Section 2-2

Typical Plan for pit to receive $M_i$ sediment in HKLR

Pit to receive $M_i$ sediment

Shoreline of Airport Island

Marine access to the pit

Steel Sheet Pile

Silt Curtain

Floating buoy

Sealevel

Silt Curtain

Weight

Seabed level

150m typ.

50m typ.

About 5m

Depth: about 2.5m for HKLR

Filling of $M_i$ sediment up to seabed level

Airport Island

Drawing Title

Proposed Details and Mitigation Measures for the Pits to Receive $M_i$ Sediments in HKLR
