporting period.
- 9.1.2 No notification of summons and successful prosecutions were received in the reporting month.
- 9.1.3 The details of cumulative complaint log and updated summary of complaints are presented in **Appendix 9.1**.
- 9.1.4 Cumulative statistic on complaints and successful prosecutions are summarized in **Table 9.1** and **Table 9.2** respectively.

Table 9.1 Cumulative Statistics on Complaints

Reporting Period	No. of Complaints
February 2024	0
<b>Total</b>	<b>9</b>

Table 9.2 Cumulative Statistics on Successful Prosecutions

Environmental Parameters	Cumulative No. Brought Forward	No. of Successful Prosecutions this month (Offence Date)	Cumulative No. Project-to-Date
Air	-	0	0
Noise	-	0	0
Waste	-	0	0
Total	-	0	0

## 10. Conclusion

- 10.1.1 The EM&A programme was carried out in accordance with the EM&A Manual requirements, minor alterations to the programme proposed were made and reviewed regularly in response to changing circumstances.
- 10.1.2 The scheduled construction activities and the recommended mitigation measures for the coming month are listed in **Table 10.1**. The construction programmes of the Project are provided in **Appendix 10.1**.

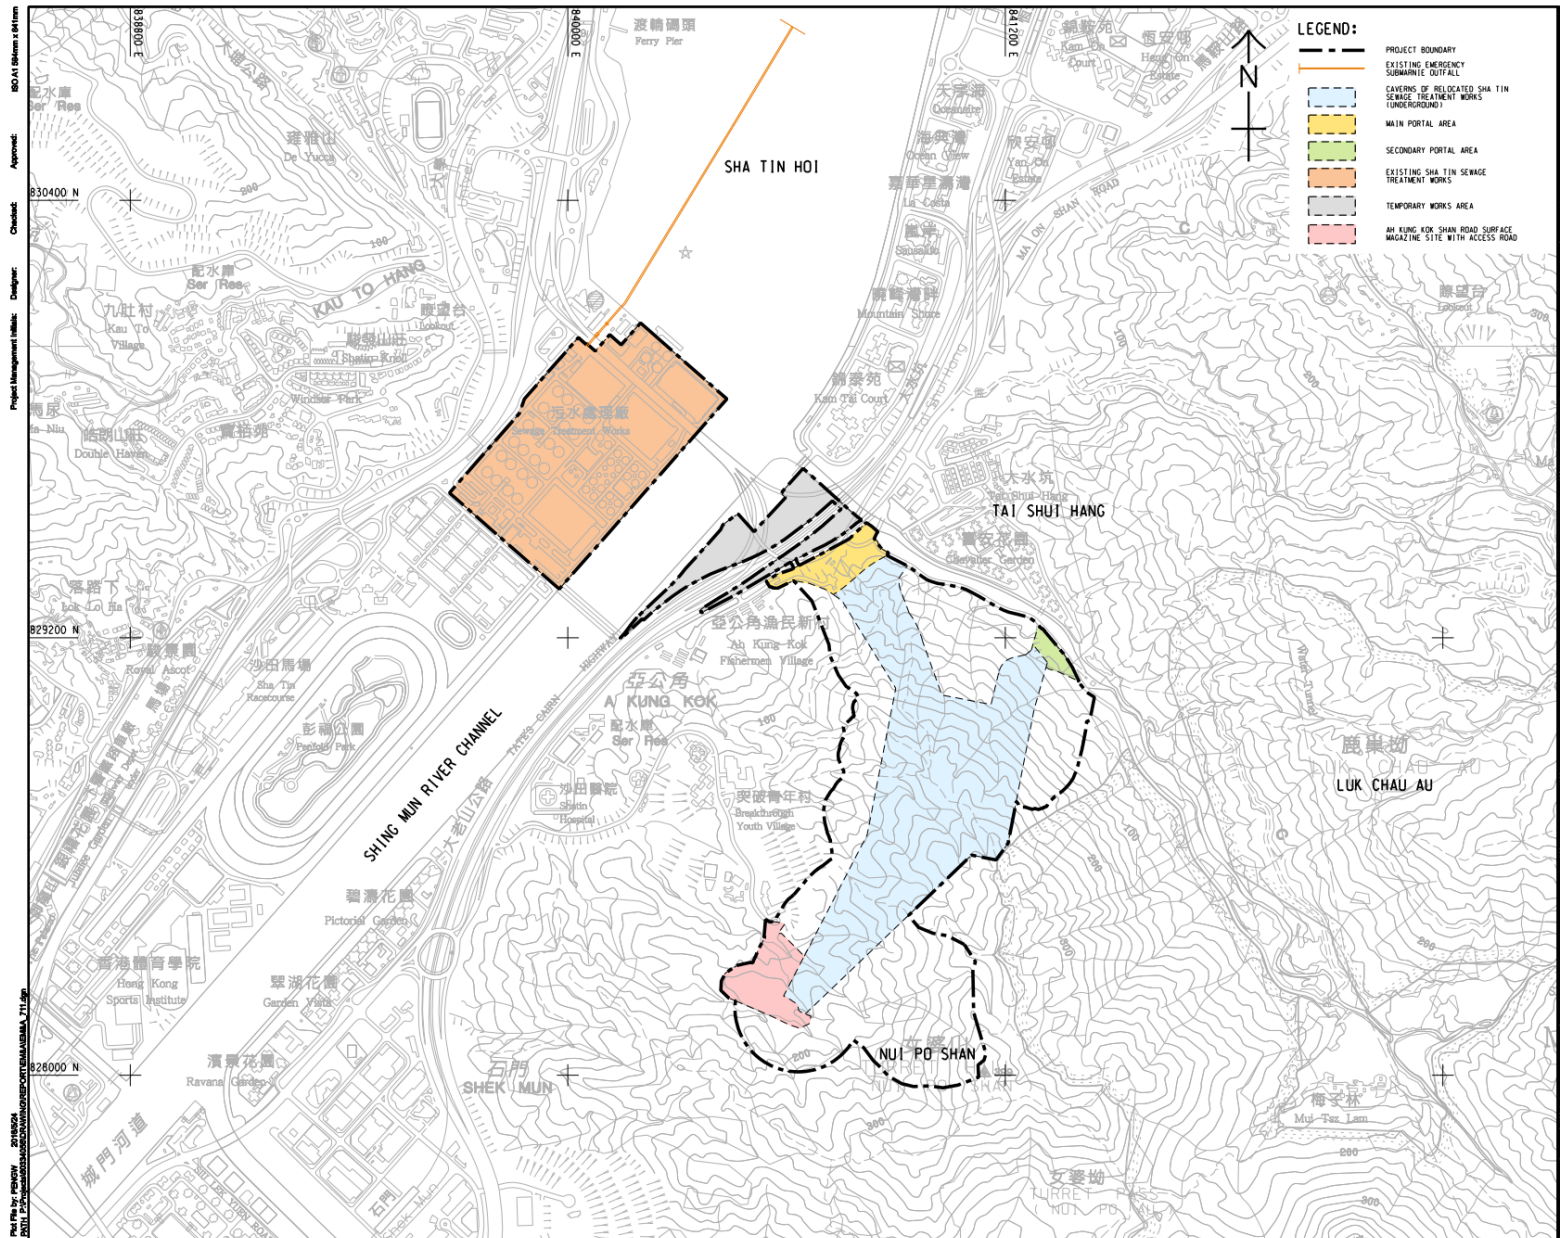

Table 10.1 Construction Activities and Recommended Mitigation Measures in Coming Reporting Month

<b>Key Construction Works</b>	<b>Recommended Mitigation Measures</b>
<b><u>Contract no. DC/2020/05</u></b>	
<ul style="list-style-type: none"> <li>• Slope stabilization works</li> <li>• Tunneling works</li> <li>• Retaining wall construction</li> <li>• Operation of rock crushing plant</li> <li>• TBM Tunneling and Pipe Jacking</li> <li>• Preservation and protection of existing trees</li> <li>• Ventilation shaft excavation</li> <li>• Overhead Ventilation Dust (OHVD)</li> </ul>	<ul style="list-style-type: none"> <li>• Dust control during dust generating works;</li> <li>• Implementation of proper noise pollution control;</li> <li>• Provision of protection to ensure no runoff out of site area or direct discharge into public drainage system;</li> <li>• Direct impact to plant species of conservation importance recorded in the vicinity of the construction sites shall be avoided;</li> <li>• Excavation materials shall be well covered; and</li> <li>• Mitigation measures to dust and noise control should be provided to construction of noise barrier, bored piling, Installation of noise barrier.</li> </ul>
<b><u>Contract no. DC/2023/12</u></b>

## Document Information

Project Title	Contract No. CPW 01/2023 Environmental Team for Relocation of Sha Tin Sewage Treatment Works to Caverns
Document Title	Ecological Monitoring Report
Fugro Project No.	0039
Fugro Document No.	0039/23/ED/0041
Issue Number	00
Issue Status	Draft
Fugro Legal Entity	Fugro Technical Services
Issuing Office Address	13/F, Fugro House – KCC2, 1 Kwai On Rd, Kwai Chung, NT, Hong Kong

## Client Information

Client	Drainage Services Department
Client Address	44/F, Revenue Tower, 5 Gloucester Road, Wan Chai, Hong Kong
Client Contact	Mr. Felix C S Yu

## Document History

Issue	Date	Status	Comments on Content	Prepared By	Checked by	Approved By
00	08 Mar 2024	For review	Awaiting client comments	JT	CL	WS

## Project Team

Initials	Name	Role
WS	Wingo So	Environmental Team Leader
CL	Calvin Leung	Principal Environmental Consultant
TW	Toby Wan	Deputy Environmental Team Leader
RL	Ray Li	Environmental Consultant
JT	Jhomar Tillo	Ecologist

Table 3. Summary of the Status of Compensatory Planting	4
Table 4: Summary of the Status of Transplantation	7

# 1. Recommendation on Plant Species of Conservation Importance Under the Approved Protection and Transplantation Proposal

## 1.1 Pre-construction Survey

1.1.1 As per section 3.1 of the approved Protection and Transplantation Proposal (ver. 8.2), pre-construction survey shall be carried out by a qualified ecologist which includes:

- 1) Desktop study and survey preparation based on the specific area of site clearance as notified by the construction contractor confirmed with the Resident Site Staff;
- 2) Schedule and conduct physical site survey to locate the affected species, reconfirm the species condition and record physical condition before transplantation; and
- 3) Report site survey results and provide recommendations to contractor on transplantation and post-transplantation maintenance.

## 1.2 Transplantation

1.2.1 According to the approved Protection and Transplantation Proposal (ver. 8.2), four out of six recorded plant species of conservation importance are to be transplanted. The relevant information of the plant species were summarized in **Table 1, Table 2** and **Appendix A**.

Table 1. Recommendations (By Site) on the Recorded Plant Species of Conservation Importance (Approved Protection and Transplantation Proposal ver. 8.2)

Common Name	Species Name	Units	Recommendations				
			Retain	Transplant	Fell	Total (in Project Boundary)	Compensatory Planting in Temporary Works Area
Adopted from approved Protection and Transplantation Proposal ver. 8.2							
Site 1							
Small Persimmon	<i>Diospyros vaccinioides</i>	No.	930	350	4810	6090	Seedlings + Broadcast Seeding
Luofushan Joint-fir	<i>Gnetum luofuense</i>	m <sup>2</sup>	270	0	1660	1930	Seedlings
Purple Bulb Orchid	<i>Ania hongkongensis</i>	No.	4	1	0	5	N/A
Site 2							
Small Persimmon	<i>Diospyros vaccinioides</i>	No.	3240	250	4050	7540	Seedlings + Broadcast Seeding
Luofushan Joint-fir	<i>Gnetum luofuense</i>	m <sup>2</sup>	750	0	3230	3980	Seedlings

Common Name	Species Name	Units	Recommendations				
			Retain	Transplant	Fell	Total (in Project Boundary)	Compensatory Planting in Temporary Works Area
Hong Kong Eagle's Claw	<i>Artabotrys hongkongensis</i>	No.	0	0	1	1	1 Seedling
Butulang Canthium	<i>Canthium dicoccum</i>	No.	6	3	5	14	5 Whip Trees
Lamb of Tartary	<i>Cibotium barometz</i>	No.	860	61	30	951	No suitable habitat for compensatory planting
Buttercup Orchid	<i>Spathoglottis pubescens</i>	No.	0	16	1	17	Difficult to propagate from seed & not available in the market
<b>Site 3</b>							
Small Persimmon	<i>Diospyros vaccinioides</i>	No.	4510	100	8250	12860	Seedlings + Broadcast Seeding
Luofushan Joint-fir	<i>Gnetum luofuense</i>	m <sup>2</sup>	990	0	1990	2980	Seedlings
Butulang Canthium	<i>Canthium dicoccum</i>	No.	0	0	4	4	4 Whip Trees
Lamb of Tartary	<i>Cibotium barometz</i>	No.	101	7	50	158	No suitable habitat for compensatory planting
Incense Tree	<i>Aquilaria sinensis</i>	No.	0	1	0	1	N/A

Table 2. Recommendations on the Recorded Plant Species of Conservation Importance (Approved Protection and Transplantation Proposal ver. 8.2)

Common Name	Species Name	Units	Recommendations				
			Retain	Transplant	Fell	Total (in Project Boundary)	Compensatory Planting in Temporary Works Area
Adopted from approved Protection and Transplantation Proposal ver. 8.2							
Small Persimmon	<i>Diospyros vaccinioides</i>	No.	8,680	700	17,110	26,490	Seedlings (17,110)
Luofushan Joint-fir	<i>Gnetum luofuense</i>	m <sup>2</sup>	2,010	0	6,880	8,890	Seedlings (22 locations at 50m interval)
Purple Bulb Orchid	<i>Ania hongkongensis</i>	No.	4	1	0	5	N/A
Hong Kong Eagle's Claw	<i>Artabotrys hongkongensis</i>	No.	0	0	1	1	1 Seedling

Common Name	Species Name	Units	Recommendations				Compensatory Planting in Temporary Works Area
			Retain	Transplant	Fell	Total (in Project Boundary)	
Butulang Canthium	<i>Canthium dicoccum</i>	No.	6	3	9	18	9 Whip Trees
Lamb of Tartary	<i>Cibotium barometz</i>	No.	961	68	80	1,109	No suitable habitat for compensatory planting
Incense Tree	<i>Aquilaria sinensis</i>	No.	0	1	0	1	N/A
Buttercup Orchid	<i>Spathoglottis pubescens</i>	No.	0	16	1	17	Difficult to propagate from seed & not available in the market

### 1.3 Compensatory Planting

- 1.3.1 The potential compensatory planting of the 17,110 nos. of *Diospyros vaccinioides*, 6,880 m<sup>2</sup> of *Gnetum luofuense*, nine (9) nos. of *Canthium dicoccum*, about 80 nos. of *Cibotium barometz*, and one (1) no. of *Artabotrys hongkongensis* shall be in accordance with the approved Protection and Transplantation Proposal (ver. 8.2). The status of the compensatory planting is presented in **Table 3**.

Table 3. Summary of the Status of Compensatory Planting

Common Name	Species Name	Units	Compensatory Planting in Temporary Works Area	Contract No.	Seeds Collection		Broadcast Seeding	Seedling Planting	Monitoring Status		
					Nos. of Seeds Collected	Date (MM/YY)	Date (MM/YY)	Date (MM/YY)	Started at	Ended at	Status
Small Persimmon	<i>Diospyros vaccinioides</i>	No.	Seedlings (17,110)	DC/2020 /05	3000	11/2021-12/2021	4/2022	8/2022 & 9/2022	9/2022 & 10/2022	9/2023	<b>Completed</b>
					3000	11/2022	4/2023	08/2023	08/2023	-	On-going
Luofushan Joint-fir	<i>Gnetum luofuense</i>	m <sup>2</sup>	Seedlings (22 locations at 50m interval)	Pending	-	-	-	-	-	-	-
Hong Kong Eagle's Claw	<i>Artabotrys hongkongensis</i>	No.	1 Seedling	Pending	-	-	-	-	-	-	-
Butulang Canthium	<i>Canthium dicoccum</i>	No.	9 Whip Trees	Pending	-	-	-	-	-	-	-

- 1.3.2 Further to **Table 3**, this monitoring report currently focuses on the status of the compensatory planting for *D. vaccinioides*.

**Seeds Collection, Germination, Broadcast Seeding, and Seedling Planting of *Diospyros vaccinioides***

- 1.3.3 According to Section 3.8 under the approved Protection and Transplantation Proposal (ver. 8.2), healthy seeds of *D. vaccinioides* will be selected within the fruiting period (October – February). Before the receptor site is available, the collected seeds should be stored in a sealed container, with moisture content below 7% and at temperatures of less than 15°C.
- 1.3.4 According to Section 5.8 of the approved protection and Transplantation Proposal (ver. 8.2), a total of 13,060 nos. of *D. vaccinioides* seedlings shall be planted on newly formed SIMAR slopes in Sites 1 and 3.
- 1.3.5 According to Section 5.13 of the approved Protection and Transplantation Proposal (ver. 8.2), seeds of *D. vaccinioides* shall be broadcasted in spring so that the seeds can germinate and establish on wet season. To improve the germination rate of the seeds, soaking is recommended by the contractor.

## 2. Results of the Ecological Monitoring

### 2.1 Pre-construction survey

2.1.1 Pre-construction survey was already completed.

### 2.2 Transplantation Monitoring

2.2.1 Based on method statement in the approved Protection and Transplantation Proposal, all the plants affected by the Project shall be transplanted as soon as possible. Where possible, transplantation work is preferably done on the same day of lifting. Otherwise, the plants dug out shall be transported to a nursery before transplanting into their final receptor sites.

2.2.2 No transplantation was conducted in February 2024.

#### One-year Establishment Period after Planting (Post-Transplantation Monitoring)

2.2.3 Regular monitoring of health condition of transplanted plants, also called post-transplantation monitoring, shall be carried out in monthly basis in the first three months, quarterly afterwards during one-year establishment period after transplanting to receptor site/nursery as per Section 5.4 and 5.5 of the approved Protection and Transplantation Proposal (ver. 8.2).

#### Recommendation on post-transplantation monitoring maintenance

2.2.4 According to environmental condition and location of the receptor sites/nursery, watering frequency was recommended in daily practice for at least the first 3 months as the transplant time is in summer months with strong sunlight and high temperature; except the days with fog and rain. Water frequency may be reduced based on the plant condition after monitoring in the first 3 months.

2.2.5 In contrast, the Landscape Contractor was recommended to check all transplanted plants after heavy rains/typhoon under safe condition, in order to carry out any stabilization/maintenance work. Blocked drainage shall be cleared; excessive water shall be pumped or diverged from nursery ground; saturated soil shall be aerated.

2.2.6 Other maintenance works (e.g., weeding, spraying off construction dust, use of approved pesticide and fertilization shall be determined throughout the monitoring period in agreement with the Supervisor of the Contract and ET.

#### Summary of the Transplantation and Recommendations after Establishment Period

2.2.7 The status of the transplantation is provided in **Table 4**.

Table 4: Summary of the Status of Transplantation

Common Name	Species Name	Units	Recommendations for Transplant*	Pre-construction survey implementation**	Transplantation Date		Monitoring Status		
					To Nursery (MM/YY)	To Receptor Site (MM/YY)	Started at	Ended at	Status
Site 1

<b>Site 3</b>									
Small Persimmon	<i>Diospyros vaccinioides</i>	No.	100	7/2020	9/2020	5/2021	6/2021	6/2022	Completed
Lamb of Tartary	<i>Cibotium barometz</i>	No.	7	NA	-	7/2019	7/2019	6/2020	Completed
Incense Tree	<i>Aquilaria sinensis</i>	No.	1	NA	-	7/2019	7/2019	6/2020	Completed
<p>*Adopted from previously approved Protection and Transplantation Proposal Version 8.2</p> <p>** Pre-construction survey implementation was conducted on <i>Diospyros vaccinioides</i> only</p>									

2.2.8 Based on latest conditions of the after-establishment period, regular monitoring is not recommended after establishment period except replacement planting if found dead (subject to agreement with AFCD).

## 2.3 Compensatory Planting Monitoring

2.3.1 No seeds collection of *Diospyros vaccinioides* was conducted in February 2024. However, a total of 3000 nos. of seeds of *D. vaccinioides* were collected by the contractor of Contract No. DC/2020/05 between November and December 2021 and an additional 3000 nos. of seeds of *D. vaccinioides* in November 2022. Photo records of *D. vaccinioides* are shown in **Appendix B**.

2.3.2 A total of 6000 nos. of *D. vaccinioides* seeds were sown on plates in nursery by the contractor of Contract No. DC/2020/05 (3000 nos. of seeds of *D. vaccinioides* in April 2022 and an additional 3000 nos. of seeds of the same species in April 2023). Photo records of *D. vaccinioides* are shown in **Appendix B**.

2.3.3 Soaked seeds of *D. vaccinioides* (second batch) were broadcasted in the nursery on April 2023. A total of 3,000 nos. of *D. vaccinioides* seedlings have been transplanted on the newly formed SIMAR slopes (Portion 12: RMZ3 downhill) in August 2023 during wet season. Moreover, the contractor was reminded that frequent watering is required to reduce loss in dry season. Photo records of *D. vaccinioides* are shown in **Appendix B**.

2.3.4 Monthly monitoring for the on-going compensatory planting was conducted on 06 February 2024. Health and growth condition of the transplanted second batch of *D. vaccinioides* seedlings are generally fair in condition. It was also noted that there were no construction activities adjacent to the receptor site; hence, there are no adverse impacts on the transplanted seedlings. Moreover, the contractor was reminded to remove tall weeds growing near the *D. vaccinioides* seedlings. Photo records of *D. vaccinioides* and site observations are shown in **Appendix B**.

### 3. Summary

- 3.1.1 Monthly ecological monitoring was conducted on 06 February 2024. No pre-construction survey was conducted during the current monitoring period since it has already been completed. Furthermore, transplantation and seeds collection for compensatory planting were also not conducted within the monitoring period.
- 3.1.2 During the current monitoring period, it was noted that the growth and health condition of the transplanted second batch of *D. vaccinioides* seedlings were generally fair in condition. There were no construction activities adjacent to the receptor; hence, no adverse impacts are expected on the transplanted seedlings of *D. vaccinioides* in the receptor site. Moreover, the contractor was reminded to remove tall weeds growing near the *D. vaccinioides* seedlings.
- 3.1.3 Based on the on-going detailed design of the Project, the details of the approved Protection and Transplantation Proposal (ver. 8.2) and the ecological monitoring are subject to review and will be updated in stages.

## Environmental Mitigation Implementation Schedule

**APPENDIX C IMPLEMENTATION SCHEDULE OF RECOMMENDED MITIGATION MEASURES**

**C.1 Introduction**

C.1.1 This section presents the implementation schedule of mitigation measures for the Project. **Table C.1** summarises the details of the recommended mitigation measures for all works areas. For each recommended mitigation measures, both the location and timing for the measure have clearly been identified as well as the parties responsible for implementing the measure and for maintenance (where applicable).

*Table C.1 Implementation Schedule of Recommended Mitigation Measures*

EIA Ref.	EM&A Log Ref.	Environmental Protection Measures	Location / Duration of Measures / Timing of Completion of Measures	Implementation Agent	Implementation Stage <sup>1</sup>				Relevant Legislation & Guidelines
					Des	C	O	Dec	
<b>Air Quality Impact</b>									
Construction Phase									
Table 3.5	2.4.1	The rock crushing plant is configured as an enclosed system. Dust collector with dust removal efficiency of 99% will be provided at the exhaust of the rock crusher during rock crushing. Watering will be provided to maintain material in wet condition. Vehicles would be required to pass through the wheel washing facilities provided at site exit.	Rock Crushing Plant / Construction Phase	Contractor	√	√		√	Air Pollution Control Ordinance (APCO)
3.8.1	2.4.1	Watering eight times a day on active works areas, exposed areas and unpaved haul roads to reduce dust emission by 87.5%.	All active works areas, exposed areas and unpaved haul roads	Contractor		√		√	APCO

<sup>1</sup> Des = Design; C = Construction; O = Operation; Dec = Decommissioning

					Des	C	O	Dec	
		<p>where dust generation is likely during the loading process of loose material, particularly in dry seasons/ periods.</p> <ul style="list-style-type: none"> <li>• Provision of not less than 2.4m high hoarding from ground level along site boundary where adjoins a road, streets or other accessible to the public except for a site entrance or exit.</li> <li>• Imposition of speed controls for vehicles on site haul roads.</li> <li>• Where possible, routing of vehicles and positioning of construction plant should be at the maximum possible distance from ASRs.</li> <li>• Every stock of more than 20 bags of cement or dry PFA should be covered entirely by impervious sheeting or placed in an area sheltered on the top and the 3 sides.</li> <li>• Instigation of an environmental monitoring and auditing program to monitor the construction process in order to enforce controls and modify method of work if dusty conditions arise.</li> </ul>							

EIA Ref.	EM&A Log Ref.	Environmental Protection Measures	Location / Duration of Measures / Timing of Completion of Measures	Implementation Agent	Implementation Stage <sup>1</sup>				Relevant Legislation & Guidelines
					Des	C	O	Dec	
	Operation Phase								
3.5.2	-	Sludge tanks with totally enclosed design proven by DSD should be deployed for transporting sludge.  With thorough cleaning practice and regular condition test of the sludge tanks, odour emission and leachate leakage during storage and transportation are not anticipated.	Cavern Sewage Treatment Works (CSTW) / Operation Phase	Project Proponent / Operator	√		√		-
3.6.2, 3.7.2	2.4.2	All treatment units with potential odour emission will be covered and the exhausted air will be conveyed to the deodouriser (with 80 – 97% odour removal efficiency) for treatment before discharge to the environment.	CSTW / Operation Phase	Design team / Project Proponent / Operator	√		√		-
3.7.2	2.4.2	The following appropriate odour control measures would be implemented.  (i) Adopting the advantage of caverns as natural barriers for odour control; (ii) Covering up of odour sources; (iii) Preventing odour leakage through the access tunnels by applying negative pressure inside caverns; (iv) Installing deodourizing units to clean up the collected foul air; (v) Discharging exhausted air at height to further enhance the dilution effect; and (vi) Enhancing the odour management of the sludge transportation.	CSTW / Operation Phase	Design team / Project Proponent / Operator	√		√		-

EIA Ref.	EM&A Log Ref.	Environmental Protection Measures	Location / Duration of Measures / Timing of Completion of Measures	Implementation Agent	Implementation Stage <sup>1</sup>				Relevant Legislation & Guidelines
					Des	C	O	Dec	
3.10.2	2.3.1	Odour monitoring at the inlet and outlet of the deodourizing units is proposed to be conducted for first three years of the operation of CSTW, quarterly in the first year, and once every 6 months in the second and third years if monitoring results remain below the limit levels.	CSTW / Operation Phase	Project Proponent / Operator	√		√		-
3.10.2	2.3.2	An Odour Complaint Registration System is also proposed in the EM&A programme to check whether the deodorizing units can fulfill the recommended odour removal performance.	CSTW / Operation Phase	Operator			√		-
3.10.2	-	Any unexpected leakage from tanks could be observed with monitoring equipment. Monitoring equipment would be installed in the CSTW to monitor the concentration of H <sub>2</sub> S, CO and CO <sub>2</sub> and methane. Investigation and repair works would be carried out immediately if abrupt increase of these concentrations are reported. Emergency Plan would be established for these upset conditions.	CSTW / Operation Phase	Project Proponent / Operator	√		√		-
<b>Noise Impact</b>									
Construction Phase									
4.5.1.6	-	Re-provision of 220m length noise barrier with 10mPD on temporary access haul road to replace the existing 150m length noise barrier with 9.2mPD to 10mPD on Ma On Sha Road. The	Proposed temporary access / Construction Phase	Contractor		√			Technical Memorandum on Environmental Impact Assessment Process (EIAO-TM), Noise Control Ordinance (NCO)

EIA Ref.	EM&A Log Ref.	Environmental Protection Measures	Location / Duration of Measures / Timing of Completion of Measures	Implementation Agent	Implementation Stage <sup>1</sup>				Relevant Legislation & Guidelines
					Des	C	O	Dec	
		location of the relocated noise barrier is shown in <b>Figure No. 60334056/EIA/4.02</b> and <b>Appendix 4.07</b> . Once the construction work for the CSTW is completed, the temporary access roads would be demolished and the relevant section of Ma On Shan Road and associated noise barrier would be recovered as before.							
4.8.1	3.8.1	The use of quiet plant associated with the construction works is prescribed in British Standard "Code of practice for noise and vibration control on construction and open sites, BS5228" which contains the SWLs for specific quiet PME.	All Construction Work Sites	Contractor		√		√	EIAO-TM, NCO
4.8.1	3.8.1	To alleviate the construction noise impact on the affected NSRs, movable noise barrier for Air Compressor, Bar Bender and Cutter, Breaker, Chisel, Saw, Compactor, Mixers, Pump, Crane, Desander, Drilling Rig, Dump Truck, Excavator, Generator, Grab, Lorry, Paver, Poker and Roller are proposed.	All Construction Work Sites	Contractor		√		√	EIAO-TM, NCO
4.8.1	3.8.1	Provision of noise barrier/acoustic mats for Drilling Jumbo so as to have screening effecting with 10 dB(A) noise attenuation	Drilling Jumbo operate outside the portal and within 20m inside the portal	Contractor		√			EIAO-TM, NCO

<b>Water Quality Impact</b>									
Construction Phase									
5.7.2	4.10	Water used in ground boring and drilling for site investigation or rock / soil anchoring should as far as practicable be re-circulated after sedimentation. When there is a need for final disposal, the wastewater should be discharged into storm drains via silt removal facilities.	Construction Sites / Construction Phase	Contractor		√			Water Pollution Control Ordinance (WPCO), EIAO-TM
5.7.2	4.10	All vehicles and plant should be cleaned before they leave a construction site to minimise the deposition of earth, mud, debris on roads. A wheel washing bay should be provided at every site exit if practicable and wash-water should have sand and silt settled out or removed before discharging into storm drains. The section of construction road between the wheel washing bay and the public road should be paved with backfill to reduce vehicle tracking of soil and to prevent site run-off from entering public road drains.	Construction Sites / Construction Phase	Contractor		√			Professional Persons Environmental Consultative Committee (ProPECC) Practice Note (PN) 1/94, WPCO, Waste Disposal Ordinance (WDO)
5.7.2	4.10	Good site practices should be adopted to remove rubbish and litter from construction sites so as to prevent the rubbish and litter from spreading from the site area. It is recommended to clean the construction sites on a regular basis.	Construction Sites / Construction Phase	Contractor		√			WPCO, EIAO-TM

EIA Ref.	EM&A Log Ref.	Environmental Protection Measures	Location / Duration of Measures / Timing of Completion of Measures	Implementation Agent	Implementation Stage <sup>1</sup>				Relevant Legislation & Guidelines
					Des	C	O	Dec	
5.7.2	4.10	The site practices outlined in ProPECC PN 1/94 "Construction Site Drainage" should be followed where applicable to minimise surface run-off and the chance of erosion.	Construction Sites / Construction Phase	Contractor		√			WPCO, EIAO-TM, ProPECC PN 1/94
5.7.2	4.10	There is a need to apply to EPD for a discharge licence for discharge of effluent from the construction site under the WPCO. The discharge quality must meet the requirements specified in the discharge licence. All the runoff and wastewater generated from the works areas should be treated so that it satisfies all the standards listed in the Technical Memorandum on Standards for Effluents Discharged into Drainage and Sewerage Systems, Inland and Coastal Waters (TM-DSS). The beneficial uses of the treated effluent for other on-site activities such as dust suppression, wheel washing and general cleaning etc., can minimise water consumption and reduce the effluent discharge volume. If monitoring of the treated effluent quality from the works areas is required during the construction phase of the Project, the monitoring should be carried out in accordance with the relevant WPCO licence which is under the ambit of RO of EPD.	Construction Sites / Construction Phase	Contractor		√			WPCO, EIAO-TM, (TM-DSS)
5.7.2	4.10	Contractor must register as a chemical waste producer if chemical wastes would be produced from the	Construction Sites / Construction Phase	Contractor		√			WPCO, EIAO-TM, WDO

 Description : B & K Acoustic Multifunction Calibrator 4226 (Traditional free field setting)  
 Equipment ID. : R-108-1  
 Date of Receipt : 14-Jul-2023  
 Date of Calibration : 19-Jul-2023  
 Calibration Location : Calibration Laboratory of FTS      Ambient Temperature : 20±2 °C  
 Method Used : By direct comparison      Relative Humidity : <80% R.H.  
 As Found : Functional / Within specs  
 As Left : Complies with the specification limits (EN61672-1:2003 Class 1)

### Calibration Results :

Parameters		Mean Value (dB)	Specification Limit(dB)
A-weighting frequency response	4000Hz	1.1	2.6 to -0.6
	2000Hz	1.3	2.8 to -0.4
	1000Hz	0.0	1.1 to -1.1
	500Hz	-3.3	-1.8 to -4.6
	250Hz	-8.8	-7.2 to -10.0
	125Hz	-16.2	-14.6 to -17.6
	63Hz	-26.3	-24.7 to -27.7
Differential level linearity	94dB-104dB	0.0	± 0.6
	104dB-114dB	0.0	± 0.6

### Remarks :

- The equipment used in this calibration is traceable to recognized National Standards.
- The UUT does comply with EN 61672-1: 2003 Class 1 sound level meter for the above measurement.
- For calibration: Reference SPL are 94, 104 & 114dB, range setting is 20-140dB & time weighting is fast
- The mean value is the average of four measurements.
- The expanded uncertainty of calibration results is 0.6 dB with a coverage factor of 1.98 providing a confidence level of approximate 95%.
- The values given in this Calibration Certificate only relate to the values at the time of the test and any uncertainties will not include allowance for the equipment long term drift, variations with environment changes, vibration and shock during transportation, overloading, mis-handling or the capability of any other laboratory to repeat the measurement.

EN 61672-1: 2003 Class 1

### Laboratory Information

#### Details of Reference Equipment -

Description : B &amp; K Acoustic Multifunction Calibrator 4226 (Traditional free field setting)

Equipment ID. : R-108-1

Date of Receipt : 01-Aug-2023

Date of Calibration : 03-Aug-2023

Calibration Location : Calibration Laboratory of FTS Ambient Temperature : 20±2 °C

Method Used : By direct comparison Relative Humidity : &lt;80% R.H.

#### Calibration Results :

Parameters	Mean Value (dB)	Specification Limit(dB)
A-weighting frequency response	4000Hz	0.6
	2000Hz	1.0
	1000Hz	-0.1
	500Hz	-3.4
	250Hz	-8.7
	125Hz	-16.2
	63Hz	-26.3
Differential level linearity	94dB-104dB	± 0.6
	104dB-114dB	± 0.6

#### Remarks :

1. The equipment used in this calibration is traceable to recognized National Standards.
2. The mean value is the average of four measurements.
3. For calibration: Reference SPL are 94, 104 & 114dB, range setting is 20-140dB & time weighting is fast
4. The equipment does comply with EN 61672-1: 2003 Class 1 sound level meter for the above measurement.
5. The values given in this Calibration Certificate only relate to the values at the time of the test and any uncertainties will not include allowance for the equipment long term drift, variations with environment changes, vibration and shock during transportation, overloading, mis-handling or the capability of any other laboratory to repeat the measurement.

**CALIBRATION CERTIFICATE OF DUST METER**

Client : Fugro Technical Services Limited

Project : Calibration Services

**Client Supplied Information**

Details of Unit Under Test, UUT -

Description : Laser Dust Monitor  
 Manufacturer : SIBATA  
 Model No. : LD-5R  
 Serial No. : 114893  
 Next Calibration Date : 23-Aug-2024

**Laboratory Information**

Details of Reference Equipment -

Description : Reference balance  
 Equipment ID. : C-065-5  
 Date of Calibration : 25-Aug-2023 Ambient Temperature : 31 °C  
 Calibration Location : Calibration Lab. of FTS  
 Method Used : By direct comparison the weight of dust particle trapped in a filter paper using high volume sampler (TSP method) for a certain period, with the reading of the UUT. They should be placed at the same location and powered on and off at the same time.

**Calibration Results :**

Reference concentration (mg/m <sup>3</sup> )	Total count for 1 hour	CPM (Count per minute)
0.0545	850	14.17
0.0587	1089	18.15
0.0775	998	16.63

**Remarks:**

1. The equipment being used in this calibration is traceable to recognized National Standards.
2. The interpolation equation : Concentration (mg/m<sup>3</sup>) = K x UUT reading (CPM) where K = 0.003384
3. Correlation coefficient (r) : 1.0000

Checked by : [Signature] Date : 15-12-2023 Certified by : [Signature] Date : 18-12-2023

\*\*\* unavailable

^ Information of wind direction and wind speed for Waglan Island are based on automatic weather station data since August 1989

Trace means rainfall less than 0.05 mm

Data Source: Hong Kong Observatory

<b>31</b>						

**Remarks**

1. Actual monitoring may be subjected to change due to any safety concern or adverse weather condition
2. **AQM:** Air Quality Monitoring: 3 x 1-hour TSP Monitoring per 6 days
3. **APS Performance Test:** Monthly Air Purification System performance test
4. **NM:** Noise Monitoring: Leq (30 min) between 0700 and 1900 hours
5. **NM (Evening time):** Additional noise monitoring will be carried out if construction works are extended to include works between 1900 and 2300 hours.
6. **NM (Night time):** Additional noise monitoring will be carried out if construction works are extended to include works between 2300 and 0700 hours of next day.
7. Air Quality Monitoring Location: **AM1** (Ah Kung Kok Fishermen Village), **AM2** (Block H, Kam Tai Court), **AM3(B)** (Outside A Kung Kok Street Garden), **AM4** (Wellborn Kindergarten), **AM5** (The Neighbourhood Advice-Action Council Harmony Manor), **ASR51** (The Hong Kong Yaumati Ferry Company Ltd. Administrative Building)
8. Noise Monitoring Location: **CM1** (Wellborn Kindergarten), **CM2(B)** (Outside A Kung Kok Street Garden), **CM3** (S.K.H. Ma On Shan Holy Spirit Primary School), **CM4** (Ah Kung Kok Fishermen Village), **CM5** (The Neighbourhood Advice-Action Council Harmony Manor)
9. APS Performance Test Location: **ASR52** (North West Tsing Yi Interchange Maintenance Workshops), **ASR55** (Lantau Link Visitor Centre, Nana Café, Model Train Shop)

20-02-2024	Fine	0.5	13:00	62.3	56.5	60.0	70
26-02-2024	Fine	0.4	13:00	61.7	56.0	62.0	70

### Monitoring Location : CM3 - R/F, S.K.H. Ma On Shan Holy Spirit Primary School

Date	Weather	Wind Speed (m/s)	Start Time	Noise Monitoring (30min)			Limit Level
				Leq dB(A)	L90 dB(A)	L10 dB(A)	Leq <sup>(1)</sup>
02-02-2024	Fine	0.6	13:28	66.2	64.0	68.0	70
08-02-2024	Cloudy	0.8	14:03	66.2	64.5	68.0	70
14-02-2024	Fine	0.5	13:52	67.6	65.0	68.5	70
20-02-2024	Fine	0.5	10:27	63.0	60.5	65.0	70
26-02-2024	Fine	0.8	9:59	64.8	62.0	66.5	70

### Monitoring Location : CM4 - G/F, Ah Kung Kok Fishermen Village

Date	Weather	Wind Speed (m/s)	Start Time	Noise Monitoring (30min)			Limit Level
				Leq dB(A) <sup>(2)</sup>	L90 dB(A)	L10 dB(A)	Leq
02-02-2024	Fine	0.5	10:00	57.2	55.0	58.8	75
08-02-2024	Cloudy	0.6	14:00	60.6	58.2	62.1	75
14-02-2024	Fine	0.5	16:06	56.1	52.3	58.3	75
20-02-2024	Fine	0.5	16:00	54.6	52.3	56.4	75
26-02-2024	Fine	0.7	13:30	59.7	57.2	61.7	75

### Monitoring Location : CM5 - R/F, The Neighbourhood Advice-Action Council Harmony Manor

Date	Weather	Wind Speed (m/s)	Start Time	Noise Monitoring (30min)			Limit Level
				Leq dB(A)	L90 dB(A)	L10 dB(A)	Leq
02-02-2024	Fine	0.5	8:26	53.8	52.0	55.5	75
08-02-2024	Cloudy	0.5	8:22	55.7	52.5	57.0	75
14-02-2024	Fine	0.3	8:17	55.2	53.0	56.5	75
20-02-2024	Fine	0.2	8:52	51.8	49.5	53.0	75
26-02-2024	Fine	0.6	9:00	50.4	49.0	54.0	75

#### Remarks:

- 1) Limit level was adjusted to 65dB(A) during examination period.
- 2) Noise results were calculated by +3 dB (A) correction for free-field measurement.

**Evening Time (1900 - 2300hrs)**

## Monthly Summary Waste Flow Table

# Monthly Summary Waste Flow Table

**Name of Department: Drainage Services Department**

**Contract No.: DC/2020/05**

## Monthly Summary Waste Flow Table for February 2024 [to be submitted not later than the 15<sup>th</sup> day of each month following reporting month]

(All quantities shall be rounded off to 3 decimal places.)

Month	Actual Quantities of Inert C&D Materials Generated Monthly					Actual Quantities of C&D Wastes Generated Monthly				
	(a)=(b)+(c)+(d)+(e) Total Quantity Generated	(b) Broken Concrete (see Note 3)	(c) Reused in the Contract	(d) Reused in other Projects	(e) Disposed as Public Fill	(f) Metals	(g) Paper/cardboard packaging	(h) Plastics (see Note 2)	(i) Chemical Waste	(j) Others, e.g. general refuse disposed at Landfill
	(in '000m <sup>3</sup> )	(in '000m <sup>3</sup> )	(in '000m <sup>3</sup> )	(in '000m <sup>3</sup> )	(in '000m <sup>3</sup> )	(in '000kg)	(in '000kg)	(in '000kg)	(in '000kg)	(in tonne)
1月-24	3.782	0.053	0.000	0.399	3.330	0.025	0.000	0.200	0.000	54.970
2月-24	1.853	0.429	0.000	0.557	0.867	0.000	0.000	0.000	0.000	61.670
Sub-total	5.634	0.481	0.000	0.956	4.197	0.025	0.000	0.200	0.000	116.640
Total	5.634	0.481	0.000	0.956	4.197	0.025	0.000	0.200	0.000	116.640

- Notes:
- (1) The waste flow table shall also include C&D materials that are specified in the Contract to be imported for use at the Site.
  - (2) Plastics refer to plastics bottles/containers, plastic sheets/foam from packaging material.
  - (3) Broken concrete for recycling into aggregates.
  - (4) If necessary, use the conversion factor: 1 full load of dumping truck being equivalent to 5 m<sup>3</sup> by volume.
  - (5) Conversion factors for reporting purpose:  
Excavated: rock = 2.0 tonnes/m<sup>3</sup>, soil = 1.8 tonnes/m<sup>3</sup>, broken concrete and bitumen = 2.4 tonnes/m<sup>3</sup>, Slurry = 2.8 tonnes/m<sup>3</sup>

# Monthly Summary Waste Flow Table

## Event and Action Plans

## Event and Action Plan for Construction Air Quality

EVENT	ACTION							
	ET	IEC	ER	CONTRACTOR				
<b>ACTION LEVEL</b>								
<b>1. Action level being exceeded by one sampling</b>	1	Identify source, investigate the causes of exceedance and propose remedial measures;	1	Check monitoring data submitted by ET;	1	Notify Contractor.	1	Identify source(s), investigate the causes of exceedance and propose remedial measures;
	2	Inform Contractor, IEC, ER, and EPD;	2	Check Contractor's working method; and			2	Implement remedial measures; and
	3	Repeat measurement to confirm finding;	3	Review and advise the ET and ER on the effectiveness of the proposed remedial measures.			3	Amend working methods agreed with the ER as appropriate
	4	Increase monitoring frequency to daily.						
<b>2. Action level being exceeded by two or more consecutive sampling</b>	1	Identify source;	1	Check monitoring data submitted by ET;	1	Confirm receipt of notification of exceedance in writing;	1	Identify source and investigate the causes of exceedance;
	2	Inform Contractor, IEC and ER;	2	Check Contractor's working method;	2	Notify Contractor;	2	Submit proposals for remedial measures to the ER with a copy to ET and IEC within three working days of notification;
	3	Advise the Contractor and ER on the effectiveness of the proposed remedial measures;	3	Discuss with ET, ER and Contractor on possible remedial measures;	3	Ensure remedial measures properly implemented.	3	Implement the agreed proposals; and Amend proposal as appropriate.
	4	Repeat measurements to confirm findings;	4	Advise the ET and ER on the effectiveness of the proposed remedial measures; and	4	If exceedance continues, consider what portion of the work is responsible and instruct the Contractor to stop that portion of work until the exceedance is abated.	4	Amend proposal as appropriate.
	5	Increase monitoring frequency to daily;	5	Supervise Implementation of remedial measures.				
	6	Discuss with IEC and Contractor on remedial actions required;						
	7	If exceedance continues, arrange meeting with Contractor, IEC and ER;						
	8	If exceedance stops, cease additional monitoring.						

Event and Action Plan for Construction Air Quality (Con't)

EVENT	ACTION							
	ET	IEC	ER	CONTRACTOR				
<b>LIMIT LEVEL</b>								
<b>1. Limit level exceedance by one sampling</b>	1	Identify source, investigate the causes of exceedance and propose remedial measures;	1	Check monitoring data submitted by ET;	1	Confirm receipt of notification of exceedance in writing;	1	Identify source(s) and investigate the causes of exceedance;
	2	Inform Contractor, IEC, ER, and EPD;	2	Discuss amongst ER, ET, and Contractor on the potential remedial actions;	2	Notify Contractor;	2	Take immediate action to avoid further exceedance;
	3	Repeat measurement to confirm finding;	3	Review Contractor's remedial actions whenever necessary to assure their effectiveness and advise the ER accordingly; and	3	Ensure remedial measures properly implemented.	3	Submit proposals for remedial measures to ER with a copy to ET and IEC within three working days of notification;
	4	Increase monitoring frequency to daily; and	4	Supervise implementation of remedial measures.	4		4	Implement the agreed proposals; and
	5	Assess effectiveness of Contractor's remedial actions and keep IEC, EPD and ER informed of the results.					5	Amend proposal if appropriate.
<b>2. Limit level exceedance by two or more consecutive sampling</b>	1	Notify IEC, ER, Contractor and EPD;	1	Check monitoring data submitted by the ET;	1	Confirm receipt of notification of exceedance in writing;	1	Identify source(s) and investigate the causes of exceedance;
	2	Identify source;	2	Discuss amongst ER, ET, and Contractor on the potential remedial actions;	2	In consultation with the ET and IEC, agree with the Contractor on the remedial measures to be implemented;	2	Take immediate action to avoid further exceedance;
	3	Repeat measurement to confirm findings;	3	Review Contractor's remedial actions whenever necessary to assure their effectiveness and advise the ER accordingly;	3	Supervise the implementation of remedial measures; and	3	Submit proposals for remedial measures to the ER with a copy to the IEC and ET within three working days of notification;
	4	Increase monitoring frequency to daily;	4	Supervise the implementation of remedial measures.	4	If exceedance continues, consider what portion of the work is responsible and instruct the Contractor to stop that portion of work until the exceedance is abated.	4	Implement the agreed proposals;
	5	Carry out analysis of Contractor's working procedures to determine possible mitigation to be implemented;					5	Revise and resubmit proposals if problem still not under control; and
	6	Arrange meeting with IEC and ER to discuss the remedial actions to be taken;					6	Stop the relevant portion of works as determined by the ER until the exceedance is abated.
	7	Assess effectiveness of Contractor's remedial actions and keep IEC, EPD and ER informed of the results; and						
	8	If exceedance stops, cease additional monitoring.						

## Event and Action Plan for Construction Noise

EVENT	ACTION							
	ET	IEC	ER	CONTRACTOR				
<b>Action Level</b>	1	Notify IEC and Contractor;	1	Review the analysed results submitted by the ET;	1	Confirm receipt of notification of failure in writing;	1	Submit noise mitigation proposals to IEC; and
	2	Carry out investigation;	2	Review the proposed remedial measures by the Contractor and advise the ER accordingly; and	2	Notify Contractor;	2	Implement noise mitigation proposals.
	3	Report the results of investigation to the EC, ER and Contractor;	3	Supervise the implementation of remedial measures	3	Require Contractor to propose remedial measures for the analyzed noise problem; and		
	4	Discuss with the Contractor and formulate remedial measures; and			4	Ensure remedial measures are properly implemented.		
	5	Increase monitoring frequency to check mitigation effectiveness.						
<b>Limit Level</b>	1	Identify source;	1	Discuss amongst ER, ET, and Contractor on the potential remedial actions;	1	Confirm receipt of notification of failure in writing;	1	Take immediate action to avoid further exceedance;
	2	Inform IEC, ER, EPD and Contractor;	2	Review Contractor's remedial actions whenever necessary to assure their effectiveness and advise the ER accordingly; and	2	Notify Contractor;	2	Submit proposals for remedial actions to IEC and ER within 3 working days of notification;
	3	Repeat measurements to confirm findings;	3	Supervise the implementation of remedial measures.	3	Require Contractor to propose remedial measures for the analysed noise problem;	3	Implement the agreed proposals;
	4	Increase monitoring frequency;			4	Ensure remedial measures properly implemented; and	4	Resubmit proposal if problem still not under control; and
	5	Carry out analysis of Contractor's working procedures to determine possible mitigation to be implemented;			5	If exceedance continues, consider what portion of the work is responsible and instruct the Contractor to stop that portion of work until the exceedance is abated.	5	Stop the relevant portion of works as determined by the ER until the exceedance is abated.
	6	Inform IEC, ER and EPD the causes and actions taken for the exceedances;						
	7	Assess effectiveness of Contractor's remedial actions and keep IEC, EPD and ER informed of the results;						
	8	If exceedance stops, cease additional monitoring.

## Summary of Environmental Inspections

Date	Reminders/Observations	Action taken by Contractor	Outcome
<b>Follow action(s) of last reporting month (Contract No. DC/2020/05 [C2])</b>			
25/01/2024	Reminder 1: The Contractor is reminded to provide drip tray for oil drum and chemical containers to prevent leakage in workshop area. (Portion 6)	Rectified.	Completion as observed on 8 February 2024.
31/01/2024	Observation 1: Oil drums were observed without drip tray provided. The Contractor was reminded to provide drip tray for oil drums in workshop area. (Portion 6)	Rectified.	Completion as observed on 8 February 2024.
<b>Weekly Site Inspection (Contract No. DC/2020/05 [C2])</b>			
08/02/2024	No particular findings.	NIL.	NIL.
15/02/2024	No particular findings.	NIL.	NIL.
22/02/2024	Obs. 1: The Contractor should provide drip tray and properly label the chemical container. (Portion 10)	Rectified.	Completion as observed on 26 February 2024.
29/02/2024	No particular findings.	NIL.	NIL.
<b>Weekly Site Inspection (Contract No. DC/2023/12 [C3])</b>			
05/02/2024	No particular findings.	NIL.	NIL.
14/02/2024	No particular findings.	NIL.	NIL.
21/02/2024	Reminder 1: The Contractor was reminded to display copies of Environmental Permit at site entrances/exits. Reminder 2: The Contractor was reminded to protect the existing trees (e.g. fencing) during construction. (Portion 9)	Rectified.	Completion as observed on 26 February 2024.
28/02/2024	Reminder 1: The Contractor is reminded to provide tarpaulin sheets for equipment during maintenance to prevent oil leakage. (Portion 9) Reminder 2: The Contractor is reminded to replace the faded tree labels with new ones. (Portion 9)	Pending.	On-going.
<b>Landscape Site Audit</b>			
06/02/2024	No particular findings.	NIL.	NIL.
20/02/2024	No particular findings.	NIL.	NIL.
<b>Ecology Site Audit</b>			
06/02/2024	No particular findings.	NIL.	NIL.

# Appendix 9.1

## Complaint Log

## Environmental Complaints Log

Complaint Log No.	Date of Complaint	Received From and Received By	Location of Complainant	Nature of Complaint	Outcome	Status
190808	29/07/2019	DSD	Construction site area Portion 6	Exposed slope surface without any covering was observed at Portion 6	<p>A public complaint regarding construction dust received by DSD on 29 July 2019 was subsequently referred to ET on 6 August 2019. The complainant reported that exposed slope surface without any covering at Portion 6. Based on the information provided by the Contractor, the concerned area was under slope cutting and filling works for temporary haul road construction.</p> <p>Based on the observation on 6 August 2019 and weekly site inspection on 7 August 2019, the concerned slope was observed covered with the tarpaulin sheets to alleviate the potential dust impact to the surroundings.</p> <p>Upon review on the monitoring data, no exceedances were recorded at the air quality monitoring stations AM2 - Block H, Kam Tai Court and AM4 - Wellborn Kindergarten (located nearest to the concerned slope) during the 1hr TSP monitoring on 23 July 2019 and 29 July 2019 respectively.</p> <p>Follow up site inspection was conducted by the Environmental Team on 07 August 2019 and it was observed that the slope at Portion 6 was properly covered.</p> <p>Nevertheless, in view of the public concern, the Contractor of DC/2018/05 was reminded to enhance the dust suppression measure by providing adequate watering to any exposed surface during cutting slope and fill works to avoid potential dust impact to the surroundings.</p>	Interim investigation report was issue on 16 August 2019
201112	12/11/2020	DSD	Outside site boundary of Portion 11	water contamination / ecological impact	<p>A letter from Kadoorie Farm and Botanic Garden (KFBG) regarding water contamination / ecological impact received by DSD on 12 November 2020 was subsequently referred to ET on 12 November 2020. The KFBG alleged that:</p> <ul style="list-style-type: none"> <li>- Extracting water directly from the stream,</li> <li>- Surface run-off silt smothering forest understorey and silting the stream,</li> <li>- Cement has been disposed into the forest understorey and the stream , and</li> <li>- Diesel fuel leaking from pumps and generators at Portion 11.</li> </ul> <p>The concerned area is natural stream near slope cutting and filling works for temporary haul road construction, outside of the DC/2018/05 construction site boundary.</p> <p>The Contractor, RSS conducted walk-through survey on 17 November 2020 starting from around the tree tag T9511/ T9512 and ending at the pool of the natural stream near Portion 11 of DC/2018/05.</p> <p>Additional site inspection with EPD, DSD, RSS, ET and the Contractor was conducted on 17 November 2020, additional site inspection with KFBG, DSD, RSS, ET and the Contractor was conducted on 19 November 2020.</p> <p>No Pollutants were observed being discharged to the stream, the natural stream was clean with running water during above inspections. However, few spots were found with cement and silt on the bedding of the stream.</p>	Interim investigation report was issue on 14 December 2020

According to the Contractor, the water pumps were the emergency pumps and it had been removed away from the natural stream. No pump was observed during above inspections.

There was no sign of any diesel fuel leaking from pumps or generators. The nearest generator for the construction work has been located far away from the concerned location. By the walk-through survey along the natural stream, there was no oil-strain or diesel likes contamination being observed.

By the walk-through survey, various locations were found with silting / sand. The sources of the silt were not necessary from the construction site of DC/2018/05. It could also be contributed by the natural erosion from both sides of the stream.

Nevertheless, in view of the public concern, the Contractor of DC/2018/05 was willing to clean up the stream to address the concerns from KFBG to protect the environment. The Contractor also reminded to keep review the performance of mitigation measures including well cover slope / area with exposed soil with tarpaulin sheets to prevent surface runoff, using cellular confinement system to prevent soil erosion.

A public complaint regarding construction dust referred by DSD on 27 January 2021 was subsequently received by ET on 27 January 2021. The complainant reported that:

- Construction dust emission arising from blasting works in tunnel was observed near Block 6, Chevalier Garden.

Interim investigation report was issue on 7 February 2021

Blasting in the tunnel was carried out under Contract DC/2018/05 at the concerned area

According to the relevant site information provided by the Contractor of DC/2018/05, there are total of 13nos. of blasting works was carried out in January 2021 in the tunnel.

The blasting works was carried out in the tunnel. Dust screen, mist curtain, sprinkler system and mist cannon were installed / operated when blasting, the blast door was tightly closed during blasting.

Based on review on air quality monitoring data, no exceedances were recorded at the air quality monitoring stations AM3(B) - Outside A Kung Kok Street Garden and AM4 - Wellborn Kindergarten (located nearest to the concerned area) during the scheduled 1hr TSP monitoring in January 2021.

Ad-hoc TSP monitoring and inspection was carried out on 29 January and 1 February 2021 during blasting, no exceedances were recorded at the air quality monitoring stations AM3(B) - Outside A Kung Kok Street Garden and AM4 - Wellborn Kindergarten.

Based on the site inspection on 28 January 2021, 2nos. mist cannons have been installed and operated on the top of blast door during / after the blast door opened to reduce fumes / mists emission.

210127	27/01/2021	DSD	Construction Area at Portion 6 (Tunnel)	Air Quality
--------	------------	-----	-----------------------------------------	-------------

The Contractor of DC/2018/05 was reminded to enhance the dust suppression measure by providing adequate watering after the blast door opened. Contractor is requested to consider extend the time to open the blast door after blasting in order to the fumes and rock dust have been settled in the tunnel.

Also, the Contractor of DC/2018/05 was reminded that the ventilation system in the tunnel should be maintained in good condition.

20211201	01/12/2021	AECOM	Construction Area at Portion 12 (The Neighbourhood Advice-Action Council Harmony Manor)	Noise	A public complaint regarding construction noise referred by AECOM on 3 December 2021 was subsequently received by ET on 3 December 2021.	Interim investigation report was issue on 10 December 2021
					The complainant reported to 1823 online dated on 1 December 2021 that the construction noise (heavy vehicle and drilling works) generated from the construction site at A Kung Lok Shan Road was causing noise nuisance to complainant's son.	
					According to the relevant site information provided by the Contractor of DC/2020/05, preparation works for sheet pile driving, which included machinery and materials mobilization, were carried out on 1 December 2021. Sheet pile work was commenced on 2 December 2021.	
					Based on review on noise monitoring data, no exceedances were recorded at the noise monitoring station CM5 - R/F, The Neighbourhood Advice-Action Council Harmony Manor (located nearest to the concerned area) during the scheduled Leq30 min noise monitoring in November 2021. ET conducted regular noise monitoring on 3 December 2021, no exceedances was record at the noise monitoring stations CM5 - R/F, The Neighbourhood Advice-Action Council Harmony Manor. Weekly noise monitoring was conducted on 7 December 2021, no exceedances was recorded at the noise monitoring station CM5 - R/F, The Neighbourhood Advice-Action Council Harmony Manor. Site inspection was conducted on 8 December 2021, it is observed that breaking /drilling works by other contractor was conducted next to The Neighbourhood Advice-Action Council Harmony Manor. No heavy vehicles passing by A Kung Lok Shan Road during noise monitoring.	
					After receiving the complaint, additional noise mitigation measures, including wrapping up the breaker tip with acoustic mat and deploying of temporary noise barrier have been implemented by the Contractor of DC/2020/05.	
					The Contractor of DC/2020/05 was reminded to enhance the noise mitigation measures by providing sufficient temporary noise barrier. Contractor is advised to make good communication with The Neighbourhood AdviceAction Council Harmony Manor and consider scheduling the time of sheet piling and machinery / materials mobilization in order to avoid further complaint.	

20220506	06/05/2022	Contractor	Construction Area at Portion 10 (Next to the Chevalier Garden)	Noise	<p>A public complaint regarding construction noise referred by the Contractor was received by ET on 12 May 2022.</p> <p>The complainant reported to 1823 Call Centre (ICC) dated on 6 May 2022 that the construction noise (rock-breaking and excavation) generated from the construction site of Portion 10 at Mui Tsz Lam Road was causing noise nuisance to complainant.</p> <p>According to the relevant site information provided by the Contractor of DC/2020/05, rock-breaking and excavation works were conducted during the concerned period.</p> <p>Based on review on noise monitoring data, no exceedances were recorded at the noise monitoring stations CM1 - G/F, Wellborn Kindergarten and CM2(B) - G/F, Outside A Kung Kok Street Garden (located within the Chevalier Garden) during the scheduled Leq30 min noise monitoring in April 2022. ET conducted regular noise monitoring on 6 May 2022, no exceedances were recorded at the noise monitoring stations CM1 - G/F, Wellborn Kindergarten and CM2(B) - G/F, Outside A Kung Kok Street Garden. Site inspection was conducted on 5 &amp; 12 May 2022, it is observed that rock-breaking was conducted at the construction site of Portion 10. Ad-hoc noise monitoring at CM1 - G/F, Wellborn Kindergarten and CM2(B) - G/F, Outside A Kung Kok Street Garden on 13 May 2022, no exceedances were recorded.</p> <p>During execution of rock breaking works, below noise mitigation measures had been implemented by the Contractor of DC/2020/05</p> <ul style="list-style-type: none"> <li>• Erection of 8m height noise barrier</li> <li>• Wrapping up the breaker tip with acoustic material</li> <li>• Upgrade the existing hoarding to perform as noise barrier by affixing a layer of sound absorption material to the hoarding surface</li> <li>• Voluntary to late start of rock breaking work at 0900hrs instead of 0700hrs, which is allowed under the Regulation.</li> </ul> <p>Contractor of DC/2020/05 also carried out self-noise monitor for the rock-breaking works on 4, 5 &amp; 6 May 2022, All results show the construction noise levels are below the 75dB(A).</p> <p>ET would continue to monitor the adequacy of mitigation measures and review the monitoring data of the monitoring stations of CM1 - G/F, Wellborn Kindergarten and CM2(B) - G/F, Outside A Kung Kok Street Garden.</p> <p>The Contractor is recommend to review the construction operation to erect the temporary noise barriers, if feasible and ensure all idled PME are shut down to minimize potential noise emanation at the concerned works area to avoid potential nuisance.</p>	Interim investigation report was issue on 13 May 2022
----------	------------	------------	----------------------------------------------------------------	-------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------

20220816	16/08/2022	Contractor	WA3 (Ngau Kok Wan, Tsing Yi)	Air Quality	<p>A public complaint suspecting improper operation of mineral works without relevant environmental permits/licenses and dust mitigation measures at WA3 referred by the Contractor was received by ET on 17 August 2022.</p> <p>The complaint was made via email to the relevant authorities, including Environmental Protection Department (EPD) and Drainage Services Department (DSD), on 16 August 2022, the complainant suspected a mineral site near Tsing Yi North Coastal Road and Ting Kau Bridge was in operation without relevant environmental permits/licenses, the complainant also stated no dust mitigation measures, such as covering and water spraying for dusty stockpile and conveyor belts; and provision of wheel washing facility, were implemented based on his observation.</p> <p>The location where the complaint refers to is one of the works areas for the Project (i.e. WA3 at Ngau Kok Wan, Tsing Yi) for the proposed rock crushing operation as the location for such operation under the Environmental Permit (EP) (EP-533/2017/A) issued on 11 August 2022, and the Specified Process License (SPL) for the category of mineral works (stone crushing works) under Air Pollution Control (Specified Processes) Regulations for such operation has been applied since April 2022 and the associated application result was pending from EPD at the time of the complaint received.</p> <p>The works activities at WA3 between 12 and 17 August 2022 were reviewed. As advised by the Contractor, the works activities undertaken during the period mainly included i) assembly and adjustment of the rock crushing machineries; ii) provision of training for workers on the operation of machineries for rock crushing activities; and iii) import of rocks from the main site (i.e. works areas of Cavern at Ma On Shan) on land logistics by dump trucks for construction of a loading platform and temporary storage at WA3. Relevant mitigation measures for air quality impacts were implemented on site during the period including i) water spraying on haul roads; ii) water spraying for the temporary stockpile of dusty materials; iii) covering dusty materials with use of impervious sheeting; and iv) installation of dust enclosure and misting system for conveyor systems, etc. In addition, regular site inspections were carried out by the ET at WA3 on 12 and 17 August 2022, with no particular observations associated with air quality recorded and wheel washing facilities were in place for subsequent use, during the site inspections except a verbal reminder on proper covering for the stockpiles being idle on site was given to the Contractor on 17 August 2022 for improvement.</p> <p>As referred to the Air Pollution Control Plan (APCP) attached to the application of SPL, the proposed rock crushing operation with maximum output capacity of 1,400 tonnes per hour by two operation lines (i.e. output capacity of 700 tonnes per hour for each) for the rocks being processed as aggregates of about 3M tonnes was mentioned and 12 hours a day (7:00 to 19:00) was assumed for the rock crushing operation taken in the air quality modelling assessment except Sundays and public holidays whereas, as advised by the Contractor, about 2,000 tonnes of rock were processed in the training sessions for the workers during the period (i.e. 12 to 17 August 2022), which is below the allowed maximum output for the rock crushing operation (i.e. 100,800 tonnes) during the period. Moreover, relevant monitoring data in relation to suspended particulates were not available for review as a result of the fact that the application result for SPL is pending from EPD and actual rock crushing operation has not been commenced at the time of</p>	Interim investigation report was issue on 31 August 2022
----------	------------	------------	------------------------------	-------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------

the complaint received such that the corresponding total suspended particulates (TSP) and respirable suspended particulates as required by the SPL, and 1-hr TSP as recommended in the Environmental Review Report (ERR) for the application of variation of EP (i.e. EP-533/2017/A), respectively, had not been monitored at the time of the complaint received.

Based on the investigation above, the works activities at WA3 did not result in any unacceptable environmental impacts to the surrounding environment as reviewed with the relevant environmental requirements under EP-533/2017/A and the associated APCP for application of SPL for the Project.

Though works activities at WA3 did not result in any unacceptable environmental impacts to the surrounding environment, the Contractor was reminded to properly maintain the implementation of recommended mitigation measures for air quality impacts as recommended in the approved EIA Report, EP (i.e. EP-533/2017/A), the Updated EM&A Manual and/or ERR/APCP for the Project, and all mitigation measures as stated in the APCP for obtaining the SPL approved by EPD.

An ad-hoc site inspection was also carried out by the ET at WA3 on 19 August 2022 noting that fugitive dust emission was observed during breaking of artificial hard material by a backhoe equipped with hydraulic breaker without effective mitigation measures for air quality impacts (e.g. water spraying) implemented properly, and the Contractor was subsequently reminded to follow up on this for improvement. The ET will continue carrying out site inspections on a regular basis to check that appropriate environmental protection and pollution control mitigation measures are properly implemented in accordance with the environmental documents mentioned.

20230317	17/03/2023	DSD	Construction site entrance at Ma On Shan Road (Portion 4) and Mui Tsz Lam Road (Portion 6)	Air Quality	<p>A notice of complaints from Environmental Protection Department (EPD) referred by AECOM was subsequently received by ET on 17 March 2023.</p> <p>Based on the information provided by the Contractor, no construction activity and performs as an access road for construction vehicles at Portion 6 and fill the access road for retaining wall and slope, Footing &amp; wall construction, removal of the temporary stockpile of soil and performs as an access road for construction vehicles at Portion 6. Moreover, the existing dust mitigation measures were implemented at portion 4 and 6 by Contractor in February 2023.</p> <p>According to the Main Contractor, enhanced mitigation measures were implemented after the complaint and summarized as below:</p> <p><u>Portion 4</u></p> <ul style="list-style-type: none"> <li>•Arrange workers and water tanker to spray water for the section of Ma On Shan Road connecting to the site entrance one hour earlier than before, i.e. at 0700 hrs.</li> <li>•Rent a road sweeper to clean the section of Ma On Shan Road connecting to the site entrance at Portion 4 once a week.</li> <li>•Upgrade the number of sprinklers from 6 to 8 to increase the water spraying area on 17 March 2023.</li> </ul> <p><u>Portion 6</u></p>	Interim investigation report was issue on 24 March 2023
----------	------------	-----	--------------------------------------------------------------------------------------------	-------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------

•Increase the frequency of watering and road sweeping to the works area and Mui Tsz Lam Road roundabout to maintain it clean and free of dust.

According to the ET regular air quality monitoring results in February 2023, no exceedance for all monitoring stations including the nearest stations AM1 and AM3(B) was found in reporting month.

An ad-hoc air quality monitoring was conducted at nearest station AM1 and AM3(B) by the ET on 22 March 2023 and no exceedance was recorded.

Nevertheless, in view of the public concern, the Contractor of DC/2018/05 was reminded to increase the frequency of watering the haul roads in dry weather and dry seasons, appropriate speed control shall be adopted for the vehicles on construction sites haul roads and all the use of vehicle wheel and body washing facilities and the water sprinklers should be regularly reviewed and maintained that make sure they are functioning properly.

20230525	05/06/2023	ET	The outfall outside construction site at Mui Tsz Lam Nullah.	Water Quality	A notice of complaints from Environmental Protection Department (EPD) letter dated on 25 May 2023 was subsequently received by ET on 5 June 2023.	Interim investigation report was issue on 16 June 2023.
					One complaint to EPD on 8 May 2023 regarding muddy water discharge from construction site to Mui Tsz Lam Nullah and finally direct to Shing Mun River.	
					As mentioned in EPD's complaint letter, muddy water appeared at the outfall located in Portion 3. According to Contractor Discharge Licence (Licence No.: WT00040534-2022) provided, the effluent from the wastewater treatment system in Portion 4, Portion 6 and the Caverns are permitted to be discharged to the stormwater drain and come out at this outfall. Also, by reviewing the drainage record, this outfall is also connected to further upstream from A Kung Kok catchment areas.	
					<u>Other Works Area:</u>	
					Portion 4: Wastewater produced in Portion 4 generally came from wheel washing at its site entrance. The treated wastewater was recirculated and consumed internally for road dust suppression and considered as seldom discharged.	
					Portion 6 and Portion 9: Two wastewater treatment systems with 80m3/hr treatment capacity are deployed at Portion 6 and Portion 9 (the Main Access Tunnel) respectively. As advised by Contractor, a full-time worker has been appointed responsible for the daily operation and maintenance of each of the wastewater treatment facilities.	
					Tunnel: A Filtration System was installed and connected to the wastewater treatment system inside the tunnel which can further reduce the suspended particulate of the effluent from the existing treatment system and is able to monitor the pH and SS value of the effluent and generate an alert when it exceeds the standard.	

Contractor Self-Monitoring: According to the discharge licence (Licence No.: WT00040534-2022) part B2, The Contractor shall carry out self-monitoring monthly and recording of the constituents. A water sampling (6 samples in total were collected) was carried out on 9 May 2023 and no exceedance was recorded in May 2023.

Contractor Daily Observation: Muddy water appeared at the outfall each time when the tidal is low, even though the Contractor's discharging was clear enough at the time. Besides, there are two manholes in Portion 4 and a layer of muddy sediment is identified at the bottom of the drain. The contractor believes that the sediment was exposed to the air during low tidal and it was eroded by the water flow especially when we discharged or there was rainfall. It is the reason why muddy water appeared when the tide is low at the outfall of Portion 3.

Ad-hoc Inspection: An ad-hoc inspection was conducted by the representative of ET, RSS and Contractor representative on 8 June 2023. According to ET's field observations, there is no evidence to prove that the muddy water discharged from the outfall area is project related.

Although there was no evidence to indicate that the muddy water being discharged from the outfall was related to the project, AECOM has proposed a proactive approach by instructing CSAJV to clean up a section of the storm drain adjacent to the last manhole to safeguard the water body along the Mui Tsz Lam culvert. The proposal is currently in progress.

The ET will continue to carry out site inspections on a regular basis to check that appropriate environmental protection and pollution control mitigation measures are properly implemented in accordance with the environmental documents mentioned.

20231109	06/11/2023	EPD	WA4 (Wok Tai Wan, Tsing Yi)	Air Quality and Water Quality	<p>A notice of complaints from Environmental Protection Department (EPD) email dated on 7 November 2023 was subsequently received by ET on 9 November 2023.</p> <p>One complaint to EPD on 6 November 2023 concerning the operation of a stockpiling site at Wok Tai Wan (GLA-TKT 1939) allocated to DSD. The complainant reported that:</p> <ol style="list-style-type: none"> <li>1. As mentioned in EPD's complaint letter, other than few areas, large area of rock stockpile were not covered and fugitive dust appeared.</li> <li>2. There have been continuous heavy rains in recent days. If the rock stockpile is close to the seaside, there is a risk of landslides and seabed pollution.</li> </ol> <p>Upon receipt of the complaint on 9 November 2023, the Environmental Team (ET) requested the Contractor (CSAJV) to provide necessary information for investigation on 9 November 2023, with following up on the supplementary information on 15 November 2023.</p>	Interim investigation report was issue on 20 November 2023.
----------	------------	-----	-----------------------------	-------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------

Contractor Response to the Complaint

---

Contractor have investigated the case and reported the environmental mitigation measures implemented before and after receiving the complaint.

Before the Complaint

1. Watering the haul road by both manpower and water bowser.
2. Covered the slope of the lower platform of the rock stockpile.

After the Complaint

More slope has been covered and the covering work will be continued.

Weekly Site Inspection

Weekly site inspection was conducted by the representative of ET, IEC, RSS and Contractor representative on 8 November 2023. According to ET's field observations, landslides from rock stockpile were not observed and no evidence to prove that the fugitive dust appeared from the rock stockpile was project related.

Corrective Action(s)

1. In view of public concerns, the Contractor was advised to water the haul road by both manpower and water bowser more frequently.
2. Cover the slope of the lower platform of the rock stockpile.

Preventive Action(s)

The Contractor was reminded to cover more slope and the covering work will be continued, and increase water spraying frequency for dust suppression particularly in dry season.

The ET will continue to carry out site inspections on a regular basis to check that appropriate environmental protection and pollution control mitigation measures are properly implemented in accordance with the environmental documents mentioned.
