

GOVERNMENT OF THE HONG KONG
SPECIAL ADMINISTRATIVE REGION

HIGHWAYS DEPARTMENT

Agreement No. CE 69/97
Investigation Assignment for
Widening and Reconstruction of Tai Po Road
(Sha Tin Section)

ENVIRONMENTAL IMPACT ASSESSMENT (FINAL)

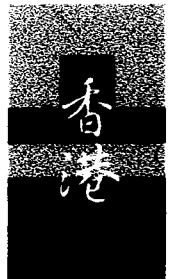

Report No. R/198049/025/1 Issue 4

August 1999

Babtie BMT Harris & Sutherland

In association with

Mouchel
MVA HK Ltd
Team 73 HK

**AGREEMENT NO. CE 69/97
INVESTIGATION ASSIGNMENT FOR WIDENING AND
RECONSTRUCTION OF TAI PO ROAD (SHA TIN SECTION)
INVESTIGATION ASSIGNMENT**

ENVIRONMENTAL IMPACT ASSESSMENT (FINAL)

CONTENTS

VOLUME 1

- 1.0 INTRODUCTION**
 - 1.1 Background
 - 1.2 Purpose and Objectives of the EIA
 - 1.3 EIA Report Requirements
 - 1.4 Report Structure

- 2.0 PROJECT DESCRIPTION**
 - 2.1 Key Work Elements
 - 2.2 Construction Works and Timing

- 3.0 ENVIRONMENTAL LEGISLATION, STANDARDS AND GUIDELINES**
 - 3.1 Environmental Impact Assessment Ordinance
 - 3.2 Noise
 - 3.3 Air Quality
 - 3.4 Water Quality
 - 3.5 Solid Waste
 - 3.6 Landscape and Visual

- 4.0 TRAFFIC FLOW PREDICTIONS**
 - 4.1 Model Structure
 - 4.2 Baseline Traffic Conditions
 - 4.3 Future Year (Worst Case) Traffic Volumes
 - 4.4 Other Traffic Schemes in the Area

- 5.0 NOISE IMPACT ASSESSMENT**
 - 5.1 Noise Sensitive Receivers
 - 5.2 Existing Environment
 - 5.3 Impact During Construction Work
 - 5.4 Mitigation Measures During Construction
 - 5.5 Impacts During Operation
 - 5.6 Noise Impact Assessment of 24 Hour Opening of Border Study
 - 5.7 Conclusion

- 6.0 AIR QUALITY IMPACT ASSESSMENT**
 - 6.1 Air Quality Sensitive Receivers
 - 6.2 Existing Air Quality Environment
 - 6.3 Impacts During Construction
 - 6.4 Mitigation Measures During Construction
 - 6.5 Impacts During Operation
 - 6.6 Operational Mitigation Measures
 - 6.7 Residual Impacts

- 7.0 WATER QUALITY IMPACT ASSESSMENT**
 - 7.1 Water Based Sensitive Receivers
 - 7.2 Existing Water Quality Conditions
 - 7.3 Impacts During Construction
 - 7.4 Mitigation During Construction
 - 7.5 Impacts During Operation
 - 7.6 Mitigation Measures During Operation
 - 7.7 Residual Impacts

- 8.0 LANDSCAPE AND VISUAL IMPACT ASSESSMENT**
 - 8.1 Introduction
 - 8.2 Description of Assessment Methodologies
 - 8.3 Identified, Prediction and Evaluation of Landscape and Visual Impact
 - 8.4 Mitigation of Adverse Landscape and Visual Impact
 - 8.5 Definition and Evaluation of the Residual Landscape and Visual Impact
 - 8.6 Environmental Monitoring and Audit
 - 8.7 Conclusion

- 9.0 WASTE MANAGEMENT**
 - 9.1 Introduction
 - 9.2 Construction Waste Management
 - 9.3 Waste Handling Measures

- 10.0 LANDUSE IMPACT ASSESSMENT**
 - 10.1 Land Use Impact
 - 10.2 Land Use Identification
 - 10.3 Implications on Land Use Zoning

- 11.0 CONCLUSIONS AND RECOMMENDATIONS**
 - 11.1 Introduction
 - 11.2 Noise
 - 11.3 Air Quality
 - 11.4 Water Quality
 - 11.5 Visual, Landscape and Townscape
 - 11.6 Landuse Impact Assessment
 - 11.7 Waste Management
 - 11.8 Beneficial Impacts
 - 11.9 Conclusion

- 12.0 ENVIRONMENTAL MONITORING AND AUDIT**
 - 12.1 Objectives
 - 12.2 Project Organisation
 - 12.3 Construction Programme
 - 12.4 Noise
 - 12.5 Air Quality
 - 12.6 Water Quality Monitoring
 - 12.7 Site Environmental Audit
 - 12.8 Reporting

FIGURES

FIGURES LIST

- 1.1 Project Location
- 1.2 Project Works Area

- 2.1a Location of Road Improvement (1 of 3)
- 2.1b Location of Road Improvement (2 of 3)
- 2.1c Location of Road Improvement (3 of 3)

- 4.1a 2003 Forecast Traffic Flows
- 4.1b Vehicle Breakdown
- 4.2a 2021 Forecast Traffic Flows (Sheet 1 of 2)
- 4.2b 2021 Forecast Traffic Flows (Sheet 2 of 2)

- 5.1 Noise Sensitive Receivers with Obstructed Line of Sight of the Roadway (Acoustically Shielded)
- 5.2a Existing and Planned Noise Sensitive Receivers (1 of 3)
- 5.2b Existing and Planned Noise Sensitive Receivers (2 of 3)
- 5.2c Existing and Planned Noise Sensitive Receivers (3 of 3)
- 5.3 Proposed Direct Noise Mitigation Measures
- 5.4 Typical Carriageway Section with Noise Barrier at the frontage of Shatin Plaza
- 5.5 Typical Carriageway Section with Noise Barrier on the slip road at the frontage of Lek Yuen Estate
- 5.6 Typical Carriageway Section with Noise Barrier at the frontage of Wo Che Estate near Fo Tan Road

- 6.1a Existing and Planning Air Sensitive Receivers (1 of 3)
- 6.1b Existing and Planning Air Sensitive Receivers (2 of 3)
- 6.1c Existing and Planning Air Sensitive Receivers (3 of 3)
- 6.2 Pollution Contours during Operation in Year 2021
- 6.3 Pollution Contours during Operation in Year 2021
- 6.4 Pollution Contours during Operation in Year 2021

- 7.1 Water Courses Draining Through the Project Area

- 8.1 Visual Envelope
- 8.2 Spatial Extent of Landscape Unit – Part 1
- 8.3 Spatial Extent of Landscape Unit – Part 2
- 8.4 Spatial Extent of Visual Sensitive Receivers – Part 1
- 8.5 Spatial Extent of Visual Sensitive Receivers – Part 2
- 8.6 Visual and Landscape Context – Part 1
- 8.7 Visual and Landscape Context – Part 2
- 8.8 Noise Barriers - Section
- 8.9 Noise Barriers - Elevation
- 8.10 Landscape Mitigation Measures – Plan 1
- 8.11 Landscape Mitigation Measures – Plan 2
- 8.12 Landscape Mitigation Measures – Plan 3
- 8.13 Landscape Mitigation Measures – Plan 4
- 8.14 Landscape Mitigation Measures – Plan 5
- 8.15 Landscape Mitigation Measures – Plan 6

FIGURES LIST (COND'T)

- 10.1 Extract of Shatin Outline Zoning Plan (S/ST/12) 1998

- 12.1 Noise Monitoring Field Record Sheet
- 12.2a Noise Monitoring Stations
- 12.2b Noise Monitoring Stations
- 12.2c Noise Monitoring Stations
- 12.2d Noise Monitoring Stations
- 12.3 Event and Action Plan for Noise Exceeded for One Sample
- 12.4 Data Sheet for TSP Monitoring
- 12.5a Air Monitoring Stations
- 12.5b Air Monitoring Stations
- 12.5c Air Monitoring Stations
- 12.5d Construction Programme and Air Monitoring Stations
- 12.6a Event and Action Plan for Dust Action Level Exceeded for one sample
- 12.6b Event and Action Plan for Dust Action Level Exceeded for more than one sample
- 12.6c Event and Action Plan for Dust Limit Level Exceeded for one sample
- 12.6d Event and Action Plan for Dust Limit Level Exceeded for more than one sample
- 12.7 Sample Template for Interim Notifications of Environmental Quality Limits Exceedances

TABLES LIST

- 2.1 Equipment Used during Reconstruction and Widening
- 2.2 Total Sound Power Level (SWL) for each Working Scenario (1 to 7)
- 3.1 Recommended Construction Noise Level (Non-restricted Hours)
- 3.2 Acceptable Road Traffic Noise Levels
- 3.3 Hong Kong Air Quality Objectives
- 3.4 Tunnel Air Quality Guideline
- 4.1 2021 Forecast Traffic Flows (a.m.) in Vehicles Per Hour
- 5.1 Acoustically Shielded Noise Sensitive Receivers
- 5.2 Noise Sensitive Receivers (NSRs) with Direct Line of Sight to Roadway
- 5.3 Equipment Used during Reconstruction and Widening
- 5.4 Total Sound Power Level (SWL) for Each Working Scenario (1 to 7)
- 5.5 Maximum Noise Level at NSRs during Construction (without mitigation)
- 5.6 Maximum Noise Level at NSRs during Construction (with mitigation)
- 5.7 Prevailing Traffic Noise Level (Year 2003), L_{10} (1 hour)
- 5.8 Unmitigated Future Noise Level (Year 2021), L_{10} (1 hour)
- 5.9 Maximum Future Noise Level for the Widened Section, L_{10} (1 hour)
- 5.10 Eligibility for Indirect Noise Mitigation
- 5.11 Mitigation Traffic Noise Level, L_{10} (1 hour)
- 6.1 Air Quality Sensitive Receivers
- 6.2 Background Air Quality Data, 1997, at the Shatin EPD Monitoring Station
- 6.3 Concentrations of Dust Impacts at the Air Sensitive Receivers during Construction Phase Assuming No Mitigation
- 6.4 Concentrations of Dust Impacts during the Construction Phase with General Control Requirements
- 6.5 Air Quality Modelling Results
- 8.1 Visual Envelope Land Uses
- 8.2 Identification and Value of Landscape Units
- 8.3 Identification and Value of Existing Views of Visual Sensitive Receivers
- 8.4 Landscape Unit
- 8.5 Visual Impact
- 8.6 Tree Species
- 8.7 Landscape Mitigation Measures
- 8.8 During Construction
- 8.9 Opening Day
- 8.10 In the Year 2013
- 8.11 Summary Table
- 9.1 Quantity and Timing of Waste Material
- 10.1 Impact of Road Improvement Works
- 11.1 Mitigation Schedule
- 12.1 Action and Limit Levels for Construction Noise
- 12.2 Action and Limit Levels for Air Quality

**AGREEMENT NO. CE 69/97
INVESTIGATION ASSIGNMENT FOR WIDENING AND
RECONSTRUCTION OF TAI PO ROAD (SHA TIN SECTION)
INVESTIGATION ASSIGNMENT**

ENVIRONMENTAL IMPACT ASSESSMENT (FINAL)

CONTENTS

VOLUME 2

APPENDIX

A Study Brief

B Noise Modelling Results

- B-1 Construction Noise Calculations
- B-2 Operational Noise - Existing Conditions (Year 2003)
- B-3 Operational Noise - Future Conditions (Year 2021)
- B-4 Sample on Traffic Noise Calculations

C Air Quality Results

- C-1 EPD Air Quality Monitoring Data
- C-2 FDM Model Results
- C-3 Traffic Emission Factors
- C-4 Operational Modelling Results

D Photomontages

- D-1 Modified Diamond Interchange
- D-2 View of Proposed Noise Barrier from Wo Che Estate
- D-3 View of Proposed Noise Barrier from Lek Yuen Estate
- D-4 View of Proposed Noise Barrier from New Town Plaza
- D-5 View of Proposed Noise Barrier from Footpath
- D-6 View of Proposed Noise Barrier from Tai Po Road
