<b>Establishment of the Wetland Nature Reserve (WNR)</b>																					
Pre-construction phase																					
Erect boundary fencing and works area hoarding																					
Commence monitoring of existing egretty																					
Commence alternative egretty construction																					
<b>Enhancement of Sector 1 Ponds</b>																					
Existing management																					
Relocate water from Sector 1 ponds																					
Drain, remove bunds and install water controls																					
Re-fill ponds to IOL																					
Interim management																					
<b>Enhancement of Sector 2 Ponds</b>																					
Existing management																					
Relocate water from Sector 2 ponds																					
Drain, remove bunds and install water controls																					
Re-fill ponds to IOL																					
Interim management																					
<b>Enhancement of Sector 3 Ponds</b>																					
Existing management																					
Relocate water from Sector 3 ponds																					
Drain, remove bunds and install water controls																					
Re-fill ponds to IOL																					
Interim management																					
<b>Marshland construction and establishment</b>																					
Existing management																					
Raise level and carry out land formation																					
Place impermeable clay liner in position																					
Construct water control structures																					
Test hydrological integrity of site and structures																					
Carry out top soiling and fine scale land formation																					
Initial soil preparation for planting																					
Planting																					
Vegetation establishment management																					
Construct board walks, hides, toilets and shelters																					
<b>Construction works for development area</b>																					
Site clearance																					
Pond draining and dredging																					
Pond filling																					
Spreading and compaction of fill material at built area																					
Site investigation																					
Foundation works - bored piling, sheet piling and pile cap construction																					
Superstructure																					
Construction of sewage pumping house																					
Laying of drainage, sewerage and utilities																					
Paving of internal access road																					
<b>Improvement works of the access road leading to the Site</b>																					
Site clearance and formation																					
Laying of drainage, sewerage and utilities																					
Formation of road sub-base, levelling and compaction																					
Road paving and installation of road furniture																					

\* It is intended that construction activities involving heavy machinery within the WNR will, to the extent possible, be conducted during the dry season
