

## **TABLE OF CONTENTS**

- 1. INTRODUCTION**
  - Background
  - Purpose and Scope of EIA
  - Assessment Area
  - Organisation of the Report
  
- 2. PROJECT DESCRIPTION**
  - Location of the Project
  - Need of the Project
  - Consideration of Alternative Options for New Cross-boundary Helipad Location
  - Description of the Project
  - Project Programme
  - Construction and Operational Activities
  - Public Consultation
  
- 3. NOISE IMPACT**
  - Introduction
  - Environmental Legislation and Standards
  - Description of the Environment
  - Assessment Area & Noise Sensitive Receivers
  - Identification of Potential Impact
  - Assessment Methodology
  - Evaluation of Potential Impact
  - Mitigation Measures
  - Evaluation of Residual Impacts
  - Environmental Monitoring and Audit
  - Conclusion
  
- 4. WATER QUALITY IMPACT**
  - Introduction
  - Environmental Legislation, Policies, Plans, Standards and Criteria
  - Baseline Conditions
  - Marine Sensitive Sites
  - Assessment Methodology
  - Identification and Evaluation of Water Quality Impacts
  - Mitigation Measures
  - Evaluation of Residual Impacts
  - Conclusion
  
- 5. AIR QUALITY IMPACT**
  - Introduction
  - Environmental Legislation and Standards
  - Description of the Environment
  - Air Sensitive Receivers
  - Identification of Potential Impact
  - Assessment Methodology
  - Evaluation of Potential Impacts
  - Mitigation Measures
  - Evaluation of Residual Impacts
  - Environmental Monitoring and Audit
  - Conclusion
  
- 6. WASTE MANAGEMENT IMPLICATIONS**
  - Introduction
  - Environmental Legislation and Standards
  - Assessment Methodology and Criteria
  - Identification and Evaluation of Environmental Impacts
  - Mitigation Measures

Conclusion

## **7. ENVIRONMENTAL MONITORING AND AUDIT**

Introduction

Noise Impact

Water Quality Impact

Air Quality Impact

Waste Management Implications

## **8. OVERALL CONCLUSION**

## **9 IMPLEMENTATION SCHEDULE**

### LIST OF TABLES

Table 3.1	Construction Noise Criteria for Activity other than Percussive Piling
Table 3.2	Standards for Helicopter Noise (0700 to 1900 Hours)
Table 3.3	Locations of Representative Noise Sensitive Receivers
Table 3.4	Summary of Assessment Points
Table 3.5	Powered Mechanical Equipments Used During Construction Phase
Table 3.6	Current and Future Operation Mode of the Existing MFT Helipad and Proposed New Helipad
Table 3.7	Adjusted Helicopter Noise Level for S76C+ under Full-Load Condition
Table 3.8	Assessment Scenarios for Existing MFT Helipad
Table 3.9	Assessment Scenarios for Proposed New MFT Helipad
Table 3.10	Assessment Scenarios for Cumulative Noise Impact from both Existing and Proposed MFT Helipads
Table 3.11	Unmitigated Construction Noise Levels at Representative NSR
Table 3.12	Noise Correction due to Screening Effect for Assessed NSRs when Helicopter Operated at Proposed New Helipad
Table 3.13	Predicted Noise Levels, L <sub>max</sub> , during 0800-2300 hours for Existing Operation Mode
Table 3.14	Predicted Noise Levels, Leq (4 hours), during 1900-2300 hours for Existing Operation Mode (based on Current and Maximum Allowable Number of Movement)
Table 3.15	Predicted Noise Levels, L <sub>max</sub> , during 0800-2300 hours for Future Operation Mode of Proposed New MFT Helipad
Table 3.16	Predicted Noise Levels, Leq (4 hours), during 1900-2300 hours for Future Operation Mode of Proposed New Helipad
Table 3.17	Predicted Noise Levels, L <sub>max</sub> , during 0800-2300 hours for Future Operation Mode of Both Existing and Proposed New MFT Helipads
Table 4.1	Summary of Water Quality Objectives for Victoria Harbour WCZ
Table 4.2	WSD Standards at Sea Water Intakes
Table 4.3	Summary Statistics of 2002 Marine Water Quality in the Vicinity of the Macau Ferry Terminal
Table 4.4	Summary Statistics of 2003 Marine Water Quality in the Vicinity of the Macau Ferry Terminal
Table 5.1	Hong Kong Air Quality Objectives
Table 5.2	Annual Average of Pollutants in mg/m <sup>3</sup>
Table 5.3	Summary of Representative Air Sensitive Receivers
Table 5.4	Current and Future Maximum Frequency at the Existing MFT Helipad and Proposed New Helipad
Table 5.5	NO <sub>x</sub> Emission Factor of Engine T58-GE-8F
Table 5.6	Number of Ferry Movement at MFT
Table 5.7	Predicted 1-hour Average NO <sub>2</sub> Concentrations at the Representative ASRs
Table 8.1	Summary of Key Environmental Outcomes/Benefits
Table 9.1	Implementation Schedule for Noise Control
Table 9.2	Implementation Schedule for Water Quality Control
Table 9.3	Implementation Schedule for Air Quality Control
Table 9.4	Implementation Schedule for Waste Management

## List of Figures

Figure 1.1	Location of Project Works
Figure 3.1	Locations of Representative Noise Sensitive Receivers
Figure 3.2	Cross-section for NSR N9
Figure 3.3	Cross-section for NSR N17
Figure 3.4	Cross-section for NSR N19
Figure 3.5	Indicative Flight Paths MFT Inner Pier
Figure 3.6	Screening Effect from the Shun Tak Centre
Figure 3.7	Noise Contour Plot – S76C+ Hovering at the Proposed Helipad
Figure 3.8	Noise Contour Plot – S76C+ Idling at the Existing Helipad and S76C+ Hovering at the Proposed Helipad
Figure 4.1	Location of EPD Monitoring Stations
Figure 4.2	Existing Marine Sensitive Sites
Figure 5.1	Locations of Representative Air Sensitive Receivers

## List of Appendices

Appendix 3.1	Review of Noise Criteria for Helicopter Noise
Appendix 3.2	View from the Existing Helipad / Sensitive Receiver
Appendix 3.3	Certificated Noise Levels of Different Helicopters
Appendix 3.4	Helicopter Noise Measurement Methodology
Appendix 3.5	Summary of Measured Helicopter Noise
Appendix 3.6	Calculation of Helicopter Noise Level, L <sub>max</sub>
Appendix 3.7	Calculation of Helicopter Noise Level, L <sub>eq</sub>
Appendix 3.8	Summary of Predicted Noise Levels for Use of S92 (1) (2)
Appendix 3.9	Maximum Combination of Flights Number Predicted
Appendix 5.1	Emission Factors Calculation
