Mitigation Measures of HKLR Viaduct Section

Notes:
1. The examples provide the general ideas of design measures for aesthetic and urban design elements of viaduct section of HKLR.
2. The examples are indicative only and subject to the design and development in detailed design stage.
3. Proper mitigation measures such as aesthetic design of the bridge form and its structural elements including the parapet, soffit, columns and so on and decorative urban design elements and lightings for the HKLR should be considered in the detailed design stage.
