

Appendix 13-2

Photographs of each habitat type defined within the Assessment Area for the proposed development at Fung Lok Wai.

Intertidal forested wetlands – mangrove stands

Permanent rivers, streams and creeks – natural flowing freshwater habitats

Ditches and drainage channels – artificial ditches, drainage channels and nullahs

Aquaculture pond (actively managed) – fishponds managed for commercial aqua-culture production

Aquaculture pond (unmanaged) – fishpond where no management facilities were observed in the immediate vicinity of the pond and the pond bunds were encroached with emergent vegetation

Pond bunds

Reedbed

Permanent freshwater marsh and pools – flooded areas comprising a mix of water-dependent plants

Seasonally flooded agricultural land – includes intensively managed wet agricultural land

Dry agricultural land – agricultural land on which a range of food crops and flowers are cultivated

Inactive agricultural land - fallow or abandoned agricultural land which is un-managed and has been invaded by herbaceous or shrubby vegetation

Orchard - patches of fruit trees mainly found scattered among rural village areas

*Fung-shui* Forest - forest found around rural villages comprising native species or a mix of native species and fruit trees;

Semi-natural secondary woodland – Woodland formed from a mixture of planted and native species, moderately disturbed by human activity.

Plantation Forest - landscaping or ornamental plantations mainly found along roads and on cut-slopes;

Grassland – habitats dominated by grass and herbaceous species

Grassland-shrubland mosaic - undisturbed areas with grassland comprising 80% of cover

Landscaped area – areas managed intensively for landscape or amenity purposes

Works in progress

Wasteland - secondary vegetative colonisation (mainly grasses and ruderals) on areas opened by human activities (excluding those grown on inactive agricultural land)

Developed area - areas highly developed with no visible vegetation cover except road-side weeds and includes a wastewater treatment works and associated water storage area
